Mr. President, this is a colloquy with Senator GORTON and Senator DOMENICI which has been agreed to. It has to do with the fact that in the bill before us there is $34 billion in new budget authority but an additional $15.1 billion in off-budget direct and guaranteed loans.

Our colloquy points out the need for Congress to establish a credit budget, in the budget process, which will give us a complete sense of the actual impact on the economy of the legislation we adopt.

Altogether, we are going to have upward of $150 billion in credit in the appropriation bills that will be coming through. If the Senator from Washington will allow me, may I restate:

Mr. President, that the appropriations bill for Agriculture, rural development and related agencies for 1984 recommends some $34 billion in new budget authority. However, what is not being discussed here today is a total of $15.1 billion that is also in this bill for off-budget direct and guaranteed loans. This amount represents $15 billion in Government resources over and above the $34 billion that we are discussing today.

Mr. GORTON. Yes; the Agriculture appropriation bill before us will provide funding for three major Federal credit program agencies: The Rural Electrification Administration, the Farmers Home Administration, and the Commodity Credit Corporation. A number of programs in these agencies date back to the 1930's. Yet while the operations of the Federal Government for many decades have not been confined to simple cash outlays, the Federal budget process, including the appropriations process, has yet to recognize the true scope of activity that is presented in this Agriculture appropriations bill. Little is being said, for example, about a $4.7 billion loan guarantee program in the Rural Electrification Administration, or $1.1 billion in off-budget direct loans in the same agency.

Mr. MOYNIHAN. There is virtually no discussion of this because we lack a Federal credit budget; and it is only through a framework such as this, that the true magnitude of the bill before us would be discernible.

Mr. GORTON. This week I joined with Senator MOYNIHAN and Senator METZENBAUM in proposing legislation that would create a credit budget. The consideration of this agriculture appropriations bill presents an appropriate occasion to point out why this legislation is so critical. The operations of the Farmers Home Administration are an excellent example of my point. There is authority for some $3 billion in direct loan outlays by the Farmers Home Administration contained in this bill. Yet there is no logical reason why these outlays would not be added into the Federal deficit, and be included equally in the debate in the budget process—but they will not be. They are credit programs, currently financed through the Federal Financing Bank, and therefore moved off-budget. It is understandable, that in the absence of a credit budget, that the Congress does not consider off-budget outlays under the same stringent criteria devoted to on-budget outlays.

Mr. MOYNIHAN. Yes, but these off-budget outlays have the same effects on the financial markets, on private investment, and interest rates as do the outlays that are counted in the budget deficit. In 1982, off-budget outlays amounted to $14 billion, and the estimates for 1983 and 1984 are currently above $17 billion, according to CBO and the Senate Budget Committee.

Mr. DOMENICI. I agree that we need much greater coordination between Budget and Appropriations Committee actions on Federal credit activities, and that ultimately we will need a strong Federal credit budget as part of the budget process.

I compliment the Senator for his remarks.

Mr. DECONCINI. Mr. President, on page 22 of the Appropriations Committee report on H.R. 3223, the committee notes the importance of the Pima cotton research program being carried out at Tempe, Ariz., and directs that, within available funds, $200,000 be provided to continue a viable and effective breeding program, and to provide a research associate for the director of that program. Am I correct in assuming that the $200,000 is in addition to the current program funding level?

Mr. COCHRAN. The committee does recognize the importance of the American Pima cotton improvement program to the entire cotton industry, and it is the committee's intent that, within funds available for cotton research, $200,000 additional be made available to this program.

Mr. DECONCINI. I thank the distinguished chairman of the Appropriations Subcommittee on Agriculture, Rural Development, and Related Agencies for this clarification and for his support for cotton producers throughout the Nation.

Mr. BUMPERS. Mr. President, during the full committee markup of the Agriculture Appropriations bill, I asked whether funds for the mosquito research-riceland agroecosystem program and the integrated pest management program, both currently conducted by the University of Arkansas under the USDA-CSRS special grants budget—Public Law 89-106—where included in the Mosquito Research line item and the pest management line item, respectively, of the fiscal year 1984 appropriation for the Cooperative State Research Service. Both the integrated pest mangement program and the mosquito research-riceland agroecosystem program are very important in our efforts to improve strategies for pest management. The distinguished chairman of the Agriculture Subcommittee, Senator COCHRAN, agreed to seek clarification. Is my understanding that the two University of Arkansas programs are, in fact, included in the respective USDA-CSRS special grants line items. Am I correct?

Mr. COCHRAN. I thank the Senator for his inquiry about these two important programs. Appropriations for them are included, as the Senator described, in the bill.

Mr. GORTON. Mr. President, I have a question for the Chairman of the Appropriations Subcommittee on Agriculture, the Senator from Mississippi. Senator, I have been queried by constituents who are concerned about the possible redirection of Agricultural Research Service research from areas where it has been very important, according to a 6-year implementation plan proposed by the Department. The committee report, however, appears to reaffirm that the USDA is to continue its broad program of research, applied as well as basic, and in particular, that areas of research such as varietal research are to be continued. Am I correct?

Mr. COCHRAN. The Senator from Washington is correct on both counts. It is the sense of the committee that the agriculture sector continues to re-

quire research support from the ARS on a broad front. Any changes from that position, such as those implicit in the Department's recently proposed 6-year implementation plan, must certainly be scrutinized by Congress. With respect to varietal research, I would add that it is only one example of many areas where it is the sense of the committee that the USDA should continue its research efforts. Any changes in ARS's research activities that would be implemented through the so-called 6-year plan should be presented to the appropriate committees of Congress for review prior to implementation.

Mr. GORTON. I thank the Senator.

Mr. HELMS. Mr. President, I wonder if I might engage the distinguished chairman of the subcommittee, Mr. COCHRAN, in some discussion and possible clarification regarding the provision contained in the food stamp section of the appropriations bill before us relating to community mental health centers.

As a general rule, the Food Stamp Act of 1977 does not permit publicly operated institutional agencies to participate in the food stamp program; however, certain private, nonprofit residential programs are permitted.

I want to be certain that I understand that the provision relating to food stamp approval—for participation—of publicly operated community mental health centers has the limited intent of restoring eligibility for food stamp approval to certain publicly operated residential programs serving alcoholics which are federally funded through block grants.

It would not significantly expand the potential for food stamp approval to include types of institutional living arrangements not now being approved. Rather, it is aimed at correcting a limited problem whereby residential alcoholic treatment programs have been, in a few recent instances, denied food stamp approval simply because of the public versus private nature of the operating agency.

The provisions would allow publicly operated residential alcoholic treatment programs to be approved, as long as the public agency administering the programs is a community mental health center federally funded through the block grant system—a very limited exception to the general rule against food stamp approval of publicly operated institutions. It also leaves to the authorizing committee the long-run resolution of what types of institutional settings may be approved.

Mr. COCHRAN. The Senator is correct. This provision is an interim response to a particular problem that has surfaced recently in my own State of Mississippi, and which may come up in a few other instances.

The U.S. Department of Agriculture has recently ruled that residential alcoholic treatment programs operated under the aegis of publicly operated community mental health centers are not eligible for food stamp approval. The justification for this ineligibility was that the programs do not fit the requirement that appropriate programs be private. This ruling has put such programs at a disadvantage.

I should note that roughly 800 of the federally funded community mental health centers in the country are publicly operated, and a small minority operate residential alcoholic treatment programs—so we are talking about a limited category of programs.

It would be this minority within a minority that would be affected by this provision. Unfortunately, they appear to be concentrated in Mississippi—at least those which have been identified.

The provision before us would simply put those few alcoholic treatment programs run by publicly operated community mental health centers on a par with those run by private nonprofit entities.

Mr. HELMS. I thank the Senator and commend him for having acted on behalf of the centers of concern to him. I will certainly entertain his suggestions for a long-term solution to this problem through an amendment to the Food Stamp Act of 1977 which can be dealt with through the Committee on Agriculture, Nutrition, and Forestry.

Mr. COHEN. Mr. President, I note language in the committee report on the agricultural appropriations bill concerning Farmers Home Administration rental assistance (RA). Does the committee intend by this wording that the recent administrative notice (AN)-799 FmHA directive be rescinded enabling a rural housing project to receive 100 percent RA as has been done in the past?

Mr. COCHRAN. Yes. Congress has consistently required the FmHA to target assistance to the poorest, worst-housed citizens in rural communities through the RA program, even if that results in 100 percent RA.

Mr. COHEN. The report language states that a market only has to be shown to exist for persons and families eligible for those payments. Will there be a requirement to demonstrate a market able to pay the proposed rents?

Mr. COCHRAN. No. The committee felt this requirement in rural areas where the poorest, worst-housed citizens reside.

Mr. COHEN. In Maine, for example, we have three areas in particular which require 100 percent RA. The FmHA RA program represents for many the only possibility of housing in economically depressed areas of my State. In FmHA Administrator Charles Shuman's May 23 letter to me he does acknowledge that the agency needs to assist the neediest persons. Yet his recent AN-799 directive states:

> It is strongly advised and recommended that State Directors adhere to the 40 percent limitation on allocating RA units to projects as indicated in paragraph VA, 3 of Exhibit C to FmHA instruction 1944-E. * * * this will assure to some extent that RRH projects will not be more than 40 percent dependent on RA for full occupancy and/or totally dependent on the availability of RA units in the near future.

It continues, "In allocating RA units for new construction to RRH projects in your state, you should evaluate and rank all projects as if none were to receive RA units." This AN is, in effect, telling State Directors not to build any projects if they require more than 40 percent RA. This would further mean that the poorest, worst-housed citizens in the poorest towns in Maine will never be eligible for decent and affordable housing through the FmHA program. Is it the committee's feeling that these citizens' housing needs can only be met if the 40 percent limitation on RA is eliminated?

Mr. COCHRAN. Yes. The Senator's understanding is correct that it is the clear intent of the committee that the proposed 40 percent limitation not be implemented.

Mr. COHEN. I thank the chairman for his explanation.

AMENDMENT NO. 1448

(Purpose: To provide a $5,000,000 contingency fund for the Food and Drug Administration for emergency-related activities)

Mr. COCHRAN. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

> The Senator from Mississippi (Mr. COCHRAN), for himself and Mr. EAGLETON, proposes an amendment numbered 1448.

Mr. COCHRAN. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

> On page 54, line 7, after the figure $364,410,000 insert the following: ", of which $5,000,000, to remain available until expended, shall be available to meet unanticipated costs of emergency activities not provided for in budget estimates."

Mr. COCHRAN. Mr. President, this amendment is sent to the desk in behalf of the Senator from Mississippi and the Senator from Missouri (Mr. EAGELTON). It is technical in nature and provides language in the bill that was inadvertently omitted from the bill.

It simply permits the Food and Drug Administration to have available until expended from funds appropriated in the bill, an amount for emergency ac-

tivity in connection with the recall and investigation of possibly dangerous substances. This matter is addressed in Senate Report No. 98-160, which accompanies this bill, H.R. 3223. No additional funds are necessary, as they are included in the dollar amount immediately preceding the language contained in the amendment.

What we are doing by this amendment is providing funding for unanticipated emergency events which might significantly increase the Food and Drug Administration's direct costs, such as overtime, travel, transportation, and per diem to carry out the recalls of such items as canned salmon and infant formulas. In 1983, the agency incurred additional direct costs related to Tylenol and other product-tampering incidents. Such recalls and investigations not only distort the agency's program plans by forcing the cancellation or deferral of other activities, but they also substantially increase direct costs as field personnel must work longer hours and travel great distances for prolonged periods to be sure that potentially hazardous products are off the market, or to identify and isolate the cause of a potential hazard as quickly as possible to limit the public risk. Such a fund would eliminate the need for emergency supplementals and the uncertainty in managing the agency resources which results when national emergency situations require a sudden increase in expenditures.

Outlays would not be encountered until such situations are encountered. These funds would remain available until expended, and the agency would seek restoration of this contingency fund through the regular budget cycle.

Senator EAGLETON, ranking minority member of the Subcommittee on Agriculture, Rural Development, and Related Agencies, is a cosponsor of this amendment.

I do not think there is any further debate on the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Mississippi.

Mr. COCHRAN's amendment (No. 1448) was agreed to.

Mr. HELMS. Mr. President, I want to call attention to some very curious language in this Agriculture appropriations bill with regard to funding for the special supplemental food program for women, infants, and children.

The bill states that—

> Funds provided shall be expended in such a manner as to insure that the average participation during the period from October 1, 1983, through July 10, 1984, does not fall below 2,800,000 persons.

I do not know how State, local, or Federal officials are supposed to know how to administer such a provision. Are they supposed to go out recruiting WIC participants if the participation is below that level?

Mr. President, it should be noted also that the basis for the 2.8 million persons is one which is constantly changing. That was the estimate of the Congressional Budget Office earlier this year based on the assumption that 2.8 million persons would be participating by the end of fiscal year 1983. That may not be the case at all by the time the fiscal year begins.

Most recent participation levels indicate approximately 2.4 million persons. While there is expected to be some increase, based on the additional funding contained in the jobs bill earlier this year, that is by no means guaranteed.

It seems imprudent in the extreme to specify minimum levels of participation.

I should also point out that funding at the level contained in the appropriations bill would result in exceeding the current authorization level by the end of fiscal year 1984.

If the authorized level is insufficient, our committee will need to assess the participation characteristics to determine whether a lifting of the ceiling is appropriate.

There are a good number of concerns, first identified by the General Accounting Office, about the uniformity in defining "nutritional risk" of participants. In some areas, apparently belonging to a particular group or social class may make one eligible regardless of one's actual nutritional status.

I think we must recognize that when a program such as WIC begins to have 20 percent of all infants enrolled in it, we need to scrutinize whether it is being sufficiently targeted to the poor who are undernourished or whether it has grown beyond its original purpose.

Nonetheless, with regard to the specific language contained in the bill, I think it is likely to be unenforceable if it even can be deciphered.

I also want to comment on the unanimous consent request adopted earlier changing the Puerto Rican language to provide a 3-month delay for implementing a noncash form of assistance. I believe that the compromise on Puerto Rico is a good one. I feel strongly that the prerogatives of the authorizing committees should not be infringed upon by the Appropriations Committee. I can imagine the uproar which would ensue if any authorizing committee attempted to appropriate money.

I recognize that this is the vehicle which is moving at the present in a timely manner which could provide some relief for Puerto Rico's current October 1 deadline for changing to some noncash form of assistance.

I believe that the Puerto Rican government should have the option of establishing the form of assistance that they believe is most effective. They have chosen a cash form which, by most reports, has worked quite well. Indeed, the support for the system has been widespread. The use of cash has been coupled with many improvements in the operation of the program which have been urged by many competent caseworkers across the country for years.

This amendment will insure that Puerto Rico does not have to change the assistance on October 1. Yet it will preserve the prerogatives of the Committee on Agriculture, Nutrition, and Forestry to deal with the long-term solution to the problem later this summer.

I commend my colleagues for their agreement to this compromise. I assure them that this matter will receive careful consideration in due course before our committee.

AGRICULTURE APPROPRIATIONS BILL REMAINS UNFAIR TO U.S. CONSUMER

Mr. PELL. Mr. President, I have decided to vote against Senate passage of the agricultural appropriations bill because I believe it remains far too generous to the private agricultural industry and unfair to taxpayers and consumers. It is particularly unfair to heavily burdened families relying upon food stamps.

At a time when the majority of the Senate has approved deep cuts in essential health, education, and employment programs and, particularly, at a time when the Nation is saddled with a rapidly growing deficit, a subsidy laden agricultural appropriations bill cannot be justified.

Although this bill contains funding for vital child nutrition programs and food stamps, the amounts are woefully inadequate. The Congressional Budget Office has reported that the appropriated funding level will result in a loss of about $50 to $100 per recipient family in food stamp benefits.

It is wrong to ask taxpayers to pay for overblown price-support programs that only assure consumer prices will remain high. When we are asking our citizens to tighten their belts, I cannot support the payment of massive subsidies to the agricultural industry nor the cuts in food stamp benefits for those who need them.

Mr. LEVIN. Mr. President, I would like to commend my colleagues from Missouri and Mississippi for their fine work on the Agriculture appropriations bill, H.R. 3223, that is before the Senate today. There are several items included in the bill that are of special interest to the State of Michigan and I would like to mention two of them to my colleagues.

First, the Agriculture appropriations bill includes $200,000 for research on dioxin in the food chain. This research project will be performed at Michigan State University, one of the oldest

land grant colleges created in the United States. Its long-standing agricultural expertise makes it a wise choice for this important project. As my colleagues remember, the fiscal year 1984 budget for HUD-independent agencies, which was just given final approval by the Senate, includes funding for the Environmental Protection Agency to finally begin a serious research program to examine the health effects of dioxin. The research program proposed in the Agriculture appropriations bill will complement that work.

The bill also includes $100,000 for research to limit asparagus yield decline due to fusarium root rot. Although we in Michigan are very concerned about this growing problem—which has decimated asparagus production in some States—because we are the third greatest asparagus producer in the United States, all States that grow this delectable vegetable will benefit from this research effort. I have worked with farm groups in Michigan who persuaded me of the value of the asparagus research project. And as one who has tried personally to produce asparagus, I have great respect for those who have been more successful in that venture than I. I commend my colleagues on the Appropriations Committee for recommending that this program be funded and I urge the Senate to accept the recommendation of the committee.

Mr. BENTSEN. Mr. President, I commend my distinguished colleagues on the Agricultural Appropriations Subcommittee, the Senator from Mississippi (Mr. COCHRAN) and the Senator from Missouri (Mr. EAGLETON), for the excellent work which they have done in balancing the many needs which are represented in this bill. I especially want to commend the action which they and the other members of the Appropriations Committee have taken on brucellosis research. The committee has acted to fund increased research on this cattle disease in an effort to at last find an answer to the challenge offered by this troublesome disease.

For several years I have called for expanded brucellosis research, and Texas has played an important role in developing the research plan that this bill would fund today. Over 2 years ago, the Independent Cattlemen's Association of Texas set out to formulate a positive research plan that would answer many of the unknowns about the brucellosis disease. Repeated calls to many private drug firms brought only frustration, despite the cattlemen's willingness to provide both funding and animals to a research project.

However, on July 25, 1982, the Austin American-Statesman carried an article about the synthetic vaccine work of Dr. Richard Lerner of Scripps Laboratory in California. Dr. Lerner had discovered a breakthrough technology in creating a synthetic vaccine for hoof-and-mouth disease. The ICA leadership contacted Dr. Lerner with the question, "Could the same technology be applied to brucellosis?" The answer was positive, but with the caution that a great deal of preliminary work was necessary. Dr. Lerner referred the cattle organizations to Pittman-Moore, a research and development subsidiary of Johnson & Johnson.

ICA repeated its question to Pittman-Moore and again got encouragement. A meeting was held last fall in ICA's Washington office to discuss the possibility of a synthetic vaccine for brucellosis control. Pittman-Moore agreed to assist in developing a research program and it was decided that other cattle organizations and the leading brucellosis scientists should be brought into the planning process.

As a result, on March 30, 1983, the Independent Cattlemen's Association hosted a meeting in Dallas to discuss research possibilities for brucellosis. The meeting was dubbed the "Conference on Innovative Approaches to Brucellosis." The following groups were invited and attended: The Associated Milk Producers, the Texas & Southwestern Cattle Raisers Association, the National Cattlemen's Association, and the Texas Animal Health Commission. Brucellosis scientists from the University of Florida, Cornell University, Texas A&M University, and Oklahoma State University were also present, as were representatives of Pittman-Moore and Johnson & Johnson.

At the encouragement of Congressman WES WATKINS, Oklahoma State agreed to host a followup session the next week in Poteau, Okla. This meeting was also referred to as the "Conference on Innovative Approaches to Brucellosis," and it was at this meeting that the research protocol we are funding today was worked out.

This is not the only work that has been done on this subject, Mr. President. Scientists with the Texas Agricultural Experiment Station are engaged in a number of brucellosis research projects, including a cooperative effort with scientists at Cornell University on a subunit nonviable vaccine. This research into the specific sources of brucellosis immunity offers promise both in the development of more effective vaccines and in the development of screening tests that can quickly and accurately distinguish animals which have brucellosis from those which have been vaccinated for the disease.

Also, scientists at the Science Research Center for Hardin-Simmons University, located in Abilene, Tex., have this year developed a "killed Strain 19" vaccine that has demonstrated to be 93 percent effective in early tests with guinea pigs. These scientists are hopeful that they, too, can perhaps qualify for some of the research funding that we are discussing today.

The encouraging part of the brucellosis challenge, Mr. President, is that cattlemen and scientists are working together to find some of the answers to the challenges this disease offers. The research we are funding today is a constructive, positive action and I hope my colleagues will join me in supporting it.

NATIONAL CENTER FOR TOXICOLOGICAL RESEARCH

Mr. PRYOR. Mr. President, I wish to commend the distinguished chairman and ranking minority member of the Appropriations Subcommittee on Agriculture, Rural Development and Related Agencies, Senator COCHRAN and Senator EAGLETON, as well as the other members of the Senate Appropriations Committee for including $2,425,000 in the 1984 appropriations bill for facilities at the National Center for Toxicological Research in Jefferson, Ark.

This support reflects an awareness that NCTR is conducting important research into complex problems. I am confident that the Appropriations Committee, as indicated in the committee report, will continue to consider the future construction needs at NCTR.

As a component of the Food and Drug Administration, NCTR conducts research programs to study the biological effects of potentially toxic chemical substances found in man's environment and develops improved scientific procedures for evaluating the safety of chemical toxicants and their long-term effects.

The emphasis is on problem solving, not just problem identification. Too often Government researchers simply devote their attention to the identification of the problem. NCTR takes this process to the next and most important step, by directing substantial research toward finding ways to detoxify substances which have harmful effects on man.

NCTR is pursuing a myriad of research projects, including research into effective cleanup methods of dioxin, nutrition research to determine carcinogenic impacts of certain chemicals in food products, as well as DES and saccharin research. As you can see, NCTR is involved in timely research which demands attention now, for our protection and for the protection of those who follow.

The importance of the type of work which takes place at NCTR must not be lost on Congress. It is critical that we understand our responsibility to commit adequate resources to an area

with such potentially dramatic human implications.

Mr. President, although NCTR is administered primarily by the FDA, it conducts research for many Federal agencies. Besides FDA, it is currently involved in projects for the Environmental Protection Agency, the Consumer Product Safety Commission, the Department of Agriculture, and the Department of Defense.

I had the pleasure of visiting NCTR in April and I was most impressed with the quality of scientific study. What NCTR needs now, though, is a chance to expand to its fullest potential. In doing so, I am confident it will repay our investment many times over. An investment today could mean the saving of many lives in the future.

Again, Mr. President, let me express my appreciation to my colleagues who have been instrumental in the effort to recognize the need for Federal support at NCTR. I ask that this support be unwavering, just as our fight for a healthy environment must be.

Mr. President, I am pleased that the Senate Appropriations Committee has expressed, in the committee report, its agreement with the directive of the House of Representatives that the Department of Agriculture review a proposal for the establishment of a plants material center under the auspices of the Soil Conservation Service, to be located at the Southwest Family Farms Research Center in Booneville, Ark. This center would provide suitable plant species needed to solve critical soil and water conservation problems in the four major land resource areas of Arkansas, Oklahoma, and Missouri. The Booneville, Ark., site offers a convenient focal point of cooperative effort with the Soil Conservation Service, the Agriculture Research Service, Arkansas Cooperative Extension Service, the Arkansas Agriculture Experiment Stations, the Arkansas Association of Conservation Districts, the Arkansas Soil and Water Conservation Commission, and the other agencies involved in solving critical resource conservation problems.

I commend the committee for its action.

Mr. President, I am pleased that the committee has included language in its report regarding a program for inventorying and monitoring ground water resources and irrigation needs. The language provides funds under a proposal by the Arkansas Association of Soil Conservation Districts to expand the pilot project begun by the Soil Conservation Service and the AAWSCD in Jackson County, Ark., in response to the water crisis in 1980.

The threat to ground water sources nationwide is well documented. Arkansas faces a severe threat and this proposed program would be invaluable to irrigation agriculture, other ground water users, and many local, State, and Federal agencies. The data gathered through this proposed program would provide an effective "early warning" system through which orderly management and alternative sources could be developed. The Soil Conservation Service and the U.S. Geological Survey strongly support this proposal, and expertise gained in establishing and operating the program could be made available to other interested States.

I commend the committee for its action.

IMPORTANCE OF THE AGRICULTURAL EXTENSION SERVICE AND OF THE 4-H CLUB PROGRAM

Mr. PRESSLER. Mr. President, as the Senate considers the 1984 Agricultural appropriations bill, I would like to express my strong support for agricultural research and extension programs and for the funds provided for these programs. In past years, I have spoken on this issue and would like to do so once again. I have made these same statements many times before, but believe it is important that we continue to recognize the great value of these programs.

I am pleased to see the Appropriations Committee increased the funding level for these programs above the administration's request and the House allowance. These will be Federal dollars well spent. I firmly believe that if we are to continue to increase agricultural productivity, great strides in agricultural research and a continued effective extension service is essential. This is especially important in these days of slowing rates of increases in farm productivity.

Having grown up on a small family farm, I know from personal experience that the Cooperative Extension Service has been very effective in increasing farm productivity. The Cooperative Extension Service has been an excellent example of cooperation among Federal, State, and local governments for more than 100 years.

I have personally been involved with 4-H and other vocational education groups since I was a young boy. In fact, today I had the pleasure of addressing a group of over 120 4-H'ers from South Dakota. As a member of the local 4-H club, the Humboldt Hustlers, for 9 years, I enjoyed many great experiences such as these young people have experienced today. I was fortunate enough to attend two 4-H club congresses in Chicago, the 1961 World Agricultural Fair in Cairo, Egypt, and I had the honor of giving the "National Report to the President" to the late John F. Kennedy in the White House in March 1963.

More recently, I had the opportunity to address the 50th National 4-H Conference in April 1980, and this year I was honored by being presented the "Partner in 4-H Award," the highest honor in 4-H.

While not all young people are as fortunate as I was in my 4-H involvement, these youth organizations are still extremely important in the lives of a great number of young people. The 4-H is the fastest growing youth organization in the country. In 1970, 4-H membership was 3 million, and presently 4-H has about 5.8 million members. 4-H serves not only rural America. Of the 5.8 million participants, 39.5 percent live in cities of populations over 10,000 and only 20.5 percent actually live on farms. But this 20.5 percent means that 37 percent of all farm youths are members of 4-H.

To help young people 4-H offers programs in all areas. A recent study of 4-H in inner city Detroit showed a 60-percent reduction in juvenile crime in the immediate area. In the rural area, 4-H'ers produce millions of pounds of farm products which contribute greatly to the American economy. In all areas of the country, 4-H members learn important characteristics such as sportsmanship, animal husbandry skills and management techniques. These skills will be of great value to these young people later on in life.

Many of the benefits young people receive from 4-H and other programs are because of the dedication of adult leaders. These leaders are area and county extension personnel and volunteers. County extension agents and home economists spend about 31 percent of their time on 4-H program activities and volunteer leaders spend about 10 hours for every 1 hour a professional staff person spends. A study has shown that each 4-H club leader gives an average of $1,000 per year in terms of mileage, materials donated and contributions given without record. This means the 4-H program is very dependent on the services of dedicated volunteers and this makes it a very cost-effective program.

Federal expenditures on agricultural research and extension activities are dollars well spent. The average Federal outlay for 4-H members is only $12.75, and America gets a return of about 10 times that amount in the value of volunteer services, and contributions that are stimulated by this investment. This does not take into account the future increases in productivity of agriculture and other areas that this research and training will create. This is especially important today because of the great importance of agricultural exports and the reduced rate of increase in farm productivity.

Mr. President, I have made all of these arguments before, but believe we should commend the Extension Service frequently for their good work.

Mr. THURMOND. Mr. President, I rise in support of S. 257, legislation

making Agriculture appropriations for the fiscal year 1984.

I am pleased that this bill includes $192,000 for a special research grant to study the problem of peach tree short life. For years, the premature death of peach trees has resulted in tremendous economic loss for peach producers throughout the Southeast. The problem intensified in 1980 when the EPA suspended the use of DBCP, the only known chemical effective in controlling peach tree short life.

Mr. President, in addition to this serious problem, peach producers in South Carolina have suffered massive crop losses, due to inclement weather, for the past 2 years. The South Carolina Peach Council estimated this year's crop loss alone at $50 million.

In short, the peach industry in the Southeast is experiencing its worst crisis in recent history. It is imperative that research to eliminate the problem of peach tree short life continue so that we can provide relief to the beleaguered peach industry, and I am glad that the Appropriations Committee had the foresight to continue funding of this project.

In addition, Mr. President, I am pleased that the Appropriations Committee has provided $1.9 million for the boll weevil eradication program. This program is designed to reduce and eliminate boll weevil populations on cotton farms in North and South Carolina. It is considered so important to cotton producers in those two States that this past January they passed a referendum to pay at least 70 percent of the cost of that program themselves.

Mr. President, the Appropriations Committee has also included $4.7 million for the witchweed eradication program. Witchweed is a parasite that contaminates corn corps and spreads with unyielding determination when unchecked. The witchweed eradication program has been successful in releasing 50 percent of the infested acres in South Carolina from quarantine, and has given corn producers in South Carolina reasonable hope that the witchweed problem can be eliminated from the entire State in the near future.

Mr. President, these programs are vital to agriculture in my area of the country. I commend Senator THAD COCHRAN for his able leadership as chairman of the Agriculture Appropriations Subcommittee, and I thank him and the other members of that committee, on behalf of the farmers of my State, for their efforts in this area.

Mr. COCHRAN. Mr. President, I think we can go to third reading.

The PRESIDING OFFICER. The bill is open to further amendment. If there is no further amendment, the question is on the engrossment of the amendments and the third reading of the bill.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time.

The PRESIDING OFFICER. The majority leader is recognized.

Mr. BAKER. Mr. President, if I could have the attention of the Senate for a moment, may I congratulate the managers of this bill once again for their excellent handling of a difficult matter.

It gives me great pause to say what I am about to say. I am going to vote for this bill partly because I have urged the Senate to take it up and pass it before we get out of here because I am so anxious to see the Senate address its responsibility to deal with appropriations bills.

But, Mr. President, this bill is more than $1 billion over the administration's budget. It is well over the congressional budget, and, may I say—and there is no element of intimidation, as I am sure everyone knows, in this—may I say unless significant improvement in this bill can be made in conference it will be my intention to vote against the conference report and try to defeat it.

But I think we owe it to the Appropriations Committee and to the Senate to go ahead, send this to conference and hope the conferees on the part of the Senate will do what must be done in order to bring it within the guidelines making it acceptable to the Congress and to the President.

Mr. HELMS. Mr. President, will the Senator yield?

Mr. BAKER. Yes, I yield.

Mr. HELMS. I agree with what the distinguished majority leader said. I wonder if the distinguished chairman of the Budget Committee has the figures in mind as to how much this is over the President's budget and how much it is over the congressional budget resolution.

Mr. DOMENICI. About an hour ago I addressed the Senate for a few moments and included a summary of tables.

The bill as it was reported to the floor, when you figure in what is expected to be spent for food stamps for the full year, which is not disputed, and the fact that CCC is about $500 million under, and that probably will not be realized for a year, the bill as reported is $1.4 billion in budget authority compared with the President's $1.3 billion in outlays.

However, the bill as reported was right on the mark in terms of the Congressional budget resolution.

On the floor I am told we added about $200 million in budget authority and outlays, so you can add that to each of the numbers, and that makes the bill that is before us about $385 million in outlays over the budget resolution and about $200 million in budget authority over the resolution which we passed.

Mr. HELMS. I thank the Senator.

Mr. BAKER. Mr. President, I now ask for the yeas and nays on final passage.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. MELCHER. Mr. President, part of $9.5 billion that is in this bill, a big chunk of it, is to reimburse the Commodity Credit Corporation for the cost of the payment in kind program (PIK). There will be more PIK costs to come, but I would like to point out to the Senate that the PIK program was advocated very vigorously by the administration.

While I have no quarrel with providing additional funds for the agricultural producers of this country, and indeed PIK has done that, I must note it is a very expensive agricultural program, and goes in the direction that I and farmers would prefer not to go, that is, curtailing production. Agricultural producers want to produce and to get paid in the markeplace with decent prices.

Most of this agricultural appropriation bill is for increasing production and increasing efficiency. What we are lacking right now is the will and the vigor of the administration and Congess to make sure that the agricultural abundance we have is either sold abroad or is used as part of our foreign programs in a true sense to help our neighbors around the world.

PIK can succeed but so far it is only succeeding in a limited way on a very costly price basis. We are probably going to end up with about $12 billion in obligations for the Commodity Credit Corporation for the first year of operation of PIK, and that is by far the largest, the most generous and the most costly, of all the agricultural programs that I know of. We need a sound policy of improving agricultural prices, sales abroad, and using food for peace to help agriculture and the country. PIK is only temporary.

The PRESIDING OFFICER. The question is, Shall the bill pass? The yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. BAKER. I announce that the Senator from Arizona (Mr. GOLDWATER), the Senator from Alaska (Mr. STEVENS) and the Senator from Connecticut (Mr. WEICKER) are necessarily absent.

I further announce that, if present and voting, the Senator from Alaska (Mr. STEVENS) would vote "yea."

Mr. CRANSTON. I announce that the Senator from South Carolina (Mr. HOLLINGS) and the Senator from Colo-

rado (Mr. HART) are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 77, nays 18, as follows:

[Rollcall Vote No. 179 Leg.]

YEAS—77

NOT VOTING—5

Goldwater	Hollings	Weicker
Hart	Stevens	

So the bill (H.R. 3223), as amended, was passed.

Mr. COCHRAN. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. HATFIELD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. COCHRAN. Mr. President, I move that the Senate insist on its amendments to H.R. 3223 and request a conference with the House on the disagreeing votes of the two Houses and that the Chair be authorized to appoint conferees.

The motion was agreed to and the Presiding Officer appointed Mr. COCHRAN, Mr. MCCLURE, Mr. ANDREWS, Mr. ABDNOR, Mr. KASTEN, Mr. MATTINGLY, Mr. SPECTER, Mr. HATFIELD, Mr. EAGLETON, Mr. STENNIS, Mr. CHILES, Mr. BURDICK, and Mr. SASSER conferees on the part of the Senate.

SUPPLEMENTAL APPROPRIATIONS FISCAL YEAR 1983, H.R. 3069—APPOINTMENT OF CONFEREES

The PRESIDING OFFICER. The Chair appoints the following as conferees on the part of the Senate on the supplemental appropriations bill, H.R. 3069: Mr. HATFIELD, Mr. STEVENS, Mr. WEICKER, Mr. MCCLURE, Mr. LAXALT, Mr. COCHRAN, Mr. ANDREWS, Mr. ABDNOR, Mr. KASTEN, Mr. D'AMATO, Mr. MATTINGLY, Mr. RUDMAN, Mr. STENNIS, Mr. INOUYE, Mr. EAGLETON, Mr. CHILES, Mr. JOHNSTON, Mr. HUDDLESTON, Mr. BURDICK, Mr. DECONCINI, and Mr. BUMPERS.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, I understand that we have received the conference report from the House of Representatives on the energy and water appropriations bill. Is that correct?

The PRESIDING OFFICER. The Senator is correct.

ENERGY AND WATER DEVELOPMENT APPROPRIATIONS 1984—CONFERENCE REPORT

Mr. BAKER. Mr. President, I have consulted with the chairman of the Appropriations Committee, with the President pro tempore, who I believe is prepared to proceed, and with the minority leader.

Mr. President, I submit a report of the committee of conference on H.R. 3132 and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The assistant legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 3132) making appropriations for energy and water development for the fiscal year ending September 30, 1984, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by all of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceeding of the RECORD of today, June 29, 1983.)

Mr. HATFIELD. Mr. President, I bring before the Senate today the conference report on H.R. 3132, the Energy and Water Development Act for Fiscal Year 1984. The conferees resolved the differences in the bill between the House and the Senate on Tuesday. The conference report and statement of managers have been filed as House Report 98-272 and it has been printed in the RECORD. Therefore, I shall not elaborate on all the items which were in disagreement, but I do want to sketch an outline of some of the important elements of the proposal which is before us today.

Before doing so, Mr. President, I wish to compliment our friends from the House, particularly the chairman of the House subcommittee, Mr. BEVILL, and the ranking minority member, Mr. MYERS, for the cooperation displayed in the conference meeting. I also want to thank the Senate conferees, particularly the ranking minority member and former chairman of the subcommittee, Senator BENNETT JOHNSON, for their support and cooperation during the conference on this measure.

Mr. President, the conferees did resolve the differences between the House and the Senate versions. I do take this opportunity to express my deepest appreciation to the ranking member of our committee, the Senator from Louisiana (Mr. JOHNSTON), and for the extraordinary performance on the part of the staff, as well, of the committee.

Mr. President, I believe we have reached, through long hours of negotiation, a reasonable agreement which should be cleared by the Senate and sent immediately to the President for his signature. This bill is certainly not a budget buster. The total of the bill is over $300 million below—I repeat, $300 million below—the President's budget request. Moreover, the conference agreement is nearly $30 million below the President's budget request for domestic spending programs.

As recommended by the committee of conference, the conference agreement provides $14,307,045,000 in new budget authority for energy and water development through the activities of the Department of Energy, Corps of Engineers, Bureau of Reclamation, and several independent agencies. To be specific, the amount of the conference agreement is $303,626,000 below the administration's budget request in budget authority. Based on Congressional Budget Office estimates this conference total is at least $100 million in budget outlays below the congressional budget estimates.

To reach this level of savings, the conferees were faced with some extremely difficult decisions. In many cases, after careful consideration, we agreed to the lower amounts for many programs and activities.

The conferees provided for specific reductions in budget authority by appropriation account rather than using a general reduction to the total of the bill as proposed by the House. As a result, the recommended funding level for most accounts is closer to the lower levels proposed by the Senate. Arriving at these lower amounts for specific appropriation accounts clearly shows our continued commitment and dedication to fiscal restraint.

Mr. President, the conference report and statement of managers provides much detail, and therefore, I shall summarize in rather general terms the appropriations provided for in the conference agreement.

Title I of the conference agreement provides appropriations for the U.S. Army Corps of Engineers civil works

program. The conference report provides a total of $2,641,386,000 which is an increase of $49,592,000 over the Senate level and a reduction of $54,038,000 below the House bill.

The Corps of Engineers funding level is $139,986,000 above the budget request, but $715,599,000 below the fiscal year 1983 level. Of the total amount, about one-third or $894,104,000 is provided for ongoing construction projects. The bill contains no new construction starts for either the Corps of Engineers or the Bureau of Reclamation.

For title II, the Bureau of Reclamation, the conferees recommend a total of $961,690,000, which is only $16,700,000 more than the Senate bill and $26,290,000 less than the House-passed bill.

The conference agreement contains $10,011,291,000 for Department of Energy programs in title III. This includes $1,951,609,000 for energy supply, research and development activities; $638,250,000 for general science and research activities; $378,763,000 for power marketing administrations and $29,582,000 for the Federal Energy Regulatory Commission. The energy accounts include $208,859,000 for solar, geothermal, and renewable energy development; $636,647,000 for nuclear fission activities including $346,500,000 for breeder reactor systems; and $470,750,000 for fusion energy development.

In the energy title, the conference agreement provides $6,547,375,000 for atomic energy defense activities. This is $277,700,000 below the budget request but still a total of $844,175,000 over the fiscal year 1983 level.

While I would have favored additional reductions in this account, the conferees proposed to reduce by 5 percent the 20-percent increase proposed by the administration. If we assume a healthy 5-percent inflation estimate, there is still a 10-percent real growth in energy defense over the previous year.

Frankly, I believe this type of increases at a time of growing budgetary problems illustrates our misplaced priorities in this energy budget.

Under the Reagan administration, funding for the energy defense activities at DOE has increased nearly 80 percent since fiscal year 1981, and the funding for production of nuclear warheads and nuclear bombs more than doubled from fiscal year 1981 to fiscal year 1983. These increases go far beyond our efforts to modernize, safeguard, and maintain the current nuclear weapons stockpile. The nuclear weapons program now consumes over 65 percent of the amount provided in the bill for energy activities. This is three times the total amount of funding provided for all energy technologies in the energy supply, research and development account. I submit that energy security and independence is every bit as important to our national strength and security as is our nuclear arsenal and nuclear stockpile. It is not an either/or proposition, of course, but we must move away from our tendency to think of our national security only in terms of hardware and sophisticated weaponry.

Under the atomic energy defense activities account, two items deserve special mention. First, the conferees adopted the Senate position to include the full budget request of $30 million for MX warhead production facilities. These funds were fenced, however, and the obligation of the funds is contingent upon approval by the Armed Services Committees and the Committee on Appropriations in order to insure that expenditures on warhead production is consistent with congressional action on the MX missile system.

For Project 82-D-109, production facilities for the 155 millimeter artillery fired atomic projectile, the conferees included $50 million as proposed by the House. The conference agreement, however, prohibits the obligation of these funds unless the President certifies to Congress that formal notification has been received from NATO countries in which such weapons are sought to be deployed that the country has approved replacement of the old 155 millimeter shell with the new 155 millimeter round.

Mr. President, the conference agreement includes $692,678,000 for seven independent agencies and commissions in title IV, including $145,000,000 for the Appalachian regional development program, $465,800,000 for the Nuclear Regulatory Commission, and $78,229,000 for the Tennessee Valley Authority.

Mr. President, again I express my thanks and deep appreciation to my friend and colleague, the distinguished Senator from Louisiana (Mr. JOHNSTON), who is the ranking minority member of this committee. I especially commend him for his dedication and support. It is a great pleasure to work with him. I extend my personal thanks to him.

Finally, Mr. President, both the majority and minority staff of this committee come in for special thanks—on the minority side, of course, Proctor Jones, and our majority staff members, Steve Crow, David Gwaltney, and Gloria Butland. I think they are especially to be commended for their diligent work on this bill.

Mr. President, I ask unanimous consent that a copy of the comparative statement of new budget authority be printed in the RECORD following my remarks.

There being no objection, the materials were ordered to be printed in the RECORD, as follows:

[1] FY 1984 estimate proposed in the Budget for later transmittal

Mr. HATFIELD. Mr. President, to reach the level of savings in this conference report, of course the conferees were faced with some extremely difficult decisions but, in many cases, after careful consideration, we agreed to the lower amount for many programs and activities.

I want to stress again for those who have tendency to look upon this bill as the so-called bill with all the "pork" in it, this bill is certainly a lean bill that has been reduced in dollars and has, at the same time, I point out, Mr. President, increased again the military spending, the nuclear weapons program by $840 million over last year. That is 10 percent real growth over last year. So it ought to satisfy almost everybody.

Mr. President, at this point I yield to my colleague from Louisiana (Mr. JOHNSTON) for any opening remarks he might wish to make.

Mr. JOHNSTON. Mr. President, I join with my distinguished colleague from Oregon in commending this bill to our Senate colleagues. The differences were resolved in a manner, I think, which was both fair and favorable to the Senate approach. As he pointed out, the bill is in fact $303 million less than budget request. It is $228 million less than the fiscal year 1983 appropriation.

Mr. President, this is the bill in which the Corps of Engineers construction projects are contained. I think that some Members of this body have gotten an undue impression as to the amount of the Corps of Engineers construction project total. As in the case of this total budget, that part which goes to the Corps of Engineers construction is down as well. This bill appropriates less than $1 billion for the total Corps of Engineers construction projects. Less than one-tenth of 1 percent of the total Federal budget goes for the Corps of Engineers construction projects, which is down considerably from just a few year ago.

A few years ago, we had $1.8 billion in Corps of Engineers construction, $1.5 billion last year. Now we are down to $884 million. So, for those who regard such projects as being "pork," this bill represents very good news. For those like myself, who regard those projects as being the infrastructure of the country and badly needed, this bill does not represent such good news. But for all of us who are concerned about the size of the budget, it does indeed represent good news because of the modest size of the bill.

Mr. President, I also join in congratulating the distinguished Representative from Alabama, the chairman of the House committee, TOM BEVILL, and the distinguished ranking minority member in the House, JOHN MYERS, for their excellent work. They make a fine team and they are a pleasure to work with.

Most of all, however, Mr. President, I congratulate again our distinguished chairman of this committee, MARK HATFIELD, for the really outstanding work which he does on this committee. I have been chairman of this committee in the past, so I know very well how difficult it is to do justice and be fair at the same time. Mr. HATFIELD is able to do that in such an unusually evenhanded and satisfying way. He can say no to those who ardently propose their request in such a way that no one is mad. That, indeed, is quite an accomplishment. So, Mr. President, I congratulate him and urge my colleagues to vote aye on this conference report.

Mr. HATFIELD. Mr. President, I thank my dear friend and colleague (Mr. JOHNSTON) for his gracious remarks.

LOSS OF FLUID TEST FACILITY CONSORTIUM

● Mr. McCLURE. Mr. President, I seek clarification from the chairman of the Appropriations Committee. Would the Senator from Oregon (Mr. HATFIELD) please clarify a point in the conference report? It is my understanding that the conference report provided $15 million for the Loss-of-Fluid Test Facility in the funding provided for light water reactor systems.

Mr. HATFIELD. Mr. President, the Senator's understanding is correct.●

Mr. BUMPERS. Mr. President, I should like to discuss for just a moment a matter that is in this bill. I do not intend to ask for a rollcall.

Mr. PROXMIRE. If the Senator will yield, I do intend to ask for a rollcall. I ask for the yeas and nays on passage of this conference report.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. BUMPERS. Mr. President, has the Senator from Oregon reported the amendments in disagreement?

Mr. HATFIELD. No, Mr. President, I have not.

Mr. BUMPERS. Let me just raise this point, Mr. President. There is an amendment in disagreement, amendment No. 25. It deals with the production of 155mm neutron weapon artillery shells.

We do not now store neutron weapons in any form on the soil of any of our NATO allies. One of the reasons we do not, of course, is that we presently do not have permission to do so. But I make this point: A lot of people may not realize that it is the Energy Committee that authorizes the money for all nuclear weapons for our defense programs. It is the Subcommittee on Energy Appropriations, of course, that appropriates the money pursuant to that.

When the Energy and Water Appropriations Subcommittee met and reported its bill out on June 16, here is what the accompanying report said on the question of project 82-D-109, which is the proposed production of 155-mm neutron artillery shells. It said:

> The Department is currently in production on an 8-inch artillery warhead and the Lance missile warhead. Military leaders acknowledge that there is little, if any, military value to these weapons unless they can eventually be deployed in Europe. Uncertainty surrounds these deployment decisions and there has been no discernible progress to date. The uncertainty of deployment also applies to the 155mm artillery warhead regardless of its final capabilities.
>
> In view of these considerations and, due to the current budget constraints the committee believes it is ill-advised to proceed to spend billions of dollars on the W82 at this time.

I heartily concur in that committee report as far as it goes.

Mr. President, the House committee apparently did not feel quite as uncomfortable about producing neutron artillery shells as the Senate committee did; they had $50 million for the construction of a facility to produce 155-mm shells in their bill. When our

committee went to conference with their committee, this issue came up. I commend the Senator from Oregon for what he tells me was the very best deal he could get. I know that he is very sensitive to this issue, as am I. But here is what came out of the conference committee:

Amendment No. 25: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate, with an amendment as follows—

And here is the meat of the coconut:

Delete the matter stricken by said amendment and insert the following:

: *Provided*, That notwithstanding any other provision of law, no funds may be obligated or expended after the date of enactment of this Act for Project 82-D-109 unless the President certifies to Congress that—

(1) for each 155mm nuclear weapon produced an existing 155mm nuclear weapon shall be removed from the stockpile and permanently dismantled.

So far so good, even though we do not propose to build nearly as many 155-millimeter enhanced radiation shells as we already have nuclear shells in our existing inventory.

(2) formal notification has been received—

By the President—

from the North Atlantic Treaty Organization nation in which such weapons are sought to be deployed that such nation has approved replacement of existing 155mm nuclear weapons with the new 155mm nuclear weapon.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference includes $50,000,000 for Project 82-D-109, 155mm artillery fired atomic projectile production facilities. The conference agreement would prohibit the obligation of the funds pending a Presidential certification.

Mr. President, I want to point out that while I know that if I ask for a rollcall on this amendment in disagreement it would be overwhelmingly approved, and I am not going to do that, I am speaking at this moment to raise the red flag. This is just like fighting with my wife; those I win just are not over. We have not heard the last of this issue.

We do not need this weapon. The Europeans have not given us permission to store enhanced radiation weapons on their soil. We have under production right now the Lance missile warhead and the 8-inch shells——

Mr. TOWER. Will the Senator yield for a question?

Mr. BUMPERS. Yes.

Mr. TOWER. Did the Senator say that the Europeans have never given us permission to store enhanced radiation warheads on their soil?

Mr. BUMPERS. I think I know what the Senator is driving at, and I know at one time President Carter jawboned them into saying yes and he changed his mind.

Mr. TOWER. That is right. That is exactly what happened. As a matter of fact, the German Government did agree to it.

Mr. BUMPERS. I think the Senator is correct, based on my knowledge of published reports, of that. But in any event, that is a very volatile issue in Europe right now.

One of the questions I want to ask the managers of the bill, concerns the requirement that the President must certify to the Congress that he has received permission to deploy 155's on the soil of the nation where we want to deploy them. My question is, how is that nation to notify the President? Is that going to be a classified communication or will it be open and public?

Mr. HATFIELD. It is a formal notification, I would say in answer to the Senator. It is formal notification that is required. The assumption is that the formal notification will be a public notification.

Mr. BUMPERS. I am sorry; I did not hear the Senator.

Mr. HATFIELD. I might call the attention of the Senator to the fact—he probably already knows it—that the language the Senator read from the report is also in the bill. We had the language, the fencing language the Senator quoted placed in both the bill and the report to underscore the position of the committee to withhold such moneys until we had this kind of formal notification. We built a fence around it.

Let me add one other point. Because it is a required formal notification, the assumption is that it will be a public notification.

The $50 million is to build the production facilities. We will have another crack at the question of moneys required to actually start production of the shells, so that we really have not crossed that bridge yet.

I might say that in general the committee, as the Senator knows, has dropped for about 6 years the production money requests, and we had hoped to be able to maintain that position in the conference.

Circumstances have changed, and obviously as we best assessed the conference yesterday this is the kind of position that we could really develop and hammer out, coming from at least the perspective of myself. I oppose the production of such a weapon.

I might gratuitously add that we have fully funded in this particular bill nine weapons systems, and we felt that that was in itself sufficient, including the fact that it was $840 million over last year's level.

But that was not the mood that we assessed in the conference yesterday, and so I want to assure the Senator—and I agree with his position, and he knows of my agreement—my position on this is very clear, but this I believe is the best defensive fallback position the committee from the Senate was able to obtain.

Mr. JOHNSTON. Will the Senator yield?

Mr. HATFIELD. I am happy to yield.

Mr. JOHNSTON. Mr. President, I say to the distinguished Senator from Arkansas that I share the skepticism of the Senator from Oregon on this particular weapon system. This is in one sense a nose under the tent in that it is the start of funding of a most expensive weapon system. The exact number on the cost of this is classified, but I do not think we would be breaching any classified information to say that it is in the billions of dollars——

Mr. BUMPERS. It is a very significant amount of money.

Mr. JOHNSTON. On a total lifecycle cost, and we should not get into a multibillion-dollar funding program until we know, first, that we can deploy this weapon. That is the reason for our fencing language. But more than that, whether we have any real use for it. What we are talking about here, is many, many weapons. I will not say what the number is, but it is disbursed down at the cannon level, at the battery level, so that apparently the decision to use this weapon would be disbursed over a broad number of units at the tactical level. The range is very short and the number of people involved is very great. It seems to me that command and control for the weapon would be most difficult. The use of the weapon would be very difficult because you would probably be shooting into your own territory where you are going to have your own people. I think we ought to have a first-class decision making debate and consideration of this matter before we get into the huge, huge cost that this weapon system would entail. We will have the chance to do that as part of the Department of Defense authorization.

I congratulate the Senator from Arkansas for shining the light of public scrutiny on this particular weapons system. Now is the time to consider it, not after we have spent hundreds of millions of dollars in the program and then decide to cancel it.

Mr. BUMPERS. The Senator from Louisiana has just made my case for me.

I want to make the point that we spent weeks around here debating the MX, and that was a legitimate debate, Yet, here is something I consider to be a monumental decision because of all the very cogent points the Senator has just made: No. 1, do we need it? No. 2, is it cost-effective? No. 3, when we get to the command and control part of it, who is going to have the authority? Some battalion commander? Are we going to put this under the control of a battalion commander? Or are those things going to be set up in such a way that they cannot be fired except on

authority at the highest level? Those decisions have to be made.

I want to raise one other question: Is it the Senator's understanding that under the amendment, the only requirement on the President is a simple certification to Congress? The Senator from Oregon says he would presume that this certification would be public, that the public would be notified that a North Atlantic Treaty Organization country that we want to put these things in has given its permission, and the President would certify that to Congress. At that point the building of a $50 million facility could go forward without any further action on the part of Congress. Is that correct?

Mr. JOHNSTON. That is correct. The President must certify publicly to Congress that which is very clear—that permission has been received from a certain named nation in NATO where the weapon would be deployed, that permission has been given to deploy this weapon—that is, to exchange this version of the 155-millimeter shell for the one that is presently deployed. That specific permission must be made public and presented to Congress.

Mr. BUMPERS. Is it the Senator's understanding that there is now no money authorized or available for the production of this weapon?

Mr. JOHNSTON. That is correct. This money is for the building of the facility.

Mr. BUMPERS. So if the President proposes to build the facility, and before he can go foward with production, he would have to come back to Congress.

Mr. JOHNSTON. He cannot build the facility unless he certifies to Congress that he has the requisite permission. There is no money here for production. This money is all for building the facility.

Mr. BUMPERS. Once he certifies, he has the right to go ahead and build the facility. But before going into production, he has to come back to Congress and ask for authorization and for money, at which time we hope we would have an opportunity for a full-fledged debate to cover all these things.

Mr. JOHNSTON. The Senator is correct.

Mr. BUMPERS. Does the Senator from Oregon concur in that?

Mr. HATFIELD. Yes. That is one of the reasons why we had a little argument in the committee as to whether or not the NATO alliance commitment was sufficient. The Senator from Louisiana said nations—he wanted to know nation by nation as to this approval, because that was the crux or the key to the whole fencing idea.

So I have to confirm what the Senator from Louisiana has stated to the Senator from Arkansas—that that is our understanding and that that is the legislative intent.

Mr. BUMPERS. I thank both floor managers for the opportunity to express myself on this matter and for their responses, which I find to be instructive.

I also think that probably they did get this money fenced and that was the best we could get under the circumstances. I am happy to know that we will have another shot at this down the road.

Mr. HATFIELD. I thank the Senator from Arkansas. He has been very helpful.

A TACTICAL NUCLEAR CAPABILITY—DO WE NEED IT?

Mr. SYMMS. Mr. President, the purpose of our nuclear weapons is to prevent war by acting as a deterrent. Should deterrence fail, they should provide the means by which to terminate the conflict rapidly on terms favorable to the United States and its allies.

In order to accomplish this mission, our nuclear forces must be perceived by potential enemies as a viable deterrent. They must provide the NATO alliance with the flexibility to respond to aggression in kind or at any escalated level of intensity which competent authority should direct. This means that we must take action to establish and maintain a full spectrum of military options ranging from conventional to strategic nuclear response. To either unwittingly or deliberately permit gaps in the spectrum of possible responses to exist is to place our Nation's security in jeopardy and to increase the probability of war.

A case in point is the urgent need to replace the current, aging 155mm nuclear artillery projectile, W-48, with the modernized projectile designated the W-82. The old W-48 round is based on outdated technology and is nearing the end of its useful life. Modernization of our capability to cover the zero to 30-kilometer range band is long overdue. The W-82 will, in combination with the improved 8-inch nuclear round already in production, provide the capability necessary for a variety of responses by ourselves and our allies.

Without modernization, we will develop a gap in our spectrum of capabilities at the short-ranges. The Senate position in the fiscal year 1984 energy and water appropriations bill strikes the administration's request and thus prevents this modernization. The 155mm is our most numerous cannon system. Thus, the system which provides the greatest potential for flexibility is the very one which will be deprived of an effective nuclear delivery capability. If we commit to fund the W-82 nuclear projectile, as I believe we should, in the conference on the fiscal year 1984 energy and water appropriations and thus provide a viable and potent replacement for our older system, we will have taken a significant step in the direction of securing peace through deterrence.

The 155mm makes up the bulk of NATO's short-range nuclear capability and is the dominant fire support weapon in the NATO force structure. If these howitzers are provided with an effective nuclear capability, it provides the Soviets a serious targeting problem and improves the overall survivability of other systems. Failing to provide a replacement nuclear projectile would have the opposite effect, greatly simplifying their problem of detecting and attacking the more limited number of other short-range nuclear capable systems.

The current projectile, W-48, has been deployed since 1963. It is rapidly losing effectiveness against the increasing numbers of Soviet and Warsaw Pact armored forces. The replacement W-82 projectile will have improved effectiveness by an order of magnitude and will have vastly improved safety and reliability features, badly needed in our stockpile of deployed warheads. This part of the tactical nuclear modernization permits the overall level of deployed warheads to be reduced as more effective ones are made available.

A modern 155-millimeter nuclear capability, along with the less numerous 8-inch and Lance short-range systems, prevents war by permitting effective response to aggression across the spectrum of possible attacks. It is important that we provide our forces in the field with the best possible capability so there is no misunderstanding on the part of the Soviets that we have the resolve to face any aggression.

The Soviets and their Warsaw Pact allies know full well that if they choose to attack Western Europe, their only hope for success would be to strike and win quickly before we and our NATO allies can send reinforcements. They would attempt to mass overwhelming forces quickly at key breakthrough points, creating as much as 10-to-1 ratios in maneuver battalions and tanks with which to overwhelm NATO forces. While NATO has a significant arsenal of conventional weapons with which to counter that mass of enemy forces, I believe it simply would not be sufficient to successfully halt such overwhelming odds; NATO forces would be overpowered by sheer numbers.

The modernized 155-millimeter nuclear projectile would change that possible scenario dramatically. To achieve large force ratios, the Soviets must mass their troops, tanks, and artillery close to the intended battle areas, within range of NATO's artillery, before they attack. This creates very lucrative nuclear targets. The capability of our nuclear artillery to decisive-

ly strike these targets causes the Soviets a great deal of uncertainty about massing those forces, thus making the outcome of any attack very uncertain. Without certainty of success, the Soviets would be loathe to attempt an attack in the first place. Of our existing nuclear artillery weapons, the modernized 155-millimeter nuclear round would most enhance this deterrent quality because of the large numbers of 155-millimeter howitzers in NATO's arsenal.

It should be noted that the Soviets are putting increased emphasis in modernized short-range nuclear force. In the past 5 years, the Soviets have more than doubled their short-range nuclear force. They have fielded three new cannons: the 203-millimeter gun, the 152-millimeter gun and the 240-millimeter self-propelled mortar. All are nuclear capable and give the Soviets an ability to deliver low-yield nuclear strikes close to their own troops, a capability they have not had in the past.

Since the 1960's, the Soviets have had a doctrine which calls for tactical nuclear strikes to open gaps for rapid movement of tank divisions. When that doctrine was formulated, the Soviet arsenal consisted of large, cumbersome, and relatively inaccurate weapons not well suited to it.

With the fielding of these new nuclear cannons, the Soviets are gaining the capability to execute that doctrine. Unless we take positive, decisive action to counter them, recent Soviet deployments will put us at an extreme disadvantage in short-range nuclear systems. The edge that NATO once had in this area, and cannot afford to lose, is rapidly fading because of the growing obsolescence of our nuclear artillery warheads. The development, production, and fielding of the W-82 is an integral part of our counter to the Soviet upgrade. Its funding support is critical to that effort and is the reason I believe the Senate conferees should recede to the House in conference of the fiscal year 1984 energy and water appropriations on this matter.

There has been concern expressed in the Congress with regard to the costs, deployment, and nuclear freeze implications of developing an improved 155-mm nuclear artillery projectile. Additionally, some have suggested that conventional alternatives, particularly the so-called smart munitions should be sought as a means of avoiding the need to develop modernized nuclear artillery shells. Let me address these concerns.

With regard to costs, the major share of most nuclear projects is associated with Department of Defense delivery systems. The total program costs for this artillery projectile—DOD and DOE—are very low since the force stucture to operationally use it is already fielded in the form of NATO's 155mm cannon battalions and batteries which fire conventional rounds as well. The direct production costs for the nuclear warhead are comparable to other warheads now in production and do not represent a departure from the general trend of cost rises due to inflation.

Because the W-82 would replace an already existing 155mm nuclear projectile, we do not face the issue of introducing a new type of system into Europe. Since first availability of this replacement round will be in the 1988 timeframe, we should not prejudge the political climate for deployment to Europe at that time. Nor should a nuclear freeze argument apply to this improved weapon. The round is many times more militarily effective than its predecessor and we will replace the current 155mm projectile on a one-for-one basis. When considered with other improvements in short-range systems, the overall result will be a net reduction in the number of weapons. In order to maintain our deterrrent capability on a continuum, current plans call for the old rounds to be phased out as the new ones are phased in.

I believe the W-82 round will raise the threshold for the use of nuclear weapons. The replacement 155-mm projectile will discourage Soviet first use of their recently expanded tactical nuclear capability. It will reduce the potency of the expanding Soviet conventional force and act as a deterrent to the initiation of combat in the first place. It should be remembered that our use of the weapon is strictly controlled by the President as in the case of current rounds.

Conventional alternatives of a comparable nature do not truly exist at this time. No conventional system provides the same capability to catastrophically alter force ratios or deter Soviet first use of their short-range nuclear forces. Even if conventional munitions were available, the number of them which would be required to inflict damage comparable to that of which the W-82 is capable would be prohibative. For example, the cost of a Copperhead attack on an enemy armored unit would be approximately twice the cost of a W-82 strike which produced the same degree of damage. I wholeheartedly support this program, which is vital to our capability, to deter aggression, and I urge my colleagues in the conference on the fiscal year 1984 energy and water appropriations bill to recede to the House position on this issue.

● Mr. CHILES. Mr. President, I support the conference report on the energy and water appropriations bill for fiscal year 1984, H.R. 3132.

Particularly important to the State of Florida is language approved by the conferees on this bill regarding a possible study of the Cross-Florida Barge Canal project in my State. Language was included in the report accompaning the Senate version of this bill which opposed additional study of this project. That language is as follows:

Cross-Florida Barge Canal Restudy, Fla.—The U.S. Army Corps of Engineers is currently in the process of determining if additional Federal funds should be utilized to carry out a restudy of the Cross-Florida Barge Canal project. This effort is a result of advisory language included in the House report of the fiscal year 1982 supplemental appropriations bill which proposed the use of up to $450,000 for the purposes of an economic analysis of the Cross-Florida Barge Canal.

The Committee recognizes that this project no longer has an official sponsor at either the State or Federal level. The 1977 study by the Corps recommended against the completion of the Canal. No Federal funds for construction have been appropriated since 1970. The Florida Governor and Cabinet opposed the project and support legislation to deauthorize the Canal. The Florida Legislature has expressed similar views. The U.S. Senate has twice passes legislation to deauthorize the Canal, and legislation is presently pending in the House and the Senate to accomplish deauthorization.

Most recently the State of Florida has expressed its oposition to the restudy attempt. It is the State's position that these funds could be better spent by applying them to more environmentally acceptable projects. For this reason, the Committee believes that no further funds should be utilized for the purpose of studying the Cross-Florida Barge Canal.

A final decision is still pending by the U.S. Army Corps of Engineers as to whether to proceed with this study effort. The language in the Senate bill, now affirmed by the conference committee, offers appropriate guidance to the corps on this matter.

I have introduced legislation in the Senate to deauthorize the Cross-Florida Barge Canal. A companion bill has been introduced in the House of Representatives by Congressman BUDDY MACKAY who represents the district through which the uncompleted portion of the canal would be built. Deauthorization has twice passed the Senate and I am hopeful we will see action again on my bill in the context of an omnibus water project bill later this year.

In the meantime, it makes little sense for the corps to undertake and finance further study of the project, and I am pleased that the conference committee on H.R. 3132 has affirmed the position of the Senate on this question.●

● Mr. PRYOR. Mr. President, I am pleased that the conference committee has approved an appropriation of $3.5 million to provide for public access and recreational facilities for the Felsenthal National Wildlife Refuge in south Arkansas.

This funding will be the first step in fulfilling a Corps of Engineers commitment made when it proposed condemnation of thousands of acres of private land in connection with navi-

gation development on the Ouachita and Black Rivers.

Witnesses before the Senate subcommittee pointed out that these facilities are desperately needed. Not only are they needed to provide access to the refuge by sportsmen and the general public but also to insure proper operation and maintenance of the refuge by the Fish and Wildlife Service.

I commend the distinguished chairman and ranking minority member of the Energy, Water Appropriations Subcommittee, Senator HATFIELD and Senator JOHNSTON, for their efforts on this matter.●

● Mr. HUMPHREY. Mr. President, I wonder if I might engage the chairman of the Appropriations Committee in a colloquy relative to the conference's provision of funds for the Department of Energy's extend burnup program.

First, I would like to thank the Senator from Oregon for his attention to the Department of Energy's extended burnup program and for restoring $4.5 million for this program in conference. This program is very small in cost and, according to the General Accounting Office, will save the country's electricity ratepayers over $13 billion before the year 2000 for a total outlay over the next few years of only $33 million in constant 1981 dollars. The House provided $9 million to continue this program. Because of the tightness of the budget I understand the conference was forced to reduce this figure to $4.5 million. To make sure that this program is not terminated before its benefits are achieved, I was hoping that I could ask the chairman some questions.

Mr. HATFIELD. The Senator is correct. It was the conference's desire that the extended burnup program be continued.

Mr. HUMPHREY. Then it was not the intention of the conference that any money be spent to terminate existing contracts, that instead the program should be continued so that Congress will have the opportunity to continue to fund the project in fiscal year 1985?

Mr. HATFIELD. The Senator is correct. It was our understanding that the House conference intended that the money it provided for this program not be used to cancel existing contracts.

Mr. HUMPHREY. It then is the sense of the conference that the program will continue in fiscal year 1985 and is likely to be funded at some level in fiscal year 1985?

Mr. HATFIELD. The Senator is correct.

Mr. HUMPHREY. I thank the chairman of the committee for his assistance.●

Mr. DOMENICI. Mr. President, I would like to commend my distinguished colleagues, Senators HATFIELD and JOHNSTON, and the members of the Senate Appropriations Committee for completing congressional action on the energy and water development appropriation bill 3 months before the new fiscal year begins.

I support the conference agreement on the energy and water development appropriation bill.

H.R. 3132 provides $14.4 billion in budget authority, and $7.9 billion in outlays for fiscal year 1984 for the activities of the Department of Energy, the Department of Interior (water programs), the Department of Defense—Army Corps of Engineers, the Nuclear Regulatory Commission, the Tennessee Valley Authority, and other agencies.

With outlays from prior-year budget authority taken into account, the Energy and Water Development Subcommittee is $0.9 billion in budget authority and $0.4 billion in outlays below its Senate crosswalk allocation under the first budget resolution.

Mr. President, I ask unanimous consent that a table showing the relationship of the conference agreement to the congressional spending budget and the President's budget request be printed in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

ATTACHMENT I.—CONFERENCE—ENERGY-WATER SUBCOMMITTEE—SPENDING TOTALS

[Dollars in billions]

	Fiscal year 1984	
	BA	O
Outlays from prior-year budget authority and other actions completed		[1] 6.8
H.R. 3132, conference agreement	14.4	7.9
Total for Energy-Water Subcommittee	14.4	14.7
Senate subcommittee allocation under first budget resolution	[2] 15.4	[2] 15.1
Possible amount over (+)/under (−) allocation	−0.9	−0.4
H.R. 3133:		
President's request	14.7	7.9
House-passed	14.3	7.7
Senate-passed	14.3	7.8
Conference agreement	14.4	7.9

[1] This figure includes the fiscal year 1984 outlays associated with Public Law 98–8, the Emergency Jobs Appropriation Act and with the Senate-passed fiscal year 1983 Supplemental Appropriation bill (H.R. 3069).

[2] This allocation reflects the conference agreement on the first budget resolution.

Note: Totals may not add due to rounding.

THE PROPOSED RESTART OF THE L-REACTOR AT THE SAVANNAH RIVER PLANT IN AIKEN, S.C.

Mr. THURMOND. Mr. President, I rise to comment on the amendment offered by the distinguished Senator from Georgia (Mr. MATTINGLY), regarding the proposed restart of the L-reactor at the Savannah River Plant, which was accepted by the conference committee considering the 1984 energy and water appropriations bill, H.R. 3132. As I understand his amendment, I believe it is an important step forward toward the restart of the L-reactor.

It is my understanding that this amendment endorses the concepts in the memorandum of understanding. Under this memorandum of understanding, the State of South Carolina will issue an NPDES permit to allow the Department of Energy to restart the L-reactor, which permit shall contain a schedule of compliance. Then, after this permit has been issued, the Department of Energy will pursue mitigative actions to bring the operation of the L-reactor into compliance with the NPDES permit on the schedule contained in the permit which must be agreeable to both the State and the Department of Energy.

Mr. HOLLINGS. Mr. President, on behalf of myself and Mr. MATTINGLY, I want to state the intent behind an amendment that the two of us introduced yesterday in the energy and water development conference committee. That amendment deals with the L-reactor at the Savannah River Plant, S.C.

Our proposal, a modified version of what had earlier passed the Senate, was accepted by the conference committee. To insure that the provisions and intent of this amendment are clear, I would like to take a minute today to state precisely how Senator MATTINGLY and I interpret it. Our interpretation is as follows:

The L-reactor section of the conference report provides that no funds shall be available for the purpose of restarting the L-reactor at the Savannah River Plant until the Department of Energy completes an environmental impact statement and until the Department is issued a discharge permit pursuant to the Federal Water Pollution Control Act. The section provides that the EIS shall be expedited.

The section also provides that the discharge permit shall incorporate the terms and conditions provided in the memorandum of understanding entered into between the Department of Energy and the State of South Carolina dated April 27, 1983, relating to studies and mitigation programs associated with the L-reactor restart. This provision is not intended in any way to amend the Federal Water Pollution Control Act, to grant the Department of Energy any exemption to the provisions of that act, or to amend or restrict the authority and discretion of the Federal and State agencies responsible for administering that act. It is intended solely to direct the Department of Energy, as a condition that must be met before the Department can accept any such discharge permit, to commit itself to carrying out its studies and mitigation programs listed in the memorandum of understanding with the State of South Carolina.

The section also defines the term "restarting." One part of that definition includes activities that would result in cooling system testing discharges which exceed the volume, frequency, and duration of test dis-

charges conducted prior to June 28, 1983. This provision is intended to permit, before the completion of the EIS, the kind of short-duration, L-reactor, cooling system tests conducted in the spring of 1983. However, full-scale, multiday tests of the kind originally planned for the late summer of 1983 would be prohibited until the completion of the environmental impact statement.

Mr. President, I understand that the distinguished chairman of our Appropriations Committee (Mr. HATFIELD) agrees with me and Mr. MATTINGLY in our interpretation of this section of the conference report.

Mr. HATFIELD. The Senator is correct. I do agree with his interpretation of the L-reactor language, including his statement that this language in no way amends the Federal Water Pollution Control Act.

Mr. HOLLINGS. I thank the Senator from Oregon. I also thank Senator MATTINGLY and the distinguished ranking member of the Energy and Water Development Subcommittee (Mr. JOHNSTON) for the role they have played in our committee's discussions of the L-reactor.

Mr. MATTINGLY. Mr. President, a short while ago, the junior Senator from South Carolina (Mr. HOLLINGS) inserted for the RECORD his interpretation of my amendment to the Energy and Water Development Appropriations Act of 1984 relating to the restart of the L-reactor at the Savannah River Plant, Aiken, S.C.

I simply want to take this opportunity to say that the language of this bill is clear and distinct in intent and purpose. It mandates the Department of Energy to successfully complete an environmental impact statement and then to live up to its commitment to the State of South Carolina to conduct studies and mitigate thermal effects upon issuance of a discharge permit. It should not be construed to either enlarge or diminish the rights of South Carolina in dealing with DOE and issuance of discharge permits in regard to the L-reactor.

Mr. BAKER. Mr. President, I understand that the Senator from West Virginia (Mr. RANDOLPH) is on the way to the floor and has brief remarks he wishes to make before the adoption of the conference report. Will the chairman give me just a moment to find out?

Mr. BYRD. Mr. President, this conference report on the energy and water development appropriation bill for fiscal year 1984 contains many projects and programs of interest to the people of West Virginia. Perhaps the most discussed project from a West Virginia point of view has been the Stonewall Jackson Dam in West Virginia. I am pleased that the Congress has agreed with the President's request to provide $26 million for continued construction of this project. This congressional decision will permit the U.S. Army Corps of Engineers to award a contract for construction of the dam this summer. I will have more to say about the importance of this dam in a moment.

The fiscal year 1984 energy and water development appropriation bill also contains $3.6 million to continue construction of the Tug Fork and other section 202 flood control projects near the West Virginia/Kentucky border as well as operation and maintenance funds for various locks and dams operated by the Corps of Engineers in the State. I am also pleased that this bill contains $145 million for Appalachian regional development programs; $100 million of this amount will fund continued work on the Appalachian regional highway system including corridor G which will link Charleston with the Kentucky border at Williamson, W. Va., when this highway is completed.

Mr. President, there has been, I believe, a lot of misinformation about the benefits and the need for the Stonewall Jackson flood control project. I would like to take this opportunity to set the record straight. First, let me point out that the administration supports the construction of the Stonewall Jackson Dam. Why is that? The President recognizes the value and importance of completing this dam. The benefits of completing the Stonewall Jackson Dam exceed the remaining costs by more than 50 percent. So, clearly this dam makes good economic sense.

Now, some people have questioned why other alternatives to this dam could not be pursued. Why, for example, would not a series of small watershed projects provide the same level of flood protection and other benefits as the Stonewall Jackson Dam but at much less cost? I asked the same question many years ago before we proceeded with this dam and have recently received reconfirmation of what I have known all along. In a June 13, 1983, letter from the Soil Conservation Service I was informed that "A series of small upstream reservoirs could not achieve nearly the same degree of benefits as envisioned for the Stonewall Jackson Dam." The letter noted further that such a series of small watershed projects "would be marginally feasible, at best," and that such a project "would require a dam on the main stem of the West Fork, and, consequently, the land rights requirements would be similar." It is apparent to me from the words of the Soil Conservation Service, and they are the experts in this matter, that a series of small watershed projects is not a practical solution to the problems of the people in northern West Virginia; and, in any event, the main feature of the watershed project would be a dam on the main stem on the West Fork. So, I see little benefit in the primary alternative which has been recommended.

One of the principal benefits of the Stonewall Jackson Dam will be improved water quality. Many of the opponents have stated that the method of improving water quality by increasing polluted stream flows with supplemental fresh water from the reservoir, a process known as pollution dilution, is not a recognized means of water quality improvement. In response to this objection it should be noted that the Environmental Protection Agency has reviewed all aspects of this dam, including water quality, and the EPA gave its approval to the dam on December 4, 1979. So, the Stonewall Jackson project is not some unholy environmental monster. Furthermore, the construction of this project envisions making improvements to specific sources of pollution downstream from the dam, but much of the adverse water quality comes from general pollution sources, such as acidic water drainage from the lands on either side of the river. This general pollution cannot be cost-effectively eliminated, but we can diminish its harmful effects on the river's environment by adding additional flows of fresh water during the dryer summer months in particular, and, that is what the Stonewall Jackson Dam is designed to do.

Now, in addition to all these benefits, the Stonewall Jackson Dam construction program will employ between 300 to 500 people over the next 6 or 7 years. So, the dam has the added benefit of providing a significant number of jobs for West Virginians now when the State's economy is particularly depressed. I make no apologies for my efforts to fund productive work for the people of my State when the project is economically sound as is the Stonewall Jackson Dam.

Now, Mr. President, yesterday during the conference committee discussion of this matter no opposition was raised by the House Members with respect to the merits of this dam. After the House conferees agreed to the $26 million restoration necessary for continued construction of this dam during the coming fiscal year, one Member of the House suggested that much of the earlier House opposition to this dam stemmed from bitterness on the part of some Members who believed that I had blocked their congressional pay raise about 3 years ago. We discussed this matter at some length during the conference meeting yesterday; but the point is, that this opposition to the Stonewall Jackson Dam had no relation to the merits of the project itself. So, I hope I have put that matter to rest once and for all.

Mr. President, I wish to thank the distinguished chairman of the Energy and Water Development Appropriation Subcommittee for his leadership and fairness in shepherding this bill through the appropriations process. Chairman HATFIELD was, as always, very ably assisted in this task by the ranking Democratic member, Senator JOHNSTON. I also thank Mr. BEVILL and Mr. MYERS, chairman and ranking members of the House conferees. I thank all of the House and Senate conferees.

Mr. President, I ask unanimous consent to have printed in the RECORD certain telegrams and letters that I have received relating to this matter.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

CHARLESTON, W. VA.,
May 27, 1983.

Hon. ROBERT C. BYRD,
Capitol, Washington, D.C.

The Stonewall Jackson Dam project is totally supported by my administration as currently proposed and planned by the U.S. Army Corps of Engineers. I have personally been involved with this project since early in my first administration and I am convinced that its completion is in the best interests of the citizens of our State.

This project will provide flood protection and low flow benefits for the West Fork River, as well as the Monongahela River, outstream flood protection will be provided for a 100-year frequency storm and make available additional lands for development and other lands for redevelopment. Other projects benefits and increased water supply potential, recreational benefits and improvement in downstream water quality that cannot be met by any other proposed alternative. The potential for downstream development and resultant economic gains, as well as reduction of flood losses, are significant benefits. The recreational potential of the planned State park associated with this project is among the highest of any in West Virginia.

To date, $70,000,000 has been spent on this project, seventy three percent of the relocation of persons has been made and 90 percent of the needed land has been acquired. It is important that this progress continues, particularly at this time when unemployment is so high. I, therefore, solicit your support in expediting funding to this project for its completion.

JOHN D. ROCKEFELLER IV,
Governor of West Virginia.

DEPARTMENT OF THE ARMY,
OFFICE OF THE CHIEF OF ENGINEERS,
June 10, 1983.

Hon. ROBERT C. BYRD,
U.S. Senate, Washington, D.C.

DEAR SENATOR BYRD: This is in response to your recent inquiry as to whether the Corps of Engineers still supports the Stonewall Jackson Lake, West Virginia project in light of passage of a House of Representatives floor amendment for the deletion of further funding of the project in Fiscal Year 1984.

The Stonewall Jackson project is a multipurpose reservoir project authorized in 1966 for construction by the Corps of Engineers. This project provides benefits which exceed costs, is supported by local interests, and will help alleviate numerous water resource problems pertaining to flood control, water supply, water quality control, and recreation, as well as create numerous construction jobs during a period of high unemployment. Therefore, we believe it is in the public interest to proceed with the Stonewall Jackson Lake project.

This project has been supported by the current and past Administrations for construction as evidenced by continuous funding in the budget for the past seven years. Although initial funds for land acquisition were appropriated in Fiscal Year 1970 and for construction in Fiscal Year 1971, the decision of the Governor in 1977 to support the project was a key step in permitting construction to proceed. At that time, the entire West Virginia Congressional delegation, both House and Senate, also supported the project. As of this date, approximately $86 million has been allocated to the project. These funds have been applied not only to land acquisition, but to major relocation of highways, a compressor station, utilities, and other facilities that would otherwise interfere with construction of the project. In addition, procurement contracts for components of the outlet works have been awarded and, as you know, the main dam contract was advertised for bids on 24 May 1983. We believe, based on our current evaluation of remaining benefits and remaining costs, that the project remains well-justified, and it would not be appropriate to halt construction at this time.

I trust this responds to your request, and I am available to answer any other questions you may have on this subject.

Sincerely,

C. E. EDGAR III,
Brigadier General, U.S. Army,
Acting Director of Civil Works.

DEPARTMENT OF AGRICULTURE,
SOIL CONSERVATION SERVICE,
Washington, D.C., June 13, 1983.

Hon. ROBERT C. BYRD,
U.S. Senate, Washington, D.C.

DEAR SENATOR BYRD: As you requested, I have reviewed our files, that relate to the Stonewall Jackson dam proposed for construction by the Corps of Engineers near Weston, West Virginia. Further, I have discussed the project with our planning staff in the West Virginia state office and with planning specialists here in our National Headquarters who are familiar with the situation. I have the following information to report:

1. Several years ago, the Soil Conservation Service investigated a potential small watershed project upstream from the proposed Stonewall Jackson dam. This, however, was after the dam had been authorized. Therefore, we assumed the dam would be installed so far as our investigation was concerned and we concluded our analysis of benefits at the tailwaters of the Stonewall Jackson dam. The project we investigated, known as Upper West Fork, was determined not to have benefits that exceeded the costs.

2. Another potential small watershed project on a tributary known as Stone-Coal Creek which enters downstream from Stonewall Jackson was also investigated and found to be marginally feasible. Since the study, however, a power company has installed a dam on this tributary and, we understand, incorporated flood control into the design.

3. If a small watershed project were formulated to replace the proposed Corps project, our judgement is that it, too, would require a dam on the main stem of West Fork, and, consequently the landrights requirements would be similar.

Based on the foregoing, it is our considered opinion that a series of small upstream reservoirs could not achieve nearly the same degree of benefits as envisioned for the Stonewall Jackson dam. Such a project would be marginally feasible, at best. The agriculture interests, of course, are concerned about the reported inundation of 20,000 acres of land. (We do not have information readily at hand to verify that amount.) Although small dams would have less adverse impact on that land, substantial amounts would obviously be required if adequate flood control were provided.

We trust this is the information you are seeking. If we can provide further discussion, please let us know.

Sincerely,

JOSEPH W. HAAS,
Deputy Chief for Natural
Resource Projects.

U.S. ENVIRONMENTAL
PROTECTION AGENCY,
Philadelphia, Pa., December 4, 1979.

Col. JOSEPH YORE,
District Engineer, Pittsburgh District, Corps of Engineers, Federal Building, Pittsburgh, Pa.

DEAR COLONEL YORE: We have reevaluated the Stonewall Jackson Dam, Lewis Co., West Virginia project as described in Public Notice 79-M2. Our initial evaluation of the project led us to determine that a supplemental Environmental Impact Statement and a new 404(b) assessment should have been performed. This recommendation was made because EPA had not received updated project information since 1971, and because the 404(b) evaluation was too narrow in the consideration of environmental impacts to only areas under the dam.

On November 6, 1979, representatives from your office visited EPA to present the updated project information which had been prepared since 1971. This data indicates that the Corps of Engineers, utilizing accepted "Principles and Standards", has repeatedly updated project justification and determined project feasibility. During the updating, impacts of existing SCS flood control impoundments were considered, recent population projections were utilized, and a more current interest rate was selected for benefit/cost evaluations. Your staff demonstrated through referencing studies of similar projects, that water quality degradations resulting from inundation adjacent to coal mining areas should not be significant. In addition, we were informed that some 9000 feet of stream to be channelized was not new work neglected in the Environmental Impact Statement. The streams to be relocated will, indeed, be inundated after project compeltion.

Representatives from the Corps of Engineers and EPA further agreed that future project coordination on the parts of both Agencies must be geared to eliminate significant information gaps. Such gaps were instrumental in EPA's initial decision to challenge the Stonewall project. The existing rapport our Agencies enjoy will be improved by additional scoping and coordination efforts. In addition, while it is EPA's opinon that the 404(b) evaluation accompanying the project's Public Notice is inadequate, we understand that future Corps proposals will be accompanied by a thorough 404(b) assessment. In the case of impoundments these assessments will address impacts asso-

ciated with dam related stream and wetland inundation.

In view of the above, EPA offers no further objections to the Stonewall Jackson Dam project. Although we believe the 404(b) assessment is incomplete, we find that the aforementioned new information supplied to us by your office meets our 404(b) needs. In this instance, we therefore can submit our final project determination.

Thank you for the opportunity to review this matter. We are encouraged by the swift and thorough response demonstrated by your staff in resolving outstanding EPA issues.

Sincerely yours,

JOHN R. POMPONIO,
Chief, EIS and Wetlands Review Section.

HARRISON COUNTY COMMISSION,
Clarksburg, W. Va., June 16, 1983.

Hon. ROBERT C. BYRD,
Russell Senate Office Building,
Washington, D.C.

DEAR SENATOR BYRD: This letter is to advise that our Commission strongly supports the Stonewall Jackson Dam project. We feel this project is extemely important in flood control protection of life and property for our citizens in Harrison County. Also, this project would provide jobs for hundreds of persons, now unemployed. Housing, business and industry will prosper more in future years if this project becomes a reality.

We are enclosing a copy of an editorial from the Clarksburg—Sunday—Exponent—Telegram, June 12, 1983, which our Commission concurs with 100 percent.

Our Commission request you continue to give this vital project your strong support and backing. Thank you for your cooperation.

Very truly yours,

THOMAS A. KEELEY,
President.

RUBY KEISTER,
Member.

FRANK X. LOPEZ,
Member.

CLARKSBURG AREA
CHAMBER OF COMMERCE,
Clarksburg, W. Va., June 9, 1983.

Hon. ROBERT C. BYRD,
U.S. Senate, Washington, D.C.

DEAR SENATOR BYRD: I'm writing on behalf of the Clarksburg Area Chamber of Commerce to let you know of our concern over the recent vote by the House of Representatives to delete funding for the Stonewall Jackson Dam Project. It is shocking to us that after all these years the House of Representatives could take such action solely on the plea of one Congressman whose position on the matter does not represent the views of the majority of Lewis Countians. Furthermore, his views are quite to the contrary of those in the North Central area of West Virginia.

We do not have to point out to you the benefits of the Stonewall Jackson Dam and why such project is vitally needed for the North Central area of West Virginia and the South Western area of Pennsylvania. You have shown and expressed your knowledge of and concern for the project many, many times in the past few years. We just want to inform you of our continuing interest in the project and of our willingness to lend our support in your effort to restore the funding for the dam.

Please let us know if we can do anything to assure funding and construction of the dam. We are willing to write and express our support to any member of the Senate that you may suggest. We will anxiously wait to hear from you.

Very truly yours,

JAMES RODNEY CHRISTIE,
Chairman, Environment and
Resource Committee.

CITY OF WESTON,
Weston, W. Va., June 15, 1983.

Hon. ROBERT C. BYRD,
U.S. Senate,
Washington, D.C.

DEAR SENATOR BYRD: First, I want to thank you for the picture you sent me which was taken when Mr. Adler, Mr. Kafer, and I were in Washington to appear before the Appropriation Committee on Energy and Water Resources. I want to hang it in my office.

I again want to ask your support for the continued funding for the Stonewall Jackson Lake Project. The supporters throughout Central West Virginia find it hard to believe Mr. Wise could undo what so many have worked so hard to accomplish. At this point with the land purchased, the people relocated, and two highways moved, it would be disastrous to stop the project.

I have been elected to public office for seventeen years and served as President of the Lewis County Chamber of Commerce. I have given a lot of time to the improvement of my community, and I feel I know what is needed in Weston, and we desperately need the construction of the Stonewall Jackson Lake.

I was happy to hear on the news that you were able to restore the funding in committee and know that you will do everything to persuade your colleagues to vote for the funding in the Senate.

Sincerely,

(MRS.) JEAN BENNETT,
City Clerk.

BUCKHANNON CHAMBER OF COMMERCE,
Buckhannon, W. Va., May 16, 1983.

Hon. ROBERT C. BYRD,
U.S. Senate
Washington, D.C.

DEAR SENATOR BYRD: In place of the customary "Whereases" with which petitions are presented, the Buckhannon Chamber of Commerce offers the following statement in support of the continued construction of the Stonewall Jackson flood-control project for which thousands of acres of land have already been secured and its former occupants relocated, a gas pumping station and attendant support pipelines and facilities have been replaced, and both federal and state highways have been relocated:

What Leonardo da Vinci said in the 15th century about water—that "NOTHING can exist without it"—is just as true today as it was then!

And with belief in the truth of that simple statement, the Buckhannon Chamber of Commerce adds its support to the completion of the Stonewall Jackson Lake in adjoining Lewis County in recognition that an ample water supply is vital to the Growth of Central West Virginia.

Although this vast reservoir of water will result from a dam that is designed to eliminate ruinous flooding in the West Fork River Valley, it will provide still a third economic boom—the largest recreational facility in all West Virginia.

This lake project is currently employing about 250 men and women residents of Central West Virginia, and the continued construction of it assures continued employment of these people, and added employment of an estimated 400 people in further phases of construction, and permanent employment of an estimated 100 people directly by the lake itself.

It will eliminate tens of millions of dollars of flood losses to homeowners, commercial businesses, industries, utilities, churches, schools, governmental facilities, and others.

This gigantic reservoir will induce new industry to locate in Central West Virginia, further enhancing employment and other economic and social development.

This lake has had the long-standing support of both federal and state governments, with federal expenditures amounting to $85 million as of the end of fiscal year 1983. President Reagan has budgeted an additional $26 million for continued construction in 1984.

In support of this project which means so much to the continued development of Central West Virginia, the Buckhannon Chamber of Commerce, this 18th day of April, 1983, through action of its board of directors, offers its endorsement and urges that the Congress continues its support until the project is completed and operational.

Sincerely yours,

C. J. ZGONCE,
President.

CITY OF BRIDGEPORT,
Bridgeport, W. Va., June 10, 1983.

Re: Stonewall Jackson Dam Project.

Hon. ROBERT C. BYRD,
Washington, D.C.

DEAR SENATOR BYRD: The recent news of the actions by Representative Bob Wise and the House of Representatives concerning the discontinuance of funding on the Stonewall Jackson Dam project has prompted this letter to you.

On behalf of our 7,000 constituents our City Council and I want you to know that we are fully supportive of this project for the obvious reasons of flood control, recreation, and economic development that this completed project would bring to this area. Of immediate importance to Bridgeport is the water supply benefit that would occur.

Confronted with a severe shortage of water in our reservoirs in the mid 1960's we sought and received funding to construct a water line to Clarksburg in order to purchase a portion of our water needs from the Clarksburg Water Board. Earlier this year Bridgeport executed a forty (40) year agreement to purchase treated water from Clarksburg.

Furthermore, Clarksburg's source of water supply is the West Fork River. As you probably know, in addition to flooding the West Fork has experienced low flows during the summer months. Certainly not only Bridgeport, which is experiencing rapid commercial and residential growth, but many of the outlying towns and public service districts must depend on the West Fork River and Clarksburg for an adequate and safe supply of water.

We urge your continued support for this project and trust every effort will be made to reinstate its funding.

If there is anything further we can do. please advise.

Sincerely,

CHARLES M. LOAR,
Mayor.

MARION COUNTY CHAMBER
OF COMMERCE,
Fairmont, W. Va., May 20, 1983.

Hon. ROBERT C. BYRD,
U.S. Senate,
Washington, D.C.

DEAR SENATOR BYRD: At its regular monthly meeting on May 17th, 1983, the Board of Directors of the Marion County Chamber of Commerce unanimously adopted the attached Resolution in support of the Stonewall Jackson Lake project. For the reasons stated in the Resolution, we feel that the project would benefit our area and the State of West Virginia as a whole. We earnestly urge your continued support for this project.

Cordially,

GARY COX, *President.*

RESOLUTION

Whereas, the current economic recession in the United States has been particularly severe in northern West Virginia, and

Whereas, as a result of the recession, unemployment in West Virginia is at its highest level since before World War II, and

Whereas, there is currently under construction in Lewis County, West Virginia, on the West Fork on the Monongahela River, the Stonewall Jackson Lake for the multiple purposes of flood control, water supply for industrial and domestic consumption, and recreation, and

Whereas, the Lake project is currently employing about 200 men and women residents of northern West Virginia, and will employ additional people in future phases of construction, and will contribute to permanent, future employment from enhanced industrialization and tourism, and

Whereas, as of the end of fiscal year 1983, the federal government, through the U.S. Army Corps of Engineers, will have purchased 99 percent of the land required for the project, and will have spent approximately $85 million on the project, and

Whereas, in fiscal 1984, actual construction of the Stonewall Jackson Dam will begin, if Congress continues its appropriations for the project:

Now, Therefore, the Marion County Chamber of Commerce believes that:

(1) the Stonewall Jackson Lake is a worthwhile public project, providing needed flood protection, a needed water supply, and recreation for all West Virginians and Americans;

(2) its continued construction is immediately beneficial in lessening unemployment, and will continue to be beneficial in producing hundreds of new jobs in northern West Virginia;

(3) funding should be continued by the Congress until the project is completed.

Marion County
Chamber of Commerce,
GARY COX, *President.*

THE WESTON NATIONAL BANK,
Weston, W. Va., May 26, 1983.

Hon. ROBERT C. BYRD,
Minority Leader, U.S. Senate,
Washington, D.C.

DEAR SIR: I am very optimistic that you will lend the necessary time and effort required to see to it that the Stonewall Jackson Lake Project in Lewis County, West Virginia, is carried out to a successful completion. I shall not dwell on the history of this Project and its long time in coming to fruition, but rather shall emphasize some of the key issues at hand at the moment.

First, an area which the original construction of this much needed facility did not intend to address, has now become of critical import—that is, jobs. As you are no doubt aware, West Virginia has the highest unemployment rate in the entire United States. Accordingly, it is of critical importance that a project of the magnitude of the Stonewall Jackson Lake be completed in the near future and particularly be acted upon as soon as possible such that the jobs that will be created through this construction project can be most utilized at this critical time in our economy.

The two main reasons for which the Stonewall Jackson Dam Project was authorized are: Flood protection and water flowage control. In the immediate area below the proposed Dam is situated the Town of Weston, a town which has experienced 50 floods in the past 50 years. That is not to say that we have had annual floods, in fact we have had floods on more than one occasion in a given year but the average is a flood per year on the West Fork River, which is a branch or tributary of the Monongahela River which, as you know, ultimately flows into Pittsburgh to form part of the Ohio. Based on the frequency of floods and the tremendous damage that it causes both in personal hardship and economic hardship, there is justification for this project on that basis alone. However, the further benefit derived from controlling the water flow in the River, which conversely often experiences a very low level of flowage in the Summer time, can help aid local industry, including coal-washing plants, glass plants, and others, and further insure a constant water flow for the substantial amount of barge traffic that frequents the Monongahela River to which this River is a major tributary. Finally, a heretofore unmentioned benefit, but certainly a substantial one, is the recreational benefit of this project. The State of West Virginia has committed substantial resources once the Lake is completed to developing a major State Park at the location. The State Park system in West Virginia is one of the best in the Nation and our State Department of Natural Resources commitment to this project further indicates their feeling for the benefit of recreation at this project.

There has been a consistent amount of negative information and negative reaction to this project, as there is likely to be in any circumstance where certain people are required to be relocated and/or have no strong preference for a project of this type. The fact remains, that over 90% of the total peoople to be relocated, which is something on the order of 800 people, have already done so. Further, all the major labor groups that have any interest in this project whatsoever, supported it with the exception of United Mine Workers of America, whose position apparently is based upon some misinformation regarding the quantities of coal that might underlie this Lake. It is a well documented fact, that there are no substantial recoverable reserves that will be in any way damaged by the Lake proposed. Further, it is entirely possible that the United Mine Workers may reverse its position based on the fact that they have been given additional information and also the fact that all of their Brother Unions throughout the country that have taken a position have all taken a position in favor of this project. Lastly, all of the major business, civic, State Government and local Government entities have taken a position in favor of this project from an early date, and continue to support this strong position.

To support some of the information outlined in this letter I am aware of the fact that each and every Congressman shall receive a packet of information outlining the reasons for support of this project and an example of the variety of organizations and individuals who support it.

I am in the great hope that you will give your strong consideration to the support of this project, which although lacking the support of our own Congressman, does enjoy the support of our U.S. Senators Randolph and Byrd and further our other Congressmen from the other three Districts in this State. You might be interested to know, that our own Congressman Wise was soundly defeated in Lewis County, with the primary issue being one of the Dam, a project which his opponent favored. And further, that our County was most recently added to the District which Congressman Wise represents as a first-term Congressman and basically has no geographic or certainly watershed association with any other part of the District, rather its closer association is with the First District, which is represented by first-term Congressman Alan Mollohan.

Thank you very much for your time and consideration of this matter and we look forward to your support on this project.

Sincerely,

JOHN W. BURDISS,
Executive Vice President.

STONEWALL JACKSON
MEMORIAL HOSPITAL,
Weston, W. Va., May 23, 1983.

Hon. ROBERT C. BYRD,
Minority Leader, U.S. Senate,
Washington, D.C.

DEAR MR. BYRD: There is great concern in our community and specifically within our hospital that H.R. 3000 will pass and funding for the Stonewall Jackson Lake will be withdrawn. As a hospital Administrator I can assure you this would have a negative impact upon the delivery of health care in our patient area. Floods in downtown Weston force patients to do without health care or seek another more dangerous route over a mountain which can only be traversed with a four-wheel drive vehicle. I can assure you this is extremely dangerous and traumatic, especially for women about to deliver a child, cardiac, orthopedic and other cases that demand a minimum of time.

Without the lake our alternatives are slim and none. Watersheds, floodwalls and drainage will not do the job and will be just as costly when one considers the economic damage caused by floods. I strongly urge your support on this most vital issue.

Sincerely,

DAVID D. SHAFFER,
Chief Executive Officer.

AFL–CIO,
Charleston, W. Va., June 10, 1983.

Hon. ROBERT C. BYRD,
U.S. Senate,
Washington, D.C.

DEAR SENATOR BYRD: The commitment that you have expressed for the continued development of the Stonewall-Jackson Dam Project is very much appreciated.

As indicated, the National AFL–CIO has supported this project.

Enclosed are two letters sent to the House of Representatives by the National office. At the proper time, I am sure they will assist us in another effort to refund the project. In addition, other contacts are

being made within the Building Trades Department to provide further assistance.

Please inform us when we can be of service.

Sincerely,

JOSEPH W. POWELL, *President.*

AFL-CIO,
Washington, D.C., June 8, 1983.

Hon. TOM BEVILL,
House of Representatives,
Washington, D.C.

DEAR REPRESENTATIVE BEVILL: Next week the House is scheduled to consider H.R. 3132, the Energy and Water appropriations bill. We understand that an amendment will be offered to strike any additional funds for the continued development of the Stonewall Jackson Dam project on the West Fork River in West Virginia. The AFL-CIO opposes this amendment.

The AFL-CIO fully supports continuation of this important project for which Congress has already appropriated $83 million—more than a third of the estimated cost of the entire project. The dam is designed to alleviate reoccurring and serious problems of flood damage which has plagued Lewis County and surrounding areas. It will also have the ancillary benefit of improving the quality and supply of water in the area.

Equally as important it will provide 300 to 500 jobs in the construction of the dam. Additional jobs in supplier industries will also likely be created. In a state where unemployment is 21 percent—the highest in the nation—and with 60 percent of its construction workforce jobless, every new job created by this project is vital to the economic health of this depressed state.

We urge the House to reject any amendments designed to terminate or delay construction of this essential public works project.

Sincerely,

RAY DENISON,
Director, Department of Legislation.

LEGISLATIVE ALERT

AFL-CIO,
Washington, D.C., June 6, 1983.

DEAR REPRESENTATIVE: Next week the House is scheduled to consider H.R. 3132, the Energy and Water appropriations bill. We understand that an amendment will be offered to strike any additional funds for the continued development of the Stonewall Jackson Dam project on the West Fork River in West Virginia. The AFL-CIO opposes this amendment.

The AFL-CIO fully supports continuation of this important project for which Congress has already appropriated $83 million—more than a third of the estimated cost of the entire project. The dam is designed to alleviate reoccurring and serious problems of flood damage which has plagued Lewis County and surrounding areas. It will also have the ancillary benefit of improving the quality and supply of water in the area.

Equally as important it will provide 300 to 500 jobs in the construction of the dam. Additional jobs in supplier industries will also likely be created. BENNETT HOME & AUTO SUPPLY, INC.,
Weston, W. Va., June 16, 1983.

Hon. ROBERT C. BYRD,
U.S. Senate,
Washington, D.C.

DEAR SENATOR BYRD: I am writing to thank you and commend you for your stand in favor of the Stonewall Jackson Lake and Dam Project. I have been a businessman for thirty-six years here in Weston, and I have suffered through the floods and droughts along side many others. I have witnessed the waste and destruction that has been experienced needlessly. Few who have lived and worked in Weston can doubt the need for this project. It is a logical and necessary step for flood control, guaranteed water supply, recreation and the creation of many needed jobs. I sincerely hope you will continue your much appreciated support and work toward the realization of this vital project.

Sincerely,

HOMER BENNETT.

WEST VIRGINIA GLASS
SPECIALTY CO., INC.,
Weston, W. Va., May 24, 1983.

Hon. ROBERT C. BYRD,
U.S. Senate,
Washington, D.C.

DEAR SENATOR BOB: As one of the main industries here in Lewis County, we just want to acquaint you with our company and our position with regards to the much needed Stonewall Jackson Dam and Reservoir Project here in Lewis County, of which Weston is the county seat. We feel that this reservoir project is very imperative to the continued growth and success of, not only our firm, but to the other companies located here, as well as the entire community.

West Virginia Glass Specialty Company, Inc., is the largest hand blown glass factory in the United States, having the largest payroll in Lewis County, approximately $4,700,000 per year and employing more than 400 persons on a three shift, five day a week basis. Our glass is sold and distributed all over the United States, Canada, Puerto Rico, South American countries, and Europe.

Our factory property is located fairly near to the West Fork River, which runs northerly through our community. Everytime we have a heavy rainfall and flood threats of the West Fork River are publicized, our telephone start ringing, employees become jittery, and our workers start going home to protect their homes and property from the numerous floods that occur in Weston and Lewis County. For every day's loss of production, our employees now lose $12,000 per day in wages. Without production, overhead keeps going on and our factory is operating at a loss. If the flooding is severe, the draft on both of our continuous tanks is cut off in the basement area, forcing the cooling down of the heat, which again must be built up to working temperatures after the flood waters have receded. It is the fear and uncertainty of even small floods that is curtailing more and more production in our factory each year.

We wish to list some representative figures that prove the losses that our factory sustained in the disastrous 1950 flood.

Loss of 3 days of production at $10,000 per day	$30,000
Loss of broken glass due to stacked cartons tumbling into the flood water, plus water soaked cartons in the carton bins	25,000
Natural gas and electricity used to keep the glass tanks in readiness for working purposes; 3 days at $1,000 per day	3,000
Three days loss of wages to our employees at $5,000 per day	15,000
Total of above losses (approximately)	73,000

In 1978, Lewis County again suffered losses due to flooding of the West Fork River. At the time of the flood warnings, our employees became alarmed, many quit working and went home to protect their families and belongings, some left for the fear of not being able to get to their various homes along the river and outlying tributaries when the roads would be blocked. It is quite common, even with small floods, there is usually a one days loss of:

Wages to our employees	$12,000
One day loss of glassware production	25,000
One day loss of energy, such as gas and electricity to keep the large tanks properly heated for production after the flood	2,000
Total of above losses (approximately)	39,000

As you can readily determine from the above information, it is absolutely imperative that we obtain all the support we possibly can from our Congressmen and our Senators to receive continued funding appropriations toward the further planning and completion of the Stonewall Jackson Dam and Reservoir.

We hope that we can count on you for your concern and full support of this very important project. Thank you.

Sincerely,

JOHN C. WEBER, Jr.,
President and General Sales Manager.

HOPE NATURAL GAS CO.,
Clarksburg, W. Va., June 7, 1983

Hon. ROBERT C. BYRD,
U.S. Senate,
Washington, D.C.

DEAR SENATOR BYRD: I was greatly surprised to hear the vote of the U.S. House of Representatives Amendment by Congressman Wise of West Virginia to delete the Stonewall Jackson Dam project for future funding.

As you know, this project has been in the making for nearly 40 years and has been reviewed by many, many, governmental and private agencies. It has also passed the test of numerous court proceedings over the years. As we look to the future of economic development in West Virginia, I am sure you will agree that this project is essential for all future growth and development in the Monongahela River Basin area of this state. Had it not been for this project it would have been impossible to consider the SRC II project on the Monongahela River at Fort Martin.

I hope it will be possible for you and Senator Randolph to have this project for the people of West Virginia. As you well know, Congressman Wise does not represent the majority of constituents in his own district, let alone the state.

After the expenditure of $80 million for engineering and land acquisition, I do not believe it is a prudent decision to cancel the project under the present economic circumstances.

Any recommendations that you may have as to how we can assist in saving this project will be greatly appreciated.

Sincerely,

BURKEY LILLY,
Manager, Economic Development.

Mr. RANDOLPH. Mr. President, I wish to emphasize what the minority leader, Senator BYRD, has said. Those Members to whom he has expressed appreciation are deserving. I too extend our thanks to Senator HATFIELD, chairman of both the Appropriations Committee and its Subcommittee on Energy and Water Development; to Senator JOHNSTON, the subcommittees ranking minority member; and to Senator STENNIS, the committee's ranking minority member; and to the House subcommittee chairman, Representative BEVILL; and the ranking minority member, Representative MYERS. We are grateful also to the able majority leader, Senator BAKER.

I make special mention of Senator BYRD to whom I referred earlier. He is a member of the Appropriations Committee and was a member of the conference committee. Senator BYRD has worked diligently in respect to two programs of vital importance to the State of West Virginia on which I will comment. Our citizens will benefit from his effective efforts.

Mr. President, I support the Energy and Water Development Appropriations bill, H.R. 3132, as reported by the conference committee. It is a reasonable and balanced measure providing funds for a wide variety of activities in fiscal 1984. It should be adopted by the Senate.

I will limit my specific comments to two items included in this bill: Funds for continued development of the Stonewall Jackson Lake in West Virginia and for the operation of the Appalachian Regional Commission during the next year.

I am particularly gratified that the House conferees accepted the $26 million in construction funds for the Stonewall Jackson project. This amount was deleted on the House floor in what I consider to be an ill-advised action. I commend the Senate conferees for insisting on the retention of these funds.

The Stonewall Jackson Lake was authorized by the Congress in 1966 as a multipurpose project on the West Fork River in north central West Virginia. The total Federal cost is estimated at $205 million, of which more than $82 million have already been appropriated. It is important to understand that much of the preliminary work, such as land acquisition and relocation is virtually completed or well advanced. The $26 million recommended by the President would be used to begin construction of the dam, continued relocation and other activities associated with the project.

Mr. President, this project has strong support in an area which has long been plagued by severe flooding. Completion of the Stonewall Jackson Lake would greatly alleviate the incidence of flooding in several counties in West Virginia. It would be another link in the network of projects in our State that have been developed over the past 40 years.

West Virginia is a mountainous State with many streams. It is a State, however, without a single natural lake. Projects carried out by the Army Corps of Engineers have given us eight beautiful and useful lakes. Stonewall Jackson would be the ninth.

In addition to their value for flood control, these lakes have become highly developed and well used recreational assets. The Corps of Engineers recently reported that the eight existing lakes are utilized by nearly 6 million people annually for recreational purposes.

As with some other water projects in all parts of the country, there has been an element of controversy associated with the Stonewall Jackson Lake. There are those who believe it is unneeded and that its development is too costly or would result in undesirable consequences in the community in which it is located.

It is my position that the benefits of the project so far outweigh any possible negative considerations that it must be carried through to completion. Furthermore, the Federal Government has already invested more than $82 million in this activity. To stop it now would mean that these funds have for the most part been wasted.

Again, I commend the conferees for including the Stonewall Jackson Lake appropriation in this bill. I assure the Senate that it is a vitally needed development and one which has wide support in West Virginia.

Mr. President, I am also gratified that the conference committee has approved funds to continue operations of the Appalachian Regional Commission in 1984 at the $145 million level approved by the House of Representatives. It is a recognition that the vital work of the Commission must be extended. I am pleased that the Senate conferees agreed to the amount in the House bill. It has been my privilege and responsibility not only to sponsor the original Appalachian Act in 1965 but also the reauthorizations over the years.

For the past 2 years, the Appalachian Regional Commission has carried out its work with substantially reduced resources. Total appropriations for both the highway and nonhighway programs in 1979 of $380,920,000 were made available to the 13 States of the region. This amount was the highest since the Commission was established in 1965. In 1981 appropriations totaled $302,492,000 even after a presidentially requested rescission. For the past 2 years, the Commission has operated on approximately $150 million annually.

At this level, it is difficult to maintain a program that adequately responds to the needs of one of our Nation's most disadvantaged areas. The recent recession has had an even more severe impact on Appalachia than the rest of the Nation, making it necessary to extend every possible form of assistance to meet human needs and to create a sound and stable economy.

Appropriated funds for next year, therefore, should not be reduced.

Eighteen months ago the Governors of the 13 Appalachian States proposed to the Congress a plan to phase down the programs of the Appalachian Regional Commission in both the highway and nonhighway areas. This plan was carefully developed by the Governors in recognition of the reduced level of Federal financial support. For this reason it focused on the most pressing unmet needs of the region and on the most severely distressed counties of Appalachia.

Earlier this year the Governors unanimously adopted a bipartisan resolution reaffirming their support for the phasedown program. It is encouraging that in its report on this legislation the Committee on Appropriations endorses the concept of the Governors' program. It is my hope that the Congress this year will adopt legislation authorizing this program for the duration of the period recommended by the Governors. Such authorization is proposed in S. 65, which I introduced early this year. That measure has the cosponsorship of 21 of the region's 26 Senators, representing both parties. It has at least one sponsor from each of the region's 13 States except North Carolina.

It is important that multiyear authorizations be enacted for the ARC phasedown program for several reasons. It has become apparent in the past 2 years that the Congress does not agree with the President's recommendation to end the Appalachian program immediately and it has been continued through the appropriations process. Authorizing legislation, therefore, should be adopted to provide a basis for appropriations and to redirect the ARC programs in accordance with the recommendations of the Governors and the wishes of the authorizing committees which have guided this program since its inception 18 years ago. In addition, a multiyear authorization would permit the Commission and its States to make necessary long-range plans, particularly with respect to the highway program.

I recognize that in the absence of congressionally approved authorizations in the past 2 years, it was necessary for the Appropriations Committees to take certain initiatives. I am deeply appreciative of their actions in maintaining this program, which continues to have significant impact on the lives of the 20 million people of Appalachia.

Mr. President, I appreciate the opportunity to join others in commenting on this measure, and I hope it will receive very speedy passage.

Mr. BYRD. Mr. President, I wish to express my gratitude to my senior colleague for his kind remarks concerning me.

I want to say, in return, that the people of West Virginia are highly indebted to him, as are the people of this Nation, for the work he has done as chairman of the Public Works Committee and for the work he is continuing to do as the ranking minority member.

Mr. HATFIELD. Mr. President, I know of no other amendments or any other discussion, and I move that the Senate adopt the conference report. I believe the yeas and nays have been ordered.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

On this question the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. BAKER. I announce that the Senator from Arizona (Mr. GOLDWATER), the Senator from Alaska (Mr. MURKOWSKI), the Senator from Alaska (Mr. STEVENS), and the Senator from Connecticut (Mr. WEICKER) are necessarily absent.

I further announce that, if present and voting, the Senator from Alaska (Mr. STEVENS) and the Senator from Arizona (Mr. GOLDWATER) would each vote yea.

Mr. CRANSTON. I announce that the Senator from Colorado (Mr. HART) and the Senator from South Carolina (Mr. HOLLINGS) are necessarily absent.

The PRESIDING OFFICER (Mr. PRESSLER). Are there other Senators who wish to vote?

The result was announced—yeas 82, nays 12, as follows:

[Rollcall Vote No. 180 Leg.]

YEAS—82

Hart	Murkowski	Weicker

So the conference report was agreed to.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the conference report was agreed to.

Mr. JOHNSTON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, I ask the Chair to lay before the Senate the amendments in disagreement.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 17 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert: ": *Provided further*, That of the amount herein appropriated $3,000,000 shall be available to enable the Secretary of the Interior to begin work on rehabilitating the Velarde Community Ditch Project, New Mexico, in accordance with the Federal Reclamation Laws (Act of June 17, 1902, 32 Stat. 788, and Acts amendatory thereof or supplementary thereto) for the purposes of diverting and conveying water to irrigated project lands. The principal features of the project shall consist of improvements such as the installation of more permanent diversion dams and headgates, wasteways arroyo siphons, and concrete lining of ditches in order to improve irrigation efficiency, conserve water, and reduce operation and maintenance costs. The cost of the rehabilitation will be nonreimbursable and constructed features will be turned over to the appropriate entity for operation and maintenance".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 25 to the aforesaid bill, and concur therein with an amendment as follows:

Strike out the matter stricken by said amendment, and insert: ": *Provided*, That notwithstanding any other provision of law, no funds may be obligated or expended after the date of enactment of this Act for Project 82-D-109 unless the President certifies to Congress that—

"(1) for each 155mm nuclear weapon produced an existing 155mm nuclear weapon shall be removed from the stockpile and permanently dismantled; and

"(2) formal notification has been received from the North Atlantic Treaty Organization nation in which such weapons are sought to be deployed that such nation has approved replacement of existing 155mm nuclear weapons with the new 155mm nuclear weapon."

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 26 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert:

"None of the funds appropriated by this Act, or by any other Act, or by any other provision of law shall be available for the purpose of restarting the L-Reactor at the Savannah River Plant, Aiken, South Carolina, until the Department of Energy completes an Environmental Impact Statement pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969 and until issued a discharge permit pursuant to the Federal Water Pollution Control Act (33 U.S.C. 1251, et seq.) as amended, which permit shall incorporate the terms and conditions provided in the Memorandum of Understanding entered into between the Department of Energy and the State of South Carolina dated April 27, 1983, relating to studies and mitigation programs associated with such restart. For purposes of this paragraph the term "restarting" shall mean any activity related to the operation of the L-Reactor that would achieve criticality, generate fission products within the reactor, discharge cooling water from nuclear operations directly or indirectly into Steel Creek, or result in cooling system testing discharges which exceed the volume, frequency and duration of test discharges conducted prior to June 28, 1983.

"Consistent with the National Environmental Policy Act of 1969, and in consultation with State officials of South Carolina and Georgia, the preparation and completion of the Environmental Impact Statement called for in the preceding paragraph shall be expedited. The Secretary of Energy may reduce the public comment period, except that such period shall not be reduced to less than thirty days, and the Secretary shall provide his Record of Decision, based upon the completed Environmental Impact Statement, not sooner than December 1, 1983, and not later than January 1, 1984."

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate concur in the House amendments and that they be considered en bloc.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, may I say to all Members that there will be no more votes prior to July 11.

Mr. President, may I take this opportunity to say once again that I think all of us owe a debt of gratitude to the chairman and ranking member and to the members of the Appropriations Committee on both sides. I do not recall that we have been able to make such good progress on appropriations bills so soon in a long, long time. It is due entirely to the cooperation of Members on both sides of the aisle, to the outstanding leadership of the chairman and the chairmen of the

subcommittees and the ranking members of the subcommittees.

It is in no small measure due to the excellent cooperation, which I am so personally grateful for, of the minority leader in arranging these matters so that the Senate could address them in a timely way and promptly.

Mr. President, I observe that the conference report on energy and water appropriations that we have just adopted is fully $300 million in budget authority under the President's request. It is $100 million in outlays under the President's budget. For a bill that is often thought of as a pork barrel bill, that is a remarkable accomplishment, indeed.

I wish to congratulate all Senators who had a hand in the production of this legislative effort.

Mr. BYRD. Mr. President, before the Senator proceeds, I will not say anything further with regard to congratulating and thanking members of the committee, for I have already done that. But the distinguished majority leader referred to me in his comments and I wish to thank him for that.

I would like to recall a sentence out of the Scriptures.

A man that hath friends must show himself friendly.

I think this can very well be applied to the majority leader. He has friends in this Chamber and it is because he, himself, is friendly, very accommodating, understanding, and considerate at all times. We all respect him and thank him for that.

Mr. STENNIS. Mr. President, if the Senator will yield, let me say this: I think, see, and I believe, since I have been here, that we have a team on this floor. The majority leader and the minority leader have the ability to make things go and move on their merits. A great deal of success is due to their work.

Mr. BAKER. Mr. President, I am extremely grateful for the remarks by the most senior Member of the minority, a man for whom I have such extraordinary respect, and a man who is my neighbor to the south in Mississippi, the ranking member of the Appropriations Committee, Senator STENNIS.

Mr. President, there is a great quantity of routine business that we can take care of. I really expect Members may not wish to remain to hear it, but the minority leader and I will have to stay around for a while.

ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that there now be a period for the transaction of routine morning business to extend not past the hour of 6:15 p.m. in which Senators may speak.

The PRESIDING OFFICER. Without objection, it is so ordered.

TRIBUTE TO FORMER SENATOR MILTON R. YOUNG

Mr. STENNIS. Mr. President, during consideration of the energy and water development appropriations bill when the Senate, again, considered the merits of the Garrison diversion project in North Dakota, I recalled in a special way a dear friend of mine, the late Senator Milton Young of North Dakota.

On the occasion of his passing, and the statements made by others in his memory, I was, regrettably, absent from the Senate.

In tribute to his great service to the Nation and because of the great value that I placed on Senator Young's friendship and the deep respect which I developed for his abilities and judgment as a legislator, I would like to share with my colleagues and his many friends my personal feelings about Senator Young.

Our friendship developed from more than 34 years of service together in the Senate, especially during our close association as we worked together more than 20 years as fellow members of the Appropriations Committee.

He was a very effective, hard-working, dedicated Senator. He was not a showboat. Indeed, he seemed to avoid the spotlight. He was interested in matters of government as they applied to all areas of the Nation's interests. In his quiet, friendly way, he was an extremely effective legislator. He contributed to the work of the Senate and our committee as a team player. He was a reasonable man. A man who listened well to all sides of any question. Widely respected for his special insight and knowledge in agricultural matters, he was a great counselor and guide in legislative matters concerning this important part of the American economy.

By steady application of the basic values of hard work and self-discipline that he learned as a boy on a farm in North Dakota, Milton Young rose to being a great Senator and a great American. May his tribe increase.

I mourn his passing. I miss him and treasure our friendship. To his wife, Pat, my dear friend, and to his children, Mrs. Stennis and I offer our deepest sympathy and condolences. Mrs. Young was a longtime member of the Capitol Hill family and rendered much fine service to our country, all in her own right.

HEARINGS ON DEPARTMENT OF DEFENSE

Mr. TOWER. I would like to announce today that after the Congress completes its work on the Defense Authorization Act for fiscal year 1984, the Senate Armed Services Committee will begin a comprehensive series of hearings on the structure, organization, and decisionmaking procedures of the Department of Defense.

In my opinion, there are few issues as important to our national security as the organization and relationships of the defense elements of our executive branch and our military and whether such organization facilitates or impedes effective decisionmaking. A number of organizational issues have been repeatedly raised since World War II, and it is imperative in my opinion that the Committee on Armed Services in the Senate consider these issues and determine whether structural, organizational, or procedural changes in DOD, including the military services, are necessary. The tasks of providing for national security have grown in complexity; we must have the most effective defense organization possible to meet the enormous security challenges of today and tomorrow.

I now anticipate that these hearings will focus on five major sets of issues:

First, is the office of the Secretary of Defense, as presently constituted, designed to effectively manage the Department's overall effort? Has departmental decisionmaking become overcentralized in the Secretary's office? Do the staffs under the Secretary unnecessarily duplicate the work performed by the services? Are these staffs simply too large? And, perhaps most importantly, does the huge civilian bureaucratic structure stifle professional military judgment and innovation and invite too much civilian interference in technical military decisions?

Second, is the organization of the Joint Chiefs of Staff, as it is presently constituted, effective in performing its missions? Do the Joint Chiefs of Staff provide useful and timely military advice to the President and the Congress? Are the JCS properly positioned in the chain of command, or should the President directly command the JCS in wartime? Should the JCS be more significantly involved in resource allocations?

Third, how effectively do the unified commands function? Do they achieve the level of interservice cooperation that will be required should it be necessary to wage war? Are the unified commands effective planners? Will they be effective mobilization headquarters? To what extent are the force and program deficiencies identified by the unified commands emphasized in the resource allocation process?

Fourth, how well are decisions made in certain specific functional areas—such as budget formulation, procurement of weapons systems, and test and evaluation of weapons systems? Do multiple levels of review and long time lapses between the conception of a military requirement and the initial

operational capability of a system substantially increase system costs?

Fifth, are the organizational relationships between DOD and other parts of the Federal Government which become involved in national security planning—such as the National Security Council, State Department, Central Intelligence Agency, and Federal Emergency Management Agency—appropriate and effective? Do these relationships facilitate the formulation of a comprehensive national security strategy?

In these hearings, the committee will inquire into the findings of the Blue Ribbon Defense Panel which studied Defense Department organization in 1969 and 1970. The report of that panel identified as structural problems many of the same issues that we are considering today. It will be interesting to determine to what extent the proposals of that study effort have been implemented. In addition, these hearings will be an opportunity for the committee to consider whether another outside commission to study DOD organization would be appropriate and useful at this time.

I want to emphasize that these proposed hearings on Defense Department organization, structure, and decisionmaking processes are not intended as a criticism of any Presidential administration, and particularly not of this administration. The Department of Defense has grown under both Republican and Democratic administrations, and the complex bureaucracy at DOD is the result of a continuous, gradual organizational evolution. Our aim is to look at the institution as it now exists and to determine whether or not it is effective for the formulation and implementation of a sound national security policy. Incidentally, I suspect that any weaknesses we may identify in the DOD organization also exist in domestic agencies, and perhaps similar reviews of other executive branch departments would be useful.

I plan for the committee during this inquiry to hear from a large number of witnesses who currently hold government office as well as many persons who have previously served in government or are otherwise knowledgeable about this subject.

I have advised the Secretary of Defense about these hearings, and we will invite him to be the lead witness when essential committee business is completed. I think that these hearings, which are now scheduled to begin on July 26, will focus on a number of issues that are critical to our national security.

Let me emphasize again that I do not believe that the Department of Defense is alone in having too much of an over-layered bureaucracy. I believe that there is probably to much bureaucratic baggage in a number of departments around here, to the extent that clear lines of control, authority, and responsiblity and accountability are being obscured.

But, of course, our jurisdiction and our focus is on the armed services.

Again, let me emphasize this is not implied criticism of Secretary Weinberger. I think he has done an outstanding job given the bureaucracy that he inherited, and I think that under his management and leadership great strides have been made in trying to bring more efficiency into the operation and lower costs to our systems.

THE DEATH OF MAXIE ANDERSON

Mr. DOMENICI. Mr. President, I have lost a good friend. New Mexico has lost its greatest hero and the world has lost its greatest adventurer in recent history. Maxie Anderson, world famous balloonist, is dead at the age of 49, suffering a tragic accident in the love of his life, ballooning, in Europe, 25 miles from the East German border.

All of you know his heroic feats as a balloonist. In 1978, he and fellow Albuquerqueans Ben Abruzzo and Larry Newman became the first persons to ever float across the Atlantic Ocean in a balloon. The Double Eagle II, which made this first crossing, is in prominent display in our National Air and Space Museum in Washington, D.C.

In 1980, he and his son, Kris, became the first persons to ever cross the north American continent in a balloon named "Kitty Hawk." He gazed upon the shores of the Pacific Ocean when he took off and saw the waters of the Atlantic when he landed in the first ever successful attempt.

His life was, like many heroes, not without its failures. Three times he valiantly tried to circumnavigate the world in a balloon, and three times the weather and mechanical problems forced him down.

But his spirit never died and that is what made him the marvelous human being that he was, one of the finest and most honorable men I have ever known in my life. There is no question that he was a doer, and when he did things, he did them well. His business was a giant in New Mexico, one that he himself built from the bottom up. Maxie would have it no other way.

America has a big void with his tragic departure. We look to the movies for heroes at times, but here we had, as real as you and me, a true American hero. Those of us who knew him well, his family and his friends, know him first as a great father and a great person. I express my condolences to his family as I am sure all New Mexicans and Americans do at their more personal tragic loss.

We are all going to miss him. Maxie Anderson, the great balloonist and adventurer, a man with a heart as big as his dreams.

PRODUCTION OF 155MM ARTILLERY SHELLS

Mr. BURDICK. Mr. President, the Pentagon has asked us to break a 14-year ban on the production of lethal chemical weapons by producing 155mm binary artillery shells.

The main argument set forth by the Department of Defense in support of their request is that the Soviets have a vastly larger stockpile, and that our own is woefully inadequate.

Mr. President, it has been stated that our stockpile is inadequate. Indeed, in testimony before the Armed Services Committee, the Secretary of Defense testified that our stockpile is sufficient.

The entire question is outlined in a Washington Post article dated May 27, 1983. It clearly shows that claims that our stockpile of 155mm shells is too small are unsupported. I ask that the article be printed in the RECORD for the benefit of my colleagues.

The article follows:

PENTAGON ACKNOWLEDGES CHEMICAL ARMS SUPPLY

(By Walter Pincus, Washington Post Staff Writer)

Opponents of President Reagan's plan to build new chemical weapons have drawn from the Pentagon an acknowledgement that the United States already has stockpiled "hundreds of thousands" of usable 8-inch and 155mm artillery shells containing deadly nerve gas. A congressional aide says that "at least 10 percent of them" are in West Germany.

That stockpile is one reason opponents will urge the House to vote down—as it did last year—an administration request to break a 14-year moratorium on chemical weapons production in the United States.

The chemical weapons request is part of the defense authorization bill pending on the House floor.

The Pentagon is asking for $48.1 million to begin production of new 155mm binary chemical shells. These are regarded as easier to transport and safer to handle than the older, stockpiled nerve gas shells because they are made up of two non-toxic chemicals that become lethal only when mixed during firing.

Both the United States and the Soviet Union have signed the Geneva Protocol of 1925, which outlawed first use of chemical weapons by the signators. Nevertheless, each side has both chemical weapons and defensive equipment in case the other decides to break the treaty.

The Pentagon acknowledged existence of the stockpiled weapons in a reply to a written question at a Senate Armed Services Committee hearing. The transcript was published earlier this month and the relevant part to the reply was unclassified, apparently inadvertently.

A key Pentagon official conceded recently that the stockpile of existing 8-inch and 15mm chemical artillery shells is "approximately sufficient" for present purposes, although smaller than the Joint Chiefs of Staff would like. But he quickly added that

there were questions about how long these older shells would last and that some "are filled with [a] less useful persistent agent and . . . cannot be fired to the maximum range of the new howitzers."

The number of shells the Pentagon wants is classified, but defense sources said the Army's plans call for firing one nerve gas shell for every six conventional artillery shells, to keep the enemy in protective clothing.

The Reagan administration's multibillion-dollar, five-year plan to resume production of chemical weapons got a setback earlier this month when the Pentagon told the House Armed Services Committee that there were "technical problems" with the Bigeye bomb, an air-delivered binary weapon.

It was designed to carry a longlasting nerve gas deep behind enemy lines. Defense officials found, however, that it developed gaseous pressure inside the shell after the binary chemicals were mixed, but before it was dropped. Thus it could rupture and become dangerous to the aircraft carrying it.

The Pentagon asked the House committee to withhold the $43 million for fiscal 1984, which it had requested to start production of the bomb, while it tried to find a solution to the pressure problem. However, the Pentagon asked Congress to approve $66.5 million in the meantime for equipment and chemicals it would need to begin producing the bomb once the pressure problem was solved.

The Bigeye, according to a key Pentagon official, "is our most pressing need," and the decision to delay the bomb for a year was made "reluctantly."

Last Wednesday, Defense Secretary Caspar W. Weinberger held a meeting on Capitol Hill with Rep. Ed Bethune (R-Ark.), and other opponents of the chemical weapons production program. Bethune, whose district contains the Pine Bluff site where the binaries would be built, had introduced a resolution earlier this month that called for a freeze in the production of new chemical weapons.

At the meeting, according to congressional sources, Weinberger said he wanted to avoid a floor fight on the issue. He asked the members at least to support funds for equipment and chemical materials so that production of the bomb and artillery shells could begin at some later date.

TRIBUTE TO FORMER SENATOR MILTON YOUNG

Mr. MOYNIHAN. Mr. President, I would like to join my colleagues in paying tribute to Milton Young, the former Senator from the State of North Dakota. A remarkable man, known to many as Mr. Wheat, Senator Young was exemplary in his dedication to serving the needs of this Nation's farmers. His commitment to the strength of agriculture was unwavering. And, in this era of balance of trade deficits, we owe him our thanks for the strength of U.S. agriculture, which helps relieve those deficits.

Senator Young was, however, more than a protector of agriculture. He was also a grand teacher willing to help new Senators. Many here were given advice by him in his often humorous and always patient style. And that advice was indeed sound. Though Senator Young and I sat across the aisle from each other, I could not help respect his point of view. In part, I suppose, because in an odd way we were related—his wife being by marriage a cousin of my wife. He was first and foremost a man of integrity. His interest in serving his constituents was unquestionable.

The Senate indeed lost a great deal upon Senator Young's retirement in 1980. Now his family and friends sadly must share our sense of loss. We will all miss him.

MEMORIAL TO SENATOR MILTON YOUNG

Mr. PACKWOOD. Mr. President, the death of Senator Milton Young, occurring a few years after his retirement from long and superb service in the U.S. Senate, is a loss felt by me personally and by my wife Georgie. We extend to his family, and especially to his wife Pat, our deepest sympathy and appreciation for his many decades of distinguished public service.

I remember Senator Young for his effective and devoted leadership on behalf of the American farmer. I remember him for his half century of public service. I also remember his service as Secretary to the Senate Republican Conference. He held a leadership position in the Senate longer in the 20th century than any other Senator, Republican or Democrat.

Perhaps most poignant to me personally is my memory of Milton Young as a gentleman who served his constituents, the Nation, and the Senate selflessly, with good humor and humility.

It was a privilege to serve with him for his last 6 years in the Senate. Georgie and I extend our best wishes and friendship to Pat Young and her family.

MISS FRANCES H. SMITH, CLERK OF THE SUPREME COURT OF SOUTH CAROLINA

Mr. THURMOND. Mr. President, I rise today to recognize the outstanding contributions of Miss Frances H. Smith, clerk of the Supreme Court of South Carolina, on the occasion of her retirement.

Miss Smith has served in numerous capacities in State and Federal Government for the past 46 years, and she is well known throughout South Carolina as a skillful and knowledgeable individual.

Miss Smith earned a bachelor of science degree from the University of South Carolina and was awarded the Algernon Sydney Sullivan Award for outstanding public service. After graduating, Miss Smith worked for the Federal Government for 5 years, before joining the South Carolina Insurance Commission in 1942.

In 1955, Miss Smith began her long and distinguished career with the South Carolina Supreme Court, serving as the secretary to the clerk. She was promoted to clerk of the supreme court in 1958 where she has served ably for the last 25 years.

Frances Smith is held in high esteem by members of the legal profession in South Carolina. Over the years, she has officially welcomed thousands of new lawyers into the legal profession. In fact, Miss Smith is one of the first persons new lawyers deal with during the process of admission to the State bar.

Mr. President, three words best describe the invaluable contributions of this remarkable lady: dedication, loyalty, and service. Although these attributes appropriately apply to Miss Smith's experience in public service, they also accurately describe the manner in which she performs all tasks, professional or otherwise.

She is a member of the National Conference of Appellate Court Clerks and the National Bar Admissions Administrators, serving on the executive committees of each of these organizations.

Miss Smith's dedication is not merely limited to professional organizations. For over 50 years she has been a member of the Washington Street United Methodist Church in Columbia, S.C. There she has served as a member of the administrative board, a trustee of the foundation, and a teacher in the children's department of her church.

Mr. President, the State of South Carolina owes a great debt of gratitude to Miss Frances H. Smith for her outstanding accomplishments, and she can take great pride in knowing that her achievements have made a tremendous impact in the judicial community. I know my colleagues in the U.S. Senate join me in saluting Miss Smith and wishing her many years of good health and happiness during her well-deserved retirement.

TENTH ANNIVERSARY OF THE CONGRESSIONAL SCIENCE AND ENGINEERING FELLOWS PROGRAM

Mr. GORTON. Mr. President, I take this opportunity to congratulate the congressional science and engineering fellows program on its 10th anniversary.

This program places highly qualified, accomplished scientists, engineers, and other professionals in the offices of individual Senators, Representatives, and committees for a 1-year assignment. Fellows perform in much the same way as permanent, professional staff members and are involved

in varied legislative oversight and investigative activities.

The program is expertly overseen and coordinated by the American Association for the Advancement of Science (AAAS) on behalf of more than 15 separate professional scientific and engineering societies which currently sponsor fellows. Sponsoring societies include the American Chemical Society, the American Psychological Association, the American Physical Society, the American Philosophical Association, and the Institute for Electronics & Electrical Engineers. The fellows are drawn from both industry and academia.

The goals of the program are twofold. First, the fellows bring to Congress new insights, fresh ideas, and extensive knowledge and education in a variety of disciplines. The fellows provide their expertise to the Congress on many issues that have significant scientific or technical components. Second, the fellows convey back to their colleagues in the scientific community an understanding of the workings of the political and public policy processes as well as an understanding of the importance of interaction in the scientific and governmental communities.

Scientists still have much to learn about and to contribute to the policy process and to the application of science to social needs. We in government have much to learn about how to use science, and scientists and engineers, in the search for solutions to our most important national problems. Energy, space policy, the challenge of the information age, basic research funding and priorities, the mental and physical health needs of our citizens, transportation, the use and disposal of hazardous and radioactive compounds are all issues that have scientific or technical components, and are issues to which science and engineering fellows have made substantial contributions during their terms in Congress.

Mr. President, I think it is noteworthy that in 1973 the first such fellow, sponsored by the American Society of Mechanical Engineers (ASME), was placed with the Senate Commerce Committee. Over the years, the Commerce Committee, particularly the Science, Technology and Space Subcommittee, which I now chair, has benefited enormously from the contributions of these talented men and women. This year we were pleased to have had working with us Dr. Norine E. Noonan, one of two Science Fellows sponsored by the American Chemical Society. She is on the faculty of Georgetown University Schools of Medicine and Dentistry, where she is a well-trained and well-known scientist in her field of cell biology. Prior to joining our staff, Dr. Noonan gained experience working voluntarily with the Science, Research and Technology Subcommittee on the House Science and Technology Committee on a variety of legislative and oversight issues.

Mr. President, I ask my colleagues to join with me in congratulating this outstanding program on its 10th anniversary. I believe the involvement by these highly trained and motivated scientists and engineers in the governmental processes represents a real and substantial contribution both to Congress and the country. In light of the increasingly technological character of many of the critical issues before us, the congressional science and engineering fellows program may be even more timely now than at its beginning.

Mr. President, I ask unanimous consent to have printed in the RECORD a list of the names of the 1982-83 congressional science and engineering fellows and their assignments.

There being no objection, the list of names was ordered to be printed in the RECORD, as follows:

CONGRESSIONAL SCIENCE AND ENGINEERING FELLOWS

Harley D. Balzer (AHA)—Representative Lee H. Hamilton (D-Ind.).

William Bedesem (ASME)—Science, Research and Technology Subcommittee, House Committee on Science and Technology.

David E. Bouchard (NSPE)—Subcommittee on Energy Development, House Committee on Science and Technology.

John J. Cahill (STATE)—Office of Ocean Law and Policy, U.S. Department of State.

John T. Chu (MAA, AMS, SIAM)—Senator Daniel K. Inouye (D-Hawaii).

Robert M. Cook-Deegan (OTA)—Health and Life Sciences Division, Office of Technology Assessment.

William J. Cromartie (AAAS)—Representative George E. Brown, Jr. (D-Calif.).

Teresa S. Cross (DUKE)—Representative Mervyn M. Dynally (D-Calif.).

Julia C. Crowley (OTA)—Energy Materials and International Security Division, Office of Technology Assessment.

Miriam Davis (CRS/AAAS)—Science Policy Research Division, Congressional Research Service.

Gray S. Garwood (SRCD)—Rep. Pat Williams (D-Mont.).

Ellen Greenberg (SRCD)—Senator Arlen Specter (R-Pa.), Subcommittee on Juvenile Justice, Judiciary Committee.

Richard H. Hersh (OTA)—Science Information and Natural Resources Division, Office of Technology Assessment.

Rush Holt (APS)—Representative Robert Edgar (D-Pa.).

Eric Hyman (OTA)—Office of Technology Assessment.

Anthony Jackson (SRCD)—Representative Ted Weiss (D-N.Y.).

Robert J. Kainz (CRS/AAAS)—Science Policy Division, Congressional Research Service.

Jack Lubowsky—Senator John Glenn (D-Ohio), Subcommittee on Energy, Nuclear Proliferation and Government Processes, Senate Government Affairs Committee.

Edward R. Long (AHA)—Representative Tom Harkin (D-Iowa).

Jerry L. Martin (APhA)—Representative Hank Brown (R-Colo.).

Orin E. Marvel (IEEE)—Senator Jeremiah Denton (R-Ala.).

Judith Meyers (APA)—Representative David R. Obey (D-Wis.).

Norine E. Noonan (ACS)—Subcommittee on Science, Technology and Space, Senate Committee on Commerce, Science and Transportation.

William J. Pollard (ESD)—Senator Carl Levin (D-Mich.).

David Pomerantz (APhA)—Representative Richard A. Gephardt (D-Mo.).

Zeda Rosenberg (ASM)—Representative David R. Obey (D-Wis.).

Ford C. Runge (STATE)—Bureau for Science and Technology, U.S. Agency for International Development.

Doyce Satterfield (IEEE)—Senator Howell Heflin (D-Ala.).

Richard K. Scotch (SRCD)—Representative Paul Simon (D-Ill.).

Gordon A. Smith (AIAA)—Subcommittee on Space Science and Applications, House Committee on Science Technology.

Phillip G. Sokolove—Representative Albert Gore, Jr. (D-Tenn.).

Carol M. Satuto (SRCD)—Representative Mario Biaggi (D-N.Y.).

David Stonner (APA)—Representative Claudine Schneider (R-R.I.).

Mark H. Tennant (ASME)—Senator Strom Thurmond (R-S.C.).

James R. Treglio (APS)—Senator Paul E. Tsongas (D-Mass.).

Scott M. Wagner (ESD)—Senator Donald W. Riegle (D-Mich.).

Randall Wedin (ACS)—Representative George E. Brown, Jr. (D-Calif.).

Arthur B. Weissman (AGU)—Senator Christopher J. Dodd (D-Conn.).

Ann L. Wilson (SRCD)—Senator Dale Bumpers (D-Ark.).

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Acting President pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

MESSAGES FROM THE HOUSE

At 11:22 a.m., a message from the House of Representatives, delivered by Ms. Goetz, one of its clerks, announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 3133) making appropriations for the Department of Housing and Urban Development, and for sundry independent agencies, boards, commissions, corporations, and offices for the fiscal year ending September 30, 1984, and for other purposes; it recedes from its disagreement

to the amendments of the Senate numbered 6, 10, 13, 35, 40, 43, 47, and 58 to the bill, and agrees thereto; and it recedes from its disagreement to the amendments of the Senate numbered 1, 25, 26, 32, 33, 34, 53, and 59 to the bill, and agrees thereto, each with an amendment, in which it requests the concurrence of the Senate.

The message also announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

H.R. 2637. An act to amend the District of Columbia Self-Government and Governmental Reorganization Act to increase the amount authorized to be appropriated as the annual Federal payment to the District of Columbia; and

H.R. 3190. An act to establish an improved program for extra-long staple cotton.

ENROLLED JOINT RESOLUTION SIGNED

The message further announced that the Speaker has signed the following enrolled joint resolution:

S.J. Res. 96. Joint resolution to designate August 1, 1983, as "Helsinki Human Rights Day".

At 2:13 p.m., a message from the House of Representatives, delivered by Ms. Goetz, announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 3135) making appropriations for the legislative branch for fiscal year ending September 30, 1984, and for other purposes; it recedes from its disagreement to the amendments of the Senate numbered 11, 12, and 15 to the bill, and agrees thereto; and it recedes from its disagreement to the amendments of the Senate numbered 1, 2, and 17 to the bill, and agrees thereto, each with an amendment, in which it requests the concurrence of the Senate.

The message also announced that the House agrees to the amendment of the Senate to the bill (H.R. 2065) to authorize appropriations to the National Aeronautics and Space Administration for research and development, construction of facilities, and research and program management, and for other purposes.

At 3:46 p.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 3132) making appropriations for energy and water development for the fiscal year ending September 30, 1984, and for other purposes; it recedes from its disagreement to the amendments of the Senate numbered 16 and 22 to the bill, and agrees thereto; and it recedes from its disagreement to the amendments of the Senate numbered 17, 25, and 26 to the bill, and agrees thereto, each with an amendment in which it requests the concurrence of the Senate.

The message also announced that the House has agreed to the following concurrent resolution, without amendment:

S. Con. Res. 48. Concurrent resolution providing for an adjournment of the Senate from June 29, 1983, June 30, 1983, or July 1, 1983 to July 11, 1983, and an adjournment of the House from June 30, 1983, to July 11, 1983.

The message further announced that the House has passed the following bills and joint resolution, in which it requests the concurrence of the Senate:

H.R. 3363. An act making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 1984, and for other purposes;

H.R. 3398. An act to change the tariff treatment with respect to certain articles, and for other purposes; and

H.J. Res. 390. Joint resolution to permit free entry into the United States of the personal effects, equipment, and other related articles of foreign participants, officials, and other accredited members of delegations involved in the games of the XXIII Olympiad to be held in the United States in 1984.

ENROLLED BILLS SIGNED

At 4:39 p.m., a message from the House of Representatives, delivered by Ms. Goetz, announced that the Speaker has signed the following enrolled bills:

H.R. 2713. An act to amend the Public Health Service Act to authorize appropriations to be made available to the Secretary of Health and Human Services for research for the cause, treatment, and prevention of public health emergencies; and

H.R. 3133. An act making appropriations for the Department of Housing and Urban Development, and for sundry independent agencies, boards, commissions, corporations, and offices for the fiscal year ending September 30, 1984, and for other purposes.

The enrolled bills were subsequently signed by the President pro tempore (Mr. THURMOND).

HOUSE MEASURES REFERRED

The following bills and joint resolution were read the first and second times by unanimous consent, and referred as indicated:

H.R. 3190. An act to establish an improved program for extralong staple cotton; to the Committee on Agriculture, Nutrition, and Forestry.

H.R. 3363. An act making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 1984, and for other purposes; to the Committee on Appropriations.

H.R. 3398. An act to change the tariff treatment with respect to certain articles, and for other purposes; to the Committee on Finance.

H.J. Res. 290. Joint resolution to permit free entry into the United States of the personal effects, equipment, and other related articles of foreign participants, officials, and other accredited members of delegations involved in the games of the XXIII Olympiad to be held in the United States in 1984; to the Committee on Finance.

HOUSE MEASURE PLACED ON CALENDAR

The following bill was read the first and second times by unanimous consent, and placed on the calendar:

H.R. 2637. An act to amend the District of Columbia Self-Government and Governmental Reorganization Act to increase the amount authorized to be appropriated as the annual Federal payment to the District of Columbia.

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC-1327. A communication from the Director of the Office of Personnel Management, transmitting a draft of proposed legislation to restructure the Federal employees health benefits program to strengthen financial control over the program and enhance competition among participating health plans, and for other purposes; to the Committee on Governmental Affairs.

EC-1328. A communication from the Assistant Secretary for Health, Department of Health and Human Services, transmitting, pursuant to law, a report on a new Privacy Act system of records; to the Committee on Governmental Affairs.

EC-1329. A communication from the Secretary to the Council of the District of Columbia, transmitting, pursuant to law, a resolution adopted by the Council on May 10, 1983; to the Committee on Governmental Affairs.

EC-1330. A communication from the Director of the Administrative Office of the U.S. Courts, transmitting, pursuant to law, a report on the financial condition of the Judicial Retirement System and the Judicial Survivor's Annuities System for calendar year 1982; to the Committee on Governmental Affairs.

EC-1331. A communication from the Attorney General of the United States, transmitting, pursuant to law, an evaluation of the U.S. Trustee Pilot Program for Bankruptcy Administration; to the Committee on the Judiciary.

EC-1332. A communication from the Secretary of Labor, transmitting, pursuant to law, the annual report of the Department of Labor for fiscal year 1982; to the Committee on Labor and Human Resources.

EC-1333. A communication from the Administrator of the Environmental Protection Agency, transmitting, pursuant to law, a report on the potential health and environmental hazards of uranium mine wastes; to the Committee on Environment and Public Works.

EC-1334. A communication from the Administrator of the Panama Canal Commission, transmitting, pursuant to law, a report on a claim for repayment of damages incurred in a shipping accident in the Panama Canal; to the Committee on Armed Services.

EC-1335. A communication from the Administrator of the Panama Canal Commission, transmitting, pursuant to law, a report on a claim for repayment of damages result-

ing from a shipping accident in the Panama Canal; to the Committee on Armed Services.

EC-1336. A communication from the Deputy Assistance Secretary of Defense, transmitting, pursuant to law, notice that the Department of the Navy plans to exercise authority for exclusion of the clause concerning examination of certain records by the Comptroller General; to the Committee on Armed Services.

EC-1337. A communication from the Assistant Secretary of the Army (Installations, Logistics, and Financial Management), transmitting, pursuant to law, a report on the conversion of the aircraft maintenance and fueling services activity at Fort Knox, Kentucky, to contractor performance; to the Committee on Armed Services.

EC-1338. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Better Planning and Management of Threat Simulators and Aerial Targets is Crucial to Effective Weapon Systems Performance; to the Committee on Armed Services.

EC-1339. A communication from the Chairman of the United States Commission on Civil Rights, transmitting, pursuant to law, a statement on equal opportunity in Presidential appointments; to the Committee on the Judiciary.

EC-1340. A communication from the Director of ACTION, transmitting, pursuant to law, final regulations, Part 1207 (Senior Companion Program), Part 1208 (Foster Grandparent Program), and Part 1209 (Retired Senior Volunteer Program); to the Committee on Labor and Human Resources.

EC-1341. A communication from the Assistant Secretary of Defense (Manpower, Reserve Affairs, and Logistics), transmitting, pursuant to law, an estimate on military personnel assigned ashore in NATO countries at the end of fiscal year 1984; to the Committee on Armed Services.

E-1342. A communication from the Assistant Secretary of the Navy (Shipbuilding and Logistics), transmitting, pursuant to law, a report on the conversion of the industrial shop services function at the Chesapeake Bay Detachment, Naval Research Laboratory, Washington, D.C., to performance by contractor; to the Committee on Armed Services.

EC-1343. A communication from the Vice President for Government Affairs, National Railroad Passenger Corporation, transmitting, pursuant to law, the sixth performance evaluation report, dated June 6, 1983; to the Committee on Commerce, Science, and Transportation.

EC-1344. A communication from the District of Columbia Auditor, transmitting, pursuant to law, a report entitled "review of Alleged Improper Unemployment Compensation Payments"; to the Committee on Governmental Affairs.

EC-1345. A communication from the Assistant Secretary of Housing and Urban Development (Administration), transmitting, pursuant to law, a report on proposed amendments to a Privacy Act system of records; to the Committee on Governmental Affairs.

EC-1346. A communication from the Executive Director of the Marine Mammal Commission, transmitting, pursuant to law, the annual report of the Commission on activities under the Freedom of Information Act for calendar year 1982; to the Committee on the Judiciary.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. HATCH, from the Committee on Labor and Human Resources:

Report to accompany the bill (S. 1340) to revise and extend the Rehabilitation Act of 1973 and to extend the Developmental Disability Assistance and Bill of Rights Act, and for other purposes (Rept. No. 98-168).

By Mr. THURMOND, from the Committee on the Judiciary, without amendment:

S. 1469. A bill to amend title 18 of the United States Code relating to the sexual exploitation of children (Rept. No. 98-169).

By Mr. THURMOND, from the Committee on Armed Services, without amendment:

S. 1245. A bill to amend chapter 157 of title 10, United States Code, to authorize the Secretary of Defense to provide transportation for next of kin of certain persons who are unaccounted for, to attend annual national meetings sponsored by the National League of Families of American Prisoners and Missing in Southeast Asia.

By Mr. HEINZ, from the Committee on Banking, Housing, and Urban Affairs:

Report to accompany the bill (S. 979) to amend and reauthorize the Export Administration Act of 1979 (Rept. No. 98-170).

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. WILSON, from the Committee on Armed Services:

Delbert L. Spurlock, Jr., of Virginia, to be an Assistant Secretary of the Army.

Mr. TOWER. Mr. President, from the Committee on Armed Services, I report favorably the following nominations: Maj. Gen. Edgar A. Chavarrie, U.S. Air Force, to be lieutenant general, Maj. Gen. Winston D. Powers, U.S. Air Force, to be lieutenant general, Vice Adm. Edward C. Waller III, U.S. Navy (age 57), to be placed on the retired list, Maj. Gen. Richard K. Saxer, U.S. Air Force to be lieutenant general, Lt. Gen. Julius W. Becton, Jr., U.S. Army (age 56), to be placed on the retired list, and Maj. Gen. Charles W. Bagnal, U.S. Army, to be lieutenant general. I ask that these names be placed on the Executive Calendar.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. TOWER. Mr. President, in addition, in the Air Force there are 10 appointments to the grade of colonel and below (list begins with Charles P. Hatsell), in the Air Force there are 116 permanent promotions to the grade of colonel (list begins with Glen W. Alexander), in the Air Force there are 142 permanent promotions to the grade of lieutenant colonel (list begins with Louis W. Adams II), in the Air Force there are 45 permanent promotions to the grade of lieutenant colonel and below (list begins with John N. Rogerson), in the Air Force Reserve there are 16 promotions to the grade of lieutenant colonel (list begins with Robert F. Ackerman), in the Air Force there are 470 permanent promotions to the grade of major (list begins with Edward F. Augustyniak, Jr.), in the Marine Corps there are 6 permanent appointments to the grade of second lieutenant (list begins with Keith W. Danel), in the Navy there are 387 permanent promotions to the grade of commander (list begins with David J. Abbott) and Col. Erwin J. Rokke, U.S. Air Force, to be dean of the faculty, U.S. Air Force Academy. Since these names have already appeared in the CONGRESSIONAL RECORD and to save the expense of printing again, I ask unanimous consent that they be ordered to lie on the Secretary's desk for the information of any Senator.

The PRESIDING OFFICER. Without objection, it is so ordered.

(The nominations ordered to lie on the Secretary's desk appeared in the CONGRESSIONAL RECORD of June 13, 16, and 20, 1983, at the end of Senate proceedings.)

By Mr. HATCH, from the Committee on Labor and Human Resources:

Ford Barney Ford, of California, to be Under Secretary of Labor; and

John J. O'Donnell, of the District of Columbia, to be an Assistant Secretary of Labor.

(The above nominations were reported from the Committee on Labor and Human Resources with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

By Mr. PERCY, from the Committee on Foreign Relations, without amendment:

Treaty Doc. 98-2. International Coffee Agreement signed by the United States on March 23, 1983 (Exec. Rept. No. 98-11).

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. PROXMIRE:

S. 1562. A bill to require a charge for meals furnished to certain high-level Government officers and employees in the executive branch and for meals furnished in Senate dining facilities; to the Committee on Governmental Affairs.

By Mr. STEVENS:

S. 1563. A bill to amend section 204 of the Federal Property and Administrative Services Act of 1949 to authorize the deposit of cash proceeds from the disposal of excess or surplus property into the general fund of the Treasury for use to retire the national debt; to the Committee on Governmental Affairs.

By Mr. DOLE (for himself, Mr. METZENBAUM, Mr. DURENBERGER, and Mr. GRASSLEY):

S. 1564. A bill to amend the Internal Revenue Code of 1954 to deny certain tax incentives for property used by governments and other tax-exempt entities; to the Committee on Finance.

By Mr. SPECTER:

S. 1565. A bill to provide for capital punishment for murders committed by prisoners serving a life sentence; to the Committee on the Judiciary.

By Mr. ROTH (for himself, Mr. COHEN, Mr. RUDMAN, Mr. NUNN, and Mr. LEVIN):

S. 1566. A bill to amend title 5, United States Code, to provide civil penalties for false claims and statements made to the United States, to certain recipients of property, services, or money from the United States, or to parties to contracts with the United States, and for other purposes; to the Committee on Governmental Affairs.

By Mr. HATCH:

S. 1567. A bill to permit disclosures from tax records of the addresses of individuals who have defaulted on health education loans; to the Committee on Finance.

By Mr. DODD:

S. 1568. A bill to authorize the Secretary of Commerce to provide insurance against losses caused by the imposition of export controls under section 5 or 6 of the Export Administration Act of 1979; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. PRESSLER:

S. 1569. A bill to authorize the Secretary of the Interior and other major Federal land managers to provide for the conservation and scientific study of vertebrate paleontological resources on public and Indian lands; to the Committee on Energy and Natural Resources.

By Mr. MITCHELL:

S. 1570. A bill to amend the Internal Revenue Code of 1954 to provide simplification in accounting rules related to inventory; to the Committee on Finance.

By Mr. PELL:

S. 1571. A bill to amend the National School Lunch Act, to provide for the serving of nutritionally superior lunches under such act; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. QUAYLE (for himself and Mr. LUGAR):

S. 1572. A bill to designate the Veterans' Administration Outpatient Clinic to be located in Crown Point, Ind., as the "Adam Benjamin Veterans' Administration Outpatient Clinic"; to the Committee on Veterans Affairs.

By Mr. DANFORTH (for himself and Mr. CHAFEE):

S. 1573. A bill to eliminate the retroactive application of certain provisions of Public Law 96-364; to the Committee on Finance.

By Mr. STENNIS:

S. 1574. A bill for the relief of Seyed Mohammad Hossein Paya; to the Committee on the Judiciary.

By Mr. SASSER (for himself, Mr. BYRD, Mr. DODD, Mr. METZENBAUM, Mr. STENNIS, Mr. RANDOLPH, and Mr. SPECTER):

S. 1575. A bill to improve the highway bridge replacement and rehabilitation program; to the Committee on Environment and Public Works.

By Mr. SASSER (for himself and Mr. PRYOR):

S. 1576. A bill to create a Federal, State, and local drug forfeiture fund; to the Committee on the Judiciary.

By Mr. CHILES:

S. 1577. A bill to amend the Agricultural, Adjustment Act, as amended and reenacted by the Agricultural Marketing Agreement Act of 1937, to subject imported tomatoes to the same pack of container restrictions as are applicable to domestic tomatoes; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. THURMOND (for himself, Mr. DECONCINI, Mr. DOMENICI, Mr. HATCH, Mr. HEFLIN, Mr. HELMS, Mr. LAXALT, Mr. PRYOR, and Mr. STEVENS):

S. 1578. A bill to clarify the application of the Federal antitrust laws to local governments; to the Committee on the Judiciary.

By Mr. ARMSTRONG:

S. 1579. A bill to amend the Internal Revenue Code of 1954 to provide that the standard mileage rate for use of a passenger automobile which may be used in computing the charitable contribution deduction shall be the same as the standard mileage rate which may be used in computing the business expense deduction; to the Committee on Finance.

By Mr. HEINZ:

S. 1580. A bill to provide awards to local educational agencies for individual school implementation of the recommendations of a national study on education, and for other purposes; to the Committee on Labor and Human Resources.

By Mr. DOLE (for himself, Mrs. KASSEBAUM, Mr. JOHNSTON, Mr. LONG, Mr. ZORINSKY, Mr. NICKLES, and Mr. BOREN):

S. 1581. A bill granting the consent of Congress to the Central Interstate Low-Level Radioactive Waste Compact; to the Committee on the Judiciary.

By Mr. GORTON (for himself, Mr. METZENBAUM, Mr. PERCY, Mr. MOYNIHAN, Mr. KASTEN, Mr. DOMENICI, Mr. BOSCHWITZ, and Mr. PROXMIRE):

S. 1582. A bill to amend the Congressional Budget Act of 1974 to establish procedures for setting targets and ceilings in the congressional budget process for direct loan authority and loan guarantee authority, and for other purposes; to the Committee on the Budget and the Committee on Governmental Affairs, jointly, pursuant to the order of August 4, 1977, with instructions that if one committee reports, the other have 30 days of continuous session to report or be discharged.

By Mr. PERCY.

S. 1583. A bill to extend for the 6-year period beginning on October 30, 1983, the duty on canned corned beef; to the Committee on Finance.

By Mr. DANFORTH:

S. 1584. A bill to amend the Internal Revenue Code of 1954 to conform the treatment of overall domestic losses with the treatment of overall foreign losses and to conform the foreign tax credit carryover and ordering rules with similar investment credit rules; to the Committee on Finance.

Mr. DANFORTH (for himself and Mr. DOLE):

S. 1585. A bill to amend the Internal Revenue Code of 1954 to disallow the research and experimentation credit for contributions of certain scientific property used for research; to the Committee on Finance.

By Mr. INOUYE:

S. 1586. A bill for the relief of Mr. Johnny Guzon, Mrs. Juanita B. Guzon, Froilan B. Guzon, and Genivy B. Guzon; to the Committee on the Judiciary.

By Mr. HELMS:

S. 1587. A bill to amend the Internal Revenue Code of 1954 with respect to deductions for the payment of certain expenses by ministers who receive housing allowances; to the Committee on Finance.

By Mr. LEAHY (for himself, Mr. DECONCINI, Mr. KENNEDY, Mr. METZENBAUM, and Mr. BAUCUS):

S. 1588. A bill to eliminate the exemption for Congress from the application of certain provisions of Federal law relating to employment and privacy, and for other purposes; to the Committee on Governmental Affairs.

By Mr. LEVIN (for himself, Mr. DIXON, Mr. METZENBAUM, Mr. RIEGLE, Mr. GLENN, and Mr. GORTON):

S. 1589. A bill to amend the Federal-State Extended Unemployment Compensation Act of 1970 and the Federal Supplemental Compensation Act of 1982 to provide alternative State triggers; to the Committee on Finance.

By Mr. WALLOP (for himself and Mr. SIMPSON):

S. 1590. A bill to clarify the contractual authority of the Secretary of the Interior to deliver water to the North Platte Irrigation District project; to the Committee on Energy and Natural Resources.

By Mr. MOYNIHAN:

S. 1591. A bill to establish a Commission on an Alternative to the Legislative Veto; to the Committee on Governmental Affairs.

By Mr. DOLE (for himself, Mr. DURENBERGER, Mr. DOMENICI, Mr. JEPSEN, Mr. PRYOR, Mr. HEINZ, and Mr. MOYNIHAN):

S. 1592. A bill to amend title XVIII of the Social Security Act to correct provisions relating to the cap for hospice care; to the Committee on Finance.

By DURENBERGER (for himself and Mr. RIEGLE):

S. 1593. A bill to amend the Internal Revenue Code of 1954 to facilitate industrial revitalization and employment by improving the efficiency of the investment tax credit; to the Committee on Finance.

S. 1594. A bill to expand the incentives of the investment tax credit, and for other purposes; to the Committee on Finance.

By Mr. TSONGAS:

S.J. Res. 125. Joint resolution designating the first week of October as "National Remanufacturing Week"; to the Committee on the Judiciary.

By Mr. DIXON (for himself, Mr. HUDDLESTON, Mr. LUGAR, Mr. JEPSEN, Mr. LEAHY, Mr. ZORINSKY, Mr. PRYOR, Mr. HELMS, Mr. DOLE, Mr. COCHRAN, Mr. PERCY, Mr. BOSCHWITZ, Mr. HOLLINGS, Mr. MOYNIHAN, Mr. GRASSLEY, Mr. QUAYLE, Mr. EAGLETON, Mr. BOREN, Mr. CRANSTON, Mr. HEINZ, Mr. RANDOLPH, Mr. STENNIS, Mr. FORD, Mr. HEFLIN, Mr. BAUCUS, Mr. EXON, Mr. RIEGLE, and Mr. BUMPERS):

S.J. Res. 126. Joint resolution to designate the week of July 17, 1983, through July 23, 1983, as "National Corn Week"; to the Committee on the Judiciary.

By Mr. WARNER (for himself, Mr. SASSER, Mr. PRESSLER, Mr. THURMOND, Mr. DOMENICI, Mr. CHAFEE, Mr. MCCLURE, Mr. HECHT, Mr. RANDOLPH, Mr. GOLDWATER, Mr. BUMPERS, Mr. BOSCHWITZ, Mr. DECONCINI, Mr. EAST, Mr. HATCH, Mrs. HAWKINS, Mr. D'AMATO, Mr. HELMS, Mr. CHILES, Mr. INOUYE, Mr. LONG, Mr. MITCHELL, Mr. PRYOR, Mr. TSONGAS, Mr. HEFLIN, Mr. NUNN, Mr. STAFFORD, Mr. WILSON, Mr. HOLLINGS, Mr. TRIBLE, Mr. MELCHER, Mr. HEINZ, Mr. DURENBERGER, Mr. BRADLEY, Mr. BENTSEN, Mr. MOYNIHAN, Mr. PROXMIRE, and Mr. HUDDLESTON):

S.J. Res. 127. Joint resolution designating the week of May 27, 1984 as "National Tourism Week"; to the Committee on the Judiciary.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. HELMS:

S. Res. 171. A resolution prohibiting the extension of waiver authority under section 402 of the Trade Act of 1974 with respect to Romania; to the Committee on Finance.

By Mr. DECONCINI:

S. Con. Res. 49. A concurrent resolution expressing the sense of the Congress that our tax system has become so complex, economically counterproductive, outmoded, and riddled with exceptions, that the time has come to stop applying piecemeal, short term remedies, such as modification of the fringe benefit provisions, and to adopt a new tax system based on equity, efficiency, and simplicity, that will broaden the income base while simultaneously effecting a reduction in tax rates; to the Committee on Finance.

By Mr. MOYNIHAN:

S. Con. Res. 50. A concurrent resolution declaring that U.S. contributions to the United Nations should be reduced by the U.S. proportionate share of the United Nations funds used for the International conference to be held in Vienna, Austria, on July 11 to 13, 1983; to the Committee on Foreign Relations.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. PROXMIRE:

S. 1562. A bill to require a charge for meals furnished to certain high-level Government officers and employees in the executive branch and for meals furnished in Senate dining rooms; facilities; to the Committee on Governmental Affairs.

NO FREE LUNCH ACT OF 1983

Mr. PROXMIRE. Mr. President, today I am introducing legislation which would require that Federal agencies and the U.S. Senate recover the costs of meals served in executive dining rooms. Let me first explain to my colleagues what this legislation will do and then why I believe it should be promptly passed.

Most Federal agencies here in the Washington area have executive dining rooms. Not just everyone can eat in these exclusive rooms. Admittance is limited, usually to those at the GS-15 level or higher. That limited access means that those fortunate enough to be admitted make good money—$50,000 to $60,000 a year or more. Those salaries are two to three times what the average American family makes.

Most of these dining rooms are not little cubbyhole affairs. Many seat over 50 and some nearly 100. As many as 20 employees—cooks and waiters—work in some of these dining rooms. Mr. President, they are not some conference room temporarily converted for the convenience of the agency head.

As a result of the scale of these dining rooms, they can be expensive to operate. In fiscal year 1981, the Pentagon spent about $450,000 each to operate dining rooms for the Secretary of Defense and the heads of the Army, Navy, and Air Force. Many civilian agencies spent between $50,000 and $100,000 to operate their dining rooms.

As might be expected, the prices charged for the meals did not come anywhere near covering the costs of providing those meals. In fiscal year 1981, it cost about $2,900,000 to operate these dining rooms while the revenues collected from those who ate there barely topped $500,000. The taxpayer paid the $2,400,000 difference. Thus we have the spectacle, Mr. President, of those earning two to three times the average taxpayer's wages using the coercive power of the Internal Revenue Code to force that same taxpayer to pay for their meals. That is just plain wrong.

My legislation would remedy this situation. It requires that those who eat in these dining rooms pay their cost of operation. Nothing more, nothing less.

Mr. President, this legislation establishes the same incentives for the Federal Government that any private businessman must face. If the dining room managers watch their costs, they can serve a meal at about the same price a private restaurant charges. If costs are allowed to balloon, then the prices charged will have to be increased. Nothing could be more fair.

I would apply the same rule to Senate cafeterias and dining rooms. Last year, it cost about $5 million to operate these dining rooms and all but $35,000 of that sum was paid by the patrons. Current policy is to break even on these restaurants and my bill would make this policy law.

The Senate should promptly consider this legislation. The Nation is facing unprecedented deficits. In an effort to control these deficits, we have slowed the rate of growth of many social programs, including food stamps. In addition, the administration strongly supports the concept of user fees. This legislation is a perfect vehicle to put that concept into practice.

Mr. President, in our efforts to control the deficit, we should be fair. Everyone should make a sacrifice, not just the poor. That "everyone" should include powerful Government officials, who are now eating in dining rooms heavily subsidized by the taxpayer.

I ask unanimous consent that the text of my bill be printed in the RECORD at the conclusion of my remarks.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1562

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "No Free Lunch Act of 1983".

SEC. 2. For the purposes of this Act, "executive dining room" means any dining room which is located in an office building used by any agency in the Executive branch and where breakfast, lunch, or dinner is available only to an officer or employee of the Government serving in a position in the Executive branch in grade GS-15 or above, Executive Level V or above, or colonel or above, or their guests or was available only to such officers or employees or their guests before the date of enactment of this Act.

SEC. 3. Each person receiving a meal in an executive dining room or a Senate dining facility shall be charged for such meal a price in an amount which is not less than an amount sufficient to defray the cost of providing such meal considering the cost of the food, labor, and utilities, and the depreciation of equipment used in providing such meal.

SEC. 4. Sums collected pursuant to section 3 shall be deposited in the Treasury of the United States as miscellaneous receipts.

By Mr. STEVENS:

S. 1563. A bill to amend section 204 of the Federal Property and Administrative Services Act of 1949 to authorize the deposit of cash proceeds from the disposal of excess or surplus property into the general fund of the Treasury for use to retire the national debt; to the Committee on Governmental Affairs.

NATIONAL DEBT RETIREMENT ACT OF 1983

Mr. STEVENS. Mr. President, today I am introducing a bill designed to begin the process of reducing the size of the national debt.

Every year we face the difficult task of balancing the budget. Only once in the last 20 years have we been successful. The current national debt is the result of decades of a "buy now, pay later" approach to financing of government programs. It is a debt that many Members of Congress and past administrations, both Republican and Democratic, supported in attempts to improve our society. But the deficits we produce each year do not go away. They continue to accumulate, increasing the size of our national debt.

In 1981, the public debt passed the 1 trillion mark for the first time. By May of this year that figure had reached almost $1.3 trillion. It is difficult to grasp what these huge numbers represent. Broken down into per capita terms, the debt in 1972 equaled just over $2,000 per person in the United States. In May of this year, the debt per person was well over $5,000.

Even more revealing is the cost of financing this debt. From 1954 to 1981 the Federal debt held by the public increased by almost four times. During this same time, the interest paid on the debt increased by 15 times. In 1982, the accrued interest cost on the debt was over $117 billion. By April of this year, we were adding another $1 million to that figure every 5 minutes. These are funds which do not go for

social programs, defense, or other worthwhile projects. We are merely paying the price for debt incurred to finance Government programs in the past.

Financing the national debt also has a severe impact on the private sector. Government borrowing reduces the available supply of credit, causing interest rates to climb. During the 1960's, the Government took 16.7 percent of the credit market. In 1982 Government borrowing used almost 60 percent of all private capital available.

These trends must be reversed. The unprecedented growth of the national debt is one of the greatest threats to our Nation's economic recovery.

Our bill provides for the use of proceeds from the sale of surplus Federal real property to help retire the public debt. Currently these proceeds go into the Land and Water Conservation Fund. Let me emphasize that our bill will not affect the required annual income level of the fund. Revenues from Outer Continental Shelf oil lands will continue to be deposited in the fund, insuring its integrity.

Our bill by itself will not solve this major problem facing Congress. From fiscal year 1983 to fiscal year 1985 the Property Review Board estimates that just over $2 billion will be generated from the sale of surplus property to help retire a $1.3 trillion debt. Obviously, additional measures are required. But this is a step in the right direction, and an important start in gaining control over a rapidly increasing national debt.

I strongly believe we can no longer delay taking firm action in addressing this issue. I hope you will join me in supporting this bill.

Mr. President, I ask unanimous consent that the materials and tables supplied to me by the Department of the Treasury, as well as the bill itself, be printed in the RECORD immediately following my remarks.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1563

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "National Debt Retirement Act of 1983".

SEC. 2. (a) Subsection (a) of section 204(a) of the Federal Property and Administrative Services Act of 1949 (40 U.S.C. 485(a)) is amended to read as follows:

"(a) Notwithstanding any other provision of law, all cash proceeds from any transfer of excess property under this title to a Federal agency for its use, and all cash proceeds from any sale, lease, or other disposition of surplus property under this title, shall be deposited in the general fund of the Treasury and shall be used solely for retirement of the national debt of the United States, except as provided in subsections (b), (c), (d), and (e) of this section.".

(b) The last sentence of subsection (b) of such section is amended—

(1) by striking out "miscellaneous receipts" the first place it appears and inserting in lieu thereof "the general fund of the Treasury and used solely for the retirement of the national debt of the United States"; and

(2) by striking out "miscellaneous receipts" in the proviso and inserting in lieu thereof "the general fund of the Treasury".

(c) Subsection (c) of such section is amended by striking out "miscellaneous receipts" in the proviso and inserting in lieu thereof "the general fund of the Treasury and used solely for the retirement of the national debt of the United States".

PUBLIC DEBT AND INTEREST PER CAPITA

Fiscal year	Per capita— Public debt outstanding	Per capita— Accrued interest cost
1972	$2,041.91	$104.61
1973	2,173.60	114.86
1974	2,238.07	138.36
1975	2,496.90	152.96
1976	2,950.15	172.27

1982	223,271.67
April 1983	233,954.97

By Mr. DOLE (for himself, Mr. METZENBAUM, Mr. DURENBERGER, and Mr. GRASSLEY):

S. 1564. A bill to amend the Internal Revenue Code of 1954 to deny certain tax incentives for property used by governments and other tax-exempt entities; to the Committee on Finance.

GOVERNMENTAL LEASE FINANCING REFORM ACT OF 1983

● Mr. DOLE. Mr. President, I am today introducing with Senator METZENBAUM and Senator DURENBERGER the Governmental Lease Financing Reform Act of 1983. This bill will provide a comprehensive, fair system for treating leases by State and local governmental units, foreign tax-exempt entities, tax-exempt organizations, and the Federal Government. This bill will prevent the enormous end run on the Federal Treasury that has been attempted through the use of long-term tax-exempt lease financing.

LEASING HORROR STORIES

The press has been filled with examples of such transactions. I need only to highlight the most celebrated cases to make my point. The Navy has sought to lease support ships. Bennington College has sought to lease its entire campus. Columbus, Ohio, has sought to lease its entire electric powerplant. Mr. President, these are only the tip of the iceberg. The Treasury Department has estimated that we may lose billions of dollars annually if this loophole is not closed.

HOW DO THESE DEALS WORK?

Although many of my colleagues are undoubtedly suspicious that something has gone awry when they see tax-exempt entities selling off large proportions—if not all—all of their assets and leasing them back. But it may be helpful to explain simply how these deals work so that the threat to the Treasury Department and the Federal, State, and local budget processes will be fully understood.

First, all of the lessees—the users of the property—are tax exempt. Some are charitable organizations, some are foreign persons exempt from U.S. tax, some are State, local, and Federal governmental entities. Thus, the lessees are already paying no taxes—they are the preferred entities of our tax system, and properly so in this Senator's judgment.

What leasing permits these nontaxpayers to do is to trade on their tax exemption. Such entities are unable to use tax credits and accelerated depreciation—ACRS—which are designed to reduce the cost of capital for taxpayers. A lease permits the nontaxable entities to sell such tax preferences. As a result, such tax-exempt entities are able to obtain a negative tax rate through leasing.

Additionally, the use of leasing permits tax-exempt entities to reap substantial arbitrage profits when the capital disinvested from the property sold and leased back can be reinvested in high taxable yields. The result is an arbitrage opportunity that has been categorically prohibited in the case of more orthodox borrowing through the issuance of municipal bonds.

SUBVERTING THE BUDGET PROCESS

The combination of these two aspects of tax-exempt leasing explains only in part why this opportunity has become so attractive. Additionally, the use of long-term leasing permits State and local governments to avoid many of the ordinary limits on borrowing

(like voter approval). Thus, the something-for-nothing game of tax-exempt leasing subverts efforts by all governmental entities to maintain budget discipline.

THE IMPACT ON FEDERAL RECEIPTS

The impact on Federal receipts of tax-exempt leasing is substantial. That is because such transactions create deductions and rehabilitation credits where they did not exist before. It is this creation of deductions and credits that reduces Federal receipts.

WHAT THE BILL WOULD DO

Mr. President, the Governmental Lease Financing Reform Act of 1983 would address these abuses by eliminating the tax credits and accelerated depreciation for property subject to tax-exempt leases. By eliminating the availability of such tax benefits, the tax motivation for such transactions, leasing by tax-exempt will no longer be tax motivated. The tax law will again be neutral on the decison by tax exempts to lease or to buy. Tax exempt entities would continue tax exempt, but the ability to obtain a negative tax rate will be foreclosed.

CHANGES FROM H.R. 3110

This bill follows the leadership of Congressman PICKLE who introduced a similar measure, H.R. 3110. There are, however, substantial differences. I would like to highlight some of these differences.

HIGH TECHNOLOGY PROPERTY

Under the House bill, computers and other high technology short-lived property would be subjected to straight line depreciation over 12 years. That depreciation is substantially less than economic depreciation. As a result, it will be virtually impossible for colleges and universities to lease computers, even where a lease makes sense. The inability to obtain economic leases may have a devastating effect on our high-technology industries as well as our educational institutions.

This bill will provide a fair rule for high technology assets, and other short-lived property. Under that rule, if the property has a class life under the ADR system of 6 years or less and is leased for a term not in excess of 75 percent of that life, the property would be exempt from the general rules of this bill. That is because, without the credit, our preliminary analysis shows that ACRS provides no greater benefit than economic depreciation. Indeed, ACRS depreciation is slower than that allowed under prior law. Thus, there is no deferral benefit for tax-exempt users of such property to sell. Of course, if our preliminary analysis turns out to be incorrect and there is potential for abuse, I will support a modification of this rule.

REAL PROPERTY LEASES

Some of the most celebrated abuses involve leases of real property. The House bill seeks to stop those deals by requiring straight line depreciation of real estate over a term of 35 years. Unfortunately, the House bill is insufficient to prevent deals like that negotiated by Bennington College. To stop those deals, straight line depreciation over the greater of 40 years or 125 percent of the lease term is provided. Our bill so provides, thus finally accomplishing what the House bill intended to do. Additionally, because these benefits are available in any case in which there is a long-term lease of real property, the bill would apply regardless of whether the property was new or used. the bill would delete, however, the vague notion of the House bill that coverage should turn on a determination of which party has an economic interest in the property.

GENERAL RULE FOR PERSONAL PROPERTY

The House bill provides an artificial schedule of slow depreciation for leased personal property. As I noted, that schedule is too slow for short-lived personal property. It is also too long for certain long-lived property. The Senate bill would require straight-line depreciation over the ADR class life of property or 125 percent of the lease term, whichever is greater. This rule will prevent the unintended consequences of the House bill.

TREATMENT OF THE REHABILITATION TAX CREDIT

In what was apparently a drafting error, the House denied the rehabilitation tax credit to all property financed with industrial development bonds, regardless of whether there was a tax-exempt user. This error is corrected in the Senate bill and the rehabilitation tax credit is denied in any case in which there is a tax-exempt user. Thus, the double dip and arbitrage potential with the rehabilitation tax credit is prohibited under the general rule.

Second, there may be unintended impacts. For example, the bill as drafted may adversely impact taxable Government entities and certain foreign licensing of movies produced in the United States. Additionally, this bill may have an unintended impact on leases of personal property to the Federal Government for which an express appropriation has been made prior to May 23, 1983, and for which no tax indemnity has been provided. This Senator will seek to correct that unintended impact when this bill is considered by the Finance Committee. I understand that the Senator from Ohio has no objection to such an amendment.

EFFECTIVE DATE

Like the House bill, the Senate bill would apply generally to property placed in service after May 23, except to the extent covered by a binding contract on that date. The special rule for nonsafe harbor leases of mass transit property of the House bill is not included—it is far too early to be crafting special interest relief rules. However, we will monitor this area closely to insure that we do not have any unintended effects under this bill on legitimate transactions.

OUTSTANDING QUESTIONS

Despite our introduction of this bill today there remain a number of questions which we must explore when hearings are held next month. First, we need to assess whether the rules in this bill are adequate to prevent abuses in the leasing of short-lived property, while preventing unintended disruption of equipment markets. For example, we need to insure that leases of hospital diagnostic equipment are treated properly.

Third, there is some concern that the rules of this bill for real property and the rehabilitation tax credit may go beyond merely preventing the abuses we have targeted. If that is correct, then modifications may be appropriate.

Finally, I have noted previously that we must give careful attention to appropriate effect dates and transition rules and appropriate rules governing the treatment of foreign tax exempt entities.

I look forward to the further consideration of these important issues.

Mr. President, I ask unanimous consent that a more detailed, technical explanation of the bill be included in the RECORD following this statement.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

TECHNICAL EXPLANATION OF THE GOVERNMENTAL LEASE FINANCING REFORM ACT OF 1983

Scope.—Property leased for substantial periods by tax-exempt entities would be subject to slower depreciation and denial of the investment tax credit. Tax exempt entities would be defined broadly as State, local and Federal governmental units, expressly tax-exempt organizations and effectively tax exempt foreign persons. Substantial periods would generally be defined by reference to the class life of the leased property. Foreign persons treated as tax exempts include foreign persons with respect to assets for which less than 20 percent of the income is subject to U.S. tax. Real property leases (i) in excess of 10 years; (ii) financed by IDBs; (iii) with a fixed price purchase option; or (iv) under a sale-leaseback or lease-leaseback are also covered.

Short-lived property.—Because there is no possibility of significant tax benefit transfers through short-term leases of short-lived property a special exemption for short-lived property leased for a term of 75 percent or less of its life (including extensions or renewals) would be provided. Short-lived property is defined as property with a class life of 6 years or less.

Short-term leases; Limited leases.—Personal property leased for less than the greater of 1 year or 30 percent of the class life (but not in excess of 3 years) and real property leased for not more than 3 years (1 year in the case of property eligible for the rehabilitation tax credit) would be exempt from the rules. Similarly, a lease of 50 percent or less of real property would also be exempt.

Effect.—If the bill applies to property, the investment tax credit would be denied (including the rehabilitation tax credit) and depreciation deductions are allowed on a straightline basis over the class life of property) or 125 percent of the lease term, whichever is greater. In the absence of a class life, personal property would be depreciated over 12 years on a straightline basis.

Distinction between leases and service contracts.—The definition in case law of service contracts would be narrowed by an express definition to deny the investment tax credit to property which is in substance leased by a tax-exempt entity.

Use of IDBs.—In the absence of tax-exempt use, use of IDBs would not trigger the limitations of the bill.

Effective date.—The bill would generally be effective for property placed in service after May 23, 1983, subject to a narrow binding contract rule like that of H.R. 3110.●

● Mr. METZENBAUM. Mr. President, I am pleased to join Senators DOLE and DURENBERGER today in introducing legislation that will bring to an end a costly and highly efficient tax avoidance practice known as sale and leasebacks by Government and tax-exempt entities. Through this practice, tax-exempt entities like cities and universities have, in effect, gone into the business of selling lucrative tax shelters to private investors.

How does this scheme work? Because a city, for example, does not pay Federal income taxes it is unable to take advantage of the investment tax credit and depreciation deductions associated with its property. But a city can sell the building to a taxpayer, who can take advantage of the lucrative tax benefits, and then lease the building back to the municipal government.

We have witnessed in recent months an explosion in the use of sale and leaseback transactions by Government and nonprofit entities. With the encouragement of accounting firms, tax lawyers, and trade associations, new deals have been closing almost daily.

Bennington College wants to sell its entire campus and lease it back.

The city of St. Louis wants to sell its city hall.

Baltimore has already sold its incinerator and firehouse.

Oakland no longer owns its museum or coliseum.

Who benefits?

The seller benefits because the sale price that it receives is far greater than the amount it must pay to lease back the building in question.

The taxpayer-investor benefits from substantial tax writeoffs purchased at bargain basement prices.

But, unfortunately, all of these gains come at the direct expense of the Federal Government and of every American who pays taxes to support that Government.

Mr. President, I believe that we must do more to assist our ailing cities and States. We must do more for education at every level. We should continue and strengthen our commitment to transportation, housing programs and other worthwhile and legitimate Federal efforts to meet the needs of our State and local governments.

But, I do not believe that we should be doing indirectly—through the tax code—the things which we are unwilling to do directly through the congressional authorizations and appropriations process.

The sale and leaseback scheme is a tax gimmick, most of whose benefits go to the tax shelter investor. Only a small part of the revenues lost to the Federal Treasury goes to the cities, the colleges, and the tax-exempt organizations. If it is our intention to assist these organizations and units of government, then it makes no sense whatever to do so in a way that allows tax shelter investors to skim most of the money off the top.

Our bill reduces the benefits of depreciation for property that is leased by nontaxable entities. It tightens the Internal Revenue Code provisions which deny the investment tax credit for property used by tax-exempt entities. It also extends that denial to foreign governments.

Mr. President, I am convinced that this legislation is necessary in order to stop what has become a uncontrolled hemorrhage of Federal revenue.

But I know that some people are unhappy about the legislation we are introducing today.

We are already feeling the pressure from the lawyers who stand to lose some legal fees.

We are hearing from the real estate developers.

We are hearing from the cities, States, and colleges. And we are even hearing from the foreign governments and foreign companies which are using the tax gimmick to subsidize their activities at the expense of the taxpayers of the United States.

On May 24, Senator DOLE and I had a colloquy on the Senate floor during which we announced our plans to introduce this bill. We also indicated that the bill would prohibit sale and leaseback transactions for property placed in service after May 23. The bill establishes that effective date.

Since May 24, the tax attorneys and financial consultants have been on notice that these tax scams would no longer be permitted. They were told that a transition rule would protect those who relied on existing law from any unfair financial hardship. That protection is included in the bill. It excludes projects subject to a binding contract as of May 23.

I believe that this effective date provision is fair. And I hope that we will be able to prevent exceptions from this rule from eating away at the thrust of the bill.

If we are truly serious about tax reform;

If we are truly serious about tax equity and fairness;

If we are truly serious about controlling the Federal budget;

Then we must begin to review the massive subsidies that we hand out year after year through the Internal Revenue Code. The sale and leaseback scheme is one of those subsidies that cannot be justified.

I look forward to working with Senator DOLE and others to move forward as expeditiously as possible with this important legislation.

Mr. President, I understand that the Senator from Kansas has a concern dealing with a Federal leasing arrangement that has been approved by the appropriate appropriations and authorization committees. It is my further understanding that the lease in question will not contain a so-called indemnity clause which was the subject of an amendment I offered on the floor earlier this month. And I might add that I appreciated the support of the Senator from Kansas on that amendment. I can assure the Senator that I will not object to his efforts to address the issue of this Federal lease as this legislation advances.●

● Mr. DURENBERGER. Mr. President, I am pleased to join my colleague, the chairman of the Finance Committee, Mr. DOLE, in introducing legislation to eliminate the sale-leaseback of property by tax-exempt entities.

My colleagues know that as chairman of the Intergovernmental Relations Subcommittee of the Governmental Affairs Committee I am most concerned about the problems of State and local governments and the effect the Federal laws have on these entities both directly and indirectly. I have also been deeply involved with the issues affecting other tax-exempt entities such as the nonprofits that serve so admirably in delivering services that governments would otherwise be called upon to do.

My colleagues also know of my strong interest in making the benefits of leasing available to all industries. My actions during debate on the Tax Equity and Fiscal Responsibility Act last year certainly demonstrate that commitment.

But use of leasing by tax-exempt entities is a horse of a different color, as the old saying goes. I am not criticizing the tax-exempt entities for utilizing leasing. They saw an attractive horse that could help them with their severe financial difficulties and took the opportunity to ride it aggressively.

This is one loophole we should waste no time in closing. The availability of leasing is important to achieve a level playing field among taxable entities. Without leasing, corporations who have no tax liability for a period of years are at a competitive disadvan-

tage to companies who can utilize the investment tax credit and ACRS in making the investments so necessary to greater productivity.

The benefits of the ITC and ACRS were never intended to flow to tax-exempt entities. The effect of these sale-leaseback arrangements is to confer benefit on the tax-exempt entity. But they confer even more benefit on high-income taxpayers who use it to shelter income. Unless we close this loophole, the Federal Treasury will be the real loser.

This bill is not the final answer to the issue. The transition rules need modification. The provisions on short-lived assets are an improvement over the House bill but still need review. Coverage of production credit associations should also be examined. And I am sure other issues will arise during the legislative process that we will address. This bill is an important first step, though, and I am pleased to join my colleagues in offering it.●

By Mr. SPECTER:

S. 1565. A bill to provide for capital punishment for murders committed by prisoners serving a life sentence; to the Committee on the Judiciary.

CAPITAL PUNISHMENT LEGISLATION

Mr. SPECTER. Mr. President, I am today introducing a bill designed to protect all persons associated with our Federal prison system from violent death at the hands of prisoners serving life sentences for other crimes. The bill allows the death penalty for the murder of any person such as a prison official, a prison guard, a visitor, a lawyer, a reporter, or a fellow inmate. Those violent and hardened prisoners already serving life sentences far too often feel they have "nothing to lose" in killing someone in the prison, and this legislation is sorely needed to deter that conduct.

The level of violence in our prisons today is truly appalling. According to the Federal Bureau of Prisons, 136 inmates have been killed by other prisoners in the Federal prison system alone in the past 10 years. Seven Federal prison guards have been murdered in the same time period. Equally disturbing are the nearly 2,000 violent assaults on Federal correctional employees and over 3,500 assaults by inmates on other inmates during this time.

Unfortunately, the Federal prison system is only the tip of the iceberg. Nationwide 165 inmates were brutally murdered by other State prisoners in 1981 and 1982, according to the National Institute of Corrections. Seven correctional officers were killed in State prisons in 1981. Mr. President, this frightening level of barbarism and brutality must be stopped.

This legislation will apply to those prisoners already beyond redemption or rehabilitation—those already sentenced to life imprisonment for their prior heinous crimes. There is currently no provision in the Criminal Code that effectively deters these prisoners from striking again while in prison.

This bill does just that, allowing the jury or court to consider numerous relevant factors in determining whether to impose the death penalty, including whether the murder occurred during an escape attempt, a kidnaping, a prison riot, the taking of hostages, or a sexual assault, or as a result of drug dealing, or by use of a firearm.

Without a more severe punishment for such a murder than merely life imprisonment, assaults and killings will undoubtedly increase along with our growing prison population. Our Nation's correctional officers and our prisoners have the right to be protected from the violence of the most dangerous inmates. No prisoner ever should be able to feel immune from further punishment for his violent acts. We, as lawmakers, must act now to remedy this unjust and tragic situation. I, therefore, urge my colleagues to pass this important legislation.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows;

S. 1565

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That chapter 51 of title 18 of the United States Code is amended by adding the following new section after section 1117:

"SEC. . MURDER BY FEDERAL PRISONERS.—

(a) Whoever, while confined in a federal correctional institution under sentence for a term of life imprisonment, murders another shall be punished by death or by life imprisonment without the possibility of parole.

(b) For purposes of this section—

(1) 'federal correctional institution' means any federal prison, federal correctional facility, federal community program center, or federal halfway house;

(2) 'term of life imprisonment' means a sentence for the term of natural life, a sentence commuted to natural life, an indeterminate term of a minimum of at least fifteen years and a maximum of life, or an unexecuted sentence of death;

(3) 'murders' means committing first degree murder or second degree murder as defined by section 1111 of this title.

(c) A person shall be subjected to the penalty of death under this section only if a hearing is held in accordance with this section.

(d) NOTICE BY THE GOVERNMENT.—Whenever the Government intends to seek the death penalty under this section, the attorney for the Government, a reasonable time before trial or acceptance by the court of a plea of guilty, shall sign and file with the court, and serve upon the defendant, a notice (1) that the Government in the event of conviction will seek the sentence of death, and (2) setting forth the aggravating factor or factors which the Government will seek to prove as the basis for the death penalty. The court may permit the attorney for the government to amend this notice for good cause shown.

(e) HEARING BEFORE COURT OR JURY.—When the attorney for the Government has filed a notice as required under subsection (d) and the defendant is found guilty of or pleads guilty to an offense under this section, the judge who presided at the trial or before whom the guilty plea was entered, or any other judge if the judge who presided at the trial or before whom the guilty plea was entered is unavailable, shall conduct a separate sentencing hearing to determine the punishment to be imposed. The hearing shall be conducted—

"(1) before the jury which determined the defendant's guilt;

"(2) before a jury impaneled for the purpose of the hearing if—

"(A) the defendant was convicted upon a plea of guilty;

"(B) the defendant was convicted after a trial before the court sitting without a jury;

"(C) the jury which determined the defendant's guilt has been discharged for good cause; or

"(D) after initial imposition of a sentence under this section, redetermination of the sentence under this section is necessary; or

"(3) before the court alone, upon the motion of the defendant and with the approval of the Government.

A jury impaneled pursuant to paragraph (2) of this subsection shall consist of twelve members, unless, at any time before the conclusion of the hearing, the parties stipulate with the approval of the court that it shall consist of any number less than twelve.

(f) PROOF OF AGGRAVATING AND MITIGATING FACTORS.—Nowithstanding Rule 32(c) of the Federal Rules of Criminal Procedure, when a defendant is found guilty of or pleads guilty to an offense under this section, no presentence report shall be prepared. In the sentencing hearing, information may be presented as to any matter relevant to the sectence and shall include matters relating to any of the aggravating or mitigating factors set forth in subsections (i) and (j) or any other mitigating factor. Where information is presented relating to any of the aggravating factors set forth in subsection (j), information may be presented relating to any other aggravating factor.

Information presented may include the trial transcript and exhibits if the hearing is held before a jury or judge not present during the trial. Any other information relevant to such mitigating or aggravating factors may be presented by either the Government or the defendant, regardless of its admissibility under the rules governing admission of evidence at criminal trials, except that information may be excluded if its probative value is substantially outweighed by the danger of unfair prejudice, confusion of the issues, or misleading the jury. The Government and the defendant shall be permitted to rebut any information received at the hearing and shall be given fair opportunity to present argument as the adequacy of the information to establish the existence of any of the aggravating or mitigating factors, and as to appropriateness in that case of imposing a sentence of death. The Government shall open the argument. The defendant shall be permitted to reply. The Government shall then be permitted to reply in rebuttal. The burden of establising the existence of any aggravating factor is on the Government, and is not satisfied unless established beyond a reasonable doubt. The

burden of establishing the existence of any mitigating factor is on the defendant, and is not satisfied unless established by a preponderance of the information.

(g) RETURN OF FINDINGS.—The jury, or if there is no jury, the court, shall consider all the information received during the hearing. It shall return special findings identifying any mitigating factors, and any aggravating factors set forth in subsection (j) found to exist.

(h) IMPOSITION OF SENTENCE.—Upon a finding that a sentence of death is justified, the court shall sentence the defendant to death. Otherwise the court shall impose a sentence, other than death, authorized by law.

(i) MITIGATING FACTORS.—In determining whether a sentence of death is to be imposed on a defendant, the following mitigating factors shall be considered but are not exclusive:

"(1) the defendant was less than eighteen years of age at the time of the crime;

"(2) the defendant's capacity to appreciate the wrongfulness of his conduct or to conform his conduct to the requirements of law was significantly impaired, but not so impaired as to constitute a defense to the charge;

"(3) the defendant was under unusual and substantial duress, although not such duress as constitutes a defense to the charge;

"(4) the defendant is punishable as a principal (as defined in section 2(a) of this title) in the offense, which was committed by another, but his participation was relatively minor, although not so minor as to constitute a defense to the charge;

"(5) the defendant could not reasonably have foreseen that his conduct in the course of the commission of murder, or other offense resulting in death for which he was convicted, would cause, or would create a grave risk of causing, death to any person.

(j) AGGRAVATING FACTORS.—The following aggravating factors shall be considered but are not exclusive:

(1) the defendant committed the offense during the course of seizing, confining, inveigling, decoying, kidnaping, abducting, carrying away, holding hostage, or holding for ransom or otherwise any person;

(2) the death or injury resulting in death occurred during the commission or attempted commission of, or during the immediate flight from the commission or attempted commission of, an offense under section 751 (escape by prisoner in custody of institution or officer);

(3) the defendant committed the offense during the course of perpetrating or attempting to perpetrate a sexual assault on any person;

(4) the defendant committed the offense during the course of, on account of, or as a result of any transaction concerning or distribution of any controlled substance as defined by schedules I, II, III, IV, and V of section 812 of title 21;

(5) the defendant committed the offense while armed with, or having readily available, a firearm, as defined in section 921(a)(3) of this title;

(6) the defendant committed the offense during the course of inciting, organizing, promoting, encouraging, participating in, carrying out, or aiding or abetting any person in inciting, participating in or carrying on a riot as defined in section 2102 of this title;

(7) the defendant has been convicted of another Federal offense, or a State offense resulting in the death of a person, for which a sentence of life imprisonment or a sentence of death was authorized by statute;

(8) the defendant has previously been convicted of two or more State or Federal offenses punishable by a term of imprisonment of more than one year, committed on different occasions, involving the infliction of, or attempted infliction of, serious bodily injury upon another person;

(9) in the commission of the offense the defendant knowingly created a grave risk of death to one or more persons in addition to the victim of the offense;

(10) the defendant committed the offense in an especially heinous, cruel, or depraved manner;

(11) the defendant procured the commission of the offense by payment, or promise of payment, of anything of pecuniary value;

(12) the defendant committed the offense as consideration for the receipt, or in the expectation of the receipt, of anything of pecuniary value;

(13) the defendant committed the offense after substantial planning and premeditation to cause the death of a person.

(k) INSTRUCTION TO JURY ON RIGHT OF THE DEFENDANT TO JUSTICE WITHOUT DISCRIMINATION.—In any hearing held before a jury under this section, the court shall instruct the jury that in its consideration of whether the sentence of death is justified it shall not consider the race, color, national origin, creed, or sex of the defendant. The jury shall return to the court a certificate signed by each juror that consideration of race, color, national origin, creed, or sex of the defendant was not involved in reaching his or her individual decision.

(l) APPEAL FROM SENTENCE OF DEATH.—"In any case in which the sentence of death is imposed under this section the sentence of death shall be subject to review by the court of appeals upon appeal by the defendant. Notice of appeal must be filed within the time prescribed for appeal of judgment in section 2107 of title 28 of the United States Code. An appeal under this section may be consolidated with an appeal of the judgment of conviction. Such review shall have priority over all other cases.

"On review of the sentence, the court of appeals shall consider the record, the evidence submitted during the trial, the information submitted during the sentencing hearing, the procedures employed in the sentencing hearing, and the special findings returned under this section.

"The court shall affirm the sentence if it determines that: (1) the sentence of death was not imposed under the influence of passion, prejudice, or any other arbitrary factor, and (2) the information supports the special finding of the existence of any aggravating factor, or the failure to find any mitigating factors as set forth or allowed in this section. In all other cases the court shall remand the case for reconsideration under this section. The court of appeals shall state in writing the reasons for its disposition of the review of the sentence.".

(m) IMPLEMENTATION OF A SENTENCE OF DEATH.—"A person who has been sentenced to death pursuant to the provisions of this section shall be committed to the custody of the Attorney General until exhaustion of the procedures for appeal of the judgment of conviction and for review of the sentence. When the sentence is to be implemented, the Attorney General shall release the person sentenced to death to the custody of a United States marshal, who shall supervise implementation of the sentence in the manner prescribed by the law of the State in which the sentence is imposed. If the law of such State does not provide for implementation of a sentence of death, the court shall designate another State, the law of which does so provide, and the sentence shall be implemented in the latter State in the manner prescribed by such law. A sentence of death shall not be carried out upon a woman while she is pregnant.

(n) USE OF STATE FACILITIES.—"A United States marshal charged with supervising the implementation of a sentence of death may use appropriate State or local facilities for the purpose, may use the services of an appropriate State or local official or of a person such an official employs for the purpose, and shall pay the costs thereof in an amount approved by the Attorney General."

By Mr. ROTH (for himself, Mr. COHEN, Mr. RUDMAN, Mr. NUNN, and Mr. LEVIN):

S. 1566. A bill to amend title 5, United States Code, to provide civil penalties for false claims and statements made to the United States, to certain recipients of property, services, or money for the United States, or to parties to contracts with the United States, and for other purposes; to the Committee on Governmental Affairs.

PROGRAM FRAUD CIVIL PENALTIES ACT OF 1983

Mr. ROTH. Mr. President, I am introducing today, on behalf of myself and Senators COHEN, RUDMAN, NUNN, and LEVIN, a bill to create a mechanism whereby the Federal Government can more aggressively and effectively pursue fraud in Government programs.

Recently, the Permanent Subcommittee on Investigations concluded 2 days of hearings on false billing schemes by a major defense shipbuilding contractor. Seven months of intensive investigation uncovered mischarging, cross billing, and illegal cost shifting. This and other investigations have disclosed that, while Government and civilian auditors found many instances of fraud, no formal action was taken to recoup Government losses or to penalize the wrongdoers. Part of the reason for this inaction is the cumbersome legal process which is the only available avenue to correct these abuses. An unscrupulous contractor can take advantage of the current system, make millions in overcharges, and get away with a slap on the wrist. Proportionally, the few successful civil and criminal cases hardly present a deterrent.

An administrative civil penalty law will bring a swift, sure, and fair resolution to the current state of affairs. The presence of a third alternative will also act as a deterrent because it is a simple, straightforward, readily available mechanism to be used by the agency directly affected by the alleged fraud.

But the Program Fraud Civil Penalties Act is designed for use in any Government program where there is an identifiable loss or where the integrity of a program is put in jeopardy by false statements. And during 1981 the

General Accounting Office released a three-volume report entitled "Fraud in Government Programs—How Extensive Is It—How Can It Be Controlled." The report observed that during the period October 1976 to September 1979 the Government lost between $150 to $200 million as a result of fraud directly related to Government programs. Among its conclusions, the report recommended the enactment of an administrative penalty statute which would allow Federal agencies to impose appropriate monetary sanctions against persons, corporations, and other entities who engage in fraud upon the Government.

Among other things, GAO observed that current efforts to control fraud were primarily directed toward the filing of criminal and civil actions by the Department of Justice or by the imposition of relatively light administrative sanctions by the affected agencies. GAO concluded that for the reasons set forth below, these efforts were insufficient to address the magnitude of the problem and that a new statutory penalty must be enacted which would allow affected agencies to directly impose monetary penalties for fraud.

GAO estimated that during the reporting period, approximately 77,000 cases of fraud were detected. Of this number, only 12,900 cases were referred to the Department of Justice for criminal prosecution. The Department of Justice subsequently declined to prosecute 61 percent of these cases. Furthermore, GAO estimates that under new Department of Justice guidelines for white-collar-crime prosecutions, an even greater percentage of such cases will be declined.

Moreover, the Government rarely recovers an amount equal to the loss sustained. The GAO estimates that in approximately 1,500 criminal and civil cases, defendants were ordered to reimburse $14 million to the Federal Government. Administrative actions resulted in the proposed recovery of an additional $29 million. However, in many instances the Government achieved only a judgment against the individual and was not able to recover the full amount due.

Administrative civil penalties would give the Government an additional tool to serve as a deterrent against fraud and to recover Federal funds lost due to fraud. Ideally, this administrative mechanism would be used in appropriate circumstances when the Department of Justice declines to prosecute.

According to GAO estimates, 62 percent of all Department of Justice declination are based upon the following factors:

First, lack of prosecutive merit/jury appeal, 16 percent;

Second, small monetary loss to the Government, 14 percent;

Third, administrative action is more appropriate, 8 percent; and

Fourth, insufficient evidence for criminal prosecution, 24 percent.

It may be argued that the cases which comprise the majority of these declinations are clearly within the scope of a civil administrative proceeding.

Currently, administrative proceedings are primarily designed to deny an entity the right to continue to participate in a Federal program. As such, their effects are primarily prospective in nature, and are not designed to restore to the Government the funds lost as a result of the fraud.

The Program Fraud and Civil Penalties Act which I am introducing today is designed to create an administrative mechanism that will allow the affected agency to impose a monetary penalty for fraud. This penalty is cumulative with existing criminal, civil, and administrative penalties and is ideally suited to situations where the Department of Justice has declined to seek criminal action against a person who has committed fraud against a Federal program. The bill will also assist agencies in the collection of such penalties by allowing an offset of such penalties against any other outstanding Federal obligation owed to the liable party, including Federal tax refunds.

The bill contains eight sections which would amend title 5 of the United States Code by adding a new chapter 8 to create new administrative remedies for false claims and statements submitted to Federal agencies by persons seeking money, services, or property from the Federal Government. While current Federal law provides criminal penalties for false statements—for example, 18 U.S.C. 1001, 18 U.S.C. 494, 15 U.S.C. 645—and criminal and civil penalties for false claims—for example, 18 U.S.C. 287, 31 U.S.C. 321—the imposition of these sanctions requires the Department of Justice to initiate and conclude a criminal or civil suit in Federal court. Because the Department of Justice guidelines regarding the prosecution of Government fraud usually limits prosecution to instances where the Government has suffered a substantial and identifiable monetary loss, the Government is left without an adequate remedy for many false claims and statements, which do not result in a significant monetary loss to the Government, but which may have a detrimental impact upon the Federal program which received the claim or statement. This impact is best demonstrated by the following examples:

First, a large business falsely certifies its identity as being a small business for the receipt of a Federal small business set aside contract. The large business successfully underbids several bona fide small businesses and is awarded the contract. Later, after an administrative procedure relating to a challenge of the small business size status of the company, the large business is disqualified from the future receipt of such contracts. However, by such time the large business has fully and adequately performed the awarded contract. Under Federal law, the large business has filed false statements and false claims relating to the award and performance of the contract in question. However, the Government has received full value for the contract price. The primary loss to the Government is therefore in the undermining of the integrity of the small business set aside program, not in a monetary loss. The likelihood of prosecution in such instances is small.

Second, a contractor submits a falsely inflated claim to the Federal Government. In the course of an audit of the claim, the falsity of the majority of the claim is discovered and disallowed. The contractor is never paid for the false portion of the claim. In such a case, the contractor has submitted a false statement and a false claim to the Government. However, because the Government discovered the falsity of the claim prior to payment, the contractor's civil liability is limited to $2,000 under 31 U.S.C. 231, even if the false claim was for hundreds of thousands of dollars. Many more typical examples can be found in the GAO study.

This bill will allow the agencies who are the recipients of such false claims and statements to administratively adjudicate a civil penalty for such false claims and statements.

Such a penalty will give agencies a significant tool in policing the integrity of their programs. Furthermore, the deterrent effect of enhanced enforcement of civil penalties against fraudulent participants in Federal programs will assist the good faith participants in such programs. This legislation has been enthusiastically endorsed by Inspectors General and the GAO, while the administration has strongly endorsed the concept of administrative civil penalties.

Mr. President, I ask unanimous consent that a copy of the bill and a section-by-section analysis of the Program Fraud Civil Penalties Act of 1983 be printed at the end of my remarks.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

SECTION-BY-SECTION ANALYSIS OF THE PROGRAM FRAUD CIVIL PENALTIES ACT OF 1983

FINDINGS AND DECLARATIONS OF POLICY

By setting down its findings and declaring its purpose, Congress provides insight as to the remedial purpose of the statute, in aid to implementation. With the growth of fraud against the Federal government, it is clear that present remedies are inadequate to stem the flow of millions upon millions of dollars to those not entitled. Less money be-

comes available to the qualified and the deserving.

Given this predicate, federal agencies need an expeditious and administrative alternative to the courts in handling matters of false claims and declarations. In furtherance of this policy, all federal agencies victimized by such false claims and declarations are to have an administrative penalty mechanism compatible with existing procedures and in accordance with fundamental due process.

SECTION 801 DEFINITIONS

Section 801 sets out definitions of key terms used in the bill. The term "authority" is defined to encompass those agencies with substantial audit and investigative capability, specifically the 16 agencies and departments with statutory Inspectors General, together with Department of Defense, the Department of Treasury, the Department of Justice and the Postal Service.

The term "claim" is defined to include requests or demands for money, property or services, whether made directly to the government authority or a fiscal intermediary, including a state, political subdivision or other entity. Each individual voucher, claims form or other separate request or demand constitutes a separate claims for which a penalty could be imposed.

The term "statement" is defined to include all written representations and certifications of fact, whether made directly to the government authority or through a fiscal intermediary, including a state, political subdivision or other entity. Furthermore, no monetary loss need be sustained by the federal government as a result of the statement.

The bill creates the position of "investigating official" in order to enable those departments without a statutory Inspector General to conduct investigations of false claims and statements in a manner similar to an Inspector General investigation.

SECTION 802 LIABILITY FOR FALSE CLAIMS AND STATEMENTS

This section identifies false claims as those claims supported by false statements, or claims which seek payment for services not provided, or which were provided in violation of law or regulation. False statements are those which falsely misrepresent material facts or contain omissions which make a statement materially false.

This section establishes liability for claims and statements that are known by the presenter to be false. It provides for damages consisting of a civil penalty of not more than $10,000 for each false claim, plus an assessment of not more than double the amount of money or value of property or services including consequential damages, sustained by the United States as a result of such false claims and statements. Such damages also include the costs associated with the investigation. Such a penalty would be in addition to any criminal, civil or administrative penalty.

SECTION 803 DETERMINATION OF AUTHORITY HEAD AND SUBPOENA AUTHORITY

This section sets out the procedures to be followed by the government authority in imposing administrative sanctions and in issuing subpoenas in order to investigate false claims and statements.

An appropriate investigation is conducted by the investigating official. The results of the investigation are presented to a senior department or agency reviewing official. If this official determines that there is probable cause to conclude that a fraudulent claim or statement has been committed, the matter is referred to the authority head for an appropriate proceeding.

The respondent must be notified in writing of the anticipated administrative action and afforded an opportunity for a hearing on the record, at which time the person is entitled to be represented. The hearing would be governed by the Administrative Procedures Act. It is contemplated that, while cases will be developed by the Inspectors General and the investigating officials, the required hearing will be conducted and determinations reached by the principal officer of the agency or by an administrative law judge. Upon completion of the administrative determination imposing sanctions, which, except in unusual circumstances, must not be less than the amount of damages sustained by the United States, the person must be notified in writing of the findings and determination and of his/her right to judicial review under Section 904.

This section also expands the authority of the 16 Inspectors General to allow for the administration of oaths or affirmations and for the issuance of testimonial subpoenas in the investigation of such false claims and statements. This expansion of the subpoena authority is essential in order to enable the Inspectors General to develop adequate evidence of fraud for the administrative determinations which are authorized by the bill.

Similarly the section empowers the investigating official of the Department of Defense, the Department of Treasury, the Department of Justice and the Postal Service with the oath/affirmation administration and subpoena powers of the statutory Inspectors General.

This section also authorizes the Inspector General or the investigating official to seek the enforcement of any such subpoena in the United States district court.

SECTION 804 JUDICIAL REVIEW

This section provides that judicial review by a United States Court of Appeals may be obtained by filing within 60 days of notification of the administrative determination, a written petition urging that the administrative determination be modified or set aside. In reviewing the administrative determination, the findings of the government authority on questions of fact, if supported by substantial evidence on the record considered as a whole, are conclusive. Similarly the amount of penalties or assessments imposed is conclusive if within the statutory limits set out in Section 802. No new objection of evidence may be use before the appellate court that was not presented in the administrative proceeding, except in unusual circumstance, in which event the court may remand the case to the government authority for further proceedings. Further judicial review by the Supreme Court may be sought pursuant to 28 USC 1254.

SECTION 805 COLLECTION OF CIVIL PENALTIES AND ASSESSMENTS

This section states that unless judicial review is sought, the administrative sanction becomes final and may be enforced by a civil action in a United States District Court or asserted as a counterclaim or set off in any other civil action to which the United States and the person are parties. Penalties and assessments may be compromised or settled by the government authority except during the pendency of any appeal of an enforcement action, during which such authority vests in the Attorney General.

Where losses involve joint federal-state programs, funds recovered may be used to reimburse the state in the same ratio as the amount paid out by the state bears to the total payment of such claim, up to the amount actually paid out by the state. Except for this reimbursement to the states, funds recovered through administrative proceedings are to be deposited as miscellaneous receipts in the United States Treasury.

SECTION 806 LIMITATION

This section limits actions to those authorized by the Attorney General. If within 120 days of receipt of a request to initiate an administrative action, the Attorney General takes no action to restrict the initiation of administrative proceedings the authority may initiate the action as if the Attorney General has authorized it. This 120-day period is consistent with the existing time frame of Department of Justice review of such matters.

Any administrative action must be commenced within 6 years of the presentation of the false claim or statement and any civil enforcement action must be commenced within 3 years from the date of the sanction becomes final. If at any time during the administrative proceedings it appears, based on specific information that bribery, conflicts of interest, or other corruption involving any officer or employee of the government in connection with the claim or statement has occurred, such information must be reported to the Attorney General who, by written finding that continuation of the administrative proceeding may adversely affect any civil or criminal action related thereto, may stop the administrative proceeding. No proceeding shall be commenced if a claim exceeds $100,000.

SECTION 807 RIGHT TO SETOFF

This section authorizes setoff of civil penalties and assessments against any sum owing by the United States or a state to the person against who sanctions are imposed. Setoff authority may also be exercised with respect to any tax refunds due the person.

SECTION 808 REGULATIONS

This section requires the promulgation of regulations to implement the provisions of the bill, including regulations which must ensure that the role of the Inspectors General or investigating officials is limited to an investigative role.

Furthermore, the section also authorizes the Attorney General and the heads of the government authorities to enter into memoranda of understanding to provide for expeditious approval by the Attorney General of administrative proceedings.

SECTION 809 REPORTS

Investigating officials are to prepare annual reports summarizing their activities taken under this chapter. Such annual report shall be furnished to the agency authority head and to the appropriate committee of Congress in the same manner as the reports under section 5(b) of the Inspector General Act of 1978.

The new remedy provided by this bill would apply to any claim or statements submitted after Dencember 31, 1983.

S. 1566

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Program Fraud Civil Penalties Act of 1983".

SEC. 2. (a) (1) The Congress finds that—

(A) fraud in Government programs is a serious and growing problem;

(B) present civil and criminal remedies for program fraud are not sufficiently responsive to this problem;

(C) fraud in Government programs results in the loss of millions of dollars annually; and

(D) fraud in Government programs undermines the integrity of these programs by allowing ineligible persons to participate and receive Federal funds to which they are not entitled.

(2) The Congress further finds that it is desirable to create an expeditious and inexpensive administrative procedure which Federal agencies may use to impose an administrative penalty for false, fictitious, or fraudulent claims and statements.

(b) The purposes of this Act are—

(1) to allow Federal agencies which are the victims of false, fictitious, and fraudulent claims and statements to have an administrative remedy penalizing persons who submit such claims and statements;

(2) to provide an administrative penalty procedure which is comparable with administrative penalty procedures with respect to Government contracts, personnel disciplinary proceedings, and Government grants; and

(3) to provide reasonable due process protections to all persons who are subject to the adjudication of administrative penalties for false, fictitious, or fraudulent claims or statements.

SEC. 3. (a) Title 5 of the United States Code is amended by inserting after chapter 7 the following new chapter:

"CHAPTER 8—ADMINISTRATIVE PENALTIES AND ASSESSMENTS FOR FALSE CLAIMS AND STATEMENTS

"Sec.
"801. Definitions.
"802. False claims and statements; liability.
"803. Hearing and determination by authority head; subpena authority.
"804. Judicial review.
"805. Collection of civil penalties and assessments.
"806. Limitations.
"807. Right to setoff.
"808. Regulations.
"809. Reports.

"§ 801. Definitions

"(a) As used in this chapter—

"(1) 'authority' means any establishment as defined in section 11(2) of the Inspector General Act of 1978 (92 Stat. 1109), any executive department, any military department, and the United States Postal Service;

"(2) 'authority head' means—

"(A) the head of an authority, or

"(B) an official or employee of the authority designated, in regulations promulgated by the head of the authority, to make findings and determinations under this chapter on behalf of the head of the authority;

"(3) 'claim' means any request or demand, whether under a contract or otherwise—

"(A) to an authority for property, services, or money (including money representing grants, loans, insurance, or benefits); or

"(B) to a recipient of property, services, or money from an authority or to a party to a contract with an authority—

"(i) for property or services if the United States provided such property or services or any portion of the funds for the purchase of such property or services or will reimburse such recipient or party for the purchase of such property or services; or

"(ii) for the payment of money (including money representing grants, loans, insurance, or benefits) if the United States provided any portion of the money requested or demanded or will reimburse such recipient for any portion of the money paid on such request or demand;

"(4) 'statement' means any written representation or certification—

"(A) with respect to a claim; or

"(B) with respect to—

"(i) a contract with, or a bid or proposal for a contract with,

"(ii) a grant, loan, or benefit from,

"(iii) an application for insurance from, or

"(iv) an application for employment with, an authority, or any State, political subdivision of a State, or other party acting on behalf of, or based upon the credit or guarantee of, an authority;

"(5) 'person' means any individual, partnership, corporation, association, or private organization;

"(6) 'investigating official' means—

"(A) the Inspector General in an authority which is authorized an Inspector General by the Inspector General Act of 1978 (92 Stat. 1101) or any other Federal law; or

"(B) in the case of an authority which is not authorized an Inspector General by the Inspector General Act of 1978 (91 Stat. 1101) or any other Federal law, any official or employee of the authority when designated by the head of the authority to conduct investigations under the provisions of section 803(a)(1) of this title; and

"(7) 'reviewing official' means any official or employee of an authority—

"(A) whose rate of basic pay is equal to or greater than the minimum rate of basic pay for grade GS-18 under section 5332 of this title; and

"(B) who is designated by the head of the authority to make the determination provided in section 803(a)(2) of this title.

"(b) For the purposes of subsection (a) (3) of this section—

"(1) each voucher, invoice, claim form, or other individual request or demand for property, services, or money constitutes a separate claim whether submitted separately or together with other claims;

"(2) each request or demand for property, services, or money constitutes a claim regardless of whether such property, services, or money is actually delivered or paid; and

"(3) a claim shall be considered made to an authority, recipient, or party when such claim is made to an agent, fiscal intermediary, or other entity, including any State or political subdivision thereof, acting for or on behalf of such authority, recipient, or party.

"(c) For the purposes of subsection (a)(4) of this section—

"(1) each written representation or certification constitutes a separate statement whether submitted separately or together with other statements; and

"(2) a statement shall be considered made to an authority although such statement is actually made to an agent, fiscal intermediary, or other entity, including any State or political subdivision thereof, acting for or on behalf of such authority.

"§ 802. False claims and statements; liability

"(a) For purposes of this chapter—

"(1) a claim is false when the claim—

"(A) includes or is supported by any false, fictitious, fraudulent, or intentionally misleading statement, document, record, or accounting or bookkeeping entry;

"(B) is for payment for the provision of property or services which the claimant has not provided, or has not provided in accordance with the terms of the contract on which such claim is based, or has provided in violation of any applicable Federal or State statute or regulation; or

"(C) is for the payment of an amount in excess of the amount which is properly due; and

"(2) a statement is false when a material fact—

"(A) is asserted in such statement and is false, fictitious, fraudulent, or intentionally misleading; or

"(B) is omitted from such statement and—

"(i) as a result of the omission, such statement is substantially false, fictitious, or fraudulent or, in the case of an intentional omission, is intentionally misleading; or

"(ii) the person making such statement has a duty to include such material fact in the statement.

"(b) Any person who, on or after the effective date of the Program Fraud Civil Penalties Act of 1983, knowingly makes, presents, or submits, or knowingly causes to be made, presented, or submitted, a false claim or statement, is liable to the United States for—

"(1) a civil penalty of not more than $10,000 for each false claim or statement; and

"(2) an assessment of not more than double—

"(A) the full amount of money paid to and the full value of property or services delivered to a person as a result of the false claim or statement of such person; or

"(B) the amount of damages, including the amount of consequential damages and the cost of investigating such false claim or statement, sustained by the United States as a result of the false claim or statement.

"(c) Except as provided in section 803(b)(5) or 805(f)(1) of this title, the total amount of the penalty and assessment determined under this section shall not be less than the amount of damages sustained by the United States as a result of the false claim or statement.

"(d)(1) The penalties and assessments provided in this section shall be in addition to all criminal penalties provided by law.

"(2) Except as provided in subsection (e) of this section, the authority head may use any administrative and contractual remedy authorized by any other applicable provision of Federal law in addition to the provisions of this chapter to impose or enforce a civil penalty and assessment for false claims and statements.

"(e) Notwithstanding any other provision of Federal law, a civil penalty or assessment imposed under any other provision of Federal law in any case subject to this chapter may be in any amount authorized in this section.

"§ 803. Hearing and determination by authority head; subpena authority

"(a)(1) The investigating official of an authority shall investigate allegations that a person is liable under section 802(b) of this title and report the findings and conclusions to the reviewing official of the authority.

"(2) If the reviewing official determines, based upon the report of the investigating official or upon information from any other source, that there is probable cause to believe that a person is liable under section 802(b) of this title, the reviewing official shall refer the allegations contained in such report to the authority head for a hearing. Before referring the allegations to the authority head, the reviewing official may refer the allegations to the investigating official and require the investigating official

to obtain more information with respect to the allegations.

"(b)(1) The authority head shall conduct a hearing on the record regarding any allegation referred to him pursuant to subsection (a) of this section to determine, based on the preponderance of the evidence—

"(A) the liability of any person under section 802(b) of this title;

"(B) the amount of damages suffered by the United States as a result of the false claim or statement creating the liability of such person; and

"(C) the amount of any penalty and assessment to be imposed on such person.

"(2) The person alleged to be liable under section 802(b) of this title shall be entitled—

"(A) to written notice of the hearing specifically setting forth all allegations and the date, time, and place for such hearing;

"(B) to be present at such hearing;

"(C) to be represented by counsel;

"(D) to present evidence; and

"(E) to cross-examine any witnesses.

"(3) Each hearing under paragraph (1) of this subsection shall be conducted in an impartial manner and resolve the issues expeditiously and inexpensively consistent with fundamental fairness. A written decision including findings and determinations shall be issued after the conclusion of the hearing.

"(4)(A) Except as provided in subparagraph (B) of this paragraph and section 804 of this title, the findings and determinations of the authority head issued in connection with a hearing conducted under paragraph (1) of this subsection are final.

"(B) If the authority head conducting the hearing under paragraph (1) of this subsection is an individual described in section 801(a)(2)(B) of this title, the amount of the penalty and assessment imposed on a person may be reduced by the authority head described in section 801(a)(2)(A) of this title to any amount not less than the amount provided in section 802(c) of this title.

"(5) The total amount of the penalty and assessment determined under this section may be less than the amount provided in section 802(c) of this title if the authority head determines that a lower amount is in the best interest of the United States and enters in the written decision and makes available for public inspection the determination and the reasons for the determination.

"(c) After a hearing pursuant to subsection (b) of this section, the authority head shall promptly send to any person determined to be liable under section 802(b) of this title written notice of the findings and determinations of the authority head and the right to judicial review under section 804 of this title.

"(d) For the purposes of an investigation under subsection (a) of this section the investigating official is authorized—

"(1) to administer oaths or affirmations; and

"(2) to require by subpena the attendance and testimony of witnesses and the production of all information, documents, reports, answers, records, accounts, papers, and other data and documentary evidence necessary to conduct such investigation.

"(e) For the purposes of conducting a hearing under subsection (b) of this section, the authority head is authorized—

"(1) to administer oaths or affirmations; and

"(2) to require by subpena the attendance and testimony of witnesses and the production of all information, documents, reports, answers, records, accounts, papers, and other data and documentary evidence which the authority head considers relevant and material to the hearing.

"(f) In the case of contumacy or refusal to obey a subpena issued pursuant to subsection (d) or (e) of this section, the investigating official or authority head, as the case may be, may invoke the aid of any district court of the United States where such investigation or hearing is being conducted, or where such subpenaed person resides or conducts business. The district courts of the United States shall have jurisdiction to issue an appropriate order for the enforcement of any such subpena. Any failure to obey such order of the court is punishable by such court as contempt.

"(g) Unless a petition is filed as provided in section 804 of this title, the determination of liability pursuant to this section shall be final and shall not be subject to judicial review.

"§ 804. Judicial review

"(a) Any person who has been determined pursuant to section 803 of this title to be liable under section 802(b) of this title may obtain review of such determination in the United States Court of Appeals for the circuit in which such person resides or in which the claim or statement upon which the determination of liability is based was made, presented, or submitted, or for the District of Columbia Circuit, by filing in such court, within sixty days after the date on which the notice required by section 803(c) of this title is sent, a written petition that such determination be modified or set aside. The clerk of the court shall transmit a copy of such petition to the authority head concerned and to the Attorney General. Upon receipt of the copy of such petition the authority head shall transmit to the Attorney General the record in the proceeding resulting in the determination of liability. Except as otherwise provided in this section, the courts of appeals of the United States shall have jurisdiction to review the findings and determinations in issue and to affirm, modify, remand for further consideration, or set aside, in whole or in part, the findings and determinations of the authority head, and to enforce such findings and determinations to the extent that such findings and determinations are affirmed or modified.

"(b) The findings of the authority head with respect to questions of fact, if supported by substantial evidence on the record considered as a whole, shall be conclusive.

"(c) The determination of the authority head as to the amount of any penalty and assessment shall be conclusive and shall not be subject to review except to determine whether such amount exceeds the maximum amount provided in section 802 of this title.

"(d) Any court of appeals reviewing, under this section, the findings and determinations of the authority head shall not consider any objection that was not raised in the hearing conducted pursuant to section 803(b) of this title, if any, absent a showing of extraordinary circumstances causing the failure to raise the objection. If any party shows to the satisfaction of the court that additional evidence not presented at such hearing is material and that there were reasonable grounds for the failure to present such evidence at such hearing, the court shall remand the matter to the authority head for consideration of such additional evidence.

"(e) Upon a final determination by the court of appeals that a person is liable under section 802(b) of this title, the court shall enter a final judgment for the appropriate amount in favor of the United States, and such judgment may be recorded and enforced by the Attorney General to the same extent and in the same manner as a judgment entered by any United States district court.

"§ 805. Collection of civil penalties and assessments

"(a) The Attorney General, with the support of the authority head when required, shall be responsible for judicial enforcement of any civil penalty or assessment imposed pursuant to the provisions of this chapter.

"(b) Any penalty or assessment imposed in a determination which has become final pursuant to section 803(g) of this chapter may be recovered in a civil action brought by the Attorney General. In any such action, no matters that were raised or that could have been raised in a hearing conducted under section 803(b) of this title or in a review pursuant to section 804 of this title may be raised as a defense, and the determination of liability and the determination of amounts of penalties and assessments shall not be subject to review.

"(c) The district courts of the United States and of any territory or possession of the United States shall have jurisdiction of any action commenced by the United States under subsection (b) of this section.

"(d) Any action under subsection (b) of this section may, without regard to venue requirements, be joined and consolidated with or asserted as a counterclaim, cross-claim, or setoff by the United States in any other civil action which includes as parties the United States and the person against whom such action may be brought.

"(e)(1) The United States Claims Court shall have jurisdiction of any action under subsection (b) of this section to recover any penalty and assessment if the cause of action is asserted by the United States as a counterclaim in a matter pending in such court. The United States may join as additional parties in such counterclaim all persons who may be jointly and severally liable with the person against whom such counterclaim is asserted.

"(2) No cross-claims or third-party claims not otherwise within the jurisdiction of the United States Claims Court shall be asserted among additional parties joined under paragraph (1) of this subsection.

"(f)(1) Except as provided in paragraph (2) of this subsection, the authority head may compromise or settle any penalty and assessment determined pursuant to section 803 of this title. No compromise or settlement under this subsection shall provide for a recovery of an amount less than the amount described in section 802(c) of this title unless the authority head makes the determination and takes the action provided in section 803(b)(5) of this title.

"(2) The Attorney General shall have exclusive authority to compromise or settle any penalty and assessment the determination of which is the subject of a pending petition pursuant to section 804 of this title or a pending action to recover such penalty or assessment pursuant to this section.

"(g) Whenever a penalty and assessment is imposed and collected pursuant to this chapter and part of any money paid or property or services delivered as a result of the false claim or statement on which such penalty and assessment is based was provided by a State or political subdivision thereof which has not previously been reimbursed

for such money or property, the United States shall reimburse such State or political subdivision the lesser of—

"(1) an amount bearing the same ratio to the civil penalty and assessment recovered as the amount paid, or the cost to the State or political subdivision of property or services delivered, by the State or political subdivision on the basis of such false claim or statement bears to the total amount paid, or total cost of property or services delivered, based on such false claim or statement; or

"(2) the total amount actually paid, or the total actual cost to the State or political subdivision of property or services delivered, by the State or political subdivision on the basis of such false claim or statement.

"(h) Except as provided in subsection (g) of this section, any amount of penalty and assessment collected under this chapter shall be deposited as miscellaneous receipts in the Treasury of the United States.

"§ 806. Limitations

"(a)(1) Prior to initiating a proceeding under section 803(b) of this title the authority head shall transmit to the Attorney General written notice of the intention to initiate such proceeding together with the reasons for such intention.

"(2) The authority head may initiate a proceeding under section 803(b) of this title if—

"(A) the Attorney General approves the initiation of such proceeding; or

"(B) the Attorney General takes no action to disapprove the initiation of such proceeding within ninety days after the date on which the notice required by paragraph (1) of this subsection is received or within such longer period after such date as is provided in a memorandum of understanding entered into by the authority head and the Attorney General with respect to such proceeding.

"(b)(1) No proceeding under section 803(b) of this title shall be commenced more than six years after the date on which the claim or statement alleged to be a false claim or statement is made, presented, or submitted.

"(2) A proceeding under such section is commenced by mailing by registered or certified mail the notice required in section 803(b)(2)(A) of this title.

"(c) A civil action to recover a penalty and assessment under section 805 of this title shall be commenced within three years after the date on which the determination of liability for such penalty and assessment becomes final.

"(d) If at any time during the course of proceedings brought pursuant to this chapter the authority head receives or discovers any specific information regarding bribery, gratuities, conflict of interest, or other corruption or similar activity in relation to a false claim or statement, the authority head shall immediately report such information to—

"(1) the Inspector General of the authority, if an Inspector General is authorized for the authority by the Inspector General Act of 1978 (92 Stat. 1101) or any other Federal law, for transmission to the Attorney General; or

"(2) the Attorney General, if the authority is not authorized an Inspector General by the Inspector General Act of 1978 (92 Stat. 1101) or any other Federal law.

"(e) If the Attorney General transmits to an authority head a written finding that the continuation of any proceeding under section 803 of this title may adversely affect any pending or potential criminal or civil action related to an alleged false claim or statement under consideration in such proceeding, such proceeding shall be immediately stayed and may be resumed only upon written authorization of the Attorney General.

"(f) No proceeding shall be commenced under section 803(b) of this title with respect to any claim, statement, or group of claims or statements submitted before the commencement of such proceedings by any person or group of persons acting in concert if (1) the amount of money or the value of property or services requested or demanded in such claim, statement, or group of claims or statements exceeds $100,000, or (2) the amount of damages, including the amount of consequential damages, sustained by the United States as a result of such claim, statement, or group of claims or statements exceeds $100,000.

"§ 807. Right to setoff

"(a)(1) The amount of any penalty and assessment which has become final under section 803(g) of this title, or for which a judgment has been entered under section 804(e) or 805 of this title, or any amount agreed upon in a settlement or compromise under section 805(f) of this title, may be deducted from any sum, including a refund of an overpayment of Federal taxes, then or later owing by the United States to the person liable for such penalty and assessment.

"(2) The authority head shall transmit written notice of each deduction made under this paragraph to the person liable for such penalty and assessment.

"(3) All amounts retained pursuant to this paragraph shall be remitted to the Secretary of the Treasury for deposit in accordance with section 805(h) of this title.

"(b) An authority head may forward a certified copy of any determination as to liability for any penalty and assessment which has become final under section 803(g) of this title, or a certified copy of any judgment which has been entered under section 804(e) or 805 of this title to the Secretary of the Treasury for action in accordance with subsection (a) of this section.

"§ 808. Regulations

"(a) The head of each authority shall issue rules and regulations implementing paragraphs (1), (2), and (3) of section 803(b) of this title and such additional rules and regulations as may be necessary to carry out the provisions of this chapter. Such rules and regulations shall insure that investigating officials are not responsible for making the determinations or conducting the hearing required in section 803(b) of this title or making the collections under section 805 of this title.

"(b) The Attorney General may enter into a memorandum of understanding with the head of any authority to provide expeditious procedures for approving or disapproving the initiation of proceedings under section 803(b) of this title and for referral of matters for action under sections 804, 805, and 806(e) of this title. Such memorandum of understanding may provide advanced authorization to initiate proceedings under section 803(b) of this title with respect to any particular type or class of alleged false claims or statements if not otherwise barred by section 806 of this title.

"§ 809. Reports

"(a) Each investigating official shall, not later than October 31 of each year, prepare an annual report summarizing actions taken under this chapter during the most recent twelve-month period ending September 30. Such report shall include—

"(1) a summary of matters referred to the authority head under section 803(a)(2) of this title during such period;

"(2) a summary of matters transmitted to the Attorney General under section 806(a)(1) of this title during such period;

"(3) a summary of all proceedings initiated by the authority head under section 803(b) of this title, and the results of such proceedings, during such period; and

"(4) a summary of the actions taken during such period to collect any civil penalty or assessment imposed under this chapter.

"(b) The annual report of an investigating official shall be furnished to the authority head not later than October 31 of the year such report is prepared. Each such report shall be transmitted to the appropriate committees and subcommittees of Congress in the same manner as the October 31 reports of Inspectors General are transmitted under section 5 (b) of the Inspector General Act of 1978 (92 Stat. 1103).".

(b) The table of chapters at the beginning of part I of title 5, United States Code, is amended by inserting after the item relating to chapter 7 the following new item:

"8. Administrative Penalties and Assessments for False Claims and Statements ..... 801.".

SEC. 4. The regulations required by section 808 of title 5, United States Code, as added by section 3(a) of this Act, shall be promulgated not later than one hundred and eighty days after the effective date of this Act.

SEC. 5. This Act and the amendments made by this Act shall take effect December 31, 1983.

By Mr. HATCH:

S. 1567. A bill to permit disclosure from tax records of the addresses of individuals who have defaulted on health education loans; to the Committee on Finance.

LOAN DEFAULT INFORMATION AMENDMENTS OF 1983

● Mr. HATCH. Mr. President, I am today introducing the "Loan Default Information Amendments of 1983." This legislation would permit disclosure from tax records, the addresses of individuals who have defaulted on health education loans.

A report conducted by the Government Accounting Office in 1981 disclosed that more than 28 percent of the borrowers in the health professions student loan and nursing loan programs were delinquent in payments by 90 days and that "low priority was placed on the billing and collecting of health profession and nursing student loans" by schools participating in the programs.

The report went on to state that the Department of Health and Human Services had not effectively monitored participating schools' collection efforts, but that the Department had recognized the importance of improving its program oversight and was taking steps to assist schools in reducing the high delinquency rates.

As a part of those efforts, the "Loan Default Information Amendments of

1983," recommended by the administration, extends the authority granted Federal agencies by the Debt Collection Act of 1982, to obtain addresses from taxpayer's records to institutions who participate in the HPSL and NSL programs.

The Debt Collection Act of 1982 allows the Secretary of the Treasury to disclose "the mailing addresses of a taxpayer for use by officers, employess, or agents of a Federal agency for purposes of locating such taxpayer to collect or compromise a Federal claim against the taxpayer for a debt owed to the Federal Government." But the HPSL and NSL programs were excluded from the new authority because it only related to "efforts to collect or compromise claims of the Federal Government." Because the HPSL and NSL programs are administered by the schools and not the government, these programs were not included under the Debt Collection Act. Extension of that authority to health profession and nursing schools will allow them to more efficiently process and collect deliquent loans while updating records and making funds available for more students to participate in these loan programs. Mr. President, I would like to request that the text of this proposed legislation be placed after my remarks.

There being no objection, the bill was ordered to be printed in the RECORD, as follows;

S. 1567

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Loan Default Information Amendments of 1983".

DISCLOSURE OF LOCATION OF BORROWERS WHO HAVE DEFAULTED ON HEALTH EDUCATION LOANS

SEC. 2. Paragraph (4) of section 6103(m) of the Internal Revenue Code of 1954 is amended—

(1) by inserting "or the Secretary of Health and Human Services" after "Secretary of Education" in the matter in subparagraph (A) preceding clause (i) and in the matter of subparagraph (B) preceding clause (i),

(2) by striking out "or" at the end of clause (i) of subparagraph (A) and of subparagraph (B),

(3) by adding "or" at the end of clause (ii) of subparagraph (A) and of subparagraph (B),

(4) by inserting the following after clause (ii) of subparagraph (A):

"(iii) made under part C of title VII or part B of title VIII of the Public Health Service Act,",

(5) by inserting the following after clause (ii) of subparagraph (B):

"(iii) any lender participating under part C of title VII or part B of title VIII of the Public Health Service Act,", and

(6) by inserting "or the Department of Health and Human Services" after "Department of Education" in the matter in subparagraph (A) following clause (iii) (as added by paragraph (4) of this section).●

By Mr. DODD:

S. 1568. A bill to authorize the Secretary of Commerce to provide insurance against losses caused by the imposition of export controls under section 5 or 6 of the Export Administration Act of 1979; to the Committee on Banking, Housing, and Urban Affairs.

POLITICAL RISK INSURANCE ACT OF 1983

● Mr. DODD. Mr. President, today I am introducing legislation which would authorize a voluntary, self-financing program of insurance against losses from the imposition of national security or foreign policy export controls under the Export Administration Act. Export controls, while an important policy option for the conduct of foreign affairs, necessarily disrupt commerce and can otherwise undermine our domestic and international trade position. It is therefore important that the Federal Government take steps to reduce as much as possible the commercial problems associated with them. The frequency with which we impose controls, and the magnitude of the losses associated with those controls, require that we do what we can to protect American exporters from adverse financial consequences.

The rationale for this legislation should be clear to those familiar with the historical record of export controls. Under the Export Administration Act, the President is authorized to control or restrict exports on the grounds of national security, foreign policy, or short supply of important commodities. While recent controls on the export of pipeline equipment and, earlier, agricultural commodities to the Soviet Union were particularly noteworthy, numerous other sanctions have been imposed during the post-World War II period. Communist and non-Communist countries alike have been the objects of such treatment.

The authority to impose controls is an important policy option. Our Nation must have the ability to maintain its technological lead over our adversaries, particularly in militarily critical areas. We must also preserve maximum tactical flexibility in pursuit of our foreign policy objectives.

However, as important as such controls may be, the inevitably lead to new costs and losses to the American economy. As American exporters find their business interrupted, they lose sales and markets and their employees lose jobs. Last year, the Senate Banking Subcommittee on International Finance and Monetary Policy heard testimony that the 1980 embargo of agricultural exports to the Soviet Union resulted in estimated losses of over $11 billion of corn, wheat, and soybean output, 310,000 related jobs, and $3.1 billion in personal income earned in the United States. Similarly, the Commerce Department has estimated that controls on oil and gas equipment and technology sales to the Soviet Union would probably cost U.S. firms $300 million to $600 million in exports over 3 years.

Mr. President, it is important to note that the United States has imposed export controls far more frequently, and has a much more extensive export control system, than any of our major trading partners or allies. Our unique responsibilities as the leading diplomatic, commercial, and military power in the free world make it likely that export controls will be imposed in the future. However, the effective implementation of such controls will be seriously complicated if we continue to pay inadequate attention to the domestic economic implications of these controls. If the American people and the business community believe that the costs are too severe, the ability of the President to make best use of his authority will be seriously undermined. I am not suggesting that export controls are a necessary or desirable response to every action or situation we believe undermines our national interest. I do believe it is important that we take steps to minimize the adverse domestic impact of our response.

According to a staff survey performed at the State Department's Office of East-West Trade, many of our trading partners have fairly significant programs for covering losses arising from the imposition of export controls, even though these nations have rarely, if ever, imposed such controls. The West Germans have offered a limited quasi-public program of political risk insurance against losses due to export control actions by the West German Government. The Japanese Ministry of International Trade and Industry offers insurance covering losses due to Japanese export control actions. The French Foreign Ministry has indicated that, in the case of export control actions or embargoes, the Government will cover losses on sales of military equipment.

The United States, on the other hand, has imposed export controls far more frequently than any of these countries, but fails to display a correspondingly greater commitment to covering the losses which inevitably arise from such actions. I believe such a commitment is needed if we want to reduce the commercial complications associated with such controls.

The Political Risk Insurance Act of 1983 would authorize the Secretary of Commerce, who has primary responsibility for licensing exports and administering export controls under the Export Administration Act, to establish a program to provide exporters insurance against losses arising from the imposition of national security or foreign policy controls under that act. This program would be voluntary, and

exporters who elect to participate in the program would pay premiums as determined by the Secretary of Commerce. This legislation would limit total claims under the program to the total of accrued premiums in the fund and income from investments of the fund. As a result, the United States would not be liable for any claims in excess of the total of accrued premiums and investment income. The program would thus be self-financing and not add to the deficit.

The Secretary of Commerce would have broad authority to establish the program upon such terms and conditions as he deems appropriate. The Secretary may also act in conjunction with other Federal agencies and enter into reinsurance and other agreements with private insurers in order to carry out the program established by this legislation.

Mr. President, I believe that this approach is a responsible one and should not raise fears about unwarranted intrusion of the Federal Government into the private sector or the financial markets. As I mentioned earlier, the self-financing nature of this program precludes any increase in the deficit. Furthermore, programs authorized by this legislation are not intended either to compete with, or establish a basis for regulation of, private insurance providers. In sum, this legislation is intended to authorize a service which is in the national interest, but apparently not sufficiently available in order to protect that interest. I look forward to consideration of this measure by the Congress so that we can take whatever steps may be necessary to improve this measure and bring it into conformance with the purposes I have set forth.

Mr. President, I ask unanimous consent that the text of this legislation be included in the CONGRESSIONAL RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1568

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. Section 4 of the Export Administration Act of 1979 is amended by adding at the end thereof the following:

"(g) INSURANCE AGAINST LOSS CAUSED BY EXPORT CONTROLS.—(1) The Secretary is authorized, upon such terms and conditions and in conjunction with such other Federal agencies as the Secretary may deem appropriate, to establish a program to provide exporters who elect to participate in the program insurance against losses, in whole or in part, caused by the imposition of export controls under section 5 or 6, including any losses incurred in the production and preparation for sale of goods or technology on which such controls are imposed.

"(2) The Secretary shall prescribe and collect premiums from participating exporters for insurance provided under this subsection, and shall establish premium rates at levels which assure that the program is run on an actuarially sound basis. Premiums collected under this subsection shall be deposited in a special fund which shall be available only for the purpose of this subsection. The Secretary may invest balances in the fund in excess of estimated current needs in obligations of the United States. Except to the extent of accrued premiums in the fund and any income on investments of the fund, the United States has no liability arising out of the imposition, expansion, or extension of export controls.

"(3) The Secretary is authorized to enter into agreements, including reinsurance agreements, with private insurers in order to carry out the insurance program under this subsection.

"(4) All determinations by the Secretary with respect to claims for losses covered by insurance under this subsection shall be final.".

SEC. 2. This Act shall be referred to as the "Political Risk Insurance Act of 1983".●

By Mr. PRESSLER:

S. 1569. A bill to authorize the Secretary of the Interior and other major Federal land managers to provide for the conservation and scientific study of vertebrate paleontological resources on public and Indian lands; to the Committee on Energy and Natural Resources.

PALEONTOLOGICAL CONSERVATION ACT OF 1983

Mr. PRESSLER. Mr. President, today I have the pleasure of introducing the Paleontological Conservation Act of 1983 for the consideration of my colleagues. This is one of those rare pieces of legislation that has tremendous support from a wide range of scientific, private, and commercial concerns. This bill deals specifically with the manner in which the Department of the Interior and its agencies promulgate rules dealing with the collection of fossils, minerals, and related items on public lands.

The Secretary of the Interior and other major Federal land managers, including the Secretaries of Defense and Agriculture and the heads of independent land managing or land holding agencies, are responsible for providing measures to insure that certain paleontological resources located on public and Indian lands are afforded systematic scientific study toward the enhancement of this Nation's natural resource heritage. As the lead Federal agency for the conservation and protection of natural resources, the Department of the Interior must provide overall policy direction for the administration of this act through the provisions of the national natural landmarks program.

The terribly confusing maze of rules that now exists has already caused a great deal of consternation among professional and amateur collectors. Last fall, in a misguided effort to revise some of these rules, the Bureau of Land Management came forth with a new set of regulations that resulted in a flood of protests from hobbyists, scientists, and commercial collectors. In a 60-day period, the BLM received nearly 1,200 pieces of mail, the vast majority of which opposed the proposed rule changes. Nearly every State was represented in the outcry. This is not a regional issue. Some 2 million rock hounds are tired of foolish, thoughtless BLM regulations. The latest revision would have required each party camping out—even for a single night—to obtain a permit from the appropriate Federal authorities.

The science of paleontology is highly specialized. Paleontology, simply put, is the study of fossils and past life forms. Our Nation is rich in fossil remains, which, in capable hands, can help unravel scientific mysteries. These valuable fossil resources need the protection this measure provides. The BLM personnel simply do not have the expertise needed in this unique field of study. Though small in number, paleontologists have widespread impact on the scientific community and the general public. The work of paleontologists provides an important link in our understanding of the history of life on Earth. From study of the past we gain insight into the future.

My proposal would provide a new and comprehensive framework on which more realistic regulations could be based. An advisory committee composed of experts both in and out of Government would be set up to promulgate these rules. This legislation will conserve and protect our precious vertebrate fossils, while at the same time allowing hobbyists the freedom to enjoy their activities.

It is a shame that during nearly a decade of personal and written contact with Government officials, the collectors have been unable to impress their concerns on these officials. The avenue of direct legislation appears to be the only viable means left for this large and unheard group. Legislation that has been applied to this area was originally placed on the books in 1906 and was never intended to serve as it has been forced to do. It is time for the Congress of the United States to act promptly.

I ask unanimous consent that a summary of the bill and two letters of support be entered in the RECORD at this point.

There being no objection, the material ordered to be printed in the RECORD, as follows:

A PROPOSED BILL: "PALEONTOLOGICAL RESOURCES CONSERVATION ACT OF 1983"

I. KEY ISSUES

Fossil vertebrates are one of the Nation's unique natural resources.

Fossil vertebrates are important scientifically (as the primary evidence of the history and diversity of higher life) as well as educationally (fossil vertebrates are major exhibits in Federal, State and private museums).

These national natural resources on public lands are constantly being exposed and lost to processes of weathering and ero-

sion. They can be saved only through collection and preservation.

Existing/proposed Federal policies and practices relating to fossil vertebrates *discourage* conservation of this natural history resource because

—They are "borrowed" from other disciplines (i.e., archeology) and are unsuitable for paleontology;

—They impede the activities of scientists and other professionals who are able to collect and preserve these resource materials in museums and other institutions.

Few other countries in the world are endowed with as rich a natural history heritage of fossil vertebrates as the United States.

No other country in the world can match the paleontological expertise (measured in numbers of qualified people or in technical facilities) that resides in our universities, museums and other scientific institutions.

Professional vertebrate paleontologists, scientists who are best qualified to preserve and interpret this aspect of our natural heritage, have been subjected for decades to administration strictures and legal actions. The Nation's fossil vertebrate resources cannot be adequately protected or conserved, nor made available for purposes of science and public education, unless the Federal government facilitates the activities of vertebrate paleontologists and other responsible groups.

II. PURPOSE

The purpose of the proposed bill is to promote the conservation and study of fossil vertebrates which represent an important component in our knowledge of the history of life on earth.

The bill will accomplish this end by facilitating the activities of scientists (i.e., professional vertebrate paleontologists) and responsible scientific commercial collectors.

The bill makes provision for hobbyist/fossil collecting groups, and encourages responsible cooperation between all citizens interested in paleontology.

Although certain Federal agencies are mandated to manage "objects of scientific interest," current and proposed managerial programs fail to do so because they are designed for administrative rather than for scientific or conservational purposes.

Fossil vertebrates are constantly being exposed and destroyed by the elements of weathering. Their conservation can only be achieved through programs that encourage proper collection of these resources.

The bill will enable the Federal government to participate meaningfully in vertebrate paleontology on public lands, but without unnecessary regulatory activity which engenders attendant costs to taxpayers, scientists, and scientific commercial collectors and hobbyists, and which is ultimately obstructive to science and education.

III. HISTORY

The Paleontological Society, Society of Vertebrate Paleontology, and the American Association of Paleontological Suppliers, have had longstanding concern over issues of Federal policy and regulations affecting the conduct of paleontological investigations on public lands. These concerns have been expressed repeatedly to the Department of the Interior both personally and in writing by the Societies' representatives. And yet major problems remain unsolved.

The Society of Vertebrate Paleontology initiated attempts to rectify permitting and regulatory problems in the 1950's. These efforts were intensified during the last eight years, but no effective response or action has ever been generated by any Federal agency.

In 1982 the Bureau of Land Management (BLM) promulgated proposed rules regarding the collection of geologic and hobby mineral materials (Federal Register, Vol. 47, No. 159, Aug. 17, 1982). These rules were developed without reference to any representations made by the professional community in the past, without consultation with any vertebrate paleontologist or scientific commercial collector, and without public hearings.

The proposed rules, had they been adopted, would have had a severely adverse impact on the ability of scientists and other legitimate collectors to pursue the preservation and study of fossil vertebrates. In face of a massive negative response, BLM has given no substantive indication that criticisms of the proposal would influence a revision, if any. Resolutions by scientific societies, and letters from vertebrate paleontologists and the heads of commercial enterprises, as well as hobbyists' representatives and amateur paleontologists, generated only form letter responses from offices other than those originally addressed.

IV. CRITICAL ISSUES

(1) The Department of the Interior is dealing with *scientific* issues in a managerial context. If the Department emphasizes management at the expense of science, the result will be ineffective in terms of the protection of natural resources, will be obstructive to the conduct of paleontology as a science, and will serve no public purpose.

(2) Field work in paleontology has been treated administratively by the Federal government as conceptually and methodologically the same as that in archeology. As a result, paleontologists face inappropriate legal and administrative difficulties in the conduct of their scientific investigations. The confusion over the difference between paleontology and archeology has been seemingly intractable over the years.

(3) No uniform policies and practices specifically for paleontology have ever been implemented by the Department of the Interior because BOR/OAHP, followed by HCRS, and then by other agencies and various land managing bureaus, have neither recognized the special requirements of paleontology as a science nor coordinated their policies and procedures regarding vertebrate fossils. As a result, paleontologists are confronted with a bewildering web of regulation, much of it conflicting or inappropriate, that stretches from Washington to the district offices of numerous land managing bureaus.

(4) The Secretary of the Interior's responsibility for scientific resources on public lands should be exercised through a central office staffed by responsive, qualified individuals who have the authority to coordinate the programs/policies of various land managing bureaus, down to the district and area levels. An advisory committee to oversee any program in vertebrate paleontology must have members drawn from the professional community because of the specialized and technical nature of this field/museum/laboratory science.

(5) Fossil vertebrates are far rarer than any other category of natural history materials, and their collection, preservation, and study represent a rigorous scientific discipline carried out by qualified personnel in state, federal, and private institutions, as well as by responsible scientific commercial collectors and amateur paleontologists who make available such material to museums and educational institutions.

SOCIETY OF VERTEBRATE PALEONTOLOGY,
June 7, 1983.

Hon. LARRY PRESSLER,
U.S. Senate,
Russell Senate Office Building,
Washington, D.C.

DEAR SENATOR PRESSLER: On behalf of the Society of Vertebrate Paleontology, I am writing to request that you introduce a bill entitled "Paleontological Resources Conservation Act of 1983." This legislation is urgently needed to promote the conservation and study of vertebrate fossils, as well as protect the ability of scientists and others to conduct research and to further public education.

The Society of Vertebrate Paleontology is a scientific association of professional, student and amateur paleontologists dedicated to advancing our knowledge of vertebrate evolution. The Society has attempted, in good faith, to work with the Department of the Interior for over eight years to rectify policies that have been detrimental to furthering the conservation of vertebrate fossils as a natural resource.

We have come to realize that only through specific legislation will Federal agencies adequately recognize the role of vertebrate paleontology in science and education, and participate meaningfully in the preservation and study of these rare fossils that document an important aspect of the history of life on earth.

Not only is the bill being promoted by professional scientists, but it receives widespread support from associations of commercial enterprises and groups of amateurs. This legislation, when enacted, will ensure that vertebrate fossils are not only conserved but will be utilized in ways that will enrich the public's understanding of this National natural history resource.

We are very grateful for your willingness to consider our request.

Yours sincerely,

FARISH A. JENKINS, Jr.,
Past President, Society of Vertebrate Paleontology (Professor of Anatomy and Biology, Harvard University; and Curator of Vertebrate Paleontology, Museum of Comparative Zoology, Harvard University).

AMERICAN ASSOCIATION OF PALEONTOLOGICAL SUPPLIERS,
Hill City, S. Dak., June 7, 1983.

Honorable LARRY PRESSLER,
Senate Russell Building,
Washington, D.C.

DEAR SENATOR PRESSLER. It is my honor to represent the American Association of Paleontological Suppliers in the presentation of the "Paleontological Resources Conservation Act of 1983." This Bill is the culmination of many months and even years of work by many individuals and organizations, whose concern is the protection and retrieval of Paleontological specimens and the Scientific data which they represent.

The "Paleontological Resources Conservation Act of 1983" is a perfect example of the cooperative efforts of concerned Americans of varied interest groups to create a comprehensive program—through Congressional channels—to clarify and implement programs of the Federal Government for the advancement of science and the protection of the public interest.

This proposed Bill, when passed by the Congress and signed by the President, will foster improved cooperation between the Scientific, Commercial and Amateur Paleontological communties. It will also result in a tremendous increase in the knowledge of past life and the history of our planet.

It is my hope that you will be the primary sponsor in the United States Senate for this Bill.

Sincerely,

PETER L. LARSON,
President, American Association of Paleontological Suppliers; President, Black Hills Institute of Geological Research.

By Mr. MITCHELL (for himself and Mr. DURENBERGER):

S. 1570. A bill to amend the Internal Revenue Code of 1954 to provide simplification in accounting rules relating to inventory; to the Committee on Finance.

INVENTORY SIMPLIFICATION AND REFORM TAX ACT OF 1983

● Mr. MITCHELL. Mr. President, current debate on tax policy is dominated by concern over the Federal deficit. While this focus is necessary, it should not prevent us from considering needed reforms to our tax system. The legislation I am introducing today, along with Senator DURENBERGER, contains several proposals that would greatly simplify inventory accounting for tax purposes. Similar legislation is being introduced in the House by Representative NOWAK.

All businsses can benefit by a reform of inventory accounting rules, but such action is especially important in providing tax relief for small businesses, which tend to be more inventory-intensive than larger businesses. The business component of the Economic Recovery Tax Act of 1981 concentrated tax relief on capital-intensive firms, so many small businesses continue to operate under heavy tax burdens.

The 1981 tax bill did contain modest changes in inventory accounting rules. Yet that legislation was only a beginning, as evidenced by the study of inventory accounting methods that Congress directed the Treasury Department to conduct. The purpose of the legislation introduced today is to build on the 1981 legislation and to continue the debate on simplifying the rules governing inventories.

The most compelling argument for inventory reform is the tendency for inflation to increase the tax liabilities of business enterprises. The most commonly used method of accounting for inventories, the first in first out (FIFO) method, often results in an understatement of the cost of goods sold by a firm, which is deducted from gross income to determine taxable income. When this deduction is understated, taxable income and therefore tax liability are overstated.

When the 1981 tax bill was drafted, much attention was focused on the effect of inadequate depreciation allowances on business tax liabilities, inadequate inventory accounting has actually had a more significant impact on taxable income in each year in the last two decades. In 1981, inadequate depreciation added $16.8 billion to corporate taxable income, while inadequate inventory accounting added $24.6 billion to taxable profits. What makes these figures even more alarming is that inventories comprise a smaller portion of total assets than do capital assets. In 1978, corporate structures and equipment were valued at $1.4 trillion, while the value of corporate inventories was $0.4 trillion.

Businesses do have an opportunity to avoid this overtaxation by adopting the last in first out (LIFO) method of accounting. LIFO is not used very widely, however. This leads to the second argument for reforming inventory accounting rules, which is that present LIFO rules are too complex for most businesses, particularly small ones, to adopt.

Evidence of the complexity of LIFO can be found in the small percentage of firms using LIFO, even though substantial tax benefits often result. Of all corporations in 1976, only 3.7 percent of manufacturers, 2.5 percent of wholesalers, and 1.3 percent of retailers used LIFO.

Although the same rules apply to firms of all sizes, LIFO accounting creates the greatest administrative burdens on small businesses because they tend not to have the accounting resources to handle complex bookkeeping.

The Inventory Simplification and Reform Act addresses several issues. Many changes in the LIFO method are included to increase the number of businesses that use this method. The initial tax penalty of electing LIFO is reduced, and changes in the pooling and indexing requirements will greatly simply LIFO. The complex problems of LIFO recapture and the treatment of excess inventories are also addressed, and the conformity requirement would be repealed.

In addition to simplifying LIFO, this bill would allow businesses to use the cash method of accounting. This provision is directed at those businesses of whom even a simplified LIFO method would be too burdensome. For these firms, cash accounting is a much easier and more familiar method of accounting.

I ask unanimous consent that a fact-sheet describing the details of my bill be included in the RECORD.

There being no objection, the fact-sheet was ordered to be printed in the RECORD, as follows:

INVENTORY SIMPLIFICATION AND REFORM TAX ACT OF 1983

Section 1. Title of Bill.

Section 2. Repeal of LIFO Conformity Requirement.

Under the present law, a business electing LIFO must keep its financial statements and its tax statements the same. In other words, it cannot use LIFO for financial purposes and at the same time, use LIFO for tax purposes.

This bill would revoke the LIFO conformity requirement.

Section 3. Alleviating the Initial Penalty Associated With the LIFO Election.

If a business wants to elect LIFO, it is required to restore to cost over a three year period inventory writedowns taken in prior years. To alleviate this severe cash drain for the business, it would be permitted to restore inventory writedowns over a ten year period.

Section 4. Simplification of Inventory Pooling Requirements.

Subsection (a): Certain small businesses permitted to use one pool.

The bill would permit businesses with average gross receipts of less than $8 million to use one pool for LIFO.

Subsection (b): Principles for establishing inventory pools.

Wholesalers and retailers (not electing the preceding subsection) would be permitted to pool their goods based on either of the following methods:

1. According to the general expenditure categories of consumer goods described in the CPI Detailed Report; or

2. Based on groupings that are ordinarily and customarily used in their industry.

Section 5. Permitting Businesses to Use Regularly Published Government Price Indexes.

This bill permits any business electing LIFO to use an index based on general categories from the Consumer Price Index or the Producers Price Index.

Section 6. Permitting business to use certain internal indexes, without showing other methods are unsuitable or impractical.

The tax regulations place certain limitations on the type of internal price index a business may use for LIFO.

For businesses wanting to continue to use internal price indexes under LIFO, this bill would broaden the choice of internal indexes. This provision would permit many businesses to use the link chain method of indexing.

Section 7. Computation of LIFO Recapture Amount.

Section 403(b) of the Crude Oil Windfall Profit Tax Act of 1980 requires a corporation to recapture its LIFO benefit as ordinary income in certain specified situations. In general, this recapture occurs when a corporation distributes its LIFO inventory in a partial or complete liquidation of the business.

The bill would generally place limitations on the amount of the LIFO benefit which is recaptured for tax purposes. There would be recapture of the LIFO benefit only to the extent the corporation's product line prices increased at a greater rate than consumer prices. This provision shall apply to distributions and dispositions adopted after December 31, 1982.

Section 8. Cash Receipts and Disbursements Method (Cash Method) of Accounting.

A business may elect the cash method if its gross receipts are less than $2 million and if it meets the active participation test. In general, an active participant is someone who is actively involved in management and whose principal business activity is such trade or business. Further, the cash method business would not be permitted to purchase

inventories at the end of the year in excess of its reasonable needs.

Section 9. Treatment of Excess or Obsolete Inventory.

In general, the current tax law only permits a business to writedown its excess or obsolete inventory in certain narrowly defined situations. Often, these narrowly defined situations do not reflect the reality of current business practices.

The bill provides an objective standard for businesses in the treatment of the value of its excess inventory. It generally permits a business to reduce the value of its excess inventory over a five year period.●

By Mr. PELL:

S. 1571. A bill to amend the National School Lunch Act, to provide for the serving of nutritionally superior lunches under such Act; to the Committee on Agriculture, Nutrition, and Forestry.

SCHOOL LUNCH PROGRAM

● Mr. PELL. Mr. President, today I am introducing legislation that would call for schools to provide nutritionally superior lunches as a condition for participating in the national school lunch program.

My proposal is modeled after the school lunch program in Fulton County, Ga. Students in the Fulton County School District receive well-balanced, tasty, but nutritious, meals. Rather than eating foods that are high in fat, sugar, and salt they enjoy whole, unprocessed foods that are high in vitamins and nutrients.

In 1982 the General Accounting Office completed a study of this and other alternative school lunch programs. They verified the nutritional quality of the lunch and concluded that good food does not cost more. In Fulton County, all students are charged 83 cents for their lunch. In other districts, elementary students pay 70 cents and high school students pay 90 cents. In my view, this is an investment that we should make and can afford to make.

Our country is one of the most affluent, but unfortunately, it does not lead the world in the quality of its diet. A good American breakfast has always included bacon and eggs. Traditionally, Americans were taught to think that no meal was really complete without a large serving of red meat. Until recently, butter has been preferred over margarine, and ice cream, candy, and soft drinks are most of our children's favorite foods. In short, our affluence has promoted eating habits, generation after generation, which have contributed to needless and costly medical problems.

With all of our modern technology and in spite of the fact that 10 percent of our gross national product is spent on health care annually, our country still ranks 10th in life expectancy and 10th in infant mortality in comparison to other industrialized countries. The simple fact is that we are putting more and more of our health care resources into expensive equipment and treatment programs and our population is not a great deal healthier because of it.

The dietary habits and sedentary lifestyle of modern Americans represent a serious threat to public health. Recent scientific evidence has demonstrated that too much fat, too much sugar, or too much salt are linked to killer diseases. These findings have made it more apparent that in the future, major advances in health will result not from the curing of disease, but from its prevention. There is no doubt that all of us can improve our health by exercising more and being more selective about what we eat.

Our deplorable eating habits begin in the cradle and our young people depend upon junk food as staples in their diet. We do not teach our children the importance of good nutrition and, too frequently, we do not set a good example in our own dietary habits.

Three decades ago the Federal Government decided to do something about our inadequately nourished children and established the national school lunch program. Schools that participate in the program receive a Federal subsidy in exchange for providing a "nutritionally adequate" lunch. Through the years many nutritionists and educators have commented on the nutritional adequacy of the school lunch and have criticized the sale of so-called competitive foods that are available in school cafeterias. In spite of all the evidence that has come to light in recent years about the harmful effect of too much sugar in young people's diets, many schools have continued to permit the placement of vending machines in their cafeterias, filled with candy, soda, and other snack foods.

A number of schools around the country have voluntarily raised the standards of their lunch programs. I would like to see this trend continued and am introducing today legislation that would amend the National School Lunch Act so that schools and school districts will have to provide their students with a nutritionally superior lunch as a condition of participation in the program.

To qualify, schools would have to offer their students low-fat as well as whole milk. All breads would have to be whole grain. Meals would have to be low salt, low sugar, and low fat. The sale of soft drinks, candy, and sweets would be strictly prohibited as opposed to current Agriculture Department guidelines that simply limit their availability. I am hopeful that over a period of years more and more children will participate in this new program. Providing a well-balanced, nutritionally sound meal for our schoolchildren should encourage them to adopt good eating habits early on and enable them to build strong bodies and strong minds.

I ask unanimous consent that the text of the bill be printed at this point in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1571

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That subsection (a) of section 9 of the National School Lunch Act (42 U.S.C. 1758(a)) is amended to read as follows:

"(a)(1) Schools participating in the school lunch program under this Act shall provide a nutritionally superior school lunch to its students. In order to meet the minimum requirements of a nutritionally superior school lunch, a school shall be required to—

"(A) provide the following items in the lunches which it serves:

"(i) unflavored low fat fluid milk;

"(ii) at least 2 ounces (1½ ounces for children under 8 years of age), edible portion as served, of lean meat, poultry, or fish; or the nutritional equivalent in cheese, eggs, cooked dry peas, beans, or peanut butter; or the nutritional equivalent in any combination of such foods (to meet the requirements of this subclause such foods must be served in a main dish or in a main dish and one other menu item);

"(iii) two or more vegetables or a salad, or both;

"(iv) one slice of predominantly whole grain bread or a serving of cornbread, biscuits, or rolls, made predominantly of whole grain flour, whole grain pasta, or whole grain rice; and

"(v) fresh fruit, canned fruit (packed in water), or other item which does not contain refined sugar, for dessert;

"(B) plan its lunches with a low content of fat, sugar, and salt, and not put sugar or salt in containers on cafeteria tables;

"(C) limit competitive food items to those which are permitted under this paragraph to be included in the lunch;

"(D) ban from sale on school premises any product which contains artificial sweetners or an excess of refined sugar, corn syrup, or salt, including, but not limited to, regular and artificially sweetened soft drinks, candy, chewing gum, ice cream, cake, pies, cookies, potato and corn chips, and pretzels;

"(E) offer in its cafeteria (during all hours of operation) one fresh fruit, at least one pure fruit drink, and low fat milk; and

"(F) establish a nutrition council, as provided in paragraph (2), to oversee the nutritionally superior school lunch program and to recommend ways to improve such program.

"(2) The nutrition council referred to in paragraph (1)(F) of any school shall be composed of members appointed by the principal of the school concerned and may include the principal, a dietitian, school athletic director, a student representative, and such other members as the principal may consider appropriate.

"(3) Each school system shall have the authority to develop portion quantities for food items required by subclauses (i), (iii), (iv), and (v) of paragraph (1)(A) in order to meet the food and nutritional needs of children according to their ages, to reduce plate waste, and to insure that the lunches provided are more cost effective.

"(4) The Secretary shall, within ninety days after the date of the enactment of this paragraph prescribe such regulations as the Secretary considers necessary to administer the provisions of this subsection and shall include in such regulations procedures necessary to ensure that all schools participating in the school lunch program are complying with the provisions of this subsection.

"(5) Nothing in this subsection shall be construed to prohibit the substitution of foods to accommodate the medical or other special dietary needs of individual students.".●

By Mr. QUAYLE (for himself and Mr. LUGAR):

S. 1572. A bill to designate the Veterans' Administration Outpatient Clinic to be located in Crown Point. Ind., as the "Adam Benjamin Veterans' Administration Outpatient Clinic"; to the Committee on Veterans' Affairs.

ADAM BENJAMIN VETERANS' ADMINISTRATION OUTPATIENT CLINIC

● Mr. QUAYLE. Mr. President, I am pleased to have my distinguished colleague from Indiana (Senator LUGAR) join me in introducing legislation to designate the Veterans' Administration Outpatient Clinic, to be located in Crown Point, Ind., as the Adam Benjamin Veterans' Administration Outpatient Clinic.

The late Adam Benjamin served the residents of northwest Indiana in Congress nearly 6 years, until his untimely death last September. Adam and I came to the U.S. House of Representatives together in 1977 and it was my great privilege and honor to work with him. Even though our political parties were different, there were many areas of agreement, and our efforts on behalf of Indiana were harmonious and productive.

Adam Benjamin's regrettably short life was dedicated to helping people most in need of assistance. Many individuals and groups in Indiana will long remember his dedicated service to them as a legislator. As an example of this tireless work on behalf of his constituents, I would like to recall his efforts on behalf of our deserving veterans of military service. The veterans residing in northwest Indiana came to him with a particular problem: that of assuring proper health care in a VA facility reasonably close to home. On November 30, 1981, at Adam Benjamin's invitation, the House Veterans Affairs Subcommittee on Hospitals and Health Care came to northwest Indiana to determine the need for a veterans' outpatient clinic. After 18 months of deliberation, the Veterans' Administration announced on May 24, 1983, their intention of establishing an outpatient clinic in Crown Point.

I believe it is a fitting and appropriate action to honor Adam Benjamin by naming the VA clinic after him. Indeed, I think this veterans' clinic stands as a symbol of all Adam stood for. For those of us who knew him and his indefatigable work on behalf of those he represented, the Adam Benjamin Veterans' Administration Outpatient Clinic will serve to honor a dedicated public servant who is sorely missed.●

By Mr. SASSER (for himself, Mr. BYRD, Mr. DODD, Mr. METZENBAUM, Mr. STENNIS, Mr. RANDOLPH, and Mr. SPECTER):

S. 1575. A bill to improve the highway bridge replacement and rehabilitation program; to the Committee on Environment and Public Works.

NATIONAL BRIDGE IMPROVEMENT ACT OF 1983

● Mr. SASSER. Mr. President, I am today introducing S. 1575, the National Bridge Improvement Act of 1983. I am pleased to introduce this legislation along with my distinguished colleagues, Senator BYRD, Senator DODD, Senator METZENBAUM, Senator STENNIS, and Senator RANDOLPH, and Senator SPECTER.

Mr. President, the Nation was saddened and shocked by the recent bridge collapse of Interstate 95 at Greenwich, Conn. The loss of life was tragic. The economic disruption caused by this accident is unfortunate.

The national news in reporting this tragedy at the Mianus River noted that, "For want of a pin, a bridge may have been lost." That may have been true in this situation, but this is not an isolated case.

Bridges all over this country are in a state of disrepair and dilapidation. The causes of this situation are legion. State and local governments, strapped by the recession, are often unable to devote considerable sums for bridge repair. Federal funding for bridge rehabilitation and repair is still inadequate despite funding increases contained in the Highway Improvement Act of 1982. And, most unfortunately bridge repair programs are overlooked as Federal, State, and local governments grapple with more immediate and compelling problems.

But the fact of the matter is that bridge repair and rehabilitation is a major national problem. In August 1981, the General Accounting Office found that 200,000 bridges were deficient or obsolete. By December 1982, the U.S. Department of Transportation classified nearly 250,000 bridges as inadequate, seriously deteriorated, or obsolete. In less than 18 months nearly 50,000 bridges fell into the category of needing substantial repair.

More and more bridges are approaching the end of their useful life, and yet not enough is being done to keep pace with this problem.

The national bill for bridge repair is estimated to be a staggering $41 billion. These funds cannot be raised overnight, but we can make a constructive start in dealing with our bridge problem by quick action on S. 1575.

I previously introduced this legislation in the 97th Congress with the cosponsorship of Senator ROBERT C. BYRD, Senator STENNIS, Senator RANDOLPH, Senator HART, Senator COCHRAN, Senator HEINZ, Senator METZENBAUM, and Senator SPECTER. Hearings were held on this bill but, unfortunately, no final action was taken on this legislation in the 97th Congress.

We are making some progress on our bridge problem. More Federal money will be spent on bridge rehabilitation and repair through 1986. But we can also attack our bridge problem by other means as well. S. 1575 provides us with those means.

S. 1575 addresses our national bridge repair problem in a timely and effective fashion.

It requires the Department of Transportation to review and encourage the compliance of all Federal and State agencies with current national bridge inspection standards.

It reviews the criteria for assigning priorities for bridge repair and rehabilitation so as to better concentrate limited funding on bridges most in need of repair.

The bill also establishes procedures for the rapid completion of the national bridge inventory, and provides for a public information program regarding the safety of our bridges.

Mr. President, this legislation grows out of a comprehensive report done by the General Accounting Office (GAO) on the problem of unsafe bridges. This excellent report, completed in 1981, provides much background information that should be of great value to my colleagues.

Mr. President, I ask unanimous consent that the National Bridge Improvement Act of 1983, S. 1575, and a summary of the 1981 GAO report of unsafe bridges be printed in the RECORD immediately following my remarks.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1575

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "National Bridge Improvement Act of 1983".

REFERENCES AND DEFINITIONS

SEC. 2. (a) Except as otherwise specifically provided, whenever in this Act a reference is expressed in terms of a section or other provision, the reference shall be considered to be made to a section or other provision, respectively, of title 23, United States Code.

(b) As used in this Act—

(1) the term "Secretary" means the Secretary of Transportation;

(2) the term "bridge" means a structure on which a highway crosses over waterways, other topographical barriers, other highways, and railroads;

(3) the term "highway" shall have the meaning provided in section 101(a);

(4) the term "Federal-aid system" shall have the meaning provided in section 101(a);

(5) the term "improvement" includes replacement and rehabilitation;

(6) the term "deficient" means structurally deficient or functionally obsolete;

(7) the term "highway bridge replacement and rehabilitation program" means the highway bridge replacement and rehabilitation program establishment under section 144; and

(8) the term "national bridge inspection standards" means the national bridge inspection standards established under section 116(d).

FINDINGS AND PURPOSE

SEC. 3. (a) The Congress finds that—

(1) of the more than five hundred and fifteen thousand bridges in the United States, almost four out of every ten are deficient;

(2) deficient bridges increase the potential for traffic deaths, injuries, and property damage, and add to fuel consumption, air pollution, and the cost of goods and services; and

(3) the total cost to replace and rehabilitate deficient bridges nationwide is rapidly approaching $42,000,000,000.

(b) The purpose of this Act is to make effective revisions of the highway bridge replacement and rehabilitation program in order to ensure the replacement and rehabilitation of the deficient bridges in the United States in a timely and efficient manner, the fair distribution of Federal funds within the various States for replacement and rehabilitation of bridges, and the compliance of the States with the national bridges inspection standards.

BRIDGE IMPROVEMENT PROGRAM

SEC. 4. The Secretary shall—

(1) revise, consistent with the provisions of section 144 (b) and (c), the criteria for assignment of priorities for bridge replacement and rehabilitation under such section to concentrate Federal funding on bridges most in need of replacement and rehabilitation;

(2) establish a formal procedure for the exercise of the Secretary's discretion in selecting highway bridge replacement and rehabilitation projects for the obligation of funds under section 144(g) to ensure consideration of the costs and benefits of each such project and the classification of the bridge under section 144 (b) and (c) in each such project;

(3) establish administration guidelines for the distribution of highway bridge replacement and rehabilitation apportioned funds throughout each State under section 144(j) with provisions for flexibility with respect to State administration of the apportioned funds; and

(4) monitor the distribution of highway bridge replacement and rehabilitation program apportioned funds throughout each State under section 144(j).

NATIONAL BRIDGE INSPECTION STANDARDS

SEC. 5. (a) The Secretary shall—

(1) review each State's compliance with the national bridge inspection standards;

(2) revise such standards—

(A) to improve inspection requirements, including decreasing the maximum time lapse between inspections;

(B) to define precisely the factors to be considered and the methods used in rating the condition of bridges; and

(C) to establish a standard for timely processing data resulting from inspections under such standards;

(3) assess the need for greater State and local government authority for inspection of bridges;

(4) encourage the States to take the actions necessary fully to comply with the national bridge inspection standards relating to posting limits on bridges and closing bridges; and

(5) ensure that all Federal agencies maintaining bridges comply with the national bridge inspection standards.

(b)(1) No later than January 1, 1984, the Secretary shall prepare and, to the extent permitted by law, implement a plan of action designed to result in full compliance by the States and local governments with the national bridge inspection standards.

(2) In preparing the plan required by paragraph (1) of this subsection, the Secretary shall consider the imposition of penalties and other sanctions against the States and local governments not fully complying with such standards.

NATIONAL BRIDGE INVENTORY

SEC. 6. Not later than January 1, 1984, the Secretary shall—

(1) establish procedures to ensure the rapid completion and maintenance of accurate inventories of bridges under section 144 (b) and (c); and

(2) inventory all bridges maintained by Federal agencies.

PUBLIC INFORMATION

SEC. 7. The Secretary shall prepare a plan for a public information program with respect to the weight limits, closings, and hazards, if any, of each bridge. The Secretary shall include in such plan provisions for administration of such program by the States.

REPORT TO CONGRESS

SEC. 8. The Secretary shall prepare and transmit to the Congress, not later than July 15, 1984, a report on the administrative actions taken under the provisions of this Act and the results of such actions. Such report shall include—

(1) recommendations for legislative action as the Secretary considers necessary to ensure that—

(A) the bridges most in need of replacement and rehabilitation are always selected for funding under the highway bridge replacement and rehabilitation program;

(B) there is a fair and equitable distribution of such funding throughout each State; and

(C) the States fully comply with the national bridge inspection standards; and

(2) the Secretary's recommendations with respect to whether the Congress should increase the maximum per centum of apportioned funds which may be expended under section 144(g) for projects to replace or rehabilitate highway bridges located on public roads, other than on a Federal-aid system.

SUMMARY

The United States has more than 500,000 bridges, and slightly over 200,000—or almost 4 out of every 10 bridges—are deficient. The Federal Highway Administration currently estimates that it will cost $41.1 billion to rehabilitate or replace these bridges. (See p. 9.)

National bridge inventory data shows that about 98,000 bridges are structurally weak or unsound and must be closed, restricted to lighter vehicles, or immediately rehabilitated to prevent further deterioration and collapse. The other 102,000 deficient bridges are functionally obsolete because they are narrow, have inadequate underclearances, have insufficient load-carrying capacity, or are poorly aligned with the roadway and can no longer safely service today's traffic. In total, it is reported that about 120,000 bridges are or should be posted for lower weight limits; over 3,700 bridges are reported as closed to all traffic. (See pp. 5, 11, and 25.)

The December 1967 collapse of the Silver Bridge over the Ohio River between West Virginia and Ohio killed 46 people and focused national attention on bridge conditions. Shortly thereafter, the Congress established two major bridge safety programs: a program of periodic inspections to identify bridge conditions, maintenance needs, and safety problems and a program to provide Federal funds to the States specifically to help replace unsafe bridges. (See p. 1.)

GAO reviewed these programs at the request of Senator James Sasser of Tennessee and found that limited Federal bridge program funds are not always used on bridges most in need of attention. GAO also found that Federal agencies, States, and local governments are not fully complying with national standards for bridge inspection.

BETTER TARGETING OF FEDERAL BRIDGE FUNDS NEEDED

The Federal Government has become the major source of funds—particularly through the Federal bridge program—to replace or rehabilitate deficient bridges, and many State and local governments depend heavily on these funds. (See p. 25.) Bridge program funding authorizations have totaled $5 billion from the program's beginning in fiscal year 1972 through fiscal year 1982. Authorizations averaged about $120 million per year for the program's first 7 years and slightly over $1 billion for the last 4 years. (See p. 18.) Initially limited to bridges on the Federal-aid highway system, subsequent legislation in November 1978 expanded the programs to also include bridges off the Federal-aid system. (See p. 1.)

Under the bridge program, the Federal Government contributes up to 80 percent of replacement or rehabilitation costs, and State and/or local governments provide the rest. Some bridges are being replaced or rehabilitated under other Federal-aid programs and some are being replaced or rehabilitated solely with State and local funds. However, at current funding levels, it will take years to eliminate the deficient bridges already identified. Additional bridges will need replacing during this period, and continued inflation at the current rate would more than double the cost in 10 years. (See pp. 4 and 25.)

In view of the size of the bridge problem and the limited amount of funds available, it is essential that program funds be used for bridges most in need. However, GAO found that the Federal Highway Administration's project eligibility criteria do not concentrate on bridges in the worst condition and most in need;

Many worthy projects are funded, but bridges most in need are not always selected; and

Funds have been apportioned to the States based on incomplete and outdated needs data.

Most of the program funds are apportioned to the States. However, $200 million annually are to be used as discretionary funds by the Secretary of Transportation for bridges whose replacement or rehabilitation cost would be greater than $10 million or twice the respective States' fiscal year authorizations. (See pp. 4 and 26.) The Federal Highway Administration selects the bridges

for discretionary funding (subject to final approval by the Secretary of Transportation). The States select the bridges to be replaced or rehabilitated with the regular bridge program funds. (See pp. 41 and 42.)

Each bridge receives a sufficiency rating, which is the method used to evaluate the adequacy of a bridge to remain in service in its present condition. A rating of 100 would represent an entirely sufficient bridge—one that needs absolutely no work. A 0 rating would indicate an entirely insufficient or deficient bridge—one that has many safety problems and should be closed. The lower the rating, the higher the priority for replacement. (See pp. 6 and 42.)

The Federal Highway Administration's eligibility criteria are broad. The definition of a deficient bridge includes a wide variety of bridge inadequacies and conditions. Under the criteria, deficient bridges with sufficiency ratings of 80 or below on a scale of 0 to 100 are eligible. Those with ratings below 50 can be replaced or rehabilitated. Those with ratings of 50 through 80 generally can be rehabilitated only. (See pp. 42 and 60.)

The States selecting many bridges with low sufficiency ratings for Federal funding. In the 10 States that GAO examined project approval data, about 40 percent of the bridges selected for funding had ratings below 20. However, the States also are selecting some bridges with relatively high ratings. For the 10 States, 534, or about 21 percent, of the 2,544 bridges selected had ratings of 40 or above and many of these had ratings of 60 or above. (See p. 50.)

Federal Highway officials said that they encourage the States to select bridges with lower sufficiency ratings, but the States may select any eligible bridge and many factors, some unique to an individual State, enter into the selection process. (See p. 53.)

The Federal Highway Administration is selecting bridges for discretionary funding with relatively high sufficiency ratings when other eligible bridges have much lower ratings and are in much worse condition. The major reason is that bridges with legislative history are selected first. The Federal Highway Administration considers bridges to have legislative history if they are mentioned in congressional committee reports or the Congressional Record as candidates for discretionary funding. More and more bridges are receiving legislative history. (See pp. 41 and 59.)

Apportionments to the States have not been based on complete and current needs data which is available. For example, fiscal year 1982 apportionments will be based on 1978 data that does not include many bridges that are eligible for the program, such as those off the Federal-aid system. (See pp. 27 and 36.)

RECOMMENDATIONS

GAO is recommending that the Secretary of Transportation direct the Administrator of the Federal Highway Administration to:

Revise the bridge program's project eligibility criteria to concentrate on bridges in the worst condition and most in need of replacement or rehabilitation but still provide some flexibility for State and local governments.

Develop a formal selection process for discretionary projects to properly weigh factors such as sufficiency ratings, costs, and benefits. (See p. 61.)

GAO is also recommending that the Congress, in future bridge program authorizations, have the Secretary of Transportation use the latest available needs data, including bridge needs of the Federal-aid system, to apportion program funds. (See p. 37.)

See pp. 37 and 38 for additional recommendations.

BETTER COMPLIANCE WITH NATIONAL BRIDGE INSPECTION STANDARDS NEEDED

The major aspect of the National Bridge Inspection Program is that State and/or local governments maintain a bridge inventory and comply with the inspection standards. (See pp. 1, 3, and 87.)

GAO found that State and local governments have made progress since the program's start, but they are not fully complying with the standards. For example:

Some inspectors do not meet the minimum qualifications for training and experience.

Some State and local governments are not inspecting their bridges at least every 2 years as required by the standards, and some local governments are not inspecting their bridges at all.

The initial inventory and inspection of bridges, particularly bridges off the Federal-aid highway system, has not been completed. (See p. 83.)

Structurally weak bridges are not always being properly closed or posted for lower weight limits to protect against bridge collapses. Even if bridges are properly posted or closed, the postings and closing are often ignored by the public. Bridge weight limit enforcement is limited, and fines for violations are small and ineffective. (See p. 97.)

Federal agencies, such as the Bureau of Land Management, the Forest Service, and the National Park Service, own about 14,000 bridges, These agencies are not required to comply with the National Bridge Inspection Standards for most of their bridges, but they do have inspection programs. However, the agencies were not always complying with their own requirements, and some of the programs did not conform to the national standards. GAO beleives that the public should be able to expect the same degree of safety when traveling in national parks and on other Federal lands as the standards provide for on State and local government bridges. (See pp. 100 and 105.)

RECOMMENDATIONS

GAO is recommending that the Secretary of Transportation direct the Administrator of the Federal Highway Administration to assess the States' and local governments' compliance with the National Bridge Inspection Standards and develop a strategy for bringing about full compliance. (See pp. 83 and 97.)

GAO is also recommending that the Congress require Federal agencies that own bridges to comply with the National Bridge Inspection Standards. (See p. 106.)

Other recommendations are noted on pages 84 and 98.

AGENCY COMMENTS AND GAO'S EVALUATION

To expedite report issuance, Senator Sasser directed GAO to obtain only Federal Highway Administration's oral comments. Its officials told GAO that their comments do not necessarily represent those of the Secretary of Transportation.

Federal Highway Administration officials generally agreed with GAO's recommendation to use the latest needs data to allocate Federal bridge funds. The officials said that they will continue to encourage the States to select bridges in the lower range of sufficiency ratings. However, they also said that State and local officials need flexibility when selecting projects, and factors other than the sufficiency rating must be considered.

GAO also believes that selecting officials need flexibility. However, the bridges most in need of immediate attention are not always being selected. The bridge program, which is currently funded at slightly over $1 billion per year, cannot effectively be directed at all deficient bridges, which the Federal Highway Administration estimates would cost $41.1 billion.

Federal Highway Administration officials said that they have established an implementation plan and factors such as sufficiency ratings, costs, and benefits have been and will continue to be considered when selecting discretionary projects. They stated, however, that the program has received much congressional direction through the legislative history process.

The 1978 Surface Transportation Assistance Act gives the Secretary of Transportation broad discretion to select projects for discretionary funding. In GAO's opinion, it is the Secretary's responsibility to select the most worthy projects, and the current selection method does not ensure that this is done. (See pp. 38, 61, and 62.)

Federal Highway Administration officials did not indicate agreement or disagreement with GAO's recommendation concerning State and local government compliance with the National Bridge Inspection Standards. The officials commented on the items that GAO said should be considered during development of a strategy for bringing about full compliance. (See pp. 84, 85, and 98.)

Federal Highway Administration officials' comments on GAO's other recommendations are contained in the body of this report. (See pp. 38, 39, 40, 85, 86, 99, and 106.)●

By Mr. SASSER (for himself and Mr. PRYOR):

S. 1576. A bill to create a Federal, State, and local drug forfeiture fund; to the Committee on the Judiciary.

FEDERAL, STATE, AND LOCAL DRUG FORFEITURE FUND ACT OF 1983

● Mr. SASSER. Mr. President, on behalf of myself and the Senator from Arkansas, Mr. PRYOR, I am today reintroducing legislation to facilitate cooperation between Federal, State, and local law enforcement agencies in combating drug trafficking.

During the last 2 years in this country, 42,000 people have been murdered and 6 million homes have been burglarized, and law enforcement personnel are convinced that this surge in criminal activity is largely drug related. Drug trafficking is big business for organized crime. The estimate for the value of the illicit drug trade is $80 billion. That figure would make it the second largest corporation in the United States, behind Exxon and slightly ahead of Mobil.

The byproduct of this illegal industry is more violent crimes each year. In Tennessee, there were 19,019 violent crimes in 1981. These included 8,920 assaults, 7,916 robberies, and 448 murders. Other States fared no better. Georgia's violent crime total was 29,958. And Florida is experiencing a virtual crime epidemic due to in-

creased drug activity. In July 1982, in Cleveland, Tenn., Federal, State, and local law enforcement agents confiscated 1,200 pounds of pure cocaine worth nearly $400 million. Also seized were vehicles, weapons, and $450,000 in cash. This is the second largest cocaine seizure in U.S. history. Law enforcement officials believe the drugs were flown into Tennessee directly from Colombia.

In 1981 there was a similiar raid in Sevier County, Tenn., which dispelled all thoughts that the 1982 seizure was a fluke. This raid netted 600 pounds of pure cocaine with an estimated street value of $200 million. Officials say they only know about less than 1 percent of the illegal drugs coming into Tennessee and estimate that cocaine alone is a $500 million a year business in east Tennessee.

While drug enforcement is primarily a Federal responsibility, our State and local police are increasingly being drawn into the fight, for two reasons. First, many of the most successful drug seizures require close Federal-State cooperation. The work does not begin and end with the arrests. Months and months of groundwork are necessary—surveillance, checking of leads, and building up the record of evidence necessary to obtain a conviction. State and local law enforcement agents are an integral part of the efforts—efforts which require more and more of scarce resources.

In the seizure at Cleveland, Tenn., for instance, agents of both the Tennessee Bureau of Investigation and DEA had the major suspects under surveillance for a number of months. Knoxville's organized crime unit had also conducted surveillance operations and officers from Cleveland, Knoxville, and Bradley County were involved in the effort. Without the dedicated effort of State and local law enforcement personnel, the Federal agents would simply be swamped in the drug flow. This cooperation, however, costs the departments in time and manpower—resources that are increasingly in short supply in these times of budget restraint.

The second reason for the increasing involvement of State and local officials is that they are the ones left to cope with the rising crimewave that results from increasing drug traffic. They are the ones who must cope with the vicious thugs who make our people feel unsafe in their own homes and afraid to walk the streets at night. These local crimes are the kinds that touch most people's lives—muggings, robberies, thefts, and often murder. While much of their cause and solution lie beyond the resources of local law enforcement, their control is a local responsibility.

Because of the increasing State and local involvement in Federal drug enforcements and the increasing crime which they are called upon to deal with, I am today reintroducing the Federal, State, and Local Drug Forfeiture Fund Act. This legislation has five main parts:

First, proceeds from the liquidation of assets seized in drug enforcement efforts would be put into a special trust fund.

Second, 50 percent of the funds available in any one year would be earmarked for Federal drug enforcement, prevention, and education efforts.

Third, 30 percent of the total available money would be available to the States on a per capita basis for the same purposes.

Fourth, the remaining 20 percent would be discretionary funds under the control of the Administrator of the Drug Enforcement Administration. These would be available for particularly promising programs in States where sufficient funds were not available under a State's block grant allotment. This will compensate States which fare poorly under block grant formulas but which have a worthy program which should be funded.

Finally, in any drug operation in which there was significant State and local participation, the State would receive 20 percent of the proceeds from that particular operation, right off the top.

Mr. President, the bill I am reintroducing today is a result of extensive discussions with Tennessee officials, law enforcement personnel, and U.S. and State district attorneys. It is one approach of many that might be offered and it would help to compensate State and local agencies for their cooperation in what are often primarily Federal cases.

I want to stress that the money available for the trust fund would be available for drug abuse prevention and education programs as well as for enforcement purposes. While enforcement is important, we must remember that drug treatment and education programs can also be extremely valuable in educating our youth about the damage of drugs. This will help reduce the favorable image of drugs which drug dealers use as they prey on our young people. Consequently, this measure insures that drug abuse and education programs will receive their fair share of the available funds.

I intend to speak out further on this matter in the weeks ahead and draw the attention of my colleagues to this passing national problem.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1576

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Federal, State, and Local Drug Forfeiture Fund Act of 1983".

SEC. 2. (a) Congress finds that—

(1) the rising level of drug trafficking indicates a need for increasing the resources allocated to drug enforcement, treatment, and education;

(2) the proceeds from drug enforcement operations should be utilized in the effort against drug trafficking and drug abuse;

(3) State and local law enforcement agencies are frequently significantly involved in Federal drug enforcements;

(4) such State and local cooperation entails significant expense to such agencies; and

(5) the proceeds from Federal drug enforcement efforts should be shared with State and local agencies.

(b) The purpose of this Act is to provide that proceeds from Federal drug forfeitures, security forfeited by drug offenders jumping bail, and fines imposed on drug offenders are used for Federal, State, and local drug law enforcement, treatment, and education activities.

SEC. 3. Section 1963 of title 18 of the United States Code is amended—

(1) in subsection (a)—

(A) by striking out "and" immediately before "(2)"; and

(B) by striking out the period at the end and inserting in lieu thereof the following: ", and (3) in cases in which the racketeering activity consisted of any offense involving dealing in narcotic or other dangerous drugs, which is chargeable under State law or any offense involving the felonious manufacture, importation, receiving, concealment, buying, selling, or otherwise dealing in narcotic or other dangerous drugs, punishable under any law of the United States, any proceeds or profits derived from any interest, security, claim, or property or contractual right, described in clause (1) or (2) of this subsection.";

(2) in subsection (c), by striking out the period at the end and inserting in lieu thereof the following: ", except that the Attorney General shall provide for the use of any such property forfeited in cases in which the racketeering activity consisted of any offense involving dealing in narcotic or other dangerous drugs, which is chargeable under State law or any offense involving the felonious manufacture, importation, receiving, concealment, buying, selling, or otherwise dealing in narcotic or other dangerous drugs, punishable under any law of the United States, for Federal, State, and local drug law enforcement, treatment, and education activities as provided in section 511(h) of the Controlled Substances Act (Public Law 91-513; 21 U.S.C. 881(h))."; and

(3) by adding at the end the following new subsection:

"(d) If the racketeering activity consists of any offense involving dealing in narcotic or other dangerous drugs, which is chargeable under State law or any offense involving the felonious manufacture, importation, receiving, concealment, buying, selling, or otherwise dealing in narcotic or other dangerous drugs, punishable under any law of the United States, it shall be presumed that all assets or other property of the convicted person are subject to forfeiture under this section, unless such convicted person proves otherwise by the preponderance of the evidence.".

SEC. 4. (a) Section 408 of the Controlled Substances Act (Public Law 91-513; 21 U.S.C. 848) is amended—

(1) in subsection (a)(2)(A) by adding after the phrase "the profits obtained by him in such enterprise" the following: ", including any profits and proceeds, regardless of the form in which held, that are acquired, derived, used, or maintained, indirectly or directly, in connection with or as a result of a violation of paragraph (1)"; and

(2) in subsection (a)(2) by adding at the end thereof the following flush material: "Any property forfeited under this section shall be disposed of as provided in section 511(h) of the Controlled Substances Act (Public Law 91-513; 21 U.S.C. 881(h))."

(b) Subsection (e) of section 511 of the Controlled Substances Act (Public Law 91-513; 21 U.S.C. 881) is amended to read as follows:

"(e) Whenever property is forfeited under this title the Attorney General shall dispose of the property as provided in subsection (h)."

(c) Section 511 of such Act is further amended by adding at the end thereof the following:

"(h)(1) There is hereby appropriated, to remain available until expended, for each fiscal year beginning after the date of the enactment of this subsection a sum equal to the proceeds from the disposition and sale during the immediately preceding fiscal year of all property, not required to be destroyed by law or harmful to the public, forfeited in cases under (A) this subsection, (B) section 408 of this Act, and (C) section 1963 of title 18, United States Code, where such forfeited property relates to drug racketeering, to be used as provided in paragraph (2). In addition and notwithstanding any other provision of law, any money paid as a fine by an offender as punishment for any offense involving dealing in narcotic or other dangerous drugs, which is chargeable under Federal law or any offense involving the felonious manufacture, importation, receiving, concealment, buying, selling, or otherwise dealing in narcotic or other dangerous drugs, punishable under any law of the United States and any security forfeited for failure to appear for proceedings under chapter 207 of title 18, United States Code, in connection with such offenses, shall be available for use as provided in paragraph (2).

"(2) The fund created by paragraph (1) shall be administered by the Drug Enforcement Administration and shall be distributed on an annual basis as follows:

"(A) 50 per centum to be retained by the Drug Enforcement Administration to be used for Federal level drug law enforcement, treatment, and education activities;

"(B) 20 per centum to be retained by the Drug Enforcement Administration to be distributed under regulations of the Attorney General to specific State and local programs that demonstrate effectiveness in drug law enforcement, treatment, and education activities; and

"(C) 30 per centum to be distributed to the States on a per capita proportional basis to be used for State level drug law enforcement, treatment, and education activities.

"(3) Notwithstanding any other provision of this section, where a State participates in a drug seizure in a substantial manner, as determined by the Attorney General, such State shall be entitled to 20 per centum of the proceeds from the property forfeited as a part of the seizure to be paid out of the fund created under this subsection."●

By Mr. CHILES:

S. 1577. A bill to amend the Agricultural Adjustment Act, as amended and reenacted by the Agricultural Marketing Agreement Act of 1937, to subject imported tomatoes to the same pack of container restrictions as are applicable to domestic tomatoes; to the Committee on Agriculture, Nutrition, and Forestry.

RESTRICTIONS ON IMPORTED TOMATOES

● Mr. CHILES. Mr. President, I am introducing today legislation to amend section 8(e) of the Agricultural Marketing Act of 1933, as reenacted and amended by the Agricultural Marketing Agreement Act of 1937, to require that imported tomatoes conform with pack-of-container standards imposed on domestic tomatoes under marketing orders.

This legislation seeks to clarify section 8(e) with respect to the requirements imposed under marketing orders on the pack of the container in which tomatoes are shipped. This amendment is entirely consistent with the original intent of section 8(e) and is offered only to revise an interpretation of that section which the U.S. Department of Agriculture has adopted. The resolution of the current disagreement between domestic producers and the Department on this issue is important to an orderly marketing situation for tomatoes and to the ability of domestic producers to effectively compete with imports.

The original purpose of section 8(e) of the act was to ensure that all restrictions imposed by marketing orders on the handling of domestically grown agricultural commodities should apply equally to imported commodities. Section 8(e) was intended to ensure that market regulations would have equal benefit to both domestic and foreign producers. It is in no way aimed at excluding or curtailing imports. Rather, its aim is to put imports and domestic produce on an equal footing with respect to marketing orders. In the case of tomatoes, the Senate report accompanying the act states—

> Imports of tomatoes . . . would be prohibited if they did not comply with grade, size, quality, and maturity provisions of all marketing orders applicable to the same commodities produced in the United States.

By marketing order, domestic producers of fresh tomatoes are prohibited from mixing different grades of tomatoes in a shipping container, or mixing different sizes of tomatoes. Since tomatoes from the standpoint of pricing and to the orderly marketing of fresh tomatoes.

However, the Department of Agricultural maintains that the prohibition against the mixing of grades of sizes within a container is not a grade or size regulation, but a pack regulation. The Department further maintains that pack regulations cannot be imposed on imports under section 8(e) of the Agricultural Marketing Agreement Act.

As a result of the Department's interpretation, foreign shippers are permitted to ship different grades and sizes of tomatoes in a single container, while U.S. producers must comply with the pack regulation. A substantial volume of the tomatoes sold in the United States are foreign grown. Because pack restrictions are not applied to these tomatoes, the buyer does not know what he is getting and the domestic producer is placed at a disadvantage.

I am convinced that the solution to this problem lies in clarifying amendment to section 8(e), which would apply pack regulations to imports.

Such a clarification would benefit the grower, shipper, importer, and, ultimately, the consumer of tomatoes. Enactment of this legislation would incur no additional cost to the Government. It would not create hardship for other States or for foreign producers, and would not create a trade barrier. It would standardize the sizes and grades of tomatoes offered for sale in the United States, and equalize the competition between domestic and foreign producers.

Mr. President, I ask unanimous consent that the text of the bill I am introducing today be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1577

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 8(e) of the Agricultural Adjustment Act, as amended and reenacted by the Agricultural Marketing Agreement Act of 1937 (7 U.S.C. 608e-1), is amended—

(1) in the first sentence—

(A) by inserting ", or regulating the pack of any container of tomatoes," after "eggplants produced in the United States"; and

(B) by striking out "and maturity" each place it appears and inserting "maturity, and, in the case of tomatoes, pack of container"; and

(2) by inserting "and, in the case of imported tomatoes, such restrictions on the pack of any container," after "classifications" in the fourth sentence.●

By Mr. THURMOND (for himself, Mr. DECONCINI, Mr. DOMENICI, Mr. HATCH, Mr. HEFLIN, Mr. HELMS, Mr. LAXALT, Mr. PRYOR, and Mr. STEVENS):

S. 1578. A bill to clarify the application of the Federal antitrust laws to local governments; to the Committee on the Judiciary.

LOCAL GOVERNMENT ANTITRUST ACT OF 1983

Mr. THURMOND. Mr. President, on behalf of myself and my distinguished colleagues, the Senator from Arizona (Mr. DECONCINI), the Senator from New Mexico (Mr. DOMENICI), the Senator from Utah (Mr. HATCH), the Sena-

tor from Alabama (Mr. HEFLIN), the Senator from North Carolina (Mr. HELMS), the Senator from Nevada (Mr. LAXALT), the Senator from Arkansas (Mr. PRYOR), and the Senator from Alaska (Mr. STEVENS), I am pleased to introduce today the Local Government Antitrust Act of 1983. This legislation is designed to clarify the application of our Federal antitrust laws to conduct by local units of government, and to private conduct authorized by them.

In *Parker* v. *Brown*, 317 U.S. 341 (1943), the Supreme Court held that the Sherman Act "must be taken to be a prohibition of individual and not State action." Thus, the Court found that where a restraint of competition is created by the State and amounts to an act of government, the Sherman Act does not reach it.

Until relatively recently, most antitrust academics and practitioners alike assumed that the State action doctrine applied not only to States, but local units of governments as well. However, in *City of Lafayette, La.* v. *Louisiana Power & Light Co.*, 435 U.S. 389 (1978), the Supreme Court held that Parker immunity for local governments was not automatic, but rather must be derived from the State, with the local government entity acting "pursuant to State policy to displace competition with regulation or monopoly public service." Last year, in *Community Communications Co., Inc.* v. *City of Boulder, Colo.*, 455 U.S. 40 (1982), the Court found that a State's grant of home-rule powers to a municipality was insufficient authorization by the State to cloak the municipality in State action immunity.

While the Boulder majority opinion suggested that this decision "did not threaten the legitimate exercise of governmental power," (quoting Lafayette) the dissent concluded that the Court's action would "impede, if not paralyze, local governments' efforts to enact ordinances and regulations aimed at protecting health, safety, and welfare * * *"

During the 97th Congress, the Committee on the Judiciary conducted hearings on the implications of Boulder and Lafayette. The policy question highlighted by these hearings is clear: Are there sufficient and compelling reasons to treat the legitimate activities of local government differently from those of State government under the antitrust laws? Within reasonable limitations, I believe the answer to this question is no.

Consequently, the legislation we introduce today seeks to modify Boulder and Lafayette. Let me emphasize that this legislation does not automatically extend protection from the antitrust laws to local governments. Rather, local governments are given protection from the antitrust laws only to the extent that State government entities would be protected for similar activity. In addition, local governments must clear two more hurdles: the activity in question, first, must otherwise be valid under State law; and second, must not involve the sale of goods or services by the local government in competition with private persons.

Mr. President, I believe this is a reasonable approach to resolving the questions presented by Boulder and Lafayette. The legislation balances the need for local governments to go about their daily functions without the paralyzing fear of antitrust lawsuits, with the need to preserve the integrity of our Federal antitrust laws. The Committee on the Judiciary will begin hearings on this legislation as soon as practicable, and I look forward to the participation of all interested parties.

Mr. President, I request unanimous consent that the entire text of this bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Local Government Antitrust Act of 1983".

SEC. 2. The Federal antitrust laws shall not apply to any law or other action of, or official action directed by, a city, village, town, township, county, or other general function unit of local government in the exercise of its regulatory powers, including but not limited to zoning, franchising, licensing, and the establishment of monopoly public services, but excluding any activity involving the sale of goods or services by the unit of local government in competition with private persons, where such law or action is valid under state law, except to the extent that the Federal antitrust laws would apply to a similar law or action of, or official action directed by, a State. For purposes of this section, the term "Federal antitrust laws" means the antitrust laws, as such term is defined in the first section of the Clayton Act (15 U.S.C. 12), and section 5 of the Federal Trade Commission Act (15 U.S.C. 45).

By Mr. HEINZ:

S. 1580. A bill to provide awards to local educational agencies for individual school implementation of the recommendations of a national study on education, and for other purposes; to the Committee on Labor and Human Resources.

EXCELLENCE IN EDUCATION ACT

Mr. HEINZ. Mr. President, today I introduce the Excellence in Education Act of 1983. I am pleased to be joined by my good friend, Congressman BILL GOODLING, the ranking member of the House Subcommittee on Elementary and Secondary and Vocational Education, who is introducing this same bill in the House of Representatives today.

What I have in mind, Mr. President, is simply to recognize and reward those school districts across America that are working to eliminate excessive electives, like bachelor living, and toughen up high school graduation requirements; those schools that invite parents and community business leaders to be volunteer tutors in math, science, and reading; those principals that stop students from wandering into class 10 minutes late and that inspire all of their teachers and students alike to excel; those teachers and departments that incorporate new technologies into the curriculum and demand more homework; and those students who are striving to achieve excellence.

And, Mr. President, let me remind my colleagues that there is good news out there on educational achievement. Earlier this month, the Pittsburgh public schools reported that the 1983 test scores are up dramatically from a year ago in mathematics, language, and reading. I congratulate those students, and their parents and teachers, as well as the school board, Superintendent Richard Wallace, and his administrators for the gains that have been achieved.

The Excellence in Education Act of 1983 would build on just such local efforts. It would authorize the Secretary of Education to award grants of up to $40,000 to 1,500 schools across America over the next 3 years. The schools would be selected on a competitive basis by local school districts, chief State school officers and the Secretary of Education.

The Secretary will make the awards to schools that demonstrate a commitment to pursue excellence. Schools with the concurrence of district leadership will be authorized to use the funds to implement recommendations of the recent reports for improving educational standards and instruction, such as:

To modernize and improve secondary school curricula;

To eliminate excessive electives and to increase graduation requirements in the basic subjects;

To implement attendance policies with clear sanctions to reduce student absenteeism and tardiness;

To experiment with the longer schoolday or longer school year;

To provide incentives to teachers, teams of teachers and teaching departments for outstanding performance, including, one, financial awards and two, administrative relief such as the removal of paperwork and extracurricular duties; and

To demonstrate new and promising models of school-community relationships, and business-education partnerships including the use of nonschool personnel and community volunteers to alleviate shortages in areas of instruction such as math and science education.

The bill is unique among Federal education programs because rather than targeting specific curriculum

areas or specific groups of children, it is designed to allow local educators to fashion their own plans for improving the total school environment; an objective supported by recent research on effective schools.

The small grant approach is one being pursued in Pittsburgh, San Francisco, and other urban areas by local private sector education funds and by the Ford Foundation. Typical of this approach is the recent announcement by the Washington Post of annual awards of $2,000 to outstanding teachers and a $25,000 sum for school systems for special projects.

To encourage further public/private partnerships in public education, the legislation sets aside 20 percent of the award money for schools that match Federal funds with private sector contributions.

Mr. President, I applaud our current Secretary of Education, the Honorable Terrel H. Bell, and the administration for establishing the National Commission on Excellence in Education and for giving its findings such high visibility. The Commission's report, "A Nation at Risk," is a thoughtful, critique of this country's educational apparatus. It is a sobering analysis, one that merits all the attention it is getting. Not since the late 1950's, when the Russian sputnik shattered our complacency, have we focused so extensively on the status of our educational product and its importance to the future of our Nation.

The Commission's report and subsequent reports by the Twentieth Century Fund and the National Task Force on Education for Economic Growth have focused the Nation's attention on American education. The Commission's report states:

> In the educational foundations of our society are presently being eroded by a rising tide of mediocrity that threatens our future as a Nation and a people.

The reports and their recommendations ignited in the Nation's Capitol a firestorm of political rhetoric and heated debate about who is to blame and what should be done to respond to the crisis of mediocrity.

Fortunately for all of us there is no disagreement on the largest point—that our educational system is in trouble, needs assistance, and must be fixed. A consensus is building across the country that education is central among all the issues we face in the 1980's. It will have more affect on our economic growth, our social well-being and our national defense of the 21st century than anything else we do in the next several years.

Mr. President, education must be at the top of this Nation's political agenda. I concur with the National Commission when it states emphatically that:

> The Federal Government has the primary responsibility to identify the national interest in education. . . . It must provide the national leadership to ensure that the nation's public and private resources are marshaled to address the issues discussed in this report.

I believe, Mr. President, that we in Congress must take the first step to ignite the fire for excellence in local schools across this country. That is my intent.

As an early and active supporter of the establishment of the U.S. Department of Education, I felt that it had two critical functions—to secure the Federal responsibility to assure equal educational opportunity for the disadvantaged; and to identify and define the national interest in education and provide visible leadership. The Commission identified the national risk posed by inattention to academic excellence. It defined excellence in the following terms: For individual learners, it means performing on the boundary of individual ability; for schools, it means setting high expectations for all learners and assisting all students to work to the maximum of their capabilities; and for a society, it means setting educational policies and providing the resources that allow each learner and each school to achieve their educational goals.

Mr. President, I am hopeful that Congress will enact this legislation quickly. By doing so it will give the U.S. Department of Education the opportunity to fulfill its mandate to exercise national leadership and it will allow the Secretary of Education to maintain the momentum he and the President have already created.

I would emphasize for all my colleagues that this bill with its authorization of $50 million for 3 years will not provide the fuel for achieving and maintaining excellence in every public school in America. This bill will not put a chicken in every pot, or a $5,000 check in every teacher's palm. It does not even attempt to do that because I do not believe that setting teacher's salaries is the role of the U.S. Department of Education. Indeed, I shudder to think of the ramifications of such a level of Federal fiscal involvement in America's public school. The Federal Government has neither the right nor the wherewithal to set salaries and standards or to establish broad educational policy. But I repeat, it must exercise national leadership.

As Haynes Johnson argued in a recent editorial in the Washington Post of June 19, 1983, we have to get "back to basics, a basic American idea of merit, of a national commitment to public education, backed by a national determination to do whatever is necessary, including the expenditure of whatever it takes in public funds to insure . . . that no person's child can possibly want the means of a good education." The Excellence in Education Act is a modest part of the solution. It will demonstrate congressional commitment to igniting the fire for excellence in local schools across America.

Mr. President, I ask unanimous consent that the Excellence in Education Act of 1983 appear in full at this point in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1580

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Excellence in Education Act".

STATEMENT OF PURPOSE

SEC. 2. It is the purpose of this Act to make awards to local educational agencies, after a competitive selection process, in order to carry out programs of excellence in individual schools of such agencies designed to achieve excellence in education, and conducted with the participation of school principals, school teachers, parents, and business concerns in the locality.

DEFINITIONS

SEC. 3. For the purpose of this Act—

(1) The term "elementary school" has the same meaning given that term under section 198(a)(7) of the Elementary and Secondary Education Act of 1965.

(2) The term "local educational agency" has the same meaning given that term under section 198(a)(10) of the Elementary and Secondary Education Act of 1965.

(3) The term "secondary school" has the same meaning given that term under section 198(a)(7) of the Elementary and Secondary Education Act of 1965.

(4) The term "Secretary" means the Secretary of Education.

(5) The term "State" means each of the several States, the District of Columbia, the Commonwealth of Puerto Rico, Guam, American Samoa, the Virgin Islands, the Northern Mariana Islands, and the Trust Territory of the Pacific Islands.

(6) The term "State educational agency" has the meaning given that term under section 198 (a) (17) of the Elementary and Secondary Education Act of 1965.

SCHOOL EXCELLENCE AWARDS AUTHORIZED

SEC. 4 (a) The Secretary is authorized, in accordance with the provisions of this Act, to make awards to local educational agencies for school excellence programs which are consistent with the purpose of this Act.

(b)(1) There are authorized to be appropriated $16,000,000 for the fiscal year 1984, $17,000,000 for the fiscal year 1985, and $17,000,000 for the fiscal year 1986 to carry out the provisions of this Act.

(2) From the amount appropriated in each fiscal year, the Secretary shall reserve $3,000,000 in each fiscal year to carry out the provisions of section 7.

(3) From the amount appropriated in each fiscal year, the Secretary shall reserve $1,000,000 in each fiscal year to carry out the provisions of section 8.

SELECTION OF SCHOOLS FOR AWARDS

SEC. 5. (a)(1) The Secretary is authorized to establish, in accordance with the provisions of this section, criteria for the selection of schools to receive awards under this Act. Each local educational agency desiring to participate in the awards program authorized by this Act shall submit a proposal

nominating each specific school of that agency for school improvement activities designed to carry out the purpose of this Act. Each such submission shall be made to the chief state school officer of the State in which the local educational agency is located.

(2) The criteria required by paragraph (1) of this section shall include standards for each local educational agency to nominate schools of that agency—

(A) which have the potential to experiment with standards of quality; and

(B) which show promise of demonstrating that the school will carry out well-planned, creative, or innovative activities designed to carry out the purposes of this Act in a successful manner.

(3) Each proposal submitted under subsection (a) shall contain—

(A) a description of the activities which will be conducted in the school nominated,

(B) assurances that the school to be nominated will carry out the activities so described, and

(C) such other information as may be necessary to carry out paragraph (2) of subsection (a).

(b)(1)(A) The chief state school officer of each State shall in each fiscal year from the nominations made pursuant to subsection (b) select 25 schools for submission to the Secretary.

(B) In the case of the Commonwealth of Puerto Rico, Guam, American Samoa, the Virgin Islands, the Northern Mariana Islands, and the Trust Territory of the Pacific Islands, the chief educational officer of such jurisdiction shall nominate 5 schools in accordance with this subsection.

(2) In selecting schools from proposed nominations submitted under subsection (a), the chief state school officer shall assure a fair and equitable distribution of schools within the State, after considering—

(A) all categories of elementary and secondary schools within the State, including elementary schools, junior high schools, secondary schools, vocational-technical schools, or any combination of two or more of the schools;

(B) socioeconomic conditions in the State;

(C) geographic distribution within the State;

(D) school size;

(E) the size and location of the community in which the school is located;

(F) the local governmental arrangements between the government and the local educational agency making the nomination; and

(G) such other relevant factors as the Secretary may prescribe.

(3) Each State shall submit to the Secretary the school nominations made in accordance with subsection (b) of this section. Each such submission may include such additional information as the chief state school officer (the chief educational officer as prescribed in subsection (c)(1)(B)), and the local educational agency concerned deem appropriate.

(c)(1) The Secretary shall select not more than 500 schools from among the nominations submitted pursuant to subsection (c) of this section. The selection under this subsection shall be made by the Secretary after an impartial review panel has considered each submission. The review and selection shall be based upon the factors described in subsection (c)(2) and in accordance with uniform criteria developed by the Secretary.

(2) In making the selections under paragraph (1), the Secretary shall give priority to proposals which include provisions for—

(A) modernization and improvement of secondary school curricula;

(B) the elimination of excessive electives and the establishment of increased graduation requirements in basic subjects:

(C) attendance policies with clear sanctions to reduce student absenteeism and tardiness;

(D) demonstrations involving alternatives to the conventional school day and school term;

(E) experimentation providing incentives to teachers, and teams of teachers for outstanding performance, including financial awards and administrative relief such as the removal of paper work and extra duties;

(F) demonstrations involving creative combinations of independent study, team teaching, laboratory experience, and technology utilization; or

(G) new and promising models of school-community and school-to-school relationships including the use of nonschool personnel to alleviate shortages in areas such as the current shortage in math and science teachers, as well as other partnerships between business and education, including the use of equipment.

AMOUNT AND CONDITIONS OF AWARDS

SEC. 6. (a)(1) A school award made to a local educational agency pursuant to this Act may not exceed $25,000 in any fiscal year or a total of $40,000.

(2) The amount of each individual school award made pursuant to this Act shall be determined by the Secretary based upon the size of the school, the number of students enrolled in the school, and the number of teachers teaching in the school.

(b) Awards made under this Act may not be made for more than two school years. No individual school may be eligible for any additional award under this Act.

SPECIAL SCHOOL AWARDS

SEC. 7. (a) From the amount reserved under section 4(b)(2) in any fiscal year, the Secretary is authorized to make awards to schools nominated in accordance with the provisions of section 5 to pay the Federal share of the activities described in the proposal if the local educational agency provides further assurances that funds from the private sector will be contributed for carrying out the activities for which assistance is sought.

(b) For purposes of this section, the Federal share for each fiscal year shall be not less than 67⅔ per centum nor more than 90 per centum. The Secretary shall set the Federal share for categories of school awards based upon uniform criteria established by the Secretary.

RESEARCH, EVALUATION, DISSEMINATION, AND MONITORING ACTIVITIES

SEC. 8. (a) From the amount set aside under section 4(b)(3), the Secretary shall conduct research, evaluation, and dissemination activities to assure that exemplary projects and practices which are developed with assistance provided under this Act are made available to local educational agencies throughout the United States.

(b) The Secretary shall use such amount of the funds reserved pursuant to section 4(b)(3) as is necessary to carry out the provisions of this subsection. The Secretary shall establish an independent panel to monitor the success of the programs assisted by this Act in achieving the national objectives in improving instruction and the achievement of the students.

By Mr. DOLE (for himself, Mrs. KASSEBAUM, Mr. JOHNSTON, Mr. LONG, Mr. ZORINSKY, Mr. NICKLES, and Mr. BOREN):

S. 1581. A bill granting the consent of Congress to the Central Interstate Low-Level Radioactive Waste Compact; to the Committee on the Judiciary.

CENTRAL INTERSTATE LOW-LEVEL RADIOACTIVE WASTE COMPACT

● Mr. DOLE. Mr. President, I would like to take this opportunity to introduce legislation which will enable the Central States to enter into a regional compact for the more efficient management of their low-level nuclear waste. This bill seeks to secure congressional consent for the Central Interstate Low-Level Radioactive Waste Compact, an agreement already approved by the State legislatures of Kansas, Oklahoma, Nebraska, Louisiana, and Arkansas. This compact was formulated in response to the Low-Level Radioactive Waste Policy Act passed by Congress in 1980, and requires the formal approval of Congress for its implementation. I urge my colleagues to support this legislation.

Low-level waste is commonly defined as any radioactive substance which is not classified as high-level waste and is generally confined to materials that have become contaminated with radioactivity at commercial power reactors, hospitals, research institutions, and industrial sites. Samples of low-level waste include paper towels, gloves, clothes, animal carcasses, liquids, and sludges. This waste does not incorporate spent reactor fuel, waste generated by reprocessing spent fuel, or waste elements heavier than uranium.

Originally, low-level waste produced by the States was deposited at three waste treatment sites located in Nevada, Washington, and South Carolina. As the volume of low-level waste increased nationwide, the ability of these sites to process and monitor this waste was severely diminished, creating potentially dangerous operating conditions and causing several States to express concern over the managment procedures and safety standards employed at these overburdened waste facilities. When the Nevada and Washington sites closed in 1979, it became apparent that an alternative approach to the disposal of low-level waste was urgently needed.

Congress responded by passing the Low-Level Radioactive Policy Act of 1980. This act directed individual States to assume complete responsibility for the treatment and disposal of low-level nuclear waste products generated within their borders and encouraged the States to join a regional compact to facilitate the economical and efficient management of these ra-

dioactive materials, subject to congressional approval.

There are two significant advantages with pursuing the compact approach to low-level waste management. The first involves financial considerations. It is costly for States, especially those which generate small amounts of this waste, to develop instate facilities that will have to be monitored for a minimum of 100 years. The compact enjoins party States to share the costs involved with maintaining a regional treatment facility. Second, the compact grants the States more autonomy in handling their low-level waste disposal problem by allowing party States to ban the importation of waste generated outside the region.

The congressional mandate only stipulates that States must act before January 1, 1986. Each State retained the option, therefore, of rejecting the compact concept in favor of developing an instate waste management facility or ceasing generation of its waste. However, since it would be difficult, if not impossible, to halt the production of this waste, and, recognizing the high costs involved with constructing and maintaining individual State facilities for storing the radioactive waste, the regional compact has become the preferred option.

The central interstate compact is not the only cooperative agreement of this kind. The Northwest, Southeast, and Rocky Mountain States have or are in the process of finalizing similar compact agreements for the treatment of low-level waste. Last January, the Northwest conference States presented their ratified compact to the Congress for approval, and it is expected that the Southeast and Rocky Mountain regions will follow suit shortly.

I would like to take a moment to trace the developmental stages of the Central Interstate Low-Level Radioactive Waste Compact. After Congress passed the Low-Level Policy Act, Kansas and Oklahoma initiated discussions among interested States in the Central region to explore the feasibility of entering into a cooperative agreement for the expeditious processing of low-level waste. The State conferees agreed that the compact approach would be the most desirable waste management method and established a set of preliminary guidelines for staging its planning and development. In July 1981, State representatives from Arkansas, Kansas, Iowa, Louisiana, Missouri, Nebraska, New Mexico, Oklahoma, and Texas began drafting the statutory language delineating the terms of the Central Interstate Compact.

This compact represents a cooperative effort to provide for a regional facility with sufficient capacity to manage all radioactive waste generated within the region. Each party State would have access to this facility, provided that the State deposits its waste in compliance with the terms of the compact and accepts responsibility for the packaging, containment, and transportation of the waste materials. Any State which fails to uphold its obligations would be subject to having its privileges suspended or its membership revoked.

Mr. President, the Central States have demonstrated their willingness to compact for the coordinated management of low-level nuclear waste. However, before the States can take active steps to implement this newly developed management system, the Congress must grant its consent to the compact. It is our responsibility to act now to permit the States to pursue the course which they have charted for themselves, and in light of the 1986 deadline set by Congress, I would urge my colleagues to give expenditures consideration to and support for this legislation.●

By Mr. GORTON (for himself, Mr. METZENBAUM, Mr. PERCY, Mr. MOYNIHAN, Mr. PROXMIRE, Mr. KASTEN, Mr. DOMENICI, and Mr. BOSCHWITZ):

S. 1582. A bill to amend the Congressional Budget Act of 1974 to establish procedures for setting targets and ceilings in the congressional budget process for direct loan authority and loan guarantee authority, and for other purposes; pursuant to the order of August 4, 1977, referred jointly to the Committee on the Budget and the Committee on Governmental Affairs.

FEDERAL CREDIT CONTROL ACT OF 1983

Mr. GORTON. Mr. President, Senator METZENBAUM and I, along with Senators PERCY, MOYNIHAN, KASTEN, DOMENICI, BOSCHWITZ, and PROXMIRE are introducing today the Federal Credit Control Act of 1983. The bill would integrate control of Federal credit activity into the congressional budget process and institute impoundment control procedures for direct loan and loan guarantee authority.

One of the purposes of the Congressional Budget and Impoundment Control Act is to establish national budget priorities. To achieve this purpose, the Budget Act specifies the information on Federal spending and revenues to be included in the President's budget and congressional budget resolutions. Congress is also required to determine aggregate levels of spending and revenues.

Since the formation of the congressional budget process in the mid-1970's, it has become clear that the information contained in the President's budget and in the congressional budget resolutions does not portray adequately the level of Government financial activity. A vast array of Federal direct loan and loan guarantee programs are not fully accounted for, or do not appear at all, in the budget's spending totals.

Further, congressional budget resolutions and current impoundment control procedures do not control Federal credit activities. The Budget Act does not require the Congress to determine aggregate levels of Federal direct and guaranteed lending or the distribution of such activities among the functions of the budget. The Impoundment Control Act does not require congressional review and disposition of Presidential actions to impound direct loan or loan guarantee authority provided by law.

The Federal Credit Control Act would implement the recommendations for the temporary Subcommittee on Federal Credit established by the Senate Budget Committee during the 97th Congress. The temporary subcommittee, which I chaired and whose ranking minority member was Senator METZENBAUM, held hearings on the issues of credit budget information and control and made a detailed report in December of last year. The subcommittee followed upon the work done in the 96th Congress by a special Subcommittee on Control of Federal Credit, also established by the Budget Committee, which Senator METZENBAUM chaired.

Testimony presented to the temporary subcommittee indicated that the volume of Federal credit activity has increased tremendously in the last 10 years. By the end of fiscal year 1984, Federal direct loans outstanding will have nearly quadrupled, rising from $61 billion in 1974 to over $225 billion. Federal guaranteed loans outstanding will have more than doubled, increasing from $180 billion to over $450 billion.

The total effect of this level of activity in Federal credit programs on the Nation's financial markets is one that has been debated considerably. Federal participation in the U.S. credit markets in 1982 totaled over 40 percent of all funds raised. Many believe that as a result Federal credit programs exert upward pressure on interest rates which then crowds out private borrowers who are not assisted by the Government.

The temporary subcommittee concluded that Federal direct loan and loan guarantee programs are too significant a policy tool and have too large an impact on particular private borrowers and, in the aggregate, on the credit markets as a whole, to be excluded any longer from the congressional budget process. The bill we are introducing today would enable the Congress to control the overall level of Federal direct and guaranteed lending and to review Presidential proposals to impound direct loan and loan guarantee authority, in a manner consistent with the control over spending now

provided by the Congressional Budget and Impoundment Control Act.

Consistent with the recommendations of the temporary subcommittee, the Federal Credit Control Act utilizes and refines the credit budget which Presidents Carter and Reagan included in their budget submissions for fiscal years 1981 through 1984. The bill incorporates portions of similar legislation introduced in recent years by Senators PERCY, LEVIN, and MOYNIHAN, and Representatives MINETA and BETHUNE.

This legislation also completes S. 711, the Truth-In-Budgeting Act of 1983, which Senator PROXMIRE has introduced and Senator MOYNIHAN and I have cosponsored. S. 711 would institute proper budgetary treatment of agency credit transactions with the Off-Budget Federal Financing Bank (FFB). This budgetary reform would bring a large portion of off-budget spending into the budget, would simplify the credit budget, and, in combination with the legislation we are introducing today, would increase greatly congressional control over Federal spending and credit activities.

One further point, Mr. President, last week on July 23, the U.S. Supreme Court ruled in Immigration and Naturalization Service against Chada that the legislative veto in its present form was unconstitutional. Part of the bill we are introducing today includes sections relating to the impoundment provision of the Budget Act which are likely to be subject to the Chada decision. Recognizing this possibility, we would hope that upon examination of the credit bill by the Budget Committee, adjustments can be made in the bill to reflect the Supreme Court decisions.

I would submit for the record a summary of the provisions of the bill we are introducing and an explanation of the major differences between the measure and similar Senate bills introduced in the 98th Congress. I would also submit the report of the temporary Subcommittee on Federal Credit of the Senate Committee on the Budget and ask that it be printed in the RECORD as well.

In closing, let me say again that it is our view that enactment of the Federal Credit Control Act of 1983 is necessary for the Congress to carry out the purpose of the Congressional Budget Act to establish national budget priorities. We would hope that we can see the passage of this measure in the 98th Congress.

Mr. MOYNIHAN. Mr. President, this Congress has spent a significant amount of time during the past decade debating spending priorities in the Federal budget, and frequently, the importance and frailties of the budget process itself. Yet while we have become well informed about such budgetary issues as the relative proportion of projected deficits as a share of GNP, and the rate of growth of Federal outlays, the fastest growing part of the Federal budget has been all but ignored. This is the off-budget use of Government resources, meaning direct loans and loan guarantees. While on-budget spending has doubled in the last decade, guaranteed loans and direct loans have grown more than fourfold.

Studies by the Congressional Budget Office, the Office of Management and Budget, as well as numerous outside research and academic institutions, leave little doubt that Federal direct loans and loan guarantees have become important means of providing Government services. It is clear that these Federal credit instruments can be powerful mechanisms for allocating credit to particular uses. But as with other Government programs, Federal credit programs represent the use of scarce resources. This occurs because the total volume of credit in the economy is limited by, among other factors, Federal monetary policy, the level of interest rates and supply of savings.

The credit budget approved by both houses of Congress last week as part of the first budget resolution for fiscal year 1984 constitutes the highest Federal loan level yet contemplated by either the executive or legislative branches. The total credit budget in the fiscal year 1984 resolution is $154.6 billion. Yet it received virtually no attention—due largely to the absense of a formal credit budget framework. The credit budget targets in the budget resolution are only advisory, and therefore provide no procedural force.

This state of affairs has had a number of unfortunate consequences. As the use of these credit resources has not been subjected to adequate congressional scrutiny, it has been possible for some groups to benefit tremendously from their use, while other, equally deserving groups, have not realized that they have been left out. For example, off-budget programs that serve primarily rural and agricultural interests have grown nearly 10-fold in the last decade, while on-budget programs in the community development area, which largely serve urban areas, have grown at a rate that is less than one tenth as great.

I am very pleased to join with Senator GORTON and my fellow cosponsors in sponsoring the Credit Budget Reform Act of 1983. This legislation developed from Senator GORTON's work on the Budget Committee's task force on Federal credit. It is an important bill for many reasons.

First, we will not be able to begin the process of devising Federal credit policies without adequate information available in a recognized credit budget framework. Although the administration has been publishing credit budget information, and although the Congress has obligingly set advisory targets, we have not created a formal structure within which to work. This formal structure is critical: It will provide a standardized measure of alternative volumes and types of credit resources, for it is not possible to do anything about a problem in Government until there is some agreement on how to measure it. We consider this legislation at the very moment the administration is contemplating a decrease in its data collection efforts for the credit budget. This further emphasizes our need for a strong credit budget, and for congressionally specified reporting requirements.

Second, the bill provides definitions for direct loan authority and guaranteed loan authority. The credit budget to date has been confusing to many and readily accessible to only a few in Congress. Policy can be shaped only if the terms are understood.

Third, the bill includes language that prohibits the administration from impounding loan guarantees. Early in fiscal year 1982, the Reagan administration announced a program to unilaterally reduce new Federal loan guarantee commitments by $20.3 billion, thus reducing guarantee commitments in 14 agencies. These were congressionally authorized programs, reduced without any congressional involvement. Congress should not accept unilateral administrative reductions in loan guarantee authority.

This legislation has grown from over 2 years of hearings and analysis, ably led by Senator GORTON. It includes an important set of recommendations for budgetary reform.

Mr. METZENBAUM. Mr. President, 4 years ago I initiated the first Special Subcommittee on Federal Credit under the Senate Budget Committee in an effort to get a handle on the tremendous surge in off-budget credit activities by various agencies of the Federal Government. Today, after numerous hearings and a truly bipartisan effort, I am glad to join with my colleague from Washington, Mr. GORTON, in introducing legislation that I believe will go far toward accomplishing that goal.

The steep growth in Federal credit borrowing—in the form of direct loans, loan guarantees, loans by off-budget agencies and by Government-backed agencies—has become a major problem. It has distorted accurate Federal budgeting and has extended Federal intervention in the private credit markets.

During the past few months, Congress has agonized over how to control the rising on-budget Federal deficits. But little attention has been directed to the problem of controlling the rising off-budget deficits caused by

these credit activities. In 1972, the total volume of outstanding direct loans and loan guarantees stood at $241 billion. By 1982, that total had increased more than three times to $765 billion. and despite efforts to control spending, both on and off-budget, Federal credit activity has continued to expand at an alarming rate, with more than $103 billion in new loans and loan guarantees issued in fiscal year 1982, another $151 billion in new credit commitments expected in fiscal year 1983, and still another $147 billion in new commitments anticipated by fiscal year 1984.

By itself this huge increase in Federal credit activity alters private market choices. But when combined with the rapidly growing Federal deficits that have occurred during the Reagan administration, the intrusion of the Federal Government into the private credit markets is truly alarming. Altogether, funds raised under Federal credit auspices will account for well over one-quarter of the total net funds raised by nonfinancial and financial borrowers in the domestic credit markets.

This increase in Federal borrowing and Federal credit activities is especially significant in a period of tight money, because Federal credit programs serve to channel available credit toward the favored programs and away from others. In other words, as the Federal Government directs the allocation of available credit through its borrowing to pay for the deficits and through its Federal loans and loan guarantees, there will be less money available to finance new loans for industries, for emerging companies, for home purchases, for new car loans, and for other consumer purchases—all of which are essential for the long-term sustained economic growth which we all desire.

This explosion of Federal credit activity is, ironically, partially the result of efforts in recent years to control on-budget spending. Time and again we have seen examples where Congress has authorized programs—worthwhile programs for development, for farmers, for housing, and others—that utilize direct Federal loans and off-budget loan guarantees in order to avoid budget scrutiny. If a program is funded through direct appropriations, it is subject to the budget process. But if that program is financed through credit activities, that scrutiny can be avoided.

The legislation we are introducing today attempts to deal with the gamut of issues raised over the past 4 years during our credit task force hearings. It is legislation drafted to accommodate many of the concerns raised by other Senators and Congressmen, by the administration, by the Federal Reserve Board, by federally-backed agencies, and by representatives of the private sector.

This bill deals with several highly technical concerns, but underlying it are a few broad concepts:

First, as the Credit Subcommittee report states, budgetary treatment of Federal direct loans and loan guarantees is incomplete in the context of today's unified budget. Specifically, today's budget practices substantially undercount the true level of Federal spending and borrowing.

We recognize that several steps have been taken in the past few years to correct this glaring omission. Since 1981, the concurrent budget resolutions passed by Congress have included targeted ceilings for new direct loan obligations and new loan guarantee commitments. But without legislation, such targets are virtually unenforceable, except for partial enforcement provisions adopted by the Appropriations Committee.

Second, we believe that putting these varied Federal credit activities on budget and subjecting them to the regular scrutiny of the budget process will result in better policy choices. The congressional budget process is designed primarily as a tool for setting priorities on revenues and spending. Adding these credit totals by function and in the aggregate will not increase the burden substantially, but would have the desired effect of giving Congress the information needed to make hard choices. In reality, how can we set budget allocations for programs without looking at these credit programs? Surely a farm credit program is equally important in that policy choice as is a direct appropriations. Surely it is just as important for Congress to know if we are providing economic assistance to another country through loan guarantees as through direct spending programs.

Third, this legislation starts from the premise that Federal credit activity, taken as a whole, has grown topsy-turvy and must be curbed. It is consistent to focus on the on-budget Federal deficits and spending issues to the exclusion of the off-budget credit activities. Both are equally important.

Throughout the hearings we held on credit activities, I was especially concerned about the inconsistent manner in which different Federal agencies treat the problem of loan defaults. During testimony I zeroed in on that issue again and again. We learned that each Federal agency that issues loan guarantees and direct loan commitments handles the problem of default in its own way. In one agency, a loan is considered in default if it is more than 30 days overdue, but another agency may give the borrower a grace period of several months.

Many agencies have no effective way to oversee the loans and loan guarantees that they issue and are unable to enforce payment of those loans if they fall into arrears. This legislation would correct those shoddy practices by requiring the administration to develop a standard definition of default, one that would be enforced evenly by all Federal agencies. In my opinion, this is an absolute necessity. If a person, or company, seeks a Federal loan or loan guarantee for any purpose, he must be willing to repay that commitment on time in accord with terms of the contract. As has been often noted, a defaulted loan becomes the same as a grant. We owe it to the taxpayers of this country not to allow that to happen with this huge volume of outstanding loan and guarantee commitments.

Finally, Mr. President, I want to emphasize again the bipartisan nature of this legislation and of the task force and subcommittee hearings that have preceded. Controlling Federal credit is a concern I have long had, and it is shared by many of my colleagues on both sides of the aisle. The first task force, which I chaired, included myself, Senator CHILES, and Senator BOSCHWITZ. The second group, the temporary subcommittee, has been chaired by Senator GORTON and includes myself and Senators BOSCHWITZ, KASTEN, ARMSTRONG, SASSER, and MOYNIHAN. During our hearings, we heard testimony from Members of Congress from both parties and from across the political spectrum.

We are proud of the work we have accomplished in bringing the issue of Federal credit growth out into the open. We believe this legislation must be adopted, both to insure the integrity of the budget process and to promote continued economic growth. We urge our colleagues to join us in this effort.

By Mr. PERCY:

S. 1583. A bill to extend for the 6-year period beginning on October 30, 1983, the duty on canned corned beef; to the Committee on Finance.

EXTENSION OF DUTY ON CANNED CORNED BEEF

● Mr. PERCY. Mr. President, I am introducing a bill today which would retain the present duty on imported canned corned beef for a period of 6 years beginning this October.

There is virtually no domestic production of canned corned beef. In fact, this product, all of which is imported, amounts to only 0.02 percent of the total U.S. meat supply.

Nearly all canned corned beef is imported from two countries: Argentina and Brazil. The present duty is 3 percent and will remain at that level until October 30, 1983, when the duty on Brazilian corned beef will rise to 7½ percent.

The present 3-percent duty was originally enacted in 1979 when a trade treaty was signed with Argenti-

na. At that time the duty was 7½ percent and Argentina did not qualify for special status under the generalized system of preferences (GSP). Because of most-favored-nation arrangements, the 3-percent duty was also instituted for all other countries exporting this product to the United States. The Argentine treaty was terminated on October 30, 1982, but that country now qualifies for GSP treatment for its canned corned beef. Brazil, with more than 50 percent of the U.S. market in this product, does not qualify, and thus would be faced with a 7½-percent duty while the Argentine beef would enter duty free. Chicago is a major center for the distribution of imported canned corned beef. A tariff rise would have adverse effects on the firms in my State which deal in this product. Sales margins on canned corned beef are low and many distributors carry the product as a staple which leads to sales of other product lines. If the duty on Brazilian imports is more than doubled, many of these firms would suffer losses, possibly contributing to more unemployment in what already is a troubled economic period.

Mr. President, I believe that this duty retention is fair and sensible. There is no domestic commercial production of this kind of meat. The resultant price differential between Brazilian and Argentine canned corned beef will only hurt the American consumer who buys Brazilian beef, the vast majority of which is in consumer-sized cans.

In addition, by standardizing the tariff for all exporting countries of this product, the United States would underline its commitment to free trade. It is fair to our trading partners and, most importantly, the American consumer would benefit from a less expensive product which is not even available in this country.

Brazil has also given us something in return by agreeing to withdraw its complaint to the GATT about U.S. ethyl alcohol imports.

The House Ways and Means Committee has added this duty retention to a House bill. I also am aware that two of my colleagues have introduced bills recently which would affect the tariff on canned corned beef. This bill which I introduce today is endorsed by both the Canned and Cooked Meat Importers' Association and the administration, and I urge my colleagues' support also.●

By Mr. DANFORTH:

S. 1584. A bill to amend the Internal Revenue Code of 1954 to conform the treatment of overall domestic losses with the treatment of overall foreign losses and to conform the foreign tax credit carryover and ordering rules with similar investment credit rules; to the Committee on Finance.

FOREIGN TAX CREDIT CONFORMITY ACT OF 1983

● Mr. DANFORTH. Mr. President, I am today introducing legislation to correct an inequity in the Internal Revenue Code which the Congress inadvertantly created with the passage of the Tax Reform Act of 1976.

Present law allows taxpayers who are subject to U.S. tax on foreign source income to claim a foreign tax credit for the amount of foreign taxes paid on such income. This credit is based on the principle that the country in which the income is earned has the first right to tax the income, even if the taxpayer, whether corporation or individual, is resident in another country. The country of residence, in turn, has a residual right to tax this income, but is limited by its obligation to insure that double taxation does not result.

In some countries, double taxation is avoided by exempting foreign source income from tax altogether. However, in the United States, the foreign tax credit system provides a dollar-for-dollar credit against U.S. tax liability for income taxes paid to foreign countries as a means of avoiding double taxation.

Under law prior to 1976, however, it was possible, in certain cases, for a taxpayer to derive a double tax benefit through the use of the foreign tax credit. This occurred where a taxpayer had taxable income from U.S. sources, but losses from foreign sources. The foreign losses had the effect of reducing U.S. taxable income and taxes by decreasing the taxpayer's worldwide taxable income, on which the U.S. tax is based. When the business operations in the foreign countries subsequently became profitable, the foreign tax credit was allowed for the taxes paid to the foreign country in the subsequent year.

Thus, unless the loss country had a net operating loss carryforward provision or some similar method of using prior losses to reduce subsequent taxable incomes, the taxpayer received a second tax benefit when income was derived from that country because, by use of the foreign tax credit, no U.S. tax was paid on income from that country, even though earlier losses from that country had served to reduce the taxpayer's tax on its U.S. income.

An example will help illustrate the problem that existed before the 1976 act:

	Year 1	Year 2	2-year total
Foreign source income (loss)	($100)	$100	0
U.S. source income	100	100	$200
U.S. taxable income	0	200	200
Foreign tax (46 percent)	0	46	46
U.S. tax (46 percent)	0	92	92
Allowable foreign tax credit	0	[1]46	46
Net U.S. tax	0	46	46
Excess foreign tax credit	0	0	0

[1] Foreign tax credit limitation: Foreign source income ($100)/total taxable income ($200) × U.S. tax ($92) = $46.

Thus, in this example, the taxpayer, with a 2-year total U.S. taxable income of $200, pays U.S. tax of only $46—one-half the amount that you would expect.

The Tax Reform Act of 1976 addressed this "double tax benefit" problem by adopting what has become known as the foreign loss recapture rule, which is found in section 904(f) of the code. Under this provision, in cases where a loss from foreign operations reduces U.S. tax on U.S. source income, the taxpayer is, in effect, required to recapture the tax benefit if the company subsequently derives taxable income from its foreign sources.

In general, the recapture is accomplished by treating a portion of subsequent foreign source income as income from domestic sources. The effect of recharacterizing the foreign income as domestic is to reduce the allowable foreign tax credit for the year. Thus, under 904(f), the outcome of the example above would be as follows:

	Year 1	Year 2	2-year total
Foreign source income (loss)	($100)	$100	0
U.S. source income	100	100	$200
U.S. taxable income	0	200	200
Foreign tax (46 percent)	0	46	46
U.S. tax (46 percent)	0	92	92
Allowable foreign tax credit	0	[1] 0	0
Net U.S. tax	0	92	92
Excess foreign tax credit	0	46	46

[1] Foreign tax credit limitation: Foreign source income (zero, since it has been recharacterized as U.S. income/total taxable income ($200) × U.S. tax ($92) = 0.

Thus, under section 904(f), the taxpayer is denied the double tax benefit, and pays, over the 2-year period, $92 of U.S. tax on $200 of U.S. income. The fact that the taxpayer has paid $46 of foreign tax on zero foreign income is a concern, but one which is appropriately addressed by the foreign country—for example, by allowing the taxpayer to carry the loss from year 1 to year 2, as under U.S. law.

Since the Congress was concentrating on the "double tax benefit" problem while the Tax Reform Act of 1976 was under consideration, it is not surprising that the act failed to anticipate the existence of the opposite set of circumstances, which can lead to, in effect, a "double tax detriment." This can happen when a company has net income from foreign sources, but domestic losses.

This has recently come to light as a problem because of the unfortunate

loss position that many American corporations, particularly those in the basic industries, find themselves. In such cases, where the company also has foreign source income on which it has paid foreign tax, the company will have excess foreign tax credits which are unlikely ever to be used. Again, an example will help illustrate the problem:

	Year 1	Year 2	2-year total
Foreign source income	$100	$100	$200
U.S. source income (loss)	(100)	100	0
U.S. taxable income	0	200	200
Foreign tax (46 percent)	46	46	92
U.S. income tax (46 percent)	0	92	92
Allowable foreign tax credit	0	[1] 46	46
Net U.S. tax	0	46	46
Excess foreign tax credit	46	0	46

[1] Foreign tax credit limitation: Foreign source income ($100)/total taxable income ($200) × U.S. tax ($92) = $46.

Thus, over 2 years, the company has paid a total of $138 in taxes—$46 U.S., $92 foreign—on net income of $200 (consisting solely of foreign source income)—a rate of 69 percent. The excess foreign tax credit of $46 is unlikely to be utilized unless the company has future income from countries with lower tax rates than the U.S. rate.

While the excess credit may be carried back 2 years or forward 5, these carryover periods are insufficient in most cases to allow the credit to be used. This compares with a carryover period for net operating losses and investment tax credits of 3 years back and 15 years forward. Further, the requirement that current year credits be used before credits carried from other years are used also reduces the likelihood that the excess credits will ever be used. Net operating loss and investment tax credit carryovers, on the other hand, are used in the order they are earned.

It is apparent that, in enacting section 904(f) in 1976, Congress merely overlooked the need for a parallel provision for the recapture of domestic losses to avoid double taxation. The provisions of this bill are, therefore, technical rather than substantive in nature.

This amendment provides for a "mirror-image" provision to section 904(f). Under the bill, therefore, a company may recapture domestic losses in subsequent years in which it has domestic income by recharacterizing the subsequent domestic income as foreign source income, to the extent domestic losses have served to reduce the foreign tax credit available to the taxpayer.

An example, using the same facts as the example above, will illustrate how the new domestic loss recapture would work:

	Year 1	Year 2	2-year total
Foreign source income	$100	$100	$200
U.S. source income (loss)	(100)	100	0
U.S. taxable income	0	200	200
Foreign tax (46 percent)	46	46	92
U.S. income tax (46 percent)	0	92	92
Allowable foreign tax credit	0	[1] 92	92
Net U.S. tax	0	0	0
Excess foreign tax credit	46	(46)	0

[1] Foreign tax credit limitation: Foreign source income ($200, since the domestic loss from year 1 is "recaptured", i.e., domestic income from year 2 (up to the amount of the prior year's loss) is treated as foreign source income)/total taxable income ($200) × $92=$92.

Thus, under the provisions of the bill, the taxpayer in this situation pays a total of $92 tax. All the tax paid is foreign, which is appropriate since the taxpayer's income for the period is all foreign source. Thus, this amendment would provide for symmetry of treatment between domestic losses and foreign losses, as under section 904(f).

Over time, a taxpayer should not be allowed to accumulate foreign tax credits based on a cumulative amount of foreign source income which is greater than the foreign source income the taxpayer actually had. Similarly, a taxpayer should not be forced to pay tax on an amount of income which is greater than the income the taxpayer actually had. Section 904(f) of current law prevents the first from occurring; the provisions of this bill will prevent the second.

The bill has a further amendment which conforms the treatment of unused foreign tax credits to the treatment of unused investment tax credits, other credits, and net operating losses. Unused foreign tax credits may, under current law, be carried back 2 years and forward 5. However, net operating losses, the investment tax credit, the targeted jobs tax credit, the alcohol fuels credit, and the research and experimentation credit may be carried forward 15 years. This helps assure that the credits a taxpayer earns will eventually be of use.

As I have previously noted, the utilization of foreign tax credits carried from other years is made difficult by the fact that, unless a taxpayer has foreign source income from a country with a lower rate of tax than that of the United States, the limitations on the credit will prevent the use of credits. The domestic loss recapture provisions will help companies with domestic losses in years they pay foreign taxes to avoid losing the use of those foreign tax credits. However, there will continue to be limits on the ability of taxpayers to use earned foreign tax credits. Therefore, this bill provides that the carryover period for unused foreign tax credits will also be 15 years.

Further, the bill also provides that the "ordering" rules for the use of the credits will be conformed to those of NOL's and the other credits, so that they will be used in the order earned, rather than requiring that the current year's credit be used before any carryover is used.

Mr. President, this bill does not propose substantive amendments to current law. It does not affect the definition of what constitutes foreign taxes for purposes of the foreign tax credit. It should have virtually no effect on revenues, since any revenues which might be collected in future years if the bill is not passed would be windfall revenues which were not anticipated under current law.

The bill does not provide any new benefits to business; it merely implements the fundamental principle that the foreign tax credit should be allowed, but limited, to the extent income of U.S. taxpayers is subject to taxation by both the United States and a foreign country.

I ask unanimous consent that the text of the bill be printed in full in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1584

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE; ETC.

(a) SHORT TITLE.—This Act may be cited as the "Foreign Tax Credit Conformity Act of 1983."

(b) AMENDMENT TO 1954 CODE.—Whenever in this Act an amendment is expressed in terms of an amendment to, or an insertion in, a section or other provision, the reference shall be considered to be made to a section or other provision of the Internal Revenue Code of 1954.

SEC. 2. RECAPTURE OF OVERALL DOMESTIC LOSS.

(a) IN GENERAL.—Subsection (f) of section 904 (relating to limitation on foreign tax credit) is amended by substituting in lieu of the title and paragraphs (1) and (2) thereof the following new title and new paragraphs (1) and (2);

"(f) RECAPTURE OF OVERALL FOREIGN AND DOMESTIC LOSSES.—

"(1) OVERALL FOREIGN LOSS.—

"(A) IN GENERAL.—For purposes of this subpart and section 936, in the case of any taxpayer who sustains an overall foreign loss for any taxable year, that portion of the taxpayer's taxable income from sources without the United States for each succeeding taxable year which is equal to the lesser of—

"(i) the amount of such loss (to the extent not used under this paragraph in prior taxable years), or

"(ii) 50 percent (or such larger percent as the taxpayer may choose) of the taxpayer's taxable income from sources without the United States for such succeeding taxable year,

shall be treated as income from sources within the United States (and not as income from sources without the United States).

"(B) OVERALL FOREIGN LOSS DEFINED. For purposes of this subsection, the term 'overall foreign loss' means the amount by which

the gross income for the taxable year from sources without the United States (whether or not the taxpayer chooses the benefits of this subpart for such taxable year) for such year, including the amount, if any, that is treated as income from sources without the United States for such taxable year under paragraph (2), is exceeded by the sum of the deductions properly apportioned or allocated thereto, except that there shall not be taken into account—

"(i) any net operating loss deduction allowable for such year under section 172(a), and

"(ii) any—

"(I) foreign expropriation loss for such year, as defined in section 172(h), and

"(II) loss for such year which arises from fire, storm, shipwreck, or other casualty, or from theft,

to the extent such loss is not compensated for by insurance or otherwise.

"(2) OVERALL DOMESTIC LOSS.—

"(A) IN GENERAL.—For purposes of this subpart and section 936, in the case of any taxpayer who sustains an overall domestic loss for any taxable year, that portion of the taxpayer's taxable income from sources within the United States for each succeeding taxable year which is equal to the lesser of—

"(i) the amount of such loss (to the extent not used under this paragraph in prior taxable years), or

"(ii) 50 percent (or such larger percent as the taxpayer may choose) of the taxpayer's taxable income from sources within the United States for such succeeding taxable year,

shall be treated as income from sources without the United States (and not as income from sources within the United States).

"(B) OVERALL DOMESTIC LOSS DEFINED.—For purposes of this subsection, the term 'overall domestic loss' means the amount by which the gross income for the taxable year from sources within the United States for such year, including the amount, if any, that is treated as income from sources within the United States for such taxable year under subparagraph (1), is exceeded by the sum of the deductions properly apportioned or allocated thereto, to the extent such loss offsets income from sources without the United States for the taxable year, except that there shall not be taken into account any loss for such year which arises from fire, storm, shipwreck, or other casualty, or from theft, to the extent such loss is not compensated for by insurance or otherwise."

(b) EFFECTIVE DATE.—The amendments made by subsection (a) shall apply to taxable years beginning after December 31, 1981.

SEC. 3. EXTENDED CARRYOVER PERIOD FOR EXCESS FOREIGN TAX CREDITS; ORDERING RULE FOR FOREIGN TAX CREDIT.

(a) CARRYOVER PROVISION FOR EXCESS CREDITS ARISING IN 1979 THROUGH 1981.—Subsection (c) of section 904 is amended by inserting at the end thereof the following new sentence: "In the case of an amount deemed by this subsection to be an excess tax paid with respect to a taxable year beginning after December 31, 1978, and ending before January 1, 1982, the first sentence of this subsection shall be applied by substituting 'in each of the 15 succeeding taxable years' for 'in the first, second, third, fourth or fifth succeeding taxable years,' in the first sentence."

(b) CARRYOVER AND ORDERING RULE PROVISIONS FOR CREDITS ARISING AFTER 1981.—Subsection (a) of section 904 is amended to read as follows:

"(a) GENERAL RULE.—

"(1) FIRST-IN-FIRST-OUT RULE.—The amount of the credit allowed by section 901(a) shall be an amount equal to the sum of—

"(A) the foreign tax credit carryovers carried to such taxable year,

"(B) the amount of the credit determined under section 901(a) for such taxable year, plus

"(C) the foreign tax credit carryback carried to such taxable year,

and subject to the limitations imposed by paragraphs (2), (3), (4) and (5). The credits allowable under subparagraph (A) shall be used before the credits allowable under subparagraphs (B) and (C), and the credits allowable under subparagraphs (A) and (B) shall be used before the credits allowable under subparagraph (C).

"(2) LIMITATION IN TAXABLE YEAR.—The total amount of credit taken under section 901(a) in paragraph (1) shall not exceed the same proportion of the tax against which such credit is taken which the taxpayer's taxable income from sources without the United States (but not in excess of the taxpayer's entire taxable income) bears to his entire taxable income for the same taxable year. For purposes of the preceding sentence, in the case of an individual, the entire taxable income shall be reduced by an amount equal to the zero bracket amount.

"(3) CARRYBACK AND CARRYOVER OF EXCESS TAX PAID.—If the sum of the amount of the foreign tax credit carryovers to the taxable year under paragraph (1)(A) plus the amount determined under paragraph (1)(B) for the taxable year exceeds the amount of the limitation imposed by paragraph (2) for such taxable year (hereinafter in this subsection referred to as the 'unused credit year'), such excess attributable to the amount determined under paragraph (1)(B) shall be—

"(A) a foreign tax credit carryback to each of the 2 taxable years preceding the unused credit year, and

"(B) a foreign tax credit carryover to each of the 15 taxable years following the unused credit year and,

subject to the limitations imposed by paragraphs (4) and (5), shall be taken into account under the provisions of paragraph (1) in the manner provided in such paragraph. The entire amount of the unused credit for an unused credit year shall be carried to the earliest of the 17 taxable years to which (by reason of subparagraphs (A) and (B)) such credit may be carried and then to each of the other 16 taxable years to the extent, because of the limitations imposed by paragraphs (4) and (5), such unused credit may not be taken into account under paragraph (1) for a prior taxable year to which such unused credit may be carried.

"(4) LIMITATION ON CARRYBACKS.—The amount of the unused credit which may be taken into account under paragraph (1)(C) for any preceding taxable year shall not exceed the amount by which the limitation imposed by paragraph (3) for such taxable year exceeds the sum of—

"(A) the amounts determined under paragraphs (1)(A) and (1)(B) for such taxable year, plus

"(B) the amounts which (by reason of this subsection) are carried back to such taxable year and are attributable to taxable years preceding the unused credit year.

"(5) LIMITATION ON CARRYOVERS.—The amount of the unused credit which may be taken into account under paragraph (1)(A) for any succeeding taxable year shall not exceed the amount by which the limitation imposed by paragraph (3) for such taxable year exceeds the sum of the amounts which, by reason of this subsection, are carried to such taxable year and are attributable to taxable years preceding the unused credit year."

(c) CONFORMING AMENDMENTS.—

(1) Subsection (c) of section 904 is repealed.

(2) Subsection (d), (e) and (f) of section 904 are redesignated as subsections (c), (d) and (e) respectively.

(d) EFFECTIVE DATES.—

(1) The amendment made by subsection (a) shall be effective upon enactment.

(2) The amendments made by sections (b) and (c) shall be effective with respect to taxable years beginning after December 31, 1981.●

By Mr. HELMS:

S. 1587. A bill to amend the Internal Revenue Code of 1954 with respect to deductions for the payment of certain expenses by ministers who receive housing allowances; to the Committee on Finance.

DEDUCTIONS OF CERTAIN EXPENSES BY MINISTERS

● Mr. HELMS. Mr. President, in early January of this year the Internal Revenue Service published Revenue Ruling 83-3. In part, this ruling provides that ministers may no longer deduct interest and taxes paid on a personal residence to the extent the amounts expended are allocable to tax-exempt income. The ruling is scheduled to take effect on July 1, 1983, for certain ministers and on January 1, 1985, for others.

Mr. President, it is common practice in the United States for a minister to be given a housing allowance by his church. Under section 107 of the Internal Revenue Code this allowance is excludable from the minister's gross income. Up to now ministers have, fully within the letter of the law, deducted interest and taxes from their income just like other taxpayers. In their case, however, this deduction has an additional benefit because some of their compensation, in the form of a housing allowance, is exempted from gross income by section 107. With Revenue Ruling 83-3, making a new application of section 265, the IRS is attempting to diminish the benefit of section 107 to the clergy.

Mr. President, some would question even whether the IRS should be making, on its own, what appears to be an outright change in substantive law. In any event, my bill would prevent the IRS from enforcing Revenue Ruling 83-3 and would leave in place the status quo on housing allowance tax deductions for the clergy. That is its sole and simple purpose.

Traditionally, Congress has tried to promote religion by refraining from taxing religious activities and by providing certain tax benefits for those involved in religious activities. We provide these tax benefits because of the longstanding recognition by the American people that Government exists to serve the common good of society. Government is the servant, not the master, of the people. Therefore, it is perfectly proper for the Government to give preferred status to certain institutions in society for the public good. Religion certainly occupies such a place in American society. Given the recent inclusion of the employees of religious institutions in mandatory FICA coverage under the 1983 social security amendments, it is surely not too much to ask that ministers retain the full benefits of their current housing allowance tax deduction.

Mr. President, the bill I introduce today is identical to H.R. 1905 which has been introduced in the House of Representatives by Congressman STAN PARRIS.

Mr. President, I ask unanimous consent that the text of Revenue Ruling 83-3 and of the bill be printed in the RECORD at the conclusion of my remarks.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1587

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. AMENDMENT RELATING TO DEDUCTIONS FOR THE PAYMENT OF CERTAIN EXPENSES BY MINISTERS WHO RECEIVE HOUSING ALLOWANCES

(a) IN GENERAL.—Paragraph (1) of section 265 of the Internal Revenue Code of 1954 (denying a deduction for payment of certain expenses relating to tax-exempt income) is amended by adding at the end the following new sentence: "The preceding sentence shall not apply to income described in section 107."

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall apply to any deduction for any taxable year beginning after December 31, 1982.

SECTION 265.—EXPENSES AND INTEREST RELATING TO TAX-EXEMPT INCOME

26 CFR 1.265-1: Expenses relating to tax-exempt income. (Also Sections 107, 117, 162, 163, 164, 7805; 1.107-1, 1.117-1, 1.162-1, 1.163-1, 1.164-1, 301.7805-1.)

Deductions; expenses and interest relating to tax-exempt income. Veterans and other students may not deduct educational expenses, and ministers may not deduct interest and taxes paid on a personal residence, to the extent the amounts expended are allocable to tax-exempt income. Rev. Ruls. 62-212 and 62-213 revoked.

REV. RUL. 83-3

Issues

(1) May a veteran deduct educational expenses if the amounts expended are allocable to veterans benefits that are exempt from taxation?

(2) May a minister deduct interest and taxes paid on a personal residence if the amounts expended are allocable to a rental allowance excluded from gross income under section 107 of the Internal Revenue Code?

(3) May a student deduct educational expenses if the amounts expended are allocable to a scholarship that is excluded from gross income under section 117 of the Code?

Facts

Situation 1.—During a taxable year, an unmarried veteran with no dependents, who is an attorney employed by a law firm, received five monthly payments totalling $780 from the Veterans' Administration pursuant to 38 U.S.C. section 1651 et seq., which provides for educational assistance allowances. The purpose of the allowance is to meet, in part, the expenses of a veteran's subsistence, tuition, fees, supplies, books, equipment, and other educational costs. 38 U.S.C. section 1681(a) (1979). Based upon the legislative history behind 38 U.S.C. section 1681 (1979), it is determined that Congress intended one-half of the allowance to be attributable to subsistence and one-half to be attributable to educational costs. See S. Rep. No. 269, 89th Cong., 1st Sess. 17 (1965). These payments are exempt from taxation under 38 U.S.C. section 3101(a) (1979). The taxpayer incurred expenses for tuition, fees, books, and other expenses in connection with three courses of advanced law education taken at a local university. The employer required the attorney to take the three courses as a condition of continued employment.

During the year, the veteran incurred and paid expenses of $1,054 for the education.

Educational expenses for courses required by the employer as a condition of continued employment generally are deductible as ordinary and necessary business expenses under the provisions of section 162 of the Code, provided the taxpayer elects to itemize deductions.

Situation 2.—During the taxable year, a minister of a gospel who is employed as a pastor of a church received $19,000 as compensation from the church and a combined rental and utility allowance of $6,300. The rental and utility allowance is excludable from the gross income of the minister under section 107 of the Code, to the extent used to rent or provide a home.

During the year, the minister used the rental and utility allowance, together with other funds, to make monthly payments for the residence in which the minister lived. Those payments totaled $8,400 and consisted of principal ($500), insurance ($400), real estate taxes ($1,400), interest ($4,000), and utility costs ($2,100). The minister incurred no other expenses directly related to providing a home during the taxable year. Interest and real property taxes paid are generally deductible expenses under the provisions of section 163 and 164 of the Code, respectively, provided the taxpayer elects to itemize deductions.

Situation 3.—Same as in Situation 1, except the taxpayer is not a veteran and the $780 qualified as an amount received as a scholarship solely attributable to tuition that is excludable from gross income under section 117 of the Code.

Law and analysis

Section 162 of the Code allows as a deduction all the ordinary and necessary expenses paid or incurred during the taxable year in carrying on any trade or business.

Section 163 of the Code allows as a deduction all interest paid or accrued within the taxable year on indebtedness.

Section 164 of the Code allows, except as otherwise provided, as a deduction for the taxable year within which paid or accrued, state and local real property taxes.

Section 265(1) of the Code provides that no deduction shall be allowed for any amount otherwise allowable as a deduction that is allocable to one or more classes of income other than interest (whether or not any amount of income of that class or classes is received or accrued) wholly exempt from the taxes imposed by subtitle A of the Internal Revenue Code, or any amount otherwise allowable under section 212 that is allocable to interest (whether or not any amount of such interest is received or accrued) wholly exempt from the taxes imposed by subtitle A.

Section 1.265-1(c) of the Income Tax Regulations provides that expenses and amounts otherwise allowable that are directly allocable to any class or classes of exempt income shall be allocated thereto, and expenses and amounts directly allocable to any class or classes of nonexempt income shall be allocated thereto. If an expense or amount otherwise allowable is indirectly allocable to both a class of nonexempt income and a class of exempt income, a reasonable proportion thereof determined in the light of all the fact and circumstances in each case shall be allocated to each.

The purpose of section 265 of the Code is to prevent a double tax benefit. In *United States* v. *Skelly Oil Co.*, 394 U.S. 678 (1969), 1969-1 C.B. 204, the Supreme Court of the United States said that the Internal Revenue Code should not be interpreted to allow the practical equivalence of double deductions absent clear declaration of intent by Congress. Section 265(1) applies to otherwise deductible expenses incurred for the purpose of earning or otherwise producing tax-exempt income. It also applies where tax-exempt income is earmarked for a specific purpose and deductions are incurred in carrying out that purpose. In such event, it is proper to conclude that some or all of the deductions are allocable to the tax-exempt income. See *Heffelfinger v. Commissioner*, 5 T.C. 985 (1945), which held that Canadian income taxes on income exempt from U.S. tax are not deductible in computing U.S. taxable income; *Banks v. Commissioner*, 17 T.C. 1386 (1952), which held that certain educational expenses paid by the Veterans' Administration that were exempt from income tax, were not deductible; *Christian v. United States*, 201 F. Supp. 155 (E.D. La. 1962), where a school teacher was denied deductions for expenses incurred for a literary research trip to England because the expenses were allocable to a tax-exempt gift and fellowship grant; and Rev. Rul. 74-140, 1974-1 C.B. 50, which concludes that the portion of the state income tax paid by a taxpayer that is allocable to the cost-of-living allowance, a class of income wholly exempt under section 912 of the Code, is nondeductible under section 265.

In *Manocchio v. Commissioner*, 78 T.C. 989 (1982), a taxpayer attended a flight-training course that maintained and improved skills required in the taxpayer's trade or business. As a veteran, the taxpayer was entitled to an educational assistance allowance from the Veterans' Administration pursuant to 38 U.S.C. section 1677 (1976) equal to 90 percent of the costs incurred. Because the payments received were exempt from taxation under 38 U.S.C. section 310(a)

(1976), the taxpayer did not report them as income. The taxpayer did, however, deduct the entire cost of the flight training course, including the portion that had been reimbursed by the Veterans' Administration. In a reviewed opinion, the court held that the reimbursed flight-training expenses were nondeductible under section 265(1) of the Code.

In Manocchio, the petitioner contended that the Service was estopped from challenging the claimed deduction because of petitioner's reliance on the holding of Rev. Rul. 62-213, 1962-2 C.B. 59, that held that expenses for education, paid or incurred by veterans, that are properly deductible for federal income tax purposes, are not required to be reduced by the nontaxable payments received during the taxable year from the Veterans' Administration.

In rejecting petitioner's argument, the court stated that the Internal Revenue Service has very broad discretion to correct a mistake of law in a ruling and do so with retroactive effect. The court states: "Given the fundamental differences in the way these benefits are computed, we cannot say that respondent's decision to treat them differently for tax purposes is 'so devoid of rational basis' as to constitute an abuse of discretion." 78 T.C. 989, 1002, 1003.

In all three situations, the taxpayer has incurred expenses for the purposes for which the tax-exempt income was received. Permitting a full deduction in each situation would lead to a double benefit not allowed under section 265 of the Code.

Holdings

In Situation 1 and Situation 3, the amount of the itemized deductions for tuition, books and other expenses connected with further education must be decreased to the extent the expense is allocable to the amounts received for such expenses from the Veterans' Administration or as a scholarship, as the case may be.

In Situation 2, the amount of the itemized deductions otherwise allowable for the interest and real estate taxes must be decreased to the extent the expenses are allocable to the rental allowance received from the church.

The following demonstrates one reasonable method of allocation under section 1.265-1(c) of the regulations that will be accepted by the Internal Revenue Service.

In Situation 1, the $1,054 of educational expenses that otherwise qualify for deduction is decreased by one-half of $780 (or $390), computed by multiplying $1,054 (the amount of the expense that is otherwise deductible) by a fraction, the numerator of which is $390 (the amount of the reimbursement allocable to deductible educational costs) and the denominator of which is $1,054 (the total of all expenditures to which the reimbursement is applicable): $1,054×390/$1,054=$390. Therefore, the itemized deduction for educational expenses under section 162 is $664 ($1,054−$390).

In Situation 2, the $4,000 of interest otherwise deductible under section 163 of the Code is decreased by $3,000, computed by multiplying $4,000 (the amount of the interest otherwise deductible) by a fraction, the numerator of which is $6,300 (the combined rental and utility allowance) and the denominator of which is $8,400 (the total of all expenditures to which the rental and utility allowance is applicable), or $4,000×$6,300/$8,400=$3,000. Therefore, the deduction for interest allowable under section 163 in Situation 2 is $1,000 ($4,000−$3,000).

In Situation 2, the $1,400 of real estate taxes otherwise deductible under section 164 of the Code is decreased by $1,050 computed by multiplying $1,400 (the amount of the real estate taxes otherwise deductible) by a fraction, the numerator of which is $6,300 and the denominator of which is $8,400 (as indicated in the preceding paragraph), or $1,400×$6,300/$8,400=$1,050. Therefore, the itemized deduction for real estate taxes allowable under section 164 in Situation 2 is $350 ($1,400−$1,050).

In Situation 3, the $1,054 of educational expenses that otherwise qualify for deduction is decreased by $780, computed by multiplying $1,054 (the amount of the expense otherwise deductible) by a fraction, the numerator of which $780 (the amount of the scholarship) and the denominator of which is $1,054 (the total of all expenditures to which the reimbursement is applicable): $1,054×$780/$1,054=$780. Therefore, the itemized deduction for educational expenses allowable under section 162 is $274 ($1,054−$780).

Effect on other revenue rulings

Situation 1 and 2 of this revenue ruling are similar to the situations in Rev. Rul. 62-213, 1962-2 C.B. 59, and Rev. Rul. 62-212, 1962-2 C.B. 41, which hold that the amounts paid by the taxpayers are fully deductible.

Rev. Rul. 62-212 and Rev. Rul. 62-213 are revoked.

Prospective application

Under the authority contained in section 7805(b) of the Code, this revenue ruling will not be applied to educational expenses paid by veterans who are currently enrolled in an educational program and incurring expenses under the circumstances described in Situation 1 until the end of the current academic year, but no later than June 30, 1983. Further, this revenue ruling will not be applied to ministers under the circumstances described in Situation 2 until the end of the minister's current contract year, but no later than June 30, 1983.

Section 7805(b) will not be applied in Situation 3 because that situation is like Manocchio, cited above, and the rational of that case is equally applicable to the facts of Situation 3.

SECTION 453A.—INSTALLMENT METHOD FOR DEALERS IN PERSONAL PROPERTY

26 CFR 1.453-2(c): Installment income of dealers in personal property.

Installment method for dealers in personal property; state sales tax imposed on consumer; sales tax excluded from total current price. In cases in which the state sales tax is imposed on the consumer, the sales tax must be excluded from the total contract price for purposes of computing taxable income from installment sales under section 453A of the Code and the regulations thereunder.●

By Mr. LEAHY (for himself, Mr. DECONCINI, Mr. KENNEDY, Mr. METZENBAUM, and Mr. BAUCUS):

S. 1588. A bill to eliminate the exemption for Congress from the application of certain provisions of Federal law relating to employment and privacy, and for other purposes; to the Committee on Governmental Affairs.

APPLICATION OF CERTAIN PRIVACY AND EMPLOYMENT LAWS TO CONGRESS

Mr. LEAHY. Mr. President, earlier this year the Senate cafeteria workers, who are unable to organize like other Federal workers, took their case to the International Labor Organization in Geneva. It did not escape the attention of the press that the other case before the ILO this term involving labor organization troubles was the case involving Solidarity. Now there is no comparison in my mind between workers in a Communist country and any workers in the United States. At the same time, workers in the House and Senate do not enjoy the rights of other Federal workers, and I can understand the frustration of the men and women who serve us every day here on the Hill and who feel like second-class citizens.

The plight of the cafeteria workers results from the fact that over the last 75 years Congress has exempted itself from important statutes that apply to other employers in the country, including the Civil Service Reform Act, the Civil Rights Act of 1964, the Equal Employment Opportunity Act of 1972, the Age Discrimination in Employment Act of 1967, the Equal Pay Act, and the Occupational Safety and Health Act.

Collectively, these laws spell out civil, social, physical, and financial rights and standards for all Americans—except if they work for Congress. This double standard is a plain injustice to those who, in a quite literal sense, make our work possible and it is a source of embarrassment to us all.

It is to end this discrimination that I am today introducing the Fair Employment in Congress Act. Its purpose is simple. It removes the congressional exemption from each of these laws. It rights the injustice. It removes the source of the embarrassment.

Removing the congressional exemption from the Civil Rights Act of 1964 and the bill amending it, the Equal Employment Opportunity Act of 1972, would make Congress subject to the same restrictions on employment discrimination that apply in the rest of the country.

Similarly, subjecting Congress to the provisions of the Fair Labor Standards Act and the Equal Pay Act would give legal standing to the women who currently, and all too correctly, charge that they are not receiving equal pay for equal work.

The Civil Service Reform Act was a historic step forward for the Federal workers around this Nation, who can now organize, bargain with management, complain about unfair labor practices, and seek fair settlement of grievances. The rights do not, and should not, include the right to strike, but the rights they do have are significant and will surely result in better protections for Federal workers, and, I think it safe to say, a better work force as well. There is no reason this

law should not apply to workers in the Congress.

The Occupational Safety and Health Act is an example of the kind of law that should apply to all working Americans. Congressional employees deserve a safe and healthy work environment, and we in the Congress should have to live by the same standards we set for the rest of the country's employers.

The Age Discrimination in Employment Act speaks to a bias that has no place in a nation where young and old need each other in the workplace, where innovation and experience are both needed for productivity. Should this formula apply any less in Congress?

Let me note for those colleagues who have followed my earlier versions of this bill, that I am focusing attention in this bill solely on the employment relationship, leaving the Privacy Act and the Freedom of Information Act to separate legislation. Recent discussions with several of my colleagues lead me to believe that these two important statutes raise issues very distinct from the employment issues in the balance of the bill. Separate treatment of the Privacy Act and the Freedom of Information Act will give both the present bill and the bill I plan to introduce soon covering those two statutes a much better chance of enactment.

Over the years that I have advocated passage of the bill I am now introducing for the fourth time, colleagues have stressed the special nature of the legislative process and the independence of our branch of government. It is frequently commented that Senators and Congressmen require an unrestricted choice of staff because of the absolutely confidential relationship between a member and his or her advisers. To impose on that right of choice a set of outside standards would be a limitation on the exercise of conscience that is the first duty of any Member, so this argument goes.

I will be the first to say that we are different in important respects from the executive branch, but I must add that the differences can be dealt with. I cannot see why cafeteria workers should not be able to organize, just because it might not be appropriate to allow legislative assistants to do so. On the other hand, neither cafeteria workers nor LA's ought to work in unhealthy conditions.

My approach in presenting this legislation is to presume that Congress ought not to enjoy a blanket exemption from the laws we have applied to others in this Nation. There should be new and complete hearings on this proposal, and I will do my best this year to see that hearings are held. During those hearings it will be possible to evaluate the concerns of those who think that Congress will be weakened if the present language of these laws is applied to it without alteration. Again, I believe that our presumption must favor application of the existing language of the several statutes included in the bill, but the important point is that we need hearings to be able to learn where that presumption should be allowed to stand and where it should not. Without hearings, we will never begin to consider reforms that are long overdue.

Mr. President, I ask unanimous consent that a statement by a longstanding supporter of this legislation, my very good friend Senator DECONCINI of Arizona, be included in the RECORD, and in addition the following: the text of the bill, a summary of the bill, and an editorial that appeared in the Washington Post on May 31, 1983, entitled, "Citadel of Privilege."

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1588

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That it is the purpose of this Act to eliminate the exemption for the Congress or for the Federal Government, as the case may be, in the provisions of Federal law described in this Act.

EQUAL EMPLOYMENT OPPORTUNITY

SEC. 2. Section 717 (a) of the Civil Rights Act of 1964 is amended by striking out "in those units of the legislative and judicial branches of the Federal Government having positions in the competitive service" and inserting in lieu thereof "in all units of the legislative branch of the Federal Government, and in those units of the judicial branch of the Federal Government having positions in the competitive service".

LABOR-MANAGEMENT RELATIONS

SEC. 3. Paragraph (3) of section 7103 of title 5, United States Code, is amended by inserting ", any unit of the legislative branch" before ", the Library of Congress".

FAIR LABOR STANDARDS; EQUAL PAY

SEC. 4. Section 3(e)(2)(A)(iii) of the Fair Labor Standards Act of 1938 is amended to read as follows:

"(iii) in any unit of the legislative branch of the Government, or in any unit of the judicial branch of the Government which has positions in the competitive service,".

AGE DISCRIMINATION IN EMPLOYMENT

SEC. 5. The second sentence of section 11(b) of the Age Discrimination in Employment Act of 1967 is amended by inserting before the period a comma and the following: "except the term 'employer' does include the United States for each unit of the legislative branch of the Federal Government".

OCCUPATIONAL SAFETY AND HEALTH

SEC. 6. (a) Section 3(5) of the Occupational Safety and Health Act of 1970 is amended by inserting after "United States" the following: "(except the term 'employer' does include the United States for each unit of the legislative branch of the Federal Government)".

(b) Section 3(6) of such Act is amended by inserting before the period the following: ", and the employees of any unit of the legislative branch of the Federal Government shall be deemed to be employed in the business affecting commerce for the purpose of this Act".

EFFECTIVE DATE

SEC. 7. The amendments made by this Act shall become effective thirty days after the date of enactment of this Act.

SHORT TITLE

SEC. 8. This Act may be cited as the "Fair Employment in Congress Act".

Brief Summary of Senator Leahy's Fair Employment in Congress Act, Introduced June 29, 1983

Section One: Enacting clause.

Section Two: Equal Employment Opportunity. Repeals the exemption from the Civil Rights Act of 1964 and the Equal Employment Opportunity Act of 1972 thus subjecting Congress to anti-discrimination provisions of the acts.

Section Three: Labor Management Relations. Includes Congress in the Civil Service Reform Act, enabling congressional employees to enjoy rights granted to other federal employees (including the right to organize, bargain with management, complain about unfair labor practices, seek fair settlement of grievances).

Section Four: Fair Labor Standards; Equal Pay. Includes Congress in the Fair Labor Standards Act of 1938 and the Equal Pay Act making Congress subject to the equal pay provisions of the acts.

Section Five: Age Discrimination in Employment. Repeals the exemption from the Age Discrimination in Employment Act of 1967 thus subjecting Congress to the anti-discrimination provisions of the act.

Section Six: Occupational Safety and Health. Repeals the exemption from the Occupational Safety and Health Act thus subjecting Congress to the job safety and health provisions of the act.

Section Seven: Effective date. All sections thirty days after enactment.

Section Eight: Short title. This Act may be cited as the "Fair Employment in Congress Act".

[From the Washington Post, May 31, 1983]

CITADEL OF PRIVILEGE . . .

Forever, it seems, a little plantation has existed on Capitol Hill. Sen. Patrick Leahy calls it the last plantation in America. It's the Senate cafeteria, whose 230-plus mostly black and Hispanic workers are denied by their senatorial employers the right to unionize—a right those same senators would not dream of trying to deny to people in the same line of work, or almost any other, elsewhere in America. In their frustration, the cafeteria employees have even petitioned the International Labor Organization, the United Nations agency that helps officially squashed labor unions, like Poland's Solidarity, try to regain their rights.

The rationale cited in defense of the Senate's practice is, as you might imagine, constitutional: the separation of powers. It is said that Congress cannot permit a group of its workers to be covered under the Civil Service Reform Act, the basic law that allows federal workers to organize unions and bargain with the government, because then the executive branch would be policing the legislative branch. How many senators would care to stand up in public and render such a fancy and unpersuasive alibi for denying people their basic rights?

Anyway, the Library of Congress, also part of the legislative branch, is unionized.

So are the Government Printing Office and the General Accounting Office. Does anyone doubt that the reason the cafeteria employees are singled out arises from the very unhappy tradition of disrespect for this group long evident on the Hill?

But what was most revealing about The Post's update of the cafeteria workers' plight yesterday was an accompanying list of the other federal laws, besides the Civil Service Reform Act, from which Congress exempts itself: the Occupational Safety and Health Act, the Freedom of Information Act, the Civil Rights Act, the Equal Pay Act, the National Labor Relations Act, the Privacy Act, the Age Discrimination in Employment Act, plus the District of Columbia's health, fire safety and building construction codes.

Some of these exclusions are familiar. Taken together, they convey an impression of a towering citadel of privilege resting at a place where equality under the law ought to be the guiding rule. The rest of us should not have been sitting idly by, deferring, mostly by saying nothing, to this anomaly. The change that would allow the cafeteria workers to organize should be only the beginning of a long overdue process of review.

● Mr. DeCONCINI. Mr. President, the one big business that ignores governmental regulations and gets away with it is the Congress. We operate like all other businesses, yet we reserve the right to hire, fire, pay, and discriminate at whim. Since the 1930's this body has been making fancy speeches and prescribing cures to end the injustice in the American workplace. In over 40 years of legislation, we have carefully excluded ourselves from taking responsibility for our actions. Congress can no longer afford to be the exception, we must be the rule. We must set the example for the rest of the country. If we want business to respect our ability to legislate, then Congress needs to take the lead and show that the laws we pass are fair by following them ourselves. Therefore, I join Senator LEAHY in cosponsoring his bill.

We can no longer ignore the Civil Rights Act of 1964, the Equal Pay Act, the Equal Employment Opportunity Act and many other vital pieces of legislation. We must offer our employees appropriate recourse under the law. Representative LYNN MARTIN's research into this issue revealed some disturbing figures: Of staff paid over $40,000 per year, 77 percent are men, of those paid less than $20,000 per year, 79 percent are women. These numbers may not be indicative of discrimination but they should be investigated so an intelligent conclusion can be reached.

Mr. President, we are caught in a hypocritical trap. Let us vote to work our way out of it and begin recognizing such essential rights as minimum pay, worker safety, and equal employment opportunity. Mark Twain once wrote: "To do good is noble. To advise others to do good is also noble, and much less trouble." We, as elected officials do not have to accept and perpetuate this shameful double standard. Let us cast a vote for justice and responsibility.●

By Mr. LEVIN (for himself, Mr. DIXON, Mr. METZENBAUM, Mr. RIEGLE, Mr. GLENN, and Mr. GORTON):

S. 1589. A bill to amend the Federal-State Extended Unemployment Compensation Act of 1970 and the Federal Supplemental Compensation Act of 1982 to provide alternative State triggers; to the Committee on Finance.

UNEMPLOYMENT BENEFIT LEGISLATION

● Mr. LEVIN. Mr. President, today I am introducing legislation which will correct the absurd situation that has developed in which some States with continuing high unemployment are ineligible for extended unemployment benefits while other States with lower rates of unemployment still can receive these benefits.

My State of Michigan, which has a total unemployment rate of 14.9 percent—almost 50 percent higher than the national average—has just triggered off extended benefits, thereby reducing unemployment benefits in Michigan by 13 weeks. In addition, benefits under the Federal supplemental compensation program, which are on top of the benefits provided through the regular 26-week State program and the extended benefit program, have been cut down by 2 weeks. At the same time, States such as Wyoming, Alaska, and California, which have averaged lower rates of total unemployment continue to be eligible for extended benefits. Clearly, logic has been stood on its head.

We can point to the changes made in the 1981 reconciliation bill as being behind this twisted result. We can point to the reconcilation bill's raising the trigger level for extended benefits from a 5-percent insured unemployment rate (IUR) to a 6-percent IUR. The insured unemployment rate is calculated by dividing the number of people receiving regular State unemployment benefits by the people working in jobs covered by unemployment insurance. We can point to the reconciliation bill's exclusion of people receiving extended benefits from the calculation of the IUR as being discriminatory against States such as Michigan for which long-term high unemployment has become an all to real fact of life. We can point to the illogic of treating someone who has been unemployed for 23 weeks as being unemployed for the purpose of determining the IUR, but not including someone who has been unemployed for 30 weeks, even though the latter person may be suffering more from the effects of sustained unemployment.

But pointing to these problems is not enough. It will not put food on people's tables or money in their pockets. Furthermore, attempts to just repeal outright the 1981 changes have been tried but have not met with success. So a more innovative approach is necessary; one which focuses on the simple objective of making sure that States with the highest rates of total unemployment are eligible for extended benefits.

I believe that the legislation which we are introducing today offers just such an approach.

First, it keeps in tact the current trigger levels, thereby not refighting old or lost battles.

Second, it adds a new trigger level which States have the choice of opting out of. This trigger level would be a total unemployment rate (TUR) of 11 percent. In the States for which the Bureau of Labor Statistics compiles seasonally adjusted data for the TUR on a month-by-month basis, the 11-percent trigger level would be determined by looking to the most recently available TUR data for those States. This provision would cover the 10 most populous States in the Nation for which the statistical sample is large enough to make the TUR an accurate measure of labor market conditions.

In the remaining States and jurisdictions, the 11-percent trigger would be determined by looking to the rolling 12-month average of the TUR for those areas, and by looking at the most recently available 1-month data. If an area's TUR is over 11 percent by both measures, it would also be eligible for extended benefits. This two-pronged test is an attempt to increase the sample size as well as to approximate a seasonal adjustment.

Third, the Department of Labor is directed to conduct a study to determine what common measure can be used for all 50 States and eligible jurisdictions to better reflect labor market conditions. In the best of all possible worlds, we would conduct this study first before any further legislative changes are made. But we cannot afford to wait while people are suffering.

Fourth, this new 11 percent trigger calculation would apply to the highest tier of the Federal supplemental compensation program. Therefore, the States experiencing the greatest degree of economic distress would be eligible for the full benefits of the extended benefit program as well as the Federal supplemental compensation program.

In conclusion, let me say this. If this country wants to have an extended benefit program, then it should be fair and it should not be a program that is merely a hollow shell. It should be a real program that provides real benefits. The legislation I am introducing today will do this.

I ask unanimous consent that the text of the legislation follow my remarks.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1589

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 203(d) of the Federal-State Extended Unemployment Compensation Act of 1970 is amended to read as follows:

"STATE 'ON' AND 'OFF' INDICATORS

"(d)(1) There is a State 'on' indicator for a week if—

"(A) the rate of insured unemployment under the State law for the period consisting of such week and the immediately preceding 12 weeks—

"(i) equaled or exceeded 120 percent of the average of such rates for the corresponding 13-week period ending in each of the preceding two calendar years, and

"(ii) equaled or exceeded 5 percent; or

"(B) in the case of a State for which the Bureau of Labor Statistics compiles data on a month-to-month basis with respect to the seasonally adjusted total unemployment rate, such adjusted rate for such State for the month preceding the month in which such week begins equaled or exceeded 11 percent; or

"(C) in the cases of a State not described in subparagraph (B)—

"(i) the average monthly total rate of unemployment for such State for the 12-month period for which data is available preceding the month in which such week begins equaled or exceeded 11 percent, and

"(ii) the total rate of unemployment for such State for the final month of the 12 month period for which data is available preceding the month in which such week begins equaled or exceeded 11 percent.

"(2) There is a State 'off' indicator for any week for which there is not an 'on' indicator.

"(3) A State may provide by law that the determination of whether there is a State 'on' or 'off' indicator shall be made as if subparagraph (A) of paragraph (1) did not contain clause (i) thereof, and the figure '5' in clause (ii) thereof were '6'; except that, notwithstanding any such provision of State law, any week for which there would otherwise be a State 'on' indicator by reason of subparagraph (A) of paragraph (1) shall continue to be such a week.

"(4) A State may provide by law that subparagraphs (B) and (C) of paragraph (1) shall not apply to such State.

"(5) For purposes of this subsection, the rate of insured unemployment for any 13-week period shall be determined by reference to the average monthly covered employment under the State law for the first four of the most recent six calendar quarters ending before the close of such period.".

"(b) Section 602(e) of the Federal Supplemental Compensation Act of 1982 is amended by adding at the end thereof the following new paragraph:

"(4) A State shall be deemed to be in a '6-percent period' for a week if—

"(A) in the case of a State for which the Bureau of Labor Statistics compiles data on a month-to-month basis with respect to the seasonally adjusted total unemployment rate, such adjusted rate for such State for the month preceding the month in which such week begins equaled or exceeded 11 percent; or

"(B) in the case of a State not described in subparagraph (A)—

"(i) the average monthly total rate of unemployment for such state for the 12-month period for which data is available preceding the month in which such week begins equaled or exceeded 11 percent, and

"(ii) the total rate of unemployment for such State for the final month of the 12-month period for which data is available preceding the month in which such week begins equaled or exceeded 11 percent.".

(c) The amendments made by subsections (a) and (b) shall apply with respect to compensation payable for weeks of unemployment beginning after the date of the enactment of this Act.

(d) The Secretary of Labor shall conduct a study, and shall report the results of such study to Congress not later than two months after the date of the enactment of this Act, with respect to alternatives to the rate of insured unemployment, which would be available with respect to all States, which might provide a more accurate measurement of the employment and labor market situation in each State.●

By Mr. WALLOP (for himself and Mr. SIMPSON):

S. 1590. A bill to clarify the contractural authority of the Secretary of the Interior to deliver water to the North Platte Irrigation District project; to the Committee on Energy and Natural Resources.

IRRIGATION ALONG THE WYOMING-NEBRASKA BORDER

● Mr. WALLOP. Mr. President, today I am introducing a bill, together with my colleague from Wyoming, Senator ALAN SIMPSON, which will resolve a long standing issue between the Bureau of Reclamation and some irrigators along the Wyoming/Nebaska border. Congressman DICK CHENEY of Wyoming is introducing the same legislation in the House of Representatives. Our bill will allow the irrigators to continue to conduct their annual silt run as they have in years past.

During water's natural flow, it picks up loose particles of matter or silt which the currents then carry downstream until they settle out again. A graphic example of this can be seen in Louisiana at the mouth of the Mississippi River. The broad delta there was created by the silt that dropped out of the river when it slowed down as it reached the sea. Over the years, this rich sediment has built up into the delta which is plainly visible today.

Since early Egyptian times, farmers have also used this process as a water conservation measure. They purposely flush silt-laden water through their irrigation canals and ditches. As the water flow slows, the silt settles out and lines the canals and coats the fields. This layer acts to seal the ditchbanks thus reducing water losses. For years, the irrigators have used this practice in their farming practices.

During the 1940's, the Bureau of Reclamation initiated negotiations with the North Platte project irrigators to obtain the power generation rights at Guernsey Dam. These negotiations were successful and in 1952, an amendatory contract was signed between the parties. Unfortunately, that contract did not mention the silt run issue.

This contractual silence has led to a continuing dispute between the irrigators and the Bureau of Reclamation regarding the irrigators' right to conduct the silt run. Several years after the contract between the Bureau of Reclamation and the irrigation districts was signed, the Bureau implemented a power interruption charge. The Bureau reasoned that since it is forced to cut back on its electrical power generation at Guernsey Dam during the silt run, the irrigators should pay for the foregone revenue.

However, the irrigation districts strongly disagree. They point out such a charge is not specifically provided for in the contract, and they are understandably concerned that the charge could greatly escalate in the future at the Bureau of Reclamation's whim. The Bureau of Reclamation did not assess any charge for years immediately after the 1952 contract, and Bureau personnel promised that the districts would never have to pay any such charge. It should be noted that this is a unique case. As far as everyone knows, no other Federal facility is involved in a silt run so there is no overall policy on this question.

Although the irrigation districts have paid the charges through 1981, under protest, they refused to do so last year. The Bureau now is threatening not to conduct any more silt runs, which would be disastrous for farming in western Nebraska and eastern Wyoming.

The legislation which Senator SIMPSON and I are proposing today would clarify this issue and allow the districts to continue the run as they have since the project was built—a practice which ultimately reduces the amount of water needed to irrigate the farmers crops and results in the availability of more water for everyone.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD:

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1590

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That notwithstanding any provision of the Act of June 17, 1902 (32 Stat. 338), as amended by Public Law 97-293, and subject to—

(1) the laws of Wyoming and Nebraska governing the appropriation, diversion, and use of water;

(2) any agreements between the irrigation districts which comprise the North Platte Project; and

(3) the provisions of any applicable interstate compact or court decree,

the Secretary of the Interior, or his designate, shall provide silt-laden waters from the North Platte Project, Wyoming and Ne-

braska, upon the request of the irrigation districts supplied by the Project without any special charge or payment of any kind which is not specifically provided for or enumerated in any existing contractual agreements between the Bureau of Reclamation and the irrigation districts. The United States shall not assert any legal claims against the irrigation districts as a result of such deliveries which are made prior to the enactment of this Act.●

By Mr. DOLE (for himself, Mr. DURENBERGER, Mr. DOMENICI, Mr. JEPSEN, Mr. PRYOR, Mr. HEINZ, and Mr. MOYNIHAN):

S. 1592. A bill to amend title XVIII of the Social Security Act to correct provisions relating to the cap for hospice care; to the Committee on Finance.

CAP ON HOSPICE CARE

Mr. DOLE. Mr. President, I am introducing today a measure to correct a provision in the Tax Equity and Fiscal Responsibility Act of 1982 (TEFRA) related to the cap amount for hospice care. As my colleagues are aware, through TEFRA we created hospice care, a new type of benefit available to medicare beneficiaries. Based on legislation I introduced in late 1981, S. 1958, the provision in TEFRA provides hospice coverage for persons judged to be in the last 6 months of life. In such a situation, a medicare beneficiary can elect to receive hospice care for up to 210 days. Coverage under the election includes home care for the dying patient, counseling for the patient, pain-relieving drugs, and medical supplies. "Respite care," which is temporary assistance in caring for the family member who is dying, will also be available to ease the strain placed on family members by the need for constant attendance.

Many believe, as I do, that it is less costly to care for a patient at home, forgoing expensive hospital treatment. But more importantly, hospice care is more humanitarian. Rather than being in a hospital, alone much of the time, hospice care will allow an individual to remain at home, surrounded by family and friends. But there is a problem with the hospice provision as enacted. In a statement made before this body on June 8, 1983, I described a problem that exists as a result of a misinterpretation of a CBO estimate.

As I noted on June 8, when S. 1958 was originally introduced, the per capita reimbursement for a hospice patient could not exceed 75 percent of the per capita medicare expenditure during the last 6 months of life for persons dying of cancer. Based on Congressional Budget Office data prepared last summer, it was assumed that the average cost to the medicare program for the last 6 months of life of beneficiaries dying of cancer was approximately $19,000. With this estimate as a base amount, the payment cap for hospice care would have been nearly $14,600 in 1983. However, information at that time indicated the actual per capita cost for hospice patients was below $6,000. Because of the CBO data, the House Ways and Means Committee, when considering the hospice amendment last summer, decided to alter the cap so that a hospice would receive an amount that was a truer reflection of the costs of care. The new formula, which became part of the TEFRA amendment, provided for a cap based on 40 percent instead of 75 percent of the base amount. This would have resulted in a payment cap of about $7,600.

However, we have since discovered that the CBO information provided at that time included two errors. In stating that $14,600 was the cap amount, the CBO should have said that this was in fact the base amount. Forty percent of that amount produces a much lower cap ($5,800) than Ways and Means expected. Further, in estimating this amount, CBO failed to use the specific legislative language which required updating by the medical component of the CPI. CBO instead updated the base to reflect actual medicare expenditure inflation. This again resulted in an inflated base-cost estimate.

The outcome of all of this is that the administration has determined that based on the statute, the cap amount for 1984 will be a little over $4,200. This is significantly lower than the $7,600 cap we had anticipated, and in fact may be too low for this group of patients. This problem has been the subject of the articles in the Washington Post, New York Times, and Wall Street Journal.

The bill I introduce today corrects the consequences of basing the limit on a per capita cost estimate which is now quite different than that available when TEFRA was being considered. It establishes a fixed cap amount which is a reasonable reflection of the costs of care, and a cap amount which will increase or decrease in future years to reflect medical care price changes.

Mr. President, I urge my colleagues to give this bill their serious consideration.

By Mr. DURENBERGER (for himself and Mr. RIEGLE):

S. 1593. A bill to amend the Internal Revenue Code of 1954 to facilitate industrial revitalization and employment by improving the efficiency of the investment tax credit; to the Committee on Finance.

S. 1594. A bill to expand the incentives of the investment tax credit, and for other purposes; to the Committee on Finance.

INVESTMENT TAX CREDIT LEGISLATION

Mr. DURENBERGER. Mr. President, the adoption of accelerated cost recovery was an historic reform, as was reenaction of the investment tax credit 10 years earlier. These dual investment incentives mean lower capital costs, more efficient use of investment dollars, and a cost base more competitive with industries in other nations for those industries able to take advantage of their provisions.

But applying the title Economic Recovery Tax Act to legislation centering on ACRS is somewhat misleading. It may be accurate for some companies and some industries, but it ignores the broad diversity of the American economy.

Like all tax incentives, ITC and ACRS have inherent limitations. Because they are tax incentives, they can only benefit industries that are already yielding profits against which the incentives can be claimed. That is fine for high growth, high profit, capital intensive industries. But there are hundreds of thousands of unemployed steel workers, auto workers, railroad employees, and miners in this country who can testify that there is more to the American economy than high growth and high tech.

Our economy is not a homogeneous unit. It has various sectors which respond to different stimuli and recover at different rates. For a national economic policy to be effective it must incorporate incentives targeted to the particular needs of each of its sectors, be they high technology, basic industries, agriculture, or service industries.

As recovery continues, the historic changes made in ACRS will accelerate the recovery of high growth industries. But it is also fair to say that ITC and ACRS benefits have had and will continue to have only limited impact on the basic industries which harbor the greatest capital investment needs. Under current investment incentives, they will clearly lag behind the rest of the economy in recovery, if they recover at all.

It is a fact of life that the industries facing the greatest need for reinvestment—because they have the oldest physical plants—are also among the economy's least profitable. Steel, automobiles, rail, airlines, and mining are good examples. These basic industries have three troublesome factors in common.

First, each is a true basic industry, employing large numbers of people, and producing a product essential to the Nation's economy.

Second, each is facing immense capital investment needs as it seeks to modernize aging plants and equipment. It is also generally true that these industries have diverted millions of dollars in investment capital to socially rather than economically productive investments, such as pollution control equipment. These are unquestionably valuable investments, but

they have done little to make basic industries more competitive.

Third, in the face of these growing investment needs, each of these basic industries is facing inadequate earnings on an industrywide basis.

No one would deny that modernization of these basic industries is essential to any recovery, to any reindustrialization plan. It is essential to the Nation's future. But ACRS, ITC, and other existing investment incentives will not accomplish the goal. These incentives are virtually useless to the industries that lack profitability. In fact, these earned but unusable credits may actually be harming the basic industries by lowering the cost of capital for their competitors, and making them attractive takeover targets for tax motivated mergers. This bias in the Tax Code has been a major factor in producing the trend toward concentration that has appeared so noticeably in American industry over the past three decades.

Today, I am introducing two bills that go to the heart of this bias, and would provide basic industries with a level playing field. They would give steel, autos, and other basic industries full access to the investment incentives now beginning to benefit other industries. The bills, though different in form, proceed from a common premise.

It is a big mistake to suggest that unemployed basic industry employees in high unemployment areas like Minnesota's Iron Range are the only stakeholders in these reforms. The products produced by basic industries are indeed basic to every phase of our lives. Through the jobs we hold, the products we consume and the military forces that protect us, we all have a stake in the passage of these proposals.

BASIC INDUSTRY REINDUSTRIALIZATION ACT (REFUNDABLE INVESTMENT TAX CREDIT)

The refundable investment tax credit (RITC) is the only tax reform proposal capable of applying the ITC's incentives to basic industries. It also is completely consistent with the theory behind ITC—to render investment dollars a higher priority resource allocation by making every investment dollar worth $1.10. The 10-cent-per-dollar refund granted under refundability is no greater loss to the Treasury than the 10-cents-per-dollar credit being granted to industries that now qualify for the ITC. An industry receiving refunds under an RITC proposal receives no greater benefit than an industry which presently receives the credit. In each case, the benefit rendered (or tax revenue lost) is identical. Only the form of the benefit/loss differs; that is, refund versus tax writeoff.

Without refundability, there are substantial differences between the benefits rendered industries and companies within an industry which qualify and those which do not. The present, nonrefundable ITC creates an anomaly—focusing billions of dollars in Federal assistance on the industries that need it least, while denying any assistance to those industries which need it most. In a sense this overstates the point, since American industry has a general need for tax and investment incentives. But without refundability, the ITC will remain one of this Nation's most poorly targeted tax-planning mechanisms.

The refundable investment tax credit will resolve these defects in the ITC, and take a long overdue step toward developing a tax policy that can meet the unique needs of America's basic industries. It is a bill designed to put the hundreds of thousands of workers who depend on these basic industries back to work.

The Basic Industries Reindustrialization Act will make the investment tax credit refundable for certain classes of industry, extending the benefits of the ITC to those basic industries with the greatest capital investment needs, but the least ability to benefit from other tax measures due to inadequate earnings.

The Basic Industries Reindustrialization Act would yield multiple advantages for American industry and the workers who depend on it. The last decade has illustrated that when industries begin experiencing financial difficulties, new investment is invariably the first item deferred. Over a period of years this has a cumulative effect. Decreased investment means higher unit costs, and loss of competitive advantage. These factors further weaken the industries' cash position, which magnifies the incentive to defer investment. It is a vicious cycle that has been repeated in most basic industries.

The refundable investment tax credit is the only tax reform proposal that attacks this cycle at the onset, by providing financially troubled industries with both the incentive and the liquidity to maintain adequate levels of capital investment. It is a form of preventive maintenance, which can go a long way toward preventing the kind of complete investment collapse experienced in a number of troubled American industries. It makes more sense to focus such assistance at the point where a company hits break-even level, that is, where the vicious cycle begins, than it does to pour billions of dollars into bailing out industries after they have suffered a complete financial collapse.

The refundable tax credit would have significant primary and secondary employment impact—primary in the industries qualifying, secondary in the industries producing the capital goods needed by these basic industries. By definition, refundable tax credits have a high correlation with new investment. No other form of financial assistance for basic industries gets this big a bang for the buck. In addition, the refundable tax credit gives the Federal Government the ability to have near absolute control over where the refunded dollars are spent. Under a refundable credit system, a company must spend money invested in qualifying property to qualify for the credit. Qualifying property can be defined in any way that Congress deems socially desirable. This makes the RITC a very precise tax-planning tool.

Making the ITC refundable would also counter the present law's inherent tendency to use Federal tax subsidies to widen disparities among members of the same basic industry. As Senators LONG and KENNEDY described the problem in a letter to former Treasury Secretary Blumenthal:

> Two firms in the same industry may purchase identical equipment. Yet, one firm may be placed at a competitive disadvantage, because it is not eligible for the 10-percent investment tax credit. It is difficult to understand, for example, why a major Federal subsidy like the investment tax credits should be designed in a way that enables General Motors to pay $90,000 for a $100,000 machine, while requiring American Motors to pay the full $100,000.

From both an economic and a philosophical standpoint, refundable investment tax credits are clearly preferable to the bailouts, subsidies, and import restrictions which have thus far been the only real alternative for assisting reindustrialization of the basic industries.

The Basic Industries Reindustrialization Act is not a mechanism for bailing out failing companies and otherwise healthy industries. It focuses only on basic industries which lack profitability on an industrywide basis. Nor is it accurate to suggest that the benefited industries have been singled out for special treatment. They have already been singled out by their inability to draw significant benefits from the tax incentives in current law. The bill I offer will simply enable those industries to share in the capital incentives we already have granted.

Refundability is a tool, and it is important to recognize that this bill is only one approach to using that tool. The coverage of the bill can be expanded to whatever degree the responsible committees deem advisable. Or, by controlling the percentage refundable in any given year, the concept can be fit within any budget parameters. The targeted approach embodied in this bill is designed to focus on the industries in greatest need, while keeping the cost of the bill within reasonable budget parameters. The possibilities for targeting the refundable tax credit are limited only by the ingenuity of those Senators and Representatives on the tax-writing committees.

The legislation I offer today is a workable, cost efficient means to resolve the problems of basic industries and both a worthy and necessary supplement to the Economic Recovery Tax Act.

THE WORK OPPORTUNITIES AND RENEWED COMPETITION ACT OF 1983

Every argument I offered on the refundable ITC applies with even greater force to ACRS, which has a far greater financial impact on the industries it benefits. For the same reason, it has a far more negative impact on the industries whose marginal profitability prevents them from gaining access to these benefits. The bill will address these problems by permitting a company with earned but unusable credits or ACRS deductions to redeem the benefits with the Treasury for 85 percent of their value. There would be two conditions on the redemption:

First, the refund must be reinvested in qualifying investment property, and

Second, the full (100 percent) value of the redeemed credit would be subject to recapture over a 6-year period. This is an essential provision because the reinvestment requirement creates a new credit, and if there were no recapture the redemption would give rise to an infinitely expanding credit.

The bill is of limited duration, designed to prevent basic industries from being shunted out of the capital markets during the critical recovery stage, and also designed to give Congress time to address the fundamental bias issue through more comprehensive change in the code.

While the bill has negative revenue impact in its initial 2 or 3 years, it reduces the value of outstanding unused tax benefits by 15 percent—a staggering sum of money. While some of these credits would never have been claimed, the combination of the 15-percent surrender and the recapture requirement will render the bill a solid revenue raiser over the full 6-to-7-year period.

I ask unanimous consent that a summary and section-by-section analysis of the WORC bill be printed at this point in the RECORD, and I further ask unanimous consent that it be followed by the full text of each bill.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

SUMMARY OF THE WORK OPPORTUNITIES AND RENEWED COMPETITION ACT OF 1983

I. BASIC EXAMPLE OF THE CONCEPT ALLOWING THE FORFEITURE OF INVESTMENT TAX CREDITS IN EXCHANGE FOR A DISCOUNTED CURRENT PAYMENT LINKED TO NEW INVESTMENTS

At the end of its 1982 taxable year, the taxpayer has $1,000 of investment tax credits (ITC) that cannot be used either in the current year to reduce tax liability or as a carryback to earlier years to produce a tax refund. Current law requires such ITCs to be carried to later years in which they can be used. The bill allows the taxpayer to forfeit the $1,000 of ITC carryovers in exchange for $850 to be paid by Treasury in 1983 and 1984 in conjunction with the investment by the taxpayer of $1,000 in new equipment. A requirement of this forfeiture mechanism is that the taxpayer's tax liability be increased by $1,000 by the end of 1990 at a rate that is no slower than $200 per year from 1986 through 1990. Comparing the present value of the anticipated future use of the $1,000 of ITCs with the value of the $850 exchange, the taxpayer would determine whether or not to elect to forfeit all or none of the $1,000 of ITC carryovers.

This example illustrates the basic concept of the reinvestment credit legislation: to provide approximately equal access to the intended cash flow benefits of the investment tax credit without regard to the particular annual profit/loss variation that may occur from one company to another.

II. OUTLINE OF TECHNICAL DEFINITIONS AND MECHANICS OF OPERATION OF THE CONCEPT

The reinvestment credit

Excess credit: As of the end of its 1982 taxable year (either calendar or fiscal), the taxpayer can compute the amount of ITC (excluding ESOP percentages) which is unusable either to reduce 1982 tax liability or as a carryback to earlier years. This amount is called the "excess investment credit." While this amount may change as a result of audits of 1982 and earlier years, it will not be affected by carrybacks of NOLs and other tax attributes from years after 1982.

Election: Within 180 days of enactment or by the date for filing the return for 1982, the taxpayer may elect to treat the excess investment credit as the new "reinvestment credit." The excess investment credit then ceases to be a carryover to later years. The taxpayer is allowed to elect an amount that is less than the excess investment credit, but the full amount is still forfeited as a carryover. The election is irrevocable, and once made the amount elected cannot be changed.

Election by affiliated groups: Affiliated groups filing consolidated returns must elect on a consolidated basis for the excess investment credit for the entire group as of the end of the 1982 taxable year. If a corporation joins the group after the end of the 1982 year, the election with respect to such corporation can be made only for that corporation and shall apply only with respect to its excess investment credit.

Discounted payment

Having forfeited the ITC carryovers by electing the reinvestment credit procedure, the taxpayer will receive discounted payments from the Treasury equal to 85 percent of its qualified investment in reinvestment credit property during the eligible period from the effective date of the provision through December 31, 1984.

Qualified investments: Under the bill, "qualified investment" means—

(1) the basis in new ITC property that is placed in service during the eligible period,

(2) qualified progress expenditures during the eligible period,

(3) amounts paid during the eligible period by the taxpayer for construction or acquisition of property, and

(4) amounts chargeable to capital account during the eligible period for self-constructed property.

Special rules will prevent double-counting of these items.

Reinvestment credit property: Qualified investments must be made in "reinvestment credit property" which means—

(1) new ITC property,

(2) qualified progress expenditure property,

(3) property which can reasonably be expected to fall into items (1) or (2) when placed in service.

The bill specifically excludes public utility property, any property in an ADR class in which the taxpayer did not own property before the end of its 1982 taxable year, office furniture and fixtures, livestock, and property used in the trade or business of furnishing recreational, food, lodging or personal services.

Information return: The discounted payments become due only after the taxpayer files an "information return" that provides information regarding the qualified investment in reinvestment credit property. The return may be filed with respect to any period that is not less than one month and does not include more than one taxable year.

Computation of a payment: The amount of qualified investment in reinvestment credit property shown on an information return reduces the balance of the reinvestment credit. (The balance cannot fall below zero.) An amount equal to 85 percent of such reduction is the discounted payment that must be made by the Treasury within 45 days of the filing of an information return.[1]

Recapture: Recapture events are treated as follows;

(a) Original ITC property: In the event that ITC property which gave rise to part of the excess investment credit is disposed of or otherwise ceases to be ITC property with respect to the taxpayer, the normal ITC recapture rules continue to work. If this reduces the excess investment credit as originally determined at the end of the 1982 year, the "Overstated Election" penalty, as set forth below, will apply.

(b) Reinvestment credit property: If reinvestment credit property is disposed of or otherwise ceases to be ITC property with respect to the taxpayer, the taxpayer may be required to pay additional tax equal to the lost amount of investment. Such tax can be reduced or completely avoided by the taxpayer if either—

(1) its remaining qualified investment in reinvestment credit property equals or exceeds the total amount actually reported on information returns, or

(2) the result in (1) above can be achieved by counting qualified investment in property that would be reinvestment credit property if the eligible period were extended through December 31, 1985.

Theft and casualties do *not* trigger this recapture rule. The tax imposed by this rule cannot be offset by tax credits.

Affiliated groups: The entire reinvestment credit remains within an affiliated group, and reinvestment can take place anywhere within the group. The subsequent disposition of a subsidiary which contributed to the excess investment credit does *not* carry with it any reinvestment credit attributes. But the disposition of a subsidiary which owns reinvestment credit property *does* trigger the "Reinvestment Credit Property" recapture rule noted above because the property will have left the taxpayer.

---

[1] To interact with technical features of the Internal Revenue Code, the bill treats the 85 percent of qualified investments in reinvestment credit property as an overpayment of tax which is then refunded by Treasury.

Overstated election: If the taxpayer either deliberately or unintentionally (e.g., due to later audit adjustments that reduce the ITC carryovers to 1982) elects an amount of reinvestment credit that is greater than the actual excess investment credit as subsequently determined, the entire amount of the excess election will be treated as an underpayment of tax and will be payable as such by the taxpayer.

Repayment of reinvestment credit

The reinvestment credit mechanism requires the repayment of the entire elected amount, not just the 85 percent discounted payment. (If the qualified investments in reinvestment credit property do not fully exhaust the credit, i.e., if a portion remains unused, the repayment is based on the actual amount by which the credit is reduced.)

Higher interim taxes: By electing an amount of reinvestment credit, the taxpayer foregoes the use of such ITCs as carryovers to years after 1982. By so doing, the taxpayer may pay higher taxes in 1983 and later years than would have been the case if the ITCs had been retained and used. Such higher taxes are one form of repayment of the reinvestment credit.

Additional tax: To the extent that higher interim taxes do not fully repay the reinvestment credit, the bill requires the computation and payment in taxable years 1986 through 1990 of such additional taxes as are necessary to meet a schedule of 20 percent per year until 100 percent of the reinvestment credit is repaid.

Reinstatement of credits

When the election of the reinvestment credit is made, the elected amounts are suspended in time rather than allowed as carryovers to later years. When the reinvestment credit is repaid, the credits are reinstated at specific times and in a specific order.

Types of credits: There are four types of credits:

(1) the "cancelled credit" (i.e., the amount of higher interim taxes);

(2) the "unused reinvestment credit" (i.e., the amount of elected reinvestment credit that is not reduced by qualified investments);

(3) the "overstated election credit" (i.e., the excess of the elected amount over the actual excess investment credit), and

(4) the "repaid reinvestment credit" (i.e., the additional tax paid under the 20 percent annual minimum computations).

Timing: The unused reinvestment credit will be taken into account for taxable years ending after 1984. The overstated election credit will be taken into account for taxable years ending after 1985. The repaid reinvestment credit will be taken into account for taxable years for which the additional tax is paid.

Ordering: Beginning with the earliest ITC amounts still viable at the end of the 1982 taxable year, credits will be attributable to such amounts in the following order—

(1) first, the cancelled credit;

(2) second, the unused credit;

(3) third, the overstated credit; and

(4) fourth, the repaid reinvestment credit.

Safe harbor leasing

Reinvestment credit property which gives rise to a discounted payment will not be eligible for safe harbor leasing.

SECTION-BY-SECTION DESCRIPTION OF THE "WORK OPPORTUNITIES AND RENEWED COMPETITION ACT OF 1983"

OVERVIEW OF THE STRUCTURE OF THE ACT

The Work Opportunities and Renewed Competition Act of 1983 (the "Act") implements the new reinvestment credit mechanism by—

(a) amending various sections of the Internal Revenue Code (the "Code") related to the investment tax credit (the "ITC") in order to calculate the amount of the reinvestment credit and to reinstate some portions of the reinvestment credit as ITC carryovers in later years,

(b) inserting new sections and provisions into the Code to create the reinvestment credit, to compute the discounted payment by Treasury that is provided in exchange for the election of the credit, and to guarantee repayment by the taxpayer of the discounted payment, and

(c) amending the overpayment, refund, and underpayment sections of the Code to initiate the discounted payments by Treasury and to impose penalties on the electing taxpayer in certain situations.

The following description is presented in the order in which the new Code provisions are set forth in the sections of the Act. The paragraph headings refer to the new or amended sections of the Code, unless it is specifically noted that a section of the Act is being discussed.

SECTION 1 OF THE ACT

The short title of the Act is set forth. Amendments and insertions referred to in the Act are expressly applied to sections or other provisions of the Code.

SECTION 2(A) OF THE ACT—THE AMOUNT OF THE REINVESTMENT CREDIT

§ 46(i)—The Amount and the Election of the Reinvestment Credit

Code section 46 (relating to the amount of the ITC) is amended by adding a new subsection (i) that allows the election of the reinvestment credit by the taxpayer and defines the basic terms necessary to the computation of the elected amount.

§ 46(i)(1)—Election; Loss of Carryover. The taxpayer is allowed to elect to treat any portion of the "excess investment credit" (a defined term) for the "excess credit year" (a defined term) as the "reinvestment credit" which is described in, and is subject to the rules of, new Code section 59 that is described below. For an electing taxpayer, the entire excess investment credit—not just the amount elected as the reinvestment credit—shall be excluded from ITC carryback or carryover computations until later years as allowed by the special rules in new Code section 46(b)(4) described below. Thus, although the electing taxpayer will not be required by the Code to elect to treat all of the excess investment credit as the reinvestment credit, the effect of the failure to make a 100 percent election is the loss of the carryover with respect to the unelected amount for three taxable years. This carryover restriction will penalize primarily the taxpayer who elects an amount of reinvestment credit that is substantially smaller than the full excess investment credit in anticipation that the unelected portion will be a fully usable ITC carryover in the very near future.

§ 46(i)(2)(A)—Timing of the Election. The election of the reinvestment credit shall be made not later than the later of—

(1) the last day for filing the tax return for the excess credit year (including an extension of time), or

(2) 180 days after enactment of the Act.

§ 46(i)(2)(B)—Consolidated Returns. Affiliated groups of corporations that file a consolidated return for the excess credit year must make the reinvestment credit election through the common parent with respect to the consolidated excess investment credit of the entire group. A corporation which has become a member of the affiliated group after the end of the excess credit year of the group must take a separate election that applies only to its excess investment credit. Thus, although the new member is a member of the group during the reinvestment period under new Code section 59 and the repayment period under new Code section 60, both of which are described below, the separate election requires that the reinvestment credit mechanism of such member be treated separately for all purposes rather than combined with the consolidated computations of the group.

§ 46(i)(2)(C)—Irrevocable Election. Once made, the taxpayer's reinvestment credit election cannot be revoked under any circumstances. Furthermore, the taxpayer cannot change the amount elected. Thus, once made, the election binds the taxpayer to the decision to use the reinvestment credit rules rather than the regular ITC carryover rules. Similarly, the election of an amount create the potential for taxpayer penalties if such amount is subseqently determined to be more or less than the actual excess investment credit.

§ 46(i)(2)(D)—Filing the Election. The taxpayer shall file the election with the District Director where the current taxable year's return will be filed. This election can be filed without prior Treasury regulations in order to accelerate the implementation of the reinvestment credit process.

§ 46(i)(3)—Definition of Terms

§ 46(i)(3)(A)—"Excess Investment Credit." "Excess investment credit" is a defined term that is precisely calculable at any point in time. In general, it is the total amount of ITC that was available but unusable by the taxpayer as of the end of the "excess credit year," which is defined below. This amount is calculated as the sum of—

(1) the ITC carryovers to such year, plus

(2) the ITC generated in such year, minus

(3) any ITC attributable to employee plan percentages (i.e., ESOPs and TRASOPs), minus

(4) the ITC limitation for such year (i.e., the 90 percent limitation on tax liability), minus

(5) the ITC carryback allowable from such year that is used with respect to prior years.

Furthermore, the excess investment credit is determined as of the close of the excess credit year. Thus, carrybacks of net operating losses (NOLs), capital losses, and foreign tax credits to such year or to earlier taxable years from later taxable years will not change the amount of excess investment credit. However, revisions to various income, deduction and credit computations in the excess credit year, or in a prior year that affects the excess credit year, such as through audit adjustments, will affect the amount of the excess investment credit.

§ 46(i)(3)(B)—"Excess Credit Year." The term "excess credit year" means the taxpayer's last taxable year which ended before January 1, 1983. Thus, for calendar year taxpayers, 1982 was the excess credit year while for June 30 fiscal year taxpayers, the year July 1, 1981 through June 30, 1982 was the excess credit year.

§ 46(i)(4)—Interaction with NOL Carryback Election. A taxpayer that experienced an NOL in its excess credit year and that made an election under section 172(b)(3)(C) to relinquish the 3-year carryback of such NOL is allowed to revoke such election at the time of the reinvestment credit election, if it elects to treat as reinvestment credit all of the excess investment credit that is attributable to such revocation (i.e., the additional ITC carryover that are generated by the reduced tax liability limitation in the years to which the NOL is carried back). Such revocation must be made in a statement that is attached to the election that is made under section 46(i) with respect to the reinvestment credit.

SECTION 2(b) OF THE ACT—THE REINVESTMENT PROCESS' DISCOUNTED TREASURY PAYMENTS

§ 59—The Reinvestment Credit

§ 59 (a), (b)—Overpayment of Tax; Reductions in the Reinvestment Credit. The process of exchanging currently unusable ITCs for discounted payments from the Treasury begins with the elected amount of reinvestment credit as the base number. This credit is then reduced by amounts of "qualified investment" in "reinvestment credit property" shown on an "information return" for an "information return period." (These are defined terms that are discussed below.) An amount equal to 85 percent of each such reduction in the credit is then deemed to be an overpayment of tax by the taxpayer for the taxable year in which the information return period falls.

The reinvestment credit can also be increased by recapture events described below, thereby creating the potential for additional reinvestment reductions. The net reduction under section 59(b)(2) (i.e., aggregate reductions less aggregate recapture increases) cannot reduce the reinvestment credit to less than zero.

§ 59(c) (1), (2), (4)—Recapture Generally. If, prior to 1986, any reinvestment credit property in which the electing taxpayer has qualified investment is disposed of or otherwise ceases to be ITC property with respect to the taxpayer, the taxpayer will recapture as additional tax an amount equal to the excess of the net reduction in the reinvestment credit (under section 59(b)(2)) over the total amount of qualified investment in reinvestment credit property that remains after the disposition or cessation event. This computation takes into account the entire amount, or pool, of qualified investment in reinvestment credit property for taxpayers who have cumulative qualified investments that exceed the reductions in the reinvestment credit claimed on the information returns (i.e., they have more qualified investment than the amount of elected reinvestment credit). Thus, the disposition or cessation removes qualified investment from the total pool, but as long as the remaining level of qualified investment exceeds net reductions, there is no recapture.

The calculation of the amount of additional tax required by recapture will be made as of the end of the taxable year, rather than at the time of the event. Casualties and thefts will not be treated as dispositions or cessations for purposes of this section. The additional tax will be treated as a tax for purposes of chapter 1 of the Code, excluding for purposes of claiming credits under sections 31 through 45.

§ 59(c)(3)—Substitution for Recapture. The taxpayer who suffers a recapture event described above is allowed to add to the total pool of qualified investment in reinvestment credit property such additional amounts as would be eligible if the definition of reinvestment credit property covered the period through December 31, 1985 rather than through December 31, 1984.

§ 59(d)—Definition of Terms

§ 59(d)(1)—"Qualified Investment." The term "qualified investment" means—

(1) the basis of new ITC property placed in service by the taxpayer,

(2) qualified progress expenditures (as defined by section 46(d)(3)) of the taxpayer,

(3) amounts paid to other persons by the taxpayer for acquisition of property by, or construction of property for, the taxpayer, and

(4) amounts chargeable to capital account by the taxpayer for self construction of property.

Such amounts are eligible only with respect to the period after September 30, 1983 through the end of 1984. The overlap of various payments and amounts among the four categories is not to be counted twice. The definition qualifies the full basis of property placed in service during the designated period, even if progress payments were made, or the property was acquired, prior to the designated period.

§ 59(d)(2)—"Reinvestment Credit Property." The qualified investment must be made in "reinvestment credit property," which means—

(1) new ITC property,

(2) progress expenditure property, or

(3) property which it is reasonable to believe will be new ITC property when it is ultimately placed in service by the taxpayer.

The "reasonable belief" standard for the third category of property is to be applied based on the facts known at the close of the information return period. Property specifically excluded from the definition includes public utility property, property in an ADR guideline class in which the taxpayer (or a predecessor taxpayer) had not invested prior to the end of the excess credit year, office furniture and fixtures, property used in the trade of business of furnishing recreational, food, lodging or personal services, and livestock.

§ 59(d)(3)—"Information Return." The taxpayer will report the qualified investment in reinvestment credit property by filing an "information return" which provides information with respect thereto. The return is to be filed with the District Director where its current year tax return will be filed.

§ 59(d)(4)—"Information Return Period." The information return can be for any "information return period" of not less than one month and not more than one taxable year. The period must begin after September 30, 1983 and end before January 1, 1985.

§ 59(e)—Overstated Election

An electing taxpayer who first elects an amount of reinvestment credit that exceeds the excess investment credit and then reports qualified investments in reinvestment credit property that reduce the reinvestment credit by an amount that is greater than the excess investment credit will be treated as having underpaid his tax under section 6651. The underpayment will be the amount equal to the excess of the net reduction under section 59(b)(2) over the actual excess investment credit, and such amount may be assessed by the IRS in the manner of a mathematical or clerical error on a return.

The electing taxpayer can trigger this penalty by knowingly electing an excessive reinvestment credit (i.e., an amount which is greater than the excess investment credits which he can substantiate) and then filing information returns and claiming refunds with respect to the full amount. However, because the excess investment credit is a defined term, the amount of which may change due to audit adjustments for the excess credit year or earlier years, the taxpayer also may inadvertently elect an amount which is later determined to be excessive. But the penalty only applies after the taxpayer has already benefitted from the 85 percent payment that follows the filing of information returns.

§ 59(f)—Affiliated Group as "the Taxpayer"

In the case of an affiliated group that has made the election through the common parent as required under section 46(i)(2)(B), the entire group is treated as the taxpayer for purposes of section 59. Thus, either the disposition of reinvestment credit property by a member of the group or the disposition by the group of a member which owns such property triggers the recapture provisions of section 59(c). But the reductions in reinvestment credit under section 59(a), which give rise to the overpayment and refund, are calculated with respect to the entire group. Therefore, the elected amount of reinvestment credit remains with the entire group (which is the taxpayer) even though a member whose unusable ITC contributed to the excess investment credit subsequently ceases to be a member of the group. In short, the elected amount of reinvestment credit cannot leave the group, but the qualified investment in reinvestment credit property can be disposed of by, or cease to be reinvestment credit property with respect to, the group.

This circumstance does not apply when a member of the group has made a separate election as required under section 46(i)(2)(B)(ii). A departure from the group by this member or a disposition or cessation event with respect to its property affects only the single members, not the entire group.

§ 60—Recapture of Reinvestment Credit Refunds

The Act requires the repayment of the discounted payments that are refunded to the taxpayer through the overpayment provisions. Such repayment can occur either in the form of higher taxes in the years 1983, 1984 and 1985 (because the ITC carryovers have been given up), or as an additional tax from 1986 through 1990 (under the provisions of new Code section 60), or through a combination of the two.

§ 60(a), (b), (d)—The Additional Tax. The amount of the additional tax is based on the amount of the net reduction (i.e., the qualified investment less recapture taxes) in the reinvestment credit as determined under section 59(b)(2), not just the 85 percent which has been refunded. The full amount of additional tax will be payable at the rate of 20 percent per year for the five taxable years ending in 1986 through 1990. Each year's calculation is cumulative; for example, 60 percent of the total amount (or 20 percent times 3 years) must be paid through the third year. But the calculated amount for each year is then reduced by the sum of—

(1) such additional taxes paid in preceding years, plus

(2) the aggregate of "cancelled credits" through the current year.

The term "cancelled credit" means the excess of the amount of ITC that could

have been claimed in a given year if the section 46(i) reinvestment credit election had not been made, over the amount of ITC that was actually available in such year after the election was made. Thus, the cancelled credit is the full dollar amount of the ITC that was actually usable in a later year but that was foregone by the taxpayer in exchange for the discounted payment in an earlier year.

§ 60(c)—Additional Tax Not Creditable. The additional tax under section 60 will be treated as a tax for purposes of chapter 1 of the Code, excluding for purposes of claiming credits under sections 31 through 45.

SECTION 2(C) OF THE ACT—REINSTATEMENT OF THE EXCESS INVESTMENT CREDIT

The reinvestment credit election enables the taxpayer to forego currently unusable ITCs in exchange for a discounted payment. As part of the process, the entire excess investment credit—not just an elected amount of reinvestment credit—is suspended as an ITC carryover. To the extent that the benefit of the discounted payment is either repaid as an additional tax under section 60 or is not received at all because the taxpayer fails to make sufficient reinvestments, the ITC carryover is restored for the taxpayer's potential benefit.

§ 46(b)(4)—Reinstatement Procedures

To reinstate amounts of excess investment credit and to provide for an ordering for the use of credits that comprised the excess credit at the close of the excess credit year, Code section 46(b) is amended by inserting a new paragraph (4).

§ 46(b)(4)(A), (C)—Timing. If the excess investment credit exceeds the cancelled credit (as defined above), the difference is reinstated in three categories for use by the taxpayer.

(1) The "unused reinvestment credit," which is that portion of the elected amount which exceeds the net reductions under section 59(b)(2) (i.e., the portion of the elected amount which is not used by the taxpayer) is reinstated for taxable years ending after December 31, 1984.

(2) The amount by which the excess investment credit exceeds the elected amount of reinvestment credit (i.e., the amount by which the election under-states the excess investment credit) is reinstated for taxable years ending after December 31, 1985.

(3) The "repaid investment credit," which is the aggregate of additional taxes imposed under section 60(a), is reinstated for the taxable year in which such tax is imposed.

Since the cancelled credit produces its benefit through the discounted payment and is neither repaid nor unused, there is no need to reinstate it for the taxpayer's use.

§ 46(b)(4)(B)—Ordering Rule. The ITCs that gave rise to the excess investment credit as of the end of the excess credit year must be accounted for in a specified order as the reinstatement process moves forward. Cancelled credits are treated as the oldest ITC carryovers. Unused credits follow the cancelled credit. The understated election amount is third. The repaid reinvestment credit is allocated to the most recent ITCs. The reinstated credits are subject to the 15-year carryover period as though they had not been suspended as ITC carryovers. Thus, for example, a repaid investment credit that is reinstated in 1990 and is attributable to an ITC arising in 1982 has only 7 additional carryover years after 1990, not the full 15.

SECTION 2(D) OF THE ACT—OVERPAYMENT AND REFUND

§ 6401(d)—Overpayment. The overpayment provisions of section 6401 are amended by adding new subsection (d) to specify that 85 percent of the section 59(a) reductions in reinvestment credit are treated as overpayments of tax.

§ 6431—Refund. A new Code section 6431 is added to require the Treasury to refund the amount determined under section 6401(d). Such refund is to be paid within 45 days of the filing of the information return which reports the qualified investment that gives rise to the refund.

SECTION 2(E) OF THE ACT—EXCLUSION OF REINVESTMENT CREDIT PROPERTY FROM SAFE-HARBOR LEASING

The safe harbor leasing provisions of section 168(f)(8) are amended by excluding from the definition of "qualified leased property" an amount of reinvestment credit property that equals the net reductions in the reinvestment credit under section 59(b)(2).

SECTION 3 OF THE ACT—EFFECTIVE DATE

The amendments shall be effective upon enactment to allow the election to be made. The effective date of the reinvestment period is fixed in the bill as October 1, 1983.

S. 1593

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE; ETC.

(a) SHORT TITLE.—This Act may be cited as the "Work Opportunities and Renewed Competition Act of 1983."

(b) AMENDMENT OF 1954 CODE.—Whenever in this Act an amendment or an insertion is expressed in terms of an amendment to, or an insertion of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Internal Revenue Code of 1954.

SECTION 2. EXCESS INVESTMENT CREDIT TREATED AS REINVESTMENT CREDIT.

(a) DETERMINATION OF EXCESS INVESTMENT CREDIT AMOUNT; ELECTION OF REINVESTMENT CREDIT.—Section 46 (relating to the amount of the investment credit) is amended by inserting after subsection (h) the following new subsection (i):

"(i) ELECTION TO TREAT EXCESS INVESTMENT CREDIT AS REINVESTMENT CREDIT.—

"(1) IN GENERAL.—The taxpayer may elect to treat all or any amount of the excess investment credit for the excess credit year as the reinvestment credit for purposes of section 59. In the case of a taxpayer electing under this subsection, the excess investment credit shall not be an investment credit carryback or carryover under subsection (b) except as provided under paragraph (4) thereof.

"(2) TIME AND MANNER OF MAKING ELECTION.—

"(A) IN GENERAL.—An election under this subsection with respect to the excess investment credit for the excess credit year shall be made not later than the later of—

"(i) the last day, including any extension of time, for filing the taxpayer's return of tax imposed by this chapter for the excess credit year, or

"(ii) 180 days after the date of enactment of this subsection.

"(B) CONSOLIDATED RETURNS.—

"(i) AFFILIATED GROUPS AS OF THE END OF THE EXCESS CREDIT YEAR.—In the case of an affiliated group (as defined in section 1504(a)) of corporations that make a consolidated return under section 1501 for the excess credit year, the election under this subsection shall be made by the common parent and shall apply to the consolidated excess investment credit of members of such group except a member of such group that is subject to clause (ii).

"(ii) MEMBERS ADDED TO AN AFFILIATED GROUP AFTER THE END OF THE EXCESS CREDIT YEAR.—In the case of a corporation which becomes a member of an affiliated group after the end of the excess credit year of such group, the election under this subsection shall be made only by such member and shall apply only to the excess investment credit of such member.

"(C) IRREVOCABLE.—The election made under this subsection shall not be revoked, and the amount elected shall not be changed.

"(D) FILING.—The election under this subsection shall be filed with the District Director where the taxpayer's return of tax imposed by this chapter will be filed for the current taxable year.

"(3) DEFINITIONS.—

"(A) EXCESS INVESTMENT CREDIT.—For purposes of this section, the term 'excess investment credit' means the excess of—

"(i) the amount of credit determined under subsection (a)(1) for the excess credit year, as of the close of such year, determined without regard to—

"(I) subsection (a)(1)(C), and

"(II) any amount attributable to the employee plan credit (within the meaning of section 48(o)(3)), over

"(ii) the sum of—

"(I) the limitation determined under subsection (a)(3) for the excess credit year, determined without regard to any carryback of a net operating loss determined under section 172, a net capital loss determined under section 1212, or a foreign tax credit determined under section 904, to the excess credit year or any taxable year preceding such year from a taxable year ending after such year, plus

"(II) the amount of carryback from the excess credit year allowable under subsection (b)(2).

"(B) EXCESS CREDIT YEAR.—For purposes of this subsection, the term 'excess credit year' means the last taxable year which ends before January 1, 1983.

"(4) SPECIAL RULE FOR REVOCATION OF A NET OPERATING LOSS CARRYOVER ELECTION.—Notwithstanding the last sentence of section 172(b)(3)(C) (relating to an election to relinquish a net operating loss carryback), in the case of an election made under such section prior to the enactment of this subsection to relinquish the carryback period with respect to a net operating loss for the excess credit year, such election shall be revoked if the taxpayer—

"(i) elects under paragraph (1) to treat all of the excess investment credit attributable to such revocation as reinvestment credit for purposes of section 59, and

"(ii) attaches a statement of revocation of the election made under section 172(b)(3)(C) to the election made under paragraph (1)."

(b) REINVESTMENT CREDIT.—Subchapter A of chapter 1 (relating to determination of tax liability) is amended by inserting after section 58 the following new part and new sections:

"PART VII—REINVESTMENT CREDIT

"Sec. 59. Reinvestment Credit.

"Sec. 60. Recapture of Reinvestment Credit Refunds.

"SEC. 59. REINVESTMENT CREDIT.

"(a) OVERPAYMENT OF TAX.—

"(1) GENERAL RULE.—An amount equal to 85 percent of each reduction determined under paragraph (2) shall be treated as an overpayment of tax under section 6401(d) for the taxable year which includes the information return period.

"(2) REDUCTION IN REINVESTMENT CREDIT.—The reduction determined under this subsection shall be equal to so much of the qualified investment of the taxpayer in reinvestment credit property as is reported on an information return filed for an information return period.

"(b) REDUCTIONS AND INCREASES IN REINVESTMENT CREDIT.—

"(1) IN GENERAL.—The amount of reinvestment credit, as elected under section 46(i), shall be reduced (but not below zero) by the net reduction as determined under paragraph (2).

"(2) NET REDUCTION.—For purposes of this section, the net reduction is the sum of—

"(A) the aggregate amount of reductions determined under subsection (b), less

"(B) the aggregate amount of any increases in tax under subsection (c).

"(c) RECAPTURE OR SUBSTITUTION OF QUALIFIED INVESTMENT.—

"(1) GENERAL RECAPTURE RULE.—If at any time before January 1, 1986, any reinvestment credit property in which the taxpayer has qualified investment is disposed of, or otherwise ceases to be section 38 property with respect to the taxpayer, the tax imposed by this chapter shall be increased by an amount, determined as of the close of the taxable year, equal to the sum of—

"(A) the net reduction determined under subsection (b)(2), less

"(B) the amount of qualified investment in reinvestment credit property as determined after taking into account all such dispositions or cessations.

"(2) SPECIAL RECAPTURE RULE FOR CASUALTIES, ETC.—Paragraph (1) shall not apply to reinvestment credit property that is disposed of or otherwise ceases to be section 38 property with respect to the taxpayer on account of its destruction or damage by fire, storm, shipwreck, or other casualty, or by reason of its theft.

"(3) SUBSTITUTION.—For purposes of the determination under paragraph (1)(B), the amount of qualified investment in reinvestment credit property with respect to which the disposition or cessation has occurred may be reduced by amounts which would constitute qualified investment in reinvestment credit property if 'January 1, 1986' were substituted for 'January 1, 1985' in subsection (d)(1).

"(4) SPECIAL RULE.—Any increase in tax under paragraph (1) shall be treated as tax imposed by this chapter except for purposes of determining the amount of any credit allowable under subpart A of part IV of this subchapter.

"(d) DEFINITIONS.—

"(1) QUALIFIED INVESTMENT.—For purposes of this section, the term 'qualified investment' means the aggregate of—

"(A) the basis of each new section 38 property of the taxpayer (as defined by section 48(b)) placed in service by the taxpayer, reduced by the amounts described in subparagraphs (C) and (D) and taken into account with respect to a preceding taxable year,

"(B) qualified progress expenditures (as defined by section 46(d)(3)) of the taxpayer, reduced by the amounts described in subparagraphs (C) and (D) and taken into account with respect to a preceding taxable year,

"(C) to the extent not included in the amounts described in subparagraphs (A) or (B) for the taxable year, the amount paid by the taxpayer to another person for acquisition of property by the taxpayer or for construction of property for the taxpayer, and

"(D) to the extent not included in the amounts described in subparagraphs (A) or (B) for the taxable year, the amount which is property chargeable to capital account with respect to property being constructed by the taxpayer

during the period after September 30, 1983 and before January 1, 1985.

"(2) REINVESTMENT CREDIT PROPERTY.—

"(A) IN GENERAL.—For purposes of this section, the term 'reinvestment credit property' means property which is—

"(i) new section 38 property (as defined by section 48(b)),

"(ii) progress expenditure property (as defined by section 46(d)(2)), or

"(iii) property which it is reasonable to believe, based on the facts known at the close of the information return period, will be described in clause (i) when placed in service by the taxpayer.

"(B) EXCLUDED PROPERTY.—For purposes of this section, the term 'reinvestment credit property' does not include—

"(i) public utility property (within the meaning of section 167(1)(3)(A)),

"(ii) property described by the Secretary in any asset guideline class pursuant to section 167, only if the taxpayer (or any predecessor taxpayer) had not placed in service any property in such asset guideline class prior to the end of the excess credit year (as defined in section 46(i)(3)(B)),

"(iii) office furniture and fixtures,

"(iv) property used in carrying out the activities of wholesale, retail or, distributive trade,

"(v) property used in providing personal, financial or professional services,

"(vi) property used in the trade or business of providing recreation, lodging, food and beverages, or

"(vii) livestock.

"(3) INFORMATION RETURN.—For purposes of this section, the term 'information return' means a return signed by the taxpayer and filed with the District Director where the taxpayer's return of tax imposed by this chapter will be filed for the taxable year, which provides information with respect to the qualified investment in reinvestment credit property.

"(4) INFORMATION RETURN PERIOD.—For purposes of this section, the term 'information return period' means a period beginning after September 30, 1983 and ending before January 1, 1985 and comprising not less than one month and not more than one taxable year, for which an information return is filed by the taxpayer.

"(e) OVERSTATEMENT OF REINVESTMENT CREDIT.—If the net reduction determined under subsection (b)(2) exceeds the excess investment credit (as defined by section 46(i)(3)(A), the entire amount of such excess shall be treated as an underpayment of tax under section 6651 (relating to failure to file a tax return or to pay tax) and may be assessed in the same manner as in the case of a mathematical or clerical error appearing upon the return.

"(f) TREATMENT OF AFFILIATED GROUP.—For purposes of this section, in the case of an affiliated group that has made on election subject to section 46(i)(2)(B), the affiliated group shall be deemed to be the taxpayer.

"SEC. 60. RECAPTURE OF REINVESTMENT CREDIT REFUNDS.

"(a) INCREASE IN TAX.—There shall be added to the amount of tax imposed by this chapter on a taxpayer electing under section 46(i) the amount determined under subsection (b).

"(b) COMPUTATION OF ADDITIONAL TAX.—

"(1) IN GENERAL.—The amount determined under this subsection shall be the excess of—

"(A) the applicable percentage of the net reduction in the reinvestment credit (as determined under section 59(b)(2)), over

"(B) the sum of—

"(i) the aggregate amount of cancelled credit for the taxable year and for all preceding taxable years, plus

"(ii) the aggregate amount of additional tax imposed by subsection (a) for all taxable years preceding the taxable year.

"(2) APPLICABLE PERCENTAGE.—The applicable percentage of any taxpayer for any taxable year under this subsection shall be determined under the following table:

For the taxable year ending:	*The applicable percentage is:*
In 1986	20
In 1987	40
In 1988	60
In 1989	80
In 1990	100

"(c) SPECIAL RULE.—Any additional tax imposed under subsection (a) shall be treated as a tax imposed by this chapter except for purposes of determining the amount of any credit allowable under subpart A of part IV of this subchapter.

"(d) CANCELLED CREDIT.—For purposes of this section, the term 'cancelled credit' means the amount by which—

"(1) the credit allowed by section 38 for the taxable year, determined without regard to the election made under section 46(i), exceeds

"(2) the credit allowed by section 38 for the taxable year."

(c) REINSTATED INVESTMENT CREDIT.—Section 46(b) is amended by inserting after paragraph (3) the following new paragraph (4):

"(4) REINSTATEMENT OF AMOUNTS OF EXCESS INVESTMENT CREDIT AMOUNT AS CARRYOVERS.—

"(A) IN GENERAL.—The amount, if any, by which the excess investment credit (as defined by subsection (i)(3)(A)) exceeds the amount of cancelled credit (as defined by section 60(d)), determined as of the end of the taxable year, shall be taken into account under subsection (a)(1)(A)—

"(i) to the extent of the unused reinvestment credit, for taxable years ending after December 31, 1984,

"(ii) to the extent of the amount by which the excess investment credit exceeds the reinvestment credit, for taxable years ending after December 31, 1985, and

"(iii) to the extent of the amount of repaid reinvestment credit, for taxable years for which a tax is imposed by section 60(a).

"(B) ORDERING RULE FOR USE OF EXCESS INVESTMENT CREDIT.—The unused credits comprised in the excess investment credit shall be allocated, in the order of the unused credit years to which they are attributable—

"(i) first to the amount of cancelled credit (as defined by section 60(d)), then

"(ii) to the amount of unused reinvestment credit, then

"(iii) to the amount, if any, by which the excess investment credit exceeds the

amount elected under subsection (i), and then

"(iv) to the amount of repaid reinvestment credit.

"(C) DEFINITIONS.—

"(i) UNUSED REINVESTMENT CREDIT.—For purposes of this subsection, the term 'unused reinvestment credit' means the amount by which—

"(I) the amount elected under subsection (i), exceeds

"(II) the net reduction determined under section 59(b)(2) as of December 31, 1984.

"(ii) REPAID REINVESTMENT CREDIT.—For purposes of this subsection, the term 'repaid reinvestment credit' means the aggregate amount of tax imposed by section 60(a)."

(d) OVERPAYMENT OF TAX; TAX REFUND.—

(1) Section 6401 is amended by inserting after subsection (c) the following new subparagraph (d):

"(d) REINVESTMENT CREDIT.—The term 'overpayment' includes the amounts determined under section 59(a) (relating to the reinvestment credit)."

(2) Subchapter B of chapter 64 of subtitle F (relating to rules of special application of abatements, credits and refunds) is amended by inserting after section 6430 the following new section 6431:

"SEC. 6431. REINVESTMENT CREDIT.

"(a) REFUND GENERALLY.—The overpayment of tax determined under section 6401(d) (relating to the reinvestment credit) shall be refunded by the Secretary to the taxpayer following the filing by the taxpayer of an information return, as defined in section 59(d)(3). Such refund payment shall be made within 45 days of the filing of such return."

(e) EXCLUSION OF REINVESTMENT CREDIT PROPERTY FROM SAFE HARBOR LEASING ELECTION.—Section 168(f)(8)(D)(iv), as amended by section 208(b)(3) of the Tax Equity and Fiscal Responsibility Act of 1982, is amended by deleting "or" at the end of subclause (IV), by substituting a comma and "or" in lieu of the period at the end of subclause (V), and by inserting after subclause (V) the following new subclause (VI):

"(VI) reinvestment credit property (as defined in section 59(d)(2)) except to the extent of the qualified investment (as defined in section 59(d)(1)) in such property that is in excess of the total amount of qualified investment that is equal to the net reduction determined under section 59(b)(2)."

SEC. 3. EFFECTIVE DATE.

The amendments made by section 2 shall apply upon enactment.

S. 1594

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Basic Industries Reindustrialization Act."

SECTION 1. SUSPENSION OF LIMITATIONS ON INVESTMENT CREDITS.

(a) SUSPENSION.—Section 46(a) of the Internal Revenue Code of 1954 is amended by inserting a new paragraph (8) to read as follows:

"(8) Suspension of limitations.—

"(A) IN GENERAL.—Paragraph (3) of this subsection shall not apply to so much of the credit allowed by section 38 as is attributable to application of the regular percentage to qualified investment (determined under subsections (c) and (d)) of a taxpayer if such qualified investment is with respect to the seven-year period beginning with the taxpayer's taxable year ending after January 1983.

"(B) ORDER OF APPLICATION.—For purposes of this paragraph, the amount of credit allowed in any taxable year shall be determined by reference first to property to which this paragraph does not apply.

"(C) REPORT BY PRESIDENT.—The President shall submit to Congress a report on or before December 1, 1989 recommending whether the 7-year period described in subparagraph (A) of this paragraph should be extended.

In making such recommendations the President shall take into account to the extent possible in each case the projected level of investment credits to be generated in years subsequent to the report, the investment needs of industry, and the projected ability of such industry to utilize the benefits of the investment credits so generated on a current basis without the benefits of this paragraph.

(b) EXCESS CREDIT TREATED AS OVERPAYMENT OF TAX.—Subsection (O) of section 6401 of the Internal Revenue Code of 1954 (relating to excessive credits) is amended—

(1) by inserting "38 (relating to investment in depreciable property)," before "39" the first place it appears, and

(2) by striking out "39 and 43" and inserting in lieu thereof "38, 39, and 43".

(c) CONFORMING CHANGES.—

(1) Section 6513 of such Code (relating to time return deemed filed and tax considered paid) is amended by adding at the end thereof the following new subsection:

"(f) TIME INVESTMENT CREDITS CONSIDERED PAID.—For purposes of sections 6511 and 6512, the taxpayer shall be considered as paying an amount of tax on the last day prescribed by law for payment of the tax (determined without regard to any extension of time and without regard to any election to pay the tax in installments) equal to so much of the credit allowed by section 38 (relating to investment credit) as is treated under section 6401(b) as an overpayment of tax.".

(2) The heading for section 6611 (d) of such Code is amended to read as follows:

"(d) ADVANCE PAYMENT OF TAX, PAYMENTS OF ESTIMATED TAX, CREDIT FOR INCOME TAX WITHHOLDING, AND TIME INVESTMENT CREDITS, CONSIDERED PAID.—"

SEC. 2. TENTATIVE REFUND OF INVESTMENT TAX CREDIT.

(a) Section 6411(d) of such Code (relating to tentative carryback and refund adjustments) is amended as follows:

(1) by inserting after the words "tentative refund" the words "of so much of the credit allowed by section 38 (relating to investment credit) as is treated under section 6401 (b) as an overpayment of tax for the taxable year, or";

(2) by deleting the word "and" at the end of subsection (1)(B);

(3) by inserting immediately after "(C)" in subsection (1) the words "in the case of an application for a refund of an amount treated as an overpayment of tax under section 1341(b)(1),";

(4) by deleting the period at the end of subsection (1)(C)(v), and substituting therefor a comma followed by the word "and"; and

(5) by adding at the end of subsection (1)(C) the following new subsection:

"(D) In the case of an application for a refund of the amount of a credit allowed by section 38 (relating to investment credit) and treated as an overpayment of tax under section 6401(b), set forth such information in such detail and with such supporting data as the Secretary may prescribe by regulation.".

(b) Section 6213(b)(3) of such Code (relating to assessments arising out of tentative carryback or refund adjustments) is amended by adding a comma after "carryback" and by inserting immediately before the words "he may assess" the words "or the amount creditable under section 38 and treated as a refund under section 6401(b),".

SEC. 3. AUTHORIZED OF APPROPRIATIONS.

There are hereby authorized to be appropriated such sums as may be necessary to carry out the purposes of this Act.

By Mr. TSONGAS:

S.J. Res. 125. Joint resolution designating the first week of October as "National Remanufacturing Week"; to the Committee on the Judiciary.

NATIONAL REMANUFACTURING WEEK

● Mr. TSONGAS. Mr. President, the growth of the remanufacturing industry in this country represents potential relief for America's unemployment and natural resource problems. Remanufacturing offers significant benefits in reduced energy and mineral consumption, and reduced solid waste disposal problems. It is labor intensive and offers consumers alternative goods at significant cost savings.

In order to recognize the contribution that remanufacturing can make I am introducing a joint resolution to designate the first week in October as National Remanufacturing Week.

I would also like to share with my colleagues remarks made by Harry A. Holzwasser, president of Arrow Automotive Industries, Inc., regarding the remanufactured car industry. Mr. Holzwasser's statement illuminates an innovative concept that could stimulate industry, create jobs, and fill a presently unmet consumer demand.

Mr. President, I ask unanimous consent that the full text of the joint resolution and a copy of Mr. Holzwasser's statement be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S.J. RES. 125

Whereas remanufacturing offers employment opportunities to workers in regions of our country hard hit by recession and plant closings at a time when we need more meaningful private sector jobs;

Whereas remanufacturing offers jobs which will remain in our country at a time of job exporting;

Whereas the industrial process of remanufacturing results in tremendous savings of our vital nonrenewable mineral resources by salvaging nine pounds of material for every pound used at a time when our country is becoming increasingly aware of the need to conserve mineral resources;

Whereas remanufacturing has proven to be extremely energy efficient with an energy recapture ratio four to six times that used in the original manufacturing process at a time of need to conserve energy in the United States;

Whereas remanufacturing offers products and parts equal to or better than new prod-

ucts and parts at a cost to the consumer 30 per centum to 50 per centum less than the new product or part at a time when our country needs to contain inflation;

Whereas remanufacturing contributes to the reduction of our country's solid waste disposal problems; and

Whereas remanufacturing now spans industries ranging from automotive to image reproduction to dispensing machines to telephones; Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the first week of October be officially designated as National Remanufacturing Week throughout these United States.

DESIGN FOR REMANUFACTURING

(By Harry A. Holzwasser)

I appreciate the opportunity to speak to you.

To me, this is a very special occasion. I spend a lot of my time talking to people who sell or buy auto parts. Invariably someone complains that "they" don't make automobiles the way "they" used to. Or "they" ought to do this or that to help simplify the automotive service industry. And so on. Then everything would be all right.

Now I am privileged to have the opportunity to talk to "they", and suggest that "they"—meaning you—have a momentous opportunity to affect one of America's largest industries, the automotive aftermarket, and at the same time take a positive step on behalf of automakers as well. I am talking about the challenge of designing and building automobiles for remanufacturability.

Although many of you are no doubt familiar with remanufacturing, let me tell you briefly about our industry. Let me begin by making an important distinction between remanufacturing and rebuilding.

Rebuilding, as this slide shows, is the process of dismantling a piece of equipment, replacing the elements that are broke or worn out, then putting it back together.

Remanufacturing, on the other hand, is a production-scale process in which, automotive parts are disassembled, the components reconditioned or replaced, and parts are precision built from a random selection of these components on an assembly line. As these slides show, all functional components are removed in the remanufacturing process, then inspected and replaced with new components where necessary.

And there is another difference between rebuilding and remanufacturing. Remanufacturers, to one degree or another, re-engineer. For example, we may re-engineer a part to eliminate a flaw that we discover to be responsible for shortening the part's original life.

Or we may redesign a part, or consolidate many parts, to allow them to serve as replacement for a variety of makes and models. General Motors for many years made two different starters for its V-8 engines—a high-torque unit for the larger V-8's and a low-torque version for smaller V-8's. We replace all low-torque starters with better performing high-torque ones. In another instance, alternators are re-engineered to be free of potentially damaging voltage spikes. We also make consolidations to reduce parts numbers and inventory requirements for all segments of the distribution chain.

The result of remanufacturing is that a part made by GM, Ford, Chrysler, Honda, Toyota, etc. becomes a part with the Arrow label on it. It carries our logo and our warranty. It is as good as a new replacement part in terms of its expected performance and life, or it is better.

Arrow and other major remanufacturers today carry out their businesses no differently than new parts manufacturers—from the assembly line, to testing, to quality control. Producing a broad line of parts is also fundamental to those of us whose operations are national in scope.

Arrow has three plants—in Spartanburg, South Carolina, Morrilton, Arkansas, and Santa Maria, California—and our product line includes 16 parts or systems for passenger cars, light and heavy trucks, farm vehicles and heavy-duty industrial and construction equipment.

Arrow's own history mirrors that of the industry. The company was founded in 1929 as a rebuilder, came of age during World War II when new parts production was virtually suspended, and now is one of the largest remanufacturers in the nation.

Today more than 2,000 companies, most of them small and regional in scope, are engaged in rebuilding or remanufacturing for the automotive aftermarket. We at Arrow and other major remanufacturers must depend on our own reputations and quality standards in order to compete successfully.

This guarantee of quality is one reason I stress the difference between remanufacturing and rebuilding. In addition, I believe that remanufacturing can play an important role in helping us enjoy a more sane and stable economy than we have witnessed in recent years. The key will be our success in achieving wider recognition that something that is not new can be just as good as something that is new.

Already a new public attitude is emerging. Consumers are beginning to demand that what we manufacture be designed to last, and be built well enough to be worthy of maintenance and repair.

I know well that engineers are quite familiar with what constitutes this kind of product quality and what does not. To be more specific, I know that you, as automotive engineers, could design and build an automobile that would be nearly indestructible and functionally beautiful as well. I recognize that we all must pay heed to the cost and marketing requirements that strongly influence ultimate design. If what we make is not salable, because it is unaffordable or doesn't catch the consumer's fancy, whether the product is cars or soap, our science is wasted.

A great deal of engineering in the automotive industry in recent years might be termed engineering for weight-reduction, for the ultimate purpose of saving fuel. For example, as the chart shows, starters in many General Motors cars have become progressively lighter over the past decade. Look at the specification differences in early and late model Delco starters. Some of the windings in the field coil have been removed, the overall size of the solenoid has been reduced and the thickness of the field housing wall is considerably thinner.

Then there is engineering for increased manufacturing productivity—designing components that can be made faster, to reduce cost. In the case of the same Delco starter, GM previously used four screws to fasten pole shoes in the field case. Now the entire assembly is press-fit which makes it more difficult to remanufacture because of the shearing effect caused by disassembling and reassembling the unit. This reduces the interference fit and shortens the life span of the field case.

Engineering directed at reducing materials cost leads to the same end. There is no question that America's automotive engineers have responded creatively to the imperatives of energy, labor and resource economics although in the difficult economy of recent years the payoff has not been fully realized.

Under these same pressures, I believe Americans have become more cost and quality-conscious. And the kind of economy that produced record car sales in the late 1970's is gone. People are no longer prepared to incur great personal debt, while tossing out perfectly serviceable vehicles all for the prestige of having the newest car on the block.

Hard experience, I believe, has made today's public more practical. Many people are having lots of experience with older cars, perhaps for the first time, and are finding out just how long-lasting their cars really are. I believe this enforced pragmatism has much to do with the inroads being made by foreign cars. Perhaps the most difficult task facing our domestic industry is restoring our reputation for world leadership in quality. It will take time and it will depend in no small part on how dependable and serviceable current models prove to be when they are two, three or even seven years old, which is nearly the age of today's automotive fleet. As you know, the fleet of imported cars today is much younger, averaging only three years, so perhaps the Datsuns and Toyotas haven't been truly put to the durability test yet.

How can engineering for remanufacturing play a part in all this?

In the broadest sense, engineering for remanufacturing means engineering for the longest possible product life. That does not suggest that components won't wear out or occasionally break. But it does mean that when an auto part succumbs to wear and tear, it can be replaced cost effectively. This is the role of remanufacturing. An M.I.T. study documented that, on the average, 80 percent by weight of a broken or worn-out part is unaffected and requires only minimal work such as inspecting and cleaning in the remanufacturing process. The re-use of these components has benefits that can be measured in a number of ways.

It saves enormous amounts of energy. According to this M.I.T. study of the industry, water pumps remanufactured in just one year save the energy equivalent of 2.2 million gallons of fuel oil. That's enough oil to heat 1,600 New England homes for the winter.

It also represents the re-use of tons of steel that otherwise would, at best, be recast into something else, or at worst, would rust in some junkyard. These measures of the contribution of automotive remanufacturing are not insignificant. As you may know, our industry is the major source for many replacement parts. For example, more than 90 percent of the alternators, starters, and distributors installed in America as replacements are remanufactured, not new.

The energy and material savings achieved in remanufacturing are not ends in themselves. They do help to explain why remanufactured parts are substantially less expensive than new parts. For example, a new alternator for a 1980 Chevrolet V-8 5-liter engine typically retails for $194.15. A remanufactured alternator for the same vehicle averages $85.25. A new water pump for the same car costs $62.14, compared to $48.30 for a remanufactured pump, a new

starter costs $193.85, a remanufactured starter costs $87.80.

We are talking about a $3 billion industry: Remanufacturing is a substantial factor in the automotive aftermarket. Since our products cost 40 to 60 percent less than new replacement parts, our revenues of $3 billion represent another $5 billion to $7 billion unspent by the car and truck-owning public in keeping their vehicles going.

To put it another way, we help your consumers keep down the cost of using your product. We enhance your reputation for producing a long-lasting vehicle, which can help you sell new cars. And as I've indicated, I believe that in the years to come, consumers will make their judgments about which car to buy based in large measure on their experience of its quality and durability. And brand loyalty, the basis of repeat sales, will be rooted in these attributes.

Engineering for remanufacturing is part and parcel of creating durable quality. In recent years, we have tracked the increasing use of plastics and aluminum in automotive assemblies that has resulted from engineering for weight reduction. And we've seen what can only be called short-cuts—design compromises that make the component less expensive to produce without due regard to its life or remanufacturability.

I should mention before I cite any examples that the standard set by American car manufacturers over the years has been a high one. Even under today's pressures we find, for example, that a typical domestic starter is made to stand more wear and tear than that of the typical import. American alternators have a higher load capacity. And so on.

Unfortunately there is an increasing number of instances of cost and weight engineering that are, in our view, shortsighted. Here are just a few examples:

The use of aluminum in place of cast iron in water pumps. Chrysler, for example, made this switch in the mid-1970's. This saves a few pounds. While in general, aluminum components are salvageable, in remanufacturing, an acidic solution in the water causes oxydation and often these aluminum castings have to be replaced.

The use of molded commutators in starter armatures. Traditionally these elements were segmented copper. Ford switched as long ago as the late 1960's, to molded phenolics that have to be replaced in remanufacturing.

Similarly, the brush holders for starters and alternators were individual units of stamped steel. At ford, for example, this gave way in the late 1970's to a single plastic unit holding several brushes. The brush holders wear more rapidly and cannot be remanufactured.

The use of dipped plastic insulation in place of wrapped wire is common in Japanese imports, Chrysler and General Motors vehicles. Previously repairing the wire was a simple matter of re-wrapping. Replacing or repairing the plastic covering, now, in remanufacturing, is a messy, costly and time consuming process.

Plastic pistons are being used in brake calipers, in place of drop forged steel. Only twenty percent are usable in remanufacturing. Chrysler was the first to adopt plastic pistons but Ford and, more recently, General Motors have followed suit.

An example, of a short-cut in design is leaving out the bronze bushings in distributor housings. The result is metal to metal wear ruining the housing. Formerly we simply punched out the bronze bushing and replaced it while preserving the housing.

I am not an engineer, but my associates tell me there is a rich field where keen engineering minds can find opportunities to make parts more remanufacturable.

I do not suggest that the average car-owner is going to be aware of these or other examples in which life expectancy is shortened by making remanufacturing more costly or impossible. Indeed, the increasing sophistication of components and the increasing use of electronics will probably make do-it-yourselfers more rare rather than more common.

At the same time, however, the car owner is keenly aware of the cost and frequency of repair—more keenly aware than in the past because he is keeping his car longer—and that is not likely to change.

In the past, the new car buyer anticipated that in two years or so he would be trading his car in for another new one. He considered himself to be getting in under the wire—before the breakdowns and repairs began.

As for the buyer of that two-year-old car, he traditionally anticipated that he might get lucky, and if not, well, that's to be expected in a used car.

So the car buyer has really had only two choices—the new car, traditionally styled for today but not for tomorrow, or the used car, purchased with less money and offering correspondingly less confidence in its dependability.

I believe that car buyers ought to have a third choice, one that provides reasonably priced, mechanically secure transportation. The day will come when we have remanufactured cars—and I hasten to add that if such an eventuality seems a competitive threat to Detroit, it would not be. Its annual sales would very likely be measured in thousands, not millions.

Already, companies have sprung up that remanufacture such prestige cars as the BMW 2002 of the early 1970s. But what I'm describing is creation of a practical, low-cost, and above all mechanically secure transportation alternative for those whose choice would otherwise be a used car, or none at all. A remanufactured car could have new paint, a refurbished interior, and most important of all, remanufactured mechanicals throughout to give the vehicle an entirely new lease on life. It would carry a warranty and be priced midway between a new car and a traditional used car.

As I envision it, remanufacturing sites would be regionally localized businesses, franchised or co-owned. The "cores", of course, would be components that today find their way to remanufacturers and bodies that presently end up in the crusher. Buyers could bring their own used vehicle in for remanufacture or buy one off the floor. Trade-ins would be remanufactured as well. Naturally, the cars chosen for remanufacture would have to be popular production cars such as, for example, the Olds Cutlass of the early 1970's.

We should look to other industries who have already taken this idea to heart and put it into practice. IBM is just one example of companies who are building remanufacturability into the design of their new equipment. Why shouldn't automotive engineers do the same? Listen to an expert in automotive remanufacturing before making new design decisions. If the idea sounds plausible to you, then I have made the point that I wanted to: The American public wants automobiles, new or otherwise, that are engineered to last. Engineering for remanufacturing is very much a part of this.●

By Mr. DIXON (for himself, Mr. HUDDLESTON, Mr. LUGAR, Mr. JEPSEN, Mr. LEAHY, Mr. ZORINSKY, Mr. PRYOR, Mr. HELMS, Mr. DOLE, Mr. COCHRAN, Mr. PERCY, Mr. BOSCHWITZ, Mr. HOLLINGS, Mr. MOYNIHAN, Mr. GRASSLEY, Mr. QUAYLE, Mr. EAGELTON, Mr. BOREN, Mr. CRANSTON, Mr. HEINZ, Mr. RANDOLPH, Mr. STENNIS, Mr. FORD, Mr. HEFLIN, Mr. BAUCUS, Mr. EXON, Mr. RIEGLE, and Mr. BUMPERS):

Senate Joint Resolution 126. Joint resolution to designate the week of July 17, 1983, through July 23, 1983, as "National Corn Week"; to the Committee on the Judiciary.

NATIONAL CORN WEEK

● Mr. DIXON. Mr. President, I am pleased to introduce, together with many of my Senate colleagues, a joint resolution to authorize and request the President to designate the week of July 17, 1983, through July 23, 1983, as "National Corn Week." The purpose of this resolution is to honor the American corngrowers and others responsible for the benefits that the United States reaps from the various uses of this important agricultural product.

American farmers utilize one-fifth of the total U.S. farmland or approximately 84 million acres to produce over $20 billion worth of corn; 40 percent of this corn production is exported, which substantially benefits the U.S. balance of payments. The conversion of corn into alcohol fuels can further help the American balance of payments by making us more independent of foreign energy sources. These and many other contributions that are of benefit to all Americans make those involved in corn production deserving of this recognition.

Mr. President, I ask unanimous consent that the text of the resolution be printed in full at this point in the RECORD.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows;

Whereas corn is the largest grain crop in both production and cash value grown in the United States;

Whereas July is critical to the final stages of corn growth;

Whereas corn production utilizes one-fifth of the total United States farmland or eighty-four million acres;

Whereas more than one million American farmers unite to produce a total of over seven billion bushels of corn a year valued at twenty billion dollars;

Whereas corn can be easily converted into a fuel for automobiles, trucks, and tractors to make the United States more independent of foreign energy sources;

Whereas corn ranks as one of the most efficient plants on earth for converting solar energy into food;

Whereas a refined corn product in the form of starch or syrup is contained in a

quarter of all food products in supermarkets, to sweeten, color, flavor, and texture such products;

Whereas the United States corn growers produce almost half of the corn crop of the world and provide seventy percent of the corn in world trade to feed millions of people;

Whereas forty percent of the corn produced in the United States is exported to benefit the American balance of payments by seven billion dollars; and

Whereas corn is a large factor in the United States foreign exchange, bringing in more dollars than all other grains combined: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the week of July 17, 1983, through July 23, 1983, is designated as "National Corn Week", and the President is authorized and requested to issue a proclamation calling upon interested groups to celebrate the week with appropriate programs and activities that stress the importance and the benefits of American corn production for the people of the United States and the world.

By Mr. WARNER (for himself, Mr. SASSER, Mr. PRESSLER, Mr. THURMOND, Mr. DOMENICI, Mr. CHAFEE, Mr. MCCLURE, Mr. HECHT, Mr. RANDOLPH, Mr. GOLDWATER, Mr. BUMPERS, Mr. BOSCHWITZ, Mr. DECONCINI, Mr. EAST, Mr. HATCH, Mrs. HAWKINS, Mr. D'AMATO, Mr. HELMS, Mr. CHILES, Mr. INOUYE, Mr. LONG, Mr. MITCHELL, Mr. PRYOR, Mr. TSONGAS, Mr. HEFLIN, Mr. NUNN, Mr. STAFFORD, Mr. WILSON, Mr. HOLLINGS, Mr. TRIBLE, Mr. MELCHER, Mr. HEINZ, Mr. DURENBERGER, Mr. BRADLEY, Mr. BENTSEN, Mr. MOYNIHAN, Mr. PROXMIRE, and Mr. HUDDLESTON):

S.J. Res. 127. Joint resolution designating the week of May 27, 1984, as "National Tourism Week"; to the Committee on the Judiciary.

NATIONAL TOURISM WEEK

● Mr. WARNER. Mr. President, today I am joined by 37 of my colleagues including my able friend, the Senator from Tennessee (Mr. SASSER) who cochairs with me the Senate Tourism Caucus, the distinguished chairman of the Senate Tourism Subcommittee (Mr. PRESSLER) and the distinguished chairman of the Senate Judiciary Committee (Mr. THURMOND), in introducing a Senate joint resolution declaring the week of May 29, 1984 "National Tourism Week."

Mr. President, during the Nation's bicentennial, I had the privilege of serving as the administrator of the American Revolution Bicentennial Administration. It was during my tenure in that position that I developed a deep understanding of the importance of tourism as a moving force in our economy and as a medium enabling people throughout our land and abroad to develop a better understanding of one another.

Travel and tourism is America's second largest retail industry. It employs more than 4.6 million people, and generates over $17 billion in local, State, and Federal tax revenue.

In 1981, travel by Americans within the United States reflected expenditures for goods and services of $179 billion, while visitors coming to the United States spent an additional $12.2 billion. These expenditures supported over 5 percent of the nonagricultural payroll employment in 1981—more than 10 percent of the 40 million new jobs created since 1958.

Looking at the foreign travel picture, in 1981, the U.S. Travel Data Center estimated that in 1981 63,000 visitors were in the United States on an average day—23 million visitors in 1 year, supporting nearly 300,000 American workers. Worldwide, the United States benefits from 11.5 percent of the total international travel expenditures.

With this perspective in mind, I became actively involved in travel and tourism issues when I came to the Senate in 1979. As a member then of the Senate Commerce Committee, I had the pleasure of working with the Senator from Hawaii (Mr. INOUYE), the Senator from South Dakota (Mr. PRESSLER) and the then-Senator from Nevada Mr. Cannon in developing the National Tourism Policy Act.

I also had the opportunity to work with my distinguished cochairman (Mr. SASSER) in forming the Senate Tourism Caucus which has evolved over the past 3 years as a catalyst to bring Senators together on travel and tourism issues.

This year, more than any I can remember, the Senate has aggressively turned its attention in support of numerous travel and tourism measures including the resolution I am introducing today.

Mr. President, I am very proud to represent my colleagues in bringing this bill to the floor for the Senate's consideration. To me, this measure reflects the significance Congress places in the travel and tourism industry. This measure reflects the importance with which the Congress views the travel and tourism industry, and it reflects the value Congress places in the contributions made by the travel and tourism industry to our economy and to America's standing with its world neighbors.

It is my hope that this resolution will receive a swift, but full hearing in the Judiciary Committee and be reported out in time to enable the travel and tourism industry to take full advantage of the special week this resolution seeks to designate.●

● Mr. SASSER. Mr. President, I am pleased to join with Senator WARNER in introducing this resolution calling for the designation of the week of May 27, 1984, as National Tourism Week.

It seems wholly appropriate to take such action in the wake of reports yesterday that the U.S. merchandise trade deficit worldwide soared to a record-high $6.9 billion for the month of May, and that the U.S. Commerce Department is projecting an annual trade deficit for 1983 of $70 billion.

No single industrial initiative is going to reduce or eliminate the trade deficit, but I will submit that few industries benefit the U.S. trade picture so immediately and directly as does the travel and tourism industry. A well-placed investment in travel and tourism can reap scores, yes hundreds, of times its size in economic benefits.

Travel receipts make up over 6.5 percent of the U.S. gross national product. Domestic and international travel in 1981 represented $191 billion in expenditures in the United States, was responsible for a $40 billion payroll, 4.6 million in directly related and 2.2 million in indirectly related jobs, generated $9.3 billion in Federal tax revenues, $6.6 billion in State tax revenues and $2 billion in local tax revenues.

Yet, despite record trade deficits and despite the importance of travel and tourism to our national economy and to the tax base of Federal, State and local governments, the Federal Government has not been especially sensitive to the needs of this industry.

Data released recently by the Travel and Tourism Council show that the United States, on a per capita basis, ranks at the bottom of nearly every international index of spending aimed at promoting travel and tourism.

Beyond the per capital rankings, other measures are even more disquieting. As of 1981, the United States maintained fewer overseas Government tourism offices that the Governments of Spain, Italy, Greece, Morocco, Malaysia, Germany, Yugoslavia, Kenya, Finland, Sri Lanka, Macao, Korea, Norway, Hong Kong and Thailand.

Clearly, there is more that we can do. The Congress has become sensitive to the issue. Established in 1980, the Senate Tourism Caucus now numbers over 70 members. We in the Senate last month approved the authorization for funding for the U.S. Travel and Tourism Administration (USTTA).

Though there may be differences of specifics on other parts, pending Department of Trade legislation gives USTTA a significant role. today's introduction complements these actions.

A National Tourism Week will encourage all those concerned with the future and the health of the vital travel and tourism industry to appreciate and understand the real, tangible economic benefits this industry provides.

I hope my colleagues will agree to expeditious passage of this resolution.●

ADDITIONAL COSPONSORS

S. 163

At the request of Mr. INOUYE, the name of the Senator from Maryland (Mr. SARBANES) was added as a cosponsor of S. 163, a bill to amend title XII of the Public Health Service Act to provide for demonstration programs relating to emergency health care for children.

S. 217

At the request of Mr. THURMOND, the name of the Senator from Alaska (Mr. MURKOWSKI) was added as a cosponsor of S. 217, a bill to reform procedures for collateral review of criminal judgments, and for other purposes.

S. 237

At the request of Mr. WALLOP, the name of the Senator from Indiana (Mr. LUGAR) was added as a cosponsor of S. 237, a bill to amend the Internal Revenue Code of 1954 to provide for the establishment of reserves for mining land reclamation and for the deduction of amounts added to such reserves.

S. 337

At the request of Mr. PACKWOOD, the names of the Senator from Indiana (Mr. LUGAR) and the Senator from South Dakota (Mr. ABDNOR) were added as cosponsors of S. 337, a bill to amend the Internal Revenue Code of 1954 to make permanent the deduction for charitable contributions by nonitemizers.

S. 602

At the request of Mrs. HAWKINS, the name of the Senator from Idaho (Mr. MCCLURE) was added as a cosponsor of S. 602, a bill to provide for the broadcasting of accurate information to the people of Cuba, and for other purposes.

S. 619

At the request of Mr. TSONGAS, the name of the Senator from New Mexico (Mr. BINGAMAN) was added as a cosponsor of S. 619, a bill to reauthorize, extend, and enhance existing Federal programs to encourage conservation and the use of renewable energy by this Nation's consumers.

S. 764

At the request of Mr. WARNER, the names of the Senator from New Mexico (Mr. DOMENICI), the Senator from New Jersey (Mr. LAUTENBERG), and the Senator from Florida (Mr. CHILES) were added as cosponsors of S. 764, a bill to assure the continued protection of the traveling public in the marketing of air transportation, and for other purposes.

S. 836

At the request of Mr. PELL, the names of the Senator from Hawaii (Mr. MATSUNAGA), the Senator from Hawaii (Mr. INOUYE), and the Senator from Nebraska (Mr. EXON) were added as cosponsors of S. 836, a bill to provide for the continuation of the National Diffusion Network.

S. 871

At the request of Mr. MITCHELL, the name of the Senator from Massachusetts (Mr. TSONGAS) was added as a cosponsor of S. 871, a bill to amend the Public Works and Economic Development Act of 1965, as amended.

S. 1113

At the request of Mr. D'AMATO, the names of the Senator from Louisiana (Mr. JOHNSTON) and the Senator from South Carolina (Mr. THURMOND) were added as cosponsors of S. 1113, a bill to amend the Internal Revenue Code of 1954 to provide that tax-exempt interest shall not be taken into account in determining the amount of social security benefits to be taxed.

S. 1144

At the request of Mr. HEINZ, the name of the Senator from Kentucky (Mr. HUDDLESTON) was added as a cosponsor of S. 1144, a bill to suspend periodic reviews of disability beneficiaries having mental impairments pending regulatory reform of the disability determination process.

S. 1170

At the request of Mr. PRYOR, the names of the Senator from Iowa (Mr. GRASSLEY) and the Senator from Rhode Island (Mr. PELL) were added as cosponsors of S. 1170, a bill to establish a Director of Operational Testing and Evaluation in the Department of Defense, and for other purposes.

S. 1256

At the request of Mr. MOYNIHAN, the name of the Senator from Connecticut (Mr. DODD) was added as a cosponsor of S. 1256, a bill to authorize special assistance for desegregation activities.

S. 1276

At the request of Mr. MITCHELL, the name of the Senator from Mississippi (Mr. COCHRAN) was added as a cosponsor of S. 1276, a bill to provide that the pensions received by retired judges who are assigned to active duty shall not be treated as wages for purposes of the Social Security Act.

S. 1306

At the request of Mr. MATHIAS, the name of the Senator from Arizona (Mr. GOLDWATER) was added as a cosponsor of S. 1306, a bill to amend the patent law to restore the term of the patent grant for the period of time that nonpatent regulatory requirements prevent the marketing of a patented product.

S. 1325

At the request of Mr. MCCLURE, the names of the Senator from Colorado (Mr. ARMSTRONG) and the Senator from Nebraska (Mr. ZORINSKY), were added as cosponsors of S. 1325, a bill to amend the Internal Revenue Code of 1954 to provide financial relief to State and local governments by eliminating a requirement that would result in a duplicative mailing each year.

S. 1356

At the request of Mr. D'AMATO, the name of the Senator from North Dakota (Mr. ANDREWS) was added as a cosponsor of S. 1356, a bill to amend chapter 37 of title 31, United States Code, to authorize contracts with law firms for the collection of indebtedness owed the United States.

S. 1360

At the request of Mr. HART, the name of the Senator from California (Mr. CRANSTON) was added as a cosponsor of S. 1360, a bill to establish a grant program to provide for a centralized system of child care information and referral.

S. 1363

At the request of Mr. HART, the name of the Senator from Washington (Mr. GORTON) was added as a cosponsor of S. 1363, a bill to protect human health and the environment by establishing adequate controls on the management of hazardous wastes.

S. 1382

At the request of Mr. STEVENS, the name of the Senator from South Carolina (Mr. HOLLINGS) was added as a cosponsor of S. 1382, a bill to amend the Communications Act of 1934 to insure availability of basic telephone service at reasonable rates.

S. 1444

At the request of Mr. MELCHER, the name of the Senator from Colorado (Mr. ARMSTRONG) was added as a cosponsor of S. 1444, a bill to deny most-favored-nation status to any country that in the judgment of the President denies religious freedom to its citizens.

S. 1475

At the request of Mr. WALLOP, the name of the Senator from Nebraska (Mr. ZORINSKY) was added as a cosponsor of S. 1475, a bill to to amend the Internal Revenue Code of 1954 to repeal the highway use tax on heavy trucks and to increase the tax on diesel fuel used in the United States.

S. 1537

At the request of Mr. DANFORTH, the name of the Senator from Maine (Mr. COHEN) was added as a cosponsor of S. 1537, a bill to provide additional authorization of appropriations for certain programs for fiscal year 1984, and each of the four following fiscal years.

S. 1541

At the request of Mr. BYRD, the name of the Senator from New York (Mr. MOYNIHAN), the Senator from Tennessee (Mr. SASSER), the Senator from Utah (Mr. GARN), the Senator from Texas (Mr. BENTSEN), and the Senator from Nebraska (Mr. ZORINSKY) were added as cosponsors of S.

1541, a bill to authorize the presentation on behalf of the Congress of a specially struck bronze medal to the families of American personnel missing or otherwise unaccounted for in Southeast Asia.

SENATE JOINT RESOLUTION 19

At the request of Mr. INOUYE, the names of the Senator from Connecticut (Mr. WEICKER) and the Senator from Nebraska (Mr. ZORINSKY) were added as cosponsors of Senate Joint Resolution 19, a joint resolution to authorize and request the President to designate the period August 26, 1983, through August 30, 1983, as "National Psychology Days."

SENATE JOINT RESOLUTION 50

At the request of Mr. LEVIN, the name of the Senator from Massachusetts (Mr. TSONGAS) and the Senator from Kansas (Mrs. KASSEBAUM) was added as a cosponsor of Senate Joint Resolution 50, a joint resolution designating the week beginning September 25, 1983, as "National Adult Day Care Center Week."

SENATE JOINT RESOLUTION 84

At the request of Mr. GARN, the names of the Senator from Tennessee (Mr. SASSER), the Senator from Maryland (Mr. SARBANES), the Senator from Michigan (Mr. RIEGLE), the Senator from West Virginia (Mr. RANDOLPH), the Senator from Massachusetts (Mr. TSONGAS), the Senator from Utah (Mr. HATCH), the Senator from Rhode Island (Mr. PELL), the Senator from Wisconsin (Mr. KASTEN), and the Senator from Indiana (Mr. LUGAR) were added as cosponsors of Senate Joint Resolution 84, a joint resolution to designate the week beginning June 24, 1984, as "Federal Credit Union Week."

SENATE JOINT RESOLUTION 105

At the request of Mr. RUDMAN, the names of the Senator from Arizona (Mr. DECONCINI), the Senator from Oregon (Mr. PACKWOOD), the Senator from Connecticut (Mr. DODD), and the Senator from Louisiana (Mr. JOHNSTON) were added as cosponsors of Senate Joint Resolution 105, a joint resolution calling upon the Department of Justice and all other appropriate Federal agencies to enforce Federal antitrust laws including the prohibition against vertical price restraints.

SENATE JOINT RESOLUTION 113

At the request of Mr. WILSON, the name of the Senator from Maine (Mr. COHEN) was added as cosponsor of Senate Joint Resolution 113, a joint resolution to provide for the designation of the week beginning June 3 through June 9, 1984, as "National Theatre Week."

SENATE JOINT RESOLUTION 116

At the request of Mr. KASTEN, the names of the Senator from Wyoming (Mr. WALLOP), the Senator from Georgia (Mr. MATTINGLY), the Senator from Pennsylvania (Mr. HEINZ), the Senator from Oklahoma (Mr. NICKLES), and the Senator from Hawaii (Mr. INOUYE) were added as cosponsors of Senate Joint Resolution 116, a joint resolution to designate the week of September 4, 1983, through September 10, 1983, as "Youth of America Week."

SENATE JOINT RESOLUTION 119

At the request of Mr. HUMPHREY, the names of the Senator from Minnesota (Mr. DURENBERGER), the Senator from Louisiana (Mr. LONG), the Senator from North Carolina (Mr. EAST), the Senator from Kansas (Mr. DOLE), and the Senator from Vermont (Mr. LEAHY) were added as cosponsors of Senate Joint Resolution 119, a joint resolution to designate the week of December 11, 1983, through December 17, 1983, as "National Drunk and Drugged Driving Awareness Week."

SENATE JOINT RESOLUTION 120

At the request of Mr. SASSER, the names of the Senator from Alabama (Mr. HEFLIN), the Senator from New Hampshire (Mr. HUMPHREY), the Senator from Hawaii (Mr. MATSUNAGA), the Senator from New York (Mr. MOYNIHAN), the Senator from West Virginia (Mr. RANDOLPH), the Senator from Wyoming (Mr. SIMPSON), and the Senator from Connecticut (Mr. WEICKER) were added as cosponsors of Senate Joint Resolution 120, a joint resolution to provide for the awarding of a special gold medal to Danny Thomas in recognition of his humanitarian efforts and outstanding work as an American.

SENATE RESOLUTION 137

At the request of Mr. KASTEN, the name of the Senator from Pennsylvania (Mr. SPECTER) was added as cosponsor of Senate Resolution 137, a resolution expressing the sense of the Senate that Taiwan should retain full membership in the Asian Development Bank, and that it should not be expelled as a precondition for membership in that body by the People's Republic of China.

SENATE RESOLUTION 139

At the request of Mr. ZORINSKY, the name of the Senator from Wisconsin (Mr. KASTEN) was added as a cosponsor of Senate Resolution 139, a resolution disapproving the recommendation of the Study Group on Senate Practices and Procedures to abolish the Senate Committee on Veterans' Affairs.

SENATE RESOLUTION 158

At the request of Mr. JACKSON, the names of the Senator from South Carolina (Mr. HOLLINGS), the Senator from Tennessee (Mr. SASSER), the Senator from Maine (Mr. COHEN), the Senator from Pennsylvania (Mr. SPECTER), and the Senator from Mississippi (Mr. COCHRAN) were added as cosponsors of Senate Resolution 158, a resolution expressing the sense of the Senate that the President should convene a national bipartisan commission to address the serious long-term problems of security and economic development in Central America.

SENATE RESOLUTION 168

At the request of Mr. DECONCINI, the name of the Senator from New York (Mr. MOYNIHAN) was added as a cosponsor of Senate Resolution 168, a resolution expressing the sense of the Senate with respect to the provision of emergency assistance to the people of Ethiopia.

AMENDMENT NO. 1316

At the request of Mr. GLENN, the names of the Senator from Massachusetts (Mr. TSONGAS) and the Senator from Iowa (Mr. GRASSLEY) were added as cosponsors of Amendment No. 1316 intended to be proposed to S. 869, a bill to amend the Export-Import Bank Act of 1945.

SENATE CONCURRENT RESOLUTION 49—RELATING TO FRINGE BENEFITS TAXES

Mr. DECONCINI submitted the following concurrent resolution, which was referred to the Committee on Finance:

S. CON. RES. 49

Whereas the United States economy is in terrible condition, with output stagnated and unemployment at unacceptably high levels;

Whereas the Federal tax system is held in disrepute by a majority of Americans because it is riddled by deductions, credits, exemptions, and exclusions from income, such as fringe benefits, which make it basically unfair;

Whereas these perverse subsidies of the tax system draw resources into unproductive uses to the ultimate detriment of the economy and well-being of all Americans;

Whereas fringe benefits, deductible by employers, but not taxable to the recipient, are completely outside the current tax system;

Whereas efforts to bring some of these fringe benefits within the grasp of the Internal Revenue Service, while continuing to exclude other types of fringe benefit income, is a classic example and continuation of the ruinous tax policy "by bandaid" approach that is at the core of so many of our economic and fiscal ills; and

Whereas recent studies have demonstrated beyond dispute the negative effects of our present tax system on growth, employment, innovation, productivity, and capital generation, and have gone on to offer alternative approaches to taxation that offer realistic hope of economic revitalization based upon a sane and simple tax system: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That it is the sense of Congress that—

(1) the raising of additional revenues through the taxation of some fringe benefits, while leaving others untaxed, is symbolic of the pitiful, shameful, and inadequate effort to reform our tax system and should not be pursued,

(2) a complete overhaul of our tax system is necessary and the adoption of a tax system based on equity, simplicity, and efficiency must occur in the near future, and

(3) any broadening of the base of revenue that would be a part of a new tax system must be accompanied by a reduction of the tax rates applied to income.

Mr. DECONCINI. Mr. President, the papers have been filled with stories about the administration's renewed effort to tax what they refer to as "fringe benefits" in certain areas of employment.

Frankly, Mr. President, I find the continual attack on certain groups by this administration to be petty and cynical at best. As in so many other respects, the administration plays favorites regarding who and what it wants to tax. Its tax reductions favor the rich at the expense of the middle and lower income classes and its new tax proposals are aimed at those same middle and lower income groups. Through all of this, the administration appears to be steadfast in its resolve not to support broad tax reform.

A fundamental principle that has traditionally been embodied in the laws of our Nation is the idea that the tax burden should be shared equitably among all groups. This is absolutely not the case today. Our tax code is a disgrace. All those who have a sound knowledge of the subject concur. It is a tax code which blatantly favors the rich at the expense of everyone else.

Now, the administration wants to eliminate a few of the benefits that trickle down to middle income Americans. They specifically want to tax any tuition assistance that university professors receive, benefits received by airline employees, and special merchandise discounts often given employees in factories and stores. We are in the midst of a national debate on the quality of education with politicans of every stripe seriously pondering the question of how to attract qualified people to the teaching profession. For years, universities and colleges have used tuition assistance as a way to lure good people since sufficient funds have not been available to make salaries comparable to private sector jobs. Now the administration wishes to take this one benefit away through an unfair tax policy.

At the same time that the administration would tax away any potential benefits that accrue to Americans of moderate means, it makes no effort at all to eliminate things like the "three martini lunch" and interest deductions which primarily affect the higher income brackets.

Our Tax Code is one long series of special treatments for different groups and businesses. To selectively remove the exemptions of some groups while leaving exemptions in place for other similarly situated is, at best, discriminatory, and at worst, just plain cynical.

What is needed to achieve an equitable tax system is a complete overhaul of the system which will replace special interest provisions with a cohesive system that treats all people equally. I am convinced that a flat-rate tax system, similar to S. 557, which I have proposed, is the only way this can be accomplished. If the administration is truly interested in tax reform, let it adopt my proposal, or a similar proposal.

In the meantime, I think it should lay off university professors, airline employees, and others who would bear the brunt of the administration's latest tax proposals. It is hardly equitable to punish a few while retaining special privileges for the many.

Therefore, Mr. President, I am introducing a concurrent resolution asking that the Senate Finance Committee and the House Ways and Means Committee, as well as the administration, direct their attention to overall tax reform as opposed to the kind of piecemeal, discriminatory proposals that have been recently advanced.

SENATE CONCURRENT RESOLUTION 50—RELATING TO U.S. CONTRIBUTIONS TO THE UNITED NATIONS

Mr. MOYINHAN submitted the following concurrent resolution; which was referred to the Committee on Foreign Relations:

S. CON. RES. 50

Resolved by the Senate (the House of Representatives concurring),

Whereas the U.S. Government has expressed in law its opposition to the use of United States contributions to the United Nations to support programs for the Palestine Liberation Organization or for projects whose primary purpose is to provide benefits to the Palestine Liberation Organization or entities associated with it; and

Whereas the United Nations has announced the convening in Vienna, Austria, on July 11 to 13, 1983, of an international conference, the effect of which is to provide a propaganda platform resulting in political benefits to the Palestine Liberation Organization: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That the Congress declares that, in accordance with the policy enunciated in several prior laws, United States contributions to the United Nations should be reduced by the United States proportionate share of the amount of United Nations funds used to support the international conference to be held in Vienna, Austria, on July 11 to 13, 1983.

Mr. MOYNIHAN. Mr. President, I am today submitting a concurrent resolution urging the administration to withhold from the American contribution to the United Nations this year the proportionate U.S. share of funds that will be spent on an International Conference on the Fascist-Racist Alliance between South Africa and Israel, a meeting scheduled to convene in Vienna July 11-13, 1983. Representative TOM LANTOS of California will be introducing identical legislation later today in the House of Representatives.

As it is unusual to devote a congressional resolution to an event otherwise as obscure as a U.N. conference in Vienna—one of thousands of U.N. meetings that will take place around the world in the course of this year—a bit of background may be in order.

Senators will recall that in each of the last two authorization acts for the Department of State, legislation covering 4 fiscal years, Congress has included requirements that the American contribution to the United Nations be reduced by an amount related to sums spent by U.N. agencies on programs providing political benefits to the terrorist Palestine Liberation Organization. The two most notorious PLO fronts have been cited explicitly in the legislation: the Special Unit on Palestinian Rights in the Secretariat, and the General Assembly's Committee on the Exercise of the Inalienable Rights of the Palestinian People.

This latter group had been established by the U.N. General Assembly during the time I served as this country's Permanent Representative to the United Nations, on November 10, 1975—the same day, significantly, the General Assembly adopted the notorious resolution equating Zionism with racism. Very much in the slanderous, vicious spirit of that resolution, the committee has since been a prominent and active clearinghouse for materials and meetings devoted almost exclusively to the misrepresentation of events in the Middle East, to mendacious attacks on Israel and the Jewish people. Often as not the committee has been a fountain of anti-Semitism in the U.N. system.

The reasons for the unusual restriction on American contributions to the U.N. system are therefore clear and compelling. I need not elaborate on the methods or purpose of the PLO.

At the time the Senate last considered this issue, in June 1981, I proposed that Congress add another dimension to this restriction. It had become clear to many of us that there were many other programs and projects outside these two groups equally devoted to sanitizing and promoting the PLO in international forums. It was equally clear that the Congress is not well equipped institutionally to oversee the many myriad workings of the vast U.N. bureaucracy. Accordingly, one part of the amendment I offered on the floor on June 17, 1981—an amendment that became section 104 of Public Law 97-241—required the State Department to review all the budgets of every U.N. agency—

To determine which projects have the primary purpose of providing political benefits to the Palestine Liberation Organization.

Section 104 also requires that an amount equal to 25 percent, the U.S. proportionate share, of funds allotted to any such program benefiting the

PLO "or entities associated with it" be withheld from our contribution. Finally, section 104 requires that a report be sent annually to Congress about this.

No such report has yet been sent to Congress.

Moreover, the Department of State has apparently not been able to determine that there are programs providing political benefits to the PLO. One clear instance, however, recently came to light and is the object of the resolution I am submitting today.

On May 20, 1983, a U.N. committee, chaired by a Mr. Vladimir A. Kravets, of the Ukraine, announced that a conference would be convened in Vienna on July 11-13 of this year to examine: "The Fascist-Racist Alliance between South Africa and Israel." The purpose of such a conference is manifest in the title. Its objective is to promote the fallacious idea that Zionism is a form of racism indistinguishable from the doctrine of apartheid that governs life in South Africa. This is very much in the spirit of the General Assembly resolution adopted on November 10, 1975, equating Zionism with racism. It is also of a whole with the ongoing, now decades old, campaign inspired by the Soviets to paint Israel as an outlaw nation, in a class with contemporary South Africa, whose racial policies are morally repugnant.

The inevitable beneficiary of such a conference would be the PLO, which continually seeks to undermine the good name and reputation of Israel in its campaign to win political legitimacy in the international arena. As its own program of terrorism and perpetual obstructionism with respect to efforts to establish peace in the region cannot win many friends, it has instead devoted its political efforts to attacks on Israel.

The Vienna conference I have cited, devoted as it is to the promotion of the mendacious idea that an alliance of some sort exists between South Africa and Israel, would clearly provide political benefits to the misbegotten PLO. The unmistakable intentions of Congress when it adopted section 104 was to require the State Department to withhold funds because of such a conference.

On June 14, I wrote to the Secretary of State expressing my hope that the Department would make the appropriate announcement with respect to this conference.

Yesterday, I received in reply a letter from Assistant Secretary of State Powell A. Moore which said, in effect, that maybe the United States will withhold the money and maybe it will not. Mr. Moore wrote that:

> The Department is seeking information about the ultimate character and costs of the Conference. Upon receipt of that information, we will determine what action should be taken.

Mr. President, I submit that it should already be clear what the United States must do if we are to retain our credibility at the United Nations. Having committed ourselves in law and in principle to withhold funds if the U.N. agencies were to continue to devote extraordinary resources to the perpetuation of tension and the promotion of conflict—as the conference in question so manifestly does—we will invite only contempt if we fail to do so now.

So, in cooperation with Congressman LANTOS of California, I propose that the Congress should make known its view that the United States should abide by the spirit of section 104 of Public Law 97-241, and withhold funds in this instance.

I would note in conclusion that the United States, under a new policy being put into effect this year, will not turn over to the United Nations the assessed contributions for the calendar year 1983 until the beginning of the next fiscal year, that is until after October 1. So this question will not become moot simply because the date of the conference will pass in 2 weeks' time.

I invite colleagues who may share my view to become cosponsors of this concurrent resolution.

I ask that the letters to which I have referred, as well as the texts of several related documents, be printed at this point in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
Washington, D.C., June 14, 1983.

HON. GEORGE P. SHULTZ,
Department of State,
Washington, D.C.

DEAR MR. SECRETARY: I write to inquire about what seems to be a serious—and suddenly urgent—oversight in the conduct of our policy with respect to the United Nations. At issue is American credibility there.

The Congress has twice in recent years written into State Department authorization legislation provisions I have sponsored requiring that the United States withhold from its contribution to the U.N. our proportionate share of what is spent on two P.L.O. front groups operating within the U.N. system (the Secretariat's "Special Unit on Palestinian Rights" and the U.N.G.A.'s "Committee on the Exercise of the Inalienable Rights of the Palestinian People"). The reasons for this unusual restriction are clear and compelling; I need not elaborate on the purposes or methods of the P.L.O.

At the time the Senate last considered this issue, in June of 1981, I added a new dimension to this expression of American opposition to the program of the P.L.O. It had become clear to us here in the Congress that we simply do not have available the resources to permit a thorough accounting of other pro-P.L.O. activities and programs in the U.N. system. Accordingly, on June 17, 1981, I offered an amendment (which eventually became Section 104 of Public Law 97-241) requiring an annual review by the administration of the budgets of the United Nations and its specialized agencies—

"to determine which projects have the primary purpose of providing political benefits to the Palestine Liberation Organization."

The amendment also required that an amount equal to 25 percent (the U.S. proportionate share) of the funds alloted for any such project benefiting the P.L.O. "or entities associated with it" be withheld from our regular contribution to the United Nations or the specialized agency involved, and that a report on this be submitted to Congress. No such report has yet been sent to Congress.

Activities promoting the P.L.O., however, continue at the U.N. Most recently, a press release (#GA/AP/1445) issued in New York on May 20, 1983, announced that the U.N.'s Special Committee against Apartheid, chaired by Mr. Vladimir A. Kravets of the Ukraine, would convene an "International Conference on the Alliance between South Africa and Israel at the Vienna International Centre from 11 to 13 July 1983."

It is apparent from the release itself that the primary purpose of this conference is to provide political benefits to the Palestine Liberation Organization—not only through the false allegation that an "alliance" exists between these two countries, but also through the mendacious insinuation that there are doctrinal similarities between Zionism and Apartheid. In the environs of the United Nations, I state on the basis of personal experience there, such slanders should be understood to be intended precisely to promote the P.L.O.

May I suggest that the United States must announce that it will accordingly withhold the American share, 25 percent, of the funds expended on this—or any similar—program or project sponsored or supported by the United Nations.

If we ignore the proposed conference, or try to explain it away, having committed ourselves in principle and in law to withhold funds, we will invite only contempt from our adversaries and disillusionment among our friends.

I hope you will shortly be able to inform me that the U.S. will be withholding funds from the U.N. because of this conference, and that the report required by Section 104 is forthcoming.

Sincerely,

DANIEL PATRICK MOYNIHAN.

U.S. DEPARTMENT OF STATE,
Washington, D.C., June 23, 1983.

Hon. DANIEL PATRICK MOYNIHAN,
U.S. Senate.

DEAR SENATOR MOYNIHAN: The Secretary has asked me to reply to your letter of June 14, 1983 concerning United States withholding of its assessed contribution to the United Nations for projects which have the primary purpose of providing political benefits to the Palestine Liberation Organization (PLO).

The Department has been diligent in attempting to ascertain the amount of funds the United Nations has expended on such projects. So as to assure compliance with P.L. 97-241, the Department has held back $3 million to cover any required withholdings through fiscal year 1983. We believe this is a prudent step since we have seen no evidence that UN expenditures on activities subject to withholding would amount to as much as $12 million, thus implying a requirement to withhold $3 million. Should we not have adequate margin to impose the necessary restrictions, we would simply

withhold the indicated additional amounts from our fiscal year 1984 appropriation.

The Department is not satisfied with the responses received thus far from the United Nations in reply to our requests for information regarding amounts budgeted by the UN for PLO related activities. As a result, the Department has not closed its books on previous years, let alone this year. The Department intends to submit the requisite report to the Congress with the close of fiscal year 1983.

The International Conference on the Alliance between South Africa and Israel, which was authorized by a General Assembly resolution of December 9, 1982, is part of the 1983 work program of the UN Special Committee against apartheid. The U.S. voted against the resolution, and the Department is seeking information about the ultimate character and costs of the Conference. Upon receipt of that information, we will determine what action should be taken. In any case, the U.S. share of funding for the Conference itself would come from fiscal year 1984 appropriations not yet received.

With cordial regards,

Sincerely,

POWELL A. MOORE,
Assistant Secretary for Legislative and Intergovernmental Affairs.

[From Public Law 97-241, Aug. 24, 1982, State Department Authorization for fiscal year 1982 and 1983]

RESTRICTIONS RELATING TO THE PALESTINIAN RIGHTS UNITS AND PROJECTS PROVIDING POLITICAL BENEFITS TO THE PALESTINE LIBERATION ORGANIZATION

SEC. 104. (a) Funds appropriated under paragraph (2) of section 102 of this Act may not be used for payment by the United States, as its contribution toward the assessed budget of the United Nations for any year, of any amount which would cause the total amount paid by the United States as its assessed contribution for that year to exceed the amount assessed as the United States contribution for that year less—

(1) 25 percent of the amount budgeted for that year for the Committee on the Exercise for the Inalienable Rights of the Palestinian People (or any similar successor entity); and

(2) 25 percent of the amount budgeted for that year for the Special Unit on Palestinian Rights (or any similar successor entity); and

(3) 25 percent of the amount budgeted for that year for projects whose primary purpose is to provide political benefits to the Palestine Liberation Organization or entities associated with it.

(b) Funds appropriated under paragraph (2) of section 102 of this Act may not be used for payment by the United States, as its contribution toward the assessed budget of any specialized agency of the United Nations for any year, of any amount which would cause the total amount paid by the United States as its assessed contribution for that year to exceed the amount assessed as the United States contribution for that year less 25 percent of the amount budgeted by such agency for that year for projects whose primary purpose is to provide political benfits to the Palestine Liberation Organization or entities associated with it.

(c) The President shall annually review the budget of the United Nations and its specialized agencies to determine which projects have the primary purpose of providing political benefit to the Palestine Liberation Organization. The President shall report to the Congress on any such project for which a portion of the United States assessed contribution is withheld and the amount withheld.

(d) Subsections (a)(3) (b) shall not be construed as limiting United States contributions to the United Nations, or its specialized agencies, for projects whose primary purpose is to provide humanitarian, educational, developmental, and the other nonpolitical benefits to the Palestinian people.

[Department of Public Information, Press Section, United Nations, N.Y., press release, GA/AP/1445, May 20, 1983]

INTERNATIONAL CONFERENCE ON ALLIANCE BETWEEN SOUTH AFRICA AND ISRAEL TO BE HELD IN VIENNA, 11 TO 13 JULY

The following statement was issued today by the Acting Chairman of the Special Committee Against Apartheid, Vladimir A. Kravets (Ukraine):

The Special Committee against Apartheid is holding an International Conference on the Alliance between South Africa and Israel, at the Vienna International Centre from 11 to 13 July 1983. The Conference is being organized in co-operation with the Afro-Asian Peoples' Solidarity Organization, the Organization of African Trade Union Unity and the World Peace Council.

The agenda of the Conference includes an analysis of the relations between South Africa and Israel and their implications and ramifications, as non-governmental organizations and others.

Participants in the Conference will include representatives from United Nations bodies, the Organization of African Unity (OAU), the League of Arab States and other intergovernmental organizations, national liberation movements, non-governmental organizations, and experts.

The Special Committee attaches great importance to this Conference in the light of resolution 37/69 F on relations between Israel and South Africa, adopted by the General Assembly on 9 December 1982.

SENATE RESOLUTION 171—RELATING TO TRADING STATUS OF ROMANIA

Mr. HELMS submitted the following resolution; which was referred to the Committee on Finance:

S. RES. 171

Resolved, That the Senate does not approve the extension of the authority contained in section 402(c) of the Trade Act of 1974 recommended by the President to the Congress on June 3, 1983, with respect to the Socialist Republic of Romania.

● Mr. HELMS. Mr. President, on June 3 President Reagan recommended to Congress that most-favored-nation trade status to Romania be renewed. This renewal was recommended mainly because Romania indicated that the education repayment imposed on potential emigrants by the Government would be rescinded.

Rescinding the education tax would certainly be a first step in improving the emigration situation in Romaina; however, to the best of my knowledge, the United States has still not received any written assurances from the Romanian Government that this tax has in fact been rescinded, nor that it will be reinstated during the coming year.

Mr. President, for the record, let me state precisely what this education tax entails. Citizens wishing to emigrate from Romania have been required to pay hard currency for any schooling received beyond the 10-year compulsory level before being permitted to obtain a passport for emigration. This tax amounts to $3,700 for a person with a high school education, and $4,000 per person for each year of college education. This education repayment is no more than an obvious ransom whereby people are literally purchased out of Romania by sympathetic friends in the West, and runs counter not only to the Jackson-Vanik amendment to the Trade Act of 1974, but also to all of the international human rights agreements to which Romania has subscribed.

When Foreign Minister Andrei met with our State Department last month, a period of work/job service was mentioned as a substitute for the hard currency payment currently in force in return for higher education. If the education tax were replaced by an unreasonable period of time for such work/job service, Romania would be taking backward steps from the goal of improving their emigration situation—especially if anything over a 3-year period of such service were proposed. Before committing ourselves to the extension of MFN, these matters should be clarified so there are no misunderstandings on either side.

Last year assurances were given that processing time for emigrants would be reduced to 9 months the first year and 6 months thereafter. Assurances were also given that harassment of emigrants would cease.

Mr. President, I would cite two examples from the many cases that have come to my attention. First is the case of Maria Harangus, a citizen of Timisoara, Romania. Maria Harangus has been asking for permission to emigrate from Romania since 1979, and is an English teacher by profession. Finally, in 1982, she was given an application for emigration which she completed. Not only was she told that she would never be allowed to emigrate, she was also removed from her job, and told that she would not be allowed to teach English for a period of 10 years.

Another case is that of Nicolei Teodarache and family, citizens of Bucharest, Romania. The Teodarache family applied for emigration in 1980. They were flatly refused permission to emigrate. Nicolei Teodarache's son, Mircea, was beaten by the police in the street, and Nicolei Teodarache was removed from his job 6 months ago.

Not only were the assurances of last year not honored, but an education tax was imposed on emigrants, making free emigration close to impossible.

Furthermore, last year the Romanian Government ordered that all citizens register their typewriters and the print styles of all typewriters.

It appears that instead of improving, the situation in Romania has worsened. The same emigration problems of last year are still in existence. Moreover, the imposition of a totally new education tax can only be viewed as a cynical bargaining chip—an attempt to make the emigration process so onerous that even a return to the status quo would seem to be a relief.

Therefore, Mr. President, I send to the desk, a resolution of disapproval for the extension of most-favored nation trade status with respect to the Socialist Republic of Romania.●

AMENDMENTS SUBMITTED

AGRICULTURE, RURAL DEVELOPMENT, AND RELATED AGENCIES APPROPRIATION, 1984

ZORINSKY (AND OTHERS) AMENDMENT NO. 1439

Mr. ZORINSKY (for himself, Mr. ANDREWS, Mr. BOREN, Mr. BURDICK, Mr. EXON, and Mr. MELCHER) proposed an amendment to the bill (H.R. 3223) making appropriations for Agriculture, Rural Development, and Related Agencies programs for the fiscal year ending September 30, 1984, and for other purposes, as follows:

On page 62, after line 2, insert a new section as follows:

"SEC. 626. None of the funds provided by this Act may be used to conduct a producer reserve program for wheat and feed grains, or a payment-in-kind land diversion program, under which the Commodity Credit Corporation, in making payments to producers for storage of a commodity by the producer, provides payment for such storage in an area at rates that are less than the rates at which the Corporation provides payment for the storage of the commodity in commercial storage facilities in the area.".

TRIBLE (AND OTHERS) AMENDMENT NO. 1440

Mr. TRIBLE (for himself, Mr. WARNER, Mr. MATHIAS, and Mr. SARBANES) proposed an amendment to the bill H.R. 3223, supra, as follows:

On page 8, line 19, strike out "$23,227,000" and insert in lieu thereof "$27,727,000, of which $4,500,000 shall be available only for the construction of Phase III of the Virginia-Maryland Regional College of Veterinary Medicine".

ANDREWS (AND OTHERS) AMENDMENT NO. 1441

Mr. ANDREWS (for himself, Mr. BOREN and Mr. BENTSEN) proposed an amendment to the bill H.R. 3223, supra, as follows:

On page 26, line 11, following the figure $9,673,636,000, insert the following: ": *Provided*, That the Secretary of Agriculture is directed in connection with all commodities, under the payment-in-kind program, particularly cotton, to carry out the original commitment to producers."

MATTINGLY AMENDMENT NO. 1442

Mr. MATTINGLY proposed an amendment to the bill H.R. 3223, supra, as follows:

At the appropriate place in the bill insert a new section as follows:

SEC. . (a) Out of any funds made available to the Commodity Credit Corporation by this Act, the Secretary of Agriculture shall utilize not less than $5,000,000, or an equivalent value of commodities owned by the Commodity Credit Corporation, to provide—

(1) direct or blended credit for foreign purchasers in excess of such credit programs otherwise funded by this Act;

(2) bonus incentives for foreign purchasers;

(3) commodity distributions or monetary assistance for United States producers; and

(4) any combination of paragraphs (1), (2), and (3);

for the purpose of maintaining, developing, or increasing the export of agricultural commodities and products, including value-added products, produced in the United States.

(b) To the extent practicable, the expenditures and contributions required by this section shall be targeted by the Secretary of Agriculture to facilitate sales of United States products in markets in which foreign competing products are, in the Secretary's determination, subsidized directly or indirectly resulting in a competitive disadvantage for such United States products.

LEVIN (AND EAGLETON) AMENDMENT NO. 1443

Mr. LEVIN (for himself and Mr. EAGLETON) proposed an amendment to the bill H.R. 3223, supra, as follows:

On page 49, following line 22 add the following:

For an additional amount for the elderly feeding program, $875,000, to pay outstanding claims for meals served in fiscal year 1979.

HELMS AMENDMENT NO. 1444

Mr. HELMS proposed an amendment to the bill H.R. 3223, supra, as follows:

On page 44, strike "for the period October 1, 1983 through August 15, 1984" on lines 20 and 21;

On page 47, strike ", for the period October 1, 1983 through July 10, 1984" on lines 14 and 15; and

On page 48, strike ", for the period October 1, 1983 through September 6, 1984" on lines 6 and 7.

MELCHER AMENDMENT NO. 1445

Mr. MELCHER proposed an amendment to the bill H.R. 3223, supra, as follows:

On page 8, line 10, strike out the period and insert the following: ": *Provided further*, That of the appropriations hereunder not less than $5,000,000 shall be available for additional animal cancer research to carry into effect the provisions of Public Law 96-469."

BAUCUS AMENDMENT NO. 1446

Mr. BAUCUS proposed an amendment to the bill, H.R. 3223, supra, as follows:

At the end of the bill, add the following new section:

SEC. 626. (a) Except as provided in subsection (b), none of the funds appropriated by this Act may be obligated or expended to provide, to any person who produces an agricultural commodity on highly erodible land, any of the following:

(1) Price support assistance on such commodity made available under the Agricultural Act of 1949 (7 U.S.C. 1421 et seq.), the Commodity Credit Corporation Charter Act (15 U.S.C. 714 et seq.), or any other Act.

(2) A loan for the construction or purchase of a facility for the storage of such commodity made under section 4 of the Commodity Credit Corporation Charter Act (15 U.S.C. 714b(h)).

(3) Crop insurance for such commodity under the Federal Crop Insurance Act (7 U.S.C. 1501 et seq.).

(4) A disaster payment for such commodity made under the Agricultural Act of 1949 (7 U.S.C. 1421 et seq.).

(5) A new loan made, insured, or guaranteed, under the Consolidated Farm and Rural Development Act (7 U.S.C. 1921 et seq.) or any other provision of law administered by the Farmers Home Administration, that will be used for a purpose which will contribute to excessive erosion of highly erodible land.

(b) Subsection (a) shall not apply to—

(1) any agricultural commodity planted by a person to produce any of the 1973 through 1982 crops of agricultural commodities;

(2) any agricultural commodity planted by a person before the date of enactment of this Act;

(3) any agricultural commodity planted by a person during any crop year beginning before such date;

(4) any loan described in subsection (a) made before such date; or

(5) any agricultural commodity produced using a conservation system which—

(A) has been approved by a soil conservation district and is based on technical standards set forth in the Soil Conservation Service technical guide for that soil conservation district, or

(B) in an area where no soil conservation district exists, has been approved by the Secretary.

(c) For purposes of this section—

(1) the term "agricultural commodity" means any agricultural commodity normally produced by annual tilling of the soil, including one-trip planters; and

(2) the term "highly erodible land" means land classified by the Soil Conservation Service of the Department of Agriculture as class IVe, VIe, VII, or VIII land under the Land Capability Classification systems as in effect on the date of enactment of this Act. The land capability class for a field shall be that determined to be the "predominant" class under regulations issued by the Secretary of Agriculture.

BOSCHWITZ (AND OTHERS) AMENDMENT NO. 1447

Mr. BOSCHWITZ (for himself, Mr. BOREN, and Mr. BAUCUS) proposed an amendment to the bill, H.R. 3223, supra, as follows:

On page 52: On line 18 strike out "$872,000,000" and insert in lieu thereof "$936,000,000"; on line 18 strike out "$402,000,000" and insert in lieu thereof "$466,000,000"; on line 23 strike out "$650,000,000" and insert in lieu thereof "$682,000,000"; on line 24 strike out "$650,000,000" and insert in lieu thereof "$682,000,000".

COCHRAN (AND EAGLETON) AMENDMENT NO. 1448

Mr. COCHRAN (for himself and Mr. EAGLETON) proposed an amendment to the bill, H.R. 3223, supra, as follows:

On page 54, line 7, after the figure $364,410,000 insert the following: ", of which $5,000,000, to remain available until expended, shall be available to meet unanticipated costs of emergency activities not provided for in budget estimates"

REHABILITATION AMENDMENTS OF 1983

CHILES AMENDMENT NO. 1449

(Ordered to lie on the table.)

Mr. CHILES (for himself, Mr. DOMENICI, and Mr. PELL) submitted an amendment intended to be proposed by them to the bill (S. 1340) to revise and extend the Rehabilitation Act of 1973 and to extend the Developmental Disability Assistance and Bill of Rights Act, and for other purposes, as follows:

At the end of the bill, add the following new title:

TITLE III—OTHER AUTHORIZATIONS

MODIFICATION OF CERTAIN RECONCILIATION ACT LIMITS

SEC. 301. (a) Section 506 of the Omnibus Budget Reconciliation Act of 1981 is amended by striking out ", 1983, and 1984" and inserting in lieu thereof "and 1983, and $112,000,000 for the fiscal year 1984".

(b) Section 527 of such Act is amended by striking out ", 1983, and 1984" and inserting in lieu thereof "and 1983, and $825,000,000 for the fiscal year 1984".

AMENDMENT TO RAISE THE CEILING FOR VOCATIONAL AND ADULT EDUCATION

Mr. CHILES. Mr. President, when the Rehabilitation Amendments of 1983, S. 1340, comes before the full Senate for consideration, I will be offering an amendment, on behalf of myself, Mr. DOMENICI, and Mr. PELL to raise the authorization ceilings for vocational and adult education programs.

When Congress passed the Omnibus Budget Reconciliation Act of 1981, we placed a cap or ceiling on the amount that could be appropriated for vocational and adult programs at $735 million for vocational education, and $100 million for adult education. In the case of vocational education, we did not lower the maximum authorization level of over $1 billion, we simply limited the amount that could be appropriated, through 1984, at $735 million.

For fiscal year 1983, vocational programs are funded at over $728 million, just $7 million below the cap, and adult education is receiving $95 million, only $5 million less than the ceiling. That leaves us in a real bind when we sit down to determine appropriations for fiscal year 1984 for these programs.

There is a general consensus that vocational and adult education programs are critical ones that should be maintained and continue growing to meet the training needs of youth, and the basic education and retraining needs of adults.

We are still experiencing unemployment rates of over 10 percent. Unemployment among black Americans is over 20 percent, and 45 percent of the Nation's black youth cannot find work. Yet our defense and domestic industries are facing critical shortages of workers with high technology skills. Not too long ago we enacted a special appropriations package to create jobs through existing programs. No additional funds were added to vocational or adult education programs because of the ceilings. We are neglecting an important rung in the ladder to economic recovery if we do not adequately fund these programs in 1984.

The budget resolution we adopted has ample room to accommodate the ceilings I am proposing with my colleagues today. The House version of the Rehabilitation Act amendments contains the same levels for vocational and adult education. As the Education Subcommittees in the House and the Senate continue to work on the various proposals to reauthorize vocational education after 1984, I think we ought to adopt these ceilings so the program can continue the gains it has made in the meantime.

VETERANS DISABILITY COMPENSATION AND SURVIVORS BENEFITS AMENDMENTS OF 1983

CRANSTON AMENDMENT NO. 1450

(Referred to the Committee on Veterans' Affairs.)

Mr. CRANSTON submitted an amendment intended to be proposed by him to the bill (S. 1388) to amend title 38, United States Code, to increase the rates of disability compensation for disabled veterans and to increase the rates of dependency and indemnity compensation for surviving spouses and children of veterans, as follows:

On page 6, between lines 18 and 19, insert the following new title:

TITLE III—EXPEDITING CERTAIN MEDICAL FACILITY CONSTRUCTION PROJECTS

SEC. 301. (a) Subject to subsection (b) and notwithstanding section 5004(a)(1) of title 38, United States Code, or any other provision of law not to exceed $25,000,000 in funds that were appropriated to the Veterans' Administration construction, major projects, account and that the Administrator of Veterans' Affairs has determined are no longer needed either for the projects for which such funds were appropriated or for contingencies arising in the Veterans' Administration's construction program may be expended in fiscal year 1984 for the purpose of undertaking in fiscal year 1984 working drawings for the construction or alteration of any medical facility in order that such construction or alteration can, subject to appropriations therefor, be undertaken in fiscal year 1985, except that no funds may be expended under this paragraph for working drawings for the replacement or new construction of a complete health-care facility.

(b)(1) The amount obligated for working drawings under subsection (a) for any one medical facility shall not exceed $2,500,000.

(2) No working drawings for the construction or alteration of any particular medical facility shall be undertaken under subsection (a) unless 30 days prior to undertaking the drawings the Administrator has provided to the Committees on Veterans' Affairs and on Appropriations of the House of Representatives and the Senate written notice thereof and of the estimated range of the total cost of such construction or alteration and of the cost of the drawings.

(c) For the purpose of this section, the term "medical facility" shall have the meaning specified in section 5001(3) of such title.

On page 6, line 19, strike out "III" and insert in lieu thereof "IV".

On page 6, line 20, strike out "301." and insert in lieu thereof "401.".

ATLANTIC SALMON CONVENTION ACT

PACKWOOD AMENDMENT NO. 1451

Mr. BAKER (for Mr. PACKWOOD) proposed an amendment to the bill (S. 925) to make certain technical corrections in the Atlantic Salmon Convention Act of 1982, as follows:

Strike out all after the enacting clause and substitute the following:

TITLE I—MARINE FISHERIES PROGRAMS

SEC. 101. That section 10 of the Atlantic Tunas Convention Act of 1975 (16 U.S.C. 971h) is amended by striking out "and 1983" and inserting in lieu thereof "1983, 1984, 1985, and 1986".

SEC. 102. The Atlantic Salmon Convention Act of 1982 (16 U.S.C. 3601 et seq.) is amended—

(1) by inserting "not" immediately after "shall" in the second sentence of section 303(c); and

(2) by amending subsection (c) of section 307 to read as follows:

"(c) Any vessel used, and any fish (or the fair market value thereof) taken or retained in any manner, in connection with or as the result of the commission of an act which is

unlawful under subsection (a) of this section shall be subject to civil forfeiture under section 310 of the Act of 1976 (16 U.S.C. 1860) to the same extent as if such vessel was used in, or such fish was taken or retained in connection with or as the result of, the commission of an act prohibited by section 307 of the Act of 1976 (16 U.S.C. 1857).".

SEC. 103. (a) The Fish and Wildlife Act of 1956 (16 U.S.C. 742a et seq.) is amended—

(1) by striking out "September 30, 1983" each place it appears in section 4(c) and inserting in lieu thereof "September 30, 1984"; and

(2) by striking out "1982 and 1983." in section 7(c)(6) and inserting in lieu thereof "1982, 1983, and 1984.".

(b) Section 221 of the American Fisheries Promotion Act (16 U.S.C. 742c note) is amended—

(1) by striking out "September 30, 1982" in subsection (a) and inserting in lieu thereof "September 30, 1984";

(2) by amending subsection (b)—

(A) by striking out "fiscal year 1982," in subparagraph (2)(A) and inserting in lieu thereof "each of fiscal years 1982, 1983, and 1984,", and

(B) by striking out "1981 and 1982" in subparagraph (2)(C) and inserting in lieu thereof "1981, 1982, 1983, and 1984"; and

(3) by striking out "fiscal year 1981 or 1982, or both," in subsection (c)(1) and inserting in lieu thereof "any of fiscal years 1981, 1982, 1983, and 1984,".

SEC. 104. Section 1(c)(2) of the Anadromous Fish Conservation Act (16 U.S.C. 757a(c)(2)) is amended: (1) by striking out "shall be 90 percent" and inserting in lieu thereof "shall be up to 90 percent"; and (2) by striking out "resources," and inserting in lieu thereof "resources, prepared by an interstate commission,"; and by adding at the end thereof the following new sentence: "For purposes of this paragraph, the term 'interstate commission' means—

"(A) the commission established by the Atlantic States Marine Fisheries Compact (as consented to and approved by Public Law 80-77), approved May 4, 1942 (56 Stat. 267);

"(B) the commission established by the Pacific Marine Fisheries Compact (as consented to and approved by Public Law 80-232), approved July 24, 1947 (16 Stat. 419); and

"(C) the commission established by the Gulf States Marine Fisheries Compact (as consented to and approved by Public Law 81-66), approved May 19, 1949 (63 Stat. 70).".

SEC. 105. Section 2 of the Fishery Conservation Zone Transition Act (16 U.S.C. 1823 note) is amended by adding at the end thereof the following new subsection:

"(c) Notwithstanding such section 203—

"(1) the governing international fishery agreement referred to in subsection (a)(5), as extended until July 1, 1984, pursuant to the Diplomatic Notes referred to in the message to the Congress from the President of the United States dated May 3, 1983, is hereby approved by the Congress as a governing international fishery agreement for the purposes of such Act of 1976;

"(2) the governing international fishery agreement referred to in subsection (a)(6), as extended until July 1, 1984, pursuant to the Diplomatic Notes referred to in the message to the Congress from the President of the United States dated May 3, 1983, is hereby approved by the Congress as a governing international fishery agreement for the purposes of such Act of 1976; and

"(3) the governing international fishery agreement referred to in subsection (a)(4), as contained in the message to the House of Representatives and the Senate from the President of the United States dated May 3, 1983, is hereby approved by the Congress as a governing international fishery agreement for the purposes of such Act of 1976.

Each such governing international fishery agreement shall enter into force and effect with respect to the United States on July 1, 1983.".

TITLE II—MISCELLANEOUS PROVISIONS

SEC. 201. Notwithstanding the provisions of section 27 of the Merchant Marine Act of 1920 (46 U.S.C. 883), or any other provision of law to the contrary, the Secretary of the department in which the United States Coast Guard is operating shall cause the vessel Norden (official number 584767) to be documented as a vessel of the United States, upon compliance with the usual requirements, with the privilege of engaging in the coastwise trade so long as such vessel is owned by a citizen of the United States.

SEC. 202. (a) Notwithstanding any other provision of law, a corporation which, as of March 1, 1983, is a citizen of the United States within the meaning of section 2 of the Shipping Act of 1916, as amended (46 U.S.C. 802) shall continue to be deemed a citizen of the United States within the meaning of said section and shall continue to be deemed an owner whose vessels are eligible for documentation under section 104 of the Vessel Documentation Act (46 U.S.C. 65b) notwithstanding the election and service of a resident alien as its president or chief executive officer; provided, such resident alien has, pursuant to the provisions of section 334(f) of the Immigration and Nationality Act (8 U.S.C. 1445(f)), filed with the Immigration and Naturalization Service of the United States Department of Justice prior to July 1, 1983, an application to file declaration of intention to become a citizen of the United States.

(b) Any rights conferred by subsection (a) shall expire unless such resident alien has become a naturalized citizen by March 1, 1987.

PUBLIC BUILDINGS AUTHORIZATION ACT OF 1983

DANFORTH (AND BENTSEN) AMENDMENT NO. 1452

Mr. BAKER (for Mr. DANFORTH, for himself, and Mr. BENTSEN) proposed an amendment to the amendment No. 1434 to the bill (S. 1287) to authorize appropriations for the Public Buildings Service of the General Services Administration for the fiscal year 1984, as follows:

On page 3, "SEC. 7." is amended to read as follows:

"SEC. 7. (a) The Administrator of General Services (hereinafter referred to as the Administrator) shall transfer the building (occupied by the United States International Trade Commission and the United States Postal Service) and the site thereof located between Seventh and Eighth Streets, and E and F Streets, Northwest, in the District of Columbia, to the Smithsonian Institution for the use of certain art galleries of the Smithsonian Institution. Notwithstanding any other provision of law, such transfer shall be without reimbursement.

"(b)(1) The Administrator, at the earliest practicable date, shall relocate the United States International Trade Commission in a quality building that the Administrator and the Chairman of the United States International Trade Commission jointly determine is suitable to its headquarters operations and in a location in downtown Washington, District of Columbia, which is convenient to its mission, to congressional committees, and to private groups that do business with it. The selection of the building shall be made with the concurrence of the Committee on Environment and Public Works of the Senate and the Committee on Public Works and Transportation of the House of Representatives. The Administrator and the Chairman of the United States International Trade Commission shall each report separately in writing to the Committees on Environment and Public Works and Finance of the Senate and to the Committees on Public Works and Transportation and Ways and Means of the House of Representatives within 60 days of enactment of this Act and every 30 days thereafter on the progress in meeting the provisions of this section.

"(2) The Administrator, during the period which the United States International Trade Commission and the United States Postal Service continue to occupy the present building, shall repair such building to assure an adequate level of maintenance to prevent deterioration of the building, and to assure that conditions therein are safe, presentable and suitable to the normal operations of these agencies.

"(c) The transfer required by subsection (a) shall be made at such time when the Administrator and the Chairman of the United States International Trade Commission jointly determine that the use of the building by the United States International Trade Commission and the United States Postal Service is no longer essential.

"(d) The Administrator, in consultation with the Smithsonian Institution, is authorized to enter into such contracts and take such other action as may be necessary to make the building suitable to house certain art galleries and related activities of the Smithsonian Institution upon transfer of funds available to the Smithsonian Institution for such purposes."

METZENBAUM AMENDMENT NO. 1453

Mr. METZENBAUM proposed an amendment to the bill, S. 1287, supra, as follows:

At an appropriate place in the bill insert the following:

The Federal Building located at 550 Main Street, Cincinnati, Ohio, shall hereinafter be named and designated as the "John Weld Peck Federal Building." Any reference in a law, map, regulation, document, record, or other paper of the United States to such building shall be held to be a reference to the "John Weld Peck Building."

DEFENSE DEPARTMENT AUTHORIZATION

KENNEDY (AND OTHERS) AMENDMENTS NO. 1454 THROUGH 1456

Mr. KENNEDY (for himself, Mr. HOLLINGS, and Mr. LEVIN) submitted an amendment intended to be proposed by them to the bill (S. 675) to authorize appropriations for fiscal year 1984 for the Armed Forces for procurement, for research, development, test, and evaluation, and for operation and maintenance, to prescribe personnel strengths for such fiscal year for the Armed Forces and for civilian employees of the Department of Defense, and for other purposes, as follows:

At the end of the bill, add the following new section:

SEC. . Notwithstanding any other provision of this bill, no funds are authorized for the research, development, testing, evaluation, procurement, or military construction of the MX missile, except that $279 million shall be authorized for research, development, testing and evaluation of the small follow-on missile, and $75 million shall be authorized for research, development, testing, evaluation of the "hard mobile" concept.

Mr. KENNEDY (for himself and Mr. HOLLINGS) submitted an amendment intended to be proposed by them to the bill, S. 675, supra as follows:

At the end of the bill, add the following new section:

SEC. . Notwithstanding any other provision of this bill, no funds are authorized for research and development, or procurement of the B-1B bomber.

Mr. KENNEDY submitted an amendment intended to be proposed by him to the bill, S. 675, supra as follows:

At the end of the bill, add the following new section.

SEC. . Notwithstanding any other provision of this bill, the total funds authorized by this bill shall not exceed an increase of 5 percent real growth in budget authority over the amount appropriated for the programs authorized in the Defense Department authorization for fiscal year 1983.

AMENDMENTS TO THE DEFENSE DEPARTMENT AUTHORIZATION

Mr. KENNEDY. Mr. President, yesterday the Senate Armed Services Committee voted to report the Department of Defense authorization bill for fiscal year 1984. I voted against the measure because I believe it is the product of budgetary manipulation and because it provides funds for the MX missile, the B-1 bomber and other weapon systems that I consider wasteful or destabilizing.

When this bill comes to the floor following the July 4 recess I intend to offer three amendments:

An amendment to eliminate all funding for the MX missile except that associated with the development of the "small missile" and "hard missile" concepts.

An amendment to eliminate funding for the B-1 bomber.

An amendment to limit the increase in real growth in funding for defense to 5 percent over the fiscal year 1983 level.

DISABILITY AMENDMENTS OF 1983

LEVIN (AND COHEN) AMENDMENT NO. 1457

(Referred to the Committee on Finance.)

Mr. LEVIN (for himself and Mr. COHEN) submitted an amendment intended to be proposed by them to the bill (S. 476) to amend title II of the Social Security Act to require a finding of medical improvement when disability benefits are terminated, to provide for a review and right to personal appearance prior to termination of disability benefits, to provide for uniform standards in determining disability, to provide continued payment of disability benefits during the appeals process, and for other purposes, as follows:

On page 2, strike out lines 6 through 19 and insert in lieu thereof the following:

"(7)(A) Except as provided in subparagraph (B), no benefits under this section, and no child's, widower's, or widow's benefit based upon disability, may be terminated on the grounds that the physical or mental impairment or combination of impairments on the basis of which such benefit was payable has ceased, did not exist, or is no longer disabling, unless the Secretary makes a finding that there has been a significant improvement in the individual's impairment or combination of impairments, or there have been advances made in medical or vocational therapy or technology which have directly benefited such individual, so that such individual clearly demonstrates the capacity to perform substantial gainful activity.

On page 3, line 10, before the semicolon insert ", if the Secretary has made a finding, based upon a complete vocational analysis which takes into account the individual's age, education, and work experience, that such individual clearly demonstrates the capacity to perform substantial gainful activity".

On page 4, line 3, after "evidence" insert ", including diagnostic tests,".

Beginning on page 4, line 15, strike out through page 6, line 3, and insert in lieu thereof the following:

"(d)(1) Any preliminary decision rendered by a State agency (or by the Secretary in the case where disability determinations are made by the Secretary as provided in subsection (i)) with respect to an individual's rights for a payment under this title, including any such preliminary decision regarding a new entitlement and any preliminary decision regarding termination of or change in an existing entitlement, in the course of which a determination relating to disability or to a period of disability is required and which is in whole or in part unfavorable to such individual shall contain a statement of the case, in understandable language, setting forth a discussion of the evidence, the preliminary decision, the reason or reasons upon which the preliminary decision is based, and a request that the individual, if he disagrees with the preliminary decision, appear personally and submit additional medical evidence. Such statement of the case shall be transmitted in writing to such individual. An individual (or a spouse, divorced spouse, surviving divorced spouse, surviving divorced father or mother, child, or parent, who makes a showing in writing that his or her rights may be prejudiced by such preliminary decision) must notify the Secretary within 30 days after notice of such preliminary decision is received by such individual of such individual's intention to appear personally and submit additional evidence. Failure to appear personally or to submit additional evidence shall not extinguish the right to a hearing under subsection (e) with respect to the same preliminary decision, but such failure to appear personally or to submit additional evidence shall be noted in the individual's case record. The Secretary may schedule a personal appearance for an individual no sooner than 15 days after the Secretary receives notice from the individual that such individual wishes to appear personally, unless the individual requests an earlier hearing date. The personal appearance shall be made at a place which is reasonably accessible to such individual.

"(2) A review of the preliminary decision under paragraph (1) shall include a review of the medical evidence and medical history available at the time of such preliminary decision, and any new medical evidence submitted, including evidence observed or received at the personal appearance. On the basis of such review the State agency or the Secretary may affirm, modify, or reverse the preliminary decision.

On page 7, lines 4 and 5, strike out "after review under paragraph (2)".

On page 7, line 8, after "review" insert "under paragraph (2) (or if no such review was requested, the individual whose disability was the subject of such decision)".

On page 8, lines 1 and 2, strike out "a decision under this section which has been affirmed after review under subsection (d)" and insert in lieu thereof "a decision under subsection (d)(4)".

On page 8, lines 11 and 12, strike out "notice that such decision has been affirmed after a review under paragraph (2)" and insert "notice referred to in subsection (d)(4) has been received by the individual making such request".

On page 17, line 7, strike out "and" at the end thereof.

On page 17, between lines 7 and 8, insert the following:

(3) in paragraph (1), by adding at the end the following new sentence: "In the event that the Secretary on his own motion undertakes a review of an allowance decision made on the basis of such a hearing, the additional period shall end with the month preceding the month in which a final decision of the Secretary is made.".

On page 17, line 8, strike out "(3) by" and insert "(4) by".

On page 20, line 10, strike out "medical signs and".

On page 20, lines 12 and 13, strike out "which show the existence of a medical condition that could reasonably be expected to produce" and insert "which demonstrate".

On page 20, line 16, after "individual" insert "and his treating physician".

On page 20, line 18, strike out "medical signs and".

On page 21, strike out lines 1 and 2, and insert "RESPONSE BY SECRETARY TO COURT DECISIONS".

On page 21, line 19, strike out "either".

On page 21, lines 20 and 21, strike out "all beneficiaries, or must request" and insert "all beneficiaries within the jurisdiction of that court, unless the Secretary requests".

On page 21, line 23, after the period add the following: "If the Supreme Court does not agree to review the case, the Secretary shall be bound by the decision within the circuit in which it was rendered until such time as the Supreme Court rules on the issue involved and reaches a different result.".

On page 22, line 1, insert "(1)" after "(b)".

On page 22, line 3, strike out "on or after" and insert "prior to, on, or after".

On page 22, after line 3 add the following:

(2) In the case of a decision referred to in paragraph (1) for which a request for review cannot be made by reason of the expiration, occurring prior to the date of the enactment of this Act, of the time for making such a request, the Secretary of Health and Human Services shall acquiesce in such decision in accordance with the provisions of subsection (a), but such acquiescence shall not apply (unless the Secretary acquiesced in such decision prior to such date of enactment) with respect to periods of time occurring, and applications filed, prior to such date of enactment.

MULTIPLE IMPAIRMENTS

SEC. 10. (a) Section 223(d)(2) of the Social Security Act is amended by adding at the end thereof the following new subparagraph:

"(C) In determining whether an individual is able to engage in substantial gainful activity, the Secretary shall consider the combined effect of all of such individual's impairments, without regard to whether any one impairment would be considered severe when considered separately.".

(b) The amendment made by subsection (a) shall be effective with respect to determinations made on or after the date of the enactment of this Act.

Mr. LEVIN. Mr. President, today Senator COHEN and I are submitting for the RECORD an amendment which we will be offering to S. 476, our bill to amend title II of the Social Security Act. S. 476, which reforms the continuing review process in the social security disability program, was introduced by Senator COHEN and myself on February 15, 1983. As of today, we have 24 cosponsors. They are Senator HEINZ, Senator SASSER, Senator DURENBERGER, Senator BOREN, Senator SPECTER, Senator KENNEDY, Senator DIXON, Senator PRYOR, Senator MATSUNAGA, Senator GLENN, Senator NUNN, Senator KASTEN, Senator MOYNIHAN, Senator COCHRAN, Senator DECONCINI, Senator ANDREWS, Senator LAUTENBERG, Senator BOSCHWITZ, Senator RIEGLE, Senator HUDDLESTON, Senator HAWKINS, Senator PELL, Senator D'AMATO, and Senator QUAYLE.

Since the time of introduction, we have conferred with many interested parties on the substance of our bill. Because several of the suggestions for improving the bill are so important, we have decided to place these amendments in the RECORD at this time. These amendments do not deviate from our intended purpose at the time S. 476 was introduced, they merely clarify and improve upon our earlier language.

Let me take this opportunity to urge the Finance Committee to focus its attention soon on this matter of vital importance to the severely disabled people in our country. The legislation we passed last Congress to continue the payment of benefits under title II disability through appeal to an administrative law judge expires on October 1. We must have something in place to correct the deficiencies in the disability reviews by that time. It is a complicated program with complicated problems, and we urge the Finance Committee to move quickly to consideration of its reform.

NOTICES OF HEARINGS

COMMITTEE ON SMALL BUSINESS

Mr. WEICKER. Mr. President, I would like to announce that the Senate Small Business Committee and the House Small Business Committee's Subcommittee on SBA and SBIC Authority, Minority Enterprise and General Small Business Problems, will hold a joint oversight hearing on the small business development center program, on July 6, 1983. The hearing will begin at 8:30 a.m. and will be located in the north auditorium of the Federal Building, fourth floor, 915 Second Avenue, Seattle, Wash. For further information, please contact Robert Dotchin, Staff Director of the Small Business Committee, at 224-5175.

COMMITTEE ON ENVIRONMENT AND PUBLIC WORKS

Mr. STAFFORD. Mr. President, much attention has been given recently to the decline in our Nation's public capital investment, with a rise in the backlog of need, both for new investment and the rehabilitation of existing investment. These public investment needs over the next 20 years have been estimated as high as $3 trillion. Yet, at the same time, the percentage of our gross national product spent on infrastructure continues to decline, and now stands at a level well below that of any other major western industrialized nation.

The Committee on Environment and Public Works will hold a hearing on Friday, July 15, 1983, to continue our evaluation of this Nation's infrastructure needs. The hearing will take place at 10 a.m. in room SD-406 of the Dirksen Senate Office Building. The bills that will be considered are: S. 23, S. 532, and S. 1330.

The Committee on Environment and Public Works has held 6 days of hearings so far during this Congress on the issue of infrastructure and jobs. As a result of those hearings, we reported S. 724, now pending under a re-referral agreement in the Committee on Energy and Natural Resources. But we have yet to act on the public investment portion of that package.

At the July 15 hearing, we expect to examine the recent infrastructure study developed by the Congressional Budget Office, as well as one undertaken by the U.S. Conference of Mayors and National League of Cities.

While it is our intention to hold this hearing to a restricted list of public officials, I invite persons and groups that did not testify during the previous hearings to contact the committee or to submit testimony, in the event time becomes available. They should contact Hal Brayman at 202/224-7866.

Once the hearing has been completed, I would hope that our committee may be able to consider these bills at a markup session.

SUBCOMMITTEE ON PUBLIC LANDS AND RESERVED WATER

Mr. WALLOP. Mr. President, I would like to announce for the information of the Senate and the public the scheduling of public hearings before the Subcommittee on Public Lands and Reserved Water. On Tuesday, July 26, beginning at 10 a.m. in room SD-366 of the Dirksen Senate Office Building, the subcommittee will receive testimony on the acquisition of land, and acquisition and termination of grazing permits or licenses issued by the Bureau of Land Management pursuant to the Taylor Grazing Act. (43 U.S.C. 315 et seq.), at the White Sands Missile Range, N. Mex. On Thursday, July 28, beginning at 9 a.m. in room SD-366 of the Dirksen Senate Office Building, the subcommittee will receive testimony on S. 5, to designate certain public lands in the State of California as wilderness, and for other purposes; H.R. 1437 and S. 1515, bills entitled the "California Wilderness Act of 1983."

Those wishing to testify at either of these hearings should write to the Subcommittee on Public Lands and Reserved Water, Committee on Energy and Natural Resources, United States Senate, Washington, D.C. 20510.

For further information regarding these hearings you may wish to contact Mr. Tony Bevinetto of the subcommittee staff at 224-5161.

SUBCOMMITTEE ON WATER RESOURCES

Mr. ABDNOR. Mr. President, I want to take this opportunity to advise my colleagues that the Subcommittee on Water Resources will hold a hearing on inland navigation projects and policy on Monday, July 18. The bills to be discussed will include S. 669, appropriate portions of S. 947, and S. 1554, the administration's bill that was introduced yesterday by Chairman STAFFORD.

As in the past, it will be my hope to accommodate as many people as possible in testimony.

Mr. President, this hearing will be the eighth hearing of the Subcommittee on Water Resources since April 22. These hearings have addressed the major water resources issues of cost-sharing, project authorizations, deep-port user fees, urban water problems, and dam safety. To date, the subcommittee has received oral testimony from 47 witnesses from 16 States, including testimony from nine of my Senate colleagues.

In short, Mr. President, the subcommittee is laying the foundation for the development of an omnibus water resources act. The hearing scheduled for the 18th of July will continue this process. It is my hope that the subcommittee will begin before the August recess, to mark up such legislation.

The July 18 hearing will begin at 10 a.m. in room SD 406 of the Dirksen Senate Office Building.

SUBCOMMITTEE ON NUTRITION

Mr. DOLE. Mr. President, I wish to announce that the Senate Agriculture Subcommittee on Nutrition will hold hearings on the commodity distribution program on Tuesday, July 12.

Specifically, the subcommittee is interested in receiving testimony on the effectiveness of the program; administrative problems encountered by USDA, the States, and local recipient agencies in program operations; the displacement of commercial sales; and the question of extension of the current program beyond the 6 months authorized in the jobs bill.

The hearing will begin at 9:30 a.m. in room 328-A Russell Senate Office Building.

Anyone wishing further information should contact the Agriculture Committee staff at 224-2035.

SUBCOMMITTEE ON AGRICULTURAL PRODUCTION

Mr. COCHRAN. Mr. President, I wish to announce that the Senate Agriculture Subcommittee on Agricultural Production, Marketing, and Stabilization of Prices will hold a hearing on S. 1368, which would authorize the Secretary of Agriculture to issue marketing orders relating to the handling of eggs. The hearing is being held at the request of Senator HOWELL HEFLIN, sponsor of the legislation.

The hearing will be held on July 14 at 9:30 a.m. in room 328-A Russell Building.

Anyone wishing further information should contact the Agriculture Committee staff at 224-2035.

AUTHORITY FOR COMMITTEES TO MEET

SUBCOMMITTEE ON SMALL BUSINESS: FAMILY FARM

Mr. BAKER. Mr. President, I ask unanimous consent that the Subcommittee on Small Business: Family Farm, of the Committee on Small Business be authorized to meet during the session of the Senate on Wednesday, June 29, to hold a hearing on the impact of Canadian imports on small family farm.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

NATIONAL COMMISSION ON SOCIAL SECURITY REFORM

Mr. DOLE. Mr. President, in March, during Senate consideration of the Social Security Amendments of 1983, I asked that a summary of the activities of the National Commission on Social Security Reform be included in the RECORD. It has been brought to my attention that this material was never printed, so at this time I ask that this summary be included in the RECORD.

The summary follows:

MEMBERS OF THE COMMISSION

APPOINTED BY THE PRESIDENT

Alan Greenspan, Chairman—Chairman and President, Townsend-Greenspan and Company, New York, NY. Dr. Greenspan is a distinguished economist and a former Chairman of the Council of Economic Adviser (under President Ford).

Robert A. Beck—Chairman of the Board and Chief Executive Officer, Prudential Insurance Company of America, Newark, NJ. Mr. Beck played an important role in developing the position on social security of The Business Roundtable and other important business groups.

Mary Falvey Fuller—Management Consultant, San Francisco, CA. Ms. Fuller was a member of the 1979 Advisory Council on Social Security.

Alexander B. Trowbridge—President, National Association of Manufacuters, Washington, D.C. Mr. Trowbridge was Secretary of Commerce under President Johnson.

Joe D. Waggonner, Jr.—consultant, Bossier Bank and Trust Company, Bossier City, LA. Mr. Waggonner was a Member of Congress from Louisiana in the 87th to 95th Congresses and was active in social security legislation as a member of the Committee on Ways and Means.

APPOINTED BY THE MAJORITY LEADER OF THE SENATE, IN CONSULTATION WITH MINORITY LEADER

William Armstrong—Senator from Colorado and Chairman of the Subcommittee on Social Security, Committee on Finance.

Robert Dole—Senator from Kansas and Chairman of the Committee on Finance.

John Heinz—Senator from Pennsylvania, Chairman of the Special Committee on Aging, and member of the Committee on Finance.

Lane Kirkland—President, American Federation of Labor-Congress of Industrial Organizations. Mr. Kirkland has, for many years, played an active role in the development of labor's position on social security.

Daniel Patrick Moynihan—Senator from New York and Ranking Minority Member of the Subcommittee on Social Security, Committee on Finance.

APPOINTED BY THE SPEAKER OF THE HOUSE OF REPRESENTATIVES, IN CONSULTATION WITH THE MINORITY LEADER

William Archer—Representative from Texas and Ranking Minority Member of the Subcommittee on Social Security, Committee on Ways and Means.

Robert M. Ball—Visiting Scholar, Center for the Study of Social Policy, Washington, D.C. Mr. Ball was Commissioner of Social Security in 1962-1973 and held various positions with the Social Security Administration during the preceding 25 years.

Barber Conable—Representative from New York and Ranking Minority Member of the Committee on Ways and Means.

Martha E. Keys—Director of Educational Programs, The Association of Former Members of Congress, Washington, D.C. Ms. Keys was a Member of Congress from Kansas in the 94th and 95th Congresses and, as a member of the Committee on Ways and Means, was active in social security legislation.

Claude D. Pepper—Representative from Florida and Chairman of the Committee on Rules. Previously, he was Chairman of the House Select Committee on Aging and formerly was a Senator from Florida.

SUMMARY OF ACTIVITIES OF COMMISSION

On December 16, 1981, President Reagan promulgated Executive Order 12335, which established the National Commission on Social Security Reform. The National Commission was created as a result of the continuing deterioration of the financial position of the Old-Age and Survivors Insurance Trust Fund, the inability of the President and the Congress to agree to a solution, and the concern about eroding public confidence in the Social Security system.

The Executive Order provided that the National Commission should: ". . . review relevant analyses of the current and long-term financial condition of the Social Security trust funds; identify problems that may threaten the long-term solvency of such funds; analyze potential solutions to such problems that will both assure the financial integrity of the Social Security System and the provision of appropriate benefits; and provide appropriate recommendations to the Secretary of Health and Human Services, the President, and the Congress."

In carrying out its mandate, the National Commission met ten times, on approximately a monthly basis. Because of the brevity of the time in which to complete its work, the National Commission held no public hearings. However, it reviewed the results of the many hearings, studies, and reports of other public bodies, including Congress, the 1979 Advisory Council on Social Security, and the 1981 National Commission on Social Security. The National Commission on Social Security Reform sought the advice of a number of experts and thoroughly examined a wide variety of alternative approaches.

The Commission agreed that there was a financing problem for the Old-Age, Survivors, and Disability Insurance program for both the short run, 1983-89 (as measured using pessimistic economic assumptions) and long range, 1983-2056 (as measured by an intermediate cost estimate) and that action should be taken to strengthen the financial status of the program. The Commission recognized that, under the intermediate cost estimate, the financial status of the OASDI program in the 1990s and early 2000s will be favorable (i.e., income will sig-

nificantly exceed outgo). The Commission also recognized that, under the intermediate cost estimate, the financial status of the Hospital Insurance program becomes increasingly unfavorable from 1990 until the end of the period for which the estimates are made.

The Commission studied a large number of options that would solve the financing problems of the Social Security program, both short-range and long-range. These are summarized in some 55 pages of its report.

The Commission was able to reach a consensus for meeting the short-range and long-range financial requirements, by a vote of 12 to 3.

The members of the Commission voting in favor of the "consensus" package agreed to a single set of proposals to meet the short-range deficit. They further agreed that the long-range deficit should be reduced to approximately zero. The single set of recommendations would meet about two-thirds of the long-range financial requirements. Seven of the 12 members agreed that the remaining one-third of the long-range financial requirements should be met by a deferred, gradual increase in the normal retirement age, while the other 5 members agreed to an increase in the contribution rates in 2010 of slightly less than ½ percent of covered earnings on the employer and the same amount on the employee, with the employee's share of the increase to be offset by a refundable income-tax credit.

A more complete description and rationale for the solution to the long-range financing problem supported by the Senator from Kansas is presented in the next section. The second following section gives an overall statement of the achievements of the Commission, as developed jointly by Congressman Conable, a member of the Commission and the Senator from Kansas.

SUPPLEMENTARY STATEMENT ON MEETING THE LONG-RANGE FINANCING REQUIREMENTS BY COMMISSIONERS ARCHER, BECK, CONABLE, DOLE, FULLER, GREENSPAN, HEINZ, AND TROWBRIDGE [1]

The recommendations made in the "consensus" package fail to meet the long-range goal of providing additional financing equivalent to 1.8 percent of taxable payroll. The shortfall is an estimated .58 percent of taxable payroll. We believe that this should be derived by a delayed, slowly phased-in increase in the "normal" retirement age (the age at which unreduced retirement benefits are available to insured workers, spouses, and widow(er)s—which is age 65 under present law).

The major reasons for this proposal are:

(1) Americans are living longer.

(2) Older workers will be in a greater demand in future years.

(3) The disability benefits program can be imporved to provide cash benefits and Medicare to those between age 62 and the higher normal retirement age who, for reasons, of health, are unable to continue working.

(4) Because the ratio of workers to beneficiaries is projected to decline after the turn of the century, younger generations are expected to pay significiantly increased taxes to support the system in the 21st century. An increase in the normal retirement age will lessen the increase.

(5) Given sufficient notice, coming generations of beneficiaries can adjust to a later retirement age just as earlier generations adjusted to age 65.

Although we believe that greater action in this direction may be desirable, we are suggesting only enough change to produce approximately the needed .58% of taxable payroll. The recommended change would apply only to the normal retirement age. Early-retirement benefits would continue to be available beginning at age 62 for insured workers and spouses and at age 60 for widows and widowers, but the actuarial reduction factors would be larger. The minimum age for eligibility for Medicare benefits would continue to be the "normal" retirement age for OASDI benefits. Disability benefits are now available under somewhat less stringent definitions for those aged 60-64. However, because some workers, particularly those in physically demanding employment, may not benefit from improvements in mortality and be able to work longer, we assume that the disability benefits program will be improved prior to the implementation of this recommendation to take into account the special problems of those between age 62 and the normal retirement age who are unable to extend their working careers for health reasons.

Under our proposal, the normal retirement age would be gradually increased—one month each year—to age 66 in 2015, beginning the phase-in with those who attain age 62 in 2000. Beginning with those who attain age 62 in 2012, the normal retirement age would be automatically adjusted (on a phased-in basis) so that the ratio of the retirement-life expectancy to the potential working-lifetime (from age 20 to the "normal" retirement age) remains the same over the years as it was in 1990. The estimated long-range savings of this proposal is 0.65% of taxable payroll.

ADDITIONAL VIEWS OF SENATOR ROBERT J. DOLE AND CONGRESSMAN BARBER B. CONABLE, JR.

When the National Commission on Social Security Reform was created on December 16, 1981, few people had real confidence in what the commission could accomplish. And little wonder. For the better part of a year, social security had been embroiled in political controversy. The system moved closer to insolvency as proposals for financial reform were subjected to partisan political attack. The 15 selected as commission members, moreover, embodied widely divergent views. At least to outsiders, these members probably seemed incapable of reaching any true bi-partisan consensus.

In the last several days, the commission accomplished what some said was impossible. With the cooperation and approval of President Reagan and House Speaker O'Neill, the commission forged a consensus reform package with broad bipartisan support. As detailed earlier in this report, the package is designed to close the short-term deficit identified by the commission, and go a long way toward closing the long-range deficit. It requires concessions from all of the parties who have a stake in social security—current and future beneficiaries, taxpayers, and government employees who do not now contribute to the system. While no one member is happy with every specific recommendation, the important fact is that a consensus was reached on how to save the sytem. The bipartisan reform package, which we plan to introduce into the Senate with Senators Heinz, Moynihan, and others, and into the House, merits speedy congressional action.

Agreeing on the essential provisions of a social security solution was by no means the only accomplishment of the commission. It should be noted that the commission reached unanimous agreement on the size of the short- and long-term deficits in the social security cash benefit programs (old-age and survivors insurance and disability insurance). That is, in concrete dollar terms, the commission quantified the seriousness and the urgency of the financing problem. In our judgment, $150-$200 billion is the amount required to keep the system (excluding medicare) solvent through 1990. Over the very long term, the next 75 years, the needs of the system amount to about $25 billion a year (in 1983 dollar terms) over and above currently scheduled tax income. Only a year ago, partisan lines were drawn between those who did and did not believe there was any financing problem at all before the year 2000.

In addition, the National Commission provided a valuable forum for the diverse views on social security. With the able leadership of Chairman Alan Greenspan and with the expert assistance of Executive Director Robert Myers, members of both political parties were able to work together in studying the social security financing problem and options for financial reform. The interests of the elderly, organized labor and business, and the general taxpayer were all well represented. In recent weeks, we engaged in intensive negotiations which were, to a large extent, absent of the political partisanship that so seriously damaged efforts for responsible reform in 1981.

Finally, we believe the commission's recommendations are significant in that they narrowed the range of realistic options for closing the deficits. Realistic options were not judged to include, nor was there any support for, proposals to reduce or eliminate benefits for people now on the rolls. Options under consideration involved restraining the growth of benefits in future years and providing additional financing through some form of revenue increase. Current and future beneficiaries should be reassured by the unanimously held view that social security is an important and vital program that must be preserved.

With these accomplishments under our belts, we in Congress are in a strong position to hammer out the details of legislation in the early months of the 98th Congress. The expiration of interfund borrowing and the likely inability of the retirement program to pay full benefits in July make prompt action essential.

THE FINANCING PROBLEM

While the commission report accurately reflects the size of the social security financing problem, perspective may be provided by some additional facts. Most importantly, without prompt Congressional action, the social security retirement program will not be able to pay benefits on time beginning in July. In fact, were it not for "interfund borrowing," authorized by Congress in 1981 to permit the reserves of each social security trust fund (old age and survivors insurance, disability insurance, and hospital insurance) to be used to help pay benefits from another, the retirement program would have stopped meeting its monthly payments on time two months ago. With the authority for interfund borrowing now expired (as of December 31, 1982), July is when all of the the money borrowed from the other two trust funds—$17.5 billion in total—finally runs out.

[1] Source: Report of the National Commission on Social Security Reform, January 1983.

Reauthorizing interfund borrowing cannot help the retirement program for long. The retirement program is so large—accounting for 73 percent of all social security spending—and its borrowing demands are so heavy, the rest of the system could be insolvent before the year is out. The Social Security Board of Trustees, the Congressional Budget Office, and a wide variety of private actuaries and economists all agree that additional trust fund revenues must be provided or savings must be achieved if the social security system is to remain solvent through the remainder of this decade.

While it is the short-term financing problem that is immediately pressing, the long-term financing problem is equally serious, if not more so. The Social Security Board of Trustees reports that the combination of the baby-boom generation retiring and gradually lengthening lifespans will lead to a dramatic increase in the cost of social security—about 55 percent between 2005 and 2035 alone. In the year 2035, when the young people of today are beginning to retire, the actuaries expect that the elderly population will account for 21 percent of the overall population (as compared to 11 percent today), and the typical 65 year old will have a life expectancy of 17 years (as compared to 14.5 years today). The effect will be to decrease the ratio of taxpayers to beneficiaries from just over 3:1 today to 2:1, helping to generate the enormous long-term deficits we now foresee.

According to the social security actuaries, the long-term deficit in the non-medicare social security programs is 1.8 percent of taxable payroll. This is the figure adopted by the National Commission. To translate, it means that over the next 75 years, the actuaries project that benefits will outstrip payroll tax income, in dollar terms, by about $25 billion per year, or $2 trillion in total (expressed in 1983 dollar terms). Including medicare, the long-term deficit has been estimated at 7.01 percent of taxable payroll, or nearly $8 trillion in total.

HOW MUCH DOES THE SYSTEM NEED?

How much the system needs in additional financing depends on how we expect the economy to perform in the years ahead and how much of a "safety margin" is accumulated in reserves. Each set of forecasts provides a different view of the needs of the system, as illustrated in the table below.

ADDITIONAL RESOURCES REQUIRED IN THE NEAR-TERM TO BRING OASDI RESERVES UP TO CERTAIN LEVEL [1]

[In billions]

	Additional resources required [2]		
	CBO	1982 trustees' intermediate (II–B)	1982 trustees' pessimistic assumptions
Percent of 1 year's expenditures desired at beginning of 1990:			
9 percent (1 mo)	56.6	62	187
13 percent	68.7	70	195
15 percent	74.7	74	200
20 percent	89.9	88	216
30 percent	120.1	113	246
50 percent (6 mo)	180.7	163	303

[1] Table includes the effects of the Tax Equity and Fiscal Responsibility Act of 1982. Target reserve levels are attained in even annual increments.
[2] CBO estimates and Trustees' estimates are not directly comparable because CBO numbers include added interest on larger trust fund balances, while Trustees' numbers do not.

The commission settled on $150–200 billion as the amount required in the years 1983–89 to ensure the solvency of the system through 1990. This is roughly consistent with achieving a reserve ratio (reserves relative to annual outgo) of 15 percent by 1990, under the 1982 Board of Trustees' pessimistic assumptions.

Several points are worth noting in this regard. First, planning for a low growth decade is prudent in light of the experience during the 1970s. (The pessimistic assumptions in the 1982 Board of Trustees Report project the economy will perform much like in the past 5 years.) The failure to anticipate, both in 1972 and 1977, that prices would grow more rapidly than wages, and therefor benefits would grow more rapidly than tax income, is why we are in the situation we are in today. Second, a reserve ratio of 15 percent is not, in and of itself, a "goal". At this level, reserves would be lower than at any point in history. Accumulating considerably larger reserves is desirable, although this would be difficult to do very quickly. We believe we express the views of all members of the commission when we say that it is our hope that the economy will perform better than we assumed when we made our estimates and that a larger reserve cushion will accumulate. Finally, if the medicare program were under consideration as well, the reserve needs of the system would be considerably higher.

NOT A NEW PROBLEM

Given the partisan debate that raged over Social Security in 1981, some people may have lost sight of the fact that the financing crisis is *not* a new problem. Trust fund reserves have been on a down-hill course for years. As Table 1 indicates, prior to 1970, there were always reserves on hand capable of financing a year's worth of benefits or more—that is, reserves equal to 100 percent or more of annual outgo. By 1976, reserves had fallen to 57 percent of outgo, and today, the combined reserves of the system stand at about 15 percent of annual outgo, only 8 weeks worth of benefits. The situation is even worse, at least today, when medicare is excluded.

TABLE 1.—HISTORICAL OASDHI RESERVE RATIOS, 1950–83

[Assets at the beginning of each year as a percent of outgo during the year]

Calendar year	Trust funds				
	OASI and DI combined	OASI	DI	HI	OASDHI
1950	1,156	1,156			1,156
1955	405	405			405
1960	186	180	304		186
1965	110	109	121		110
1970	103	101	126	47	95
1971	99	94	140	54	93
1972	93	88	140	47	87
1973	80	75	125	40	76
1974	73	68	110	69	73
1975	66	63	92	79	69

TABLE 2.—HISTORICAL LEVELS OF OASDHI TRUST FUND ASSETS, NUMBER OF MONTHS' WORTH OF BENEFITS ON HAND

Calendar year	Number of months' worth of expenditures on hand at beginning of year		
	OASDI	HI	OASDHI
1950	138.7		138.7
1960	22.3		22.3
1965	13.2		13.2
1970	12.4	5.6	11.5
1975	8.0	9.4	8.3
1980	2.9	6.2	3.5
1982	1.8	6.3	2.6

Among other public groups to report in the last 5 to 10 years, the social security advisory councils of 1975 and 1979, an expert consultant panel of actuaries and economists, reporting in 1976, and President Carter's Commission on Pension Policy and the National Commission on Social Security, both reporting in 1981, all underscored the seriousness of the short- and long-term financing problem. Social security's financing problem dates to the early 1970's and even earlier, when Congress increased benefits and expanded eligibility without facing up to the cost of doing so.

THE TIME FOR ACTION IS NOW

There is no denying that we have a big job ahead of us in Congress. We face many difficult decisions as to the details of the legislation, and the adequacy of the measures proposed. The balance of the long-term deficit will also have to be addressed. In our view, a balanced solution to this problem will involve bringing the cost of social security into line with the ability of our working population to finance the system. The tax burden is already heavy, and the confidence of young people critically low. As reflected in the additional views, a majority of commission members recommends increasing the retirement age, for people retiring in another 20 or 30 years, as an equitable way of reducing long-range costs.

The American people—the 36 million people receiving benefits as well as the 116 million working people who support the system—deserve more than another "quick fix" that holds the system together until the next crisis comes along. They deserve the speedy consideration of this bi-partisan package of recommendations. Confidence in the long-term viability of social security will only be restored by enacting measures that put the system back on a sound financial footing and do so without imposing an unrealistic tax burden on present and future workers.

Within a matter of weeks, the House Ways and Means Committee and the Senate Finance Committee will begin the task of weighing the options and then drafting social security financing legislation. We feel confident that the essential elements of the reform package we now recommend, as endorsed by President Reagan, Speaker O'Neill, Majority Leader Baker and others, will be adopted by the Congress and enacted into law by May. Moving quickly to shore up the nation's largest domestic program is in all of our interests.

STAFF OF THE COMMISSION

Finally, the Senator from Kansas would like to pay special tribute to the fine staff of the National Commission. Under the able leadership of Robert J. Myers, who served as Executive Director, the staff labored long and excellently in providing us with compre-

hensive explanations of the complex issues involved and the possible methods of solving the financing problem. The staff's expertise on social security matters was invaluable to the work of the Commission. Their part in this great and successful endeavor is greatly appreciated.

The professional staff of the National Commission included: Robert J. Myers, Executive Director, Nancy J. Altman, Merton C. Bernstein, E. Annette Coates, Suzanne B. Dilk, Renato A. DiPentima, Susan A. Dower, Elizabeth T. Duskin, Timothy J. Kelley, Eric R. Kingson, Edward F. Moore, Virginia P. Reno, Bruce D. Schobel, and Carolyn L. Weaver, who, I should add, also covered social security matters for the Senate Finance Committee.

SHERIFFS COMMENT ON PRISON STUDY

● Mr. SASSER. Mr. President, during the past month much attention has been given to the crisis-level condition of American prisons and prison populations, and what Federal, State and local governments ought to do about this condition. Overcrowded and understaffed, the local jail and what we do about it represents one of the most serious law enforcement challenges confronting us in the immediate future.

In a comprehensive report on this situation entitled "Jails: Intergovernmental Dimensions of a Local Problem," the U.S. Advisory Commission on Intergovernmental Relations, on which I serve, made a series of recommendations regarding the problem. First and foremost among these is that the Federal role should not be expanded and that if there is to be Federal involvement in this area, it should be based on a clear and convincing national need and the Federal involvement serve a concise national purpose.

Shortly after the release of the ACIR report, I addressed the annual conference of the National Sheriffs Association (NSA) in Nashville, where a number of sheriffs emphasized to me points which the NSA had raised about the ACIR report.

The sheriff in America probably has more to do in dealing with prisons and prison populations than any other law enforcement official. As such, the sheriff's observations on any report concerning itself with prisons deserve close attention.

In general, the sheriffs welcome the thrust and the recommendations of the ACIR report. There are several points raised by the sheriffs, however, which deserve the scrutiny of lawmakers at all levels of government.

For these reasons, I ask that a statement of observations on the ACIR report by the National Sheriffs Association be printed in the RECORD at the conclusion of my remarks and that an ACIR release which summarizes the report accompany the sheriffs' statement.

These two documents should help to illuminate understanding of a problem that deserves both attention and action.

The statements follow:

COMMISSION SAYS NO TO EXPANDED FEDERAL ROLE IN LOCAL JAILS

Many jails are in a state of crisis, agreed members of the Advisory Commission on Intergovernmental Relations at their June 16 meeting. There was no disrupting the fact that a substantial number of local jails are overcrowded, frequently house inapprorriate populations, and sometimes do not meet basic constitutional standards. However, in the Commission's view, the solution to this crisis lies in a strong state/local partnership, not increased federal financial assistance. The Commission therefore voted against establishing a national commission on corrections practices and said that an expanded federal role in such traditionally local areas as jails should be based on a clear and convincing demonstration of national purpose. Without such a demonstration, no new federal program should be established.

The Commission also called for a more balanced, less prescriptive federal judicial role with regard to local jails. The Commission stated its belief that federal (and state) courts should confine their role to insuring that appropriate legislative and executive officers produce reasonable plans for bringing unconstitutional institutions into compliance. In recent years, the courts have taken extremely specific stands demanding compliance with court-designed plans. "One of the major problems with court orders is that they are aimed at specific constitutional violations as opposed to the systemwide reforms that are almost always required," testified Baltimore County Councilman John O'Rourke at the ACIR hearing on jail reform. On behalf of the National Association of Countries, Councilman O'Rourke agreed that the courts role should be less intrusive. On the morning of the Commission's meeting, ACIR called seven expert witnesses to testify about local corrections—all stated that indeed the local jail crisis exists and that specific steps are needed to put these local houses of corrections in order.

Commission members agreed that a series of reform measures were necessary. Although ACIR could not support an expanded federal role, the Commission did recommend continued federal efforts in the areas of corrections research and development, in training local correctional personnel, and in providing technical assistance and information to local agencies. Further, the Commission recommended amending the Federal Property and Administrative Services Act of 1963 so that the national government may donate surplus property for corrections purposes.

The strengthened state/local partnership to improve jail conditions recommended by the Commission includes a series of steps states can take to alleviate the burdens local governments must bear. In the Commission's view, states should:

Adopt guidelines for removing certain populations from local jails when practicable—for example, the young, the mentally ill and the publicly inebriated are all too often, research reveals, placed in jail as a last resort;

Adopt sentencing guidelines based on legislatively-predetermined population maximums at the state and local levels;

Fairly compensate localities for housing state prisoners;

Encourage localities to make increased use of community-based alternatives for punishing offenders of less serious crimes and to expand the use of pretrial release when there is a reasonable expectation that public safety will not be threatened. Also, states should enact defendant-based percentage bail laws to ease the financial burden of bail on poor defendants; and,

Allow local correctional facilities to contract with private companies so that inmates can produce certain goods and services as long as they are not directly competing with private sector goods and services.

The Commission recognized that, fundamentally, jails are a local responsibility and that setting basic standards for their operation first lies with local governments. Because states are also responsible for ensuring that these facilities meet basic constitutional standards, they should, if they have not already done so, set standards (in consultation with local officials) to protect basic constitutional rights. Further, where lacking, states should establish state correctional commissions to develop comprehensive policies.

The Commission recommended that local governments upgrade their jail personnel practices and management where necessary. Also, localities should make provision for academic training for inmates or, at a minimum, provide access to local facilities, such as libraries.

ACIR's recommendations on jail reform were based on the findings from its study, Jails: Intergovernmental Dimensions of a Local Problem. Following consideration of this study, the Commission received oral reports on the status of general revenue sharing renewal legislation; a subcommittee meeting on the Constitution and Federalism; and pending bills to change ACIR's membership. The Commission is expected to meet again in September.

ACIR is the national, bipartisan commission established by the Congress in 1959 to monitor intergovernmental relations and make recommendations for change. Its members includes federal, state and local elected and appointed and private citizens. Dr. Robert B. Hawkins of Sacramento, California is chairman.

NSA OBSERVATIONS ON RECOMMENDATIONS OF THE ADVISORY COMMISSION ON INTERGOVERNMENTAL RELATIONS JAILS: INTERGOVERNMENTAL DIMENSIONS OF A LOCAL PROBLEM

The Advisory Commission on Intergovernmental Relations (ACIR) is to be commended on its thorough job of jail research. The people might disagree with the recommendations or agree; some would argue for a prioritizing of the issues. The National Sheriffs' Association is grateful for the opportunity to participate in the Commission's deliberation on Jails: Intergovernmental Dimensions of a Local Problem.

The recommendations would indicate a good deal of thought and consideration has been given to their formulation. In general NSA concurs with the thrust, but we would like to make observations on recommendations which we feel could benefit by deleting or amending certain portions.

RECOMMENDATION A.2: KEEPING INAPPROPRIATE POPULATIONS OUT OF JAILS.

NSA has been a member of the National Jail Coalition since its inception and as everybody knows its reason for being is to remove the juvenile, the mentally ill and re-

tarded, and publicly inebriated detainees from jails to more appropriate settings for treatment and/or confinement. The recommendation is weakened by the inclusion of the words "where resource constraints render these proposals impracticable etc.". Groups for years, including NSA, have agreed that this action should be taken, but all too often nothing is done. A recent article in Federal Probation in reference to confining the mentally ill in jail made the point that since progress has not been made that Jail Administrators, etc. should just accept the fact that the mentally aberrant will be confined in jails and opt for a jail treatment model. (i.e., mental health counselors who work for the Jail or some other forms of community resources provided). This last sentence is nothing but a "cop out" for things can be accomplished if priorities are set right. It is interesting to note that last year in the Harper case, the West Virginia Supreme Court ordered that chronic alcoholics no longer be confined in jails even though public drunkenness in West Virginia is still a crime. Realizing the dearth of resources to deal with the problem, the Court ordered the State to make available some 14 million dollars through a State Department of Health to develop alternative counseling and treatment centers.

RECOMMENDATION A.5: REMOVING STATE PRISONERS FROM LOCAL JAILS

Most Sheriff's would say "it's about time!" We agree that jails should be properly reimbursed for holding state prisoners, for often counties are grossly underpaid. Recently on a trip to Autauga County, Alabama we learned that the Sheriff was reimbursed by the State at the rate of $1.75 per day for each state inmate in the Autauga County Jail.

We feel, however, that this recommendation is too weak. We propose a clause which says, in effect that "no more than 20% of the jail's population shall be state prisoners without the express approval of the Sheriff". Further, any money derived by local governments from this kind of arrangement should go directly into the jail budget of the Sheriff and not into the county general fund. This was one of the main factors in the crowding of the New Jersey jails—the state gave the money over to the Boards of County Freeholders. The Sheriff of Monmouth County, New Jersey got fed up and finally sued the State Department of Corrections in an attempt to force the removal of nearly 200 state sentenced inmates from the crowded county jail. (Page 10 of The Pre-Trial Reporter, December 1982). Part C—Standards and State Assistance.

RECOMMENDATION C.1: STATE STANDARDS, MONITORING, AND REIMBURSEMENT

We think that this recommendation could be made stronger. States should be urged to enact legislation providing funding for jail renovation and capital construction and technical assistance. Once the state has agreed to provide the money, it should insist upon jail standards which are mandatory. In this regard the powers of state jail inspectors should be increased which would enable the inspectors to compel compliance without the necessity of getting a court order. Failure to comply would mean the withdrawal of state support and failure to comply with *life safety* standards would be basis for closing the jail down.

RECOMMENDATION C.2: UPGRADING JAIL PERSONNEL

This is a good recommendation. We feel it could be improved by the inclusion of another sentence which would further explain the last clause "pay particular attention to personnel and training in mandating standards for local jails". States should be encouraged to appoint jail advisory training committees composed of Sheriffs and jail staffs to guide the development of implementation of such training. In states involved in correctional training, it is often left up to the State Department of Corrections staff who reasonably have more interest in state institutions than they do jails. Often state trainers have never worked in a jail. There is a big difference between a jail and a prison and a considerable difference in the kinds of problems confronting people who work in them. For example, more than 6,000,000 people are processed through American jails in contrast to penal institutions where prisoners will be there for a considerable length of time. The jail suicide rate is 3½ times higher than the national average and much higher than experienced in state prisons. Accordingly, good training would indicate a great deal more time spent on suicide prevention techniques with jail officers.

Recently, Supreme Court Justice Burger at Pace University in New York City said institutions should be involved as training schools and factories with fences instead of "human warehouses". Justice Burger addressed areas touched on in Recommendation C-5. NSA would like to emphasize the point made by the Chief Justice in regards to:

Cooperation by leaders of business and labor in the development of programs designed to produce goods in the jail and prison setting. NSA feels this would help to eliminate a great deal of idleness, frustration and dead time with which many prisoners are now confronted.●

VOICE OF AMERICA

● Mr. LAXALT. Mr. President, the Voice of America has a mandate from this body—expressed in the VOA Charter, signed into law 7 years ago—to "present the policies of the United States clearly and effectively." I am pleased to say that VOA is taking effective steps to meet this mandate in its editorial program begun 1 year ago on June 1 under the leadership of USIA Director Charles Z. Wick; the former Director of VOA, John R. Hughes; and continued under current VOA Director Ken Tomlinson. Daily editorials are broadcast in English and in 41 other languages worldwide—to Eastern Europe, the Soviet Union, Afghanistan, Latin America, and elsewhere. These brief broadcasts replace the old, less clearly identified, VOA commentaries. And that in turn ensures that listeners know where the news ends and where the expressions of opinion, reflecting U.S. policy, begin.

I think that taken together with the VOA mandate to represent the news accurately and reliably, nothing could be more important in countering Soviet misinformation, and disinformation, about this country. I should like to have printed in the RECORD a few of these editorials to let the American people know that the principles we stand for, and the policies we are pursuing, are indeed being conveyed to the people of the world.

The editorials follow:

WHAT TERRORISM WILL NOT DO (OLE 17)

Announcer: Next, a VOA Editorial, reflecting the views of the U.S. Government.

Voice: There are limits to how much can be added to what is already known about the nature of terrorist acts such as Monday's bombing of the American Embassy in Beirut. Indeed, after a certain point, these carefully planned demonstrations of savagery make the words used to describe them lose their meaning.

But there is something that can and should be said about the impact of terrorism. Terrorism is, by its nature, a public action. It is a tactic that uses the sacrifice of innocent individuals for its shock value. That people's lives are taken or threatened is almost incidental. The terrorist is simply interested in the political reaction that hurting his victims will produce.

We don't know yet how many innocent people were killed and injured in the bombing of our Embassy in Lebanon. We are still searching for bodies and looking for survivors. But we do know that this act of terrorism—and others like it—will not achieve any larger purpose. We will not allow terrorism—in the Middle East or elsewhere—to alter our policy one iota. Not one iota.

It is not to spite the terrorist that we have adopted this policy. It is because we consider it the best defense against this tactic. We and other governments are well aware of how difficult it is to prevent terrorist acts from being committed. There are always people with a sadistic streak, or those with a psychological need for attention. But most terrorist groups claim that they are not unbalanced. If so, our defense is a strong one.

Because we can make sure that there is no rational reason for the terrorist to believe that his actions will bring about the political results he wants. We will not respond to acts of terrorism—except with added vigilance and increased determination to find the perpetrators.

We acknowledge that terrorism can inflict terrible private suffering. We share the grief of the families of the victims. But terrorism can have a public impact only if we let it. And that we are determined not to do.

Announcer: That was a VOA Editorial, reflecting the views of the U.S. Government.

GETTING TOUGH (OPL 03)

Announcer: Next, a VOA Editorial, reflecting the views of the U.S. Government.

Voice: Poland's military leaders have responded to last week's May Day demonstrations of popular support for Solidarity with a new wave of repressive activity. It is exactly the wrong response. Unfortunately, it is very much in character.

Actually, the new repressions started before the May Day demonstrations ended. Police attacked pro-Solidarity demonstrators with tear gas, water cannon and truncheons. One man was reportedly killed in the city of Nova Huta, where the big Lenin steel mill is located.

But demonstrators are not the only targets. A gang of thugs reportedly broke into the Convent of the Franciscan Sisters in Warsaw Tuesday evening and beat up workers there who have been helping the families of interned Solidarity activists.

Another target is the internationally acclaimed Polish filmmaker, Andrzej Wajda,

whose motion pictures include "Man of Iron," the award-winning film about the rise of Solidarity. Mr. Wajda was dismissed by the government from his position as head of the Warsaw film association. And the government's official spokesman is once again engaging in public criticism of Solidarity's former leader, Lech Walesa—which is a good indication that popular support for Mr. Walesa continues to be strong.

The Polish authorities have evidently learned nothing. They still think that if they just act tough enough, they will intimidate Solidarity's supporters and the reform movement will finally fade away.

But threats didn't stop Solidarity. Martial law failed to put an end to support for the independent unions. Police violence hasn't silenced the Polish people. And, as the Polish bishops demonstrated by issuing a list of demands to the government on Thursday, the Roman Catholic Church in Poland refuses to abandon the people's cause.

It is time the military authorities in Poland—and their Kremlin sponsors—understood one essential point: their repressive tactics have only served to increase the polarization between the people and the government. Rather than helping the country return to normal, they have prevented it.

It is time the military authorities tried conciliation. However dubious they may be about it, they surely must see that their current pressure tactics will never work.

Announcer: That was a VOA Editorial, reflecting the views of the U.S. Government.

SMALL BUSINESSES, BIG REWARDS (80033)

Announcer: Next, a VOA Editorial, reflecting the views of the U.S. Government.

Voice: Louis Ruiz and his son, Frederick, are the owners of a small California business that makes Mexican-food products. They are accustomed to hard work and long hours. They are not accustomed to the spotlight of public attention. But last week, that is exactly what they got. In a White House ceremony in Washington, their small business was honored as America's National Small Business of the year.

Mr. Ruiz was born in Mexico. He and his U.S.-born son started their business by themselves in 1964. It was a risky venture. But it is succeeding. Indeed, it has succeeded so well to date that it now employs more than 200 people. Last year, the Ruiz business sold almost ten million dollars worth of its products.

Small businesses may seem insignificant compared to huge, well-known corporations. But in fact, they are an important part of our economic system—and that of other free-market countries. Small businesses produce vital goods and services—accounting for about forty percent of national production in the United States. And small businesses produce jobs—about one-half of all employment in this country's private sector.

Small businesses contribute to their countries' development and prosperity in other ways, as well. Many innovative ideas for production and technology come from small businesses, which compete with bigger, established firms by finding new products, services, and methods to meet customer demand. Just a few successful examples of small businesses' successful ingenuity are the zipper, the aerosol can, and the heart pacemaker.

Running a small business can be risky. It can fail. But it can also be rewarding—as the Ruiz family, its employees and customers know. And when a country pursues policies that encourage the development of small businesses, it can expect rewards as well—innovation, employment, and productive activity.

Countries with free-market systems know this. But even some communist countries are now recognizing it too, as they allow the existence of small private farming and shops as a way to save their struggling economies. Nations which seek to develop need to do as much, and more: small businesses should be permitted to exist—and to expand. This is one way to promote economic growth—and to spread a society's wealth among all its people.

That was a VOA Editorial, reflecting the views of the U.S. Government.●

KTW

● Mr. EAST. Mr. President, organizations that oppose the common law and constitutional rights of Americans to keep and bear arms have launched a campaign to ban "cop-killer bullets." Many sincere Americans and some of my colleagues support legislation aimed at achieving this seemingly worthy objective.

Before we rush to enact such legislation, I hope my colleagues will consider the technical problems with such proposals. I ask that an article by Warren Cassidy that appeared in Reports from Washington of June 30, 1983 and an article by Neal Knox from the July-August 1983 Handloader magazine be printed in the RECORD.

The articles follow:

[From Handloader magazine, July-August 1983]

THE KTW FLAP

(By Neal Knox)

The controversy over KTW or armor-piercing bullets is a tempest in a teapot, a great wringing of hands over a nonexistent problem. These bullets can penetrate the light body armor that police wear; what makes them a nonproblem is that not one has penetrated armor while someone wore it. The "cop-killer" bullets that antigun organizations, publicity-seeking congressmen, and the news media have assaulted so furiously have never killed a cop—or even wounded one—by penetrating light body armor. But this situation may change now because of the mass education of crooks that has resulted from the furor.

Once again, the antigun forces have capitalized upon public ignorance about firearms and have assigned mystical properties to some elemental laws of physics. The "magical property" of the KTW bullet was supposedly its DuPont Teflon coating, an excellent lubricant that was said to allow the bullet to slide through the fibers of the vest. I even saw a press bulletin that told the public that the "problem" had been solved because DuPont refused to allow any more Teflon to be sold to bullet makers.

Certainly, the KTW bullet, the French Arcane, or any other pointed, hard, fairly fast bullet—with or without a lubricant coating—can penetrate light body armor and could thus kill an officer. But so can a knife or an ice pick.

Handgun Control Inc., as part of its endless efforts to find a soft spot through which to attack the ownership of handguns, has launched a series of page-deep ads in major newspapers across the country. Those ads make it appear that no reasonable person could oppose a ban on "cop-killer" bullets, that in fact anyone who does oppose such legislation is in favor of killing cops.

"The police want them banned," the ads proclaim; "The NRA doesn't." Some NRA members have told me that they were embarrassed to belong to an organization that takes such an unreasonable position—which is precisely what Handgun Control Inc. had hoped to achieve.

Of course, the ads don't mention that technical experts who testified for the BATF, Secret Service, and FBI during hearings on the so-called cop-killer-bullet bill last year all testified against it. They pointed out that the bill would have no real effect on crime—but that legislation of the type that was envisioned would make countless types of other ammunition illegal, since many standard loads are also capable of penetrating light body armor.

The NRA Institute for Legislative Action has had a terribly difficult time opposing anti-KTW legislation. The institute's difficulty is this: no honest citizen has a need for a bullet that is designed to penetrate body armor, but many of us do have legitimate reasons for owning and using ammunition that can do it but was designed for other purposes and uses; if ILA starts telling how easy it is to defeat such armor—and the kinds and types of loads that can do it—there are going to be some police officers killed. ILA doesn't want to have any part in teaching hoods how to kill cops. Such problems obviously don't worry outfits like Handgun Control Inc, but they do worry the NRA.

As most knowledgeable hand-loaders know, light body armor comprises about eight (Type I) to sixteen (Type II) layers of woven Kevlar, a super-strong fiber used in the manufacture of automobile tires. Almost any hard, pointed high-velocity handgun bullet can penetrate it. So also can any centerfire-rifle bullet, including most of those that the Contender pistol is chambered for (which would, under the language in some bills, make even a .30-30 round illegal to possess), and so can any shotgun load. And while really powerful soft nosed handgun loads such as the .41 Magnum or .44 Magnum may not penetrate the vest, they can kill its wearer anyway, through blunt-shock trauma.

As soon as the KTW flap started, almost two years ago, the man who had conceived and developed the light vest called me, angry and horrified about what the publicity would do to remove the protection that the vests have given officers. He said that it had never been his intention, nor the other developers', to provide total protection against everything, for that would have meant a heavy, cumbersome "flak jacket" that the officer would wear ony in times of obvious need but would be too uncomfortable for every-day wear.

The object, he said, was to achieve a compromise between comfort and protection against the "perceived threat." The main threat to the officer is his own gun, which is used to kill about twenty percent of those officers who die by gunfire. At the time—a dozen or so years ago—most officers were armed with .38 Specials, so the light Type I vest was designed to stop that relatively low-powered bullet. When police began to be armed with higher-powered guns, principally the .357 Magnum, the perceived threat

became greater, and the less-comfortable Type II and IIa vests were developed.

The rarely seen KTW bullet was available when light body armor was developed, and the people in the Police Standards Bureau knew about it. They also knew that the KTW and a bunch of other bullets would go through the vest as if it was a cotton T-shirt. But the Type II vest can stop about eighty-five percent of the available handgun bullets, and that is a remarkable achievement for armor that is light enough to be worn regularly and routinely.

My old friend—who is a handloader and a long-time reader of Handloader—was justifiably proud of the perceived-threat compromise that he and his colleagues had worked-out, for some four hundred police officers have been spared death or serious injury because of his imaginative developmental work—and some generous congressional funding.

But he fears, as I do, that the education of crooks as a result of the KTW flap will cause more deaths as thugs learn that so many officers are wearing vests that offer no protection against either more-powerful armament or a bullet between the eyes.

Most robbers have generally armed themselves with small, low-powered handguns that fire soft, low-velocity bullets that the Type I vest can easily stop—and that are also usually survivable even without the vest. As you know, and I'm afraid that many potential assassins have learned, if the attack upon President Reagan had been made with something more powerful than a .22 rimfire—such as the 9mm Parabellum used in the attack upon Pope John Paul—the results would unquestionably been far, far worse.

Therefore, for years, I have been appalled by the foolish attempts of misguided, ignorant people to prohibit the manufacture, sale, and possession of small low-powered handguns—the so-called Saturday-night specials. If they were to be eliminated by the wave of a magic wand—laws having no such magical power—the certain result would be a mass turn to only slightly less concealable but more-powerful handguns or (Heaven forbid!) more sawed-off shotguns. And if anyone doubts that they aren't concealable, I invite him to observe the faint bulges caused by the machine guns carried under the unbuttoned coats of the Secret Service agents who protect the President.

While President Reagan was speaking at the NRA meetings in Phoenix, he briefly touched upon KTW legislation, suggesting that there be a stiff, mandatory additional sentence for anyone using "or possessing" ammunition that is "designed to penetrate" light body armor while he commits a crime of violence. With some tightening of the language used, we gun owners would have no objection to such legislation, for it's already against the law for anyone to rob or to murder, with or without a gun, and the penalties that are usually pronounced are deplorably light.

However, any such federal legislation should be limited to federal jurisdictions, for—in the first place—the federal government has no constitutional basis for invading the domain of states' police powers. And in the second place, the Justice Department won't bring charges when state laws against robbery, murder, and the like have been violated; that's why no charge is brought against a robber who uses a federally illegal sawed-off shotgun or machine gun to rob a liquor store.

Further, if possession is to become a federal felony with a mandatory sentence, it should be carefully spelled-out as "possession as an element of the offense"—a bullet designed to penetrate armor, loaded in a gun used in committing the violent offense—and the gun or cartridge would be considered to have been used if it was an element of the crime of violence, whether or not the trigger was pulled.

Such nit-picking is necessary to prevent something like this: an off-duty police officer, let's say, who beats-up a guest for making a pass at his wife, and gets sent to prison for five years because his service revolver, loaded with KTW bullets, is hanging on a hook by the door. Don't scoff that this is a far-fetched scenario; I know a man—a school teacher, a respected member of his community—who was sentenced to five years in a federal penitentiary for the possession of a target rifle, which was prohibited to him under the gun-control act because he had been convicted of robbery twenty years earlier, when he was eighteen.

While the NRA can not support legislation such as the President proposed, since it violates the fundamental principle that no bullet, cartridge, or other inanimate piece of metal is inherently evil, I do not believe that the Institue for Legislative Action would object to such carefully drafted legislation, particularly on the state level.

The KTW issue is going to have to be addressed, for it's quite clear that it isn't going to go away. And it's equally clear that our opponents haven't the slightest qualm about continuing to stir the issue, even at the cost of educating the crooks and getting some policemen killed.

I saw a graphic example of public and media ignorance about these matters a few months ago. In what appeared to be a live TV news report, an enthusiastic young reporter was showing the "bullet-proof" vests that had just been issued to his local police department (which certainly informed the thugs who were tuned-in) and gloweringly commenting about the availability of certain handgun bullets that would penetrate them (educating the crooks still further). "But," he said brightly, "it will easily stop a twenty-two like this one."

Then, putting the vest on, he stepped back from the camera and said something like "and to show you just how good they are . . . ." He held his arms to each side as an out-of-focus pistol came into view, was pointed at him, and was fired. With a look of astonishment and pain, he staggered backward, almost collapsing, weakly crying, "It hurts! It hurts! It hurts!"

That idiot could have been killed. If he had talked with anyone who knew something about guns, or vests, or armor-piercing bullets, or the fact that some bullets can do things that they weren't designed to do, he wouldn't have let himself be shot. And he wouldn't have been setting policemen up to be shot in the head or with a more powerful gun.

[From Reports from Washington, June 30, 1983]

KTW: SETTING THE RECORD STRAIGHT

(By Howard Cassidy)

National Rifle Association members and supporters across America undoubtedly are aware of the controversy surrounding KTW, a brand name of so-called armor-piercing ammunition. We have discussed this issue before, but unfortunately, legislative and media attention continues to focus on the KTW phenomenon. It's time to set the record straight on KTW. It's time to lay to rest, once and for all, the inaccuracies, half-truths and outright lies that have been spread about KTW and legislation, known as the Biaggi-Moynihan bill, which calls for a ban on armor-piercing ammunition.

The NRA is against the Biaggi-Moynihan bill for a single, solid reason: Because the legislation would ban virtually all types of sporting ammunition, and there appears to be no feasible or acceptable way to amend the measure to include only armor-piercing ammo. That is not simply the opinion of the NRA. It is the belief, arrived at after much study and deliberation, of the nation's top ballistics and legal experts.

As drafted, the bill would require the U.S. Treasury Department to determine which handgun bullets, when fired from a handgun with a barrel length of five inches or less, are capable of penetrating the equivalent of 18 layers of Kevlar, a synthetic fiber which is the standard composition of most police bullet-resistant vests.

The Treasury Department then would publish its findings in the Federal Register, and 60 days after publication those bullets defined as "prohibited" would be banned from further manufacture, import, sale or use—except for law enforcement or military purposes.

What does such a definition mean, in real terms, to the average hunter or competitive shooter? It is not exaggerating to state that the definition effectively could ban nearly all sporting ammunition. Again, the NRA is not alone in taking such a stand.

In testimony before the House Subcommittee on Crime last year, the Treasury Department's assistant secretary for enforcement stated that "any attempt to define projectile-type ammunition as (Biaggi-Moynihan) would seek to do, invariably includes a wide range of ammunition commonly used for hunting, target shooting or other legitimate and long-established sporting purposes."

A spokesman for the Justice Department told the same committee that ". . . our continuing study of this issue revealed that there are serious flaws in the broad ban on armor-piercing handgun ammunition proposed in (Biaggi-Moynihan). Moreover, in certain handgun calibers, the effect of a ban on armor-piercing bullets would effectively deprive firearms owners of the use of their weapons by rendering illegal all presently available commercially manufactured ammunition."

To this day, the Treasury and Justice Departments remain opposed to the bill; their ballistics and legal professionals have been unable to come up with a practical, enforceable definition on armor-piercing ammunition—a definition that would not penalize millions of law-abiding gun owners.

There is another key question that must be answered, a question all too often overlooked: Why is such legislation necessary in the first place? This question is prompted by a brief look at the facts.

Fact: Not a single armor-clad police officer ever has been shot with armor-piercing ammunition, contrary to the rhetoric espoused by the media and gun control groups, who have labeled the ammunition as "cop-killer bullets."

Fact: KTW-type ammunition never has been openly distributed to the general public; the ammunition historically has been available only to the police and military for highly specialized purposes. In fact, such agencies can obtain the ammunition only under tight restrictions, which include placing orders for the ammo on official de-

partment letterhead and including an official department purchase order.

Fact: Armor-piercing ammunition has been in existence since at least World War I, yet never has presented any problem for law enforcement agencies anywhere in the world.

Why, then, is there such a furor to solve a problem that does not exist? The answer, unfortunately, may have more to do with publicity for gun control groups than with good government.

Handgun Control, Inc. recently stepped up its campaign to win passage of Biaggi-Moynihan. In a deluge of letters to Capitol Hill and in strongly worded advertisements, HCI has urged Congress to ban the "cop-killer bullet"—a bullet that already is banned to the public.

Clearly, armor-piercing ammunition is not used by hunters or competitive shooters. The ammunition is for specialized law enforcement and military uses only. The NRA understands this.

What the NRA does not understand, and will not tolerate, is the implication that the association's opposition to the bill somehow is tantamount to signing the death certificates of America's police officers.

The NRA record of cooperation with law enforcement agencies—in marksmanship training, safety and general police support—is impeccable. The NRA is vitally concerned about the safety of the nation's police; tens of thousands of rank-and-file officers, in fact, are NRA members. The Biaggi-Moynihan bill, no matter what its intentions, will not serve to protect our nation's law enforcement community; and the NRA is deeply distressed that the adverse and undue publicity given this issue may have jeopardized the safety of thousands of dedicated officers.

It's time to clear up the confusion surrounding Biaggi-Moynihan. It's time to cut through the smoke screens that have clouded this issue. It's time for America's gun owners and sportsmen to urge their congressmen to oppose Biaggi-Moynihan (H.R. 953 and S. 555).

It's time, once and for all, to defeat this woefully flawed legislation.●

UNITED STATES-SOVIET LONG-TERM GRAIN DEAL

● Mr. ABDNOR. Mr. President, trade has become a vital part of U.S. agriculture. Since foreign sales now account for 25 to 30 percent of gross farm income, new markets must be developed and maintained.

In developing these markets, the United States must prove its reliability in providing agricultural products. The Soviet grain embargo damaged the U.S. reputation as a nation that keeps its promises. This grain embargo, additionally, hurt the American farmers. Farmers need foreign markets, so they can maintain a decent level of income.

Currently, the United States has a chance to restore its reputation as a reliable world exporter and to restore to the farmers a foreign market for their products. The U.S. Government must sit down with the Soviet Government and develop a long-term grain agreement. The United States needs to recapture the market it once lost.

Furthermore, the step toward developing a long-term grain agreement with the Soviets must not stop there. The U.S. Government must continue to develop additional long-term grain agreements with other foreign countries. The best way to pull the American farmers out of the depressed state they are in is through the development of reliable long-term grain agreements.

In a recent article by the Office of Technology Assessment, "Technology and East-West Trade: An Update," the effect of the Soviet grain embargo on U.S. reliability in foreign markets was discussed. I would like to highlight some of the discussion presented in the section "The Impact of Export Administration Policy on the U.S. Economy."

Most critics of the embargo view its consequences as potentially more serious in the long-term than in the short-term. They argue that it has given the United States the reputation of being an unreliable supplier, and that other countries are now doubtful of the certainty of U.S. agricultural supplies. For instance, Mexico, which signed a grain supply agreement with the United States in 1980, is reportedly now considering signing long-term supply agreements with other countries. In addition to seeking alternative sources of supplies, importing countries may also be encouraged to become self-sufficient in grain or find substitutes. Another potential longrun impact is increased production in other grain-exporting countries.

Moreover, the sanctions may well have a long-term adverse effect on the U.S. reputation as a dependable business partner to countries other than the U.S.S.R.:

Any company in the world considering the purchase of American technology as opposed to, say, Japanese technology, now has to think about the possibility that the U.S. Government at some point in the future for foreign policy reasons may undertake sanctions against that company to stop exporting that product to some other country.

These were just a few points brought out in the report, but one can see how the U.S. must rebuild itself as a reliable food supplier. I would encourage members of the Senate to review this study and to use it for background information.

Once again, I urge this administration to develop a long-term grain deal with the Soviet Union and with other foreign countries. In this process, the American farmer will benefit; the American people will benefit; and the American economy will benefit.●

FRED SANCHEZ

● Mr. RIEGLE. Mr. President, I wish to recognize Fred Sanchez of Flint who spent almost 30 years striving for the citizens and workers of Michigan.

Mr. Sanchez was born in San Antonio, Tex., in 1928. He emmigrated to Michigan where he joined UAW Local 326 of Flint in 1954. Mr. Sanchez spent most of his life with the UAW and rose to become a general board member of the UAW-CAP for over 10 years and the chairman of the CAP Committee for Labor for 6 years.

In addition, Mr. Sanchez was very active in the community; he was a representative of the Spanish-speaking peoples in the area and is an active member of the Democratic Party in Genesee County.

Fred Sanchez retired from the UAW on February 1, 1983, but continues to aid the community. The citizens and workers of Genesee County and Michigan owe a great debt to Fred Sanchez for his efforts have truly enhanced our lives.●

FOREIGN SERVICE OFFICERS

● Mr. PELL. Mr. President, on May 28 the Washington Post ran a front-page article on the replacement of Thomas Enders as Assistant Secretary of State for Inter-American Affairs. The article quoted an unidentified administration official who stated that this action reflected "unhappiness with the execution of U.S. policy" in Central America. This same official added that "You do not handle Central American policies with tea and crumpets on the diplomatic circuit." I believe that this comment is an unwarranted and unjustified slur against members of the Foreign Service as well as an unfair, albeit only implied, criticism of Mr. Enders' performance.

As a former Foreign Service officer and as one who has personally known outstanding career diplomats such as George F. Kennan, Charles E. Bohlen, and the late Llewellyn Thompson, I can state uncategorically that Foreign Service officers have the dedication, ability, training, and courage to serve the United States under the most difficult conditions and to implement the complex and delicate policies that we pursue in our relations with other nations. To suggest that career diplomats pass the hours at teas or cocktail parties is an affront to the outstanding men and women who represent the United States abroad—a job which is becoming increasingly dangerous as the tragic bombing in April of the American Embassy in Beirut demonstrates.

Over the years, I have differed with Mr. Enders on matters of policy. Nevertheless, I respect his diplomatic abilities and believe that he is an outstanding representative of the Foreign Service. In my view, he and his colleagues deserve to have their contributions recognized not only by the American people but by those in the administration which they serve.

Mr. President, I ask that the text of the Washington Post article be printed in the RECORD following my remarks.

The article follows:

[From the Washington Post, May 28, 1983]

REAGAN HAS ENDERS REPLACED AT STATE DEPARTMENT

(By John M. Goshko and Lou Cannon)

President Reagan yesterday removed Thomas O. Enders as assistant secretary of state for inter-American affairs, an action that reflected "unhappiness with the execution of U.S. policy" in Central America, according to an administration official.

Several administration officials said the change will lead to a tougher U.S. policy in Central America, controlled directly by the White House rather than through the State Department.

Enders will be replaced by Langhorne A. (Tony) Motley, a land developer and Republican Party stalwart from Alaska who has been ambassador to Brazil for the last two years.

The official who spoke of Reagan's "unhappiness" also praised Enders' diplomatic abilities, which he said would be put to proper use in his new post as ambassador to Spain. But, in a shape implied criticism of the way Enders had performed his present duties, he added, "You don't handle Central America policies with tea and crumpets on the diplomatic circuit."

Several administration officials said U.S. policy in Central America now seems likely to increasingly bear the stamp of Reagan's national security affair, William P. Clark. He is sympathetic to the view, shared by U.N. Ambassador Jeane J. Kirkpatrick, that even tougher measures are required to combat leftist guerrillas in El Salvador and to counter the influence of Cuba and the leftist Sandinista government of Nicaragua in that region.

They regarded Enders as favoring a diplomatic solution to the civil war in El Salvador. Reagan agrees with Clark and Kirkpatrick that the guerrillas must be defeated militarily, the officials said.

One official added that Reagan decided to "put his own people" in key Central America policy-making positions even before he made his speech on Central America to a joint session of Congress on April 27.

However, other sources in the administration cautioned that it would be incorrect to assume there will be swift and radical changes in Central American policy, which is under heavy fire from liberals in Congress. In particular, these sources disputed the idea that Enders' departure means that Clark has wrested control of the policy from Secretary of State George P. Shultz.

Shultz, who announced the change yesterday to reporters aboard Air Force One en route to the Williamsburg, Va., economic summit, praised Enders as "a great man" and said the move was made because it was time for a "rotation in the State Department, and we do make changes."

The extent of Shultz's involvement in the decision was not clear, but one official said that the secretary "fully concurred" in the switch. This suggested that Shultz did not initiate the move. But he was said to be pleased with the elevation of Motley, who has been given almost universally high marks as ambassador in Brazil.

On the surface, Enders' replacement would seem to be a relatively unremarkable move, as his job is nominally a second-echelon position in the governmental hierarchy. However, it seems certain to stir controversy because U.S. involvement in Central America is a subject of emotional national interest and Enders has been regarded as the principal architect of U.S. policy in the region.

In the view of many officials, Enders' problem was that he had come to exercise a power over Central American policy decisions far greater than is normally granted to assistant secretaries of state. That was particularly the case after Shultz took office last summer and found himself forced to devote most of his time to the Middle East and other problems.

In the process, Enders became, as one source put it, "a man caught in the middle. Although he got on well with Congress, he still was pushing a policy fiercely opposed by liberals fearful of increasing U.S. involvement. At the same time, his efforts to build support with the liberals made him highly suspect to hard-core conservative who thought him insufficiently vigorous in his anti-communism."

As the civil war in El Salvador dragged on inconclusively, Enders also found himself increasingly on a different wavelength than Clark, Kirkpatrick and other in-house critics from the Pentagon and the CIA who disputed the State Department's approach.

As one senior official put it, "It was like what happens when a baseball team is on a losing streak. You get a lot of agitation to fire the manager, and Enders was regarded throughout the government as the manager on Central America."

Clark and Kirkpatrick's disenchantment came to a head in February when it became known that Enders had prepared a position paper advocating a two-track policy of pursuing the civil war in El Salvador while seeking to promote negotiations with representatives of the guerrillas. This was opposed by administration hard-liners as potentially opening the way for the guerrillas to negotiate a share of power in the Salvadoran government.

The uproar caused by that incident in conservative circles forced Shultz to exercise greater supervision over Enders' activities. But by then the demand for Enders' ouster had become a crusade for conservative Reagan supporters.

At the same time, the president began to turn increasingly to Clark and Kirkpatrick for advice on Central America. The sugar import quota for Nicaragua was virtually eliminated despite Enders' objections. He was unable to fill the key deputy slots in his bureau because of a power struggle over the ideological orientation of those considered for the jobs. And, in what was widely regarded as a slap at Enders, former Florida senator Richard B. Stone was named a special emissary for Central America.

Enders' replacement, Motley, is held in high regard by Republican conservatives. And, although he went to Brazil two years ago with the reputation of "a real estate salesman from Alaska," he has won considerable praise from Brazilian officials and other diplomats for skillful performance.

Motley, who was born and raised in Rio de Janeiro, speaks Portuguese. He arranged Reagan's visit to Brazil last December and acted as his interpreter in meetings with Brazilian President Joao Figueiredo.

However, Motley's Latin American experience has been confined largely to Brazil. State Department officials said he has no real experience with Central America.●

WE LOVE YOU FLAG

● Mr. GOLDWATER. Mr. President, nearly every day, I venture to guess, each of us has occasion to see the U.S. flag. Because it is an everyday occurrence, it probably falls into the category of routine. While it may be routine to many of us, the flag has profound implications as to what it means and the symbolism it contains.

From the early days of our country during our fight for independence until the present time, the flag of the United States has represented an ideal that stretches back to prerecorded history—freedom. Everywhere our flag has gone, it has shown to friend and foe alike that the United States was willing to make the ultimate sacrifice to preserve our freedom.

This ideal was foremost in Col. William Baugh's mind when he wrote a poem commemorating Flag Day for the U.S. Air Force's Space Command newspaper, Space Time. The reason for the special poignancy behind Colonel Baugh's tribute is that he describes his feelings for our flag that sustained him during his 6-year captivity as a POW in North Vietnam.

Mr. President, I think all of my colleagues as well as the rest of the people should read Colonel Baugh's poem and reflect upon the words he has written and understand what the U.S. Flag means to all of us. Therefore, I ask unanimous consent that Colonel Baugh's poem be printed in the RECORD for each and every one of us.

WE LOVE YOU FLAG

You helped us keep the faith.
You gave us something to put our faith in
Something to salute
A reason to live.
You represented everything we resisted for.
You were the symbol of freedom.
You represented those who spoke out against our government
As well as those who would give their lives for the cause.
The "V" never understood what you represented.
We defied the "V" and gave you respect each day.
You symbolized our country.
You were freedom—the good life, the ability to say what you feel without fear of reprisal—the answer to all that was good to us.
In solitary we would salute you alone.
In torture we would call on you for courage.
In groups we would organize and salute you in unison.
When confined and restrained we would salute you in silence.
You were my strength, you gave me a reason to live, to resist, to endure.
Those dark days when all was down you gave me something to hold on to—a symbol of resistance.
They didn't understand how powerful you were.
Why resist when Americans were speaking out in protest?
Because you represented that freedom, the freedom of speech.
When your freedom is gone you realize how great you are, my flag.
When I see you today, waving in all your glory, it worries me that you are taken for granted—How many living Americans realize what a great country you represent?
Strength

Freedom
Right
Grit
Hold on
Hang in there
One day at time

I know from where I draw my strength, from where I take my stand, for like the mighty oak my roots are in the fertile land.

"We Love You Flag," was penned by Col. William H. Baugh, a retired Air Force officer and former prisoner of war. A fighter pilot, Colonel Baugh was flying an F-4 mission over North Vietnam in January 1967 when he was shot down and captured. He remained a POW at Hanoi until March 1973.●

A COMPREHENSIVE APPROACH TO ARMS CONTROL

● Mr. LEAHY. Mr. President, on May 20, 1983, I asked unanimous consent to have printed in the RECORD some valuable material on a nuclear freeze proposal prepared by Mr. Christopher Paine of the Federation of American Scientists. One of the most useful parts of that material was a table 5 containing the outline of a comprehensive nuclear freeze and reductions agreement. Unfortunately, table 5 was not included in the material as printed in the RECORD. This greatly diminishes the value of Mr. Paine's excellent statement on a nuclear freeze proposal.

I ask, therefore, that the entire statement of Mr. Paine before a panel organized by the Federation of American Scientists, including the missing table 5, be printed in full in the RECORD at this point.

The material follows:

[Prepared testimony of Christopher E. Paine]

RETHINKING ARMS CONTROL: ADVANTAGES OF A COMPREHENSIVE APPROACH

The burden of my testimony today is that a comprehensive approach to ending the nuclear arms race is both politically and technically feasible, and in fact offers distinct verification and security advantages over more limited approaches.

Although traditional thinking about arms control comes encased in a veneer of purportedly technical constraints, close examination reveals that these are not purely technical constraints, but rather limits based on subjective—indeed highly political—determinations of the "national interest" and the fragility of the nuclear balance. For example, if you believe that the balance in specific measures of nuclear capability is an oracle of geopolitical fortune, you will probably demand high levels of on-site inspection to monitor each and every incremental improvement in the Soviet nuclear arsenal, on the grounds that the United States must be able to respond promptly to Soviet efforts to change the balance, no matter how small these may be in relation to the total arsenals.

On the other hand, if you believe, as I do, that the destiny of world affairs depends far less on the balance in nuclear capabilities than on the dangers arising from the race to maintain these capabilities, then you are likely to have a far different set of preferences. Specifically, if one reaches the conclusion that the nuclear balance is, within a fairly broad range of disparities, inherently stable with respect to the deliberate initiation of nuclear conflict, then one is willing to tolerate a comprehensive agreement characterized by lower-levels of monitoring confidence for marginal changes in the Soviet arsenal, in exchange for a halt in the overall process.

Between these two extremes lies a wide and fertile ground for exploration and compromise. It behooves us all to examine the actual range of possibilities that really do exist, rather than continue to dwell in the small box (see Figure 1) defined by the present Administration's ideological and strategic preoccupations.

[Figure 1 not reproducible for the RECORD.]

For example, it is often said that in addition to National Technical Means (NTM) the Freeze will require "on-site inspection," which the Soviets will presumably be unwilling to grant. What kind of National Technical Means? What kind of "on-site" inspection? And can these be used in combination? There are many possible combinations (Table 1) of current (and feasible near-term) NTM, intrusiveness, frequency of coverage, cooperative measures, and information exchange, yielding a wide range of possible confidence levels when applied to a broad spectrum of possible agreements. Some of these possibilities are spelled out in Table 2.

[Tables 1 and 2 not reproducible for the RECORD.]

EXPLANATION OF TABLE 2.—ILLUSTRATIVE MODES OF MONITORING COMPLIANCE

1. Remote monitoring by National Technical Means outside Soviet territory.
2. Remote monitoring by tamper proof NTM located within Soviet territory.
3. On-site monitoring by non-intrusive inspections using technical means.
4. On-site monitoring by mildly intrusive inspections using technical means.
5. Intrusive "Quota" Inspections.
6. Intrusive Continuous On-Site Inspection.
7. Inspection by the Public (report a violation if you've seen or heard of one).
8. Data base exchange.
9. Cooperative measures on request (removal of shielding against NTM).
10. Inspection by Interrogation, hierarchy of requests for clarification and responses, leading to a prima facie case of violation or compliance with the right to request inspection to resolve doubts.

Similarly, the problem of treaty compliance is not a simple "yes they are—no they are not"; kind of problem. There is in fact a wide range of possible forms of treaty noncompliance (Table 3) and a wide range of possible responses to treaty violations (Table 4). We need to know, for example, which violations in Table 3 should be paired with which remedies in Table 4? What kinds of treaty violations threaten our security such that they would justify abrogation, and what kind of violations would merit lesser actions. In short, there is a great deal of investigation to be done here, and from one perspective, perhaps the most we can say is to admit the scale of our current ignorance and get to work. One way of looking at the range of possibilities is summarized in Figure 1, which attempts to show geometrically how differences in three important subjective preferences relating to arms control can affect the domain of possible agreement.

[Tables 3 and 4 not reproducible for the RECORD.]

EXPLANATION FOR TABLE 3.—FORMS OF TREATY NONCOMPLIANCE

Level I—High-Level Cheating:

1. Intentional Systematic violation on Executive orders to achieve Treaty Breakout/Strategic Superiority.
2. Intentional violation on Executive orders to achieve new capability within Treaty regime.
3. Intentional violation on Executive orders to achieve marginal improvements within Treaty regime.
4. Intentional violation on Executive direction to maintain or increase confidence in existing weapons.

Level II—Bureaucratic Non-Compliance:

5. Intentional Chiseling at Lower Military/Industrial echelons to achieve new capability within Treaty regime.
6. Intentional Chiseling at Lower Military/Industrial echelons to achieve marginal improvements within Treaty Regime.
7. Intentional Chiseling at Lower Military/Industrial Echelons to maintain/increase confidence in existing weapons.
8. Unintentional violations at lower echelons due to inadequate education/information/supervision (e.g. overenthusiastic major turns on air defense radar unit to track incoming RV's).

Level III—"Apparent" Violations:

9. Conscious exploitation of treaty ambiguities, loopholes.
10. Genuine difference of interpretation regarding a treaty provision.
11. "Apparent violations" which arise from developments which are inherently ambiguous at certain stages but which are later revealed to be consistent with treaty requirements.
12. Involuntary temporary non-compliance arising from circumstances beyond leadership control (war, natural disaster, internal political upheaval).
13. Signatures registered by monitoring systems mistaken for prohibited activity (e.g. gas fire for ground-based laser, earthquake for nuclear test).
14. Charges of violations arising from inadequate information concerning activity under observation.

EXPLANATION FOR TABLE 4.—POSSIBLE REMEDIES TO TREATY VIOLATIONS

1. Reinterpretation of Treaty Provisions to eliminate violation.
2. "Consent Decree" not to engage again in specific forms of activity whether or not these are judged to be "violations" of the agreement.
3. "Tit for Tat" limited retaliation in response to prohibited activity, limited in scope but not necessarily identical to adversary's action.
4. Denial of rights under the treaty, such as inspections or data exchange, until prohibited activity ceases.
5. Withdrawal from part of the Treaty until adversary violations cease.
6. Suspension of Compliance with Entire Treaty until violations cease.
7. Withdrawal from the Treaty.
8. Punitive International Sanctions.

However, I would like to suggest that there are sound technical and political grounds for believing in the validity of the comprehensive approach. This is set forth in detail in Table 5 and represented schematically in Figure 2, "A Nuclear Weapons Freeze Verification Flow Chart." What we really care about, and what we are really trying to stop, is represented at the far

right hand side of the chart—a freeze on the number and the characteristics of deployed nuclear weapons and delivery vehicles. We are very concerned about this with or without a treaty. A treaty limiting numbers alone is fine, but this in no way addresses the dangers arising from Soviet improvements in the performance characteristics of their weapons, which we would continue to monitor with a great deal of interest. At a minimum, a deployment freeze which also prohibited modernization would allow us to probe the Soviets concerning these characteristics, thereby improving our intelligence concerning the Soviet nuclear threat.

[Figures 1 and 2 not reproducible for the RECORD.]

However, if we are really serious about limiting Soviet improvements, we would obviously pursue test restrictions. Presumably these would greatly impede the flow of improvements filtering into deployed Soviet nucelar forces, increasing our confidence in the deployment freeze and increasing our knowledge of Soviet missile capabilities through: an NTM non-interference clause; non-encrytion of telemetry; provisions for advance notification of tests; and data exchange under the agreement.

However, a testing and deployment freeze would leave an unconstrained Soviet production potential for rapid "breakout" from the treaty constraints, a frequency recurring nightmare among those who are inclined towards intense distrust of the Soviets. Since this potential would exist with or without an agreement, as would the potential for an American response, and presuming one makes the judgment that the prevailing nuclear balance is not all that delicate, why not freeze the production of dedicated delivery vehicles, nuclear warheads, and fissionable materials? As long as the Soviet clandestine production potential remained below a given threshold, over a given period of time, and we felt comfortable with both those estimates, a production ban would seem to offer nothing but advantages—increased confidence that the deployment freeze was limiting future as well as present deployments and increased confidence that the Soviets were not running a secret test program, on the grounds that they are not likely to produce something they have not tested. And while the Freeze would not directly ban research and development on new warheads and delivery systems, it would dramatically limit the design parameters of such systems as well as the incentives for pursuing them.

In short, while certain individual provisions of a freeze agreement might be monitored with only a moderate degree of confidence, the increased scope of the freeze generates increased opportunities for monitoring Soviet compliance, multiple requirements for cheating to increase deployed military capability, and multiple chances for detecting Soviet violations. Thus the overall chance of detecting Soviet cheating on the agreement could be as high or higher for the freeze than for more limited agreements. And under the verification provisions of a freeze agreement, we could seek clarification of a far wider range of Soviet military activities than we can at present, or than we could under the President's START proposal.

These observations add up to the conclusion that the main task of arms control negotiations at the present time is not to rework the strategic balance through a combination of selective nuclear reductions and broad-based modernization, but rather to coordinate a halt in the offensive nuclear weapons programs of the two sides. This would complement the defensive ABM freeze we already have in place and close the loopholes in the SALT II structure. Reductions could be negotiated and implemented simultaneously with a freeze, resolving "stability" problems by throwing away weapons rather than be building more of them. Thank you for hearing me, and I certainly will try to answer any questions you may have.

OUTLINE OF A COMPREHENSIVE NUCLEAR WEAPONS FREEZE AND REDUCTIONS AGREEMENT: WHAT, WHY, WHEN, AND HOW

Intent of the agreement: The intent of the freeze segment of the agreement is to end the dangerous competition between the United States and the Soviet Union in the testing, production, and deployment of nuclear weapons and their primary delivery systems. A freeze would prevent the deployment of new nuclear weapons systems designed for preemptive strikes on the nuclear weapons systems of the opposing side, and stop additional deployments of existing types nuclear weapons and delivery vehicles. By putting an end to the counterforce weapons race, the freeze would place a cap on the threat to both the deterrent forces and the population of the superpowers as well as other nations affected by their nuclear arsenals. Circumvention of this intent through the increase by either party of "dual-capable" delivery systems configured for nuclear strike would be considered a violation of the agreement, and thus a noncircumvention clause is included to reflect this understanding.

Reducing the nuclear threats to each side's deterrent forces and population is the task of the reductions segment of the agreement. (It is not the intent of the freeze portion of the agreement to significantly reduce the nuclear deterrent threats posed by both side's nuclear arsenals by preventing the maintenance of these systems, thereby degrading their reliability. However, the tight test restrictions called for in the agreement would prevent the attainment of the high levels of confidence required for preemptive attacks on hardened targets. In short, the freeze would not impede deterrent confidence, but it would impede first-strike confidence.) Issues of crisis stability arising from the assymetrical nature of the respective nuclear forces can and should be solved through reductions of the most threatening and vulnerable forces rather than through mutual expansion and modernization.

Duration of the agreement: The proposed agreement on a comprehensive nuclear freeze would be of indefinite duration—like its nuclear defensive counterpart, the ABM Treaty—with provision for a review conference every five years which would consider possible revisions of, or withdrawal from, the agreement. In the interim, the Standing Consultative Commission would deal with compliance questions and any other pertinent issues raised by either party. The need for renewal of production of existing types for the purposes of replacement could be raised by either party at any time and considered in the light of ongoing and planned reductions. Renewed production would be authorized only by negotiated exceptions to the Freeze Agreement, and would take effect at the conclusion of each five year review conference and expire at the beginning of the next review conference.

Main provisions: The proposed Comprehensive Nuclear Freeze and Reductions Agreement would have the following main provisions:

TABLE 5

Provision	Why	When	How verified
I. DEPLOYMENT			
The proposed agreement would freeze the number and characteristics (within certain agreed limits) of dedicated nuclear delivery vehicles deployed by both sides, and the number and characteristics of their associated reentry vehicles and nuclear warheads. This freeze would include the following categories of weapons:	Will enhance both "crisis stability" and "arms race stability" by reducing reciprocal fears of surprise attack; end diversion of resources; improve East-West relations; assist non-proliferation objectives.		Monitoring the number of deployed systems would be achieved primarily through National Technical Means (NTM) including Imaging Reconnaissance Satellites, Electronic Recce. Sattellites, and Ocean Surveillance Satellites. While some characteristics could be monitored directly, others would be monitored indirectly by monitoring Soviet missile tests.
1. Intercontinental Ballistic Missiles	MX and new Soviet ICBM would threaten hardened silos and command posts. So would Trident II.	Before 1986	
2. Submarine Launched Ballistic Missiles		Before 1988	
3. Intermediate-Range Ballistic Missiles	Pershing II poses destabilizing short warning threat	Before 1984	Aircraft and ships equipped with a wide range of surveillance devices would be useful for monitoring deployment of cruise missiles.
4. Long-Range (600km.+) Ground, Sea, and Air-Launched Cruise Missiles.	Cruise complicates arms control	Before 1984	
5. Medium-Range and Battlefield Ballistic Missiles	Represent nuclear warfighting escalation threat and threat to allies.	Before 1984 or ASAP	Ground-based listening post assist in monitoring Soviet battlefield missile units.
6. Nuclear Air Defense Missiles	Could undermine deterence	Same as above.	
II. STRATEGIC BOMBERS			
The proposed agreement would place a ceiling on strategic bombers at current levels (328 US vs 250 Soviet). Each side would be permitted to deploy one new strategic bomber, but with no net increase in the number or the total payload of the bombers, and without modernization of the weapons.	Bomber modernization could also be precluded by agreement, but U.S. bombers are old and also have conventional roles, as do Soviet bombers.	1984–1990	Primarily by National Technical Means; number of new bombers could not exceed SALT Limits, and total payload of new bomber force could not exceed total payload of older force.

TABLE 5—Continued

Provision	Why	When	How verified
III. NONCIRCUMVENTION PROVISION			
Each side would undertake not to significantly increase the number or alter the roles and missions (e.g. conventional-to-nuclear) of the following types of weapons from those prevailing at the time the agreement enters into force:	To prevent circumvention of long-range delivery vehicle freeze and stabilize nuclear balance in specific "theaters".	Before significant deployment of long-range SLCMs.	Primarily by National Technical Means, but also by non-intrusive or mildly intrusive inspections for the presence of nuclear weapons on ships and subs using advanced portable detection technology.
Intermediated/Medium Range Bombers and Strike Aircraft. Howitzers units equipped for firing AFAPs. Subs equipped with Short-Range Cruise Missiles, SUBROC nuclear-tipped torpedos, etc.	Because these systems are used in combat in their conventional roles, they pose perhaps greatest danger of nuclear escalation in Soviet-American crisis confrontation.		Ban on production of nuclear warheads and bombs (Section V) would increase monitoring confidence.
Surface ships with ASROCs, Nuclear Air Defense Missiles Short Range Cruise Missiles, etc. Anti-sub and Anti-ship aircraft equipped with short/medium range ALCMs and nuclear depth charges.			To ease verification requirements, both sides could agree to ban long-range conventionally armed cruise missiles, or restrict their deployment to vessels whose non-nuclear status could be monitored with high-confidence.
IV. TESTING			
1. The Agreement would ban the flight testing of all "new types" of delivery vehicles included in the deployment freeze (Section I above) whose characteristics exceed certain permitted variances from agreed baselines, using previously tested types as the standard for measurement.	To stop the development of new more accurate and reliable weapons which could be used in a preemptive strike; increases confidence that deployment freeze is being observed.	Immediately	Primarily by National Technical Means, including ground-based telemetry listening posts and Cobra Talon, Cobra Dane, and Cobra Judy radars. Strong provision banning interference with NTM and enencrytion of telemetry would facilitate monitoring.
2. A low annual limit, with appropriate provisions for advance notification, could be set for reliability tests of currently operational missiles.	Optional provision if considered necessary by one or both sides	Soon after above	Same as above.
3. All nuclear explosive testing would be banned, with possible negotiated exceptions for reliability tests of existing warheads.	To prevent development of new sizes and types of warheads for new RVs and "warfighting" nuclear missions; furtherance of non-proliferation objectives.	Immediately	Primarily by NTM, including global and on-site remote monitoring networks; provisions for data exchange, query inspection, leading if necessary to on-site visit.
V. PRODUCTION			
The proposed agreement would ban:			
1. The production of intercontinental and submarine launched ballistic missile stages and final assembly of all nuclear missile types included in the dedicated nuclear delivery vehicle deployment ban.	To enhance verification of the nuclear weapons system deployment ban; limit and vastly complicate breakout potential; save money.	1984–1988	Primarily by NTM, with provisions for data exchange, cooperative measures, leading to on-side inspections of facilities whose output can not be adequately determined.
2. The fabrication of fissile and fusion components for nuclear weapons, and their final assembly into nuclear warheads and bombs.	Same as above; also impedes violation of non-circumvention provision by restricting supply of warheads for tactical/theater systems.	1984–1988	Same as above. Existing facilities would be closed and replaced by single warhead-maintenance facility.
3. The production of special nuclear materials for weapons purposes, except for strictly limited production of tritium and enriched uranium under effective safeguards.	Same as above, but also enhances non-proliferation by strengthening IAEA.	1984–1988	NTM plus IAEA safeguards, declarations of existing stocks, bilateral on-site visits to ambiguous facilities.
VI. REDUCTIONS			
1. Reductions in the limits and sublimits of SALT II would begin immediately upon entry into force of the agreement. A 7.5 percent annual reduction would yield, for example, a 50 percent reduction in ten years.	Without reductions, freeze over time could become unstable; reductions can also ameliorate stability concerns arising from asymetrical forces and capabilities.	1983–?	Primarily by NTM.
2. Soviet reductions of SS–4, SS–5, and SS–20 missile launchers associated with 572 European INF warheads would begin immediately in accordance with a two-year schedule of 24 warheads per month.			Primarily by NTM.
3. Reductions in forward deployed nuclear warheads in Europe and elsewhere.	Reduces chances for nuclear escalation, terrorist seizure of weapons.	(?)	Non- or mildly-intrusive on-site inspections using portable NTM such as neutron generators.●

THE WORLD FOOD COUNCIL MEETING IN NEW YORK

● Mr. DANFORTH. Mr. President, this week the World Food Council, which was created by the U.N. General Assembly in 1974, is holding its annual ministerial meeting in New York City. It is the first meeting of the Council held in the United States. It is an occasion to make Americans glad that the WFC exists and to remind us that so much is yet to be accomplished in solving the problem of world hunger.

Nine years ago the United States and 35 other member nations of the WFC pledged to mount a major effort to drive hunger from the face of the Earth. Secretary of State Kissinger issued a stirring challenge:

> Therefore, today, we must proclaim a bold objective—that within a decade no child will go to bed hungry, that no family will fear for its next day's bread, and that no human being's future and capacity will be stunted by malnutrition.

Today, as we approach the first decade of WFC's existence, we must stand in judgment of how the member nations have responded to the Council's leadership. The report card is mixed. Hunger continues to be a prime subject in the news. Reports from drought-striken Ethiopia and parts of southern Africa are horrifying. Affluent nations are slow to respond. Children by the thousands die every day from diseases related to malnutrition.

Yet things could be considerably worse. Under WFC coordination some countries have achieved new levels of food security assisted by international organizations and aid from the developed nations. Even though international organizations are sometimes slow in response to the problems of world hunger, they still remain one of the best means available to deal with these problems.

The World Food Council does not engage directly in relief and development programs but it is the lead agency in coordinating and recommending programs to be implemented by other international organizations and countries. Agriculture ministers and secretaries from the 36 member nations of the WFC meet annually to review global progress toward solving problems of food production, distribution, and consumption.

The World Food Council has demonstrated what a small, policy-oriented international agency can do. It has been effective because it has avoided the pitfalls of huge multinational and national bureaucracies.

A very important effort of the World Food Council has been its promotion of "national food strategies" for 50 developing countries. Without a food strategy, many developing countries look at their problems in a piecemeal fashion. For example, an effort might be made to overcome problems in agricultural production while difficulties of distribution of food to poor people are ignored. Or, a country might devote its energies exclusively to subsidizing a cheap food policy for its urban population using American food aid while depriving its farmers of adequate prices for their produce.

A national food strategy encourages a country to examine its food system in its entirety, from the field to the home of the consumer. A food strategy also helps the leader of a country focus on the importance of a well-nourished populace.

The World Food Council has been an active adviser in international food trade and assistance. It was instrumental in negotiating a new Food Aid Convention. The result has been an administration of food aid that is more sensitive to the needs of poor people.

The Council was a leading advocate of the special cereal facility which was begun by the International Monetary Fund in 1981. The facility helps poor countries finance purchases of food on the international market.

Now the WFC faces the awesome task of assisting the many countries that have been devastated by a worldwide recession to maintain adequate nutritional levels among their people. It will need all of its accumulated knowledge and wisdom to act as global pilot, steering the developing nations through the shoals of financial insolvency toward food security.

The support of the United States for the World Food Council remains vital to the fight against world hunger. It is our hope that under the leadership of Secretary Block, the U.S. delegation will commend the leaders of the Council for their accomplishments, reaffirm American support for the Council, and pledge to redouble U.S. efforts to coordinate its food trade and aid policies with the strategies of the Council.

My colleague, Senator LEAHY of Vermont, has informed me that he shares my high opinion of the World Food Council and my hopes for its future success.●

THE 150TH ANNIVERSARY OF THE FIRST CONGREGATIONAL UNITED CHURCH OF CHRIST OF GRAND BLANC

● Mr. RIEGLE. Mr. President, today I recognize the 150th anniversary of the First Congregational United Church of Christ of Grand Blanc.

On July 13, 1833, the members of the original congregation met at the house of Deacon Josiah Owen and organized the First Congregational Church of Grand Blanc; then one of only two Protestant churches between Pontiac and the Straits of Mackinaw.

For the next 125 years the church grew steadily and provided support and guidance for many citizens of Grand Blanc. In 1958 the congregation merged with the United Church of Christ and became the First Congregational United Church of Christ. In 1968, through a valiant fundraising drive, the church moved to its present home at Perry and Belsay roads. While the church does have a new name and a new home, it maintains its links with the past and uses the 1885 church bell to call the members of the congregation each Sunday.

The First Congregational United Church of Christ of Grand Blanc has served its community for 150 years and deserves our recognition, respect, and congratulations.●

PROMPT ACTION NEEDED ON ENTERPRISE ZONES

● Mr. QUAYLE. Mr. President, as a cosponsor of S. 863, the administration's enterprise zone bill, I feel this concept promises to brighten the economic future of many areas in this country. It has much potential for both job creation and revitalization of distressed communities.

In my State of Indiana, as in many others, the State legislature has already enacted legislation to make ready for enterprise zones. I am glad that we in the Senate have passed this urgently needed legislation and I hope that my colleagues on both sides of the aisle and in both bodies will continue the momentum toward enactment in the forthcoming conference committee.

The Indianapolis Star, in a recent editorial, outlined the need for congressional action on this important initiative. While this editorial was written before the Senate acted on enterprise zones and although it fails to note that the President and his administration have taken the lead in promoting the bill, the following editorial illustrates grassroots enthusiasm and optimism for enterprise zones. I ask that the editorial in the Indianapolis Star be printed at this point in the RECORD.

The editorial follows:

[From the Indianapolis Star, June 2, 1983]

GIVE THIS IDEA A CHANCE

After two years of debate and no action, the enterprise zone concept keeps coming back in Congress.

Enterprise zones, originally proposed by Reps. Jack Kemp, R-N.Y., and Robert Garcia, D-N.Y., have attracted all sorts of criticism, much of it having nothing to do with the Kemp-Garcia proposal.

The idea is to provide incentives for businesses to move into blighted and rundown urban areas. Most of the incentives are in the form of tax breaks, including tax credits for new jobs, as well as credits for hiring disadvantaged workers. The legislation is also designed to reduce the regulatory burdens on businesses that would move into these areas.

Some of the critics have complained that the zone concept would lead to "slave labor" and abuse of workers. But the Federal proposal does not allow for exemptions of the minimum wage.

Other critics have complained that businesses outside these zones would be at a disadvantage against those in the zone. That's true, but rates based on any geographical unit may leave a few unavoidable inequities. The point is: Certain areas that desperately need business are not attracting investment.

The Kemp-Garcia legislation is an experiment, providing for 75 zones to be designated by the Secretary of Housing and Urban Development. Several states, including Indiana, have already established the zone concept on a state level. Obviously the cities and states that have moved farthest ahead with their own initiatives should be prime candidates for the Federal zones.

It's past time for the Congress and the Reagan administration to get moving on this idea. If the critics have better ideas, they should bring them forward. But something needs to be done to relieve the tax burden that holds back small businesses from expansion. Bruce Hinton, head of a Baltimore construction firm, complained in a Reader's Digest article about how taxes and regulations frustrate his life. "Over 50 percent of my time is devoted to Federal, state and local paper work."

With a reduction in that burden, he says, he could expand and hire more people.

Mark Hernandez, general manager of Philadelphia Conquest Manufacturing Co., offered similar thoughts. "Taxes hold us back a lot. You can't project any sort of expansion. We could hire more men immediately—we have the work available—but we can't produce enough to pay them after paying Federal taxes."

The enterprise zone concept is not new. Similar plans are already working successfully in a few American cities, including Indianapolis, through property tax incentives and use of special development areas. The idea ought to be expanded by Congress this year.●

PATIENTS SUFFER WHILE CONGRESS SITS

● Mr. JEPSEN. Mr. President, for the last 4 years I have been trying to seek the adoption of legislation making the robbery of a controlled substance from a pharmacy a Federal offense. While I have been successful in getting the Senate to pass this important legislation, our colleagues in the House of Representatives have been reluctant to act on my proposal.

Although I believe the record is quite clear that Federal action is necessary, many people still seem to question the seriousness and severity of this problem. For this reason, I ask that an article entitled, "Cancer Patients Facing Dilemma of Pain" appear in the RECORD at the conclusion of my statement.

Mr. President, this article does an excellent job of pointing out the practical effects of our failure to act on this important issue. For the most part, proponents of pharmacy robber legislation have focused their attention on the impact on the pharmacists. Let there be no mistake, the problem is very real and very serious for these hardworking and dedicated professionals. This article, however, takes a slightly different approach, it points out the impact of this problem on the public—the people who have a legitimate need for controlled substances.

I want to commend the American Medical Association for this timely and important article. I hope that all of my colleagues would take a few moments and read this important contribution to the fight for enactment of pharmacy robbery legislation.

The article follows:

[From the American Medical News, June 24, 1983]

CANCER PATIENTS FACING DILEMMA OF PAIN

(Because of the growing threat of armed robbery, many pharmacies no longer stock narcotics, making badly needed drugs unavailable for cancer patients)

(By Lisa Krieger)

A young New York man hospitalized for terminal bone cancer on the side of his face

wanted to go home for Christmas. Despite many phone calls, he was unable to find a pharmacy in his community that would stock oral morphine. He decided to go anyway.

The next morning, recalls his physician, Ronald Kanner, MD, of the Albert Einstein College of Medicine, the young man was back in the hospital. "He was in the emergency room, suffering from intractable pain," he says.

"Physicians can talk about new scientific approaches and prescribing techniques for cancer, but there is one serious limiting factor: narcotic analgesics are not available to patients," says oncologist Kathleen M. Foley, MD, of Memorial Sloan Kettering Cancer Center in New York.

A survey in the Bronx revealed that 17 of 33 pharmacies did not carry narcotic analgesics. Of those that did, only two carried methadone and two carried oral morphine. In Manhattan, two major hospitals have closed their outpatient pharmacies that carried narcotic analgesics.

The inaccessibility of cancer drugs is not limited to New York. Pharmacies in Miami, St. Louis, Detroit, Washington, D.C., and other large cities report that they are taking narcotic analgesics off their shelves. This trend has been supported by the American Pharmaceutical Assn. House of Delegates, which recently adopted a policy upholding "the rights and responsibilities of individual pharmacists to determine their inventory, and dispensing practices, based on patient need, practice economics, practice security, and professional judgment."

Says National Assn. of Retail Pharmacies spokesman John Rector: "This isn't just the fringe. A significant percentage of pharmacies no longer carry controlled substances. As a result, there's a growing unavailability of products for people who need them."

The problem, pharmacists complain, is crime. According to the Drug Enforcement Agency, there were 5,020 drug-related thefts of pharmacies in 1982; of these, 996 were armed robberies. An estimated 15.5 dosage units were diverted from pharmacy shelves to addicts. One bottle of Dilaudid, which costs $4,000 retail, can be sold on the street for $26,660. "There is no pharmacist that would risk his life for drugs for a cancer patient," Dr. Foley says.

One reason cited for the upswing in pharmacy crimes is the decreased flow of illegal drugs into the country. But although the quantity of illicit drugs has dropped, the addictive need, street demand, and monetary incentives to steal have not. Addicts and drug traffickers now turn their attention to the manufacturers, distributors, and dispensers of pharmaceutical drugs.

"When word gets around that you have drugs, you are inviting crime. We used to carry Biphetamine (a dextroamphetamine and amphetamine complex) until two months ago. The last two bottles were stolen and probably ended up on the street. We decided to stop contributing to the Dallas drug problem, so we no longer stock the product," says Deborah Cartwright, a Dallas pharmacist.

One young pharmacy employee says she has been plagued with nightmares for three years, after a robbery in which her eyes were covered with adhesive tape, her hands were tied behind her back, and a gun was held to her head. "To this day, I cannot comfortably 'browse' in a drug store," she says.

Independent pharmacies are more common targets than the larger chain pharmacies, which can afford to pay for guards, security alarms, employe training programs, and architectural designs that ease supervision of the building. Any store that stays open during "off-hours" or serves a "bad" neighborhood, though, is vulnerable. "You have to seriously weigh the risks associated with these community services, in light of the increasing wave of violence," says Rhode Island pharmacist Thomas Gibson.

As community pharmacies take narcotics off their shelves, wholesale pharmacies find themselves caught with larger and larger inventories. The result, they claim, is an increasing incidence of warehouse theft. Last year, one of every four members of the National Wholesale Druggists Assn. reported an attempted crime.

One recent robbery spree by a 33-year-old drug addict spread across the country like a road map, targeting 12 wholesale pharmacies between California and Louisiana until he was caught and convicted. Trying to raise money for his bail, his wife burglarized a New Jersey Dilaudid wholesaler.

Hospital pharmacists say that they, too, are becoming victims of attack. The pharmacy of one 494-bed hospital in Providence, R.I. has been the site of two attempted hold-ups within the past two years.

Says Jackson, Calif., hospital pharmacist Lin Kokana: "If desperate addicts or criminals want the stuff, they will get it from us. Hospitals are obliged, by the nature of their function, to carry these high-risk products."

Pharmacist Roland P. Galley of Arlington, Va., adds this point: "When a pharmacist closes the doors of his pharmacy because he fears for his life or because it is economically impossible for him to continue his practice because of crime, he is not the only loser. It is the community which also suffers. This problem must be viewed not merely as a law enforcement problem, but also as a real and substantial public health problem."

Faced with the dilemma, some physicians decide to assume the risk themselves. Unbeknownst to the public, they stock small personal pharmacies so that they can offer a ready supply of drugs to their patients. Sometimes they act as a "go-between," calling pharmacies around town to locate drugs.

Even legitimate physicians can encounter obstacles here: Oncologist Dr. Kanner recalls telephoning a pharmacy, only to have a suspicious pharmacist later call the hospital administrator to verify his identity. A patient trying to locate a drug, he says, will get no answer at all. "It's an enormous inconvenience," he says.

Once a pharmacy is located, some physicians will try to arrange a special monthly order for their patients. Pharmacies may ask that the prescription be placed as needed, then require that the patient pick it up when it arrives.

For the cancer patient, this may mean traveling to distant neighborhoods or through crime-riddled areas to a methadone clinic. Relatives picking up prescriptions for house-bound patients may be challenged, asked to wait for telephone verification from the physician, or rejected outright. Addicts sometimes imitate cancer patients—carrying lists of chemotherapeutic and narcotic drugs, in appropriate doses, on stolen prescription pads—so everyone must be checked, pharmacists say.

A legitimate patient may be eyed with suspicion. "The cancer patient looks like the classic drug addict: in pain, wasted, thin, chronically ill, and poor. Patients with sickle-cell anemia—young, black, with repeated bouts of pain—have a particularly hard time getting drugs," says Joanne Lynn, MD, former staff member of the President's Commission on Bioethics.

"The patient is made to feel guilty about taking the drug. He feels like a local junkie," Dr. Foley says. Adds Dr. Lynn: "It adds a real stigma to be taking narcotics. It's a continual reminder of their cancer, underscoring the problem. They feel vaguely immoral or indecent."

Congress is showing serious interest in the problem: Four new bills (H.R. 605, H.R. 1032, H.R. 1255, and H.R. 1661) would make robbery of controlled drugs from pharmacies a federal offense. Hearings were held this year to rally support for the problem. Pharmacists say that this legislation would encourage investigation of pharmacy crimes by federal authorities; the National District Attorneys Assn. rebuffs such legislation, saying that staff shortage would regulate pharmacy crimes to low-priority status. The Justice Dept. supports the thrust of the legislation, but has proposed three limiting amendments.

Experts in the medical and pharmaceutical community each see other possible solutions.

"Pharmacists should be required to stock these drugs. What are drug stores for—to sell tampons? I understand their fears, but they have a responsibility to relieve pain," says Harold S. Mirsky, MD, an oncologist with Washington Internal Medicine Group.

Hospitals could become the central dispersal center for narcotics if kept very secure, Dr. Kanner says. "Make narcotics hospital-based, using four to six hospitals in a city, then keep them well-guarded," he suggests.

Pharmacists say that if they could "hold" prescriptions 24 to 48 hours, they could discourage addicts. "Just give us a tool, so we can refuse a prescription if we want to. Legitimate patients will come back, but addicts will get scared. Make it easier for a pharmacist to say, 'No' " says James P. Powers of the Florida Pharmacy Assn.

An increasing number of pharmacists have resorted to arming themselves with guns. "Anticipating the next robber, I have a bullet-proof glass in front of my typewriter, a double-barreled shotgun with buckshot, and concrete bricks lining my prescription case completely," pharmacist Carl Hubbs of Riverside, Calif., recently wrote in a letter to the magazine *American Druggist*. "The front counter is brick-lined. A pistol is under the cash register, and my wife has one in her office. We have to protect ourselves. I will not be intimidated by any criminal."

Meanwhile, patients in their final days of disease are trying to find their own solutions. "These patients are already dying, and they and their families are trying to cope with that," Dr. Foley says. "Then they have to cope with the bureaucracy of the drug situation."●

LEGISLATIVE VETO

● Mr. CHILES. Mr. President, recently the senior Senator from Georgia (Mr. NUNN) addressed the Georgia Municipal Association on a very timely and important subject, the Supreme Court decisions affecting the legislative veto. Senator NUNN provides a cogent analysis of the significant issues raised by this decision and the challenges it presents to the legislative

and executive branches. I commend the Senator's comments to the attention of my colleagues and ask that the text of his remarks be printed in the RECORD.

The text follows:

STATEMENT OF SENATOR NUNN

I am honored to have an opportunity to join you as you celebrate 50 years of leadership on behalf of the people of our State. Since 1933, the Georgia Municipal Association has been at the cutting edge of the struggle to move Georgia forward as one of the most progressive and dynamic States in the Union.

Your patient, persistent and steadfast efforts have paid great dividends for the State of Georgia in:

(1) Broadening the Tax Base for our local governments

(2) Training and education of city officials

(3) Making our State a leader in Vocational Education and Regional Planning

(4) Increasing Home Rule powers of local governments

(5) Bringing about a mature and productive relationship between State Government and City Government and between our Cities and our Counties

I am doubly honored to be personally present as you pay tribute to 26 years of outstanding service by your executive director Elmer George. I have known Elmer on a close and personal basis for almost two decades. I have observed first hand his effective leadership—not just on behalf of Georgia's cities—but on behalf of all of the people of our State.

If Georgia ever begins a governmental Hall of Fame—Elmer George's name will be at the top of the list.

Elmer recently wrote "Georgia city officials have never backed off from their responsibilities and the opportunity for service. The decade of the 1980's provides a real challenge and there is no doubt that you will face it as you have in the past—with dedication and continued progress."

Elmer has captured in these few words not only the spirit of the Georgia Municipal Association but also the life story of Elmer George:

(1) Unwillingness to back off from responsibility

(2) Viewing each challenge as an opportunity for service

(3) Facing the future with optimism and with dedication to continued progress.

I salute you Elmer and I salute the Georgia Municipal Association for your dedicated service which has made an indelible imprint on our beloved State.

I know that most of you are concerned about the status of revenue sharing. The budget resolution which just passed leaves room for a 450 million dollar increase in the 4.6 billion annual figure.

There is general agreement in Congress that revenue sharing for local government will be renewed. Congress will consider whether to increase the 4.6 billion per year; whether to change the revenue sharing formula from current personal income and tax effort factors to a new measurement based on State fiscal capacity; and whether to add back the State revenue sharing cut in 1980.

After all the debate, I expect the Senate to pass a 3 year reauthorization at current levels and I am hoping this will be done in the near future.

In 1933, when Georgia city officials gathered in Macon, Georgia to form the Georgia Municipal Association, this was the beginning of a fundamental realignment of governmental power in our State.

Thursday June 23, 1983 will be remembered as the beginning of a fundamental restructuring of the powers between the executive and legislative branches in Washington. I refer, of course, to the Supreme Court decision handed down last week declaring that the legislative veto is unconstitutional. The legislative veto began in 1932—one year before the Georgia Municipal Association was formed—when Congress gave President Hoover the right to reorganize the executive branch subject to congressional veto. This procedure has grown immensely in recent decades and now covers at least 200 statutes now on the books—including:

(1) The War Power Act

(2) Foreign Military Sales

(3) Presidential Impoundment of Appropriated Funds

(4) International Trade

(5) Energy Conservation

(6) Natural Gas Price Controls

(7) Presidential Reorganization

(8) Most recently under leadership of Congressman Levitas—Federal agency rules and regulations

Without getting into a long and tedious discussion of the Constitutional issues let me summarize the importance of this issue by quoting Justice Byron White's dissent—

"The decision strikes down in one fell swoop provisions in more laws enacted by Congress than the court has cumulatively invalidated in its entire history"

Without a doubt the balance of power has been altered and only time will tell which branch of government has been strengthened and which weakened.

The Federal Government became involved in the 1960's and 1970's in virtually every facet of American life. Congress became accustomed to addressing every conceivable problem by passing vague laws with broad delegations of authority to the Executive Branch. In effect Congress got in the habit of—identifying the problem and telling the Executive Branch to go forth and solve it. Under those circumstances the Congressional veto was an inevitable and necessary mechanism designed to assure a review of Executive Action by Elected Officials. This way of doing business will now have to change.

We will be facing this change in an era that is vastly different from earlier periods of our history. We live in an era when:

(1) Our principal adversary has the ability to decimate America with nuclear weapons between breakfast and lunch

(2) We live in an era when America is involved in critical foreign policy and national security decisions in virtually every region of the world

(3) We live in an era when Federal agencies have broad rule making and regulatory authority over every facet of American life.

(4) We live in an era when hundreds of complicated complex decisions have to be made on safety and environmental matters on a case by case basis

(5) We live in an era when computers—semi conducters—bio-technology—and genetic engineering—are vitally changing our economy and our lives

The dangers that could grow out of this court decision are evident: Governmental chaos—governmental paralysis—runaway bureaucracy making decisions with no review by elected officials—abuse of power by the President—and finally over-reaction by Congress in taking away Executive power.

All of these dangers can be avoided but this will require an unprecedented degree of cooperation and comity between the President—the bureaucracy and the Congress.

In the short run the President and the Executive Branch would be wise to adhere to the present law, notwithstanding the Supreme Court decision, particularly in areas involving foreign policy and defense policy—for instance—the War Powers Act and Foreign Military sales. An abuse of power by the President in these areas would cause a congressional reaction that could leave the Executive Branch in a position of impotency in foreign and defense policy—we cannot afford this reality or even this perception in a nuclear age.

In the long run—this Supreme Court decision will accelerate the need for fundamental change in Congress as an institution. Congress must become an effective and efficient part of the 20th century.

(1) Congress must begin to pass specific laws with clearer mandates

(2) Congress must spend more effort in the time consuming and tedious job of oversight of existing programs

(3) Congress must find a way to rid ourselves of cumbersome procedures which prevent timely action to overrule Bureaucratic regulations and rules which are outside the scope of Congressional intent

Congress also must streamline its budgetary procedures so the members of the Legislative and the Executive Branch can spend less time in duplicating and overlapping committee hearings.

For starters I believe we should consider:

(1) Two year budgets—two year appropriations.

(2) Merging the Budget Committee and the Appropriations Committee—and giving the resulting committee the full powers of the Budget Committee.

(3) Eliminating the dual process of authorizations and appropriations by abolishing authorizations and giving the authorizing committees full appropriating authority subject to the budget guidelines.

(4) Finally we must reduce the size and the scope of the Federal Government. We must give more power for decisionmaking to State and local Governments.

I am convinced that both liberals and conservatives would agree with this conclusion if they simply followed a Congressman or Senator around for one week. Because of the size and scope of the Federal Government, the Members of Congress are called on to be city councilmen—county commissioners—and State legislators. Finally if time permits—Congressmen and Senators—address those issues affecting our economy—or Foreign policy and our National security which only our Federal Government can address.

There is never a convenient time for this type Governmental review and reform—but the Supreme Court decision has left us no choice—the time is now.

Abraham Lincoln said during another junction of our Nation's history—

"The dogmas of the quiet past are inadequate to the stormy present. The occasion is piled high with difficulty and we must rise to the occasion. As our case is new, so we must think anew and act anew."

This is our challenge as a nation—I am confident we will meet it.●

ORBIT '81

● Mr. LAUTENBURG. Mr. President, I would like to honor the Camden, N.J. high school students whose experiment aboard the space shuttle *Challenger* has filled New Jersey, and the Nation, with pride. What these students did is remarkable. Working with the RCA Corp., the South Jersey Chamber of Commerce and NASA, they designed an experiment to test the effects of weightlessness on the social structure of carpenter ants. The data they gathered from this project, and the conclusions they reach, will be of great interest to the scientific community. What their effort in developing this project means, and what lessons can be learned from them, are of even greater interest to us all.

The project arose in response to a desire to increase interest in science among students at Camden and Woodrow Wilson High Schools, located in one of the poorest cities of its size in the country. These schools, while lacking in financial resources, have a staff of dedicated educators who became catalysts in the formation of a partnership aimed at making science a challenge for their students. The coalition that they formed required the participation of schools, industry, and Government to achieve a mutually beneficial goal.

RCA donated equipment, expertise, and a grant for the $10,000 cost of securing a place aboard the shuttle *Challenger.* The South Jersey Chamber of Commerce provided funds for an enriched science curriculum. With the efforts of many dedicated teachers, the groundwork was laid for Orbit '81. As a result, students with little prior interest in science were given a chance to work in depth on a science project that promised a real sense of personal accomplishment. It is their response to this challenge that makes this project so exciting and so momentous.

About 15 students at each of the two high schools were chosen, and they became directly involved in the planning and execution of the project. They took enriched science courses and did extra work to acquire the knowledge necessary to produce a sound experiment. The perseverance they displayed throughout the program was striking. When the $30,000 cost of the NASA container appeared prohibitive, they designed and built their own, with NASA's approval, for $75. Their interest in science, sparked by their involvement in the shuttle project, continues today, as many are currently pursuing college degrees in science.

Orbit '81 belonged to the entire student bodies of these two schools, and the spirit of learning that it generated permeated the high school environment. Enrollment in elective science courses rose by 35 to 50 percent. Students in fine arts, music, and drama put on exhibits, the journalism class put out a special newspaper, and the industrial arts classes executed the project plans.

Mr. President, the students at Camden and Woodrow Wilson High Schools were not the sole beneficiaries of this effort. There is an acute shortage of scientists and technicians in this country, and it will benefit the Nation as a whole to have available the talents of these students whose interest in science was sparked by Orbit '81. As this country seeks to rebuild its resources in math and science education, we can look to what has been done in Camden as an example of what can happen when young people are given the resources and the incentive for learning. Everyone connected with the Orbit '81 project has shown that American students are capable of rising to the challenges posed by education in an age of technology.

It is with the greatest pleasure that I salute the students of Camden and the sponsors of Orbit '81 for what they have accomplished, for the pride they have brought to New Jersey, and for the lessons they have taught all of us.●

THE VASHCHENKO FAMILY

● Mr. LEVIN. Mr. President, June 27 marks what is perhaps the most important date in the lives of the 16 members of the Vashchenko family. Two days ago, on June 27 of 1983, they arrived in Vienna after having struggled for over 20 years to emigrate from the Soviet Union. Yesterday, they flew to Israel to begin their new lives in their new home. Lydia Vashchenko, the oldest daughter, phoned me yesterday from Tiberius and asked me to extend the family's heartfelt thanks and deep appreciation for the countless hours and endless energy expended by our Government and by the many groups, organizations, and individuals on their behalf. Mr. President, we saw on June 27 the successful resolution of a human rights case that so many of us had for so long labored to achieve.

We first became acquainted with the family 5 years ago on June 27, 1978, when six of them along with two members of the Chmykhalov family traveled 3,000 miles from Chernogorsk, their hometown in Siberia, to the American Embassy in Moscow. They went at the invitation of Embassy officials in Moscow. They went at the invitation of Embassy officials to receive emigration advice. But because a member of their party was dragged away before entering the Embassy, the remaining seven determined they must stay in the Embassy to avoid a similar fate. Their visit turned into a 4½-year stay. The world came to know them as the "Siberian Seven" and has followed their story ever since.

On June 27, 1979, 1980, 1981, and 1982, many of us in the Senate and in the House of Representatives joined with countless others to pledge our continued support to advancing their case. During the last Congress, 73 of my colleagues cosponsored legislation I introduced on behalf of the families. Individuals and organizations across the United States and Western Europe worked tirelessly toward successfully resolving the families' emigration problems. Despite all efforts, the situation remained stalemated—the Soviets insisted that the seven leave the Embassy and return to their hometown to apply for emigration.

Then in late December 1981, Lydia Vashchenko went on a hunger strike to protest Soviet inaction. She grew so weak that she had to be removed to Moscow's Botkin Hospital. While recuperating in the hospital, Lydia wrote me that she had decided to return to Chernogorsk to reapply to emigrate in accordance with the Soviets' demand. In February 1982, Lydia did return home and again filled out the necessary papers. After that, we waited and hoped—we waited and hoped until April of this year when we received word that Lydia had arrived in Vienna on the first leg of her journey to her new home in Israel. Once in Israel, she sent the necessary invitation to her family in an effort to speed up their emigration.

On June 27, 1983, exactly 5 years after the seven had entered the American Embassy, the remaining 15 members of the Vashchenko family flew into Moscow and were met there by Lydia. On June 27, the Vashchenko family achieved what had for two decades been their cherished goal—emigration to a new home.

Mr. President, the long-awaited conclusion in the Vashchenko emigration story is certainly gratifying and deserves notice here in the Senate and throughout the free world. But we must remember that while the Vashchenkos have happily realized their life-long dream, the Chmykhalovs remain in Chernogorsk working to likewise fulfill their dream. Today as we rejoice at what June 27, 1983, has brought to the Vashchenkos we should commit ourselves with renewed energy and vigor to see that the Chmykhalovs and thousands of others seeking to emigrate will be able to celebrate a special day when long-sought goals are achieved—a day when dreams come true.●

MORE QUESTIONS THAN ANSWERS ON CHEMICAL WEAPONS

● Mr. LAUTENBERG. Mr. President, soon the Senate will consider the ques-

tion of whether or not the United States should resume production of lethal chemical weapons and end a 14-year moratorium on such production. Members of the other body recently voted to continue this moratorium, because the majority of Members found that proposals to resume chemical weapons production raised more questions than answers.

Many of these questions were outlined in a report from the General Accounting Office in April entitled "Chemical Warfare: Many Unanswered Questions." The GAO report, in turn, has prompted a broader debate in other publications, including a recent article in Science magazine.

This article examined many of the findings of the GAO report, which cast doubt on administration estimates of Soviet capabilities in this area, questioned the alleged benefits of resuming production of chemical weapons, and raised a host of concerns associated with potential dangers to civilian populations.

The article highlights GAO's conclusion that "money intended for binary production might better be spent on defensive training," an area of clear U.S. deficiency, and on more effective and efficient defensive equipment.

In these and other points, Mr. President, the article presents a clear analysis of the independent GAO report. I ask that it be printed in the RECORD following my remarks. I urge my colleagues to consider these questions seriously before abandoning our long-standing chemical weapons production moratorium.

The article follows:

[From Science, May 20, 1983]

CONGRESS QUESTIONS BINARY WEAPONS PLAN—A NEW REPORT BY THE GENERAL ACCOUNTING OFFICE POKES HOLES IN THE ADMINISTRATION'S JUSTIFICATION FOR CHEMICAL MUNITIONS

Opponents of the Reagan Administration's plan to build new binary chemical weapons recently received some fresh ammunition from the General Accounting Office (GAO). The agency's auditors concluded, in a report released on 5 May, that the Administration has amassed insufficient evidence to support its claim that binary weapons are both needed and highly useful. "The general picture is that the chemical weapon system is not perceived as a credible deterrent, little is known about its functioning or its usefulness, and a large amount of money is being sought for it. We are particularly concerned that so many questions remain unanswered," the GAO report states.[1]

Acting at the request of the House Foreign Affairs Committee, GAO auditors examined open literature and classified documents in search of evidence that the Soviet Union has a substantial offensive capability in chemical warfare, as the Administration claims. They also looked for evidence that existing U.S. stocks of chemical weapons are too small to offset the Soviet threat. They searched for evidence that binary weapons, which contain two nonlethal chemicals that combine in mid-air to form a toxic gas, are superior to existing, unitary weapons, which contain just the toxic gas. Finally, they looked for evidence that the Administration's plan will bring the Soviets to their knees at Geneva, where negotiations are under way to ban all chemcial weapons. In each instance, they found little substantiation.

Representative Clement Zablocki (D-Wis.), who chairs the Foreign Affairs Committee, says that the report raises "many disturbing questions," and that it "underscores the importance of our pursuing a chemical weapons arms control agreement, rather than initiating a chemical arms race." He hopes that its publication will induce others in the House to endorse H.R. 822, which would delete all funds for binary weapons production without disrupting plans for enhanced defensive measures. As of 5 May, the measure had 79 co-sponsors. Last year, a similar measure attracted 251 votes.

The Pentagon is of course unhappy. Theodore Gold, the deputy assistant secretary of defense for chemical matters, says that the report is "absurd, and filled with errors." He says that many of GAO's questions would have been answered if only they had read the most appropriate material and spoken to the most appropriate officials, including himself. The GAO explains that its research was finished last spring, before Gold was appointed, and that in any event, Gold declined to rebut a draft of the report with specific information.

The GAO concludes that the Administration's estimates of Soviet capabilities are highly uncertain. "In some cases, the reasoning seems to have been based on presumed knowledge of the Soviet chemical warfare inventory from World War II, lack of evidence that these weapons were ever destroyed, knowledge of current Soviet weapons delivery systems, and assumptions that the Soviets would have updated their capability. The extent of this guesswork can be seen in estimates that are given for the proportions of Soviet shells, warheads, and bombs containing lethal chemicals—they range from 10 to 50 percent."

The implication is that by relying on old information about weapons and fresh data about Soviet defensive capabilities, the United States might be overestimating Soviet offensive capabilities. Gold admits that "we don't know everything we need to know, such as the size and mix of their chemical arsenal, but we know something about their production capability, we know they have a stockpile, and we know the agents and type of delivery systems they have. It adds up to a persuasive case that the Soviets have a formidable capability to wage chemical warfare."

The GAO report says that even the size and reliability of the existing U.S. stockpile is highly uncertain, a claim that Gold also denies. "This is a serious charge, and totally false," he says. "There is a valid question about what the usefulness of the stockpile will be at the end of the decade, and we have an expert committee, chaired by John Margrave of Rice University, that is looking into this right now. But we know the size of the stockpile today."

The GAO also suggests that the United States lacks a coherent doctrine for waging chemical warfare, and says that "no steps are being taken to protect civilian populations." It notes that the Institute for Defense Analyses is only now attempting to assess the value of specific chemical weapons on the battlefield, as well as the most appropriate mix of chemical and conventional weapons. Again, Gold disagrees. "Particularly over the last several years, we have been evolving several things that would fall under the description of doctrine," he says.

The GAO also questions whether binary weapons will be superior to existing, unitary weapons. It points out that the binary Bigeye bomb, which is to be dropped from aircraft, will be difficult to control, as it must be activated while en route to a target and released within a few minutes for maximum effectiveness. If the release mechanism should fail, the Bigeye could overheat and detonate beneath the plane. Gold acknowledges that this is a problem, and says that the Administration will delay production of the Bigeye until its design is improved.

The GAO report goes on to imply that money intended for binary production might be better spent on defensive training, an area where the Soviets genuinely appear to be ahead. Only 14 hours of U.S. Army basic training are now devoted to nuclear, biological, and chemical warfare. Defensive equipment also needs work. Although the standard U.S. chemical protection suit can be worn consecutively for 14 days, no system has been provided for the disposal of bodily wastes. In addition, the mask partly obstructs vision. The GAO noted that "all the sources we reviewed agree that the services have between zero and limited ability" for protection of soldiers and civilians in groups.

Finally, the GAO report says that the Administration has failed to adequately study the impact of binary weapons production on the prospects for arms control. "While it seems that binaries present new and possibly greater verification problems, little is known about what the specific problems are or their possible solution," the report says. This conclusion, like the others, is obviously disputed by the Administration. But one thing is clear: If the Administration wants to win friends and influence people on the chemical warfare issue, it will have to make a better public presentation of the facts.●

[1] "Chemical Warfare: Many Unanswered Questions," (GAO/IPE-83-6, General Accounting Office, Washington, D.C., 29 April 1983).

WHO NEEDS CHEMICAL WEAPONS?

● Mr. MITCHELL. Mr. President, the Members of the House voted to continue this country's moratorium on the production of lethal chemical weapons initiated, as you know, by President Richard Nixon. Mr. President, the ball is now in our court, and I am pleased to submit for the RECORD a Washington Post editorial on the subject dated May 25, 1983.

The editorial outlines succinctly the major issues in the debate. It cogently describes the problems that have arisen with Bigeye bomb which, it turns out, can explode while still in the aircraft heading toward its target.

It concludes that it is up to Congress to continue this moratorium on production of chemical weapons, which has been our policy for 14 years.

The editorial follows:

WHO NEEDS CHEMICAL WEAPONS?

The administration keeps plugging away to put the United States back in the business of making new chemical weapons, whose manufacture President Nixon renounced in his first term. This year it seeks $48 million for 155 mm binary chemical artillery shells and $66 million for equipment and chemicals for Bigeye binary bombs. But its case for building these weapons gets no better and in some ways gets worse.

The basic case remains that the United States must modernize its CW stockpile to meet the Soviet CW threat in Europe. But why must a chemical threat be met with chemicals? Almost all Europeans react in revulsion against their prospective use by either side. Fortunately, NATO has many other military means with which to deter and defend against a Soviet attack of whatever sort. Europe is not Laos or Afghanistan, the places of limited means where the Soviets or their clients use chemicals still.

Meanwhile, events raise other considerations. The new binary weapons are hailed for their safety features. But last year the Pentagon discovered the Bigeye bomb might explode in the plane en route to target, and it was forced to defer a request for production funds. The very real issue of the danger chemicals pose to *users* is further illuminated by accounts of the accident at a Soviet chemical facility in Sverdlovsk in 1979: about 1,000 people were said to have died.

Soviet or Soviet-sponsored use of chemical and biological agents in Indochina and Afghanistan has given the West a powerful political argument. At the same time, such use has raised the requirement for solid verification measures at the long-running Geneva negotiations on destroying old chemical weapons and banning new ones. Few people expect early results from those talks.

But that supplies no good reason for the United States to resume production of weapons of dubious military value and heavy, negative political weight. Such weapons are not, politically speaking, a big-ticket item like the MX, but there is a considerable bureaucratic investment in them. The burden is on Congress, especially the House, to ensure that the United States does not break the production moratorium that it established 13 years ago, to its honor and profit.●

IDA NUDEL

● Mr. RIEGLE. Mr. President, last week the Senate approved Senate Resolution 125, which expressed our sense that the Soviet Union should allow Ida Nudel to emigrate to Israel. This action is visible evidence of the grave concern that we have for her and our continuing belief that freedom should be hers.

The Soviet Jews represent the 11th largest of the 110 nationalities, ethnic groups, and linguistic minorities in the Soviet Union. Although these nearly 3 million Jews are an integral part of the economic fabric of their country, they continue to be denied the rights afforded them and all persons under the Helsinki accords. The Soviet Jewish population are repeated victims of discrimination in virtually every aspect of daily living: employment, education, housing, and travel.

Among those individuals for whom this discrimination has been particularly harsh is Ida Nudel. Often called the "Guardian Angel of the Prisoners of Conscience," Ida Nudel's life has been one of continual harassment, persecution, and abuse. In 1978, she was arrested and charged with "malicious hooliganism" for publicly hanging a banner from her balcony requesting a visa to join her sister in Israel. Ida's visa application has been ignored, despite numerous outside efforts to help her. Hence, she is being denied not only the basic right to travel and to live amongst her own people, she is being denied a reunion with her only remaining relative.

We must not forget Ida Nudel or others like her; they remain the conscience of the world.●

CONTINUING REPRESSION OF SOVIET JEWS

● Mr. DOLE. Mr. President, on June 23, 1983, the Commission on Security and Cooperation in Europe and the House Subcommittee on Human Rights and International Organizations met jointly to review the plight of Soviet Jewry. The hearing reaffirmed that the Soviet treatment of Jews is of vital importance to all freedom-loving nations. As Theodore Mann, immediate past chairman of the National Conference on Soviet Jewry, reminded those present, "When the rights of a minority are threatened . . . all people are threatened."

As cochairman of the Commission on Security and Cooperation in Europe, I am deeply concerned with the recent deterioration of conditions for Soviet Jews and with the ominous character of Mr. Andropov's Jewish policy.

The long history of anti-Semitism in the Soviet Union is profoundly disturbing. The issue, Mr. President, is of critical importance at the present time. The testimonies of Mr. Mann, Elliott Abrams, Assistant Secretary of State for Human Rights and Humanitarian Affairs, Lynn Singer, president, Union of Councils for Soviet Jews, William Korey, director, Public Policy Research, International Council of B'nai B'rith, and Igor Tufeld, a refusenik who emigrated in 1977, give us a valuable insight into the tragic predicament of Soviet Jewry.

DETERIORATION IN EMIGRATION

Emigration patterns reveal a crisis situation for Soviet Jews. The sharp decline in emigration figures is a vivid indication of the Soviet Government's refusal to abide by its international commitments. In 1979, 51,300 Jews were allowed to emigrate. In 1982, that number dropped to only 2,700. The average monthly emigration figure for 1983 stands at a mere 100.

Routinely, Jewish emigration applicants are dismissed from work. They and their families are social outcasts and become targets of officially condoned harassment. Children are subject to verbal and physical assaults in school. Many letters containing invitations from relatives in Israel, necessary in applying for emigration, are confiscated.

In a disturbing development, the recently organized so-called Anti-Zionist Committee alleged that emigration is down because "family reunification has essentially been completed."

Mr. President, this is clearly contrary to the facts. Every Member of Congress is well aware of many thousands of Soviet Jews who desire to emigrate, but have so far been prevented from doing so. Judicial repression of Soviet Jews has intensified. The Soviets continue to harass those Jews who attempt to exercise their fundamental human right to emigrate, and even to practice their religion. Currently, 16 Jewish activists are serving sentences. And two are awaiting trial. Their crime—an attempt to maintain their Jewish identity.

SUPPRESSION OF JEWISH CULTURE

The Soviets continue to subject Jews to arbitrary arrests and periodic searches. Homes are raided and teaching materials confiscated. Hebrew teachers who tutor small groups of students, are threatened by the KGB. Hebrew books are not available and materials sent from abroad are confiscated. Although there are 60 synagogues in the Soviet Union, only 3 are known to have rabbis. The result of this suppression is the denial of Jewish cultural expression. The purpose of this policy, as Mr. Korey stated, is to hasten "forced assimilation."

Mr. President, recently the effort on the part of the Soviet Government to break the will and spirit of Soviet Jews has taken a new and vicious turn. For many years now the Soviet Union has led a virulent anti-Semitic propaganda campaign under the guise of "anti-Zionism": They have equated Zionism with every conceivable evil.

Under the Andropov regime, anti-Semitism has become institutionalized. The number of anti-Semitic articles in the Soviet press has increased. Even youngsters read these articles in official Soviet children's publications. This propaganda is also found in radio and television broadcasting, as well as in books.

Mr. President, the most recent manifestation of Soviet anti-Semitism deserves our attention. In April of this year, the Soviets established the "anti-Zionist committee of the Soviet Public." A special institution legitimizing the state policy of anti-semitism. This propaganda drive evokes images of the SS Nazi era and Stalin's anti-Zionism campaign. These developments are sobering and frightening. They are

graphic examples of man's inhumanity to man.

Mr. President, both the Commission on Security and Cooperation in Europe and the U.S. delegation to the Madrid meeting of the CSCE, on which I serve as cochairman, have consistently spoken out on behalf of Soviet Jews denied their fundamental rights. I pledge that we will continue to express our deep concern and to insist that the Soviet Government adhere to its human rights commitments under the Helsinki Final Act.●

WHAT DO WE DO AFTER WE DETECT A SOVIET SALT VIOLATION?

● Mr. McCLURE. Mr. President, I ask that the attached excellent article entitled "After Detection—What"? by Fred Charles Ikle published by Foreign Affairs in January 1961 be reprinted in the RECORD. This article is extremely relevant 22 years after its original publication, because the U.S. Government is currently grappling with how to react to a pattern of detected Soviet violations of SALT and other arms control agreements.

Fred Ikle, the author, is now Under Secretary of Defense for policy in the Reagan administration. His classic article offers some good advice now to the Reagan administration. In essence, Ikle argues that the technical issue of detection of arms control violations dominates the arms control verification debate, but that insufficient attention is paid to the political problems of violations challenge and arms control treaty enforcement. He argues that:

The West has paid insufficient attention to the strategems which a detected violator can pursue to avoid or mitigate whatever action an aroused world opinion might take.

Ikle points out that the Soviets long ago acknowledged the presumed deterrent effect of world public opinion. Khrushchev stated in regard to the 1963 Limited Test Ban Treaty:

If some side violates the assumed commitments, the initiators of this violation will cover themselves with shame, they will be branded by all the peoples of the world.

Unfortunately, however, the Soviets have evidently behaved as if the above statement were not true. They themselves have chosen to manipulate or ignore world public opinion.

Ikle points out two requirements for the enforcement of compliance with arms control treaties: The injured party must acknowledge the fact that there has been a violation, and the injured government must be willing to increase military expenditures and to offend pacifist feelings. He notes a problem entailed in each of these requirements. First, the injured government may subtly bias or suppress the evidence of the detected violation in order to avoid the serious implications of dealing with a violation. Second, the breaking of a major disarmament agreement will almost certainly require new military measures such as a full scale rearmament program. Ikle cites Winston Churchill's 1935 Parliament speech accusing the British Government of watering down the facts of Nazi rearmament in violation of the Versailles Treaty and the Naval Agreement of 1935, in order not to have to rearm themselves. Finally, Ikle quotes the late British Prime Minister Baldwin's 1938 reply to Churchill's 1935 charges of Nazi violations:

Supposing I [Baldwin] had gone to the country and said that Germany was rearming and that we must rearm; does anybody think that this pacific democracy would have rallied to that cry at that moment? I cannot think of anything that would have made the loss of the election from my point of view more certain.

Ikle concludes that this Baldwin admission suggested that there may have been something deliberate about the watering down of intelligence at the highest level of the British Government, as Churchill charged in 1935. Historically, democratic governments are often prone to the politics of appeasement, rather than enforcement.

Ikle also points out cogently the main motivation a violator might have:

A potential violator might enter into agreements solely in order to seek gains by violating them. He would calculate that there would always be a chance of his escaping detection or that "restorative measures" might be delayed or frustrated for political reasons. And if he lost out on these chances, a mere return to the status quo would leave him no worse off than before he entered into the agreement. The violator, in fact, would be playing a profitable game: "heads you lose, tails we're even."

Finally, Ikle quotes a blue-ribbon committee report of 1960 about potential Soviet compliance with a nuclear test ban treaty:

A nation which violates such an agreement [i.e., a potential nuclear test ban treaty] automatically sets into motion an arms race from which there may never be an end.

This is a rather grim prediction and obviously the panel believed that the threat of an unlimited arms race would deter potential arms control treaty violators.

Ikle concludes that there are two main deterrents to Soviet arms control violations, and one prerequisite to a U.S. challenge of Soviet arms control violations. He states correctly that "the evidence of violation must therefore be such as to impress the public as authoritative and impartial." This is precisely what President Reagan's National Security Council Verification Panel is trying to do now in its ongoing study of the pattern of Soviet arms control violations. The credibility of their studies must be maximized. Ikle also stated:

Those who wish to prevent the violation of arms control agreements must deter potential violators by their evident determination to make a double sacrifice. In the event a violation occurs they must be ready to assume a greater economic burden for defense, and they must risk a step-up in military competition.

This is precisely what faces the United States today.

The article follows:

AFTER DETECTION—WHAT?

(By Fred Charles Iklé)

The current debate on arms control and disarmament puts great stress on the problem of how to detect violations of whatever agreements may be reached. To this end inspection schemes and instruments for detection are developed, their capabilities and limitations discussed, and efforts made to test and improve them. Indeed, the technical question of detection dominates not only the domestic debate but also the international disarmament negotiations.

Yet detecting violations is not enough. What counts are the political and military consequences of a violation once it has been detected, since these alone will determine whether or not the violators stands to gain in the end. In entering into an arms-control agreement, we must know not only that we are technically capable of detecting a violation but also that we or the rest of the world will be politically, legally and militarily in a position to react effectively if a violation is discoverd. If we focus all our attention on the technicalities of how to detect a violation, we are in danger of assuming that our reactions and sanctions will be adequate.

A potential violator of an arms-control agreement will not be deterred simply by the risk that his action may be discovered. What will deter him will be the fear that what he gains from the violation will be outweighed by the loss he may suffer from the victim's reaction to it. In other words, even if we can develop an inspection system that makes the probability of detection very high, a nation contemplating a violation will not be deterred if it thinks it can discourage, circumvent or absorb our reaction.

We have learned (almost too late, in the case of the nuclear test ban) that an opponent may thwart our detection techniques by evasive techniques of his own. We should also realize that he may thwart the consequences of detection—which we count on to deter violations—by military or political strategems. We must study, therefore, not only what our opponent may do to avoid detection, but also what he may do to escape the penalty of being detected.

Let us discuss the question of what may happen when an evasion is detected under four general headings: (1) the reaction of world opinion; (2) the political reaction by the injured country; (3) various military measures that the injured country could undertake in an effort to restore the situation that would have existed without an arms-control agreement; and (4) military and political measures that would go beyond this "restoration."

II

World opinion, it is sometimes argued, will help to enforce disarmament agreements. World opinion supposedly will turn against the violator, provided he is discovered and "convicted" in an internationally accepted forum. He will lose prestige and influence in the uncommitted countries. In addition, var-

ious world-wide political reactions are expected to work to his disadvantage.

"World opinion" is such an amorphous concept that one finds it difficult to determine just how it can injure a violator of arms-control agreements. Speeches or resolutions in the United Nations, or critical editorials in the world press, are not likely to hurt him very much. One reason world opinion is so impotent is that its memory is so short. If the world's reaction cannot be translated immediately into substantive political or military changes damaging to the violator, it will lose all force.

The Soviet suppression of the Hungarian revolution illustrates the point. This gave an exceptionally violent shock to world opinion—in fact, more violent than many possible violations of arms-control agreements are likely to be. This is particularly true since evidence of a violation might often be equivocal and involve technicalities hard for the public to understand. Some of the most cherished beliefs of the West and also of the uncommitted countries were flouted in Hungary: a popular revolt against a dictatorial régime in a small nation was crushed from outside by a large power. Agreements were broken in the most flagrant fashion. One was the promise given by the Soviet-installed Kadar Government to the Jugoslav Government not to take punitive action against Imré Nagy when he left sanctuary in the Jugoslav Embassy. Another was the invitation extended to General Maléter and other delegates of the legal Hungarian Government to negotiate the withdrawal of Soviet forces—a trap to catch and execute them. Yet if one tries to list the penalties that world opinion imposed on the Soviet Union and the Kadar Government for these violations of its most sacred norms and of several important articles of the United Nations Charter, there is very little to record. There was a slight loss in the strength of Communist Parties in Western Europe (confined mostly to intellectuals on the fringe of the Party), but the loss is no longer noticeable. The strain on President Tito's relations with Moscow and the strengthening of NATO ties (particularly with Iceland) were largely ephemeral. Kadar has not been officially recognized as Hungary's legal representative in the United Nations; but he has been sitting in the General Assembly.

Other recent events have aroused world opinion, such as the Peking régime's violent repressions in Tibet and its violations of the Indian border. Yet in February 1960, only a few months after indignation in India had reached its peak, the Communists increased their vote in Kerala from 35 to 43 percent. And many of Communist China's neighbors continued to favor her admission to the United Nations.

Perhaps significantly, when Khrushchev discussed the nuclear test ban before the Supreme Soviet in January 1960, he chose to emphasize the reaction of world opinion as a deterrent to disarmament violations. By arguing that it was a sufficient deterrent, he tried, in effect, to brush aside the problems of inspection and control. But even if one assumed that the reaction of world opinion constituted an adequate sanction—an assumption challenged above—inspection would still be essential. A violator who does not risk being detected obviously does not need to fear world opinion. In any case, the West has paid insufficient attention to the stratagems which a detected violator can pursue to avoid or mitigate whatever action an aroused world opinion might take.

Many devices are available for this purpose. Thus the violator can frustrate the international inspection system and prevent it from reaching an official finding (study of Communist obstruction of inspection in North Korea reveals a large bag of such tricks). Or he can blame the other side for having violated the agreement first, and thus confuse the issue, or even generate an adverse political reaction against the injured party. Or he can accuse the other side of fabricating the evidence as a pretext for breaking the agreement or for covering up some other misdeed. Or he can assert that the agreement is obsolete in view of what he claims are changed political or military conditions and denounce it unilaterally prior to the intended violation (this would be analogous to the Soviet declaration that the Four-Power Agreements on Berlin were no longer valid). Finally, if some unfavorable reaction in world opinion is unavoidable, it may turn out that the violators "will cover themselves with shame"—as Khrushchev argued when he spoke about the nuclear test ban: "If some side violates the assumed commitments, the initiators of this violation will cover themselves with shame, they will be branded by all the peoples of the world." Yet, six weeks before making this assertion that a nuclear test ban would be enforced by world opinion, Khrushchev had this to recommend: "International reactionary circles are still trying to discuss the so-called 'Hungarian question' in the United Nations. Let them keep it as a souvenir if this consoles them."

Not only may the violator be contemptuous of world opinion, but he also may justify his acts on the grounds that they are demanded by the welfare of "the people" or by History—History being his conception of a superior morality that takes precedence over world opinion. "Had we not helped you," Khrushchev told the Hungarian Communists, "we would have been called stupid, and History would not have forgiven us this stupidity."

III

To be effective, a sanction must be applied as a result of governmental decisions by the injured countries. In democratic countries, government decisions are influenced by active public opinion, or, more precisely, by the conception of public opinion held by the government leaders. In these circumstances, democratic governments might experience serious political difficulties in reacting effectively to a detected evasion:

(1) The injured government must acknowledge the fact that there has been a violation. If the violation is open and well-publicized, no difficulty exists. But if evidence of the violation is equivocal or based on secret intelligence, the government may be reluctant to acknowledge the evasion or feel unsure of its ability to convince public opinion. For example, an admission that the control agreement had failed might be exploited at home by the political opposition, particularly if the agreement had been made originally by the party in power. In such a situation some decision-makers may favor an interpretation which casts doubt on the intelligence data relating to evasion or which belittles the importance of the evasion. Responsible decision-makers seldon distort evidence deliberately.[1] But the interpretation of complicated information is often a matter of judgment and discretion; hence subtle biases may decide the issue. Responsible officials would be particularly disinclined to accept equivocal evidence about an evasion of a disarmament agreement if they had previously been forced to defend the agreement against partisan charges that it might be violated. Yet a democratic government could institute only minor penalties against an evasion without informing legislative bodies and the public about the exact situation and explaining the need for drastic retaliatory or corrective measures.

(2) The injured government must be willing to increase military expenditures and to offend pacifist feelings. Now the reaction to a localized or minor violation need not disturb the defense budget appreciably (the new military equipment needed to counteract the North Korean violations of the rearmament clause was not a heavy burden); but the breaking of a major disarmament agreement will almost certainly require new military measures, perhaps a full-scale program of rearmament. The decision to react firmly and regardless of expense will be a hard one. Public opinion may not approve, especially if the evasion occurred gradually or if it merely consists of a resumption of some activity that had been discontinued—such as testing. If knowledge of the evasion is based exclusively on clandestine intelligence sources that cannot be revealed, the opponent's denial may find receptive ears among domestic opposition groups.

We have already questioned the effectiveness of world opinion as a sanction against arms-control evasions. It is ironic that it may be domestic public opinion—or rather the government's conception of it—that actually prevents effective sanctions being taken. The classic instance of this, and one that may have been a contributing cause of World War II, was England's reluctance to rearm in response to Hitler's violations of the Versailles rearmament restrictions. With what he called "an appalling frankness," Prime Minister Baldwin explained in 1936 why his own government had been unable to react:

"You will remember at that time [1932-33] the Disarmament Conference was sitting in Geneva. You will remember at that time there was probably a stronger pacifist feeling running through this country than at any time since the war. You will remember the election at Fulham in the autumn of 1933, when a seat which the National Government held was lost by about 7,000 votes on no issue but the pacifist. . . . I asked myself what chance was there . . . within the next year or two of that feeling being so changed that the country would give a mandate for rearmament? Supposing I had gone the country and said that Germany was rearming and that we must rearm, does anybody think that this pacific democracy would have rallied to that cry at that moment? I cannot think of anything that would have made the loss of the election from my point of view more certain.[2]"

---

[1] When Germany violated rearmament restrictions in the 1930s, Winston Churchill suspected that "somewhere between the Intelligence Service and the ministerial chief there has been some watering down or whittling down of the facts." (Speech of May 22, 1935, in "While England Slept." New York: Putnam, 1938, p. 190.) Prime Minister Baldwin's later admission suggested that there might have been something deliberate about this "watering down," and perhaps at the highest level.

[2] Baldwin's reply to Churchill as quoted in Churchill, "While England Slept." New York: Putnam, 1938, p. 333.

(3) The injured government must accept the new risks created by its reaction to the violation. It may see more than the domestic difficulties involved. For example, it may have embarked on long-range policies which seem more promising and important than counteracting an accomplished evasion, and it may hesitate to jeopardize them.[3]

It has been argued that all countries will be deterred from violating a major arms-control agreement in present circumstances because to do so would set off an unrestricted arms race that would eventually lead to disaster for the guilty as well as the innocent.[4] But this is an assumption which may not be shared by a country set on violating the agreement. Its leaders may reason that the very prospect of an unrestricted arms race might itself inhibit the injured party from reacting to the violation. And in fact the injured party might feel it safer to write off the violation as a loss rather than risk new dangers by a policy of rearmament—especially if it now finds itself in a weaker military position as a result of having complied with the agreement.

This dilemma is most serious. For example, the nuclear test ban conference adopted an article on March 19, 1959, upon the insistence of the United States and the United Kingdom, affirming a country's "inherent right" to withdraw from the treaty if its provisions, "including those providing for the timely installation and effective operation of the control system," are not being fulfilled. This article might be of cardinal importance in connection with China's accession to the test-ban treaty, because part of the control system would have to be installed in China. But would it give the Western powers much leverage against Chinese obstructionism? In the absence of a known instance of illegal testing, would the West be willing to withdraw from a test-ban treaty with the Soviet Union, resume testing and risk accelerating the arms race merely because the "timely installation" of the control system was being prevented by China?

(4) The injured government may have to reach agreement with allies before it can react. All disarmament agreements of current interest involve the United States with one or more of its allies. It is usually a difficult task to prepare a joint negotiating position vis-à-vis a Communist opponent. Agreeing on a Western response to a violation will raise anew the problem of allied coördination. The stronger and more explicit the reaction proposed, the more difficult it will be to achieve agreement. And all the problems of domestic public opinion and partisan politics discussed above will be evident in the allied nations whose coöperation is required.

IV

The military sanctions against evasion of an arms-control agreement can either be confined to measures that restore the situation that would have existed without the agreement or they can go further. Let us call the former "restorative measures." If the violator resumes testing, the injured country will do likewise; if the violator resumes testing, the injured country will do likewise; if the violator reoccupies his part of a neutralized zone, the other will move back into his; and if the violator rearms, his opponent will rearm to the same extent.

The problem of deterring violations has often been oversimplified by assuming that a detected evasion would automatically be taken care of by the cancellation of the agreement and the application of such "restorative measures." But three conditions have to be met if "restorative measures" by themselves are to be an adequate deterrent:

(1) The potential violator must fear the risk of being detected.

(2) He must also fear that a detected violation will cause an unwanted response by the injured country.

(3) He must not expect a violation to bring him an irrevocable advantage that would outweigh whatever gain he derives from abiding by the agreement.

The importance of the first condition is fully recognized. The second condition depends on the political factors we have just discussed. Both these conditions are needed for deterring an evasion by any type of sanctions, whether "restorative" or "punitive." Here we are interested in the third condition, because if it is not met, "restorative measures" alone are inadequate.

This third condition is not met, for example, if an agreement comprises several arms-control measures in such a way that the separate measures, taken individually, favor either one side or the other. The agreement remains in the interest of both parties only if all measures are observed. Violation of a part of it cannot be deterred by the threat of "restorative measures" confined only to this particular part. Additional sanctions are required. Otherwise the violator can break just those control measures that are not to his advantage. He will stand to gain if his violation remains undiscovered or ignored; and he will also gain if the violated part of the agreement is cancelled, because the residual agreement will then be more to his advantage.

This is precisely what happened with the Korean armistice. The clause prohibiting the introduction of new military equipment was violated by the Communists from the first day, but cancellation of this clause by the United Nations Command did not come until four years later. So the Communists gained on the first count. They also gained on the second count (after the United Nations eventually instituted "restorative measures"), because the residual armistice agreement was more favorable to them than the original agreement. (It was they who had been primarily constrained by the cancelled rearmament clause.)

It might be argued that an arms-control measure can survive only if all its separable components are equally in the interest of both parties. If this argument is true, the future for disarmament agreements is bleak. It is hard enough to arrive at over-all agreements that will not, over time, seem disadvantageous to one side or the other. But individual components of an agreement are inevitably of unequal value to opposing nations. For example, in addition to the Korean armistice, several of the current proposals for disengagement zones are composed of very unequal provisions.

There are other situations where the threat of "restorative measures" would be insufficient to deter an evasion. The violator may gain an irrevocable technological lead or an irreversible strategic advantage. As has often been pointed out, if American and Soviet troops were withdrawn from Western and Eastern Europe, the United States might find it difficult or impossible to return in the event that Soviet troops moved back in. Western alliance arrangements might have lapsed, the American troops might have been demobilized, and in any case they would have to be transported a greater distance—not to mention the American public's unwillingness to send "the boys" back overseas, particularly under a threat of nuclear war.

To sum up, "restorative measures" will not deter a nation contemplating a violation of a disarmament agreement in those situations where our third condition is not met, namely, when the violator expects to gain less from abiding by the agreement than from abandoning it. Indeed, a potential violator might enter into agreements solely in order to seek gains by violating them. He would calculate that there would always be a chance of his escaping detection or that "restorative measures" might be delayed or frustrated for political reasons. And if he lost out on these chances, a mere return to the status quo would leave him no worse off than before he entered into the agreement. The violator, in fact, would be playing a profitable game: "Heads you lose, tails we're even."

V

Where the threat of "restorative measures" is not enough to deter evasions, additional penalties are required. But to deter a world-be violator effectively they must be credible.

By far the most important and practical penalty would be a general increase in the military effort, going beyond what would be required to restore the pre-agreement situation. (A threat to start a war would not be equally credible and would therefore be less effective.) Suppose the aggrieved nation increases its defense budget by $20 billion. (As a result of the North Korean aggression, the United States increased its national security expenditures from $13 billion to $52 billion.) If the violator does not follow suit, he will become relatively weaker than he was before breaking the disarmament agreement. If he does follow suit, he would, in effect, be "fined" the equivalent of $20 billion, though of course both sides would bear this burden.

The injured country may be able to step up its defense effort in ways that do not require a large increase in the budget and still impose significant penalties on the violator: for example, by changing the deployment and readiness of weapons, or by resuming military activities that were voluntarily limited beforehand. However, in doing this the injured party must be prepared to run the risk that such a "punitive" increase in its defense effort will renew or accelerate the arms race. Actually, the violator may wish to avoid an arms race with so determined an opponent; he may be unwilling or unable to pay his full "fine" and have to accept a loss in relative military strength.

Those who wish to prevent the violation of arms-control agreements must deter potential violators by their evident determination to make a double sacrifice. In the event a violation occurs they must be ready to assume a greater economic burden for defense, and they must risk a step-up in military competition. The willingness to make such sacrifices involves less, however, than

---

[3] Churchill was aware of this when he was pleading for a more effective response to Hitler's treaty violations: "Then it is said—and I must give this explanation of the extraordinary fact—that 'we were laboring for disarmament,' and it would have spoiled the disarmament hopes if any overt steps to raise our Air Force had been taken." Speech of May 22, 1935, *op. cit.*, p. 190.

[4] For example, the Committee on Science and Technology of the Democratic Advisory Council wrote on March 14, 1960, about the nuclear test ban: "A nation which violates such an agreement automatically sets into motion an arms race from which there may never be an end."

would be required to deter limited aggression. To do that successfully a country must be willing not only to accept increased defense costs if deterrence fails, but also to suffer casualties and face the risk that the limited conflict may expand.

Political sanctions are likely to be less effective than an increased defense effort, although they may play an important complementary role. What they might be is difficult to predict in the abstract. If the potential violator is cautious, this uncertainty may help to deter him; if he is adventurous, like Hitler, he will gamble on his ability to meet and overcome the political reaction.

The remaining question is how to make the penalties of evasion seem more inevitable and severe and the gains more dubious. Parliamentary governments are more likely to take strong action against a violation if they are supported by public opinion. The evidence of violation must therefore be such as to impress the public as authoritative and impartial. A finding by an international organization will be influential in this regard, especially with public opinion outside the countries directly affected. An international body, however, has many weaknesses that can be exploited by a violator. Ideally, one would want the best of both worlds: the greater authenticity and dramatic impact that an international inspectorate provides, and the flexibility and versatility of national intelligence systems. One should at any rate avoid entering into arms-control arrangements that are administratively closed to intelligence information. The current draft treaty for the nuclear test ban sets up a rigidly confined scheme from which intelligence information is essentially excluded.[5] The Antarctica treaty, on the other hand, provides for complete freedom of inspection by anyone without any international mechanism (except suggestions for arbitration in the event of "disputes").

The deterrence of evasions could also be strengthened if parliamentary governments took steps to simplify and speed up their decision-making procedures. The United States Government, for example, has sometimes adopted enabling legislation to facilitate quick Presidential action, in order to disabuse a potential aggressor of the idea that partisan conflict or public quarreling about constitutional limitations or the issue at hand might inhibit an effective response. The Formosa resolution of 1955 is an example of Congressional authorization for the President to take action on the basis of his finding alone. The United Nations Participation Act of 1945 authorizes the President to act upon a decision by an international body, the United Nations Security Council. To strengthen a disarmament agreement both types of authorizations might be useful and a good time to enact the appropriate enabling legislation would be when Congress ratifies an arms-control treaty.

The power and influence of the legislative branch of the government might be brought to bear in other ways so as to increase the likelihood that the reaction to an evasion would be prompt and strong. Special parliamentary committees might assume an explicit responsibility for all arms-control agreements, and stand ready to mobilize legislative support for any necessary response to some breach of a treaty. The Joint Committee on Atomic Energy, which has privileged access to classified information and is on intimate terms with the executive, offers appropriate administrative precedents. Thus Congress might create a "Joint Committee on the Observance of Arms Controls" to demonstrate its determination to make arms-control agreements succeed.

An effective response will often require coordination and agreement among allies. The difficulties which this involves might be lessened by making arrangements in advance for joint action. First, in order to ensure agreement as to the fact of evasion, all evidence could be evaluated by an interallied agency permanently set up for this purpose. To minimize considerations of domestic politics, it should not have the responsibility for recommending any action. The next step by the allied governments might be a relatively minor one, on which agreement could easily be reached, namely to give publicity to the committee's findings; for example, they might forward a report on the evasion to the United Nations or to an international control system provided by the disarmament treaty. From this point on, the allied governments having jointly held and publicized their interpretation of the violation would feel under more compulsion to reach agreement on the effective sanctions needed.

It may be argued that allied governments cannot be "tricked" into such a procedure, because if they are opposed to or afraid of vigorous action they will avoid taking the first step: the evaluation of evidence. This arrangement would have force if the procedure were to be determined *after* the violation had been charged. But it is proposed here that by a preparatory agreement the Allies shall firmly establish the procedure at the time they conclude the arms-control treaty, when they are still fairly confident that the other side will adhere to it, hence are less opposed to a firm commitment for joint action against what seems a remote contingency.

All these political measures must be planned to the accompaniment of whatever military preparations will be necessary to deal with violations of the agreement. For instance, under an agreement that prohibits only the testing of certain weapons, both sides will remain free to continue research and development. The country that is determined to abide by the agreement cannot afford to neglect this research without opening the way for a potential violator to gain and then exploit a technological lead. Unless the public understands this fact, parliamentary governments will be handicapped in maintaining a research effort for weapons whose testing has been prohibited. The same problem would also arise under an agreement which does not prohibit the development of a weapon but does prevent the deployment of it—for example, a ban on placing weapons of mass destruction in orbit.

A program to deter evasion of arms-control agreements, like the one suggested here, does raise some additional problems for which an analogy can be found in the strategy of deterrence against nuclear attack. First, there is the problem of carrying out a threat if deterrence fails, that is, of imposing sanctions in the event of evasion or of retaliating in the event of attack. An advance commitment to carry out the threat is rational and necessary for a policy aimed at deterrence; but carrying out the threat after deterrence has failed may be undesirable or even irrational. Second, a policy of deterrence has to cope with accidental violations of the agreement, just as a policy of deterrence against nuclear attack has to control the risk of accidental war. In the former case, both sides will wish to correct the unintended violation and preserve the agreement; in the latter, both will want to avoid or correct an "accident" before it leads to full exchanges of violence. Third, there is some resemblance between the advantage of a first strike in mutual deterrence against nuclear attack and the advantage of gaining time through an evasion in certain arms-control agreements. None of these analogies is exact, of course. But they do suggest that ideas in the literature on deterrence can be as relevant to the prevention of violations in arms-control agreements as they are to the prevention of war.●

[5] Both the Soviet and the Western drafts allow the parties to select their annual quota of on-site inspections freely from among seismic disturbances that meet certain criteria. However, should a violation be unaccompanied by such a disturbance (*e.g.* a muffled underground test), the violator would not have to permit an inspection and the international control system would remain closed to all other evidence.

THE FOURTH OF JULY

● Mr. GLENN. Mr. President, as we prepare to celebrate our Nation's birthday on Monday, I would like to share with my colleagues an article, "Thoughts on an American Birthday," which appears in the current issue of Ladycom magazine. The writer, Barbara Cummings, is the wife of an Army enlisted man now stationed in Waco, Tex.

In this article, the writer brings out that patriotism and love for our country is not taken for granted by our military personnel and their families stationed overseas.

I ask that the article, "Thoughts on an American Birthday," be reprinted in full in the RECORD.

The article follows:

Fizzled sparklers, warm potato salad, and "Mom and apple pie" speeches make up a large part of our collective American experience. But have you ever wondered where the accompanying sentiments go after the Fourth of July?

Granted, American patriotism is an elusive, often complicated, emotion, but the unconditional love of country it demands seems to be more readily embraced by military families than civilians, and taking this a step further, by American military stationed overseas. Perhaps we are just more attuned to it than our non-military counterparts; maybe living daily with the commitment does that. And maybe it is possible to appreciate our way of life more at a distance when we have a tangible basis for comparison. Despite our varied motives, the fact remains that that flag-waving, brass-band strain of American pride spreads like crabgrass on foreign soil, while it seems to require vigilant nurturing here at home.

At home, especially since Watergate, our cynicism colors our patriotism. Our patriotism is cross-cut by images of baby-kissing politicians whose greedy handshakes mask their insincerity; of smoke-filled rooms where deals are cut; of the hard-nosed push for cash during an election race. Still others associate unabashed Americanism with naiveté and blind optimism. But somehow, Americanism comes to be a more basic, more emotional, more simple trait among those overseas.

I recall a Fourth of July celebration several summers ago in Italy. Humidity shimmered on the North Forty that day. Our clothes clung to us in sweaty wrinkles. It seemed so much hotter than early July, even for Italy, yet clusters of us waited for the by-now familiar ritual to begin. You see, nearly all of us had gathered every Fourth during our tours of duty to hear the cannons blasted 50 times in accompaniment to an alphabetical reading of the States. It may sound corny, but it was *very* important to us. We all stood there, misty-eyed, cheering, feeling very proud and probably more American than we had ever felt in our lives. America may have been 3,000 miles and a DEROS date away, but it had never been more immediate or real.

It would be misleading and unfair to say our flag-waving tendencies died with the last fireworks. They were in evidence, albeit in varying degrees, all through the year. I remember getting off a bus one foggy, coat-dampening winter evening only to stumble upon a large, noisy group of Americans clogging a sidewalk. Upon further inspection, I realized that they were crowded in front of a television store window display, cheering the United States Hockey Team, much to the amusement of passing Italians.

And still another episode comes to mind: that of a packed room full of GIs, cheering an NFL playoff game broadcast via satellite. I don't really remember their taking sides in the game. I just remember their excitement watching something that, before, they probably had taken for granted.

There is a postscript to all of these memories. After I returned to the States and found myself slipping into the mundane cycle of a normal American existence, Gen. James Dozier was freed by a crack team of Italian police. At that time, I watched with amazement the bored nods of approval from my fellow citizens. Soon afterward, I wrote a friend still in Italy to ask about her reaction to his thrilling release. She replied, describing the excitement and pride that had spilled into the streets. She said it seemed like every American has had a radio on blaring the news of the rescue. Newsmen had spoken of "another victory for patriotism over terrorism."

Somehow, I *knew* she'd say that.●

U.S. FOREIGN POLICY AND DOMESTIC COMMERCE

● Mr. ABDNOR. Mr. President. I am greatly concerned that foreign policy decisions often have been made without due regard to their economic impact on U.S. business. A very significant portion of this country's economic system is highly dependent upon foreign sales and purchases. A foreign policy decision can have a devastating economic impact on a domestic industry. The 1980 Russian grain embargo imposed by the Carter administration is a classic example.

While I would not suggest that national security should be secondary to economic impact, I question the extent to which economic consequences have been taken into consideration—if at all—when foreign policy decisions are made. In my judgment, maintaining incentives and rewards within our economic system is also in our Nation's interest. It is not in our best interest to use "national security" as a catch-all excuse to justify unwarranted intrustion into international trade.

With that thought in mind I asked the General Accounting Office (GAO) to research the organization of the Reagan administration's foreign policy decisionmaking process and how compensation is made to industries when export controls are imposed.

I ask that excerpts from GAO's May 12 letter report, entitled "Interagency Structure of Economic and Foreign Policy Decisionmaking" (GAO/ID-83-41), be reprinted in the RECORD.

The excerpts are as follows:

EXECUTIVE BRANCH ORGANIZATION

Under the Reagan administration, interagency policymaking is formally structured and extensively used. High-level interagency policymaking is carried out through a group of senior interagency groups associated with the NSC, and a number of cabinet councils. Senior interagency groups (SIGs) are set up under the NSC umbrella for foreign affairs, defense policy, intelligence policy, and international economic policy. They are chaired respectively by State, Defense, the Central Intelligence Agency, and Treasury. Interagency groups (IGs) typically focus on limited issues and have varying membership, size, and responsibilities depending on the issues under review. As may be expected, the NSC groups are concerned mostly with international political and military issues.

A series of cabinet councils set up by President Reagan to deliberate administration policies are, on the whole, concerned with domestic issues. Such issues, of course, encompass international economic concerns. To date, seven councils have been established, each chaired by the President with a cabinet-level chairman pro tempore, and each group has an Executive Secretary in the White House Office of Policy Development at the level of Special Assistant to the President or above.

The Cabinet Councils (and Secretary-rank chairman pro tempore) are: Economic Affairs (Treasury); Commerce and Trade (Commerce); Food and Agriculture (Agriculture); Natural Resources and the Environment (Interior); Human Resources (Health and Human Services); Management and Administration (Counsellor to the President) and Legal Policy (Attorney General).

The Cabinet Council on Economic affairs has reportedly been the most active of the councils. Although it was initially envisioned as a forum for domestic economic concerns, the council has considered such international issues as the yen-dollar exchange rate and U.S. participation financial institutions.

The Cabinet Council on Commerce and Trade, has been a relatively active council. It has operated in tandem with the Trade Policy Committee, an interagency group established in the 1962 legislation setting up the Office of the U.S. Trade Representative (OUSTR). Most trade issues continue to go through the Trade Policy Committee, chaired by the Ambassador-rank Trade Representative. When agreement cannot be reached on an issue through the trade policy structure, however, and Presidential determination is required, the issue will go before the Cabinet Council on Commerce and Trade. This council has also commissioned a study of U.S. competitiveness in high technology industries. The remaining councils are neither as involved in international affairs nor as active overall.

SENIOR INTERAGENCY GROUP ON INTERNATIONAL ECONOMIC POLICY

To coordinate foreign and international economic policies, a new Senior Interagency Group on International Economic Policy (SIG-IEP) was set up in the summer of 1982. The need for this group was highlighted by differences over such issues as the U.S. embargo of energy-related equipment to the Soviet Union and frictions with the European Common Market over exports of subsidized agricultural products. To ensure that domestic and international economic policies would be fully consistent and integrated, the President's directive named the Secretary of the Treasury as chairman of the SIG-IEP in addition to his role as chairman pro tempore of the Cabinet Council on Economic Affairs.

As originally proposed by the National Security Advisor, the SIG-IEP was to be set up within the NSC system and chaired by the Secretary of State with the Secretary of the Treasury as vice chair. The SIG-IEP was to funnel information on international economic policy issues from other interagency bodies to the NSC, focus government attention on important international economic issues, and monitor the implementation of U.S. policies in international economic affairs.

As finally set up, in a memo from President Reagan to the Cabinet of July 23, 1982, the SIG-IEP took on a somewhat different role. The objectives set out in the President's memo were to

"(1) develop, review, and prepare alternatives and recommendations on international economic policy issues as they relate to foreign policy, (2) develop a comprehensive international economic policy as it relates to foreign policy, and (3) coordinate the preparations for international economic summit conferences."

The latter objectives are much broader and seemingly more substantive than those originally envisioned. In addition, the Secretary of the Treasury was given the chairmanship rather than the Secretary of State, who is the vice chairman. The SIG-IEP was also given the authority to form its own working group instead of using the existing NSC structure, and it established a mid-level interagency support group chaired by the Assistant Secretary of Treasury for International Affairs.

Membership of the SIG-IEP includes the Secretaries of State, Agriculture, Commerce, and Defense; Director of the Office of Management and Budget; U.S. Trade Representative; Chairman of the Council of Economic Advisors; Director of the Central Intelligence Agency; Assistant to the President for National Security Affairs; and Assistant to the President for Policy Development; as well as the Secretary of the Treasury. Other domestic officials with a seeming interest in foreign and international economic issues, such as the Secretary of Labor, are not members.

In his role as chairman pro tempore of the Cabinet Council on Economic Affairs (CCEA), the Secretary of the Treasury is to provide leadership in the debates on international issues with major economic policy implications and, as chairman of SIG-IEP, to provide leadership in the debates on international economic issues with major foreign policy implications. The CCEA provides Treasury with a vehicle for presenting analysis to the Cabinet, and the SIG-IEP

with a mechanism for providing analysis to the NSC.

The last international economic summit was held prior to the SIG-IEP's creation and as a consequence the SIG-IEP has not prepared for such meetings. In November 1982, responsibility to coordinate preparation for economic summit conferences was given to the Under Secretary of State for Economic Affairs. However, there is to be a substantive role for the SIG-IEP in the administration's preparations for the summit to be held in Williamsburg in May 1983. To date, the SIG-IEP has made no effort to develop "a comprehensive economic policy as it relates to foreign policy," the second objective set out in the President's July memo and, since it has not staff or resources of its own, any future attempts to develop such a policy will likely entail assigning segments to different agencies.

Under its mandate to develop, review, and prepare alternatives and recommendations on international economic policy issues, however, the SIG-IEP's meeting schedule has been extensive. From July 26 to October 15, it met at least 11 times to consider issues including grain sales to the Soviet Union, pipeline sanctions, and U.S.-India relations. More recently, it has met to develop an administration position on renewal of the Export Administration Act. According to the SIG-IEP's executive secretary, the decision to use the SIG-IEP to consider a wide range of issues was made to gain broad participation from a variety of agencies, even though a smaller group may have been more efficient. Over time, however, the range of issues considered has somewhat diminished.

Under the leadership of the Treasury Department, we have been told the SIG-IEP has been used both as an informational forum to bring cabinet members up to date on various issues and as a forum to either reach consensus and report recommendations to the President through the NSC or to surface disagreements and clearly define options.

ISSUES IN COMPENSATION

The idea of compensating private companies, their employees, and the communities in which they are located for costs incurred as a result of export controls received renewed interest after President Reagan imposed sanctions against the Soviet Union as a result of the imposition of martial law in Poland. Such assistance has long been provided to those groups adversely affected by imports, and recent agricultural legislation contains provisions to protect against and compensate for agricultural embargoes. The administration's recent proposal to reauthorize the Export Administration Act provides some protection to exporters of nonagricultural products when export controls are imposed for foreign policy reasons. This appendix summarizes earlier experiences of groups requesting compensation for import and export-related reasons and discusses insurance programs used by major U.S. trading partners.

AGRICULTURAL SECTOR

Following the Soviet invasion of Afghanistan in January 1980, President Carter suspended the shipment of about 18 million metric tons of agricultural commodities to the Soviet Union for foreign policy and national security reasons under the authority of the Export Administration Act of 1979. Under the direction of the President, the Department of Agriculture took a number of actions, which included direct government purchases of grain and grain contracts to offset the impact of such a suspension.[1] It was the first time the Federal Government had done this.

Partly as a result of the suspension, the Congress adopted legislation that provides protection to the agricultural sector from losses arising from future foreign policy actions. In the Agriculture and Food Act of 1981, passed in December of that year, the Secretary of Agriculture is required to compensate farmers under certain conditions for losses due to national security or foreign policy embargoes through direct payments and/or loans. President Reagan lifted the embargo on April 24, some 7 months before the law was passed.

Additional legislation was passed in the last Congress that attempts to minimize damage to the agricultural sector as a result of export controls. The Futures Trading Act of 1982, enacted in January 1983, states, in part, that the "President shall not prohibit or curtail the export of any agricultural commodity or the products thereof under an export sales contract entered into before the President announces an action that would otherwise prohibit or curtail the export of the commodity or products."

NONAGRICULTURAL PRODUCTS

According to Commerce Department officials, Commerce is not required to compensate firms whose products are subject to export controls. In the wake of the Afghanistan sanctions, however, several actions were taken. The Conference Report on appropriations for the Departments of State, Commerce, and Justice and related agencies in April 1980 authorized the Small Business Administration to provide up to $4 million in disaster loans to small businesses that had suffered substantial economic injury. A group of travel agencies that had been adversely affected by the U.S. boycott of the 1980 Moscow Olympics petitioned the Small Business Administration for redress. The President vetoed the appropriations bill before any settlement was made.

Also as a result of the invasion of Afghanistan, the Department of Commerce curtailed and subsequently banned U.S. phosphate exports to the Soviet Union in February 1981. The administration concluded that domestic producers had sustained losses and that jobs had been lost as a direct result of the controls. There was some discussion of Government compensation at that time, but no action was taken.

ADJUSTMENT ASSISTANCE

Compensation for import-related injury has been provided under the Trade Act of 1974. Approximately $3.87 billion was paid to workers and $329.2 million in direct and guaranteed loans to firms since the program's inception. The amount of assistance has been declining and the President, in his fiscal year 1984 budget submission, recommended that adjustment allowances be discontinued.

During the last session of Congress a bill was introduced to provide similar assistance to workers and firms that suffer economic injury because of the imposition of certain export controls. Provision was made for retraining and relocation allowances for workers and loans or guarantees to firms. In its end of the year report last year, the President's Export Council unanimously endorsed a resolution calling for compensation for firms and workers who lose their jobs as a result of certain controls on exports.

EXISTING INSURANCE PROGRAMS

The Export-Import Bank Act of 1945, as amended, authorized Eximbank to insure against losses on export contracts due to political risk. This authority has been delegated to the Foreign Credit Insurance Association, a group of private companies, which has focused on losses due to political risks in the country of destination. Insurance against U.S. export control action prior to shipment is available but requires the purchase of a preshipment rider which specifically insures against the risk of loss due to political factors between the time of contract and the time of shipment. The preshipment policy requires payment of an additional premium and is generally purchased when the exporter expects a significant delay between contract and shipment. Preshipment policies are not generally purchased for sales of inventory items but for capital goods that are being manufactured to the buyer's specifications and for which there is no readily available alternative buyer. This coverage has been rarely used, however, and claims have been infrequent.

Many OECD countries have programs which are analogous, in that separate policies to cover risks between time of contract and time of delivery must be purchased. Government involvement in such schemes varies. The Government of Japan underwrites insurance policies to cover losses related to export controls as part of an overall export insurance law, but has not paid any claims. The Italian Government offers coverage, if it has been specifically applied for, against government actions in general. A private Dutch firm underwrites most political insurance risk in the Netherlands, and the West German system also depends almost solely on the private sector.

CURRENT INITIATIVES RELATED TO EXPORT CONTROL

A number of current initiatives deal with Government compensation and insurance for export controls and restrictions on the effects of their use. The sanctity of contracts is addressed in a bill to amend the Export Administration Act of 1979 which has been introduced in the current legislative session. As was provided for agricultural goods, this bill states in part that export controls imposed shall not apply to exports contracted for prior to the imposition of controls. Another recently introduced bill authorizes the Overseas Private Investment Corporation to issue insurance against losses incurred from the imposition of export controls.

Wide debate continues over the impact of adopting such legislation. According to administration officials, requiring the U.S. Government to reimburse manufacturers/exporters who suffer losses as a result of foreign policy-based export controls would force the Government to quantify the cost of using such controls. This in turn could either (1) liberalize the use of foreign policy sanctions because businesses would not be left "holding the bag" or (2) make foreign policy sanctions more costly and therefore less attractive to use.●

[1] For a critical discussion of Agriculture's actions and the resulting cost to the Government see GAO's report "Lessons to be Learned from Offsetting the Impact of the Soviet Grain Sales Suspension," July 27, 1981 (CED-81-110).

CHESAPEAKE BAY EROSION STUDY AUTHORIZED

● Mr. STAFFORD. Mr. President, under new rules of the Committee on Environment and Public Works, resolutions to authorized water resources studies by the Army Corps of Engineers must be approved by the full membership of our committee. Until this year, this responsibility had rested with the chairman and ranking minority member. But I, for one, believe that rule was too restrictive, not encouraging others on the committee to participate in the process.

Yesterday, the committee approved the first of these resolutions under the new procedures. This resolution authorizes the Corps of Engineers to undertake a study of erosion problems along Chesapeake Bay.

Mr. President, I want to express my commendation of Senator MATHIAS for his leadership in developing this study, and to state my belief that this study will prove to be a most important one.●

HAPPY BIRTHDAY, AMERICA

● Mr. D'AMATO. Mr. President, as we approach the Fourth of July and prepare to celebrate the birth of our Nation's independence, it is with special pride that I recognize the efforts of a fellow New Yorker who has composed a special song in honor of this national holiday.

Mr. Joe Rescigno of Eastchester, N.Y., pays tribute to our country in a new anthem entitled, "Happy Birthday, America." While Mr. Rescigno does not contend his song should replace "The Star Spangled Banner" as our national anthem, he would hope that it could be adopted some day as an official song for the Fourth of July.

As a patriot who was born and raised in the suburbs of America, Mr. Rescigno composed "Happy Birthday, America" as an inspiration to all Americans and to commemorate our national heritage. In his hometown, his anthem has received great public acclaim amongst senior citizens and other civic organizations. Stories have appeared in the local press and his song has been aired on local radio, as well as sung at community gatherings.

Given the great acclaim Mr. Rescigno has achieved through the composition of "Happy Birthday, America," I would like to offer my own tribute to his efforts as a songster and patriot. I commend him upon his achievement and offer the lyrics of "Happy Birthday, America" to my colleagues for consideration as a special Fourth of July anthem.

The lyrics read as follows:

Happy birthday, dear America
Happy birthday, dear America
July 4 is your birthday
God bless you today.
We are all proud of you
We love your stars and stripes
Of red, white and blue
You were born with freedom and justice, too.
Your liberty bell is echoed
Across oceans, seas and lands
This echo becomes louder
For all people everywhere.
We are proud to broaden you
In this great wide world
We celebrate and thank you
Forever and ever.●

ISLAND OF PEACE PARK

● Mr. DURENBERGER. Mr. President, 15 years ago, Ed Wilmes of St. Paul sat on top of a rubbish pile alongside the Mississippi River and looked at the land around him. What he saw was a peaceful place, a lush and green place, a place of contemplation. It was a place that reminded him, his personal difficulties aside, of just how beautiful life can be.

He also thought about the early days of his life, about family picnics and about having to watch his crippled mother sit in a chair while the rest of the family ran through the park.

These thoughts stirring in his head, Ed Wilmes did not sit still for long. Believing that one man can move a mountain, Ed went about gathering support for a park accessible for the elderly and the handicapped.

In my early days of public service, I was chairman of the Metropolitan Open Space Commission, and that is where I first met Ed. Armed only with an idea, he came to the commission to gather support and financing for his idea; his "Island of Peace" park.

Because the commission, as commissions sometimes go, had bigger problems dealing with bigger facilities at the time, Ed's idea was set aside.

But Ed persisted.

In time, he obtained the needed support and financing for the park, and today, 15 years after he first sat on the rubbish pile "Island of Peace" park sits in its place on 140 acres of land alongside the Mississippi River—complete with trails designed for wheelchairs, picnic tables for wheelchairs, and a visitors center.

The park is a big success, enjoyed by thousands of people, thanks to Ed.

And as Ed so proudly told a reporter, "One man still can make a difference." And that is a good lesson for all of us.

I would like to share Ed's special story and ask that the St. Paul Pioneer Press article from June 19, 1983, be reprinted in the CONGRESSIONAL RECORD.

The article follows:

[From the St. Paul Sunday Pioneer Press, June 19, 1983]

PEACE PARK SPRINGS FROM A LIFE OF PAIN

(By Patrick Marx)

It was the summer of 1942. Ed Wilmes, a young man with ambitions to play professional baseball, aborted his dream for World War II.

Wilmes eagerly enlisted in the U.S. Navy to seek adventure. But his youthful decisions seeded wartime experiences that led to a life of aimless drunkenness.

Despite his alcohol problem—he is only three months away from his last drink—and though he is virtually penniless, Wilmes, 60, has succeeded in establishing a priceless and perhaps a timeless legacy, a dream that began on Omaha Beach.

It's called the Island of Peace Park, a 140-acre park along the eastern shore of the Mississippi River in Fridley, a few blocks north of Interstate 694 just west of University Avenue.

Designed and crafted by Wilmes, the park is a special place for the handicapped and the elderly. Were it not for Wilmes, Islands of Peace wouldn't exist.

"We call him the founder," said David Torkildson, director of the Anoka County Park system that oversees the park. "His efforts to provide a special place for handicapped people have won recognition that the handicapped have been slighted in the parks systems."

The park took 13 years to develop, but it represents Wilmes' lifelong quest for meaning, for a place to call home.

Perhaps the idea began with Wilmes' handicapped mother.

Born in Milwaukee, Wilmes is the son of a wood carver. His mother suffered from severe hip problems resulting from a fall when she was a child.

"It was really something to go on a picnic and have to set her on a chair while we went out into the woods," Wilmes recalled. "It's something you don't forget."

A troubled youth, Wilmes sought gratification from sports. Shortly before the war, he said, he played baseball in the old Florida League for an old Boston Braves farm club.

He quit the league to join the Navy, where baseball ended and his affection for booze began.

The summers of '42 and '43 passed uneventfully. Wilmes did state-side duty in the Washington, D.C., area as a pharmacist's aide. With time on his hands, he gleefully whiled away the hours drinking.

Early in 1944, however, Wilmes was jolted by orders to join an amphibious unit in Great Britain to prepare for an assault on Normandy.

D-Day, June 6, 1944. Wilmes boarded LST 230 with his unit, Foxie 29 and headed for Utah Beach to transport battlefield wounded and dead away from the front.

Wilmes' left elbow and left leg were shattered by shrapnel, along with his dream to play pro ball.

"It was a rough crossing," he remembered. They say forget, but I never want to. I think of my buddies often. Just doesn't go away. I don't want to say much about it. Guilt. That's when I got the idea of finding a peaceful place.

Though the idea may have germinated then, it took four decades to blossom.

During the '50 and '60s, Wilmes drifted through the Midwest: Chicago, South Bend, Indianapolis, to name a few stops.

"I was a meatcutter, a meat salesman and a meat inspector. I would go from job to job. I never got fired for drinking, but was told to knock it off or lose my job.

Eight times he was hospitalized for alcoholism and complications caused by his war injuries. And with each hospital stay among

disabled and elderly veterans, he said, the idea for a "place for them" grew, stronger.

In 1966, Wilmes came to the Veterans Hospital in Minneapolis suffering from internal bleeding. During his recuperation, he often wandered along the river.

"I would sit in a tavern along U.S. 10 watching people go north for boating and I'd go back to the hospital where they had nothing," he said.

"Sometime in 1968 I came to visit this place," he said. "Right over there on a rubbish heap I got the idea to make the Islands of Peace."

Wilmes stood in front of the park's reception center facing west—a deep forest bordering the river. At his back was a parking lot and several apartment complexes in full view of Interstate 694.

It's a strangely peaceful place; one side urban, one side wild and lush.

Park trails are low, easy and black-topped. A Fridley VFW post donated an electric golf cart so the disabled could move around. Picnic tables are cut to allow those using wheelchairs to roll right in.

"The plants are close to the trails to allow those in wheelchairs to touch them and the fragrant trees like the lilacs are set out so the blind can scent them," said Wilmes.

Hobbling on his cane, followed by his 13-year-old golden retriever Grandy, Wilmes proudly squired guests through the spacious three-room reception center. The center was built by volunteer union workers with $150,000 appropriated by the Minnesota Legislature.

He pointed to a console television donated by Minnesota Twins owner Calvin Griffith; to couches, tables and chairs donated by Wickes Furniture Stores; to plywood donated by Plywood Minnesota; to a dozen rods and reels and to a huge brass Liberty bell donated by Onan Corp.

"If I had a list of the people who donated to this, it would be taller than the IDS Tower," Wilmes said. "The Army, the Navy, the Girl Scouts, the Boy Scouts, the Protestants, the Catholics, the Republicans and the Democrats.

"It's totally accessible, but it's not exclusively for the handicapped or the elderly. I said 'no' to that because that would isolate them. This is open to the public."

In the corner of a rear room stands a small bunk, covered with a tattered and faded bedspread. A colorless, messy room where Wilmes hides his loneliness.

"Sure I get disappointed a lot," he said, welcoming a stranger to his private world. "I have deep feelings of hurt when I see things that don't work.

"I don't have no anger but I have periods of aloneness. I cut myself off. I'd drink alone," he said. "It's a lonesome life where sometimes you can turn to only one thing and that's the bottle."

An easy chuckle.

"Booze and water," he cracked. "Kesslers' stock must have gone down when I quit."

Wilmes slid into the golf cart. He waved to passers-by on the trail, an elderly couple and several children who visit him often.

Sights and scents of nature. Freshly cut grass. The rush of wind through hardwood trees. Park benches he carved out of wood stumps. Newly planted saplings. The muddy brown river.

Abruptly, he stopped the cart. His watery brown eyes gazed across the river.

"If the president of the United States wants to know about peace, let him come here and see it. It's not people disagreeing, but agreeing to do something together," he said. "I feel as if God put his hand on this land."

He puffed his chest and dramatically announced that he was responsible for all this, not boasting, but to say that individuals still make a difference.

"Look at me, I have no money, no education, but I've put my feelings and my heart ahead of my intelligence to get things done.

"Persistence is the key word," said Wilmes. "I keep going back and I don't take no for an answer.

"There's a way to reach people. I don't send fancy brochures or work over the telephone. I tell people to come out here to see what we've got. Nothing can take the place of that."

Minnesota Rep. Wayne Simoneau, who represents the area, attests to Wilmes' persistence. And to Wilmes' craftiness.

"He will call a television station and say a U.S. senator is coming out," said Simoneau. "Then he'd turn around and call the senator and tell him the media was coming."

Over a cup of coffee, with his dog at his feet, Wilmes' eyes filled again.

"I'm just an old codger marking time," he said, "but I ain't wasting none of it now."●

INCREASES IN LOCAL TELEPHONE RATES

● Mr. HOLLINGS. Mr. President, over the past decade we have made a firm commitment in domestic telecommunications to a procompetitive policy and away from a monopoly environment with Government regulation. We have found that an effectively working marketplace in telecommunications provides us with so many more goods and services at lower cost that Government oversight pales by comparison. We have also found, however, that this procompetitive approach should not be followed blindly.

We must temper this new policy so it best serves our national interests. First, we must insure that we have a marketplace that is effectively competitive prior to deregulation. Many sectors of the telecommunications market are competitive today; others clearly are not.

Second, in the international arena, it is clear that we must continue to coordinate use of the electromagnetic spectrum and to deal with foreign nations whose interests in a free market often diverge with ours. In such an environment, a role for the Federal Government remains necessary.

Third, we must insure that our telecommunications system is capable of meeting our national security/emergency preparedness needs. This objective, if properly addressed, can be met consistent with the marketplace approach.

Finally, we must insure that the American public has access to telephone service at reasonable charges. Access to telephone service is far more a necessity than a luxury. All people must be offered a reasonable opportunity to use this service. That is the issue I wish to address today.

We in the United States today have the best telephone service in the world. We owe a large debt to the developer of this service—AT&T. Not only has AT&T developed high quality service, it has done so with reasonable charges. The result is that almost all people in America now enjoy the use of the telephone.

Local telephone rates have been stable for almost two decades, allowing most Americans to obtain telephone service. Today, however, these local rates are increasing. Inflation is certainly a major factor for the increases we see today. Another significant factor is the move to a competitive marketplace, including the new policies to allow more rapid depreciation and to end many subsidies. A further factor is the drive by telephone companies to modernize their plant and to increase their rates of return.

A good example of how these factors work is the recent rate request by the Southwestern Bell Co. In Texas, this telephone company is seeking $1.2 billion in added revenue from local ratepayers; $502 million of this total is to recover added costs and to boost the rate of return to 13.57 percent—from less than 10 percent today. Another $450 million is for more accelerated depreciation, and $249 million is for interstate and intrastate access charges—as a replacement for the long distance contributions.

For the marketplace to work properly, price must be based on cost. As part of this, competitors must not have unfair advantages; for example, in depreciating equipment, and internal subsidies must be eliminated. The end result of all of these factors is that local telephone rates will increase, possibly to a level that will cause certain subscribers to discontinue service. Clearly, such a discontinuation of service is unacceptable.

The twin goals of competition and adequate service at reasonable charges need not conflict. The question is how can both goals be met. I believe that we should begin right away to address this problem.

It is out of my general concern that something must be done—rather than the specifics of the proposal—that I am joining Senator STEVENS on his telephone rate legislation, S. 1382. This is the only concrete proposal so far introduced in the Senate. It is based on legislation previously before this body. I am cosponsoring it to send a signal that we must act now to ensure the continuation of quality telephone service at reasonable rates.

My joining as a cosponsor of S. 1382 should not be taken as an endorsement of the particulars of this proposal. It is only one of the many ways we might approach the universal service issue. It, however, is a start. Let me take a moment to offer some of my

concerns with this bill and, in doing so, spell out the direction we should be headed.

First, any subsidy must be based on costs, not rates. While rates may in certain circumstances reflect costs, far too often they do not. Jurisdictions establish rates based on very different criteria, only one of which is cost. In addition, basing a subsidy on rates rather than costs may, in fact, cause rates to increase, since any rate increase will be paid partially or possibly totally by others.

Second, we should give subsidies to those who genuinely require it. If we give subsidies to all people living in areas with higher than average telephone rates, we will surely be subsidizing those who certainly can afford telephone service.

Third, we should not be subsidizing inefficiency and mismanagement. Any subsidy must be linked to efforts to bring down the cost of telephone service.

Fourth, all those who receive a subsidy should be held accountable for its proper use. All legislation must contain provisions to insure the subsidy is used to hold down rates for those who need it.

Fifth, any legislation on this issue must confront the problem of carriers and users bypassing the local telephone exchange. If a subsidy is improperly levied, bypassing may increase. The end result will be a significant decrease in revenues for the local telephone exchange. We should not prevent those who wish to bypass, after all this is entirely consistent with out procompetitive approach. On the other hand, we should not create incentives to bypass. The bypass problem should be explicitly addressed in legislation. In doing so, we must be wary about imposing surcharges on bypassers without sufficient information about the marketplace and that therefore might well significantly skew service offerings. One way to handle this problem is to give no incentives for or against bypassing and impose the same fee on all providers.

Sixth, legislation must contain some flexibility to meet new situations. I am, however, wary about giving the Federal Communications Commission or any other regulatory body too much discretion. I believe Congress should give very explicit directions in this important area. Further, we should carefully examine whether Government regulators have the resources and skills to handle any authority given them.

Seventh, any system to raise funds for a subsidy must be open and accountable. In addition, we should be careful about instituting a scheme where the funds raised and expended can grow and grow without proper control. This issue of fiscal accountability has been and is one of tremendous importance to me. We are, after, all, using the public's money.

Eight, Congress has a responsibility to carefully oversee any subsidy scheme. Any legislation on this issue must include provisions for regular and automatic review by Congress.

There is no doubt that the issues involved with the increases in local telephone rates are complex. It is clear these rates are going up for many reasons. What can or should be done about the move of the local telephone companies to modernize? What about the need for more rapid depreciation? We also need to examine the issues of cost allocation, and, perhaps most importantly, the issue of what is universal service. Finally, we have to be careful about losing benefits we have gained through the competitive marketplace. Our scope of review should thus be broad, and while need to act, we should not act in haste.

Legislation to address the problem of increased telephone rates and the resulting loss of service is a problem we need to deal with now. A resolution will not come easily. Rates are going up for many reasons. I will be examining each new proposal carefully to see if it best meets the twin goals of quality service at reasonable charges and a competitive marketplace.●

TUITION TAX CREDITS

● Mr. DURENBERGER. Mr. President, the Supreme Court today upheld the constitutionality of Minnesota's tuition tax deduction in *Mueller et al. v. Allen* (No. 82-195, June 29, 1983). As a result of this ruling, the question whether tuition tax credits are permissable has, in all probability, been answered. There are, however, significant differences between the Minnesota law and the tuition tax credit legislation awaiting floor action, S. 528.

The most important distinction, in my opinion, is the availability of the deduction for all Minnesota parents with children in elementary and secondary schools. If a tuition tax credit program is to succeed, it cannot be restricted to families with children enrolled in nongovernmental organizations. The program must be structured as governmental tax policy aid to all children, not just those who patronize a particular class of institution.

It is therefore my intention to offer an amendment to S. 528 when it comes to the Senate floor to extend the credit to families with children in public schools who are paying tuition.

I also intend to work to see this legislation expanded to include not only tuition, but also fees, books, and transportation. This change would also help bring S. 528 closer in scope to the Minnesota law.

If we are to have a serious and informative debate on this issue in the Senate, I believe it is imperative that these amendments be adopted. I have written to President Reagan and am hopeful that the administration will be supportive of these proposals. I ask that a copy of my letter and the Courts opinion be included in the RECORD.

The material follows:

U.S. SENATE,
COMMITTEE ON FINANCE,
Washington, D.C., June 29, 1983.

The PRESIDENT,
The White House,
Washington, D.C. 20500.

DEAR MR. PRESIDENT: The Supreme Court's decision in *Mueller et al. v. Allen* (No. 82-195, June 29, 1983) is a positive forecast for the future of tuition tax credits in the United States. Your leadership on this issue and your efforts to make quality education a priority in your Administration are to be commended.

Although the Court, in all probability, has answered the question whether tuition tax credits are permissible, there are several very important distinctions between the Minnesota law, which the Court upheld, and the pending tuition tax credit legislation. The most significant distinction, in my opinion, is the availability of the deduction for *all* Minnesota parents with children in elementary and secondary schools. The Court relied heavily upon the neutrality of the Minnesota statute to distinguish *Nyquist*, 413 U.S. 756, and uphold its constitutionality.

"Other characteristics of § 290.09(22) argue equally strongly for the provision's constitutionality. Most importantly, the deduction is available for educational expenses incurred by *all* parents, including those whose children attend public schools and those whose children attend non-sectarian private schools or sectarian private schools." (Page 8)

Judging from the reliance the Court placed upon this provision of the Minnesota law, it is my belief that your legislation must provide tax credits for both public and private school tuition to be constitutional.

If a tuition tax credit program is to succeed it cannot be restricted to families with children enrolled in non-governmental organizations. The program must be structured as governmental tax policy aid to *all* children—not just those who patronize a certain class of institution.

Tuition tax credits are not a trade-off between public and private education. Effective consumer choice can only exist in an environment where both systems are strong. Consumers must have access to alternatives, not only between government and nongovernment systems, but more importantly, among differing systems within each sector. Tuition tax credits are not an excuse to weaken traditional governmental support for the "public school" system. On the contrary, a commitment to consumer choice means a recommitment to the principles underlying that support.

Our goal must be to expand consumer choice and return financing alternatives to the real decisionmakers—the parents. We cannot afford, from either a policy perspective or a constitutional perspective, to discriminate among consumers.

For these reasons, I will offer an amendment on the Senate Floor to extend the tax credit to families with children in school—public or private. Although this amendment was not adopted when I offered it at the

Senate Finance Committee Mark-Up, I believe the Court's decision now mandates adoption of this amendment.

I also intend to work to see this legislation expanded to include, not only tuition, but also fees, books, and transportation. This change would enhance the pending legislation by bringing it closer to the Minnesota law.

If we are to have a serious and informative debate on this issue in the Senate, I believe it is imperative that my amendments be adopted. I hope that you will be supportive when that time arises.

Thank you very much.

DAVE DURENBERGER,
U.S. Senator.

[NOTE: Where it is feasible, a syllabus (headnote) will be released, as is being done in connection with this case, at the time the opinion is issued. The syllabus constitutes no part of the opinion of the Court but has been prepared by the Reporter of Decisions for the convenience of the reader. See *United States* v. *Detroit Lumber Co.*, 200 U.S. 321, 337.]

SUPREME COURT OF THE UNITED STATES

Syllabus

MUELLER et al. *v.* ALLEN et al.

CERTIORARI TO THE UNITED STATES COURT OF APPEALS FOR THE EIGHTH CIRCUIT

No. 82-195. Argued April 18, 1983—Decided June 29, 1983

A Minnesota statute (§ 290.09(22)) allows state taxpayers, in computing their state income tax, to deduct expenses incurred in providing "tuition, textbooks and transportation" for their children attending an elementary or secondary school. Petitioner Minnesota taxpayers brought suit in Federal District Court against respondent Minnesota Commissioner of Revenue and respondent parents who had taken the tax deduction for expenses incurred in sending their children to parochial schools, claiming that § 290.09(22) violates the Establishment Clause of the First Amendment by providing financial assistance to sectarian institutions. The District Court granted summary judgment for respondents, holding that the statute is neutral on its face and in its application and does not have a primary effect of either advancing or inhibiting religion. The Court of Appeals affirmed.

Held: Section 290.09(22) does not violate the Establishment Clause, but satisfies all elements of the "three-part" test laid down in *Lemon* v. *Kurtzman*, 403 U.S. 602, that must be met for such a statute to be upheld under the Clause. Pp. 3-14.

(a) The tax deduction in question has the secular purpose of ensuring that the State's citizenry is well educated, as well as of assuring the continued financial health of private schools, both sectarian and nonsectarian. Pp. 5-7.

(b) The deduction does not have the primary effect of advancing the sectarian aims of nonpublic schools. It is only one of many deductions—such as those for medical expenses and charitable contributions—available under the Minnesota tax laws; is available for educational expenses incurred by *all* parents, whether their children attend public schools or private sectarian or nonsectarian private schools, *Committee for Public Education* v. *Nyquist*, 413 U.S. 756, distinguished; and provides aid to parochial schools only as a result of decisions of individual parents rather than directly from the State to the schools themselves. The Establishment Clause's historic purposes do not encompass the sort of attenuated financial benefit that eventually flows to parochial schools from the neutrally available tax benefit at issue. The fact that notwithstanding § 290.09(22)'s facial neutrality, a particular annual statistical analysis shows that the statute's application primarily benefits religious institutions, does not provide the certainty needed to determine the statute's constitutionality. Moreover, private schools, and parents paying for their children to attend these schools, make special contributions to the areas in which the schools operate. Pp. 7-14.

(c) Section 290.09(22) does not "excessively entangle" the State in religion. The fact that state officials must determine whether particular textbooks qualify for the tax deduction and must disallow deductions for textbooks used in teaching religious doctrines is an insufficient basis for finding such entanglement. P. 14.

676 F. 2d 1195, affirmed.

REHNQUIST, J., delivered the opinion of the Court, in which BURGER, C. J., and WHITE, POWELL, and O'CONNOR, JJ., joined. MARSHALL, J., filed a dissenting opinion, in which BRENNAN, BLACKMUN, and STEVENS, JJ., joined.

[NOTICE: This opinion is subject to formal revision before publication in the preliminary print of the United States Reports. Readers are requested to notify the Reporter of Decisions, Supreme Court of the United States, Washington, D.C. 20543, of any typographical or other formal errors, in order that corrections may be made before the preliminary print goes to press.]

SUPREME COURT OF THE UNITED STATES

No. 82-195

VAN D. MUELLER and JUNE NOYES, PETITIONERS *v.* CLYDE E. ALLEN, JR., et al.

ON WRIT OF CERTIORARI TO THE UNITED STATES COURT OF APPEALS FOR THE EIGHTH CIRCUIT

[June 29, 1983]

JUSTICE REHNQUIST delivered the opinion of the Court.

Minnesota allows taxpayers, in computing their state income tax, to deduct certain expenses incurred in providing for the education of their children. Minn. Stat. § 290.09 (22).[1] The United States Court of Appeals for the Eighth Circuit held that the Establishment Clause of the First and Fourteenth Amendments was not offended by this arrangement. Because this question was reserved in *Committee for Public Education* v. *Nyquist*, 413 U.S. 756 (1973), and because of a conflict between the decision of the Court of Appeals for the Eighth Circuit and that of the Court of Appeals for the First Circuit in *Rhode Island Federation of Teachers* v. *Norberg*, 630 F. 2d 855 (CA1 1980), we granted certiorari. —— U.S. —— (1982). We now affirm.

Minnesota, like every other state, provides its citizens with free elementary and secondary schooling. Minn. Stat. §§ 120.06, 120.72. It seems to be agreed that about 820,000 students attended this school system in the most recent school year. During the same year, approximately 91,000 elementary and secondary students attended some 500 privately supported schools located in Minnesota, and about 95 percent of these students attended schools considering themselves to be sectarian.

Minnesota, by a law originally enacted in 1955 and revised in 1976 and again in 1978, permits state taxpayers to claim a deduction from gross income for certain expenses incurred in educating their children. The deduction is limited to actual expenses incurred for the "tuition, textbooks and transportation" of dependents attending elementary or secondary schools. A deduction may not exceed $500 per dependent in grades K through six and $700 per dependent in grades seven through twelve. Minn. Stat. § 290.09.[2]

Petitioners—certain Minnesota taxpayers—sued in the United States District Court for the District of Minnesota claiming that § 290.09(22) violated the Establishment Clause by providing financial assistance to sectarian institutions. They named as respondents the Commissioner of the Department of Revenue of Minnesota and several parents who took advantage of the tax deduction for expenses incurred in sending their children to parochial schools. The District Court granted respondent's motion for summary judgment, holding that the statute was "neutral on its face and in its application and does not have a primary effect of either advancing or inhibiting religion." 514 F. Supp. 998, 1003 (D Minn. 1981). On appeal, the Court of Appeals affirmed, concluding that the Minnesota statute substantially benefited a "broad class of Minnesota citizens."

Today's case is no exception to our oft-repeated statement that the Establishment Clause presents especially difficult questions of interpretation and application. It is easy enough to quote the few words comprising that clause—"Congress shall make no law respecting an establishment of religion." It is not at all easy, however, apply this Court's various decisions construing the Clause to governmental programs of financial assistance to sectarian schools and the parents of children attending those schools. Indeed, in many of these decisions "we have expressly or implicitly acknowledged that 'we can only dimly perceive the lines of demarcation in this extraordinarily sensitive area of constitutionl law.' " *Lemon* v. *Kurtzman*, 403 U.S. 609, 612 (1971), quoted with approval in *Nyquist*, *supra*, at 761.

One fixed principle in this field is our consistent rejection of the argument that "any program which in some manner aids an Institution with a religious affiliation" violates the Establishment Clause. *Hunt* v. *McNair*, 413 U.S. 734, 742 (1973). See, *e.g. Bradfield* v. *Roberts*, 175 U.S. 291 (1899); *Walz* v. *Tax Commission*, 397 U.S. 664 (1970). For example, it is now well-established that a state may reimburse parents for expenses incurred in transporting their children to school, *Everson* v. *Board of Education*, 330 U.S. 1 (1947), and that it may loan secular textbooks to all schoolchildren within the state, *Board of Education* v. *Allen*, 392 U.S. 236 (1968).

Notwithstanding the repeated approval given programs such as those in *Allen* and *Everson*, our decisions also have struck down arrangements resembling, in many respects, these forms of assistance. See, *e.g., Lemon* v. *Kurtzman, supra; Levitt* v. *Committee for Public Education*, 413 U.S. 472 (1972); *Meek* v. *Pittenger*, 421 U.S. 349 (1975); *Wolman* v. *Walter*, 433 U.S. 229, 237-238 (1977).[3] In this case we are asked to decide whether Minnesota's tax deduction bears greater resemblance to those types of assistance to parochial schools we have ap-

---

Footnotes at end of article.

proved, or to those we have struck down. Petitioners place particular reliance on our decisions in *Committee for Public Education* v. *Nyquist, supra,* where we held invalid a New York statute providing public funds for the maintenance and repair of the physical facilities of private schools and granting thinly disguised "tax benefits," actually amounting to tuition grants, to the parents of children attending private schools. As explained below, we conclude that § 290.09(22) bears less resemblance to the arrangement struck down in *Nyquist* than it does to assistance programs upheld in our prior decisions and those discussed with approval in *Nyquist.*

The general nature of our inquiry in this area has been guided, since the decision in *Lemon* v. *Kurtzman,* 403 U.S. 602 (1971), by the "three-part" test laid down in that case:

"First, the statute must have a secular legislative purpose; second, its principle or primary effect must be one that neither advances nor inhibits religion . . .; finally, the statute must not foster 'an excessive government entanglement with religion.' " *Id.,* at 612-613.

While this principle is well settled, our cases have also emphasized that it provides "no more than [a] helpful signpost" in dealing with Establishment Clause challenges. *Hunt* v. *McNair, supra,* 413 U.S., at 741. With this *caveat* in mind, we turn to the specific challenges raised against § 290.09(22) under the *Lemon* framework.

Little time need be spent on the question of whether the Minnesota tax deduction has a secular purpose. Under our prior decisions, governmental assistance programs have consistently survived this inquiry even when they have run afoul of other aspects of the *Lemon* framework. See, *e.g., Lemon* v. *Kurtzman, supra; Meek* v. *Pittenger, supra,* 421 U.S., at 363, *Wolman* v. *Walter, supra,* 433 U.S., at 236. This reflects, at least in part, our reluctance to attribute unconstitutional motives to the states, particularly when a plausible secular purpose for the state's program may be discerned from the face of the statute.

A state's decision to defray the cost of educational expenses incurred by parents—regardless of the type of schools their children attend—evidences a purpose that is both secular and understandable. An educated populace is essential to the political and economic health of any community, and a state's efforts to assist parents in meeting the rising cost of educational expenses plainly serves this secular purpose of ensuring that the state's citizenry is well-educated. Similarly, Minnesota, like other states, could conclude that there is a strong public interest in assuring the continued financial health of private schools, both sectarian and non-sectarian. By educating a substantial number of students such schools relieve public schools of a correspondingly great burden—to the benefit of all taxpayers. In addition, private schools may serve as a benchmark for public schools, in a manner analogous to the "TVA yardstick" for private power companies. As JUSTICE POWELL has remarked:

"Parochial schools, quite apart from their sectarian purpose, have provided an educational alternative for millions of young Americans; they often afford wholesome competition with our public schools; and in some States they relieve substantially the tax burden incident to the operation of public schools. The State has, moreover, a legitimate interest in facilitating education of the highest quality for all children within its boundaries, whatever school their parents have chosen for them. *Wolman* v. *Walter,* 433 U.S. 229, 226 (POWELL, J., concurring in part, concurring in judgment in part, and dissenting in part).

All these justifications are readily available to support § 290.02(22), and each is sufficient to satisfy the secular purpose inquiry of *Lemon.*[4]

We turn therefore to the more difficult but related question whether the Minnesota statute has "the primary effect of advancing the sectarian aims of the nonpublic schools." *Committee for Public Education* v. *Regan,* 444 U.S. 646, 662 (1980); *Lemon* v. *Kurtzman, supra,* 403 U.S., at 612-613. In concluding that it does not, we find several features of the Minnesota tax deduction particularly significant. First, an essential feature of Minnesota's arrangement is the fact that § 290.09(22) is only one among many deductions—such as those for medical expenses, Minn. Stat. § 290.09(10) and charitable contributions, Minn. § 290.21—available under the Minnesota tax laws.[5] Our decisions consistently have recognized that traditionally "[l]egislatures have especially broad latitude in creating classifications and distinctions in tax statutes," *Regan* v. *Taxation with Representation,* —— U.S. —— (1983), in part because the "familiarity with local conditions" enjoyed by legislators especially enables them to "achieve an equitable distribution of the tax burden." *Madden* v. *Kentucky,* 309 U.S. 83, 87 (1940). Under our prior decisions, the Minnesota legislature's judgment that a deduction for educational expenses fairly equalizes the tax burden of its citizens and encourages desirable expenditures for educational; purposes is entitiled to substantial deference.[6]

Other characteristics of § 290.09(22) argue equally strongly for the provision's constitutionality. Most importantly, the deduction is available for educational expenses incurred by *all* parents, including those whose children attend public schools and those whose children attend non-sectarian private schools or sectarian private schools. Just as in *Widmar* v. *Vincent,* —— U.S. —— (1981), where we concluded that the state's provision of a forum neutrally "open to a broad class of nonreligious as well as religious speakers" does not "confer any imprimatur of State approval," so here: "the provision of benefits to so broad a spectrum of groups is an important index of secular effect."[7]

In this respect, as well as others, this case is vitally different from the scheme struck down in *Nyquist.* There, public assistance amounting to tuition grants, was provided only to parents of children in *nonpublic* schools. This fact had considerable bearing on our decision striking down the New York statute at issue; we explicitly distinguished both *Allen* and *Everson* on the grounds that "In both cases the class of beneficiaries included *all* schoolchildren, those in public as well as those in private schools." 413 U.S., at 782, n. 38 (emphasis in original).[8] Moreover, we intimated that "public assistance (*e.g.,* scholarships) made available generally without regard to the sectarian-nonsectarian or public-nonpublic nature of the institution benefited," *ibid.,* might not offend the Establishment Clause. We think the tax deduction adopted by Minnesota is more similar to this latter type of program than it is to the arrangement struck down in *Nyquist.* Unlike the assistance at issue in *Nyquist,* § 290.09(22) permits *all* parents—whether their children attend public school or private—to deduct their children's educational expenses. As *Widmar* and our other decisions indicate, a program, like § 290.09(22), that neutrally provides state assistance to a broad spectrum of citizens is not readily subject to challenge under the Establishment Clause.

We also agree with the Court of Appeals that, by channeling whatever assistance it may provide to parochial schools through individual parents, Minnesota has reduced the Establishment Clause objections to which its action is subject. It is true, of course, that financial assistance provided to parents ultimately has an economic effect comparable to that of aid given directly to the schools attended by their children. It is also true, however, that under Minnesota's arrangement public funds become available only as a result of numerous, private choices of individual parents of school-age children. For these reasons, we recognized in *Nyquist* that the means by which state assistance flows to private schools is of some importance: we said that "the fact that aid is disbursed to parents rather than to . . . schools" is a material consideration in Establishment Clause analysis, albeit "only one among many to be considered." *Nyquist,* at 781. It is noteworthy that all but one of our recent cases invalidating state aid to parochial schools have involved the direct transmission of assistance from the state to the schools themselves. The exception, of course, was *Nyquist,* which, as discussed previously is distinguishable from this case on other grounds. Where, as here, aid to parochial schools is available only as a result of decisions of individual parents no "imprimatur of State approval," *Widmar,* at ——, can be deemed to have been conferred on any particular religion, or on religion generally.

We find it useful, in the light of the foregoing characteristics of § 290.09(22), to compare the attenuated financial benefits flowing to parochial schools from the section to the evils against which the Establishment Clause was designed to protect. These dangers are well-described by our statement that "what is at stake as a matter of policy [in Establishment Clause cases] is preventing that kind and degree of government involvement in religious life that, as history teaches us, is apt to lead to strife and frequently strain a political system to the breaking point." *Nyquist, supra,* 413 U.S., at 796, quoting, *Walz* v. *Tax Comm'n,* 397 U.S., at 694 (Harlan, J., concurring). It is important, however, to "keep these issues in perspective":

"At this point in the 20th century we are quite far removed from the dangers that prompted the Framers to include the Establishment Clause in the Bill of Rights. See *Walz* v. *Tax Comm'n,* 397 U.S. 664, 668 (1970). The risk of significant religious or denominational control over our democratic processes—or even of deep political division along religious lines—is remote, and when viewed against the positive contributions of sectarian schools, and such risk seems entirely tolerable in light of the continuing oversight of this Court." *Wolman,* at 263 (POWELL, J., concurring in part, concurring in the judgment in part, and dissenting in part).

The Establishment Clause of Course extends beyond prohibition of a state church or payment of state funds to one or more churches. We do not think, however, that its prohibition extends to the type of tax deduction established by Minnesota. The historic purposes of the clause simply do not encompass the sort of attenuated financial

benefit, ultimately controlled by the private choices of individual parents, that eventually flows to parochial schools from the neutrally available tax benefit at issue in this case.

Petitioners argue that, notwithstanding the facial neutrality of § 290.09(22), in application the statute primarily benefits religious institutions.[9] Petitioners rely, as they did below, on a statistical analysis of the type of persons claiming the tax deduction. They contend that most parents of public school children incur no tuition expenses, see Min. Stat. § 120.06, and that other expenses deductible under § 290.09(22) are negligible in value; moreover, they claim that 96% of the children in private schools in 1978–1979 attended religiously-affiliated institutions. Because of all this, they reason, the bulk of deductions taken under § 290.09(22) will be claimed by parents of children in sectarian schools. Respondents reply that petitioners have failed to consider the impact of deductions for items such as transportation, summer school tuition, tuition paid by parents whose children attended schools outside the school districts in which they resided, rental or purchase costs for a variety of equipment, and tuition for certain types of instruction not ordinarily provided in public schools.

We need not consider these contentions in detail. We would be loath to adopt a rule grounding the constitutionality of a facially neutral law on annual reports reciting the extent to which various classes of private citizens claimed benefits under the law. Such an approach would scarcely provide the certainty that this field stands in need of, nor can we perceive principled standards by which such statistical evidence might be evaluated. Moreover, the fact that private persons fail in a particular year to claim the tax relief to which they are entitled—under a facially neutral statute—should be of little importance in determining the constitutionality of the statute permitting such relief.

Finally, private educational institutions, and parents paying for their children to attend these schools, make special contributions to the areas in which they operate. "Parochial schools, quite apart from their sectarian purpose, have provided an educational alternative for millions of young Americans; they often afford wholesome competition with our public schools; and in some States they relieve substantially the tax burden incident to the operation of public schools." *Wolman*, at 262 (POWELL, J., concurring and dissenting) If parents of children in private schools choose to take especial advantage of the relief provided by § 290.09(22), it is no doubt due to the fact that they bear a particularly great financial burden in educating their children. More fundamentally, whatever unequal effect may be attributed to the statutory classification can fairly be regarded as a rough return for the benefits, discussed above, provided to the state and all taxpayers by parents sending their children to parochial schools. In the light of all this, we believe it wiser to decline to engage in the type of empirical inquiry into those persons benefited by state law which petitioners urge.[10]

Thus, we hold that the Minnesota tax deduction for educational expenses satisfies the primary effect inquiry of our Establishment Clause cases.

Turning to the third part of the *Lemon* inquiry, we have no difficulty in concluding that the Minnesota statute does not "excessively entangle" the state in religion. The only plausible source of the "comprehensive, discriminating, and continuing state surveillance," 403 U.S., at 619, necessary to run afoul of this standard would lie in the fact that state officials must determine whether particular textbooks qualify for a deduction. In making this decision, state officials must disallow deductions taken from "instructional books and materials used in the teaching of religious tenets, doctrines or worship, the purpose of which is to inculcate such tenets, doctrines or worship." Minn. Stat. § 290.09(22). Making decisions such as this does not differ substantially from making the type of decisions approved in earlier opinions of this Court. In *Board of Education* v. *Allen*, 392 U.S. 236 (1968), for example, the Court upheld the loan of secular textbooks to parents or children attending nonpublic schools; though state officials were required to determine whether particular books were or were not secular, the system was held not to violate the Establishment Clause. See also *Wolman* v. *Walter, supra; Meek* v. *Pittenger, supra.* The same result follows in this case.[11]

For the foregoing reasons, the judgment of the Court of Appeals is *Affirmed.*

FOOTNOTES

[1] Minn. Stat. § 290.09(22) (1982) permits a taxpayer to deduct from his or her computation of gross income the following:

Tuition and transportation expense. The amount he has paid to others, not to exceed $500 for each dependent in grades K to 6 and $700 for each dependent in grades 7 to 12, for tuition, textbooks and transportation of each dependent in attending an elementary or secondary school situated in Minnesota, North Dakota, South Dakota, Iowa, or Wisconsin, wherein a resident of this state may legally fulfill the state's compulsory attendance laws, which is not operated for profit, and which adheres to the provisions of the Civil Rights Act of 1964 and chapter 363. As used in this subdivision, "textbooks" shall mean and include books and other instructional materials and equipment used in elementary and secondary schools in teaching only those subjects legally and commonly taught in public elementary and secondary schools in this state and shall not include instructional books and materials used in the teaching of religious tenets, doctrines or worship, the purpose of which is to inculcate such tenets, doctrines or worship, nor shall it include such books or materials for, or transportation to, extracurricular activities including sporting events, musical or dramatic events, speech activities, driver's education, or programs of a similar nature."

[2] Both lower courts found that the statute permits deduction of a range of educational expenses. The District Court found that deductible expenses included:

"1. Tuition in the ordinary sense.

2. Tuition to public school students who attend public schools outside their residence school districts.

3. Certain summer school tuition.

4. Tuition charged by a school for slow learner private tutoring services.

5. Tuition for instruction provided by an elementary or secondary school to students who are physically unable to attend classes at such school.

6. Tuition charged by a private tutor or by a school that is not an elementary or secondary school if the instruction is acceptable for credit in an elementary or secondary school.

7. Montessori School tuition for grades K through 12.

8. Tuition for driver education when it is part of the school curriculum." 514 F. Supp., at 1000. The Court of Appeals concurred in this finding.

In addition, the District Court found that the statutory deduction for "texbooks" included not only "secular textbooks" but also:

"1. Cost of tennis shoes and sweatsuits for physical education.

2. Camera rental fees paid to the school for photography classes.

3. Ice skates rental fee paid to the school for calculators for mathematics classes.

5. Costs of home economics materials needed to meet minimum requirements.

6. Costs of special metal or wood needed to meet minimum requirements of shop classes.

7. Costs of supplies needed to meet minimum requirements of art classes.

8. Rental fees paid to the school for musical instruments.

9. Cost of pencils and special notebooks required for class." *Ibid.* The Court of Appeals accepted this finding.

[3] In *Lemon* v. *Kurtzman, supra*, the Court concluded that the state's reimbursement of nonpublic schools for the cost of teacher's salaries, textbooks, and instructional materials, and its payment of a salary supplement to teachers in nonpublic schools, resulted in excessive entanglement of church and state. In *Levitt* v. *Committee for Public Education, supra*, we struck down on Establishment Clause grounds a state program reimbursing nonpublic schools for the cost of teacher-prepared examinations. Finally, in *Meek* v. *Pittenger, supra*, and *Wolman* v. *Walter, supra*, we held unconstitutional a direct loan of instructional materials to nonpublic schools, while upholding the loan of textbooks to individual students.

[4] Section 290.09 contains no express statements of legislative purpose, and its legislative history offers few unambiguous indications of actual intent. The absence of such evidence does not affect our treatment of the statute.

[5] Deductions for charitable contributions, allowed by Minnesota law, Minn. Stat. § 290.21, include contributions to religious institutions, and exemptions from property tax for property used for charitable purposes under Minnesota law include property used for wholly religious purposes, Minn. Stat. § 272.02. In each case, it may be that religious institutions benefit very substantially from the allowance of such deductions. The Court's holding in *Walz* v. *Tax Commission*, 397 U.S. 664 (1970), indicates, however, that this does not require the conclusion that such provisions of a state's tax law violate the Establishment Clause.

[6] Our decision in *Nyquist* is not to the contrary on this point. We expressed considerable doubt there that the "tax benefits" provided by New York law properly could be regarded as parts of a genuine system of tax laws. Plainly, the outright grants to low-income parents did not take the form of ordinary tax benefits. As to the benefits provided to middle-income parents, the Court said:

"The amount of the deduction is unrelated to the amount of money actually expended by any parent on tuition, but is calculated on the basis of a formula contained in the statute. The formula is apparently the product of a legislative attempt to assure that each family would receive a carefully estimated net benefit, and that the tax benefit would be comparable to, and compatible with, the tuition grant for lower income families." Indeed, the question whether a program having the elements of a "genuine tax deduction" would be constitutionally acceptable was expressly reserved in *Nyquist, supra*, 413 U.S., at 790, n. 49. While the economic consequences of the program in *Nyquist* and that in this case may be difficult to distinguish, we have recognized on other occasions that "the form of the [state's assistance to parochial schools must be examined] for the light that it casts on the substance." *Lemon* v. *Kurtzman, supra*, 403 U.S., at 614. The fact that the Minnesota plan embodies a "genuine tax deduction" is thus of some relevance, especially given the traditional rule of deference accorded legislative classification in tax statutes.

[7] Likewise, in *Sloan* v. *Lemon*, 413 U.S. 825, 832 (1973), where we held that a Pennsylvania statute violated the First Amendment, we emphasized that "the State [had] singled out a class of its citizens for a special economic benefit." We also observed in *Widmar* that "empirical evidence that religious groups will dominate [the school's] open forum," —— U.S., at ——, might be relevant to analysis under the Establishment Clause. We address this below, pp. 12-13, *infra.*

[8] Our full statement was that:

"*Allen and Everson* differ from the present litigation in a second important respect. In both cases the class of beneficiaries included *all* schoolchildren, those in public as well as those in private schools. See also *Tilton* v. *Richardson, supra*, in which federal aid was made available to *all* institutions of higher learning, and *Walz* v. *Tax Comm'n, supra*, in which tax exemptions were accorded to *all* educational and charitable nonprofit institutions. . . . Because of the manner in which we have resolved the tuition grant issue, we need not decide whether the significantly religious character of the

statute's beneficiaries might differentiate the present cases from a case involving some form of public assistance (*e.g.*, scholarship) made available generally without regard to the sectarian-nonsectarian, or public-non-public nature of the institution benefited. . . . Thus our decision today does not compel . . . the conclusion that the educational assistance provisions of the "G.I. Bill," 38 U.S.C. § 1651, impermissibly advance religion in violation of the Establishment Clause." 413 U.S., at 782, n. 38. See also, *id.*, at 775.

[9] Petitioners cite a "Revenue Analysis" prepared in 1976 by the Minnesota Department of Revenue, which states that "Only those taxpayers having dependents in nonpublic elementary or secondary schools are affected by this law since tuition, transportation and textbook expenses for public school students are paid for by the school district." Pet. Br., at 38. We fail to see the significance of the report; it is no more than a capsule description of the tax deduction provision. As discussed below, and as the lower courts expressly found, the analysis is plainly mistaken, as a factual matter, regarding the effect of § 290.09(22). Moreover, several memoranda prepared by the Minnesota Department of Revenue in 1979—stating that a number of specific expenses may be deducted by parents with children in public school—clearly indicate that the summary discussion in the 1976 memorandum was not intended as any comprehensive or binding agency determination.

[10] Our conclusion is unaffected by the fact that § 290.09(22) permits deductions for amounts spent for textbooks and transportation as well as tuition. In *Everson* v. *Board of Education*, 330 U.S. 1 (1947), we approved a statute reimbursing parents of *all* schoolchildren for the costs of transporting their children to school. Doing so by means of a deduction, rather than a direct grant, only serves to make the state's action less objectionable. Likewise, in *Board of Education* v. *Allen*, 392 U.S. 236 (1968), we approved state loans of textbooks to *all* schoolchildren; although we disapproved, in *Meek* v. *Pittenger* and *Wolman* v. *Walter* direct loans of instructional materials to sectarian schools, we do not find those cases controlling. First, they involved assistance provided to the schools themselves, rather than tax benefits directed to individual parents, see pp. ——, *supra*. Moreover, we think that state assistance for the rental of calculators, see J. App., at A18, ice skates, *ibid.*, tennis shoes, *ibid.*, and the like, scarcely poses the type of dangers against which the Establishment Clause was intended to guard.

[11] No party to this litigation has urged that the Minnesota plan is invalid because it runs afoul of the rather elusive inquiry, subsumed under the third part of the *Lemon* test, whether the Minnesota statute partakes of the "divisive political potential" condemned in *Lemon*, *supra*, 403 U.S., at 622. The argument is advanced, however, by amicus National Committee for Public Education and Religious Liberty *et al.* This variation of the "entanglement" test has been interpreted differently in different cases. Compare *Lemon* v. *Kurtzman*, 403 U.S. 602, 622-625, with *id.*, at 665-666 (WHITE, J., dissenting); *Meek* v. *Pittinger*, *supra*, 421 U.S., at 359-62, with *id.*, at 374-379 (BRENNAN, J., dissenting). Since this aspect of the "entanglement" inquiry originated with *Lemon* v. *Kurtzman*, *supra*, and the Court's opinion there took pains to distinguish both *Everson* v. *Board of Education*, 330 U.S. 1 (1947), and *Board of Education* v. *Allen*, 392 U.S. 236 (1968), the Court in *Lemon* must have been referring to a phenomenon which, although present in that case, would have been absent in the two cases it distinguished.

The Court's language in *Lemon I* respecting political divisiveness was made in the context of Pennsylvania and Rhode Island statutes which provided for either direct payments of, or reimbursement of, a proportion of teachers' salaries in parochial schools. We think, in the light of the treatment of the point in later cases discussed above, the language must be regarded as confined to cases where direct financial subsidies are paid to parochial schools or to teachers in parochial schools.

[Supreme Court of the United States, No. 82-195]

VAN D. MUELLER AND JUNE NOYES, PETITIONER *v.* CLYDE E. ALLEN, JR., ET AL.

ON WRIT OF CERTIORARI TO THE UNITED STATES COURT OF APPEALS FOR THE EIGHTH CIRCUIT

(June 29, 1983)

Justice Marshall, with whom Justice Brennan, Justice Blackmun and Justice Stevens join, dissenting.

The Establishment Clause of the First Amendment prohibits a State from subsidizing religious education, whether it does so directly or indirectly. In my view, this principle of neutrality forbids not only the tax benefits struck down in *Committee for Public Education* v. *Nyquist*, 413 U.S. 756 (1973) , but any tax benefit, including the tax deduction at issue here, which subsidizes tuition payments to sectarian schools. I also believe that the establishment Clause prohibits the tax deductions that Minnesota authorizes for the cost of books and other instructional materials used for sectarian purposes.

I

The majority today does not question the continuing vitality of this Court's decision in *Nyquist*. That decision established that a State may not support religious education either through direct grants to parochial schools or through financial aid to parents of parochial school students. 413 U.S., at 780, 785-786. *Nyquist* also established that financial aid to parents of students attending parochial schools is no more permissible if it is provided in the form of a tax credit than if provided in the form of cash payments. *Id.*, at 789-791; see *ante* at 7-8, & n. 6. Notwithstanding these accepted principles, the Court today upholds a statute that provides a tax deduction for the tuition charged by religious schools. The Court concludes that the Minnesota statute is "vitally different" from the New York statute at issue in *Nyquist*. *Ante*, at 9. As demonstrated below, there is no significant difference between the two schemes. The Minnesota tax statute violates the Establishment Clause for precisely the same reason as the statute struck down in *Nyquist*: it has a direct and immediate effect of advancing religion.

A

In calculating their net income for state income tax purposes, Minnesota residents are permitted to deduct the cost of their children's tuition, subject to a ceiling of $500 or $700 per child. By taking this deduction, a taxpayer reduces his tax bill by a sum equal to the amount of tuition multiplied by his rate of tax. Although this tax benefit is available to any parents whose children attend schools which charge tuition, the vast majority of the taxpayers who are eligible to receive the benefit are parents whose children attend religious schools. In the 1978-1979 school year, 90,000 students were enrolled in nonpublic schools charging tuition; over 95% of those students attended sectarian schools. Although the statute also allows a deduction for the tuition expenses of children attending public schools, Minnesota public schools are generally prohibited by law from charging tuition. Minn. Stat. § 120.06. Public schools may assess tuition charges only for students accepted from outside the district. § 123.39, subd. 5. In the 1978-1979 school year, only 79 public school students fell into this category. The parents of the remaining 815,000 students who attended public schools were ineligible to receive this tax benefit.

Like the law involved in *Nyquist*, the Minnesota law can be said to serve a secular purpose: promoting pluralism and diversity among the State's public and nonpublic schools. But the Establishment Clause requires more than that legislation have a secular purpose. *Nyquist*, 413 U.S., at 773. "[T]he propriety of a legislature's purposes may not immunize from further scrutiny a law which . . . has a primary effect that advances religion." *Id.*, at 774.[1] Moreover, even if one "'primary' effect [is] to promote some legitimate end under the State's police power," the legislation is not "immune from further examination to ascertain whether it also has the direct and immediate effect of advancing religion." *Id.*, at 783-784, n. 39. See *e.g.*, *Wolman* v. *Walter*, 433 U.S. 229, 248-254 (1977); *Meek* v. *Pittenger*, 421 U.S. 349, 364-366 (1975).

As we recognized in *Nyquist*, direct government subsidization of parochial school tuition is impermissible because "the effect of the aid is unmistakably to provide desired financial support for nonpublic, sectarian institutions." *Id.*, at 783. "[A]id to the educational function of [parochial] schools . . . necessarily results in aid to the sectarian enterprise as a whole" because "[t]he very purpose of those schools is to provide an integrated secular and religious education." *Meek* v. *Pittenger*, 421 U.S., at 366. For this reason, aid to sectarian schools must be restricted to ensure that it may be not used to further the religious mission of those schools. See, *e.g.*, *Wolman* v. *Walter*, 433 U.S., at 250-251. While "services such as police and fire protection, sewage disposal, highways, and sidewalks," may be provided to parochial schools in common with other institutions, because this type of assistance is clearly "'marked off from the religious function'" of those schools, *Nyquist*, *supra*, at 781-782, quoting *Everson* v. *Board of Education*, 330 U.S. 1, 18 (1947), unrestricted financial assistance, such as grants for the maintenance and construction of parochial schools, may not be provided. *Nyquist*, *supra*, at 774-780. "In the absence of an effective means of guaranteeing that the state aid derived from public funds will be used exclusively for secular, neutral, and nonideological purposes, it is clear from our cases that direct aid in whatever form is invalid." *Id.*, at 783.

Indirect assistance in the form of financial aid to parents for tuition payments is similarly impermissible because it is not "subject to . . . restrictions" which "'guarantee the separation between secular and religious educational functions and . . . ensure that State financial aid supports only the former.'" *Id.*, at 783, quoting *Lemon* v. *Kurtzman*, 403 U.S. 602, 613 (1971). By ensuring that parents will be reimbursed for tuition payments they make, the Minnesota statute requires that taxpayers in general pay for the cost of parochial education and extends a financial "incentive to parents to send their children to sectarian schools." *Nyquist*, *supra*, at 786. As was true of the law struck down in *Nyquist*, "it is precisely the function of [Minnesota's] law to provide assistance to private schools, the great majority of which are sectarian. By reimbursing parents for a portion of their tuition bill, the State seeks to relieve their financial burdens sufficiently to assure that they continue to have the option to send their children to religion-oriented schools. And while the other purposes for that aid—to perpet-

Footnotes at the end of article.

uate a pluralistic educational environment and to protect the fiscal integrity of overburdened public schools—are certainly unexceptional, the effect of the aid is unmistakably to provide desired financial support for nonpublic sectarian institutions." *Id.*, at 783.

That parents receive a reduction of their tax liability, rather than a direct reimbursement, is of no greater significance here than it was in *Nyquist*. "[F]or purposes of determining whether such aid has the effect of advancing religion," it makes no difference whether the qualifying "parent receives an actual cash payment [or] is allowed to reduce . . . the sum he would otherwise be obligated to pay over to the State." *Id.*, at 790. It is equally irrelevant whether a reduction in taxes takes the form of a tax "credit," a tax "modification," or a tax "deduction." *Id.*, at 789–790. What is of controlling significance is not the form but the "substantive impact" of the financial aid. *Id.*, at 786. "[I]nsofar as such benefits render assistance to parents who send their children to *sectarian* schools, their purpose and inevitable effect are to aid and advance those religious institutions." *Nyquist, supra*, at 793 (emphasis added).

B

The majority attempts to distinguish *Nyquist* by pointing to two differences between the Minnesota tuition-assistance program and the program struck down in *Nyquist*. Neither of these distinctions can withstand scrutiny.

1

The majority first attempts to distinguish *Nyquist* on the ground that Minnesota makes all parents eligible to deduct up to $500 or $700 for each dependent, whereas the New York law allowed a deduction only for parents whose children attended nonpublic schools. Although Minnesota taxpayers who send their children to local public schools may not deduct tuition expenses because they incur none, they may deduct other expenses, such as the cost of gym clothes, pencils, and notebooks, which are shared by all parents of school-age children. This, in the majority's view, distinguishes the Minnesota scheme from the law at issue in *Nyquist*.

That the Minnesota statute makes some small benefit available to all parents cannot alter the fact that the most substantial benefit provided by the statute is available only to those parents who send their children to schools that charge tuition. It is simply undeniable that the single largest expense that may be deducted under the Minnesota statute is tuition. The statute is little more than a subsidy of tuition masquerading as a subsidy of general educational expenses. The other deductible expenses are *de minimis* in comparison to tuition expenses.

Contrary to the majority's suggestion, *ante*, at 12–13, the bulk of the tax benefits afforded by the Minnesota scheme are enjoyed by parents of parochial school children not because parents of public school children fail to claim deductions to which they are entitled, but because the latter are simply *unable* to claim the largest tax deduction that Minnesota authorizes.[2] Fewer than 100 of more than 900,000 school-age children in Minnesota attend public schools that charge a general tuition. Of the total number of taxpayers who are eligible for the tuition deduction, approximately 96 percent send their children to religious schools.[3] Parents who send their children to free public schools are simply ineligible to obtain the full benefit of the deduction except in the unlikely event that they buy $700 worth of pencils, notebooks, and bus rides for their school-age children. Yet parents who pay at least $700 in tuition to nonpublic, sectarian schools can claim the full deduction even if they incur no other educational expenses.

That this deduction has a primary effect of promoting religion can easily be determined without any resort to the type of "statistical evidence" that the majority fears would lead to constitutional uncertainty. *Ante*, at 13. The only factual inquiry necessary is the same as that employed in *Nyquist* and *Sloan* v. *Lemon*, 413 U.S. 825 (1973): whether the deduction permitted for tuition expenses primarily benefits those who send their children to religious schools. In *Nyquist* we unequivocally rejected any suggestion that, in determining the effect of a tax statute, this Court should look exclusively to what the statute on its face purports to do and ignore the actual operation of the challenged provision. In determining the effect of the New York statute, we emphasized that "virtually all" of the schools receiving direct grants for maintenance and repair were Roman Catholic schools, 413 U.S., at 774, that reimbursements were given to parents "who send their children to nonpublic schools, the bulk of which is concededly sectarian in orientation," *id.*, at 780, that "it is precisely the function of new York's law to provide assistance to private schools, the great majority of which are sectarian," *id.*, at 783, and that "tax reductions authorized by this law flow primarily to the parents of children attending sectarian, nonpublic schools." *Id.*, at 794. Similarly, in *Sloan* v. *Lemon*, 413 U.S., at 830, we considered important to our "consider[ation of] the new law's effect . . . [that] 'more than 90% of the children attending nonpublic schools in the Commonwealth of Pennsylvania are enrolled in schools that are controlled by religious institutions or that have the purpose of propagating and promoting religious faith.'"[4]

In this case, it is undisputed that well over 90% of the children attending tuition-charging schools in Minnesota are enrolled in sectarian schools. History and experience likewise instruct us that any generally available financial assistance for elementary and scondary school tuition expenses mainly will further religious education because the majority of the schools which charge tuition are sectarian. Cf. *Nyquist, supra*, at 785; *Lemon* v. *Kurzman*, 403 U.S., at 628–630 (Douglas, J., concurring). Because Minnesota, like every other State, is committed to providing free public education, tax assistance for tuition payments inevitably redounds to the benefit of nonpublic, sectarian schools and parents who send their children to those schools.

2

The majority also asserts that the Minnesota statute is distinguishable from the statute struck down in *Nyquist* in another respect: the tax benefit available under Minnesota law is a "genuine tax deduction," whereas the New York law provided a benefit which, while nominally a deduction, also had features of a "tax credit." *Ante*, at 7–8, and n. 6. Under the Minnesota law, the amount of the tax benefit varies directly with the amount of the expenditure. Under the New York law, the amount of deduction was not dependent upon the amount actually paid for tuition but was a predetermined amount which depended on the tax bracket of each taxpayer. The deduction was designed to yield roughly the same amount of tax "forgiveness" for each taxpayer.

This is a distinction without a difference. Our prior decisions have rejected the relevance of the majority's formalistic distinction between tax deductions and the tax benefit at issue in *Nyquist*. See *Byrne* v. *Public Funds for Public Schools*, 442 U.S. 907 (1979), aff'g, 590 F. 2d 514 (CA3); *Grit* v. *Wolman*, 413 U.S. 901 (1973), aff'g, 353 F. Supp. 744 (SD Ohio 1972).[5] The deduction afforded by Minnesota law was "designed to yield a [tax benefit] in exchange for performing a specific act which the State desires to encourage." *Nyquist, supra*, at 789. Like the tax benefit held impermissible in *Nyquist*, the tax deduction at issue here concededly was designed to "encourag[e] desirable expenditures for educational purposes." *Ante*, at 8. Of equal importance, as the majority also concedes, the "economic consequence" of these programs is the same, *ante*, at 8, n.6, for in each case the "financial assistance provided to parents ultimately has an economic effect comparable to that of aid given directly to the schools." *Ante*, at 10. See *Walz* v. *Tax Comm'n*, 397 U.S. 664, 699 (1970) (opinion of Harlan, J.). It was precisely the substantive impact of the financial support, and not its particular form, that rendered the programs in *Nyquist* and *Sloan* v. *Lemon* unconstitutional. See *Nyquist*, 413 U.S. at 790–791, 794; *Sloan* v. *Lemon*, 413 U.S., at 832.

C

The majority incorrectly asserts that Minnesota's tax deduction for tuition expenses "bears less resemblance to the arrangement struck down in *Nyquist* than it does to assistance programs upheld in our prior decisions and discussed with approval in *Nyquist.*" *Ante*, at 5. One might as well say that a tangerine bears less resemblance to an organge than to an apple. The two cases relied on by the majority, *Board of Education* v. *Allen*, 392 U.S. 236 (1968), and *Everson* v. *Board of Education*, 330 U.S. 1 (1947), are inapposite today for precisely the same reasons that they were inapposite in *Nyquist*.

We distinguished these cases in *Nyquist, supra*, at 781–782, and again in *Sloan* v. *Lemon*, 413 U.S., at 832. Financial assistance for tuition payments has a consequence that "is quite unlike the sort of 'indirect' and 'incidental' benefits that flowed to sectarian schools from programs aiding *all* parents by supply bus transportation and secular textbooks for their children. *Such benefits were carefully restricted to the purely secular side of church-affiliated institutions* and provided no special aid for those who had chosen to support religious schools. Yet such aid approached the 'verge' of the constitutionally impermissible." *Sloan* v. *Lemon, supra*, at 832 (emphasis added in part).

As previously noted, *supra*, at 6, the Minnesota tuition tax deduction is not available to *all* parents, but only to parents whose children attend schools that charge tuition, which are comprised almost entirely of sectarian schools. More importantly, the assistance that flows to parochial schools as a result of the tax benefit is not restricted, and cannot be restricted, to the secular functions of those schools.

II

In my view, Minnesota's tax deduction for the cost of textbooks and other instructional materials is also constitutionally infirm. The majority is simply mistaken in concluding that a tax deduction, unlike a tax credit

or a direct grant to parents, promotes religious education in a manner that is only "attenuated." *Ante*, at 11-12. A tax deduction has a primary effect that advances religion if it is provided to offset expenditures which are not restricted to the secular activities of parochial schools.

The instructional materials which are subsidized by the Minnesota tax deduction plainly may be used to inculcate religious values and belief. In *Meek* v. *Pittenger*, 421 U.S., at 366, we held that even the use of "wholly neutral, secular instructional material and equipment" by church-related schools contributes to religious instruction because "'[t]he secular education those schools provide goes hand in hand with the religious mission that is the only reason for the schools' existence.'" In *Wolman* v. *Walter*, 433 U.S., at 249-250, we concluded that precisely the same impermissible effect results when the instructional materials are loaned to the pupil or his parent, rather than directly to the schools. We stated that "it would exalt form over substance if this distinction were found to justify a result different from that in *Meek*." *Ibid.* It follows that a tax deduction to offset the cost of purchasing instructional materials for use in sectarian schools, like a loan of such materials to parents, "necessarily results in aid to the sectarian school enterprise as a whole" and is therefore a "substantial advancement of religious activity" that "constitutes an impermissible establishment of religion." *Ibid.*

There is no reason to treat Minnesota's tax deduction for textbooks any differently. Secular textbooks, like other secular instructional materials, contribute to the religious mission of the parochial schools that use those books. Although this Court upheld the loan of secular textbooks to religious schools in *Board of Education* v. *Allen*, *supra*, the Court believed at that time that it lacked sufficient experience to determine "based solely on judicial notice" that "the processes of secular and religious training are so intertwined that secular textbooks furnished to students by the public [will always be] instrumental in the teaching of religion." 392 U.S., at 248. This basis for distinguishing secular instructional materials and secular textbooks is simply untenable, and is inconsistent with many of our more recent decisions concerning state aid to parochial schools. See *Wolman* v. *Walter*, 433 U.S., at 257-258 (MARSHALL, J., concurring in part and dissenting in part); *id.*, at 264-266 (STEVENS, J., concurring in part and dissenting in part); *Meek* v. *Pittenger*, 421 U.S., at 378 (BRENNAN, J., concurring in part and dissenting in part).

In any event, the Court's assumption in *Allen* that the textbooks at issue there might be used only for secular education was based on the fact that those very books had been chosen by the State for use in the public schools. 392 U.S., at 244-245. In contrast, the Minnesota statute does not limit the tax deduction to those books which the State has approved for use in public schools. Rather, it permits a deduction for books that are chosen by the parochial schools themselves. Indeed, under the Minnesota statutory scheme, textbooks chosen by parochial schools but not used by public schools are likely to be precisely the ones purchased by parents for their children's use. Like the law upheld in *Board of Education* v. *Allen*, 392 U.S. 236 (1968), Minn. Stat. §§ 123.932 and 123.933 authorize the state board of education to provide textbooks used in public schools to nonpublic school students. Parents have little reason to purchase textbooks that can be borrowed under this provision.[6]

III

There can be little doubt that the State of Minnesota intended to provide, and has provided, "[s]ubstantial aid to the educational function of [church-related] schools," and that the tax deduction for tuition and other educational expenses "necessarily results in aid to the sectarian school enterprise as a whole." *Meek* v. *Pittenger*, 421 U.S. at 366. It is beside the point that the State may have legitimate secular reasons for providing such aid. In focusing upon the contributions made by church-related schools, the majority has lost sight of the issue before us in this case.

"The sole question is whether state aid to these schools can be squared with the dictates of the Religion Clauses. Under our system the choice has been made that government is to be entirely excluded from the area of religious instruction . . . The Constitution decrees that religion must be a private matter for the individual, the family, and the institutions of private choice, and that while some involvement and entanglement are inevitable, lines must be drawn." *Lemon* v. *Kurtzman*, 403 U.S. 602, 625 (1971).

In my view, the lines drawn in *Nyquist* were drawn on a reasoned basis with appropriate regard for the principles of neutrality embodied by the Establishment Clause. I do not believe that the same can be said of the lines drawn by the majority today. For the first time, the Court has upheld financial support for religious schools without any reason at all to assume that the support will be restricted to the secular functions of those schools and will not be used to support religious instruction. This result is flatly at odds with the fundamental principle that a State may provide no financial support whatsoever to promote religion. As the Court stated in *Everson*, 330 U.S., at 16, and has often repeated, see *e.g.*, *Meek* v. *Pittenger* 421 U.S., at 359; *Nyquist*, *supra*, at 780, "No tax in any amount, large or small, can be levied to support any religious activities or institutions, whatever they may be called, or whatever form they may adopt to teach or practice religion."

I dissent.

FOOTNOTES

[1] As we noted in *Nyquist*, it is "firmly established" that a statute may impermissibly advance religion "even though it does not aid one religion more than another but merely benefits all religions alike." 143 U.S., at 771. See, *e.g.*, *Wolman* v. *Walter*, 433 U.S. 229, 248-254 (1977); *Meek* v. *Pittenger*, 421 U.S. 349, 364-366 (1975).

[2] Even if the Minnesota statute allowed parents of public school students to deduct expenses that were likely to be equivalent to the tuition expenses of private school students, it would still be unconstitutional. Insofar as the Minnesota statute provides a deduction for parochial school tuition, it provides a benefit to parochial schools that furthers the religious mission of those schools. *Nyquist* makes clear that the State may not provide any financial assistance to parochial schools unless that assistance is limited to secular uses. 413 U.S., at 780-785.

[3] Indeed, in this respect the Minnesota statute has an even greater tendency to promote religious education than the New York statute struck down in *Nyquist*, since the percentage of private schools that are nonsectarian is far greater in New York than in Minnesota.

[4] Similarly, in *Meek* v. *Pittenger*, 421 U.S., at 363, we held "that the direct loan of instructional material and equipment has the unconstitutional primary effect of advancing religion because of the predominantly religious character of the schools benefiting from the Act." See *id.*, at 366. We relied on a finding that "of the 1,320 nonpublic schools in Pennsylvania that . . . qualify for aid under Act 195, more than 75% are church-related or religiously affiliated educational institutions." *Id.*, at 364. This could not possibly have been ascertained from the text of the facially neutral statute, but could only be determined on the basis of an "empirical inquiry." And in *Wolman* v. *Walter*, 433 U.S at 233, the Court relied on a stipulation that "during the 1974-1975 school year there were 720 chartered nonpublic schools in Ohio. Of these, all but 29 were sectarian. More than 96% of the nonpublic enrollment attended sectarian schools, and more than 92% attended Catholic schools."

[5] In *Byrne* v. *Public Funds for Public Schools*, 442 U.S. 907 (1979), aff'g, 590 F. 2d 514 (CA3), we summarily affirmed a decision striking down a program of tax deductions. The amount of deduction was fixed at $1,000 for each dependent attending a tuition-charging nonpublic school. This decision makes clear that the constitutionality of a tax benefit does not turn on whether the benefit is in the form of a deduction from gross income or a tax "credit."

In *Grit* v. *Wolman*, 413 U.S. 901 (1973) aff'g, 353 F. Supp. 744 (SD Ohio 1972), we summarily affirmed a decision invalidating a system of tax credits for nonpublic school parents in which the amount of the credit depended on the amount of tuition paid. This decision demonstrates that it is irrelevant whether the amount of a tax benefit is proportionate to the amount of tuition paid or is simply an arbitrary sum. The Court's affirmance of the result in each of these cases was a "decision on the merits, entitled to precedential weight." *Meek* v. *Pittenger*, 421 U.S., at 366-367.

The deduction at issue in this case does differ from the tax benefits in *Nyquist* and our other prior cases in one respect: by its very nature the deduction embodies an inherent limit on the extent to which a State may subsidize religious education. Unlike a tax credit, which may wholly subsidize the cost of religious education if the size of the credit is sufficiently large, or a tax deduction of an arbitrary sum, a deduction of tuition payments from adjusted gross income can never "provide a basis for . . . *complete subsidization of* . . . religious schools." *Nyquist*, *supra*, at 782, n. 38 (emphasis in original). See also *id.*, at 779, 787, n. 44. *Nyquist* made clear, however, that absolutely no subsidization is permissible unless it is restricted to the purely secular functions of those schools. See, *e.g.*, *id.*, at 777-779, 787-788.

[6] For similar reasons, I would hold that the deduction for transportation expenses is constitutional only insofar as it relates to the costs of traveling between home and school. See *Wolman* v. *Walter*, 433 U.S., at 252-255 (reimbursement of nonpublic schools for field trip transportation impermissibly fosters because the nonpublic schools control the timing, frequency, and destination of the trips, which, for sectarian schools, are an integral part of the sectarian education). I would therefore reverse the judgment of the Court of Appeals and remand for a determination whether the insignificant deductions that remain—*e.g.*, deductions for transportation between home and school and for pencils and notebooks—are severable from the other deductions.●

KINDER: KIDS IN NEED DESERVE EQUAL RIGHTS

● Mr. RIEGLE. Mr. President, last week the Senate Finance Committee held 2 days of hearings on S. 888, the Economic Equity Act, of which I am a cosponsor. The second day of hearings focused on the child support provisions of the bill. Several witnesses from my own State of Michigan came to testify in support of the bill. Patricia Kelly and Patricia Turner from my hometown of Flint, Mich., offered the members of the committee valuable insight into the severe limitations of child support enforcement provisions across the Nation. Michigan is a leader in the collection of child support dollars; 13 percent of all child support

dollars in the Nation are collected in Michigan. Nevertheless, Ms. Turner and Ms. Kelly, cofounders of KINDER—Kids in Need Deserve Equal Rights—argue that national leadership in this area is necessary to prevent increasing numbers of women and children from moving into poverty and the welfare system.

I commend to the attention of the Senate the informative testimony of Patricia Kelly and Patricia Turner of KINDER, a national organization based in Flint, Mich., committed to increasing the effectiveness of the child support system and ask that it appear in the RECORD.

The testimony follows:

TESTIMONY BY PATRICIA KELLY

Gentlemen, my name is Patricia Kelly. I am Co-founder and President of KINDER, (Kids In Need Deserve Equal Rights), a national organization based in Michigan comprised of parents and citizens united to seek improvements in the family law system as it pertains to children. I am also a welfare mother, a fact of which I am not proud, but I'm sure you'll agree by appearance I'm not what most people envision a typical welfare mother to look like, I am though sadly enough all too typical.

Before I was divorced 3½ years ago, my husband, our three young children and I lived a typically middle class existence in the suburbs. My husband's income was nearly $50,000 per year. I did not work outside the home during the seven years of our marriage, but rather choose to devote myself to raising our children. Within weeks of filing for divorce it became necessary for the children and I to move to an inner-city housing project and apply for AFDC. My husband refused to pay child support even though he was a working General Motors employee.

The road to recovery for women like myself and their children is long and in many cases endless. Today my ex-husband owes nearly $12,000 in back child support, has quit his job, is successfully evading his financial responsibility to our children, and expects the government to support them. Even though I have a part-time job in broadcasting, my income potential is limited and I will most likely require some sort of government aid for the next ten years until my youngest son graduates from high school.

For millions of women like myself child support is the lifeline enabling us to be self-supporting and productive. The extremely high costs of housing, food, clothing, utilities and child care along with the fact that many women have few job skills and choose the traditional role of mother and housewife first, results in female heads of households and their children becoming poverty stricken after divorce.

Although America claims to be a child-oriented society the statistics tend to prove otherwise. Currently one out of five American children is being supported through social programs. One-quarter to one-third of the absent fathers never pay a dime in child support, and some government officials estimate that only one out of ten absent fathers pays on time in full. The county in Michigan where I live, Genesee, has been lauded as one of the best in the area of child support collection nationwide. Michigan comprises 4 percent of the American population and collects at least 13 percent of all child support dollars collected nationally. Although rated among the best, the county in which I live only collects on the average $600 per year per child which breaks down to a scant $11 per week and only $1.65 per day. Obviously, if a custodial mother of three is lucky enough to collect the average $600 per child annually she will have to be generating more than four times as much through employment to reach the poverty level.

My personal experience with the child support enforcement system and my additional knowledge through dealing with KINDER members nationally is that the current child support enforcement system encourages welfare dependence. Working mothers not on AFDC find very little help in collecting child support while women on welfare see stepped up enforcement. The federal government offers many financial incentives to each state to encourage offsetting welfare costs but offers few to encourage non-AFDC collections. This policy literally forces millions of women and children onto welfare and "Uncle Sam" becomes the child supporter unnecessarily. In many cases if child support payments were received regularly the family would not even qualify for government aid. The discrimination in collections is further proven by the tax intercept program. Last year millions of dollars were successfully collected through the attachment of tax refund checks, but again only to offset welfare costs, not for the non-AFDC families. The first step toward improving the child support collection system is to insure equal enforcement of all court support orders. It is strictly a matter of dollars and "sense"—the costs of mandatory wage assignments, tax-intercepts, and administrative overhead will be much less taxing than supporting the family through AFDC, food stamps and Medicaid.

I strongly encourage the passage of Title V of S. 888. If America's children are to be its future we have to provide a stable environment for every child. Title V of S. 888 will begin to rectify the frightening trend where the federal government is the child supporter and re-direct the financial responsibility of child rearing where it has always belonged, with the natural parents.

TESTIMONY BY PATRICIA TURNER

Senators, I am Patricia Russell Turner, co-founder of KINDER—Kids In Need Deserve Equal Rights, an advocacy group of parents and concerned citizens united to improve the enforcement of court orders related to child support, visitation and custody. KINDER has members across the country, the majority of whom are custodial mothers who are not receiving their court-ordered child support payments.

In March of this year the ABC news program "20/20" featured a segment on child support problems entitled "Daddy, Can You Spare A Dime?" Following, the broadcast, viewers were invited to call an 800 toll-free number as KINDER volunteers conducted a nationwide call-in survey. Responses from nearly 3,000 custodial and non-custodial parents in 48 states pinpointed severe problem areas in child support enforcement. In one week's time an estimated 80,000 people from across the country attempted to contact us, as supported by information supplied by AT&T. Clearly, child support enforcement is an enormous problem and parents are searching desperately for answers.

These parents are trying to deal with an antiquated system which has been to this point a low priority in many jurisdictions. As more divorce and paternity cases flood already overcrowded courtrooms each day, the system becomes less capable of enforcing order, leaving many parents powerless to collect child support payments. Arrearages continue to accumulate into thousands and thousands of dollars and nothing is done.

Fifty-one percent of survey respondents reported that they had been on AFDC at one time or another since their divorce. Of these, two-thirds had applied for welfare because of lack of child support. Eighteen percent of the respondents are currently AFDC recipients. Of these, 90 percent had applied because of nonpayment of support. Two-thirds of the AFDC respondents stated that they were capable and willing to work, had a plan for child care and would be off the welfare rolls if their child support was received.

The majority of callers were non-ADC mothers. Non-payment of support leaves them in a precarious situation. Working custodial mothers can walk a tightrope between self-sufficiency and poverty. For many of them, child support payments are needed to pay for child care while the mother is working to support the family. If she does not receive the payments, child care and work expenses can place the family on the borderline of the poverty level. After many futile attempts to collect, many women cannot afford attorneys and give up, oftentimes reverting to AFDC dependence. To the working woman, the collection system can appear indifferent to her family's struggle to survive financially. In many locations selective enforcement is practiced with welfare dependence acting as a trigger mechanism for stepped-up enforcement, due to financial incentives to collect on these cases. Millions of American families are trapped in this "Catch-22" situation.

All these problems are compounded when they involve intercounty or interstate enforcement. There is a disturbing lack of uniformity in determining the amount of support, in considering continued medical coverage for the children, in prioritizing enforcement efforts and in methods used to collect, from county to county, from state to state. No county or state in the country collects even 50 percent of its court-ordered support.

A full 94 percent of survey participants reported that they did not receive child support on a regular basis. Hundreds of them have contacted KINDER since the "20/20" broadcast in hopes that something could be done for their children. It is on behalf of all these children that I urge your consideration today.

The child support system in this country is not working. Why? Because this problem has been swept under the rug for far too long. Because the current weak and inadequate system fosters parental irresponsibility. Because selective enforcement of AFDC cases can backfire by indirectly discouraging working women who seek to remain in the workforce to support their families. Because the majority of court support orders in this country aren't enforced effectively, if at all.

Passage of Title V of S. 888 would establish the federal government, the largest employer in the world, as a model employer by providing for automatic wage assignments upon issuance of a court order for support. It would provide definitive guidelines for the Title IV-D program, which is currently mired in the ambiguity of protecting all children according to the law, and yet held

accountable for performance by an AFDC scorecard. It would provide mandates for the states to follow, which would provide some measure of uniformity and begin to rectify the staggering problem of interstate enforcement.

I see Title V of S. 888 as a very positive and long-overdue measure for millions of American families, for the American taxpayers, who have spent billions of dollars on welfare programs when able-bodied parents refuse to support their children, and for the future welfare of America.●

HONORING MSGR. BELA VARGA

● Mr. D'AMATO. Mr. President, it is my pleasure to honor today, Msgr. Bela Varga as he celebrates his 80th birthday. Monsignor Varga's accomplishments in helping countless refugees during World War II should not be forgotten today by the free world.

In the Hungarian village of Balatonboglar, 50,000 Polish soldiers and civilians fleeing the Nazis and later the Soviets, as well as 2,200 French soldiers escaping from Nazi prison camps, found a brave and resourceful friend in Msgr. Bela Varga, whose Church of the Sacred Cross became the center and haven of refugee relief for these hapless victims many of these refugees got away to fight again. Others, especially imperiled Jews, got forged documents from Monsignor Varga that enabled them to settle in Hungary.

Monsignor Varga was first elected to the Hungarian Parliament in 1939 as a member of the liberal Smallholders Party. During the war he participated in the resistance against the Nazis and spent a brief time in prison.

In Soviet-occupied Hungary's only free election, in 1945, the Smallholders Party won a resounding majority and later installed Monsignor Varga as Speaker of Parliament. But political liberty in Hungary was short-lived. In 1947, he fled to Vienna and was airlifted to freedom.

As ranking member of Hungary's last freely elected Parliament, Monsignor Varga came to the United States and rallied other Hungarian exiles to share in his freedom.

The French Government has also honored Monsignor Varga in the past by decorating him with France's Legion of Honor, in rememberance of the refugees he saved.

Over the years he has prayed that his country would not be forgotten by the free world. And so on his 80th birthday I see this as a fitting occasion to commemorate those who suffer for freedom in Hungary today and especially to honor the man who made freedom possible for many, and continues to be a pillar of hope to Hungarians everywhere.

VOICE OF DEMOCRACY WINNER

● Mr. HUDDLESTON. Mr. President, every year thousands of American young people make their voices heard through essays entered in the Veterans of Foreign Wars' "Voice of Democracy" contest. This year's winners again provide us outstanding examples of the fine quality of our youth today. I am particularly proud that one of the winners was one of Kentucky's own. Miss Kathryn McKee of Cynthiana placed third in the nationwide contest with her essay on this year's topic, "Youth, America's Strength."

I would like to take this opportunity to commend the VFW for sponsoring this fine competition, which year after year gives young Americans a chance to show just how much they care about our great democracy, and at the same time demonstrate to all of us their unique talents for written and oral expression. I am particularly impressed by the lyrical and poetic qualities of Miss McKee's essay. The others, I am sure, reflect similar care and creativity. To Miss McKee and all the winners, to the national VFW and all the local posts, to all those who entered the competition and those who assist in the effort to educate and nurture our youth, let us offer our many thanks and our highest commendations!

I ask that Kathryn's essay be reprinted at this point in the RECORD.

The essay follows:

YOUTH-AMERICA'S STRENGTH

Your old men will dream dreams and your young men will see visions . . . are words of wisdom found recorded in the Bible. Dreams and visions are much the same thing as they culminate, without the barriers of age, into hope for the future.

America's eternal circle of strength is found not in the material comforts we enjoy, but in the people who compose the greatest democracy ever created. The people of my generation are America's youth and we are a part of the never-ending circle which upholds American ideals, and we can be America's strength, but first we are our country's hope. The hope for citizens to defend her, to respect here, and to improve her. We are the hope for the strength of the future.

I am young and I am overflowing with a vigorous ambition to tackle age old difficulties whose solutions have eluded the wisest of preceding generations. Because of my youth, I am naive and cannot understand the complexities of America's difficulties. Likewise, I am unable to fathom the depth of my good fortune in natural citizenship.

It will be a long time before I can comprehend. First I must join the marching ranks of young soldiers and sailors, doctors and nurses, pilots and prisoners of war who defend our heritage of freedom.

I must join the parade of businessmen and executives who shape our economic destiny. I must walk with ambassadors and missionaries who proclaim the hope for peace and the desire for stability worldwide.

I must be the representatives and the senators, the Cabinet members and spokesmen, and the Presidents who mold America's destiny and exhibit the fruit of her hope.

But not yet. Now I am the student who learns how to express her wish for tomorrow and touch her elusive vision. I cannot be strong yet. I cannot shoulder a burden I have yet to understand—but I can learn. I need to be nurtured and protected so I can learn how to defend. And then I can understand.

Do not depend on me too much America. I cannot carry the load alone and I know you will not expect me to do so. I must drink of Ponce de Leon's mythical fountain of youth and mature into the hope and strength of tomorrow.

Because youthfulness is as much an attitude as an age group, America's real strength lies in the undaunted flexibility of her people that allows us all to be eternally young and forever fortified.

The sage advice found in the book of Timothy, "Despise not the days of your youth" must be the pattern followed by today's young people. We must cherish the time of our development rather than press for an irresponsible maturity. We must be patient and we must ask America to believe in us. And then—the hope which we have envisioned must blossom into a tangible element of an eternal circle of strength.

ALASKA STATEHOOD DAY

● Mr. MURKOWSKI. Mr. President, tomorrow marks the 25th anniverary of passage of the Alaska Statehood Act by the Senate. In the quarter century since that day both Alaska and the Union have benefited in many ways from their association.

Mr. President, this past Monday President Reagan signed Senate Joint Resolution 42, honoring the silver anniversary of Alaska statehood and naming January 3, 1984 "Alaska Statehood". I ask that the President's statement on that occasion be inserted in the RECORD at this point, along with the text of Senate Joint Resolution 42.

I would like to take this opportunity to thank Becky Gernhardt of Senator STEVENS' staff, Jim Lexo of Congressman YOUNG's staff, and Mary McGuire of my own staff, for their effort in the passage of Senate Joint Resolution 42, and for their enthusiastic help in preparing for the celebration of Alaska Statehood Day.

The President's statement follows:

STATEMENT BY THE PRESIDENT

I'm delighted today to take the first step toward what will be for all Americans a proud and joyous moment: the celebration of the 25th anniversary of Alaska's statehood. Alaska was admitted to the Union on January 3, 1959; then, as now, Alaska was a treasure house of natural resources and a State of undisturbed vistas and incomparable beauty.

In many ways, the story of Alaska and her people is America's story, the struggle of courageous men and women with a wild and bounteous frontier. Today the State of Alaska reminds us of this rich heritage and our own continuing efforts toward developing a Nation while seeking to preserve its irreplaceable beauty and resources.

The resolution which I am signing speaks of Alaska's material wealth. It notes that Alaska provides one-eighth of the Nation's gold, one-fifth of its oil production and two-fifths of its harvested fish. Alaska possesses ten of the sixteen vital materials needed for the Nation's security and all of this has resulted in the national treasury collecting $3

for every $1 of Federal money that is spent in this rich and vital State.

As the resolution notes, the United States has reaped economic rewards from Alaska many times greater than its original $7 million investment. But Alaska's contribution to our Nation goes far beyond this. All Americans benefit from the commitment and courage, the vitality and frontier spirit of the people of Alaska. Alaskans and Alaska remain an inspiration to all Americans and a reminder of the richness, diversity, and beauty of America's heritage.

Today, with the sponsors of this resolution, Senators Stevens and Murkowski and Congressman Young, I call on all Americans and all levels of government to join with me in celebrating Alaska Statehood Day with appropriate ceremonies and recognition.

(The President signed S.J. Res. 42, in the presence of the Alaska Delegation, designating January 4, 1984 as the 25th Anniversary of Alaska's Statehood.)

S.J. RES. 42

Whereas July 7, 1983, marks the twenty-fifth anniversary of enactment of the Alaska Statehood Act as approved by the United States Congress and signed by President Dwight D. Eisenhower;

Whereas the Alaska Statehood Act authorizes the entry of Alaska into the Union on January 3, 1959;

Whereas the State of Alaska is still growing and developing based on the principle established by the Alaska Statehood Act;

Whereas the Alaska Statehood Act is the foundation of the union between the State of Alaska and the United States of America which has been to the benefit of both parties;

Whereas many commitments between Alaska and the Federal Government are still being fulfilled;

Whereas the State of Alaska is a storehouse of this Nation's natural resources;

Whereas Alaska provides one-eighth of the Nation's gold; one-fifth of the Nation's oil production; and two-fifths of its harvested fish all to the benefit to the Union;

Whereas Alaska possesses ten of the sixteen strategic minerals needed for our Nation's security;

Whereas the Federal Government collects $3 in taxes from Alaska for every $1 it spends there;

Whereas the United States has reaped economic rewards from Alaska many times greater than its original $7,000,000 investment;

Whereas the people of Alaska contribute to the cultural diversity and cultural resources of this Nation; and

Whereas the Alaska Statehood Act authorized Alaska's entry into the United States of America and provided the basis for these benefits shared by Alaska and the Union: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That January 3, 1984, be known as "Alaska Statehood Day" in honor of the silver anniversary of the entry of Alaska into the Union. The President is requested and authorized to issue a proclamation calling upon the people of the United States; and the Federal, State, and local governments to observe "Alaska Statehood Day" with the appropriate ceremonies and recognition.●

SOLVENCY OF THE RAILROAD RETIREMENT SYSTEM

● Mr. MITCHELL. Mr. President, I rise to bring to the attention of my colleagues a joint resolution adopted by the Maine Legislature expressing the need for prompt congressional action to insure the solvency of the railroad retirement system.

In 1981, Congress rescued the railroad retirement system from bankruptcy by enacting a compromise funding plan that was expected to keep the system solvent for the next 10 years. However, the system is near collapse once again because of the recession which has caused a sharp, unexpected loss of jobs in the railroad industry and a drop in payroll tax revenues during the last 2 years. The problem has been exacerbated by the increased number of claims for railroad unemployment benefits, some of which have had to be drawn from the retirement system. If Congress does not take remedial action, pension benefits to retirees will be cut 40 percent this fall and more in the fall of 1984.

Fortunately, rail labor and management have devised a compromise plan to rescue the retirement system. That plan, embodied in H.R. 1646 and S. 1074, would foster solvency by changing benefits, increasing payroll taxes and providing for certain borrowing provisions.

H.R. 1646 has been reported by the House Energy and Commerce Committee and recently ordered reported by the House Ways and Means Committee. However, no action has been taken in the Senate yet other than hearings conducted by the Senate Committee on Labor and Human Resources.

Mr. President, the leadership of both houses of the Maine Legislature has acknowledged the dependency of beneficiaries on the railroad retirement system and the critical need for corrective action to stave off bankruptcy. I commend their expression of concern to my colleagues in the Senate and urge them to act expeditiously on the compromise funding plan.

Mr. President, I ask that the resolution be printed in the RECORD at this point.

The resolution follows:

JOINT RESOLUTION MEMORIALIZING THE MAINE CONGRESSIONAL DELEGATION TO SUPPORT THE RAILROAD RETIREMENT SOLVENCY ACT OF 1983

We, your Memorialists, the Senate and House of Representatives of the State of Maine in the First Regular Session of the One Hundred and Eleventh Legislature, now assembled, most respectfully present and petition the Maine Congressional Delegation as follows:

Whereas, many residents of the State of Maine are currently engaged in railroad employment or have engaged in such employment in the past and look to the railroad retirement system to provide benefits when they retire; and

Whereas, many residents of the State of Maine are currently receiving benefits under the railroad retirement system and rely on such benefits to a large extent to meet the normal costs of living; and

Whereas, any reduction in the amount of benefits received by beneficiaries under the railroad retirement system would have a drastic affect on the ability of these beneficiaries to meet normal living expenses; and

Whereas, projections of the financial condition of the railroad retirement system show that unless corrective action is taken, monthly annuities will have to be reduced significantly beginning with the annuity checks to be sent out October 1, 1983, with additional reductions required in the future; and

Whereas, House Resolution 1646, the Railroad Retirement Solvency Act of 1983, was introduced in the United States House of Representatives on February 24, 1983, by Mr. Florio; and

Whereas, House Resolution 1646 would resolve the short-term and long-term financial problems of the railroad retirement system, through an evenhanded approach of tax increases on railroad employers and employees and adjustments of benefits to current and future beneficiaries, thereby preserving and protecting the rights and expectations of those currently receiving benefits and those who would receive such benefits in the future; now, therefore, be it

Resolved: That We, your Memorialists, respectfully urge that the members of Congress representing the State of Maine should actively support and vote favorably on House Resolution 1646, the Railroad Retirement Solvency Act of 1983; and be it further

Resolved: That suitable copies of this resolution be transmitted immediately to the members of the Maine Congressional Delegation.●

THE L-REACTOR AT THE SAVANNAH RIVER PLANT, AIKEN, S.C.

● Mr. MATTINGLY. Mr. President, a short while ago, the junior Senator from South Carolina (Mr. HOLLINGS), inserted for the RECORD his interpretation of my amendment to the Energy and Water Development Appropriations Act of 1984 relating to the restart of the L-reactor at the Savannah River Plant, Aiken, S.C.

I simply want to take this opportunity to say that my amendment is clear and distinct in intent and purpose. It mandates the Department of Energy to successfully complete an environmental impact statement and then to live up to its commitment to the State of South Carolina to conduct studies and mitigate thermal effects upon issuance of a discharge permit. It should not be construed to either enlarge or diminish the rights of South Carolina in dealing with DOE and issuance of discharge permits in regard to the L-reactor.●

S. 1434, INTERSPOUSAL INDIVIDUAL RETIREMENT ACCOUNT

● Mr. D'AMATO. Mr. President, on June 3, 1983, I introduced legislation, S. 1434, to establish an interspousal individual retirement account (IRA) or $2,250 regardless of the lesser earning spouse's income.

Under current law, a married couple with only one working spouse may establish an IRA for up to $2,250. But if that spouse earns less than $250, the maximum interspousal IRA is only $2,000 plus the income of the lesser earning spouse. For instance, if a housewife earns $50, the maximum interspousal IRA cannot exceed $2,050. Thus, an incentive has been created for individuals to either not accept earned income or cheat on their tax returns. My bill rectifies this situation by raising the maximum interspousal IRA to $2,250 regardless of the income of the lesser earning spouse.

While this issue may appear to be a rather minor point, I recently received a letter from one of my constituents that demonstrates the need for passage of S. 1434. Mr. Harold W. Wilder wrote me about his wife, Barbara, who earns $100 per year as an election inspector. Because of her earnings, the Wilders were only permitted to contribute $2,100 to their IRA. If, however, Mrs. Wilder had no income, the Wilders could have established an IRA for $2,250. Mrs. Wilder has, therefore, been placed in the awkward position of being penalized for serving the community. This situation should not be allowed to continue uncorrected.

Mr. President, I ask that this letter be printed in the RECORD in its entirety.

The letter follows:

CANTON FEDERAL
SAVINGS & LOAN ASSOCIATION,
Canton, N.Y., June 21, 1983.

Hon. ALFONSE M. D'AMATO,
Hart Office Building,
Washington, D.C.

DEAR SENATOR D'AMATO: Just learned of your bill—S. 1434—to provide that a spouse having compensation shall not be disqualified from having a spousal individual retirement account. You have my wholehearted endorsement!

This is something that has bothered my wife and I for sometime now. My wife's only income is approximately $100 per year as an election inspector, which means she can't take advantage of the spousal IRA. She's thought of resigning as an inspector, but feels this is one of her civic duties. It puts her in a real quandary.

Thank you for your attempt at rectifying a glaring oversight in the original legislation.

Sincerely yours,

HAROLD W. WILDER,
President.●

THE TELECOMMUNICATIONS ACT OF 1983

● Mr. BINGAMAN. Mr. President, I reached my decision to vote for S. 66 after hearing from the many interests in my State who were deeply concerned about this bill and its impact on their businesses and the public.

The cable industry is just now starting to grow to a mature part of the many telecommunications delivery systems. S. 66 provides the needed incentives for these companies to take their place in the market.

PUBLIC ACCESS

Some concerns have been voiced to me that there were basic concerns that S. 66 will jeopardize cable television as a community resource; some fear cable will not be open to citizens, consumers, educators, librarians and community groups. I recognize the importance of these questions and carefully evaluated the protections provided. Senator LAUTENBERG's amendment, which was incorporated into the bill reported to the Senate, responds to this concern. The amendment provides that franchising authorities negotiate access to educational as well as governmental users. Moreover, it would certainly seem to be in the best interest of the cable system to see this access is maintained as part of its service to its community.

RATE REGULATION

In the area of rate regulation, the cable owners would be guaranteed a rate increase tied to the regional consumer price index. This section of the bill will discourage any attempt by the cable franchise to raise rates to unreasonable levels.

FRANCHISE RENEWALS

The bill provides the cities and the cable companies a fair treatment without crippling reasonable regulatory oversight. S. 66 provides that judicial review is de novo only when a fair and adequate hearing is not provided by the franchising authority.

ABROGATION OF CONTRACTUAL DUTIES

In my view, the bill as passed provides enough flexibility to revise the terms of the cable operators' contracts under the "significant change in circumstances" portion. There is also a strong presumption in favor of freely accepted contractual obligations. The terms of the contract will be a product of negotiations between the two parties.

TELEPHONE RATES AND UNIVERSAL SERVICE (ABDNOR AMENDMENTS)

Finally, one of the major concerns about this bill was with the potential impact on telephone rates. In my home State of New Mexico, the data business is in its infancy. If you pull away the data revenues of our Bell operating company, it could cause a substantial rate increase for business, residential and rural customers. This was an area which the bill did not address to my satisfaction. I voted for an amendment offered by Senator ABDNOR which affirmed the importance of universal service because I feel it is important that telephone rate increases be kept to a minimum. I supported a second amendment, which was not adopted, which would have placed data companies under State public utility commission regulation. I believed this would provide additional protection for telephone ratepayers.

I voted for S. 66 because I believe that deregulation is necessary in order to promote competition in the marketplace. I will keep a close eye on the cable industry to see that the provisions of the bill are carried out according to the spirit and intent of Congress.●

CHEMICAL WAR

● Mr. QUAYLE. Mr. President, in recent weeks there has been a new surge of interest in the question of whether or not the Soviet Union and their surrogates, Vietnam and Laos, are using chemical and toxin weapons.

Quite frankly Mr. President, I am getting tired of reading reports that continue to cast doubt that these heinous weapons are being used. Anyone who does a thorough investigation of the evidence that exists can come to only one conclusion: deadly chemical and toxin weapons are being used. They are being used against innocent people in Afghanistan, Laos, and Cambodia in violation of these people's basic human rights, international law, the 1925 Geneva Protocol and the 1972 Biological and Toxin Weapons Convention.

What disturbs me the most is the fact that those who still are unsure whether these weapons of terror are being used seem to completely ignore the fact that men, women, and children have died. These naysayers want scientific proof that chemicals and toxins are being used. Yet even when they have proof that mycotoxins exist in samples of "yellow rain," they do all they can to refute the evidence. They would rather theorize and sit back as academicians or scientists and study the question some more. Meanwhile, defenseless and innocent people are dying or literally being gassed from their homeland.

The U.S. Government is right in being outspoken in condemning the Soviet Union, Laos, and Vietnam for using chemical and toxin weapons. It would have been unconscionable for us as a nation to stand quietly by while knowing thousands were dying, suffering or being driven from their villages by these outlawed weapons.

No matter how much proof we have, there will always be some who will not be satisfied. That is their right as citizens in this country of ours. But, before they try to discredit the governments charges, they should consider all the evidence, including: biological samples which contained toxins, in-

telligence reports, radio intercepts, refugee reports, medical and doctors' reports, observations of refugee workers and journalists findings. The available information and intelligence reports show without a doubt that these weapons have been used.

Mr. President, this weekend's feature article in Parade magazine titled "How the Soviets Use Chemicals to Wage War," is one of the best pieces to date on the subject.

Al Santoli writes from first hand knowledge on this issue, as he recently spent a month in Thailand investigating the use of chemical and toxin weapons. Shortly after he returned, I had an opportunity to talk with him. He impressed me with his knowledge of the subject, but more importantly, he impressed me with his concern for the innocent people who are the victims of these attacks.

Santoli's article ends with a compelling quote from a 25-year-old Hmong resistance fighter who told him, "If the Communists keep using this gas on the fields, the forests, the water and the villages, the Hmong people will no longer have any life left."

We cannot hide our eyes to the fact that these weapons are being used. We in this Chamber and others in Government service must continue to raise this issue whenever possible. The world must be made to understand the death, terror and suffering that is being rained on the people of Afghanistan, Laos, and Cambodia.

Al Santoli is to be commended for his excellent article, and I highly recommend it to my fellow Senators. I ask that it be reprinted in the RECORD.

The article follows:

[From Parade magazine, June 26, 1983]

HOW THE SOVIETS USE CHEMICALS TO WAGE WAR

(By Al Santoli)

The PHU BIA Mountains of Laos are greenest in November. The long winter monsoon rains have ended and wildflowers are abundant in the rugged foothills. Lee Mai, a 25-year-old schoolteacher in the village of Moung Hong, was walking in a neighbor's field when he saw the helicopters come again.

He watched in horror as the metal birds circled above the community of 300 wooden and grass thatch houses. Startled parents tried to grab their screaming children and run for cover as exploding clouds of red smoke and a musty yellow rain descended from the sky. Those covered by the wet, sticky substance began spinning wildly in uncontrollable seizures, gasping for breath, blood sputting from their noses and mouths as they died.

Two years later, November 1982, across the Phu Bia range in the village of Nong Ching, 13-year-old Mai Lor was on harvest vacation from school. Early in the morning, as she was walking to begin work in her father's rice field, she saw an airplane spray the mysterious yellow substance. After cautiously waiting a few hours, Mai entered the field. She became dizzy and nauseous; her skin turned itchy and began to blister. For a week after the attack, Mai's entire family was bedridden with fever, nausea, diarrhea and burning eyes. Neighbors who had been directly sprayed died a violent death, blood pouring from every opening in their bodies.

The Lor family learned that neighboring villages, inhabited by Hmong tribespeople—many of whom had been America's allies in the war against the Vietnamese invaders and their Pathet Lao surrogates—had experienced "yellow rain" attacks in recent months, suffering many deaths. In January 1983, the Lor family tearfully made their last visit to the Nong Ching community church and joined their neighbors in a dangerous two-week walk to seek refuge across the Mekong River in Thailand.

In 1975, the Hmong population numbered 400,000 out of a total population of 3 million Laotians. Today, it is estimated at less than 75,000. Most have been killed or driven out by starvation or lethal chemical attacks. Dr. Khamsenkeo Sengstith, former bureau director of the Laotian Communists' ministry of health, defected to Peking in 1981. He states: "The Vietnamese use chemical weapons in the air and on the ground, killing thousands upon thousands of people."

American and Thai intelligence have monitored Soviet radio transmissions inside Laos regarding shipments of chemical weapons to the Phu Bia region and a Soviet general inspecting chemical munitions depots. The Laotian Air Force is run by 500 Soviet advisers. A Laotian pilot who defected in 1979 gave a detailed description of the chemical warfare missions he flew and the overall Soviet-Vietnamese program being waged against the Hmong. His accounts were verified by previous civilian refugee and resistance-fighter testimonies and satellite photographs. The pilot said this program is named "Extinct Destruction Operations" and is intended "to wipe out the Hmong people."

In 1963, reports of chemical-biological warfare (CBW) came out of Yemen. Since then, they have come from remote mountain regions in Laos, Cambodia, Vietnam and Afghanistan. Thousands of terrified homeless people have told the same story and have shown the same horrifying medical symptoms. Soviet military manuals explain the operational use of these weapons. Soviet bloc defectors testify to their use. Physicians document and treat countless victims. Yet world governing and scientific tribunals remain paralyzed and refuse to acknowledge the use of these weapons because they fear a new chemical arms race and are intimidated by the implications of underlying Soviet intentions.

Dr. B. A. Zikria, professor of surgery at Columbia University College of Physicians and Surgeons and a pulmonary specialist, has worked inside Afghanistan, caring for Mujahidin resistance fighters and civilians. In Baluchistan, he found a large number of people suffering from a mysterious variety of symptoms including chronic nosebleeds, nausea, shortness of breath, nervous tremours and skin lesions. All the victims described being attacked by black or yellow smoke from Soviet aircraft.

Some doctors found that the victims' skin problems only responded to medicine used for chemical burns. After examining numerous patients with breathing difficulty and black spots around their lungs, which ruled out tuberculosis, Dr. Zikria discovered that in medical history this problem has only been seen in chemical warfare victims. Returning to the U.S., Dr. Zikria studied reports from Laos and Cambodia and found almost identical symptoms in reported chemical warfare victims there.

Today, in New York, Dr. Zikria says: "Though there are debates over what is causing the problem, from the clinical standpoint the evidence is overwhelming that chemical warfare is happening. The effect of the agent on the victim is more important than its identification. As with cancer, we don't know exactly what causes it, but we can diagnose it by its effects—poisoning is a medical and clinical problem. The physician's reality is that thousands of people are suffering and dying, telling the same stories and showing the same signs."

Military specialists and government scientists in the U.S., Canada, Great Britain, France, West Germany, Norway, Thailand, Israel and New Zealand have confirmed the current Soviet use of chemical warfare. Yet, at the United Nations, the Soviets and their surrogate governments in the countries where it is being used veto any attempts for on-site investigations. At a recent press conference in Bangkok, French Foreign Minister Claude Cheysson said his country was convinced that chemical weapons were being used in Asia.

Recently in Paris, PARADE spoke with a top French military scientist and a government chemical-warfare expert. These authorities said that though they have identified toxic weapons substances in field samples from Southeast Asia and Afghanistan, they still have not developed the adequate high technology to do a complete identification of all the toxins involved. They feel that we have only seen the tip of the iceberg of the Soviet CBW arsenal and are concerned that the French Army could be caught in a surprise attack.

The United States signed an international treaty with the Soviets in 1972, banning all such weapons. However, that treaty had no provisions for verification, and the Soviets have continued to produce up to 10,000 tons a year of nerve gas and toxic weapons. Military experts estimate that the Soviets' current arms stockpile contains 400,000 to 700,000 tons of poisons—15 percent to 40 percent of their total ammunition holdings.

In a Soviet military publication, Col. Oleg Penkovskiy wrote: "Soviet artillery units are all regularly equipped with chemical warfare shells, and our artillery is regularly trained in their use. Let there be no doubt; if hostilities should erupt, the Soviet Army would use chemical weapons against its opponents. The political decision has been made, and our strategic planners have developed a doctrine . . . Chemical shells and missiles may be considered just ordinary weapons available to the military commanders to be used routinely when the situation calls for it."

In 1977, Soviet bloc chemical-biological capabilities (standard for all Soviet bloc armies) were documented in the East German Textbook of Military Chemistry:

"Toxins are agents which are produced by biological organisms such as micro-organisms, plants and animals and cannot themselves reproduce. By the middle of 1960, the toxins selected for military purposes were included among biological warfare agents. Today it is possible to produce various toxins synthetically.

"Toxins are not living substances; they thus differ from the biological organisms, so that they can be included among chemical warfare agents. When they are used in combat, the atmosphere can be contaminated over relatively large areas.

"The toxic warfare agents can be aerosolized. They can be used primarily in microbombs which are launched from the air or

in warheads of tactical rockets. Toxic warfare agents can be applied with aircraft spray equipment and similar dispersion systems."

This account accurately confirms what terrified tribespeople and farmers in the Near East and Asia have been trying to tell a disbelieving West. These events in far-off places may seem remote to many Americans, but a comparison of Soviet-U.S. campabilities in chemical-biological weaponry reveals some frightening facts and figures:

The Defense Department estimates the Soviets outnumber us in chemical munitions by up to a 10 to 1 ratio; in delivery systems by 5 to 1; in production by 14 to 1; and in decontamination vehicles by 10 to 1. Experts estimate 72 percent of U.S. chemical stocks are of doubtful military value because of deterioration.

Soviet chemical warfare troops number up to 100,000, compared to 6,000 in the U.S. Soviet troops and chemical specialists have battlefield experience in Afghanistan and Southest Asia and have used this to develop tactical integration of toxic warfare. NATO commanders doubt our capability to deter a chemical attack. While Soviet armor is sealed against chemical penetration. U.S. armor is woefully unprotected.

A massive Soviet surprise attack on NATO could render our forces defenseless. The Soviets have the ability to spread chemical agents over a large area by a number of means. Their FROG and SCUD missiles, similar to our Pershings, all have chemical capabilities. The U.S. Navy now feels our battleships are vulnerable to Soviet cruise missiles tipped with chemical warheads.

Small chemical rockets are now used on Soviet helicopters, jets and biplanes (crop dusters). A single 200-pound toxic bomb can cover half a square kilometer with nerve gas. MiG 27 aircraft, the kind employed in Cuba, can deploy four tanks of nerve gas, each tank capable of covering four square kilometers. Satellite photos and intelligence assets have documented the existence of a large military chemical depot and training field in Cuba, where Soviet advisers train Cuban troops in chemical-biological warfare exercises.

Some Soviet toxins derived from fungi are impossible to detect by current U.S. gas alarms, and their minuscule particles could penetrate existing gas mask filters.

Though the new generation of Soviet toxins has been grouped under the term "yellow rain," a wide variety of toxic smoke colors are being used. Each causes varying effects, ranging from incapacitation, stupor and nausea to choking, neurologic fits and massive hemorrhage, causing quick death.

Guerrilla fighters in Afghanistan have experienced fatality rates of up to 70 percent, and large civilian populations have experienced rates of nearly 100 percent. Chemical experts believe that known chemicals like mustard gas, phosgene and sarin are being used, as well as new forms of toxins.

In June 1980, Dutch journalist Bernd DeBruin filmed two Soviet chemical helicopter attacks in Jalalabad, Afghanistan. The helicopters circled a village like a carousel, dropping canisters and shooting rockets that produced a lethal yellow smoke. A few hours later, DeBruin entered the village and photographed a corpse that had turned blue-black from extensive internal hemorrhaging (all blood vessels in the body had burst) due to chemical exposure. DeBruin suffered from blisters, facial swelling, nausea, diarrhea and cramps for 10 days following the attack and still has skin lesions. DeBruin has photographed chemical shells with Soviet nomenclature. These shells and helicopter delivery systems match reports made by Cambodians since 1978.

Afghan resistance units have captured and photographed a number of Soviet chemical protective suits, antidote kits and gas masks contaminated with T-2 mycotoxin residue (not indigenous to the region). Soviet prisoners and defectors have confirmed the use of at least nine different types of chemical weapons, including the deadly sarin, phosgene and soman. One young soldier, Anatoly Sakharov, described an agent called "smirch," which has 100 percent mortality. His description matches reports from DeBruin, doctors in Afghanistan and Hmong refugees from Laos who described these effects to PARADE.

Yuriy Povarnitsyn, a Soviet military chemical specialist, reported performing autopsies on Afghan villagers and taking soil samples after attacks. His account corresponds to stories coming out of Laos regarding the Vietnamese. In 1974, a Cuban emigré baffled U.S. analysts with descriptions of similar chemical warfare systems being taught in Cuba. He described a chemical land mine that validated a report by a Soviet defector in the 1960s. Similar reports recently have come out of Cambodia. After reading these descriptions, a Chinese official in Peking told a U.S. chemical experts. "We read your report with great fascination because we ran into the same mines on the Vietnam border." In 1980, the Vietnam People's Army chemical warfare branch received the government's highest award, the Ho Chi Minh Medal.

In Cuba, Soviet instructors described the effects of the chemical mines as being "radiation-like"—which describes the effects of mycotoxins, once used in experiments by cancer researchers as an alternative to chemotherapy.

Sterling Seagrave, author of the book *Yellow Rain*, says: "Why are the Soviets using poisons? In a nuclear stalemate, only conventional weapons can be used in regional wars. Conventional weapons have become so complex and expensive—a new weapons system can bankrupt a national economy. Poisons, on the other hand, are cheap. And they have the killing power of nuclear weapons, without attracting so much attention.

"There's no big bang and there's no mushroom cloud. But all the people can be eliminated silently, as they have been in parts of Afghanistan. The new poisons are so bizarre and evaporate so rapidly that they make proof extremely difficult to obtain. But any serious study of Soviet military doctrine demonstrates that not only is CBW defensive gear a routine part of Soviet operations, so is CBW aggressive gear.

"In Afghanistan, for instance, Soviet helicopter gunships equipped with lethal chemical agents now perform routine duties like convoy security, which used to involve ground troops. This is only one of numerous examples that show the growing dependence on toxic weapons. And poison tactics and poison stategy have taken much of the role previously attached to tactical nuclear weapons in Soviet doctrine." Dr. Bernard Wagner, professor of medical pathology at Columbia University, who just returend from a fact-finding visit to Southeast Asia, says with great concern:

"The threat of limited, controlled biological warfare is, at least for me, on a scale with nuclear war. With toxins having both acute and delayed effects, an aggressor can achieve his ends without the problems posed by a nuclear blast. Besides, toxins can be delivered in an insidious, almost undetectable manner.

"The current outcry against nuclear weapons must also extend to chemical-biological warfare. Our government, along with all other nations, must find a way to pressure the Soviet Union and its clients into halting this activity. Until then, prudence dictates that we formulate policies to safeguard populations at risk."

Today, while the urgent reality of chemical warfare is obscured in endless political and academic debate, thousands of defenseless men, women and children continue to suffer. On March 25, 1983, at Ban Vinai refugee camp on the Mekong River in Thailand, PARADE spoke with Tou Xiong, a 25-year-old Hmong resistance fighter. Tou has risked his life on numerous occasions to guide members of desperate families across the Laotian mountains in frantic escape from Vietnamese-Soviet "extinct destruction" campaigns. With the quiet intensity of one who has walked with death, he said:

"It is difficult for people to live in Laos because of the poison gas. Thousands and thousands of Hmong people have died. It took my group of 100 people one month to walk to Thailand. We had to pass through many patrols of Vietnamese and Pathet Lao soldiers. By the time we crossed the Mekong River, 75 people—including many babies and children—had died by starving, drowning or shooting.

"My people asked me to come to Thailand to ask the Americans if you have any medicine to take care of the poison gas today. If the Communists keep using this gas on the fields, the forests, the water and the villages, the Hmong Lao people will no longer have any life left."●

HOBBS ANTIEXTORTION ACT

● Mr. JEPSEN. Mr. President, I take this opportunity to commend my distinguished colleague from Iowa, Senator GRASSLEY, for his introduction of legislation to make the Hobbs Antiextortion Act apply evenhandedly to all Americans.

As a cosponsor of Senator GRASSLEY's bill, S. 462, I have joined in his efforts to revise by statute the Supreme Court's erroneous interpretation of the Hobbs Act in the 1973 Enmons decision.

The Hobbs Act was enacted in 1946 to curb a rising tide of violent labor/management disputes. Congressman Samuel Hobbs, author of the bill, stated in crystal-clear terms that the law was designed to apply to all Americans. "[C]rime is crime, no matter who commits it; . . . and extortion, extortion, whether or not the perpetrator has a union card," said representative Hobbs.

Despite this unequivocal congressional mandate, five Supreme Court justices ruled in Enmons that union officials engaged in legitimate labor disputes need not fear prosecution for extortion under the Hobbs Act.

This unique exemption of a privileged few from a law meant to apply to all Americans is counter to our

cherished principles of justice and equality before the law.

The need for legislation to correct this injustice was articulated eloquently by Senator GRASSLEY in his testimony before the Senate Judiciary Subcommittee on separation of powers.

I urge my colleagues to join Senator GRASSLEY and me in support of this legislation; and I ask that Senator GRASSLEY's statement be printed in the RECORD.

The statement follows:

STATEMENT OF SENATOR CHARLES E. GRASSLEY BEFORE THE SENATE JUDICIARY SUBCOMMITTEE ON SEPARATION OF POWERS

Mr. Chairman, thank you for your diligence in scheduling this hearing so early in this session. The bill, S. 462 before us, has a rapidly growing list of cosponsors which include Senators Thurmond, Dole, Simpson, Goldwater, Jepsen, Trible, Nickles and Helms.

This legislation, which I introduced on February 3, amends the federal extortion and robbery statute, commonly referred to as the Hobbs Act, which is found at Section 1951 of Title 18, U.S. Code. The enactment of this bill will leave no doubt as to congressional intent in enacting the Hobbs Act. We will punish the actual or threatened use of force or violence regardless of the objective, regardless of the perpetrator's claim to such property.

Until the Supreme Court's 1973 Enmons decision no person or group was exempted from coverage by this statute. Any actual or threatened use of force or violence to obtain property was a "wrongful" use of force or extortion. The objective that was sought through the violence was irrelevant. Resorting to violence was not condoned as a means to settling a dispute.

The Enmons case arose out of a strike by the employees of a utility company seeking a new collective bargaining agreement. Five specific acts of violence were charged, including the firing of high powered rifles at three transformers, the draining of oil from a transformer, and the blowing up of a transformer installation. The Government contended that the statutory language unambiguously and without qualification proscribed interference with commerce by extortion; that, in terms of the statute extortion included the obtaining of property from another by threats or violence; that wages were property of the employer; and that violence in the course of a strike to obtain such property fell within the literal language of the act.

Nevertheless, five members of the Supreme Court held that violence during a strike to achieve legitimate collective bargaining objectives was not intended by the Congress to be covered by the Hobbs Act. The majority emphasized that a broader interpretation of the statute would apply its coverage to "the worker who threw a punch on the picket line, or the striker who deflated the tires of his employer's truck." I emphasize here today, that my legislation explicitly exempts minor incidental incursions. It is an affirmative defense to a prosecution under this bill, if the defendant's conduct consisted solely of minor bodily injury, or minor damage to property not exceeding $2,500.

By continuing to adhere to the decision in Enmons, we are in effect bolstering the concept that the end—pursuit of legitimate collective bargaining objectives—justifies the means used whether that involves systematic destruction of property, maiming or killing. We have the opportunity through enactment of S. 462, to mandate (decree) that no extortive violence by either party to a labor dispute will be exempt from the coverage of the Hobbs Act.●

HUNGER IN AMERICA

● Mr. HOLLINGS. Mr. President, a little over 2 weeks ago I attended the annual meeting of the U.S. Conference of Mayors in Denver. At that time Senator ANDREWS and I held a hearing with a number of the mayors on the problems of hunger in America.

That hearing brought out many of the facts we all suspected. It proved that in this land of plenty there is hunger at an unprecedented level. It showed that 3 years of unproductive and uncaring budget cuts by the administration have put thousands more of our citizens on food lines. And it highlighted that even the Herculean efforts of our local governments cannot close the gap—there are simply too many hungry Americans for the local agencies to care for.

Carl T. Rowan has written an excellent piece on our meetings with the mayors. He aptly sums up what is good government—mayors who face up to the problem of hunger and attempt to feed their people—and what is bad government—a President who wears blinders to talk about "economic recovery" and asserts that no one is being hurt by his policies. The President may be able to ignore the facts, but the mayors cannot. What Detroit Mayor Coleman Young calls "the most prevalent and insidious" problem facing the cities is a national shame and a national problem. Unfortunately, this administration has allowed us to go backward in our national efforts for a solution.

I highly recommend this article to my colleagues. I submit it for the RECORD along with a copy of my statement at the hearing.

The material follows:

[From the Washington Post, June 17, 1983]

FACING HUNGER

(By Carl T. Rowan)

I have seen the victims and heard the cries of hunger in this city, within blocks of the Capitol. I have seen hunger on a grotesquely sweeping scale in the Sahel region of Africa. So I know how it depresses the well-fed, pushes them to guilt, to see the tumefied bellies, the bony joints, the gaunt faces of children who don't get enough to eat. That is why a lot of state legislators, congressmen and White House officials stay away from the no-jobs ghettos where more and more soup kitchens have sprung up, and from the rural pockets of poverty where people count on distributions of surplus cheese and butter.

A president who avoids seeing the dramatic increase in the number of Americans who go hungry can continue to talk about "economic recovery" and assert that nobody is really being hurt by his policies. But the nation's mayors cannot play the callous "out of sight, out of mind" game. They can't hide from the suffering. To their credit, they tried at the 51st annual meeting of the U.S. Conference of Mayors to make those of us who eat regularly understand that hunger is making a comeback in America and is now what Detroit Mayor Coleman Young calls "the most prevalent and insidious" problem facing the cities. The mayor of Oakland, Calif., complains that he was unable to get supplemental food for 30,000 people who need it. San Antonio, Texas, officials say that whereas they provided emergency food aid to 10,000 families in 1982, they expect 50,000 families to ask for help in 1983.

At their Denver conference the mayors heard what most of them surely already knew: that hunger is causing or aggravating a lot of illnesses and thus adding immensely to the Medicare and Medicaid burdens. I have made it a point on recent speaking and other trips to go into the areas of hunger, soup kitchens, etc. I have looked at the people in these food lines and have seen that many are candidates for hospital emergency rooms. I look at some of the older people who are so desperate for food that they abandon pride, whatever, and stand in line for charity—and, yes, my heart bleeds. But it is the hungry children for whom I truly weep. Millions of youngsters have seen their fathers and mothers lose their jobs even as the Reagan administration was forcing 3 million children out of the school lunch program.

President Reagan and Education Secretary Terrel Bell can give speeches about "master teachers" and "educational excellence" until they fall from exhaustion, but these youngsters who live in homes of hunger, and are denied adequate food at school are not going to become scholars. Destruction of school lunches and other programs comes a lot easier if you stay in a secluded world where you never see the degradation of those who must beg for bread, or you never hear the crying of a hungry child.

STATEMENT OF SENATOR ERNEST F. HOLLINGS AT SENATE AGRICULTURE HEARING ON HUNGER, DENVER, COLO., JUNE 13, 1983

Thank you Mr. Chairman. It is indeed an honor to be here today to discuss the problems of hunger and food distribution with our distinguished panelists. I welcome them and look forward to their thoughts and comments.

Whenever I am with a group discussing hunger, it leads me to think of that saying by Henry Adams—"Practical politics consists in ignoring the facts." But this problem can not be ignored and the practical politics is no politics. But as we all know, that is a difficult message to convey to the present Administration.

It was some 15 years ago that I stumped my home State and other parts of the Nation to learn first hand the story of hunger and poverty in America. What I and others discovered was shocking. There were literally millions of underfed and hungry people in this land of plenty. Cases of Kwashiorkaor and other starvation related diseases were found. In many poverty areas, rates of nutrition deficiency diseases among our children equalled those of third-world countries.

But this country exhibited its greatness and responded with a noble effort to eliminate hunger from our midst. And for a time we were succeeding. Yet now, as we all are aware, hunger is starting to come back.

The first reason for this is our current economic position. Millions of American families, who never in their wildest dreams could have imagined it, are now without jobs and destitute. They are victims of that hoax called "supply side." They have been mugged by an arrogant and irresponsible administration that gambled with their futures, cut taxes for the wealthy few, and drove the economy to its knees. These are our neighbors and friends. These are the same people who studied hard, worked hard, and rightly expected to enjoy the fruits and security of the American dream.

Yet now they are faced with indefinite layoffs, expiring unemployment benefits, and depleted savings. They have had to chose between heating and eating during the winter. They have had to wait in food lines at their own churches in order to make it through the month.

Some have dubbed this group the "new poor." But new or old, they are hungry, confused, and frightened. And, they deserve better.

Another reason for the resurgence of hunger is what I like to call "check-out line" analysis. We've all heard it—the constituent who complains about seeing some person buying steak or filet with food stamps. Indeed, our President has made it an acceptable form of social comment when he talked about the fellow who bought an orange with foodstamps, used the change to buy a pint of vodka, and then enjoyed a screwdriver. But when the President was last in either a food or liquor store is the question I would like answered.

Yet the image of the so-called "cheater" persists. And for a program such as food stamps, the effect is invidious. The American people, who are sincere in their belief that none of our citizens should go hungry, soon begin to believe the story and withdraw their support.

And it isn't just some crank or extremist that plants these fables. That would be bad enough. It is also the administration that continues to play games and recycle ugly myths. It is the administration that continues to let the public believe the program is fraught with fraud and abuse when it isn't. It is the administration that continues to imply that the Democrats are irresponsible spenders when Jimmy Carter and the Congress cut the fat, waste, and fraud out of the program in 1980 and 1981. It is the administration that continues to cry for more cuts—a billion dollars in this year's budget—when we have already cut the program by over $3 billion per year for the last two years. In short, it is the administration that lies instead of leads.

But what the administration doesn't tell anyone about is how the program works or who it serves. It doesn't tell you that benefits now average less than 47 cents per person per meal. It doesn't tell you that over one-half of the recipients are children or that 78 percent of the recipients are either children, the elderly, the disabled, or single parents. It doesn't tell you that the average monthly household income of recipients is under $350. And, it doesn't tell you that most of the unemployed are unable to get food stamps because they are fortunate enough to still own a car or some other personal asset.

Another trend that must be reversed is the short-sightedness of our policy makers. By this I mean the "pennywise and pound foolish" attitude that exists when we fund many of our nutrition programs.

Part of this is due to the problems of misinformation and myths that I just mentioned. But equally devastating is the refusal of many in Congress and the administration to look at the facts. Without a doubt, there are few government programs as effective as those in the nutrition area. And this is particularly true with regard to our children.

For example, take the Supplemental Food Program for Women, Infants, and Children (WIC). Every $1 spent on the prenatal component averts $3 in hospitalization costs by significantly reducing the number of low birth-weight infants. The neonatal mortality rate for infants born to WIC mothers is only one-third that of comparable groups.

Or, look at the child nutrition and school lunch programs. Even the Department of Agriculture, which cut the progam by 30 percent last year—the largest cut in any entitlement—has released studies that show these programs having substantial nutritional impacts on children, particularly lower income children.

And you in local government know that the cost-efficient saving from these programs are not exclusively federal. These savings reduce Medicaid, AFDC, special education, and other programs that are part of everyone's budget—Federal, state, and local.

Yet the response of the administration is more B-1's and MX's and less nutrition. More for programs that are ineffective and fat and less for programs that are effective and starving.

And finally, we are seeing more hunger because our local agencies simply cannot handle the load. Americans can and will pull together. But local food programs are literally overwhelmed by the magnitude of those who need help.

For example, last year over one-half of the emergency food programs saw their case loads increase by 50 percent. A third of the programs saw a doubling in the number of recipients. Because of this, nearly a fourth of the agencies had to turn people away and two-thirds are now limiting the number of times a person can get food. Usually, it is now once a month.

And the people being served are changing. It is no longer the fellow looking for a bowl of soup and sermon. More and more it is the newly unemployed and more and more it is entire families with children. Additionally, the number of families who are seeking aid because their food stamps no longer last through the month is increasing at a dramatic rate.

But again, the administration is callous and uncaring. The same crowd that preaches "volunteerism" refuses to fully unshackle the necessary forces for success. We need to not only free up the millions of pounds of commodities rotting in warehouses, but we must give the state and local governments the where-with-all to deliver them.

As we can all see, the problems we face are immense. We have economic, social, and political barriers to hurdle before we can eliminate hunger in this country. Right now we are going backwards. But I am confident that it is not impossible. All that is required is leadership and candor. The American people will respond.●

SOVIET COMPLIANCE WITH ARMS CONTROL TREATIES

● Mr. SYMMS. Mr. President, I ask to have printed in the RECORD a letter addressed to President Reagan by a number of Senators, dated June 20, 1983, expressing support for his efforts to study the problem of Soviet compliance with arms control treaties in the National Security Council Verification Panel.

The letter follows:

U.S. SENATE,
Washington, D.C., June 22, 1983.

Hon. RONALD REAGAN,
The President, the White House, Washington, D.C.

DEAR MR. PRESIDENT: We strongly support your efforts to thoroughly study the problem of Soviet compliance with arms control treaties in the National Security Council Verification Panel. Preserving the integrity of the arms control process is of great importance.

We sent you a letter on May 12, 1981 questioning Soviet compliance with the SALT I Anti-Ballistic Missile Treaty. Since then, there have been many reports of new Soviet violations or circumventions of SALT and other arms control treaties.

In testimony to the Senate Foreign Relations Committee on June 15, 1983, Secretary of State Shultz criticized "Moscow's continuing practice of stretching a series of treaties and agreements to the brink of violation and beyond." Schultz added that the United States is "becoming increasingly concerned about Soviet practices—including the recent testing of ICBMs—that raise questions about the validity of their claim of compliance with existing SALT agreements."

Mr. President, we respectfully request that you continue your NSC studies in order to answer our original letter and any other Congressional letters on Soviet arms control compliance. We are sure that you agree that the Congress and the American people have a right to know if the Soviets are violating or circumventing SALT treaties.

With warmest personal regards.

Sincerely,

Jake Garn, Steve Symms, James A. McClure, Ted Stevens, Jordon Humphrey, Chuck Grassley, Jesse Helms, Chic Hecht, Mark Andrews, Bill Cohen, Rudy Boschwitz, Jeremiah Denton.

Don Nickles, Frank H. Murkowski, John P. East, Orrin G. Hatch, Paula Hawkins, Bob Dole, Mack Mattingly, Roger L. Jepsen, Dan Quayle, Pete V., Domenici, Bob Kasten.

Bill Armstrong, Strom Thurmond, Malcolm Wallop, Jim Abdnor, Paul Laxalt, Paul Trible, Larry Pressler, Alfonse D'Amato, Warren B. Rudman, Richard Lugar, Pete Wilson.●

THE DEATH OF WILLIAM MILLER AND AN ELOQUENT TRIBUTE

● Mr. MOYNIHAN. Mr. President, few in the Chamber have not already been made aware of the passing of William Miller, the altogether distinguished former Member of the House of Representatives from New York and onetime running mate of our cherished colleague, Senator GOLDWATER.

Bill Miller was a good man and a splendid public servant. He came from that background and that set of experiences that made him a tough-minded and principled spokesman for conservatism and commonsense in public af-

fairs. And he understood, as well, the meaning of generosity of spirit when ministering to the private needs of family, friends, and those who are less fortunate. He is missed by those who value dedication and vigor in public service, and mourned by those who had the great fortune to have called him a friend.

Mr. President, Senator GOLDWATER delivered a moving and eloquent tribute to his friend and colleague, Bill Miller, at a service Monday last at the St. John's Catholic Church in Lockport, N.Y., and I should like to share his eulogy with my colleagues, as well as an obituary from the New York Times that appeared Saturday, June 25.

I ask that these two items be printed in the RECORD.

The material follows:

[From the New York Times, June 25, 1983]

EX-REPRESENTATIVE WILLIAM MILLER, 69, DIES; GOLDWATER'S 1964 RUNNING MATE

(By Douglas C. McGill)

William E. Miller, a former member of the House of Representatives who experienced brief national fame as Barry Goldwater's Republican running mate in the 1964 Presidential race, died yesterday at Millard Fillmore Hospital in Buffalo. He was 69 years old.

He had been admitted to the hospital June 5 for diagnostic tests and was in fair condition until he suffered a stroke on Saturday, according to a hospital spokesman.

After President Johnson's landslide victory, Mr. Miller quickly dropped from public view, emerging only occasionally, in interviews, to joke about his short stay in the spotlight.

Most memorably, in a 1975 television commercial, Mr. Miller cheerfully announced that wherever he went, he was not recognized without his American Express credit card. In 1979, he told a reporter that strangers sometimes reminded him that he was a celebrity, but not because he was Barry Goldwater's running mate.

REMEMBERED FOR COMMERCIAL

"They remind me more of the American Express card commercial," he said.

Among those who knew him, Mr. Miller was a successful man with a strong personality long before 1964. He was known as an acid-tongued extremely conservative Republican, a natty dresser and an expert at billiards, bridge and golf.

In Washington, Senator Barry Goldwater said of Mr. Miller, "He was one of the greatest men I have ever known and I feel his loss very deeply."

Asked by The Associated Press what qualities in Mr. Miller impressed him most, Senator Goldwater replied: "He was an outstanding member of Congress; he was one of the best national chairmen of the Republican Party we have ever had; he was a hell of a gin rummy player and a good poker player. He was the kind of a man other men like to be with. I think that's the best way to put it."

LIVED UP TO EARLY APPRAISAL

A high school English teacher remembered Mr. Miller as "a scrappy little son-of-a-gun," and throughout his life he repeatedly lived up to the phrase.

He was born in Lockport, N.Y., on March 22, 1914. His father was a factory janitor, and his mother ran a millinery. He was a star debater in high school. At the University of Notre Dame, he was elected head of the student government.

In 1938 he graduated from Albany Law School and was admitted to the bar. He began work the same year as a lawyer in Lockport. He was inducted into the army as a private in 1942, but later attended Officers Candidate School, was commissioned a first lieutenant and was assigned to the War Criminals Branch in Washington.

In August 1945, he was selected as one of the assistant prosecutors under Supreme Court Justice Robert A. Jackson at the Nazi war criminals trials at Nuremberg. The experience left a deep impression on him. Unlike many conservatives, he tended after the war to refer to Nazism, not Communism, as a symbol of ultimate evil.

In 1964, he was asked his opinion of the Conservative Party in New York State. "I don't approve of splinter parties," Mr. Miller said. "I saw what splinter parties made possible in Germany."

WAS A DISTRICT ATTORNEY

After the war, he was appointed Assistant District Attorney of Niagara County. Later, Gov. Thomas E. Dewey appointed him District Attorney, and he was elected to the post in the next election. He ran successfully for the House and served seven consecutive terms before joining the Goldwater ticket.

As a young Republican in Congress, Mr. Miller rapidly became known as an effective orator and as a "partisan hell-raiser rather than a lawmaker," as one biographer put it.

In 1960, he was elected chairman of the Republican Congressional Campaign Committee, and he won some credit for the 22 Republican House seats gained in the election that year.

POINTED PARTISAN ORATORY

That year, Mr. Miller endorsed Vice President Richard M. Nixon for President, at a time when Gov. Nelson A. Rockefeller still considered himself in the running for the Republican nomination. Even so, in 1961, Governor Rockefeller approved Mr. Miller's appointment as Republican National chairman, apparently feeling that a conservative New Yorker would be better in the job than a conservation Middle Westerner.

In these leadership roles of the early 1960's, Mr. Miller's talent for pointed partisan oratory took flight. He once called President Kennedy "the foundering father of the New Frontier," and advised him to learn the difference "between a sense of history and a sense of histrionics."

After Mr. Miller's nomination as Republican Vice President candidate, his sharp tongue became a cause of concern among other office-seeking Republicans, both moderate and conservative.

"I'm afraid that by the time Bill Miller gets through pummeling the President, Lyndon's going to sweep back into office on a national sympathy vote," a Michigan party leader said at the time, perhaps only partly in jest.

After the 1964 election, Mr. Miller retired almost completely from political life, although he did offer to campaign for Governor Rockefeller's re-election bid in 1966. The offer received a cool reception from Mr. Rockefeller.

At a 10-year reunion of workers who campaigned for Mr. Miller, he told the gathering: "I worked so hard as a candidate for Vice President, and it turned out so badly that I decided I'd never work again."

In fact, Mr. Miller continued to work as a senior partner in Miller Farmelo Cane & Greene, a law firm he had started in Buffalo in 1961. He practiced general law, with a specialty in banking. He was a frequent master of ceremonies at local ceremonies, was active on the boards of four corporations and two banks in the Buffalo area, and remained an avid golfer.

Mr. Miller is survived by his wife, the former Stephanie Wagner; a son Army Lieut. William E. Miller, Jr. of Washington; three daughters, Elizabeth Anne Fitzgerald of Lynchburg, Va.; Mary Karen Miller of Springfield, Mass.; Stephanie C. Miller of Los Angeles; and three grandchildren.

A Mass of Christian Burial will be said at 10:30 A.M. Monday at St. John's Roman Catholic Church in Lockport and burial will be at 1 P.M. Tuesday at Arlington National Cemetery in Virginia.

EULOGY BY SENATOR BARRY GOLDWATER FOR WILLIAM E. MILLER, ST. JOHN'S CATHOLIC CHURCH, LOCKPORT, N.Y., JUNE 27, 1983

Stephanie, members of your family and friends: Eulogy is a rather unusual word, not one that we use often. When we use it, it should be used with a real purpose and understanding. And even though I've called Bill Miller my friend for some 35 years, it's not the easiest task for me to do what I hope to do, and do it as well as he'd want me to.

I think we have to recognize in talking about a man like Bill that man was born to serve. It's the only reason that we are here. It is to do unto others as you would have them do unto yourself. And if they serve well, the dust that trails them as they walk down the path of life settles on all people, and makes all people better. Now the question comes: Did he serve well?

Yes, he served well. He served with love and devotion to his wonderful family. He served with love and devotion to his country. I remember night after night, day after day, as he and I, through our political times together, in talking about all things in general, he always got to Stephanie and his children. And one of the great things I liked about this man, and still do, is when he, as we all do, and many of us, many times, put our hand on the Bible and swear to defend the Constitution against all enemies, foreign and domestic, he meant it. Not everybody means it. That's one of our problems. He meant it; he demonstrated it by serving his country in times of war. He demonstrated it by serving his country in times of peace, in the field we call politics. Because of these things, and because of the way he was, and he is, to me, he made everyone of us better, and he made this country a better place to live.

So I can say with no prejudice, with a heart filled with promise and love, that the dust that will follow Bill, will follow his trail that he made through his life, will settle on us and remind us of our responsibilities to our God, our family, and our country.

Stephanie, it is my real honor here today to read a letter to you:

"DEAR STEPHANIE: Nancy and I were deeply saddened to learn of Bill's death. During the 1964 campaign, Bill Miller gained the respect and gratitude of all Americans for his capable articulation of the principles of our party.

All of us who have come after him are his beneficiaries, and we will remember his contribution for a long time to come. We pray that God will bless you and warm memories

sustain and console you and your family now, and in the days ahead.

Sincerely,

RONALD REAGAN."

I can't think of any more that I can say about my friend.●

RECEIPT OF MESSAGES DURING RECESS—ORDER OF PROCEDURE ON JULY 11, 1983

Mr. BAKER. Mr. President, first, I believe this request, which is in respect to the pending adjournment, has been cleared on the other side. I will state the request now for the benefit of the minority leader and other Senators.

Mr. President, I ask unanimous consent that, when the Senate adjourns pursuant to the resolution previously passed over until Monday, July 11, messages from the President of the United Sates and the House of Representatives may be received by the Secretary of the Senate and appropriately referred, and that the Vice President, President pro tempore, and acting President pro tempore may be authorized to sign duly enrolled bills and joint resolutions.

I further ask unanimous consent that during the adjournment of the Senate over until Monday, July 11, committees may be authorized to file reports on Tuesday, July 5, between the hours of 9 a.m. and 3 p.m.

Finally, I ask unanimous consent that when the Senate reconvenes on Monday, July 11, the reading of the Journal be dispensed with, no resolutions come over under the rule, the call of the calendar be dispensed with and, following the recognition of the two leaders under the standing order, there be a period for the transaction of routine morning business not to exceed 30 minutes in length, with Senators permitted to speak therein for not more than 5 minutes each; provided further, that the morning hour be deemed to have expired.

Mr. BYRD. Mr. President, reserving the right to object.

Mr. BAKER. Mr. President, I modify the request so that the time for morning business will be 1 hour instead of 30 minutes, and the time to speak will be 10 minutes instead of 5 minutes.

Mr. BYRD. Mr. President, I have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF PROCEDURE

Mr. BAKER. Was the order entered for morning business to extend not past 6:15 p.m.?

The PRESIDING OFFICER. The Senator is correct.

Mr. BAKER. Mr. President, I have a file of material that I think we can deal with now.

Mr. President, I yield to the Senator from Oregon.

CONSTITUTIONAL AMENDMENT ON ABORTION—SENATE JOINT RESOLUTION 3

Mr. PACKWOOD. Mr. President, I move to reconsider the vote by which we defeated Senate Joint Resolution 3 yesterday.

Mr. BAKER. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. I observe, Mr. President, the Senator is within his rights to make that motion, and he apprised the leadership on both sides of his intention to do so.

TRIBUTE TO LEADERSHIP STAFF

Mr. BAKER. Mr. President, we have at the table at the front and on both sides of the aisle the hardest working, most efficient, and most carefree staff I have ever seen in my life. I am referring to the floor staff of both the Republicans and the Democrats. I would not for one moment push them past the pace at which they are prepared to go because it is the staff, particularly this staff, more than anybody else who sees that the Senate functions in the orderly and constitutional way which is required of us and expected of us.

Mr. BYRD. Mr. President, I also share those feelings expressed so ably by the majority leader. We have a very diligent and dedicated staff, very skillful, and they are well liked by the Members of this body.

It is said that "He that is diligent in his business may stand before kings." The staff may not stand before kings, but they certainly ought to be recognized for their ability, devotion, and dedication to the Senate and to the leadership on both sides.

May I say that they have always been nice to me, friendly and cooperative. I say that with respect to the staff on both sides of the aisle.

Mr. BAKER. Mr. President, I agree with every word spoken by the minority leader.

While the staff gets their papers in order, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I have a series of unanimous-consent requests. I will state them now for the consideration of the minority leader.

SEQUENTIAL REFERRAL OF A BILL—S. 1101

Mr. BAKER. Mr. President, I ask unanimous consent that the period for sequential referral to the Committee on Agriculture, Nutrition, and Forestry of S. 1101, a bill to authorize appropriations for certain fishery programs, as reported by the Committee on Commerce, Science, and Transportation, be extended until July 20, 1983 for the sole purpose of considering the provisions of the first section of the bill; and that if the committee does not report by July 20, 1983, it shall be immediately discharged from further consideration of the bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

AUTHORITY FOR THE BANKING, HOUSING AND URBAN AFFAIRS COMMITTEE TO HAVE UNTIL 6 P.M. TODAY TO FILE REPORT ON S. 979

Mr. BAKER. Next, Mr. President, I ask unanimous consent that the Banking Committee have until 6 p.m. this evening to file a report to accompany S. 979.

The PRESIDING OFFICER. Without objection, it is so ordered.

ATLANTIC SALMON CONVENTION ACT AMENDMENTS

Mr. BAKER. Mr. President, I would inquire of the minority if he is in a position to consider action by unanimous consent on S. 925.

Mr. BYRD. Mr. President, this side of the aisle is ready to proceed.

Mr. BAKER. I thank the minority leader.

Mr. President, I ask the Chair to lay before the Senate Calendar Order No. 131, S. 925.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (S. 925) to make certain technical corrections in the Atlantic Salmon Convention Act of 1982.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill?

There being no objection the Senate proceeded to consider the bill.

AMENDMENT NO. 1451

Mr. BAKER. Mr. President, I send an amendment to the desk on behalf of the distinguished junior Senator from Oregon (Mr. PACKWOOD) and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Tennessee (Mr. BAKER), for Mr. PACKWOOD, proposes an amendment numbered 1451.

Mr. BAKER. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Strike out all after the enacting clause and substitute the following:

TITLE I—MARINE FISHERIES PROGRAMS

SEC. 101. That section 10 of the Atlantic Tunas Convention Act of 1975 (16 U.S.C. 971h) is amended by striking out "and 1983" and inserting in lieu thereof "1983, 1984, 1985, and 1986".

SEC. 102. The Atlantic Salmon Convention Act of 1982 (16 U.S.C. 3601 et seq.) is amended—

(1) by inserting "not" immediately after "shall" in the second sentence of section 303(c); and

(2) by amending subsection (c) of section 307 to read as follows:

"(c) Any vessel used, and any fish (or the fair market value thereof) taken or retained in any manner, in connection with or as the result of the commission of an act which is unlawful under subsection (a) of this section shall be subject to civil forfeiture under section 310 of the Act of 1976 (16 U.S.C. 1860) to the same extent as if such vessel was used in, or such fish was taken or retained in connection with or as the result of, the commission of an act prohibited by section 307 of the Act of 1976 (16 U.S.C. 1857).".

SEC. 103. (a) The Fish and Wildlife Act of 1956 (16 U.S.C. 742a et seq.) is amended—

(1) by striking out "September 30, 1983" each place it appears in section 4(c) and inserting in lieu thereof "September 30, 1984"; and

(2) by striking out "1982 and 1983." in section 7(c)(6) and inserting in lieu thereof "1982, 1983, and 1984.".

(b) Section 221 of the American Fisheries Promotion Act (16 U.S.C. 742c note) is amended—

(1) by striking out "September 30, 1982" in subsection (a) and inserting in lieu thereof "September 30, 1984";

(2) by amending subsection (b)—

(A) by striking out "fiscal year 1982," in subparagraph (2)(A) and inserting in lieu thereof "each of fiscal years 1982, 1983, and 1984,", and

(B) by striking out "1981 and 1982" in subparagraph (2)(C) and inserting in lieu thereof "1981, 1982, 1983, and 1984"; and

(3) by striking out "fiscal year 1981 or 1982, or both," in subsection (c)(1) and inserting in lieu thereof "any of fiscal years 1981, 1982, 1983, and 1984,".

SEC. 104. Section 1(c)(2) of the Anadromous Fish Conservation Act (16 U.S.C. 757a(c)(2)) is amended: (1) by striking out "shall be 90 percent" and inserting in lieu thereof "shall be up to 90 percent"; and (2) by striking out "resources," and inserting in lieu thereof "resources, prepared by an interstate commission,"; and by adding at the end thereof the following new sentence: "For purposes of this paragraph, the term 'interstate commission' means—

(A) the commission established by the Atlantic States Marine Fisheries Compact (as consented to and approved by Public Law 80-77), approved May 4, 1942 (56 Stat. 267);

(B) the commission established by the Pacific Marine Fisheries Compact (as consented to and approved by Public Law 80-232), approved July 24, 1947 (16 Stat. 419); and

"(C) the commission established by the Gulf States Marine Fisheries Compact (as consented to and approved by Public Law 81-66), approved May 19, 1949 (63 Stat. 70).".

SEC. 105. Section 2 of the Fishery Conservation Zone Transition Act (16 U.S.C. 1823 note) is amended by adding at the end thereof the following new subsection:

"(c) Notwithstanding such section 203—

"(1) the governing international fishery agreement referred to in subsection (a)(5), as extended until July 1, 1984, pursuant to the Diplomatic Notes referred to in the message to the Congress from the President of the United States dated May 3, 1983, is hereby approved by the Congress as a governing international fishery agreement for the purposes of such Act of 1976;

"(2) the governing international fishery agreement referred to in subsection (a)(6), as extended until July 1, 1984, pursuant to the Diplomatic Notes referred to in the message to the Congress from the President of the United States dated May 3, 1983, is hereby approved by the Congress as a governing international fishery agreement for the purposes of such Act of 1976; and

"(3) the governing international fishery agreement referred to in subsection (a)(4), as contained in the message to the House of Representatives and the Senate from the President of the United States dated May 3, 1983, is hereby approved by the Congress as a governing international fishery agreement for the purposes of such Act of 1976.

Each such governing international fishery agreement shall enter into force and effect with respect to the United States on July 1, 1983.".

TITLE II—MISCELLANEOUS PROVISIONS

SEC. 201. Notwithstanding the provisions of section 27 of the Merchant Marine Act of 1920 (46 U.S.C. 883), or any other provision of law to the contrary, the Secretary of the department in which the United States Coast Guard is operating shall cause the vessel Norden (official number 584767) to be documented as a vessel of the United States, upon compliance with the usual requirements, with the privilege of engaging in the coastwise trade so long as such vessel is owned by a citizen of the United States.

SEC. 202. Notwithstanding any other provision of law, a corporation which, as of March 1, 1983, is a citizen of the United States within the meaning of section 2 of the Shipping Act of 1916, as amended (46 U.S.C. 802) shall continue to be deemed a citizen of the United States within the meaning of said section and shall continue to be deemed an owner whose vessels are eligible for documentation under section 104 of the Vessel Documentation Act (46 U.S.C. 65b) notwithstanding the election and service of a resident alien as its president or chief executive officer; provided, such resident alien has, pursuant to the provisions of section 334(f) of the Immigration and Nationality Act (8 U.S.C. 1445(f)), filed with the Immigration and Naturalization Service of the United States Department of Justice, prior to July 1, 1983, an application to file declaration of intention to become a citizen of the United states.

(b) Any rights conferred by subsection (a) shall expire unless such resident alien has become a naturalized citizen by March 1, 1987.

● Mr. PACKWOOD. Mr. President, the Senate is now considering a bill to make certain technical corrections in the Atlantic Salmon Convention Act of 1982. In addition to technical corrections in the Atlantic Salmon Convention Act the bill contains several miscellaneous authorizations and technical changes to other laws which I believe are noncontroversial.

The package the Senate is considering contains the following:

1. Title I—Marine Fisheries Programs:

A. Section 101 contains a three year authorization of the Atlantic Tunas Convention Act of 1975.

B. Section 102 contains techical amendments to the Atlantic Salmon Convention Act of 1982.

C. Section 103 contains a one year authorization for the Fisheries Loan Fund (Section 4 of the Fish and Wildlife Act of 1956).

D. Section 104 contains clarifying amendments to the Anadromous Fish Conservation Act.

E. Section 105 contains a one year extension of the Soviet and Polish Governing International Fishery Agreements (GIFA's) and an approval of a new GIFA with the German Democratic Republic.

II. Title II—Miscellaneous Provisions:

A. Section 201 contains a provision to document the vessel Norden as a vessel of the United States.

B. Section 202 contains temporary authority for a corporation whose president is a resident alien to own U.S. documented vessels.

The purpose of section 101 is to authorize appropriations for the Atlantic Tunas Convention Act of 1975 for fiscal years 1984, 1985, and 1986. The act expires at the end of 1983. Moneys appropriated under this act are used to fund U.S. participation in the International Commission for the Conservation of Atlantic Tunas (ICCAT).

The purpose of section 102 is to correct a drafting error discovered after passage of the Atlantic Salmon Convention Act last year.

The purpose of section 103 is to authorize appropriations for 1 year for the fisheries loan fund—section 4 of the Fish and Wildlife Act of 1956. The loan fund consists of moneys from fees paid by foreign nations whose vessels conduct fishing activities in U.S. waters. The fund's stated purpose is to make loans to commercial fishermen for the purchase and equipping of fishery vessels. The committee will explore other possible uses later in the year.

The purpose of section 104 is to address questions raised by the National Marine Fisheries Service (NMFS) in regard to an amendment made last year to the Anadromous Fish Conservation Act. This additional amendment is intended to clarify for NMFS the intent of last year's amendment.

The purpose of section 105 is to extend for 1 year the expiring Soviet and Polish GIFA's and approve a new 5-year GIFA for the German Democratic Republic.

The purpose of section 201 is to allow documentation of the vessel

Norden so that it can engage in coastwise trade.

The purpose of section 202 is to temporarily allow Castle & Cooke, a U.S. corporation whose president is a resident alien, to own, operate, and document U.S. vessels.

Mr. President, I believe all of these items are noncontroversial and have been cleared with all interested parties. I therefore ask my colleagues to join me in offering their support.●

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 1451) was agreed to.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment and the third reading of the bill.

The bill (S. 925) was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

S. 925

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled

TITLE I—MARINE FISHERIES PROGRAMS

SEC. 101. That Section 10 of the Atlantic Tunas Convention Act of 1975 (16 U.S.C. 971h) is amended by striking out "and 1983" and inserting in lieu thereof "1983, 1984, 1985, and 1986".

SEC. 102. The Atlantic Salmon Convention Act of 1982 (16 U.S.C. 3601 et seq.) is amended—

(1) by inserting "not" immediately after "shall" in the second sentence of section 303(c); and

(2) by amending subsection (c) of section 307 to read as follows:

"(c) Any vessel used, and any fish (or the fair market value thereof) taken or retained in any manner, in connection with or as the result of the commission of an act which is unlawful under subsection (a) of this section shall be subject to civil forfeiture under section 310 of the Act of 1976 (16 U.S.C. 1860) to the same extent as if such vessel was used in, or such fish was taken or retained in connection with or as the result of, the commission of an act prohibited by section 307 of the Act of 1976 (16 U.S.C. 1857).".

SEC. 103. (a) The Fish and Wildlife Act of 1956 (16 U.S.C. 742a et seq.) is amended—

(1) by striking out "September 30, 1983" each place it appears in section 4(c) and inserting in lieu thereof "September 30, 1984"; and

(2) by striking out "1982 and 1983." in section 7(c)(6) and inserting in lieu thereof "1982, 1983, and 1984.".

(b) section 221 of the American Fisheries Promotion Act (16 U.S.C. 742c note) is amended—

(1) by striking out "September 30, 1982" in subsection (a) and inserting in lieu thereof "September 30, 1984";

(2) by amending subsection (b)—

(A) by striking out "fiscal year 1982," in subparagraph (2)(A) and inserting in lieu thereof "each of fiscal years 1982, 1983, and 1984,", and

(B) by striking out "1981 and 1982" in subparagraph (2)(C) and inserting in lieu thereof "1981, 1982, 1983, and 1984"; and

(3) by striking out "fiscal year 1981 and 1982, or both," in subsection (c)(1) and inserting in lieu thereof "any of fiscal years 1981, 1982, 1983, and 1984,".

SEC. 104. Section 1(c)(2) of the Anadromous Fish Conservation Act (16 U.S.C. 757a(c)(2)) is amended: (1) by striking out "shall be 90 percent" and inserting in lieu thereof "shall be up to 90 percent"; and (2) by striking out "resources," and inserting in lieu thereof "resources, prepared by an interstate commission,"; and by adding at the end thereof the following new sentence: "For purposes of this paragraph, the term 'interstate commission' means—

"(A) the commission established by the Atlantic States Marine Fisheries Compact (as consented to and approved by Public Law 80-77), approved May 4, 1942 (56 Stat. 267)

proved by Public Law 80-232), approved July 24, 1947 (16 Stat. 419); and

"(C) the commission established by the Gulf States Marine Fisheries Compact (as consented to and approved by Public Law 81-66), approved May 19, 1949 (63 Stat. 70).".

SEC. 105. Section 2 of the Fishery Conservation Zone Transition Act (16 U.S.C. 1823 note) is amended by adding at the end thereof the following new subsection:

"(c) Notwithstanding such section 203—

"(1) the governing international fishery agreement referred to in subsection (a)(5), as extended until July 1, 1984, pursuant to the Diplomatic Notes referred to in the message to the Congress from the President of the United States dated May 3, 1983, is hereby approved by the Congress as a governing international fishery agreement for the purposes of such Act of 1976;

"(2) the governing international fishery agreement referred to in subsection (a)(6), as extended until July 1, 1984, pursuant to the Diplomatic Notes referred to in the message to the Congress from the President of the United States dated May 3, 1983, is hereby approved by the Congress as a governing international fishery agreement for the purposes of such Act of 1976; and

"(3) the governing international fishery agreement referred to in subsection (a)(4), as contained in the message to the House of Representatives and the Senate from the President of the United States dated May 3, 1983, is hereby approved by the Congress as a governing international fishery agreement for the purposes of such Act of 1976.

Each such governing international fishery agreement shall enter into force and effect with respect to the Unites States on July 1, 1983.".

TITLE II—MISCELLANEOUS PROVISIONS

SEC. 201. Notwithstanding the provisions of section 27 of the Merchant Marine Act of 1920 (46 U.S.C. 883), or any other provision of law to the contrary, the Secretary of the Department in which the United States Coast Guard is operating shall cause the vessel Norden (official number 584767) to be documented as a vessel of the United States, upon compliance with the usual requirements, with the privilege of engaging in the coastwise trade so long as such vessel is owned by a citizen of the United States.

SEC. 202. Notwithstanding any other provision of law, a corporation which, as of March 1, 1983, is a citizen of the United States within the meaning of section 2 of the Shipping Act of 1916, as amended (46 U.S.C. 802), shall continue to be deemed a citizen of the United States within the meaning of said section and shall continue to be deemed an owner whose vessels are eligible for documentation under section 104 of the Vessel Documentation Act (46 U.S.C. 65b), notwithstanding the election and service of a resident alien as its president or chief executive officer; provided, such resident alien has, pursuant to the provisions of section 334(f) of the Immigration and Nationality Act (8 U.S.C. 1445(f)), filed with the Immigration and Naturalization Service of the United States Department of Justice, prior to July 1, 1983, an application to file declaration of intention to become a citizen of the United States.

(b) Any rights conferred by subsection (a) shall expire unless such resident alien has become a naturalized citizen by March 1, 1987.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

PUBLIC BUILDINGS AUTHORIZATION ACT OF 1983

Mr. BAKER. Mr. President, I am clear on this side to consider S. 1287, if the minority leader has no objections.

Mr. BYRD. Mr. President, the matter has been cleared on this side.

Mr. BAKER. Mr. President, I ask that the Chair lay before the Senate Calendar Order No. 176, S. 1287.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (S. 1287) to authorize appropriations for the Public Buildings Service of the General Services Administration for fiscal year 1984.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill?

There being no objection, the Senate proceeded to consider the bill.

AMENDMENT NO. 1434

Mr. BAKER. Mr. President, I send to the desk an amendment of the distinguished senior Senator form Vermont (Mr. STAFFORD) and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Tennessee (Mr. BAKER), on behalf of Mr. STAFFORD, Mr. RANDOLPH, and Mr. MOYNIHAN, proposes an amendment numbered 1434.

Mr. BAKER. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 2, strike lines 22 and 23 and on page 3, strike lines 1 and 2 and insert in lieu thereof the following:

"(a) Not to exceed $172,510,000 shall be available for fiscal year 1984 as follows:

"(1) For construction of public buildings (including funds for site and expenses) at the following locations and maximum construction costs:

Massachusetts, Waltham, Federal archives and records center (extension)	$1,621,000
Oregon, Portland, Federal office building	67,475,000
Tennessee, Knoxville, Federal office building	14,990,000
Washington, Seattle, Federal archives and records center (extension)	3,525,000

"(2) For demolition of the public buildings at the following location and maximum demolition cost:

California, Los Angeles, warehouses	$599,000

"(3) $1,000,000 for construction of minor public buildings of less than ten thousand gross square feet of space;

"(4) $83,300,000 for purchase of sites and buildings at the following locations and maximum acquisition costs:

Pennsylvania, Pittsburgh, post office courthouse	$23,300,000
Other selected purchases including options to purchase	60,000,000

"(b) Not to exceed $181,332,000 shall be available for fiscal year 1984 as follows:

"(1) For renovations, alterations, and repairs of public buildings at the following locations and at the following maximum project costs of $1,000,000 or more:

Arkansas, Little Rock, post office-courthouse	$4,269,000
California, San Francisco, Appraisers Building	1,200,000
Colorado, Denver, Federal Center Building 20	6,427,000
District of Columbia, Auditors Building	9,294,000
District of Columbia, Blair House	6,500,000
District of Columbia, Liberty Loan Building	2,757,000
District of Columbia, Pension Building	2,650,000
Georgia, Atlanta, Federal Annex	9,193,000
Illinois, Chicago, J. C. Kluczynski Federal Building	3,319,000
Maryland, Baltimore, Middle River Federal Depot	1,892,000
Maryland, Suitland, Naval Intelligence Command Bldg. #1	9,760,000
Massachusetts, Boston, John F. Kennedy Federal Bldg	2,499,000
Michigan, Detroit, Federal building-courthouse	4,957,000
Michigan, Detroit, Patrick V. McNamara Federal Bldg	5,474,000
North Carolina, Asheville, Grove Arcade Fed. Bldg	8,364,000
Ohio, Cincinnati, post office-courthouse	1,138,000
Ohio, Cleveland, Anthony J. Celebrezze Federal Bldg	3,951,000
Pennsylvania, Pittsburgh, post office-courthouse	8,975,000
Texas, San Antonio, post office-courthouse	6,190,000
Utah, Ogden, Internal Revenue Service	3,036,000
Washington, Yakima, Federal building-courthouse	1,025,000

"(2) $14,000,000 for renovations and repairs of public buildings acquired by purchase; *Provided*, That prior to obligation of funds granted under authority of this subsection, approval of the Senate Committee on Environment and Public Works and the House Committee on Public Works and Transportation is secured.

"(3) Section 3(a) of this Act notwithstanding, for design of renovations, alterations, and repairs of public buildings at the following locations and maximum costs:

District of Columbia, steam distribution system	886,000
Louisiana, New Orleans, Hebert Federal Building	611,000

"(4) $59,465,000 for renovations and repairs of public buildings at project costs of less than $1,000,000;

"(5) $3,500,000 for alterations of leased buildings, the maximum cost for a single building being less than $250,000."

On page 3, redesignate subsections "(b), (c), (d) and (e)" as "(c), (d), (e), and (f)," respectively.

On page 4, after line 17, add new sections as follows:

"Sec. 7. (a) The Administrator of General Services (hereinafter referred to as the Administrator) shall transfer the building (occupied by the United States International Trade Commission and the United States Postal Service) and the site thereof located between Seventh and Eighth Streets, and E and F Streets, Northwest in the District of Columbia, to the Smithsonian Institution for the use of certain art galleries of the Smithsonian Institution. Notwithstanding any other provision of law, such transfer shall be without reimbursement.

"(b)(1) The Administrator, at the earliest practicable date, shall relocate the United States International Trade Commission in a quality building suitable to its headquarters operations and in a location in downtown Washington, District of Columbia, which is convenient to its mission, to congressional committees, and to private groups that do business with it. The Administrator and the Chairman of the United States International Trade Commission shall each report separately in writing to the Committees on Environment and Public Works and Finance of the Senate and to the Committees on Public Works and Transportation and Ways and Means of the House of Representatives within 60 days of enactment of this Act and every 30 days thereafter on the progress in meeting the provisions of this section.

"(2) The Administrator, during the period which the United States International Trade Commission and the United States Postal Service continue to occupy the present building, shall repair such building to assure an adequate level of maintenance to prevent deterioration of the building.

"(c) The transfer required by subsection (a) shall be made at such time when the Administrator determines that the use of the building by the United States International Trade Commission and the United States Postal Service is no longer essential.

"(d) The Administrator, in consultation with the Smithsonian Institution, is authorized to enter into such contracts and take such other action as may be necessary to make the building suitable to house certain art galleries and related activities of the Smithsonian Institution upon transfer of funds available to the Smithsonian Institution for such purposes."

"Sec. 8. Notwithstanding any other provisions of law, none of the funds made available to the General Services Administration pursuant to section 210(f) of the Federal Property and Administrative Services Act of 1949, shall be obligated or expended after the date of enactment of this Act for procurement by contract of any service which, before such date, was performed by individuals in their capacity as employees of the General Services Administration in any position of mechanic."

AMENDMENT NO. 1452 TO AMENDMENT NO. 1434

Mr. BAKER. Now, Mr. President, I send to the desk an amendment on behalf of the distinguished Senator from Missouri (Mr. DANFORTH) and the distinguished Senator from Texas (Mr. BENTSEN) to amendment No. 1434 and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Tennessee (Mr. BAKER), on behalf of Mr. DANFORTH and Mr. BENTSEN, proposes an amendment numbered 1452 to amendment No. 1434.

Mr. BAKER. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

AMENDMENT. No. 1434

On page 3, "Sec. 7." is amended to read as follows:

"SEC. 7. (A) The Administrator of General Services (hereinafter referred to as the administrator) shall transfer the building (occupied by the United States International Trade Commission and the United States Postal Service) and the site thereof located between Seventh and Eighth Streets, and E and F Streets, Northwest, in the District of Columbia, to the Smithsonian Institution for the use of certain art galleries of the Smithsonian Institution. Notwithstanding any other provision of law, such transfer shall be without reimbursement.

"(b)(1) The Administrator, at the earliest practicable date, shall relocate the United States International Trade Commission in a quality building that the Administrator and the Chairman of the United States International Trade Commission jointly determine is suitable to its headquarters operations and in a location in downtown, Washington, District of Columbia, which is convenient to its mission, to congressional committees, and to private groups that do business with it. The selection of the building shall be made with the concurrence of the Committee on Environment and Public Works of the Senate and the Committee on Public Works and Transportation of the House of Representatives. The Administrator and the Chairman of the United States International Trade Commission shall each report separately in writing to the Committees on Environment and Public Works and Finance of the Senate and to the Committees on Public Works and Transportation and Ways and Means of the House of Representatives within 60 days of enactment of this Act and every 30 days thereafter on the progress in meeting the provisions of this section.

"(2) The Administrator, during the period which the United States International Trade Commission and the United States Postal Service continue to occupy the present building, shall repair such building to assure an adequate level of maintenance to prevent deterioration of the building, and to assure that conditions therein are safe,

presentable and suitable to the normal operations of these agencies.

"(c) The transfer required by subsection (a) shall be made at such time when the Administrator and the Chairman of the United States International Trade Commission jointly determine that the use of the building by the United States International Trade Commission and the United States Postal Service is no longer essential.

"(d) The Administrator, in consultation with the Smithsonian Institution, is authorized to enter into such contracts and take such other action as may be necessary to make the building suitable to house certain art galleries and related activities of the Smithsonian Institution upon transfer of funds available to the Smithsonian Institution for such purposes."

● Mr. DANFORTH. Mr. President, the amendment that I am offering, along with Senator BENTSEN, to the Public Buildings Authorization Act, is designed to insure that the International Trade Commission is able to relocate to a quality building that is suitable to its needs.

The U.S. International Trade Commission has a very special relationship to Congress. It is a uniquely independent agency, and conducts its investigations without the political pressures and policy considerations that impinge on the work of executive agencies. We in Congress can be assured that information supplied to us by the Commission is not colored by such considerations. As I have stated, both in the Finance Committee and on the Senate floor, the ITC is held in high regard by everyone who has had to deal with it. It is highly professional and has the unmatched record of never missing a statutory deadline. At a time when Congress and the Nation are increasingly concerned with trade issues, the work of this Commission assumes even more importance.

As you know, Mr. President, the Committee on Finance and, specifically, its Subcommittee on International Trade, which I chair, has oversight of ITC operations. During the course of our hearings on the Commission's budget for fiscal year 1984, we were advised by Chairman Eckes that the state of the ITC building was deplorable and that Commission staff was working under difficult, depressing, and in some instances, unsafe conditions. I personally visited the building twice; and last month, several other membes of the Finance Committee toured the premises. We concluded that this distressing neglect of the historic ITC headquarters should not continue.

In our markup of the Commission's fiscal year 1984 budget authorization, we agreed to urge strongly that the Public Works Committee rectify the situation. It is truly demeaning to house a key Government agency in such circumstances. The building has long been identified with the ITC and it was my hope, as well as that of various members on the Committee on Finance and the Committee on Environment and Public Works, that the ITC be allowed to remain where it is.

I was disappointed in the decision taken by the Committee on Environment and Public Works to relocate the ITC and very much appreciated Senator BENTSEN's effort—albeit unsuccessful—to prevent it. However, if adequate safeguards can be taken to insure that the ITC will be moved to a new location suitable to its needs, I will not seek reversal of the committee's decision. Clearly, the ITC has special needs, such as a large hearing room, that must be taken into account in choosing its new location.

I recognize that the committee attempted to provide some safeguards for the ITC; however, in view of the behavior of the GSA in the past with respect to the ITC, I am skeptical that the instructions in this legislation will adequately protect the ITC's interests. The current state of the building is deplorable. In the past, when Congress specifically appropriated funds for use by GSA to repair the ITC building, GSA chose to use less than a quarter of it. By the same token, assurances offered by the Administrator of GSA to the chairman of the ITC with respect to seeking his concurrence in any relocation effort did not prevent others in GSA from virtually demanding the ITC's removal to the totally unsatisfactory Bicentennial Building.

Therefore, we are offering this amendment and would appreciate the committee accepting its provisions.●

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 1452) was agreed to.

The PRESIDING OFFICER. The question is on agreeing to the amendment, as amended.

The amendment (No. 1434), as amended, was agreed to.

AMENDMENT NO. 1453

Mr. METZENBAUM. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will state the amendment.

The assistant legislative clerk read as follows:

The Senator from Ohio (Mr. METZENBAUM) proposes an amendment numbered 1453.

At an appropriate place in the bill insert the following:

The Federal Building located at 550 Main Street, Cincinnati, Ohio shall hereinafter be named and designated as the "John Weld Peck Federal Building." Any reference in a law, map, regulation document, record, or other paper of the United States to such building shall be held to be reference to "John Weld Peck Building."

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 1453) was agreed to.

● Mr. STAFFORD. Mr. President, S. 1287, the Public Buildings Authorization Act of 1983, and its companion amendment (No. 1434) together consititute the fourth annual authorization of GSA's public buildings program reported by the Committee on Environment and Public Works. In contrast to the piecemeal process for approving prospectuses on building projects by committee resolution, as established by the Public Buildings Act of 1959, this legislation assembles an annual program subject to the scrutiny of the entire Senate. In so doing it follows the authorization procedures set out in S. 452, the Public Buildings Act of 1983, and its predecessors S. 533 and S. 2080 which passed the Senate during the 97th and 96th Congress respectively.

The reform efforts of the committee have been designed to improve congressional control over the entire public buildings program and not just the prospectus level projects which constitute less than one-fifth of the total budget of the Public Buildings Service. An annual authorization provides an opportunity to evaluate GSA's progress in meeting its own goals for this program and to insure that congressional action complements and strengthens the agency's effectiveness. In those areas where the committee believes GSA to have ineffectively pursued its objectives, report language has advanced constructive criticism. Report 98-114 to S. 1287 (May 16, 1983) conveys the committee's assessment of the nature and adequacy of GSA's efforts.

For reasons given in my statement appearing in the CONGRESSIONAL RECORD on June 28, 1983 (S9348-9352) this years authorization by the committee has been accomplished in two stages. S. 1287 as reported on May 16 establishes an aggregate monetary authorization for the public buildings program. Amendment No. 1434, which I introduced June 23 on behalf of the committee, specifies those new construction and repair and alteration projects costing in excess of $1 million that have been approved by the committee. These projects can be regarded as fully authorized candidates for further action by the Senate Committee on Appropriations. Descriptions of each project are included in my June 28 statement in the RECORD.●

The PRESIDING OFFICER. If there be no further amendment, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed as follows:

S. 1287

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this

Act may be cited as the "Public Buildings Authorization Act of 1983".

SEC. 2. No appropriation, including any appropriation from the fund established pursuant to section 210(f) of the Federal Property and Administrative Services Act of 1949, shall be made by the Congress or obligated by the Administrator unless it has been authorized by the Congress in accordance with this Act.

SEC. 3. (a) No public building construction, renovation, repair, or alteration shall be commenced unless an appropriation has first been made in the same fiscal year for which such appropriation is authorized and for the estimated cost of completion of such construction, renovation, repair, or alteration.

(b) Beginning in fiscal year 1985, no lease shall be entered into unless the authority to enter into contracts has first been made for the maximum cost of such lease over the entire term in such amounts as are specified in annual appropriations Acts and in the fiscal year for which such lease is authorized.

SEC. 4. There is hereby authorized to be appropriated for fiscal year 1984 not to exceed in the aggregate the amount of $2,169,813,000 from the revenues and collections deposited into the fund pursuant to section 210(f) of the Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 490(f)), for the real property management and related activities of the Public Buildings Service of which:

(a) Not to exceed $172,510,000 shall be available for fiscal year 1984 as follows:

(1) For construction of public buildings (including funds for site and expenses) at the following locations and maximum construction costs:

Massachusetts, Waltham, Federal archives and records center (extension)	$1,621,000
Oregon, Portland, Federal office building	67,475,000
Tennessee, Knoxville, Federal office building	14,990,000
Washington, Seattle, Federal archives and records center (extension)	3,525,000

(2) For demolition of the public buildings at the following location and maximum demolition cost:

California, Los Angeles, warehouses	$599,000

(3) $1,000,000 for construction of minor public buildings of less than ten thousand gross square feet of space;

(4) $83,300,000 for purchase of sites and buildings at the following locations and maximum acquisition costs:

Pennsylvania, Pittsburgh, post office courthouse	$23,300,000
Other selected purchases including options to purchase	60,000,000

(b) Not to exceed $181,332,000 shall be available for fiscal year 1984 as follows:

(1) For renovations, alterations, and repairs of public buildings at the following locations and at the following maximum project costs of $1,000,000 or more:

Arkansas, Little Rock, post office-courthouse	$4,269,000
California, San Francisco, Appraisers Building	1,200,000
Colorado, Denver, Federal Center Building 20	6,427,000
District of Columbia, Auditors Building	9,294,000
District of Columbia, Blair House	6,500,000
District of Columbia, Liberty Loan Building	2,757,000
District of Columbia, Pension Building	2,650,000
Georgia, Atlanta, Federal Annex	9,193,000
Illinois, Chicago, J. C. Kluczynski Federal Building	3,319,000
Maryland, Baltimore, Middle River Federal Depot	1,892,000
Maryland, Suitland, Naval Intelligence Command Building No. 1	9,760,000
Massachusetts, Boston, John F. Kennedy Federal Building	2,499,000
Michigan, Detroit, Federal building-courthouse	4,957,000
Michigan, Detroit, Patrick V. McNamara Federal Building	5,474,000
North Carolina, Asheville, Grove Arcade Federal Building	8,364,000
Ohio, Cincinnati, post office-courthouse	1,138,000
Ohio, Cleveland, Anthony J. Celebrezze Federal Building	3,951,000
Pennsylvania, Pittsburgh, post office-courthouse	8,975,000
Texas, San Antonio, post office-courthouse	6,190,000
Utah, Ogden, Internal Revenue Service	3,036,000
Washington, Yakima, Federal building-courthouse	1,025,000

(2) $14,000,000 for renovations and repairs of public buildings acquired by purchase: *Provided,* That prior to obligation of funds granted under authority of this subsection, approval of the Senate Committee on Environment and Public Works and the House Committee on Public Works and Transportation is secured.

(3) Section 3(a) of this Act notwithstanding, for design of renovations, alterations, and repairs of public buildings at the following locations and maximum costs:

District of Columbia, steam distribution system	$886,000
Louisiana, New Orleans, Hebert Federal Building	611,000

(4) $59,465,000 for renovations and repairs of public buildings at project costs of less than $1,000,000.

(5) $3,500,000 for alterations of leased buildings, the maximum cost for a single building being less than $250,000.

(c) Not to exceed $880,500,000 shall be available for fiscal year 1984 as follows:

(1) $28,201,000 for rental increases due to lease expirations and for expansion space, and

(2) $852,299,000 for payments in fiscal year 1984 to provide for space under lease prior to fiscal year 1984, including increases in operating costs and taxes.

(d) Not to exceed $686,500,000 shall be available for fiscal year 1984 for real property operations.

(e) Not to exceed $103,471,000 shall be available for fiscal year 1984 for program direction.

(f) Not to exceed $145,500,000 shall be available for fiscal year 1984 for payment of principal, interest, taxes, and any other obligation for public buildings acquired by purchase contract.

SEC. 5. Funds appropriated under section 4 of the Act for construction, renovation, repair, or alteration shall remain available for obligation and expenditure without regard to fiscal year limitations: *Provided,* That construction, renovation, repair, or alteration has commenced in the same fiscal year which funds are made available.

SEC. 6. Ten per centum of the funds made available pursuant to this Act to the Public Buildings Service for renovation, alteration, and repair of public buildings and for payment of leases on buildings shall be available for repair or alteration projects and leases, respectively, not otherwise authorized by this Act, if the Administrator certifies that the space to be repaired, altered, or leased resulted from emergency building conditions or changing or additional programs of Federal agencies. Funds for such projects may not be obligated until thirty days after the submission by the Administrator of an explanatory statement to the Committee on Environment and Public Works of the Senate and the Committee on Public Works and Transportation of the House of Representatives. The explanatory statement shall, among other things, include a statement of the reasons why such project or lease cannot be deferred for authorization in the next succeeding fiscal year.

SEC. 7. (a) The Administrator of General Services (hereinafter referred to as the Administrator) shall transfer the building (occupied by the United States International Trade Commission and the United States Postal Service) and the site thereof located between Seventh and Eighth Streets, and E and F Streets, Northwest, in the District of Columbia, to the Smithsonian Institution for the use of certain art galleries of the Smithsonian Institution. Notwithstanding any other provision of law, such transfer shall be without reimbursement.

(b)(1) The Administrator, at the earliest practicable date, shall relocate the United States International Trade Commission in a quality building that the Administrator and the Chairman of the United States International Trade Commission jointly determine is suitable to its headquarters operations and in a location in downtown, Washington, District of Columbia, which is convenient to its mission, to congressional committees, and to private groups that do business with it. The selection of the building shall be made with the concurrence of the Committee on Environment and Public Works of the Senate and the Committee on Public Works and Transportation of the House of Representatives. The Administrator and the Chairman of the United States International Trade Commission shall each report separately in writing to the Committees on Environment and Public Works and Finance of the Senate and to the Committees on Public Works and Transportation and Ways and Means of the House of Representatives within sixty days of enactment of this Act and every thirty days thereafter on the progress in meeting the provisions of this section.

(2) The Administrator, during the period which the United States International Trade Commission and the United States Postal Service continue to occupy the present building, shall repair such building to assure an adequate level of maintenance to prevent deterioration of the building, and to assure that conditions therein are safe, presentable and suitable to the normal operations of these agencies.

(c) The transfer required by subsection (a) shall be made at such time when the Administrator and the Chairman of the United States International Trade Commission jointly determine that the use of the building by the United States International Trade Commission and the United States Postal Service is no longer essential.

(d) The Administrator, in consultation with the Smithsonian Institution, is authorized to enter into such contracts and take such other action as may be necessary to make the building suitable to house certain art galleries and related activities of the Smithsonian Institution upon transfer of funds available to the Smithsonian Institution for such purposes.

SEC. 8. Notwithstanding any other provision of law, none of the funds made available to the General Services Administration pursuant to section 210(f) of the Federal Property and Administrative Services Act of 1949, shall be obligated or expended after the date of enactment of this Act for procurement by contract of any service which, before such date, was performed by individuals in their capacity as employees of the General Services Administration in any position of mechanic.

SEC. 9. The Federal building located at 550 Main Street, Cincinnati, Ohio, shall hereinafter be named and designated as the "John Weld Peck Federal Building". Any reference in a law, map, regulation, document, record, or other paper of the United States to such building shall be held to be a reference to John Weld Peck Building.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. METZENBAUM. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

BUDGET ACT WAIVER

Mr. BAKER. Mr. President, I have cleared on this side Calendar No. 246, which is H.R. 1746. I inquire of the minority leader if he is in a position to clear that item for action at this time, as well as the accompanying Budget Act waiver, which is Calendar Order No. 268, Senate Resolution 157.

Mr. BYRD. Mr. President, both those items are cleared on this side.

Mr. BAKER. I ask the Chair to lay before the Senate Calendar No. 268, Senate Resolution 157, the Budget Act waiver to accompany H.R. 1746.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered. The clerk will state the resolution by title.

The assistant legislative clerk read as follows:

A Senate Resolution (S. Res. 157) waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of H.R. 1746.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 157) was considered and agreed to as follows:

S. RES. 157

Resolved, That pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of such Act are waived with respect to the consideration of H.R. 1746. Such waiver is necessary because H.R. 1746 authorizes the enactment of new budget authority which would become available in fiscal year 1983 and such bill was not reported on or before May 15, 1982, as required by section 402(a) of the Congressional Budget Act of 1974, for such authorizations. Such waiver is also necessary because H.R. 1746 authorizes the exercise of new budget authority which would become available in fiscal year 1984 and such bill was not reported on or before May 15, 1983, as required in section 402(a) of the Congressional Budget Act of 1974, for such authorizations.

The waiver of section 402(a) is necessary to permit the Navajo and Hopi Relocation Commission to fulfill its statutory mission of implementing Public Law 93-531 (88 Stat. 1712).

H.R. 1746 provides an authorization increase to $7,700,000 from the preexisting level of $5,500,000 for section 14 activities under Public Law 93-531 (88 Stat. 1712), and a new authorization of $15,000,000 for fiscal year 1983 through 1987, for section 15 activities under Public Law 93-531 (88 Stat. 1712).

The House Appropriations Subcommittee on Interior has included funds in its fiscal year 1984 markup for implementation of these program activities. The sums provided in the subcommittee markup are included in the President's fiscal year 1984 budget request. The Appropriations Committees of the Senate and the House of Representatives have, therefore, had adequate notice of this authorization. Thus, congressional consideration of this authorization will in no way interfere with or delay the appropriations process.

NAVAJO AND HOPI INDIAN RELOCATION COMMISSION AUTHORIZATION

Mr. BAKER. Mr. President, I ask that the Chair lay before the Senate H.R. 1746, Calendar Order No. 246.

The PRESIDING OFFICER. Is there objection? Without objection, the bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (H.R. 1746) to authorize appropriations for the Navaho and Hopi Indian Relocation Commission.

Mr. BAKER. Mr. President, I ask unanimous consent that that item be temporarily laid aside and recur as the pending business at the suggestion of the majority leader after consulting with the minority leader.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, the reason for that, I say to my friend, the minority leader, is that one Senator on this side had asked to be present on the floor at the time of consideration of this item. I should like to have him advised that we are doing so at this time.

THE CALENDAR

Mr. BAKER. Mr. President, there are three other items that are cleared for action on the Calendar at this time. I identify all three for the consideration of the minority leader. They are Calendar Order Nos. 266, 269, and 270. Is the minority leader in a position to clear for action by unanimous consent all three or any of that list of items?

Mr. BYRD. Mr. President, Calendar Order Nos. 266, 269, and 270 have been cleared on this side.

EL SALVADOR

The Senate proceeded to consider the bill (H.R. 1271) with regard to Presidential certifications on conditions in El Salvador.

● Mr. GLENN. Mr. President, I sincerely appreciate the leadership's cooperation in bringing this measure to the Senate floor in a timely fashion. In Public Law 97-113 the Congress established a process whereby the continuation of U.S. military aid to El Salvador was dependent upon certification by the President every 6 months that the Government of El Salvador was making significant progress in several important areas; namely, control of its security forces, compliance with internationally recognized human rights, implementation of economic and political reforms and commitment to elections, including good faith efforts to begin discussions with all major political factions which have declared their willingness to find and implement an equitable political solution. In addition, in the first certification only, the President was required to include a section on the progress being made in the investigation of the murders of four American churchwomen and two land reform specialists. Obviously the Congress fully expected that these crimes would be completely investigated and those responsible brought to justice at the earliest possible date. In retrospect, Mr. President, we were unduly and unfortunately optimistic. Now, over 2½ years later, as we await the final Presidential certification required under Public Law 97-113, two more Americans have been brutally murdered and no one has been brought to justice for these crimes. The bill we are considering today, H.R. 1271, seeks to insure that a report on progress in the investigation of the murders of the Americans remains an integral part of the certification due on July 20. This bill passed the House by a vote of 416 to 2 on June 7 and was approved yesterday by the Senate Foreign Relations Committee without dissent. Further, the Foreign Relations Committee has recommended that the certification process, including permanently this item, be extended for the fiscal year 1984.

One can easily understand the despair and frustration of the families of the murdered Americans. They have

waited over 2½ years for justice, only to be disappointed time and again. Not only are the murders personal tragedies for the family and friends of those killed but also they remain a major issue in the U.S. relationship with El Salvador, coming to symbolize, as they have, the broad pattern of violence against civilians by the ultraright and elements of the security forces which are tragically commonplace in Salvadoran society. My concern about the threat this violence poses to democratic development in El Salvador prompted me to introduce an amendment to the fiscal 1984 foreign assistance bill which conditions our continued military aid on a demonstration of a good faith effort by the Government of El Salvador to begin the process of eradicating the violence and terrorism of the "death squads" and the ultraright. I believe that the brutal murders of the Americans should not be allowed to drop from our consciousness, nor be downrated in the context of our bilateral relationship with El Salvador. The families of the murdered Americans deserve the persistence of their Government in seeing that the deaths of their loved ones are fully investigated; I believe the American people expect no less. We cannot leave this important business unfinished. The bill before us would insure that this item remains integral to the certification process. Thus I trust my colleagues will give it their deserved support.●

The bill was ordered to a third reading, read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

EMERGENCY ASSISTANCE TO THE PEOPLE OF ETHIOPIA

The Senate proceeded to consider the resolution (S. Res. 168) expressing the sense of the Senate with respect to the provision of emergency assistance to the people of Ethiopia.

● Mr. PERCY. Mr. President, I am pleased to cosponsor the resolution of the Senator from Arizona. We are all aware of the reports coming out of Ethiopia about the large-scale hunger problem.

In fairness to the administration, I want to point out for the record that the U.S. Government has already provided $3.3 million in humanitarian aid in fiscal year 1983 to benefit Ethiopia. This includes 180 tons of milk powder, 160 tons of vegetable oils, and 1,100 tons of blended foods. In addition, we have funded a Catholic Relief Services program supplying 8,200 tons of food.

We should also be fully aware of the fact that the problem in Ethiopia is not simply a matter of food shortages brought on by drought. Internal military conflicts, a limited number of working transport vehicles, and the lack of good roads have hampered the distribution of whatever food supplies are already on hand. Moreover, there have been allegations, as there often are in international relief efforts, of diversion of food supplies.

If, as some observers predict, the hunger problem continues to worsen, the appeals for assistance will also continue. Whatever the international response is, it must be combined with a determined effort on the part of the Ethiopian Government itself to facilitate equitable distribution of the relief supplies.

Unfortunately, some of the reported public statements of administration officials have contributed to a perception that the United States may be limiting its aid for political reasons. Indeed, United States-Ethiopian relations are not very good. Just earlier this month, we heard another anti-American harangue by the country's leader, Colonel Mengistu.

Nevertheless, longstanding American policy opposes the use of food as a political weapon. This policy reflects the generosity and compassion of the American people. We must reaffirm that policy today.

Mr. President, I ask that my recent letter to Peter McPherson, Administrator of AID, regarding Ethiopia be printed in the RECORD at this point.

The letter follows:

COMMITTEE ON FOREIGN RELATIONS,
Washington, D.C., June 27, 1983.

Hon. PETER MCPHERSON,
Administrator, Agency for International Development, Washington, D.C.

DEAR PETER: I am writing to you about the drought and hunger situation in Ethiopia. As you are well aware, reports continue to reach us about the magnitude of the problem. Already the specter of mass starvation has been raised if the international community, and especially the United States as the world's major food supplier, does not respond adequately and quickly.

It is my understanding that AID has approved some limited requests for assistance, but many observers are concerned that the response so far has been very modest compared to the need. An appeal from the UN Disaster Relief Organization is apparently still pending for additional emergency food and medical supplies and for transport assistance to facilitate the distribution of those food supplies which are already on hand. I also understand that Ethiopia may be removed from the list of countries slated to receive Title II P.L. 480 in FY 1984.

I am disturbed that the United States Government may be allowing a perception to develop that for political reasons our country is turning its back on a human crisis to which we would otherwise generously respond. If our contributions will make the difference between people living or dying, then there really is no choice involved. I urge you as Administrator of AID to respond to the calls for additional assistance fully and expeditiously.

Warm regards,

CHARLES H. PERCY,
Chairman.●

The resolution (S. Res. 168) was agreed to.

The preamble was agreed to.

The resolution, with the preamble, is as follows:

S. RES. 168

Whereas hundreds of thousands of Ethiopians are presently threatened with starvation;

Whereas tens of thousands of Ethiopian children will not live until the November harvest unless emergency food assistance is provided them in the immediate future;

Whereas existing supply routes and transportation facilities are inadequate to get emergency food aid to relief distribution points in Ethiopia;

Whereas the United States has a longstanding policy of providing emergency humanitarian relief to the people of a foreign country threatened with starvation regardless of the political differences the Government of the United States may have with the government of that foreign country; and

Whereas the humanitarian assistance programs of the United Nations and European countries cannot adequately meet the extraordinary needs of the Ethiopian people without the help of the United States: Now, therefore, be it

Resolved, That it is the sense of the Senate that the President should exercise the authority vested in him by law to make available immediately to the starving people of Ethiopia emergency food supplies and other emergency supplies and to take such actions as may be necessary to insure that the food and other emergency supplies made available by the United States are transported to those areas of Ethiopia that are experiencing famine.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the resolution passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

NATIONAL ICE CREAM DAY

The resolution (S. Res. 169) to express the sense of the Senate that July 15, 1983, should be observed as "National Ice Cream Day" was considered and agreed to.

The preamble was agreed to.

The resolution, with its preamble, is as follows:

S. Res. 169

Whereas ice cream is a nutritious and wholesome food enjoyed by millions of people throughout the United States;

Whereas the ice cream industry uses nearly 10 per centum of the milk produced by United States dairy farmers, thereby contributing substantially to the economic well-being of the Nation's dairy industry;

Whereas the ice cream industry has annual sales of over $3,000,000,000 and provides jobs for thousands of United States citizens; and

Whereas the Nation's dairy-farmer-owned cooperatives will hold a National Ice Cream

Celebration during the week of July 10 through July 16, 1983: Now, therefore, be it

Resolved, That it is the sense of the Senate that July 15, 1983, should be celebrated as "National Ice Cream Day", and that all citizens should be encouraged to observe such day with appropriate ceremonies and activities.

SEC. 2. The Secretary of the Senate shall transmit copies of this resolution to the President and the Secretary of Agriculture.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the resolution passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Now, Mr. President, I am advised that the Senator who wished to be present on the floor indicates that he is prepared for the Senate to go ahead with this consideration at this time.

Therefore, in accordance with the authority previously granted and assuming that the minority leader will concur with that, I ask unanimous consent that the Hopi Indian bill be considered.

NAVAJO AND HOPI INDIAN RELOCATION COMMISSION AUTHORIZATION

The Senate continued with the consideration of H.R. 1746.

The PRESIDING OFFICER. The bill is before the Senate and open to amendment. If there be no amendment to be offered, the question is on the third reading and passage of the bill.

The bill (H.R. 1746) was ordered to a third reading, was read the third time, and passed.

Mr. BAKER. I move to reconsider the vote by which the bill was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

THE EXECUTIVE CALENDAR

Mr. BAKER. Mr. President, that completes my folder of items that are cleared for action on the Calendar of Legislative Business. I have on this side a number of items that are cleared for action on the Executive Calendar.

May I inquire once more of the minority leader if he is in a position to approve for action by unanimous consent the nominations beginning at the top of page 2 under the Office of Personnel Management, to include all of the nominations on page 2 and all of the nominations on page 3.

Mr. BYRD. Mr. President, there is no objection on this side.

EXECUTIVE SESSION

Mr. BAKER. Mr. President, in view of that, I ask unanimous consent that the Senate now go into executive session for the purpose of considering the nominations just identified.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senate proceeded to the consideration of executive business.

Mr. BAKER. Mr. President, I ask unanimous consent that these nominations be considered and confirmed en bloc.

The PRESIDING OFFICER. Without objection, the nominations are considered and confirmed en bloc.

The nominations considered and confirmed en bloc are as follows:

OFFICE OF PERSONNEL MANAGEMENT

David H. Martin, of Maryland, to be Director of the Office of Government Ethics.

DEPARTMENT OF EDUCATION

Peter H. Raven, of Missouri, to be a Member of the National Museum Services Board for a term expiring December 6, 1987. (Reappointment)

ENVIRONMENTAL PROTECTION AGENCY

Lee M. Thomas, of South Carolina, to be an Assistant Administrator of the Environmental Protection Agency.

DEPARTMENT OF STATE

Robert Brendon Keating, of the District of Columbia, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Democratic Republic of Madagascar and to serve concurrently and without additional compensation as Ambassador Extraordinary and Plenipotentiary of the United States of America to the Federal and Islamic Republic of the Comoros.

L. Paul Bremer III, of Connecticut, a Career Member of the Senior Foreign Service, Class of Minister-Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Kingdom of the Netherlands.

Hume Alexander Horan, of New Jersey, a Career Member of the Senior Foreign Service, Class of Minister-Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Democratic Republic of the Sudan.

Robert E. Fritts, of Maryland, a Career Member of the Senior Foreign Service, Class of Minister-Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Ghana.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the nominations were confirmed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, I ask unanimous consent that the President be immediately notified of these nominations.

The PRESIDING OFFICER. Without objection, it is so ordered.

NOMINATION OF ROBERT BRENDON KEATING TO BE AMBASSADOR TO MADAGASCAR

Mr. CRANSTON. Mr. President, in the Foreign Relations Committee, I voted against the nomination of Robert B. Keating to be Ambassador to Madagascar for two reasons which lead me to doubt his qualifications.

First, I am not satisfied with Mr. Keating's explanation for the letters he wrote, while a member of the U.S. Law of the Sea (LOS) delegation, to various individuals in industry criticizing the changes in the administration's operating instructions to the delegation. These letters, purportedly written as "private" communications by Mr. Keating, can be fairly read only as being intended to create misgivings on the part of the industry recipients about the then new negotiating instructions. Despite Mr. Keating's suggestion that his superior, Assistant Secretary James Malone, had authorized the writing of these letters, Mr. Malone has advised the committee that, although he was aware of the letters, he did not authorize them.

Second, based on the record, I reluctantly conclude that Mr. Keating withheld information from the committee about having, while a member of the LOS delegation, actively solicited from industry representatives support for an ambassadorial nomination. At our May 18 hearing, Mr. Keating flatly denied doing so. Four industry representatives have since advised the committee that Mr. Keating had solicited their endorsements at that time, in some cases on numerous occasions.

I find Mr. Keating's explanations with respect to these two matters to be so lacking in candor and credibility that I am unable to conclude that he has the requisite qualities and qualifications to represent the United States and its policies and interests as an official U.S. Government emissary overseas.

LEGISLATIVE SESSION

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate return to legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, that completes the action on the Executive Calendar. I am advised that at least one Senator wishes to speak and that he is in the Chamber. I yield the floor.

The PRESIDING OFFICER. The Senator from Minnesota is recognized.

THE REA LOAN PROGRAMS

Mr. BOSCHWITZ. Mr. President, I should like to briefly comment on a statement that I heard made earlier on the floor by my distinguished colleague from the State of Washington (Mr. GORTON) when he was talking about the credit budget in a colloquy together with Senator MOYNIHAN from New York.

I am a cosponsor of the bill that he introduced today with respect to the credit budget.

The PRESIDING OFFICER. The Senate will be in order so the Senator from Minnesota can be heard.

The Senator from Minnesota is recognized.

Mr. BOSCHWITZ. I am a cosponsor, Mr. President, of the credit budget bill that the Senator from Washington has introduced today. I admire his work on the Budget Committee, where I serve with him. Few Members of the Senate know more about the budget and its processes than does Senator GORTON.

I admire him for the hard work that he has done in that committee. Indeed, I think that he has helped create a good deal of forward progress.

I want to speak a little bit about the colloquy, however, that he held with Senator MOYNIHAN about the REA. He spoke about the $1.1 billion in direct loans that the REA will make this year, and he also spoke about the loan guarantees. Indeed, they should be part of the credit budget. Normally when we speak about direct loans in the Senate Chamber, we refer to loans that are an on-budget expense. It is important to note that in the agricultural appropriations bill that we passed today, there was a figure somewhat less than $30 million for the REA and rural telephone, and that was all for administrative expenses. None of these loans about which the Senator from Washington has spoken impacts the budget, inasmuch as it is a revolving fund. All these loans will be made directly from that revolving fund, and there is not a budget impact.

It is interesting to note that the REA has been efficient in the way it has administered loans over the years. Its staff has declined significantly since 1951. The staff time taken to process these loans has been cut nearly in half.

It is also important to note that as of September 30, 1982, the Rural Electrification administration has collected more than $9.9 billion in principal and interest payments from its rural electric and telephone borrowers and that total losses to date have amounted to less than $45,000.

That is a remarkable record, Mr. President. It is remarkable when we think of how many homes have been able to have the advantages of telephones and electricity because of the remarkable and meaningful work the REA has done over the years. Without the REA and the rural telephone programs, the rural parts of America would certainly not have been able to retain the importance in our community that they now have. They perhaps would have almost shriveled away in the face of their competition from the urban parts of our country.

So it is important to note, as we consider the agricultural appropriations bill, that all the money appropriated this year goes only for administration. The insured loans are made out of a revolving fund. Although it is important to gather together and quantify all off-budget loans and credit guarantees in a budget format, the loans made in REA do not have a budget impact.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. BAKER. Mr. President, I indicated earlier to the minority leader, and I have stated on the floor, that it is the wish of the leadership on this side to proceed to the consideration of the Department of Defense authorization bill when we return on Monday, July 11.

I have had extensive conversations with the minority leader, with the chairman of the committee, with Senator KENNEDY, and others, and I believe we have an understanding on how this matter will be arranged and handled. I am prepared now to put the request.

I ask unanimous consent that at the conclusion of the time for the transaction of routine morning business on Monday, July 11, 1983, as previously ordered, that the Senate then turn to the consideration of S. 675, the Department of Defense authorization bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I feel lonely. After all we have been through for the last few weeks and all we have accomplished, I find that only the leadership is here. I have consulted with the minority leader, who has just left the Chamber this momemt, who indicates he has no further matter to place before the Senate. I do not. I see no Senator seeking recognition.

ADJOURNMENT UNTIL MONDAY, JULY 11, 1983

Mr. BAKER. Therefore, Mr. President, with some enthusiasm, I move, in accordance with the provisions of Senate Concurrent Resolution 48, that the Senate now stand in adjournment until 12 noon on July 11, 1983.

The motion was agreed to; and at 6:05 p.m., the Senate adjourned until Monday, July 11, 1983, at 12 noon.

NOMINATIONS

Executive nominations received by the Senate June 29, 1983:

THE JUDICIARY

Stephen J. Swift, of California, to be a judge of the U.S. Tax Court for a term expiring 15 years after he takes office, vice Leo H. Irwin, retired.

Judith W. Rogers, of the District of Columbia, to be an associate judge of the District of Columbia Court of Appeals for the term of 15 years, vice Catherine B. Kelly, retired.

Bruce D. Beaudin, of the District of Columbia, to be an associate judge of the Superior Court of the District of Columbia for the term of 15 years, vice John D. Fauntleroy, retired.

A. Franklin Burgess, of the District of Columbia, to be an associate judge of the Superior Court of the District of Columbia for the term of 15 years, vice Joseph M. F. Ryan, Jr., retired.

OCCUPATIONAL SAFETY AND HEALTH REVIEW COMMISSION

Elliot Ross Buckley, of Virginia, to be a member of the Occupational Safety and Health Review Commission for the term expiring April 27, 1989, vice Bertram R. Cottine, term expired.

CONFIRMATIONS

Executive nominations confirmed by the Senate June 29, 1983:

DEPARTMENT OF EDUCATION

Peter H. Raven, of Missouri, to be a member of the National Museum Services Board for a term expiring December 6, 1987.

DEPARTMENT OF STATE

Robert Brendon Keating, of the District of Columbia, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Democratic Republic of Madagascar and to serve concurrently and without additional compensation as Ambassador Extraordinary and Plenipotentiary of the United States of America to the Federal and Islamic Republic of the Comoros.

L. Paul Bremer III, of Connecticut, a career member of the Senior Foreign Service, class of Minister-Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Kingdom of the Netherlands.

Hume Alexander Horan, of New Jersey, a career member of the Senior Foreign Service, class of Minister-Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Democratic Republic of the Sudan.

Robert E. Fritts, of Maryland, a career member of the Senior Foreign Service, class of Minister-Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Ghana.

Langhorne A. Motley, of Alaska, to be an Assistant Secretary of State.

The above nominations were approved subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.

OFFICE OF PERSONNEL MANAGEMENT

David H. Martin, of Maryland, to be Director of the Office of Government Ethics.

ENVIRONMENTAL PROTECTION AGENCY

Lee M. Thomas, of South Carolina, to be an Assistant Administrator of the Environmental Protection Agency.

HOUSE OF REPRESENTATIVES—*Wednesday, June 29, 1983*

The House met at 10 a.m. and was called to order by the Speaker pro tempore (Mr. WRIGHT).

DESIGNATION OF SPEAKER PRO TEMPORE

The SPEAKER pro tempore laid before the House the following communication from the Speaker:

WASHINGTON, D.C., *June 28, 1983.*

I hereby designate the Honorable JIM WRIGHT to act as Speaker pro tempore on Wednesday, June 29, 1983.

THOMAS P. O'NEILL, Jr.,
Speaker of the House of Representatives.

PRAYER

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

Enable us, O God, to see the many avenues of life where acts of charity toward others are beneficial for those who give and those who receive. May we recognize opportunities for good works wherever we meet people, whether with families, or friends, at work or play, with individuals or with the structures of society. Help us to understand that Your love, O God, is not limited to places of worship or the liturgies of faith, but exists wherever people gather together in Your beautiful creation. Amen.

THE JOURNAL

The SPEAKER pro tempore. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed without amendment a bill of the House of the following title:

H.R. 2713. An act to amend the Public Health Service Act to authorize appropriations to be made available to the Secretary of Health and Human Services for research for the cause, treatment, and prevention of public health emergencies.

The message also announced that the Senate had passed bills of the following titles, in which the concurrence of the House is requested:

S. 373. An act to provide comprehensive national policy dealing with national needs and objectives in the Arctic; and

S. 1341. An act to revise and extend the Education of the Handicapped Act, and for other purposes.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. The Chair will announce that proceedings under the 1-minute rule will be postponed.

The Chair at this time recognizes the gentleman from Massachusetts (Mr. BOLAND).

CONFERENCE REPORT ON H.R. 3133, HOUSING AND URBAN DEVELOPMENT—INDEPENDENT AGENCIES APPROPRIATIONS, 1984

Mr. BOLAND. Mr. Speaker, I call up the conference report on the bill (H.R. 3133) making appropriations for the Department of Housing and Urban Development and for sundry independent agencies, boards, commissions, corporations, and offices for the fiscal year ending September 30, 1984, and for other purposes.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Pursuant to the rule, the conference report is considered as having been read.

(For conference report and statement, see proceedings of the House of June 23, 1983.)

The SPEAKER pro tempore. The gentleman from Massachusetts (Mr. BOLAND) will be recognized for 30 minutes, and the gentleman from New York (Mr. GREEN) will be recognized for 30 minutes.

The Chair recognizes the gentleman from Massachusetts (Mr. BOLAND).

GENERAL LEAVE

Mr. BOLAND. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the conference report on the bill, H.R. 3133, as well as on the Senate amendments reported in disagreement, and that I may include tables, charts, and other extraneous material.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. BOLAND. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I first want to thank the gentleman from New Hampshire for his courtesy in permitting us to move ahead with the conference report on this bill. We have assurances from the majority leader of the Senate that if this conference report reaches the Senate by a quarter past 11 this morning, the Senate will vote on it and send it down to the President. This will be the first time in 7 years, that an appropriation bill has been passed by both bodies and sent to the President for signature before the end of June. This is a bit of a record.

Mr. Speaker, we bring back to the House today the conference report on the 1984 HUD-independent agencies appropriation bill. As we all know, this has been a difficult and trying year for the budget process. When it became clear that the first budget resolution would be delayed, the House decided to move ahead with its appropriations bills—and this was the first appropriations bill passed.

I was very pleased that the conference report on the first budget resolution was adopted by both bodies last week. In fact, that occurred on the same day we were reaching agreement in conference on the differences in this bill. Absent the formal section 302(b) allocations, we made assumptions and informal allocations to each subcommittee. I am happy to report to you that this bill is within the levels that were apparently assumed in the budget resolution as finally approved.

In the past few weeks we have all heard veiled—and sometimes not so veiled—threats from the White House that the President will veto appropriations bills that bust the budget. Well, this bill is above the President's budget request. It provides $55.8 billion in new budget authority, which is $6.2 billion over the request—virtually all of which is in the assisted housing area. For outlays, however, we are below the budget request—by over $100 million in 1984.

This is a good bill—the conference agreement reached with the Senate is a very responsible one. This bill is also one that I can guarantee you the President will sign.

Let me give you some of the specifics. For assisted housing the bill provides up to 100,000 incremental units, including 5,000 units of public housing new construction. We have not provided a single new public housing unit for the past 2 years. This action begins to redress that problem. The bill also provides 2,500 Indian housing units and 14,000 units for the section 202 elderly or handicapped program. We have also raised the limitations on FHA and GNMA loan commitments above the budget request—so that these limitations will not hamper

housing construction and economic recovery.

Once again this year the Solar Bank has been funded—at $25 million—an increase of $5 million over 1983. The community development block grant program, UDAG and general revenue sharing have all been funded at or near the President's requested levels.

The Consumer Product Safety Commission gets a boost of $3 million over the budget request of $32 million to reverse the declining trend in that agency in the past few years.

For the Environmental Protection Agency this bill includes every penny that Administrator Ruckelshaus requested in his recent budget amendment—plus $30 million for combined sewer overflow projects above the request.

The question of how to go about rebuilding EPA has been a controversial one. When the House acted on this bill the gentleman from Colorado's amendments added some $220 million. At that time I questioned whether EPA could effectively spend that much money, and I urged that we give Mr. Ruckelshaus a chance to make his own recommendations.

I have the greatest respect for Mr. Ruckelshaus and confidence in his ability to put EPA back on the right track. It was my pleasure to hear his address on June 22 before the National Academy of Sciences, and I hope other Members had the opportunity to attend. His remarks went right to the heart of the problem and the importance of relying on solid scientific evidence to make sensible decisions over very tough and sometimes emotional issues related to public risk and the environment. I recommend his remarks to you strongly if you did not have the chance to attend.

I also would like to congratulate Mr. Ruckelshaus for bringing some outstanding people into top management positions at EPA. His selection of Al Alm, currently his special assistant, deserves special mention. I have known Al Alm for more than 10 years since he was at the Council on Environmental Quality and at EPA in the early 1970's. He has proven his abilities time after time and I am glad to see him as part of the fine team Mr. Ruckelshaus is assembling at EPA.

As I have said before, I think we have good reason to have confidence in EPA today. I promised the Members of the House when this bill was on the floor for passage that the Appropriations Committee would give favorable consideration to Mr. Ruckelshaus' revised budget request. And that is exactly what this conference report does. This bill includes everything the EPA Administrator considers his Agency needs—additions above the original request of $165,500,000 and 800 people in the operating programs and $100 million and 300 people for Superfund. And, $30 million has been added for combined sewer overflow projects.

These are substantial increases and I am convinced that this is the responsible way to put EPA back on track. If you refer to the statement of the managers—pages 9 and 10—in the conference report you will find specific allocations and directions that assure priority areas are funded.

For the Federal Emergency Management Agency, we have again denied most of the increases requested for civil defense crisis relocation. We have, however, added more than $20 million for those activities that are related to a truly "integrated" civil defense program.

For NASA, this bill adds $71 million above the request. Of this net increase, $50 million is for orbiter and engine spares to assure the reliability and effectiveness of the shuttle—and $45 million to partly accommodate a serious funding problem within the space telescope program.

Science education activities in the National Science Foundation are funded at $36 million above the budget—for a 1984 total of $75 million. The committee believes this add-on will help reverse a long slide in science and math in this country.

Mr. Speaker, I share the concern of others that the Nation maintain and expand the number of highly qualified engineering and computer science professionals. It is my strong desire that the National Science Foundation target, through the grant awards process, those emergency programs which have demonstrated their ability to integrate students into high technology and engineering industries, and are in the process of or plan to upgrade their facilities in order to provide for a better learning/research environment, including the development of a computer science counterpart to their engineering programs.

Overall, the Veterans' Administration is funded approximately at the administration's request—after the use of $60 million in savings for the working reserve is considered. The $60 million reduction in the major construction request is offset by the increased use of savings from completed construction projects.

Mr. Speaker, the statement of the managers indicated that the 1984 medical care appropriation includes funding to support 190,554 FTEE's. That number should be 190,544.

In summary, the conference agreement before you today is a balanced and sensible bill. It provides a minimum level for subsidized housing—it will begin to rebuild EPA—it will increase science education by 150 percent above 1983—it funds all the existing programs critical to veterans—and it provides sufficient funds for each of the other independent agencies. I urge you to adopt this conference agreement.

COMPARATIVE STATEMENT OF NEW BUDGET (OBLIGATIONAL) AUTHORITY

Mr. Speaker, I yield to the gentleman from New York (Mr. BIAGGI).

PERMISSION FOR SUBCOMMITTEE ON MERCHANT MARINE OF COMMITTEE ON MERCHANT MARINE AND FISHERIES TO SIT AT 10 A.M. ON TODAY.

Mr. BIAGGI. Mr. Speaker, I ask unanimous consent that the Subcommittee on Merchant Marine of the Committee on Merchant Marine and Fisheries be permitted to sit at 10 on Wednesday, June 29, 1983, for the purpose of marking up H.R. 1242—a bill to promote increased transportation of bulk commodities in the foreign commerce of the United States in U.S.-flag ships, to strengthen the defense industrial base, and for other purposes.

The ranking minority member of the committee, the gentleman from New Jersey (Mr. FORSYTHE) and the ranking minority member of the subcommittee, the gentleman from Kentucky (Mr. SNYDER) have been apprised of the markup date and time and are in accord with this request.

The SPEAKER pro tempore (Mr. EDGAR). Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. GREEN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the distinguished chairman of the subcommittee has fully explained the conference report, and in view of the time pressures to which the gentleman has alluded I shall not go over the same ground.

Let me simply add to what the gentleman has told the House that I have received this morning from the Office of Management and Budget a statement of administration policy, which reads as follows:

The administration supports passage of H.R. 3133, the HUD independent agencies appropriations bill, 1984. The bill embodies a careful effort by the Congress to meet important program needs while maintaining essential budget discipline.

So I can assure the Members on this side of the aisle that this bill has the full support of the administration.

It is self-evident that to develop a bill of this complexity at a time when much of the authorizing legislation for these appropriations has not been passed—indeed we have not had an authorizing bill in the housing field since 1980—and to develop that bill so that we can meet the very crucial needs that this country faces, while at the same time staying within the budgetary limitations that the administration seeks, I think is no small feat.

The leadership that the distinguished chairman of the subcommittee has given the Congress in developing and moving this legislation forward is something that should be set forth on the record, and the debt that the House owes him for that leadership should be expressed, and I am happy to do that this morning.

Mr. BOLAND. Mr. Speaker, I want to pay tribute to the other members of this subcommittee for the work they have done on this bill and particularly to the ranking minority member of this subcommittee, the distinguished gentleman from New York (Mr. GREEN). No other member of the committee spends more time in that subcommittee and is perhaps more familiar with the various and sundry issues that this bill occasions than he. The gentleman is an expert in the housing area, having served as the regional director of the Department of Housing and Urban Development in the city of New York for some time before he came to the Congress, and I must say that we depend upon his expertise and knowledge in this area. He serves us well. I am delighted to pay my compliments to the gentleman and congratulate him for the efforts that he gives to this committee and to the Congress as a whole.

Mr. NELSON of Florida. Mr. Speaker, I rise to give my support to the conference report making appropriations for the Department of Housing and Urban Development and independent agencies.

I would specifically like to thank the committee for their foresight in adding an additional $50 million on to the NASA appropriations for the space shuttle orbiter and engine spare parts.

Mr. Speaker, this additional money will allow the production lines to remain operational, leaving the option alive to authorize at a later date, a fifth orbiter.

In the next several years, NASA has plans to maintain a 24-36 annual shuttle launch schedule. This would be practically impossible without additional spare parts. In the long term, a schedule of this magnitude would require a fifth orbiter to be eventually included in the shuttle rotation.

Mr. Speaker, I am convinced that NASA will fulfill their goal to provide the United States with a program that will guarantee regular successful missions such as the most recent, launch and landing of STS-7, which succeeded in putting the first American woman in space.

We have the technology. These additional funds will allow for its continued improvement and usage.

● Mr. FRENZEL. Mr. Speaker, the HUD conference report should not be passed.

The House and Senate have reconciled two excessive bills into one excessive bill. The conference report gives the appearance of being the result of responsible legislating, by showing funding totals which are within the recently passed budget resolution levels. But when the budget resolution is as fat as the one Congress has just ratified, being within that budget is a less than commendable achievement.

The HUD conference report is $6.2 billion over the President's latest request. Most of this excess is due to

subsidized housing, because the conferees decided to provide $6.3 billion more for subsidized housing than there was requested. This bill is a camouflaged version of the same old thing: Congressional profligacy and disdain for restraint.

Further, the HUD conference report will require spring supplementals. Before the spending year is over, the HUD bill will have exceeded its budget resolution allocations, and the taxpayers will again have been victimized by congressional irresponsibility and backdoor budgeting.

Those who favor a continuation of the outdated spend and tax, spend and tax policies should vote for this conference report. Those who seek to release some of the burden borne by taxpayers, and who are willing to make the difficult decisions necessary to sustaining the economic recovery should vote against this conference report.●

Mr. DANNEMEYER. Mr. Speaker, while this bill has its flaws, especially from the standpoint of being far over budget, I would like to take a moment to mention to my colleagues that it does contain some worthwhile provisions. In particular, I would like to direct the attention of my colleagues to the section of the bill on page 19 that prohibits the EPA from using any of the funds appropriated to it for the purpose of imposing sanctions on areas of the country that have made all reasonable efforts to comply with Clean Air Act deadlines but simply have come up short. This section will not only give appropriate recognition to those areas which have made good faith efforts to comply with a law that Congress has failed to revise on schedule, but it will give other areas an incentive to continue their pollution reduction efforts.

As Members will recall, the circumstances which occasioned this amendment were as follows: In February of this year, the EPA started the process of imposing sanctions on 213 counties around the country that, for one reason or another, had not attained, or did not look like they would be able to attain, air quality standards by the deadlines set forth in the Clean Air Act. Absent a statutory provision or definition to the contrary, the EPA had little choice but to start imposing those sanctions since failure to judge intent by results would most certainly have opened the Administrator up to lawsuits by environmentalists determined to see the deadlines observed no matter what the consequences. Indeed, EPA's experience with the Superfund program underscored only too clearly the dangers of being lax with enforcement of a program under its jurisdiction. Therefore, it was incumbent on Congress, not EPA, to act if there was to be any relief from these sanctions or if enforcement of them was to be selective. The language contained in this bill constitutes such action and I am pleased to add that, subsequent to its adoption by the House on June 2 and by the Senate on June 21, the EPA has announced sanctions guidelines that follow along the general path set forth by this language. All of which means that nonattainment areas, which have submitted an acceptable SIP and have carried it out in good faith, should not have sanctions imposed upon them.

Mr. Speaker, since the adoption of this amendment by the House on June 2, a number of questions have been asked about how it is to be interpreted. One of the most popular has been "will states lacking an acceptable auto emission and maintenance program (I/M) get relief?" and the answer to that one is "no." Likewise, an area that failed to comply with emissions limits or otherwise failed to live up to its SIP would still be subject to the threat of sanctions. In short, this is not a violators relief provision. Not by a long shot. Instead, what we have here is a provision that will provide relief only for areas that have made every effort to comply with the law, that have done all that they were asked and all that they promised, and, through no fault of their own, have come up a little short.

Lest anyone think that this provision is going to lead to a sudden deterioration of air quality, or even a rapid decline in the rate of improvement in air quality, it should be noted that these sanctions are in some instances counterproductive. For instance, a ban on construction or modification of any industrial facility emitting more than 100 tons a year of a pollutant will preclude replacing a facility that emits 1,000 tons a year of that pollutant with one that emits 500 tons. Likewise, a cutoff of Federal highway funds, in addition to being unfair to those who have just been touched for that extra nickel-a-gallon gas tax, may well mean that a freeway that would eliminate daily traffic jams, featuring hundreds of cars idling for 15–20 minutes a trip, will not get built. The only real value of the sanctions lies in the incentives they provide for additional cleanup, which is why it makes little sense to punish those areas that have already done everything they were supposed to do.

One final point, Mr. Speaker, and that is now that the EPA Administrator has enunciated his sanctions policy generally speaking, it is my hope that the rule of thumb this amendment applies—namely that areas which have made all reasonable efforts to comply with the deadlines should not be penalized—will be applied to those areas facing 1987 deadlines for attainment of the ozone and carbon monoxide standards. To apply sanctions because an area cannot show attainment, even though it is doing everything it can, is not the best way to accomplish the objective we all share—cleaner air. Responsible citizens may bend every effort to accomplish what is difficult, but there is little incentive to attempt the impossible. What would make more sense, and this amendment is a step in that direction, is the development of a Clean Air Act sanctions policy that is both firm but fair.

● Mr. RICHARDSON. Mr. Speaker, I am very disappointed in the action taken by the conferees to drop two provisions of extreme importance to veterans, especially Vietnam era vets.

On June 7, this House overwhelmingly approved the emergency Vietnam veterans job training bill by a vote of 407 to 10. The Senate passed a similar measure by a unanimous voice vote and included $150 million for the program in their version of the HUD appropriation bill. However, funding for the Vietnam Veterans Job Training Act was dropped in conference. This will delay implementation of this much needed program for several months.

Mr. Speaker, Vietnam veterans are suffering from a staggering level of unemployment. Congress recognized this fact by passing an emergency program to assist them. The conference report sends the signal that although we recognize the unemployment problems facing Vietnam vets, we are not willing to provide the resources necessary to improve their situation.

I am also deeply concerned the conferees chose to drop the $150 million contained in the House appropriation bill for a Mortgage Assistance Act for Unemployed Veterans. H.R. 2968, the Veterans Mortgage Foreclosure Act, passed the House on May 24 by a convincing margin of 394 to 23. This bill would not require additional appropriations, but would be funded out of the VA direct loan revolving fund. The act would provide limited assistance to veterans who through no fault of their own are facing foreclosure on their home.

Mr. Speaker, the recession has forced millions of veterans out of work. It makes perfect sense to help these victims of the economy keep their homes until they can get back on their feet again.

The conferees noted they were deleting funds for both of these programs without prejudice regarding eventual authorizing legislation. But my colleagues know this legislation will be less likely now that the funds for the programs have been deleted.

Why was funding for these two veterans programs that enjoyed strong support in both Houses dropped by the conferees? Because the President sent a message to the conferees that he would not accept the HUD appropriation bill if it contained funding for

the Vietnam jobs training bill or the Veterans Mortgage Assistance Act.

Mr. Speaker, while the President had no problems with signing an emergency jobs bill a few months ago—he has seemingly singled out Vietnam veterans as not needing job training assistance. I heard hours of testimony in the Veterans Affairs Committee and I can tell my colleagues that Vietnam veterans are in desparate need of help. They simply want the Government, they so courageously served, to help them learn a vocation so they can make it on their own.

I also find it very strange that the President would oppose the Mortgage Assistance Act. We hear so often from the White House that the Government must save money where ever it can. Well, the Mortgage Assistance Act would save the taxpayers money. A CBO report reveals that with only a 60-percent payback rate on the mortgage assistance loans, the program would cost the VA less than if they had to acquire and sell property after foreclosure. I am at a loss why the President would oppose a program that would assist veterans while saving the Government money.

Mr. Speaker, our Nation's veterans must wonder what it will take before their President decides they deserve a helping hand.●

● Mr. ALBOSTA. Mr. Speaker, I rise in strong support of the conference report on HUD-independent agencies appropriations for fiscal year 1984, and in particular the $6 million earmarked in the legislation to monitor, test, and study dioxin around the country.

This legislation represents the culmination of 3 months worth of work that I have been involved in trying to get the Environmental Protection Agency do testing of, and monitoring for, dioxin contamination in Michigan and around the country so that we can begin to set safe levels for the regulation of dioxin in the United States. We need to answer the many serious questions that have been raised in the past 3 months about dioxin and its potential to harm human health. People in Michigan and around the country want and need answers to these questions.

The conference report we are considering today will give us the tools to find these answers. EPA is directed to undertake a comprehensive study both in Michigan and in other areas of the country. Research work into the human toxicity and disposal methods for dioxin is also required by this legislation. EPA is in the process of preparing its final plans for the dioxin study and by passing this conference report we can keep the dioxin study on a fast track to completion.

I urge adoption of the conference report providing funding for the Environmental Protection Agency in fiscal year 1984. I also want to thank the chairman of the subcommittee, the distinguished gentleman from Massachusetts, as well as other members of the House and Senate Appropriations Committee for being so supportive of funding for the EPA dioxin study.●

● Mr. COYNE. Mr. Speaker, I rise in support of H.R. 3133, the HUD-Independent agencies appropriations bill for fiscal 1984.

The need for adequate funding of our housing and community development programs has rarely been more apparent. As this administration continues its attempts to reduce new funding for assisted housing to near zero, this Congress, through the appropriations process, is making a firm statement in support of these critical programs.

I am especially pleased the conference report includes $2 million for a neighborhood development grant demonstration program. This innovative effort would, as provided in H.R. 1, allow the Department of Housing and Urban Development to assist neighborhood groups by making matching grants to promote development activities.

Mr. Speaker, such programs as HUD's urban development action grants work well for the big-ticket items of urban development. Neighborhood groups, which ususally have only a skeleton staff and minimal budgets, are easily lost in the shuffle when it comes to obtaining development assistance. The neighborhood development grant demonstration, which the conference committee would fund from the HUD Secretary's discretionary fund, is designed to make good use of the ideas initiated at the neighborhood level.

Here is how the neighborhood development grant program would work. A matching grant would be made available to eligible nonprofit neighborhood organizations which are carrying out projects to create permanent jobs, establish or expand businesses, or develop or rehabilitate housing. Other activities which could be eligible for a neighborhood development grant, not to exceed $50,000, are programs which deliver essential services or which promote or finance voluntary neighborhood activities.

The amount awarded by HUD would be from 3 to 10 times the amount raised by the neighborhood organization from individuals, organizations, or businesses in the area. The ratio used to determine the size of the grant would depend on the degree of economic distress in the neighborhood, the extent to which the proposed activities would benefit low- and moderate-income people, and the amount of participation from neighborhood businesses and individuals.

The conference report contains no appropriations for the ill-conceived housing voucher program, a proposal which, as designed by the administration, appears to be a convenient vehicle for lessening the Federal commitment to low-income housing. I commend the conferees on their decision not to fund a voucher program unless an authorization bill requires such appropriations.

The House will, I hope, soon have the opportunity to act on H.R. 1, the Housing and Urban Rural Recovery Act of 1983. It is my estimation that the House will agree with the Banking Committee's rejection of the voucher approach to low-income housing assistance. The bill reported by the committee also contains important revisions in the housing and community development law, including a restoration of the 25-percent tenant contribution to rent in assisted housing, which must me made if we are to repair the damage of the 1981 Gramm-Latta bill. In addition, the measure would revise and expand the urban homesteading program, authorizing a new emphasis on low- and moderate-income persons as the principal beneficiaries of this effort.

I urge a yes vote on the conference report on the HUD-Independent Agencies appropriations bill. I look forward to continuing the commitment of this Congress to housing and community development through prompt approval of the authorizing legislation, the Housing and Urban Rural Recovery Act of 1983.●

Mr. GREEN. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. BOLAND. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore. Without objection, the previous question is ordered on the conference report.

There was no objection.

The SPEAKER pro tempore. The question is on the conference report.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. GREGG. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 314, nays 99, not voting 20, as follows:

□ 1030

The Clerk announced the following pairs;

On this vote:

Mr. Mitchell for, with Mr. Robert F. Smith against.

Mr. Mollohan for, with Mr. McCandless against.

Mr. Williams of Ohio for, with Mr. Hansen of Idaho against.

Messrs. MacKAY, GUNDERSON, HANSEN of Utah, HARTNETT, BURTON of Indiana, RICHARDSON, and HOPKINS, Mrs. SCHROEDER, and Messrs. WHITTAKER, FRANKLIN, RUDD, and LAGOMARSINO changed their votes from "yea" to "nay."

Mr. DICKINSON changed his vote from "nay" to "yea."

So the conference report was agreed to.

The result of the vote was announced as above recorded.

AMENDMENTS IN DISAGREEMENT

The SPEAKER pro tempore. The Clerk will designate the first amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 1: Page 2, strike out lines 6 to 24, inclusive, and insert:

The amount of contracts for annual contributions, not otherwise provided for, as authorized by section 5 of the United States Housing Act of 1937, as amended (42 U.S.C. 1437c), and heretofore approved in appropriation Acts, is increased by $809,954,229: *Provided*, That the budget authority obligated under such contracts shall be increased above amounts heretofore provided in appropriation Acts by $7,954,862,810: *Provided further*, That of the budget authority provided herein, $467,460,000 shall be for assistance in financing the development or acquisition cost of public housing for Indian families, $1,926,400,000 shall be for assistance for projects developed for the elderly or handicapped under section 202 of the Housing Act of 1959, as amended (12 U.S.C. 1701q), $1,600,000,000 shall be for the modernization of existing public housing projects pursuant to section 14 of the United States Housing Act of 1937, as amended (42 U.S.C. 14371), of which $35,000,000 shall be for the modernization of 1,000 vacant uninhabitable public housing units, pursuant to section 14 of the United States Housing Act of 1937, as amended, other than section 14(f) of such Act, and, $1,149,510,000 shall be available for contracts entered into under the modified section 8 existing housing assistance program, of which $479,000,000 shall be used in conjunction with units also assisted under the rental rehabilitation program: *Provided further*, That the budget authority in the foregoing proviso for the modified section 8 existing housing assistance program and the rental rehabilitation program shall be available only to the extent that legislation authorizing the modified section 8 existing housing program and the rental rehabilitation program are enacted: *Provided further*, That notwithstanding any other provision of this Act, up to the first $1,575,000,000 in budget authority recaptured and becoming available for obligation in fiscal year 1984 shall be made available for annual contribution contracts under the section 8 existing housing program (42 U.S.C. 1437f): *Provided further*, That any balances of authorities made available prior to the enactment of this Act which are or become available for obligation in fiscal year 1984, shall be added to and merged with the authority approved herein, and such merged amounts shall be made subject only to terms and conditions of law applicable to authorizations becoming available in fiscal year 1984: *Provided further*, That none of the merged amounts available for obligation in 1984 shall be subject to the provisions of section 5(c) (2) and (3) and the fourth sentence of section 5(c)(1) of the United States Housing Act of 1937, as amended (42 U.S.C. 1437c), and section 213(d) of the Housing and Community Development Act of 1974, as amended (42 U.S.C. 1439): *Provided further*, That of the balance of merged amounts of budget authority provided herein, and not previously set-aside, $3,080,694,060 shall be available for obligation in 1984 to convert contracts assisted under section 236(f)(2) of the National Housing Act (12 U.S.C. 1715z-1) and section 101 of the Housing and Urban Development Act of 1965 (12 U.S.C. 1701s) to contracts assisted under section 8 of the United States Housing Act of 1937, as amended, and up to $2,292,598,750 shall be available for other contracts as authorized by section 5 of the United States Housing Act of 1937, as amended.

MOTION OFFERED BY MR. BOLAND

Mr. BOLAND. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Motion offered by Mr. BOLAND:

Mr. BOLAND moves that the House recede from its disagreement to the amendment of the Senate numbered 1 and concur therein with an amendment, as follows: In lieu of

the matter stricken and proposed by said amendment, insert the following:

The amount of contracts for annual contributions, not otherwise provided for, as authorized by section 5 of the United States Housing Act of 1937, as amended (42 U.S.C. 1437c), and heretofore approved in appropriation Acts, is increased by $636,336,000: *Provided*, That the budget authority obligated under such contracts shall be increased above amounts heretofore provided in appropriation Acts by $9,912,928,000: *Provided further*, That of the budget authority provided herein, $389,550,000 shall be for assistance in financing the development or acquisition cost of public housing for Indian families, $1,550,000,000 shall be for the modernization of existing public housing projects pursuant to section 14 of the United States Housing Act of 1937, as amended (42 U.S.C. 14371), of which $35,000,000 shall be for the modernization of 1,000 vacant uninhabitable public housing units, pursuant to section 14 of the United States Housing Act of 1937, as amended, other than section 14(f) of such Act, and $1,500,000,000 shall be deferred and shall not become available until January 1, 1984: *Provided further*, That the first $1,926,400,000 of budget authority recaptured and becoming available for obligation in fiscal year 1984 shall only be made available for assistance to projects developed for the elderly or handicapped under section 202 of the Housing Act of 1959, as amended (12 U.S.C. 1701q): *Provided further*, That any balances of authorities made available prior to the enactment of this Act which are or become available for obligation in fiscal year 1984, shall be added to and merged with the authority approved herein, and such merged amounts shall be made subject only to terms and conditions of law applicable to authorizations becoming available in fiscal year 1984: *Provided further*, That none of the merged amounts available for obligation in 1984 shall be subject to the provisions of section 5(c) (2) and (3) and the fourth sentence of section 5(c)(1) of the United States Housing Act of 1937, as amended (42 U.S.C. 1437c), and section 213(d) of the Housing and Community Development Act of 1974, as amended (42 U.S.C. 1439).

Mr. BOLAND (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

Mr. BOLAND. Mr. Speaker, I ask unanimous consent that the Senate amendments numbered 6, 10, 13, 35, 40, 43, and 58 be considered en bloc and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The SPEAKER pro tempore. The Clerk will designate the amendments in disagreement.

Senate amendment No. 6 reads as follows: Page 7, after line 13, insert:

Any fee charged in accordance with a contract by a contractor to recover indebtedness owed to the United States may be payable from the amount collected by such contractor, up to such amount as may be owed such contractor, in accordance with section 13(b) of the Debt Collection Act of 1982 (Public Law 97-365).

Senate amendment No. 10 reads as follows: Page 9, line 5, after "Development" insert ": *Provided further*, That any unit of general local government which was classified as a metropolitan city in fiscal year 1983 pursuant to section 102(a)(4) of the Housing and Community Development Act of 1974, as amended, shall continue to be classified as a metropolitan city for purposes of the allocation of funds provided herein for fiscal year 1984".

Senate amendment No. 13 reads as follows: Page 11, line 6, after "1985" insert ": *Provided*, That $4,000,000 of the foregoing amount is to be made available solely for a study of the costs of bringing the existing public housing stock into conformance with property and energy conservation standards established by the Secretary".

Senate amendment No. 35 reads as follows: Page 21, line 22, after "design" insert ": *Provided further*, That no amount appropriated pursuant to this or any other Act may be used for the lease or construction of a new contractor-funded facility for exclusive use in support of a contract or contracts with the National Aeronautics and Space Administration under which the Administration would be required to substantially amortize through payment or reimbursement such contractor investment, unless an appropriation act specifies the lease or contract pursuant to which such facilities are to be constructed or leased or such facility is otherwise identified in such Act: *Provided further*, That the Administrator may authorize such facility lease or construction, with the approval of the Committees on Appropriations if he determines that deferral of such action until the enactment of the next Appropriation Act would be inconsistent with the interest of the Nation in aeronautical and space activities".

Senate amendment No. 40 reads as follows: Page 24, after line 21, insert:

UNITED STATES ANTARCTIC PROGRAM ACTIVITIES

For necessary expenses in carrying out the research and operational support for the U.S. Antarctic Program pursuant to the National Science Foundation Act of 1950, as amended (42 U.S.C. 1861-1875); maintenance and operation of aircraft and purchase of flight services for research and operations support; maintenance and operation of research ships and charter or lease of ships for research and operations support; hire of passenger motor vehicles; not to exceed $1,000 for official reception and representation expenses; $102,100,000, to remain available until expended: *Provided*, That receipts for support services and materials provided to individuals for non-Federal activities may be credited to this appropriation: *Provided further*, That no funds in this account shall be used for the purchase of aircraft.

Senate amendment No. 43 reads as follows: Page 25, line 10, after "tionally" insert ": *Provided further*, That no less than $34,000,000 shall be made available for merit based instructional materials development, evaluation and demonstration activities: *Provided further*, That up to $5,000,000 may be transferred from funds provided under this head to and merged with funds made available under "Research and related activities" for the purpose of conducting research on teaching and learning".

Senate amendment No. 58 reads as follows: Page 35, line 15, after "limitations" insert ": *Provided further*, That the preceding transfer provision shall also apply to the limitations provided in fiscal year 1983 and that these provisos shall be effective upon enactment of this Act".

MOTION OFFERED BY MR. BOLAND

Mr. BOLAND. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BOLAND moves that the House recede from its disagreement to the amendments of the Senate numbered: 6, 10, 13, 35, 40, 43, and 58 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 25: Page 16, line 13, after "96-510" insert ": *Provided further*, That for the performance of specific activities in accordance with section 111(c)(4) of Public Law 96-510, the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, $6,415,000 is appropriated to the Department of Health and Human Services, to be derived by transfer from the Hazardous Substance Response Trust Fund."

MOTION OFFERED BY MR. BOLAND

Mr. BOLAND. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BOLAND moves that the House recede from its disagreement to the amendment of the Senate numbered 25 and concur therein with an amendment, as follows: In lieu of the matter proposed by said amendment, insert the following: ": *Provided further*, That for performance of specific activities in accordance with section 104(i) of Public Law 96-510, the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, $5,000,000 shall be made available to the Department of Health and Human Services on October 1, 1983, to be derived by transfer from the Hazardous Substance Response Trust Fund."

Mr. BOLAND (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate Amendment No. 26: Page 16, line 18, strike out "$2,400,000,000" and insert "$2,430,000,000".

MOTION OFFERED BY MR. BOLAND

Mr. BOLAND. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BOLAND moves that the House recede from its disagreement to the amendment of the Senate numbered 26 and concur therein with an amendment, as follows: In lieu of the sum proposed by said amendment,

insert the following: "$2,400,000,000, to remain available until expended, and for projects under section 201(n)(2), subject to the approval of the Committees on Appropriations, $30,000,000".

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 32: Page 19, line 24, after "$1,449,000" insert ", to be deposited to the Consumer Information Fund: *Provided*, That the revenues and collections deposited into the fund shall be available for necessary expenses of Consumer Information Center activities in the aggregate amount of $7,949,000: *Provided further*, That revenues and collections accruing to this fund during fiscal year 1984 in excess of $7,949,000 shall remain in the fund and shall not be available for expenditure except as authorized in appropriation Acts".

MOTION OFFERED BY MR. BOLAND

Mr. BOLAND. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BOLAND moves that the House recede from its disagreement to the amendment of the Senate numbered 32 and concur therein with an amendment, as follows: In lieu of the matter proposed by said amendment, insert the following: ", to be deposited into the Consumer Information Center Fund: *Provided*, That the revenues and collections deposited into the fund shall be available for necessary expenses, other than administrative expenses, of Consumer Information Center activities in the aggregate amount of $6,500,000. Administrative expenses of the Consumer Information Center in fiscal year 1984 shall not exceed $1,449,000. Revenues and collections accruing to this fund during fiscal year 1984 in excess of $7,949,000 shall remain in the fund and shall not be available for expenditure except as authorized in appropriation Acts".

Mr. BOLAND (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The motion was agreed to.

The SPEAKER. pro tempore. The clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 33: Page 20, strike out all after line 7 over to and including line 5 on page 21 and insert:

For necessary expenses, not otherwise provided for, including research, development, operations, services, minor construction, maintenance, repair, rehabilitation and modification of real and personal property; purchase, hire, maintenance, and operation of other than administrative aircraft, necessary for the conduct and support of aeronautical and space research and development activities of the National Aeronautics and Space Administration; including not to exceed (1) $427,400,000 for space transportation capability development; (2) $14,000,000 for a space station, (3) $165,600,000 for space telescope development; (4) $17,000,000 for Numerical Aerodynamic Simulation; without the approval of the Committees on Appropriations; $2,016,900,000 to remain available until September 30, 1985.

MOTION OFFERED BY MR. BOLAND

Mr. BOLAND. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BOLAND moves that the House recede from its disagreement to the amendment of the Senate numbered 33 and concur therein with an amendment, as follows: In lieu of matter stricken and proposed by said amendment, insert the following:

For necessary expenses, not otherwise provided for, including research, development, operations, services, minor construction, maintenance, repair, rehabilitation and modification of real and personal property; purchase, hire, maintenance, and operation of other than administrative aircraft, necessary for the conduct and support of aeronautical and space research and development activities of the National Aeronautics and Space Administration; including not to exceed (1) $427,400,000 for space transportation capability development; (2) $14,000,000 for a space station; (3) $165,600,000 for space telescope development; (4) $17,000,000 for Numerical Aerodynamic Simulation; without the approval of the Committees on Appropriations; $2,011,900,000, to remain available until September 30, 1985.

Mr. BOLAND (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 34: Page 21, after line 5, insert:

SPACE FLIGHT, CONTROL AND DATA COMMUNICATIONS

For necessary expenses, not otherwise provided for; in support of space flight, spacecraft control and communications activities of the National Aeronautics and Space Administration, including operations, production, services, minor construction, maintenance, repair, rehabilitation, and modification of real and personal property; tracking and data relay satellite services as authorized by law; purchase, hire, maintenance and operation of other than administrative aircraft; and including not to exceed (1) $1,530,000,000 for space shuttle production and capability development; (2) $1,570,600,000 for space transportation operations; (3) $50,000,000 for expendable launch vehicles; and (4) not more nor less than $44,000,000 shall be obligated for space communications operations and maintenance and support associated with the tracking and data relay satellite system, excluding amounts to be obligated for award fees earned on the contract; without the approval of the Committees on Appropriations; $3,776,600,000 to remain available until expended; provided, that up to 5 per centum of the amount appropriated for "Research and Development" or "Space Flight, Control and Data Communications" may be transferred to any other NASA appropriation with the approval of Committees on Appropriations.

MOTION OFFERED BY MR. BOLAND

Mr. BOLAND, Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BOLAND moves that the House recede from its disagreement to the amendment of the Senate numbered 34 and concur therein with an amendment, as follows: In lieu of the matter proposed by said amendment, insert the following:

SPACE FLIGHT, CONTROL AND DATA COMMUNICATIONS

For necessary expenses, not otherwise provided for; in support of space flight, spacecraft control and communications activities of the National Aeronautics and Space Administration, including operations, production, services, minor construction, maintenance, repair, rehabilitation, and modification of real and personal property; tracking and data relay satellite services as authorized by law; purchase, hire, maintenance and operation of other than administrative aircraft; and including not to exceed (1) $1,500,000,000 for space shuttle production and capability development; (2) $1,570,600,000 for space transportation operations; (3) $50,000,000 for expendable launch vehicles; and (4) not more nor less than $44,000,000 shall be obligated for space communications operations and maintenance and support associated with the tracking and data relay satellite system, excluding amounts to be obligated for award fees earned on the contract; without the approval of the Committees on Appropriations; $3,791,600,000, to remain available until September 30, 1985: *Provided*, That up to 5 per centum of the amount appropriated for "Research and Development" or "Space Flight, Control and Data Communications" may be transferred between such accounts with the approval of Committees on Appropriations.

Mr. BOLAND (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 47: Page 26, after line 20, insert:

PAYMENTS TO STATE AND LOCAL GOVERNMENT FISCAL ASSISTANCE TRUST FUND

For payments to the State and Local Government Fiscal Assistance Trust Fund, $4,566,700,000.

MOTION OFFERED BY MR. BOLAND

Mr. BOLAND. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BOLAND moves that the House recede from its disagreement to the amendment of the Senate numbered 47, and concur therein.

The SPEAKER pro tempore. The gentleman from Massachusetts (Mr. BOLAND) is recognized for 30 minutes.

Mr. BOLAND. Mr. Speaker, I yield such time as he may consume to the

gentleman from New York (Mr. WEISS).

Mr. WEISS. Mr. Speaker, I very much appreciate the distinguished chairman of the Subcommittee on Appropriations yielding to me on this matter. I would like to take the occasion to make a brief background statement and then ask for a comment from the distinguished chairman.

This matter involves the general revenue sharing program. I have the distinction and privilege of chairing that Subcommittee on Intergovernmental Relations and Human Resources of the Government Operations Committee which has jurisdiction over authorizing the funding for this program.

At the time that the appropriations bill came before the House, the report stated that the committee has deferred action pending authorization decisions concerning possible additional funding for local and State governments.

Although the Government Operations Committee has reported the bill favorably, the authorizing process has not yet been completed. The Senate apparently has appropriated the same figure for localities, $4,566,700,000 that had been appropriated in the previous fiscal year.

The Committee on the Budget of the House had provided initially for an $800 million increase above last year's figure for localities and in conference with the Senate the figure has now been agreed to as $450 million. Obviously the amendment which the gentleman has offered does not account for that $450 million. He and I have had some private discussions and what I would like is for an indication on the record that when the final determination as to the new authorization figure is in fact arrived at, that the gentleman's committee will provide a vehicle, an opportunity for the finally arrived at authorization figure to be considered by this House.

Mr. BOLAND. Will my friend from New York yield?

Mr. WEISS. I yield to the gentleman.

Mr. BOLAND. The gentleman from New York has correctly stated the figures with reference to the general revenue sharing matter. As he indicated, this bill carriers $4,566,700,000 for the general revenue sharing program for fiscal year 1984. And it is, as he suggested, the amount carried in the bill for fiscal year 1983. His subcommittee and the committee that he sits on did recommend an authorization of $5,297,333,000 for local governments. The budget resolution conference report assumes $5,017,000,000 for general revenue sharing.

In the committee, because of the uncertainty surrounding the outcome of the authorization process, we deferred consideration of the budget request. We felt it made more sense to wait. However, in conference the Senate insisted on its position, which was to provide the budget estimate.

I want to assure the gentleman that if higher levels are ultimately authorized—and there is no doubt in my mind that they may be, because this particular program is of the highest priority to 39,000 communities throughout the United States—the action taken in the conference report in no way precludes us from providing additional funding to meet the authorization level in a subsequent appropriation vehicle. That vehicle might very well be a supplemental appropriation bill or it might very well be a continuing resolution.

As the gentleman from New York knows, the first payment to be made from fiscal 1984 appropriations is not scheduled, under current law, to be sent out until January 5, 1984. Between now and then there should be sufficient opportunities in a continuing resolution to provide necessary supplemental funding. Also, as I have indicated, additional funding could be provided in a supplemental appropriation bill. I am sure that this committee would go along with the authorization level because we recognize the importance of this program to the many localities that share in the general revenue sharing program.

Mr. WEISS. Mr. Speaker, I very much appreciate the assurances given by the gentleman and I thank him for yielding the time.

Mr. BOLAND. I thank the gentleman from New York.

Mr. Speaker, I yield such time as he may consume to the distinguished gentleman from Mississippi (Mr. MONTGOMERY), the chairman of the Committee on Veterans' Affairs.

Mr. MONTGOMERY. Mr. Speaker, I appreciate the chairman yielding. I think it would be proper if the chairman would let me bring up what has happened in this conference report pertaining to the veterans' jobs funding and also the veterans' mortgage assistance, as I understand it, these programs were not funded because the authorization had not become law. I am sorry I did not get here a little sooner to talk to the chairman about this. Would the chairman explain what happened to the funding of these veterans' programs?

Mr. BOLAND. If the gentleman from Mississippi will yield, this committee is conscious of the significance of this program. The Vietnam veterans' jobs training bill has been authorized by the Committee on Veterans' Affairs. It has passed both Houses, but it has not been signed into law.

Let me say to the gentleman from Mississippi, as he well knows, this subcommittee over the years has been the protector of veterans' appropriations bills. Oftentimes, the gentleman from Mississippi and his committee have congratulated this subcommittee for the actions they have taken regarding veterans' programs.

One of the reasons why we did not include the $150 million appropriation for this program is that it is an entirely new program, and has not yet been authorized. As the gentleman knows, and the other Members sitting in the House here today know, the Appropriations Committee oftentimes does appropriate for programs that have not been authorized by the authorizing committees. But those are programs for which there have been previous appropriations and are not brand new programs. There are three other programs in this bill that are brand new programs that have not been authorized. Let me say when the authorization bill is law, we can consider funding in a supplemental bill or in a continuing resolution—and we would be glad to do it.

□ 1045

Let me say that with respect to this program itself, the House version of this bill includes language which authorizes a veterans job training program. The authorizing committees of the House and Senate have a difference in how this program ought to be funded.

I want to congratulate the Veterans' Affairs Committee of the House on the manner in which it has handled this bill, because it includes language which authorizes this jobs training program, subject to the approval of funding in appropriations act.

On the other hand, the Senate bill, for all practical purposes, makes this program an entitlement. I think we ought to get away from entitlements. One of the reasons the budgets we have are so astronomical is because the entitlement programs that have been built into the budget process over the past years. So, on that basis alone, we thought that we had better wait until there is an authorization signed into law and at that time we would make provisions for the $150 million.

Mr. MONTGOMERY. I would like to thank the gentleman and his subcommittee, along with the gentleman from New York (Mr. GREEN), who have been very fair to us, but I am concerned. In our veterans committee we do try to control legislation that comes out of the committee to be sure that it will help the veterans. We thought these bills were needed, especially the Vietnam-era jobs bill. There is more unemployment under the Vietnam-era veteran then there are those who did not serve in Vietnam.

We whip right through this House another jobs bill that did not include the Vietnam veteran.

Also on the mortgage assistance for veterans, we thought in effect that would save that Government money

because it cost about $7,800 to foreclose on a veteran's house when he cannot make the payments. And we were giving him, under this appropriation, a little more time, giving them the benefit of the doubt. It was kind of a money saver.

I understand what the gentleman is saying, but we are still disappointed. We will work with the gentleman in the future, of course.

I have additional remarks I would like to make.

Mr. Speaker, I am disappointed in the action taken by the conferees on the issues in disagreement relating to veterans' affairs. It is obvious Vietnam veterans will be adversely affected by the action taken in conference on the HUD-independent agencies appropriation bill.

You will recall on June 7, the House, by a vote of 407 to 10, passed H.R. 2355, a bill that would enhance the employment opportunities of Vietnam veterans. The bill we passed authorized $150 million for fiscal years 1984 and 1985 for the employment of Vietnam veterans and the conference agreement on the first concurrent budget resolution included money for both fiscal years.

We were encouraged that the emergency Vietnam veterans jobs training bill could be quickly implemented because the Senate, on June 15, passed a similar measure by unanimous voice vote.

In addition, the Senate included the funding for the emergency Vietnam veterans jobs training bill when it passed the HUD-independent agencies appropriation bill on June 21. We had thought the prospects were good that the provision would have been accepted by the House but, unfortunately, that was not the case. I regret the conferees have seen fit not to include this money as it will delay the implementation of the emergency Vietnam veterans, jobs training bill for several months. This makes no sense at all in view of the tremendously high rate of unemployment among Vietnam veterans at this time.

Mr. Speaker, a provision contained in the appropriation bill when it passed the House would have allowed the Veterans' Administration to provide mortgage foreclosure assistance to many Vietnam veterans who are faced with the loss of their homes because of loss of jobs. The House had passed the veterans mortgage foreclosure bill (H.R. 2948) on May 24 by a vote of 394 to 23. Unfortunately, the funding provision for this measure was also dropped in conference.

It is hard for me to understand, Mr. Speaker, why these two issues were dropped in conference, when the House and Senate had no reluctance at all in passing the emergency appropriation jobs bill earlier this year that contained millions of dollars for job training for the elderly, summer youth, displaced persons, and other similar categories of individuals. I want everyone to understand, Mr. Speaker, that the Committee on Veterans' Affairs has done everything it could to help eliminate the unemployment problems Vietnam veterans have experienced for so long. Both the House and Senate authorizing committees have never failed to devote proper time and attention to this deserving group of American citizens.

I have grave concern about our priorities, Mr. Speaker, and because the funds for these two Vietnam veteran programs were dropped in conference I am concerned about their welfare. I hope the committee will reconsider when the authorizations become law and appropriate the funds.

Mr. EDGAR. Mr. Speaker, will the gentleman yield?

Mr. BOLAND. I yield to the gentleman from Pennsylvania.

Mr. EDGAR. I thank the gentleman for yielding.

Mr. Speaker, I would like to associate myself with the gentleman's remarks and I would also like to commend the chairman of the committee for stating here publicly that if we move quickly and authorize the jobs program, that it in fact will be part of an additional resolution in the future.

I think the gentleman from Mississippi makes a good point. We have some of the highest unemployment among Vietnam-era veterans. And they are one of the highest populations of people in our society who have not found work and are in what is called long-term unemployment. These Vietnam veterans particularly are the ones that we used to fashion the jobs bill out of the Veterans' Affairs Committee. It is really critical that once the authorization passes both the House and the Senate and is signed by the President that we get the assurances of the Appropriations Committee that there will be no delay in the funding of that program, because it has been the intention of the House and I think the intention of the Senate, as well, that these Vietnam veterans not be neglected and that this jobs bill become part of the public law.

Mr. MONTGOMERY. As the gentleman knows, we try to control the flow of legislation coming out of the House Veterans' Affairs Committee; we do not try to overload and vote a lot of bills out of committee. When we do vote them out, we wish they would have the proper consideration and be funded.

Mr. EDGAR. That is correct. I thank the gentleman for his comments.

Mr. BOLAND. Mr. Speaker, just one more comment with reference to this particular item. If we had agreed to all the unauthorized new programs, this would have meant $150 million for the veterans job-training program, $150 for the veterans mortgage assistance program, $312.5 million for the housing certificate program, and $300 million for the rental rehabilitation program. All of these added together came to around $900 million—which we would have added to this bill. This bill, in my judgment, would then have been vetoed by the President.

There are a lot of other programs in this bill besides the veterans' programs. I think with the assurance we have given to the chairman of the Veterans' Affairs Committee and the distinguished gentleman from Pennsylvania, that when we get an authorization of $150 million for either one of these programs, I am sure that we will approve it.

In any event, even if the money were appropriated, it would not be available until October 1, 1983. By that time, if an authorization bill is in place, which is not an entitlement—I want to congratulate the House Veterans' Affairs Committee for its position in this area—if that is not an entitlement, I can assure the gentlemen who are concerned about this that this would be one of our first priorities. We recognize the importance of a jobs program to Vietnam veterans.

Mr. EDGAR. If the gentleman would yield further, I do not think there was any intention on the part of the House Veterans' Affairs Committee that it be an entitlement program, that it be a discretionary program that would be used. I commend the gentleman for his comments.

Mr. BOLAND. I thank the gentleman from Pennsylvania.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 53: Page 29, line 25, strike out all after "expended" over to and including "Act" in line 7 on page 30 and insert ": *Provided*, That funds provided in the appropriation, "Construction, Major Projects" for fiscal year 1984, for each approved project shall be obligated (1) by the awarding of a working drawings contract by September 30, 1984 and (2) by the awarding of a construction contract by September 30, 1985: *Provided further*, That the Administrator shall promptly report in writing to the Comptroller General and to the Committees on Appropriations any approved major construction project in which obligations are not incurred within the time limitations established above; and the Comptroller General shall review the report in accordance with the procedures established by section 1015 of the Impoundment Control Act of 1974 (Title X of Public Law 93-344): *Provided further*, That no funds from any other account may be obligated for constructing, altering, extending, or improving a project which was approved in the budget process and funded in this account until 1 year after final acceptance of the project by the Veterans Administration".

MOTION OFFERED BY MR. BOLAND

Mr. BOLAND. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BOLAND moves that the House recede from its disagreement to the amendment of the Senate numbered 53 and concur therein with an amendment, as follows: In lieu of the matter stricken and proposed by said amendment, insert the following: ": *Provided*, That, except for advance planning of projects funded through the advanced planning fund, none of these funds shall be used for any project which has not been considered and approved by the Congress in the budgetary process: *Provided further*, That $15,000,000 of the advance planning funds provided in this Act for medical projects shall only be available for the advance planning of those projects proposed in fiscal year 1983 and prior years: *Provided further*, That funds provided in the appropriation "Construction, Major Projects" for fiscal year 1984, for each approved project shall be obligated (1) by the awarding of a working drawings contract by September 30, 1984 and (2) by the awarding of a construction contract by September 30, 1985: *Provided further*, That the Administrator shall promptly report in writing to the Comptroller General and to the Committees on Appropriations any approved major construction project in which obligations are not incurred within the time limitations established above; and the Comptroller General shall review the report in accordance with the procedures established by section 1015 of the Impoundment Control Act of 1974 (Title X of Public Law 93-344): *Provided further*, That no funds from any other account may be obligated for constructing, altering, extending, or improving a project which was approved in the budget process and funded in this account until one year after final acceptance of the project by the Veterans Administration".

Mr. BOLAND (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the last amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 59: Page 38, line 17, after "1974" insert "to travel performed in connection with the Comprehensive Environmental Response, Compensation, and Liability Act of 1980".

MOTION OFFERED BY MR. BOLAND

Mr. BOLAND. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BOLAND moves that the House recede from its disagreement to the amendment of the Senate numbered 59 and concur therein with an amendment, as follows: In lieu of the matter proposed by said amendment, insert the following: "to site-related travel performed in connection with the Comprehensive Environmental Response, Compensation, and Liability Act of 1980".

Mr. BOLAND (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore (Mr. KAZEN). Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The motion was agreed to.

A motion to reconsider the votes by which action was taken on the conference report and the several motions were laid on the table.

PRIVILEGES OF THE HOUSE—ESTABLISHING SELECT COMMITTEE TO CONDUCT INVESTIGATION AND INQUIRY INTO ALLEGED ALTERATIONS OF AND OMISSIONS IN TRANSCRIPTS OF HEARINGS

Mr. WINN. Mr. Speaker, I rise to a question of the privileges of the House, and I send to the desk a privileged resolution (H. Res. 245) and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 245

Whereas on July 21 and 22, 1982, joint hearings were held by various subcommittees of three House committees, the Committee on Government Operations, the Committee on Science and Technology, and the Committee on Energy and Commerce, for the stated purpose of reviewing the activities of the Environmental Protection Agency during the preceding year;

Whereas several Members of the House, as members of these committees or subcommittees, participated in those hearings, and testimony was received from public witnesses at those hearings, all of whose statements and remarks during such hearings were recorded and transcribed;

Whereas the printed record of such hearings, an official House document entitled "EPA Oversight: One Year Review," was not received from the Government Printing Office until April 27, 1983;

Whereas such House document differs materially from the original transcript and record of such hearings, and allegations have been made that such document has been materially tampered with and purposefully falsified in that statement of Members of the House and of public witnesses have been significantly altered so as to change their meaning and intent and portions thereof omitted, without the knowledge or approval of such Members and witnesses;

Whereas the staffs of such committees had access to, and responsibility for, such transcripts and records, including the responsibility for the accuracy and protection of such documents;

Whereas certain documents, including those portions of the official transcripts of such hearings which may reflect changes made in the statements of the Members of the House and public witnesses present at said hearings, which are the property of the House, have apparently been improperly disposed of;

Whereas on March 31, April 14, 15, 29, and 30, and May 2, and 22, 1980, hearings were held by a subcommittee of the Committee on Government Operations entitled "Silver Prices and the Adequacy of Federal Actions in the Marketplace" and that certain testimony and statements of that hearing may also have been materially tampered with;

Whereas the alleged falsification of House documents may impact upon the legislative history of legislation considered by one or more committees of the House; and

Whereas such allegations reflect adversely upon the integrity of the proceedings of the House, the accuracy and protection of its records and documents, and the conduct of its employees: Now, therefore, be it

Resolved, That there is hereby established in the House of Representatives a select committee to investigate the alleged alterations of certain transcripts, as provided in this resolution (hereinafter referred to in this resolution as the "select committee").

SEC. 2. The select committee shall conduct a full, complete, and open investigation of—

(1) the alleged alterations of and omissions in the transcripts of the joint hearings to review the activities of the Environmental Protection Agency which were held on July 21 and 22, 1982, by various subcommittees of the Committee on Government Operations, the Committee on Science and Technology, and the Committee on Energy and Commerce;

(2) any and all allegations or charges that Members or employees of the House participated in, or had knowledge of, such alterations and omissions; and

(3) whether other House documents have been similarly altered or falsified.

SEC. 3. (a) The select committee shall be composed of an equal number of Members of the majority party and the minority party of the House, one of whom shall be designated as Chairman.

(b) For the purposes of this resolution, a majority of the members of the select committee shall constitute a quorum.

SEC. 4. (a) For purposes of carrying out this resolution, the select committee is hereby authorized—

(1) to sit and act, subject to the Rules of the House, at such times and places as it shall determine; and

(1) to sit and act, subject to the Rules of the House, at such times and places as it shall determine; and

(2) to require the attendance of such witnesses and the production of such papers and documents, by subpoena or otherwise, and to take such testimony and records, as it deems necessary.

(b) Subpoenas may be issued over the signature of the chairman of the select committee, or by any member of the select committee designated by the chairman, or by direction of a majority of the members of the select committee, and shall be served by such person or persons as the chairman of the select committee shall designate.

(c) The chairman of the select committee, or any member of such committee, may administer oaths to witnesses.

SEC. 5. The select committee shall report to the House at any time prior to, but not later than October 28, 1983.

The SPEAKER pro tempore. The Chair has examined the resolution and is satisfied that under the precedents it raises a question of the privileges of the House pursuant to rule IX.

The gentleman from Kansas (Mr. WINN) is recognized for 1 hour.

Mr. WINN. Mr. Speaker, I yield 30 minutes to the majority leader, the gentleman from Texas (Mr. WRIGHT) for the purposes of debate only.

□ 1100

Mr. WRIGHT. Mr. Speaker, I thank the gentleman for yielding.

I shall simply state at this time that at the conclusion of the debate on this privileged resolution I will move to refer the resolution to the Committee on Rules. My purpose in so doing will be to preserve the procedures of the House as they have historically been honored.

Under the rules of the House, the Committee on Rules is, of course, the proper entity to which any motion to create a new committee normally is referred. Whether a new select committee should be created to investigate this one apparent aberration from the honor of the House or whether it should properly be referred to our Committee on Standards of Official Conduct is a judgment which properly ought to be made by the Committee on Rules. That is the purpose for which the Committee on Rules exists. If in its wisdom the Committee on Rules should determine that this entire matter rightly ought to be referred to our standing Committee on Standards of Official Conduct, then, of course, that committee can begin an investigation immediately.

The Committee on Standards of Official Conduct is in place; it is ready to go. It does not have to await the appointment of counsel, the appointment of Members, the creation of a new committee, the creation of new rules for a new committee. It can start immediately.

The matter involved in this resolution is indeed one which goes to the question of the honor and the integrity of the House. If transcripts of official proceedings have been tampered with, if it can be established that any individual, either a Member or an employee of the House, has sought to change or alter the meaning of testimony given before one of the House committees or the meaning and context in which any Member of this House has expressed himself or herself in such committee, then that matter needs to be called to the attention of the Members of the House. It needs to be called very forcefully to the attention of whomever it may be who may have committed such an infraction of the rules and the basic honor of this institution.

For that reason, it seems to me that it would be appropriate that we honor the rules of the House by referring this resolution, as it should be referred, to the Committee on Rules. If it rightly ought to be the subject of an immediate investigation by the Committee on Standards of Official Conduct, I am certain that that committee, in its usual expeditious way, in its usual businesslike, bipartisan way, will conclude that investigation.

Mr. Speaker, I reserve the balance of my time.

Mr. WINN. Mr. Speaker, I yield myself 2 minutes.

Mr. Speaker, it disturbs me that we obviously are going to have "politics as usual" instead of having open hearings we have requested, those of us who have been wronged. We are now asking or we have been informed that they are going to ask that my preferential resolution be referred to the Rules Committee, which is controlled by the majority party 2 to 1 plus 1. That is why I say, "politics as usual," because in the changes in the original transcripts, the Republican or the minority comments were changed to appear in a negative light, while the Democrat or the majority comments were put in a very positive light, particularly after the changes were made.

Mr. Speaker, as I say, it disturbs me to ask for this question of privilege, but we should have open hearings on this. We cannot do that if this goes to the Ethics Committee. The integrity of this House and the three committees and the five subcommittees are involved, Mr. Speaker, and that is why we have had to take this route.

Mr. Speaker, I yield 3 minutes to the gentleman from Wisconsin (Mr. SENSENBRENNER).

Mr. SENSENBRENNER. Mr. Speaker, I thank the gentleman from Kansas for yielding me this time, and I speak first as an aggrieved party whose comments were altered in the context of the comments that I had with the former Member, the gentleman from Connecticut, Mr. MOFFETT, were altered. But I also speak as an alumnus of the Ethics Committee, having served on that body during the 96th Congress which dealt with the Diggs matter, the Flood matter, the Abscam matter and several other matters.

Frankly, the historical procedures that this House has used to delve into official misconduct are not adequate in this special situation because it is very clearly an instance where the integrity of the House of Representatives and its proceedings is at stake on what we do in response to the alteration of the transcripts not only in the EPA hearings of 1982, but also in the silver market hearings of 1980.

The rules of the Committee on Standards of Official Conduct clearly state that during the investigatory stage of any misconduct investigation, everything becomes secret, it is heard behind closed doors, and any Member or employee that breaches that confidence places himself subject to discipline by the House of Representatives.

Furthermore, our rules state that any records that are in the possession of the Committee on Standards of Official Conduct become closed records. So the records that are presently now open to every Member by rule of the House, as soon as it goes over to the Ethics Committee gets put under lock and key and, consequently, the public might not know if there are further instances of misconduct involving the alteration of transcripts.

I think that the issue of this resolution is very clearly whether we as a House will put our house in order as quickly as possible and as openly as possible, to make sure that this does not happen again.

And there is also one other issue, and that is that the proceedings contemplated by this resolution will be just as much to protect the innocent as it will be to identify and punish the guilty. Anybody who appears before the Ethics Committee is placed under a cloud of suspicion among their colleagues and among the press, and I think that an open hearing will be able to determine which of our dedicated and loyal employees have not committed this misconduct and to clear their names and their professional reputations, just as it will be to identify and get rid of the rotten apples that have caused this disgrace upon the House of Representatives.

So I would urge the Members to vote for openness, to vote against a motion to refer offered by the gentleman from Texas (Mr. WRIGHT), and to vote in favor of the resolution of the gentleman from Kansas (Mr. WINN).

Mr. WINN. Mr. Speaker, I yield 3 minutes to the gentleman from Pennsylvania (Mr. WALKER).

Mr. WALKER. Mr. Speaker, we are faced with two important questions, both of which will be resolved in one vote.

The first question is: Are we capable of dealing with criminal misconduct by key employees of this House?

The second question is: How will we investigate this matter and assure the public that we have corrected our problem?

Let me deal with the first question first: Are we capable of dealing with questions of misconduct? So far, those of us who have a problem here, who have been aggrieved by this whole situation, have seen only efforts to bury the issue and keep it as far out of the public eye as possible. That disturbs me.

How will we investigate? Well, I think it is clear that any investigation should be open and fully accessible to the public.

Now, what about the vote that we are going to cast here on the motion to refer that will be offered by the majority leader? If we vote for that motion, we are not going to meet either one of those tests. What we would do with that motion is to refer this matter to the single most partisanly stacked committee of this House. That is hardly acting in a way which assures us that we are going to deal capably with the whole issue of criminal misconduct.

Also, the motion, according to the majority leader, is going to be probably aimed at moving it eventually to the Ethics Committee. At least that has been the traditional route after such a motion. That would mean that the investigation would be conducted behind closed doors, in secret.

Now, around here when we have dealt with abuse of power, arrogance of power, in the executive branch, we have made absolutely clear that those were to be public hearings. Right now, when we have some investigations going on of perhaps some campaign misconduct, boy, they are right out in the open, we are making certain that that is held right out in the open. And that is as it should be. I agree with that. But we ought to be doing the same thing with regard to our own misconduct here. We ought to be in the open. We are not going to have that if we go to the Ethics Committee.

We should have learned some things over the past decade. We should have learned that America expects us to zealously guard public integrity.

Mr. WRIGHT. Mr. Speaker, will the gentleman yield on that point?

Mr. WALKER. I will, as soon as I am finished with my statement.

Mr. WRIGHT. All right.

Mr. WALKER. And only a select committee can make certain that we do zealously guard public integrity. America expects us to be open in our deliberations about misconduct. Only a select committee will assure us that we can be open.

The question here is clear. There will be a question you will vote on when we come to the motion to refer. Will we have cooperation? Or will we have coverup?

Your votes today will tell America just where you stand.

Mr. Speaker, I will be very glad to yield to the majority leader in whatever time I might have remaining.

Mr. WRIGHT. I appreciate the gentleman's yielding.

Mr. Speaker, I think the gentleman may be mistaken about the manner in which the Committee on Standards of Official Conduct operates.

When the gentleman from Pennsylvania says that anything that is referred to the Committee on Standards of Official Conduct is held in closed session, the gentleman is not accurate.

The SPEAKER pro tempore. The time of the gentleman from Pennsylvania (Mr. WALKER) has expired.

Mr. WRIGHT. Mr. Speaker, I yield 2 additional minutes to the gentleman from Pennsylvania.

The truth of it is that the Committee on Standards of Official Conduct operates just as does a grand jury. Its proceedings are open following the discovery process. They are not closed. Only at the point where testimony may come respecting some possible criminal violation do those proceedings become closed. And that is a necessary requirement which would be applicable to any new or select committee that might be created.

Mr. WALKER. If I may reclaim my time, I made a very careful statement here, and it is the point which I think is clear and which I am right on. And that is that the investigation would be conducted behind closed doors and in secret.

In the investigatory stage, under the rules of the House and under the rules of the committee, they conduct their investigations in secret. That is the question that is before us: Should not this investigation be out in the public, where the public can witness what the problems were that come here, and to find out just exactly what took place? That is the kind of investigation that we have held all the time around here, it is exactly the kind of investigation that is being held in the Ethics Subcommittee right now, and I think that it is entirely proper that that is the kind of investigation that this House should hold when we have got questions of misconduct before us. That is what we are asking for. That is what the Ethics Committee, under its own rules, cannot give us. And it seems to me that that is the reason why we feel that this issue could be buried.

We also know that, once the issue goes to Ethics, that they conduct their in-secret investigation and a guilty party is identified, if that party is fired or resigns, the Ethics Committee loses jurisdiction over the matter, they no longer can pursue the mater because under the rules of the House they can only deal with employees, officers or Members of the House.

So, therefore, we could have a situation where the investigation could lead to absolutely nothing and nobody would even know that was going on.

I think that the Ethics Committee may be the right route on some things, but it is the wrong route here.

Mr. WRIGHT. Mr. Speaker, I yield myself 2 minutes, and I do this only to straighten out the record.

The gentleman from Pennsylvania means well, I am quite sure, but he very definitely misstates the fact when he declares that the Committee on Standards of Official Conduct operates only in secret. That is incorrect.

I do not believe there has been any occasion during the history of this committee for any Member of the House to question the validity of its findings or the propriety of its proceedings. That committee has operated from its inception as a completely nonpartisan committee. It was created expressly with half of its Members, members of the minority party and half of the majority party for the reason that we wanted a totally, completely bipartisan committee. It is a blue-ribbon committee.

□ 1115

To insinuate that somehow the proceedings of the Committee on Standards of Official Conduct are less than democratic or less than open or less than proper, or that any other special select committee could be created that would operate in a better or more democratic or more open fashion while still protecting the legal rights of those people who would be under investigation, I think, would be to engage in a misstatement of the actual facts.

Beyond that, it is inaccurate to state that the Committee on Standards of Official Conduct has jurisdiction only over Members and employees of the House.

The SPEAKER pro tempore. (Mr. KAZEN). The time of the gentleman from Texas (Mr. WRIGHT) has expired.

Mr. WRIGHT. Mr. Speaker, I yield myself 1 additional minute.

As Members who have been in this body for any length of time surely will recall, there have been numerous occasions on which the Committee on Standards of Official Conduct has sought and been granted subpena powers which reach far beyond the Members and employees of the House. I cite simply the very well known occasion in which we employed a special counsel, Mr. Jaworski, to investigate the allegations that were rampant under the so-called Koreagate scandal. In that instance, we brought people all the way from Korea, not even citizens of this country, and commanded them to appear, and they did appear.

So it really is not accurate at all to say that our Standing Committee on Standards of Official Conduct is inhibited or limited in its scope in any way whatsoever.

Mr. WINN. Mr. Speaker, I yield 2 minutes to the gentleman from South Carolina (Mr. HARNETT).

Mr. HARTNETT. I thank the gentleman for yielding this time to me.

Mr. Speaker, I am really not all that familiar with the issue here, as to what was said and what was changed and what was transcribed. I guess it might be called a Committeegate, Mr. Leader, or Transcribegate, or something, but I think it really is phenomenal that half of last night's press conference of the leader of the free world was taken up by the liberal media wanting to know about Notegate. What happened to poor Jimmy Carter's little book? I understand that Reagan had a copy of it but he knew it really was not Jimmy Carter's authentic book because it did not have any quotes from Amy Carter in it. Half of the time of the press conference of the leader of the free world was dominated by the liberal media asking questions about Mr. Carter's book. That is a sad thought.

Mr. Strauss, the chairman of the Democratic Committee, was quoted "Why, I think we ought to appoint a special prosecutor." I think it is really ironic and phenomenal that here we have the rights of a minority Congressman, his right to be able to participate in what little participation we have in the committee process, Mr. Leader, and you a Democrat want a closed hearing. You know, we are told how many Members we can have and told how many staff members we can have, and now here he (the Republican Congressman) is trying to operate within the functions of that committee, with integrity and with honesty, and someone changed his testimony to some degree.

I think what we have here is the importance of letting us know that you, (Mr. WRIGHT) in all your righteousness, in all your fairness, would say to the minority Members of this House of Representatives and to the public, "We want this thing held in open hearings. We want you to know that we are protecting your rights honestly; not politically, but honestly and we want the American people to know that this Congress respects the rights of every Member, every individual Member, be he a Democrat or a Republican."

I think it is imperative that every Member in this House vote that this hearing be held in the open.

Mr. WRIGHT. Mr. Speaker, may I inquire as to how much time each side has remaining?

The SPEAKER pro tempore The gentleman from Texas (Mr. WRIGHT) has 21 minutes remaining, and the gentleman from Kansas (Mr. WINN) has 20 minutes remaining.

Mr. WRIGHT. Mr. Speaker, I yield such time as he may consume to the distinguished chairman of the Committee on Science and Technology, the gentleman from Florida (Mr. FUQUA).

Mr. FUQUA. I thank the gentleman for yielding this time to me.

Mr. Speaker, no one regrets this instance happening any more than this Member. Let me say from the beginning that the integrity of the Members of this House, this institution, have been damaged. Now let me also say what has been done.

It has been mentioned about the hearings of last year, in the last Congress, by some five subcommittees, of which two subcommittees were of the Committee on Science and Technology. About May of this year I learned that there appeared to be an alteration of the remarks of the gentleman from Pennsylvania (Mr. WALKER).

Immediately I instructed the general counsel of our committee to review that matter and make sure what the facts were and report back to me. He came back a few weeks later and said it appeared to be more than just one alteration, but it involved a number of them. It was our committee that went through, side-by-side, the printed transcript and also the actual transcript and pointed out some over 100 discrepancies, most of which were normal editing changes, that occurred and involved Members as well as witnesses before that committee.

The transcripts were compared after other errors of omission of materials for the record were discovered. We then, prior to the request of the minority, impounded all of the records and still have them impounded in my office under lock and key from both subcommittees dealing with this particular matter. I have made available and I have sent a letter to the gentleman from Kansas outlining the procedure whereby Members can have access to those, and I would like at this point to insert that letter into the RECORD.

The letter follows:

COMMITTEE ON SCIENCE
AND TECHNOLOGY,
Washington, D.C., June 28, 1983.

Hon. LARRY WINN, Jr.,
House of Representatives,
Washington, D.C.

DEAR LARRY: Your request for documents and other information concerning the Natural Resources, Agriculture Research and Environmental Subcommittee and the Investigations and Oversight Subcommittee has been received, as well as the request to review those impounded materials pertaining to the Joint EPA Hearings.

As we discussed over the phone, I think it best to make the impounded materials available to any Members to review in the committee library inside the hallway of Room 2317. I am also asking the Sergeant-at-Arms to provide personnel for those periods when Members wish to review these materials.

In light of the pending request made to the Committee on Standards of Official Conduct for an investigation of the altered transcripts, all those files impounded by me are to be treated as Executive Session materials.

The attached lists of the two subcommittees contains (1) those hearings published for the 97th Congress, and those still in progress, and (2) those hearings held in the 98th Congress and the status of each.

In the past our Committee has sent the master transcripts to the GPO which are thrown out sometime after printing, and since the remainder of the hearing materials were also discarded once printed, all that can be done to reconstruct a complete record at this time for all the hearings in the 97th Congress would be to request the official reporter to make a copy of the record, if it is available. However, I am sending to you a box containing all those hearings for the 97th Congress that are printed and those transcripts that were located. The records for those hearings not yet completed by the NRARE subcommittee in the 97th Congress can be reviewed by checking with Regina Davis who is retaining the materials until our new hearing publication policy is established.

The records of each of the subcommittee hearings in the 98th Congress are retained in the respective subcommittee offices since they are sending out witness transcripts for review, and collecting the other materials that go in the record for each. As you know, both majority and minority staff are involved in this work. I would request that you contact either George Kopp or Bob Nicholas if you wish to examine those hearing records and files in the subcommittee offices.

Sincerely,

DON FUQUA, *Chairman.*

Mr. FUQUA. Furthermore, at the request of six members of the minority to have a meeting before the Committee on Science and Technology to review this matter, and prior to the actual meeting, there was a meeting called by the chairman of the Committee on Government Operations, the chairman of the Committee on Energy and Commerce, and myself, along with the ranking minority members of those committees, Mr. WINN of the Committee on Science and Technology, Mr. BROYHILL of the Committee on Energy and Commerce, and Mr. HORTON of the Committee on Government Operations.

We tentatively agreed at that time to recommend, since it transcended the three committees, that it go to the Committee on Standards of Official Conduct.

We, on June 15, corresponded with the chairman of the Committee on Standards of Official Conduct, Mr. STOKES, and requested that they have a vigorous, full and complete investigation, and it be undertaken immediately. I would like at this point, Mr. Speaker, to insert that letter into the RECORD.

The letter follows:

HOUSE OF REPRESENTATIVES,
Washington, D.C., June 15, 1983.

Hon. LOUIS STOKES,
Chairman, Committee on Standards of Official Conduct, Rayburn House Office Building, Washington, D.C.

DEAR MR. CHAIRMAN: We are writing to request that the Committee on Standards of Official Conduct undertake an investigation into the circumstances involving the alteration of a transcript published as "EPA Oversight: One-Year Review".

Joint hearings were held on July 21 and 22, 1982, by certain subcommittees of the Committee on Government Operations, Committee on Energy and Commerce, and Committee on Science and Technology. The original transcript of the hearing was altered during the process which led to publication.

Inasmuch as the alterations resulted in substantially changing the meaning of testimony of Members of Congress, we believe that an investigation of the matter can be most appropriately carried out by your Committee. We respectfully request that a vigorous, full, and complete investigation be undertaken immediately and that it be given the highest priority and completed with all possible speed.

We pledge our total cooperation and that of the majority and minority staffs of our committees and subcommittees.

Sincerely,

Jack Brooks, Chairman, Committee on Government Operations; Don Fuqua, Chairman, Committee on Science and Technology; John D. Dingell, Chair-

man, Committee on Energy and Commerce.

Mr. FUQUA. On June 23, the Committee on Science and Technology held about a 3-hour hearing, of which I have an unaltered transcript of that hearing, and the committee voted overwhelmingly and adopted a resolution to refer this matter to the Committee on Standards of Official Conduct, and at this point, Mr. Speaker, I would like to include in the RECORD the letter of transmittal, as well as the resolution that was adopted by that committee.

The letter follows:

COMMITTEE ON SCIENCE
AND TECHNOLOGY,
Washington, D.C., June 29, 1983.

Hon. LOUIS STOKES,
Chairman, House Committee on Standards of Official Conduct, Washington, D.C.

DEAR MR. CHAIRMAN: I am transmitting herewith the Committee resolution on the requested investigation by your Committee into the alteration of the EPA hearing transcripts conducted last year on July 21 and 22.

The resolution was adopted during the Science and Technology Committee's meeting on June 23 called to discuss the altered transcripts.

Sincerely,

DON FUQUA, *Chairman.*

RESOLUTION

Resolved, That immediately upon the adoption of this resolution, the Chairman of the Committee on Science and Technology take all appropriate steps (1) to request the Committee on Standards of Official Conduct to undertake a prompt and thorough investigation of the alteration of the transcript of the Joint hearings conducted by subcommittees of the Committee on Science and Technology, the Committee on Government Operations and the Committee on Energy and Commerce on July 21 and 22, 1982, entitled "EPA Oversight: One-Year Review"; and (2) to provide for the publication of the transcript in its proper form, together with all materials that were requested to be supplied for the record; be it further

Resolved, That the Committee on Standards of Official Conduct is specifically requested to permit any Member of Congress access to any committee records transferred to said committee in the course of its investigation pursuant to the provisions of Rule XI of the Rules of the House of Representatives and that such records be treated as Executive Session records.

Mr. FUQUA. Mr. Speaker, since that time we have answered all of the requests that have been made by the minority, and those who say that this is trying to be swept under the table are certainly misinterpreting the facts as I understand them, Mr. Speaker, as it relates to this very serious matter.

Now, it has been pointed out that the Committee on Standards of Official Conduct is a bipartisan committee, equally divided by both parties, and I have always felt that their work and the product of their work was of the highest standard. The Ethics Committee operates somewhat as a grand jury, and certainly people who are innocent are entitled to some protection. Those who may be found guilty of transgressions in this particular case certainly should be punished to the fullest extent of the law.

So I think we have ample precedent. That is why the committee was established, that is why it is in operation, and it is ready to go. So I think we have every right to refer this to the Committee on Standards of Official Conduct that was set up in the beginning.

So there has been action. The three committee chairmen involved regret this as much as anybody. It is a serious breach of the ethics and the rules of this House, and I hope that we get to the bottom of it.

Mr. GREGG. Mr. Speaker, will the gentleman yield?

Mr. FUQUA. I will be happy to yield to the gentleman from New Hampshire.

Mr. GREGG. I appreciate the gentleman yielding.

Mr. Speaker, I just want to state, as I believe all the Members on this side have consistently stated, that the manner in which the chairman has gotten to the issue relative to the investigation within the staff we have been very appreciative of, and the fact that he had his staff review the transcripts.

But we still do have this serious issue of how the further investigation of identifying who did it, why they did it, when they did it, and how many people were involved, whether that is going to be in the open or be a closed session. That is a very serious issue and that is the issue remaining before us.

Mr. Speaker, I just want to point out to the chairman, as I am sure the chairman knows, that in the resolution which was passed by the committee, there was an amendment offered by the minority Members that we ask the Ethics Committee to hold open hearings. It was a clear question of directing the Ethics Committee to hold open hearings, and that amendment was voted down on a straight party-line vote. So there is no direction in the resolution that was passed by the Committee on Science and Technology to the Ethics Committee asking for open hearings as a result of that.

Mr. FUQUA. Well, the gentleman is correct, but that is up to the Ethics Committee. They make the determination. We cannot tell them or instruct them how they must conduct an investigation. They have rules that provide for that. Now, the Ethics Committee can vote to open their hearings if they so choose. It depends on the nature of the matter that is before them.

We did include in the resolution a part that was asked for by the minority, and we agreed that the material that was turned over to them from our committee be available to the Members. I have just had a chance to discuss that with the chairman of the Ethics Committee. He can speak for himself, but they feel as though that would not be any problem as far as records were concerned. But that is something that the Ethics Committee must decide.

As has been pointed out, they operate in a bipartisan fashion, whenever they have a meeting on this matter, they will consider all these issues and the procedures that they should operate by.

Mr. GREGG. Mr. Speaker, if the gentleman would yield further, if we, as a committee, in the Committee on Science and Technology, could ask them in our resolution to let us see the records, which is in clear contravention of the present rules of the House, which is rule XI, 2(e), I believe, which says that those records become secret and are not available to Members, we could have also directed and asked the Ethics Committee to have open hearings.

Mr. FUQUA. Mr. Speaker, I think if the gentleman will separate the two issues, one is records that are the property of the House of Representatives. The other is discovery information. That information, in my opinion, should remain privy to the members of that committee because they are, in effect, sitting as a grand jury. But as far as records of the House are concerned, we do it in matters relating to classified and intelligence information that are available to Members under certain procedures, and I have no problem with that. As a matter of fact, I would encourage the Committee on Standards of Official Conduct to do that.

□ 1130

Mr. GREGG. Yes; but if the chairman of the committee would yield, openness is the property of the American people. That is an even higher value of property. Openness in investigating how we run our institution is certainly the ultimate property of the American people in a democracy.

Mr. WINN. Mr. Speaker, I yield 3 minutes to the minority whip, the gentleman from Mississippi (Mr. LOTT).

Mr. LOTT. Mr. Speaker, I thank the gentleman for yielding me this time.

Mr. Speaker, let me first, if I may, address a question to the distinguished chairman of the committee, the gentleman from Florida (Mr. FUQUA). I certainly know that he is trying to be cooperative, but just for general information I would like to make this inquiry because I do not know the answer.

We have been hearing a good bit of discussion on this matter for several days, and I know an effort is being made to sort of package this up and send it to the Ethics Committee, but

has there been some investigation already to try to ascertain the people that might have been involved with the various committees in altering these transcripts?

Does the gentleman have any idea of who is involved? I have not heard of anybody being named or anybody being dismissed; I have not heard of any action. Is there anything of that nature occurring?

Mr. FUQUA. Mr. Chairman, will the gentleman yield?

Mr. LOTT. I yield to the gentleman from Florida.

Mr. FUQUA. Mr. Speaker, we have had an internal investigation in our committee to try to determine exactly what happened.

As the gentleman knows, this Member has no authority over staff personnel of another committee. But we have had an internal investigation, and I would hope, since it transcends three committees, that there will be an opportunity for somebody with the proper credentials to investigate thoroughly and put witnesses under oath, probably including myself, even though I never saw the transcripts and never had anything to do with them. But I think they would certainly want to know how much I know about the information and would put me under oath.

Mr. LOTT. Mr. Speaker, I thank the gentleman.

Mr. Speaker, I recognize that this is an unusual step we are requesting today, but these are unusual circumstances. In the 15 years that I have been around here I never heard of transcripts being altered or Members' words being changed in a very derogatory way, and, therefore, I think it must be dealt with in this unusual way. The privileges of the House and the rights of individual Members of this House have been seriously breached.

The majority leader spoke of normal procedure, but the fact is that this is not a normal occurrence and it should not be shunted aside in any way that would provide anything less than total, full investigation and disclosure.

Now, several things worry me.

Mr. WRIGHT. Mr. Speaker, will the gentleman yield?

Mr. LOTT. I yield to the majority leader.

Mr. WRIGHT. Mr. Speaker, I want to make it clear. The gentleman is imputing to me a suggestion that this thing should be shunted aside? Let me be sure we are clear.

Mr. LOTT. I said that the gentleman spoke of normal circumstances. These are not normal circumstances.

Mr. WRIGHT. Mr. Speaker, will the gentleman yield further?

Mr. LOTT. First, let me respond to this.

Mr. WRIGHT. I am trying to respond to an idea which the gentleman has sought to put into my mouth which never emanated therefrom.

Mr. LOTT. Mr. Speaker, let me state it again so the leader can understand what I said.

The majority leader spoke of the normal procedure, but the fact is that this is not a normal occurrence, and it requires immediate, full disclosure and action.

Would the gentleman like to respond to that?

Mr. WRIGHT. Yes; I surely would. The purpose of the Committee on Standards of Official Conduct is to investigate matters that are abnormal. If it was normal for there to be breaches of the honor of the House, then that would be a very sad commentary indeed.

The SPEAKER pro tempore. The time of the gentleman from Mississippi (Mr. LOTT) has expired.

Mr. WRIGHT. Mr. Speaker, I yield 1 additional minute to the gentleman from Mississippi (Mr. LOTT) in order that I might respond further.

Mr. LOTT. Mr. Speaker, I thank the gentleman for extending this time to me, and I yield to the gentleman.

Mr. WRIGHT. This point also needs to be made clear. Under no circumstances are we suggesting that the matter should be shunted aside or swept under the rug.

Mr. LOTT. Mr. Speaker, let me make this point.

Mr. WRIGHT. Mr. Speaker, the gentleman has yielded to me, and I wish he would let me finish.

Mr. LOTT. Mr. Speaker, I have already yielded part of my time to the gentleman, and I would like to comment on that.

What the gentleman is suggesting is that this be sent to the Rules Committee; is that not a fact?

Mr. WRIGHT. Mr. Speaker, in response to the gentleman's statement that it needs to be investigated immediately, my conclusion is that it can be investigated much more expeditiously and much more quickly and the investigation can begin immediately——

Mr. LOTT. If it goes to the Rules Committee?

Mr. WRIGHT. If it is sent by the Rules Committee to the Committee on Standards of Official Conduct which is already in place.

Mr. LOTT. Mr. Speaker, let me ask this: Would the majority leader assure this body that the Ethics Committee will be able to begin immediately a total, open, full investigation of this matter?

I have reason to believe and know that the Ethics Committee has a very full platter right now, that it is very busy and very much involved in other matters.

The SPEAKER pro tempore. The time of the gentleman from Mississipi (Mr. LOTT) has again expired.

Mr. WINN. Mr. Speaker, I yield 1 additional minute to the gentleman from Mississippi (Mr. LOTT).

Mr. LOTT. Mr. Speaker, I yield to the majority leader for a response on the fact that he knows and I know that the Ethics Committee is very busy.

Mr. WRIGHT. Mr. Speaker, I think that response is going to come in just a few moments from the chairman of that very committee, Mr. STOKES. He has been preparing to begin a full-scale investigation of this matter, and I think he can respond to the gentleman's question in a manner that the gentleman will find completely responsive and absolutely satisfactory.

Mr. LOTT. Mr. Speaker, this select committee is not unprecedented. It is the way we should go.

As a member of the Rules Committee, it greatly concerns me that this issue would be sent to the Rules Committee, which is obviously an arm of the Speaker and is probably the most partisan committee of this whole House.

I would urge my colleagues to give serious attention to a select committee that could move into this issue quickly, give it its full and total attention, make recommendations, and then go out of existence, so that the people and the Members of this body could hear totally what is involved and not have it go to a committee which is very much involved in other matters right now and would handle it in a less than totally open way. As a matter of fact, the Ethics Committee, by its very nature, must move forward in a very quiet procedure and not have everybody aware of what has transpired here.

I urge the Members to vote down the motion to refer, and bring this matter before the American people and a reluctant press.

The SPEAKER pro tempore. The time of the gentleman from Mississippi (Mr. LOTT) has expired.

Mr. WINN. Mr. Speaker, I would like to inquire of the Chair how much time remains for both the majority leader and this Member?

The SPEAKER pro tempore. The Chair will state that the gentleman from Kansas has 16 minutes remaining, and the gentleman from Texas (Mr. WRIGHT) has 11 minutes remaining.

Mr. WINN. Mr. Speaker, we certainly do want to hear from the chairman of the Ethics Committee, but first I yield 3 minutes to the gentleman from Indiana (Mr. HILER).

Mr. HILER. Mr. Speaker, I thank the gentleman for yielding this time to me.

Mr. Speaker, the one thing I have found in the 2½ years I have been in this body is that we have more than enough opportunity, both on the floor

and in committee, for disagreement over specific issues and philosophy, and one of the things that I have heard so often is that there may be a lot of disagreement in committee or a lot of disagreement on the floor, but when we walk out of the doors, we leave it behind, because as an institution, this institution has to function with a lot of controversy, with a lot of debate, and with a lot of disagreements, but we as individuals cannot carry that disagreement outside the doors.

To do that, we need trust. A Member told me when I first got here that the middle name of every Congressman should be "trust." I was told, "You have to trust other Members, and you have to be willing to have yourself trusted in." We have a remarkable form of government in that way.

What has happened here is a challenge to the integrity of this body and to the process, and we must insure that integrity with free and open debate and with free and open hearings. We must resolve this issue with the same openness that we resolve other major issues. To do it in any other way but to resolve this in the open is to put a cloud over that trust that we depend on to resolve the issues of the day.

A dark cloud currently hangs over several committees and several subcommittees. It is going to be impossible for members of the majority and of the minority to operate in a functional way that insures that that trust is maintained.

We have had witnesses come to us, witnesses who have testified in previous hearings, saying that their testimony has been changed. They are reluctant to come before these committees now because of a fear that their testimony will be changed in the future.

By referring this matter to the Ethics Committee, we will see that it goes into a cocoon, and we may go months without hearing from the committee. There is no obligation by the Ethics Committee to report this matter to the House.

As one of the affected Members, let me say that I no longer serve on the Committee on Government Operations, I no longer serve on the Committee on Science and Technology, and I do not serve on the Ethics Committee. As the Member whose remarks were changed more than any other Member's in this particular hearing, I will never have access to the hearings in the closed, secret sessions that will take place so that I find out who it was that changed my remarks, why they did it, and what is going to happen to that particular individual.

□ 1140

I think it is imperative that this institution resolve this matter openly. If we can resolve issues with the executive branch in open session, if we can subpena people to come down here to give us records that will be disclosed openly, then certainly we can clean our own house in a free and open manner.

I would hope that this House would vote against the motion to refer this to the Rules Committee and then on to the Ethics Committee and would, instead, vote for a select committee to investigate this matter.

Mr. WINN. Mr. Speaker, I yield 1 minute to the gentlewoman from Connecticut (Mrs. JOHNSON).

Mrs. JOHNSON. Mr. Speaker, just very briefly, as a new Member who has followed this matter fairly close, I am dismayed that there could be even the suggestion that this investigation be carried on in any except the most open setting possible under the rules of the House.

There is only one interest here and that is the public interest. There is only one way that the public interest can be served and that is through full investigation and complete and total openness. The public needs the opportunity to see and hear what words were changed, who did what actions, and to judge for themselves through the interchange in the public hearing setting the motivation of those who would take such reprehensible actions, which compromise the integrity of the legislative process and of the House of Representatives.

I urge my colleagues to support this resolution that establishes an independent committee to investigate the unprecedented sabotage of the democratic process and adopts a process about which there can be no question of its openness and no question of the public's access to the facts. The mere fact that an amendment to require the Committee on Standards of Official Conduct to hold open hearings was defeated on party lines creates the appearance of unwillingness, of reluctance, of a lack of commitment by the majority party to a full and open investigation of this matter. In my estimation, the altering of transcripts is as great a threat of our form of government as any action ever taken by any individual or group in our history. It strikes at the very heart of free speech, open government, and honest dialog.

This is a time when partisan concerns must be laid aside. The public interest demands full investigation and an open process. Only passage of this resolution will assure that.

Mr. WINN. Mr. Speaker, I yield 2 minutes to the gentleman from New Mexico (Mr. LUJAN). Then we are anxious to hear from the chairman of the Ethics Committee.

Mr. LUJAN. Mr. Speaker, I want to thank the gentleman for yielding.

I was at the meeting where we referred this matter to the Ethics Committee and I think that is probably a good short step. I do not mean to be critical of what the Ethics Committee would do. I think they do a very fine job; however, I think that this thing is expanding every day. It was first a question of one set of hearings on EPA. Yesterday it came out that it was hearings on synfuels and silver.

I had my staff check and see what might have happened over in my committee, because I had heard rumblings about it.

Let me give you two examples of things that happened over in the Interior Committee. It was on the Subcommittee on Oversight and Investigations.

On June 19, 1983, the New York Times quoted a House subcommittee staff report which was provided to it concerning questionable investigative practices by the Nuclear Regulatory Commission. In fact, this subcommittee staff report was simply a comprehensive briefing paper prepared by the majority staff. No opportunity for review. It should have been called the majority staff report or majority staff briefing paper. This would have properly alerted discerning media people to the fact that it was a partisan political document presenting only one side of the issue.

The second incident occurred in early November 1982, and it is worse, when the same subcommittee's majority staff released portions of two Sandia National Laboratory reports to the Washington Post, characterizing them as conclusive comments by the labs on nuclear accident consequences. In fact, they were not the labs' conclusions, but rather represented conclusions reached by nontechnical members of the subcommittee's majority staff on ongoing technical studies. They were immediately and creditably discounted by the Nuclear Regulatory Commission, the Sandia National Laboratories, and knowledgeable industry technical staff as misleading and in many cases flat wrong, but not before they had been widely quoted by the national media just prior to the November elections, which included nuclear-related referenda in many States. Again, the minority staff was not allowed to review the majority staff report prior to release. In this case in particular, any dissenting opinions would have alerted the media to the lack of credibility of the majority staff conclusions.

Mr. Speaker, while neither of these examples represents the utter disregard for minority members' rights which occurred during the doctoring of the EPA hearing transcripts, they nevertheless document a majority staff attitude which does not give the minority due process and is not in the

best interests of the Congress or this Nation.

Mr. WRIGHT. Mr. Speaker, I yield 5 minutes to the very distinguished chairman of the Committee on Standards of Official Conduct, the gentleman from Ohio (Mr. STOKES).

Mr. STOKES. Mr. Speaker, I thank the distinguished majority leader for yielding to me.

First, let me say that as the distinguished gentleman from Florida (Mr. FUQUA) has said, his committee did write to the Ethics Committee and request that we investigate the matters under discussion at this time. Prior to that, we had received another letter signed by all three committee chairmen asking the Ethics Committee to conduct this investigation. Pursuant to the receipt of the first letter, I convened the Ethics Committee and presented the letter signed by all three chairmen to them, at which time the entire committee engaged in discussion relative to the investigation.

It was the unanimous opinion of the Committee on Standards of Official Conduct that they should conduct this investigation, that our committee was the proper committee to investigate this matter and that, in fact, the allegations did; in fact, impinge upon the integrity of the House, and for that reason we had authority to conduct the investigation.

I presented to the committee at that time a resolution which we had drawn up to give us the broad powers we would need to conduct this kind of an investigation for the House.

The committee discussed the resolution and agreed upon the introduction of the resolution. It was suggested to me, however, that rather than to follow the usual procedure of the ranking minority member from South Carolina (Mr. SPENCE) and I introducing the resolution, that we should attempt in this case because of the serious nature of it to get the three ranking minority members of all three committees to join in the cosponsorship of that resolution.

Pursuant to that, the gentleman from South Carolina (Mr. SPENCE) then agreed to undertake the matter of trying to get the leadership on the other side to work with him in order to try to get the three ranking minority members to sign on that resolution.

The resolution has been prepared now for almost a week. I have not been able to introduce it for the reason that I have not been able to get the concurrence and the cosponsorship of the three ranking Republican members.

We are prepared at this time to introduce the resolution. We are prepared to go forward with the investigation, but we need from the House the broad powers that are necessary to conduct this kind of an investigation. We have come to the House in every investigation with such a resolution and we have been given broad powers by the House to expedite the investigation.

Now, let me say with reference to any investigation that I have been involved in as chairman of either this committee or the House Select Committee on Assassinations, it is impossible to conduct an investigation in the open.

First, you defame, you degrade, you humiliate innocent persons, and no one in this House wants to be a part of that type of an illegal, unconstitutional procedure. Even when we conducted the investigations relative to the assassinations, after we had created in the House a Select Committee on Assassinations, for months we did all the investigatory work in executive session, where we not once on any occasion did we degrade, humiliate, or defame any innocent person.

We then had months of hearings in the open where all facets of both the King and the Kennedy investigation were aired in the public.

So that it is made patently clear, because some Members have made some very erroneous statements with reference to the fact that the Ethics Committee has not conducted open hearings, let me cite for you the fact in the Koreagate matters, we had days of hearings involving four Members of the House in open public sessions.

It is absolutely untrue to say that the Ethics Committee does not have open hearings. I might remind you that we had hearings with reference to former Member Sikes from Florida; former Member Diggs of Michigan; former Member Charles Wilson of California; former Member Lederer of Pennsylvania in the Abscam cases; former Member Myers of Pennsylvania in the Abscam cases; and former Member Jenrette of South Carolina in the Abscam cases. All of those former Members of the House were subjected to open hearings after we had done the preliminary investigatory work with reference to those cases.

Mr. SENSENBRENNER. Mr. Speaker, will the gentleman yield?

Mr. STOKES. Not at this time.

The SPEAKER pro tempore. The time of the gentleman from Ohio has expired.

Mr. WRIGHT. Mr. Speaker, I yield 2 additional minutes to the gentleman.

□ 1150

One of the Members of the House who spoke a few moments ago made the statement that the committee would have no obligation to make any type of report to the House.

In the resolution which we are prepared to file with the House and ask the House to adopt we provide specifically in that resolution that the committee must make a report of its findings to the House.

We have done this in every other investigation we have conducted. Even where Members of the House who were under investigation resigned during the course of that investigation, under our rules we were still required to make a report to the House naming those individuals and citing the facts and circumstances under which we were conducting the investigation.

In conclusion, let me just say there is absolutely no reason, in my opinion, for the House to create a select committee because a select committee would have to operate in the same way in which we conducted the business of the House Select Committee on Assassinations. The Ethics Committee is prepared to conduct this investigation. We have already begun to put into operation the mechanism for doing so, and all we need from the House would be the broad powers we would want under our resolution.

Mr. SENSENBRENNER. Mr. Speaker, will the gentleman yield?

Mr. STOKES. I yield to the gentleman from Wisconsin.

Mr. SENSENBRENNER. During my period of time on the Ethics Committee we did an extensive investigation into ghost voting on the floor of the House. Were any of those hearings held in public?

Mr. STOKES. To my recollection in the ghost voting matters undertaken by the House there were no public hearings because we never proceeded to the point there was any alleged statement of violations, as the gentleman knows.

Mr. SENSENBRENNER. That is precisely our point.

Mr. WINN. Mr. Speaker, I yield 2 minutes to the gentleman from California (Mr. THOMAS).

Mr. THOMAS of California. I thank the gentleman from Kansas for the time.

The point the gentleman from Wisconsin is making is indeed one that I think is important.

As a former member of the Ethics Committee myself, and sitting through a number of public hearings on the Abscam question, let us remember these gentlemen were formally charged, but, as the current chairman of the Ethics Committee has pointed out, in the ghost voting cases no one was formally charged and all of those hearings were held in private, just as all of these hearings are going to be held in private.

We do not want to go into the way in which the Ethics Committee carries on its investigations but I think the point that people have to realize is that what apparently has occurred is about the most insidious thing to have occurred in the time that I have been here, and that is three terms. It is authoritarianism at its most extreme.

When someone decides that they do not like what you say and that they are going to change what you say and they believe that they have the ability to do it and get away with it, that is the height of arrogance. It is the most extreme abuse of power.

Unfortunately, there has been one party that has been in control of this body for over a quarter of a century, the bulk of the staffing in all of the committees is selected by that particular party, and it just seems to me that as far as this institution is concerned, for the mutual respect between members of both parties, and especially for the American public, that we show them that there is not the arrogance of power, that we show them that there is not the authoritarian aspect of someone deciding they do not like what you say and they are going to change what you say.

It seems to me that the quiet behind closed door hearings of the Ethics Committee will produce a result albeit sometime in the future and we will read a statement of what was determined to have happened or not happened. The American public has the right to know now and in public that the understanding, the cooperation between individuals in this House is to be honored and maintained. The hearings have to be public.

Mr. WINN. Mr. Speaker, I yield 3 minutes to the gentleman from New Hampshire (Mr. GREGG).

Mr. GREGG. Mr. Speaker, yesterday we took some time and we explained the specifics of what has happened here. Today what we are discussing is how we are going to try to get to the bottom of it.

The only issue before this body today is whether we are going to have an open hearing process or a secret hearing. The question has become whether to send this to the Rules Committee, which is sort of the first turnoff on a one-way street into a tunnel called the Ethics Committee; or whether we are going to have a select committee appointed here and that select committee is going to have an open airing of the matter.

There are seven basic reasons why we should not go to the Ethics Committee.

First is the issue of openness. That has to be the primary concern of this Congress. We are dealing here with the integrity of the system and the question of the public response to the system.

If we are not willing to give the public access to how we got into this problem, and give the public access as to how we are going to get out of it, then we might as well pack up our bags and go home because we are in the wrong country.

Second is the issue of uniqueness. This is an unusual situation. The Ethics Committee has never addressed this type of situation. We are talking about Members having their rights violated by staff of other Members, a very severe situation.

Third is the scope situation. The Ethics Committee, at least in the original resolution, was not talking in the terms of scope that now seems to be necessary, possibly two other hearings.

We have now heard today from the gentleman from New Mexico that even in the Committee on Interior and Insular Affairs there may be problems. The select committee has an obligation to go into all of these issues. The Ethics Committee would have to design its scope, I believe, in a much narrower sense.

Fourth is the issue of resignations. If the individuals identified as having altered the manuscripts resigned after 3 months of secret investigations by the Ethics Committee this question is then moot. The Ethics Committee loses jurisdiction once that individual staff member resigns and we no longer have the ability to attack the issue.

Fifth is the original resolution—now maybe that has been changed. We did not get to hear from the chairman of the Ethics Committee on this—but the original resolution the Ethics Committee was proposing talked in terms of "may" instead of "shall."

"There may be a report." We all know what that means.

Sixth is the issue of the fact that records which affect us as Members who have had our rights stomped upon will not be available to us as Members. Our entire records of these committees will end up in the Ethics Committee and we do not, under our rules, have access.

Seventh is again the question of what has been the traditional role of the Ethics Committee in this House. Let us be honest about it. The traditional role of the Ethics Committee of this House is to take a matter which has a fair amount of visibility, and which may not be something we are comfortable with, and move that matter into an arena where we do not have to deal with it in the open and we can deal with it in a much more calm, suppressed way.

For me the question is openness. I believe for the American people the question is openness. As I did comment to the chairman in a prior exchange, openness is not unique to this institution. It is the property of the American people.

If we do not have the courage to address our own problems in the open, then I do not think the American people are going to have much confidence in this House.

Mr. WINN. Mr. Speaker, I yield 1 minute to the gentlewoman from Rhode Island (Mrs. SCHNEIDER), another one of those wronged.

Mrs. SCHNEIDER. Mr. Speaker, I rise in strong support of the resolution calling for a select committee to investigate alterations of remarks by Members on official transcripts of committee hearings. While some of my colleagues have had the entire meaning of their remarks turned upside down by the alteration or outright elimination of entire sentences, my own comments appear to have been affected in relatively minor ways. For that reason, I want to make clear that I am not supporting this resolution because I have been personally injured, but because there is a higher principle involved.

As everybody knows, the official transcripts provide a legislative record that is often used to establish the intent of a particular amendment or bill. In addition, transcripts are often used in political debates during campaigns. Finally, they provide a historical record that may be used in the future to interpret congressional actions we take today. For these reasons, the official transcripts should be considered inviolable. Yet we have clear evidence that these transcripts have been altered, substantially in some cases, and that the alterations extend beyond the EPA hearings of last summer.

If we refer the incident to the Ethics Committee, as has been suggested, the investigation will be conducted in secret, and will be limited to last year's EPA hearings. We do not know where this incident begins or ends. The best way to find out is through an open hearing, conducted by a select committee that has a charter to look into all incidents of transcript alterations. For those of you who are afraid the incident would drag on indefinitely, I would point out that the resolution requires the select committee to report on its findings no later than October 28 of this year. This is a fair way to proceed, and I urge the adoption of this resolution.

□ 1200

The SPEAKER pro tempore. The time of the gentlewoman from Rhode Island (Mrs. SCHNEIDER) has expired.

The gentleman from Texas (Mr. WRIGHT) has 4 minutes remaining; the gentleman from Kansas (Mr. WINN) has 4 minutes remaining.

Mr. WRIGHT. Mr. Speaker, I yield 2 minutes to the distinguished gentleman from Georgia (Mr. JENKINS).

Mr. JENKINS. Mr. Speaker, I have listened to the debate at great length and I understand every Member that may have grave concerns from both sides of the aisle about the alleged violations that have apparently taken place. I simply want to say that as a member of the Ethics Committee, I am somewhat concerned about the reluctance of some Members to refer issues that ought to go to the Ethics Committee, to that committee, be-

cause there seems to be a great deal of misapprehension about the work and the openness of the work of the Ethics Committee.

Let me say to you, as a member of that committee, that I have never served on a committee where I saw better cooperation from Republicans and Democrats on every issue, however sensitive that issue may be.

I have never seen more fairness exhibited in that committee, as far as alleged violations are concerned. There is no partisanship there. And the misapprehension that some Members apparently have is that these proceedings will not be made public or open. Well, let me say that there may be 500 depositions taken and there may be only 10 of those that will be directly involved in a violation. You do not want 450 innocent people paraded before the public simply for the sake of some political gain or whatever. That is unfair to the innocent.

The Ethics Committee is the committee, the committee that has been set up by this institution to take care of those violations of the public trust, the conduct of Members and employees of this House, and if you do not have the confidence or the faith in that committee which is made up of Republicans and Democrats alike, then this institution ought to rethink its prior action as to whether or not we want to keep the committee. This is the committee that was set up for the purpose to investigate this type of violation and we ought to let it do its work. Either this committee should have these allegations referred to it for proper disposition, or we should abolish the committee.

The SPEAKER pro tempore. The time of the gentleman has expired.

The Chair recognizes the gentleman from Texas (Mr. WRIGHT).

Mr. WRIGHT. Mr. Speaker, if the gentleman has more than one speaker remaining, I would defer to the gentleman from Kansas.

Mr. WINN. No, I have only the majority leader and he will use up the remainder of our time.

Mr. WRIGHT. The gentleman refers to the minority leader?

Mr. WINN. The minority leader, yes, Mr. Speaker.

Mr. WRIGHT. Mr. Speaker, I yield myself the 2 minutes remaining.

Mr. Speaker, there is no reason on Earth for the creation of a separate committee. We have enough committees in this House; no need for the extra expense that would be involved, no need for the extra delay that would be involved by creating a new committee.

There is no need for the disparagement that I have heard expressed against the Committee on Rules and against the Committee on Standards of Official Conduct. Those who support the resolution express the desire for openness. Surely the regular committee is not subject to criticism on that ground. We have openness but we have responsible openness.

Madame La Farge operated in the open; she let the people vote on whether they would lop off the heads of those who were charged with crimes. A lynch mob operates in the open, sometimes under a tree.

The point is that we have in the House established procedures which have served this Republic well from its very inception. We try to be both responsible and open. We must be closed, of course, during the discovery process. As any attorney would know, you cannot perform that kind of function in open hearings. We have to protect the reputations of innocent people.

But once having completed the discovery process, then the Committee on Standards of Official Conduct traditionally has conducted all of its subsequent operations wholly in the open. It has conducted them in a responsible way, in a reputable way, in a way that has not been challenged or questioned.

We have the responsibility to uphold the institutions of this House in matters involving the honor and integrity of the House. Indeed, it is an important matter. It is for that very reason that I urge our Members to vote for the motion to refer this resolution to the Rules Committee in order that the inquiry may begin immediately by the proper committee of the House, the committee that has been created by the House for this express purpose.

For those reasons, in order that it may be done in an expeditious way, yes, in an open way, also in a responsible way that protects the rights of individuals as well as the honor of the House, I ask for an aye vote on the motion which I shall make at the conclusion of the debate to refer this matter to the Committee on Rules.

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. WINN. Mr. Speaker, I yield such time as he may consume to the gentleman from New York.

Mr. CARNEY. Mr. Speaker, I rise in support of the resolution offered by the gentleman from Kansas.

One of the founding principles of our Nation, the ability of citizens to petition and be heard by their representatives on an issue is being threatened. This threat comes not from any legislation or lobbying effort, but rather from a blatant abuse of political power.

As we have noted this morning, the written record of at least one congessional hearing, of which I was a participant, has been intentionally distorted by a person or persons unknown, so as to totally distort the views presented by the members of the minority and witnesses testifying before the committee. Further, other speakers this morning have indicated that other hearing records may also contain equally egregious alterations. The integrity of the committees involved, and of this body, is at stake. We must, therefore, act expeditiously to uncover those responsible for these reprehensible acts.

The resolution offered by the gentleman from Kansas, of which I am a cosponsor, seeks to address this problem in a responsible, nonpartisan, and most importantly, an open manner. Unless the public has the ability to monitor the investigation, which would be virtually impossible if the matter is referred to the Ethics Committee, due to the rules under which that committee operates, the integrity of the hearing process will not be restored.

I, therefore, urge my colleagues to reject political expediency and support the resolution.

Mr. WINN. Mr. Speaker, I yield our remaining time to the minority leader, the gentleman from Illinois (Mr. MICHEL).

The SPEAKER pro tempore. The gentleman from Illinois (Mr. MICHEL) is recognized for 4 minutes to close debate.

Mr. MICHEL. Mr. Speaker, may I first make the observation it is rather a unique experience to close the debate on the minority side of the aisle.

Second, may I say quite frankly that I do not relish the opportunity to take the floor today when it comes to another matter in which we have the integrity of this House at stake and a blemish upon the House, on the strength of what has happened.

We have before us a resolution called up as a question of privilege because the issue before us is the integrity of the House of Representatives and the record of its proceedings.

Mr. Speaker, this is of the highest order of importance in this body, even if in the public eye it does not rank among the high priorities of the Nation and even if, in the eye of the media, it does not rank in importance to campaign briefing books and the like.

But what is at issue here is the integrity of the House. This House lives and breathes through its records. The history of our Republic is written in good part on what is said, what is done here and how it is recorded.

Our records are the heart of our legislative process. Our records are the foundation on which the courts and the executive branch administer and interpret our laws.

In George Orwell's "1984" the record of the past was systematically distorted to suit the wishes of Big Brother; inconvenient facts were sent down the memory hole.

Have we come to a time when similar practices are occurring in this body? I cannot yet answer that question.

But the fact that there is reason to ask it is reason for extraordinary action here today. We are not dealing with revisions or extensions of remarks and we are not dealing with grammatical corrections here; we are dealing with deliberate, surreptitious and repugnant acts designed to discredit specific Members of the minority party in that hearing record.

And since we now know that these facts were committed in more than one instance, involving more than one hearing, more than one committee, standard operating procedures, I do not think, apply here.

Now, the majority leader said in his opening remarks he is going to move to refer this to the Rules Committee. I have one problem with that and that is as we began our deliberations on the rules on opening day of this Congress the Rules Committee was stacked 2 to 1 plus 1 in favor of the majority. Now I know that is tradition, the majority party has the power of determining that ratio and the Rules Committee is the arm of the Speaker around here. And I have real problems with that, just on the strength of the dynamics of the membership of the committee, with no disrespect to individual Members. It is simply a question of numbers.

Now in the Ethics Committee, I suppose if I had my druthers, I would take the Ethics Committee because it is six and six and I respect all the members of that committee who have to serve with long hours, with the lousiest, rotten job to do in this Congress, looking after wrongdoing of Members and our staff.

My problem with that is that you have got a full platter to attend to and it will be 6 months or more before you have ever gotten to the bottom of this and in the meantime whoever the culprit is, is going on doing the things he has always done.

I do not suspect a Member himself, I suspect it is staff. I have never had the privilege of chairing my committee or full committee but I run a pretty tight ship in my office.

I will tell you if there is any question about any one of those individual staff members doing something unethical, I would fire their you-know-what right quick.

If I were a chairman of one of these respective committees I will bet you I could detail pretty well, who was responsible.

Who do you delegate that authority to around here? We are bloated with staff and we cannot control it, ourselves.

I just think it is a darn right shame to have Members as outstanding as these Members are to have their character besmirched and their whole record distorted as I have seen in the record here.

□ 1210

I have to show my displeasure, as much as I hate, as I said, to take the floor on an occasion like this.

I would recognize that we have exceeded our time. On occasion the majority party has exceeded their time allotment as they close debate, but I will live by the rules.

I simply ask for support for the resolution of the gentleman from Kansas, and a vote against the motion to refer.

The SPEAKER pro tempore. All time has expired.

Mr. WINN. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

MOTION OFFERED BY MR. WRIGHT

Mr. WRIGHT. Mr. Speaker, I offer a motion.

The SPEAKER pro tempore. The Clerk will report the motion.

The Clerk read as follows:

Mr. WRIGHT moves to refer the resolution to the Committee on Rules.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Texas (Mr. WRIGHT).

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. SENSENBRENNER. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 256, nays 161, not voting 12, answered "present" 4, as follows:

Erlenborn	Heftel	Smith, Robert

□ 1220

The Clerk announced the following pairs:

On this vote:

Mr. Ford of Michigan for, with Mr. McCandless against.

Mr. Heftel of Hawaii for, with Mr. Robert F. Smith against.

Mr. MAZZOLI and Mr. WILLIAMS of Ohio changed their votes from "yea" to "nay."

So the motion was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

AUTHORIZING APPROPRIATIONS FOR NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

Mr. FUQUA. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 2065), to authorize appropriations to the National Aeronautics and Space Administration for research and development, construction of facilities, and research and program management, and for other purposes, with Senate amendments thereto, and concur in the Senate amendments.

The Clerk read the title of the bill.

The Clerk read the Senate amendments, as follows:

Strike out all after the enacting clause and insert:

TITLE I

SEC. 101. That there is hereby authorized to be appropriated to the National Aeronautics and Space Administration to become available October 1, 1983:

(a) For "Research and development," for the following programs:

(1) Space transportation capability development, $2,009,400,000;

(2) Space transportation operations, $1,545,600,000;

(3) Physics and astronomy, $562,100,000;

(4) Planetary exploration, $220,400,000;

(5) Life sciences, $59,000,000;

(6) Space applications, $313,000,000;

(7) Technology utilization, $10,000,000;

(8) Aeronautical research and technology, $320,300,000;

(9) Space research and technology, $143,000,000; and

(10) Tracking and data systems, $700,200,000; and

(b) For "Construction of facilities," including land acquisition, as follows:

(1) Space Shuttle facilities at various locations as follows:

(A) Modifications for additional chillers for mission control center, Lyndon B. Johnson Space Center, $2,300,000;

(B) Modifications to mobile launch platform, John F. Kennedy Space Center, $27,300,000; and

(C) Modification of manufacturing and final assembly facilities for external tanks, Michoud Assembly Facility, $11,700,000;

(2) Space Shuttle payload facilities at various locations as follows:

(A) Construction of cargo hazardous servicing facility, John F. Kennedy Space Center, $9,000,000; and

(B) Modifications to spacecraft assembly and encapsulation facility for cargo processing, John F. Kennedy Space Center, $3,000,000;

(3) Construction of frequency standards laboratory, Jet Propulsion Laboratory, $2,700,000;

(4) Modifications to space flight operations facility, Jet Propulsion Laboratory, $1,600,000;

(5) Construction of fluid mechanics laboratory, Ames Research Center, $3,900,000;

(6) Construction of aeronautical tracking facility, Hugh L. Dryden Flight Research Facility, $800,000;

(7) Modifications and addition for composite materials laboratory, Langley Research Center, $5,100,000;

(8) Modifications to 30- by 60-foot wind tunnel, Langley Research Center, $4,400,000;

(9) Modifications for small engine component testing facility, Lewis Research Center, $7,000,000;

(10) Modifications to icing research tunnel, Lewis Research Center, $3,600,000;

(11) Relocation of 26-meter STDN antenna, Spain, $1,700,000;

(12) Repair of facilities at various locations, not in excess of $500,000 per project, $19,500,000;

(13) Rehabilitation and modification of facilities at various locations, not in excess of $500,000 per project, $24,500,000;

(14) Minor construction of new facilities and additions to existing facilities at various locations, not in excess of $250,000 per project, $4,800,000; and

(15) Facility planning and design not otherwise provided for, $9,200,000.

(c) For "Research and program management," $1,242,500,000, and such additional or supplemental amounts as may be necessary for increases in salary, pay, retirement, or other employee benefits authorized by law.

(d) Notwithstanding the provisions of subsection 101(g), appropriations hereby authorized for "Research and development" may be used (1) for any items of a capital nature (other than acquisition of land) which may be required at locations other than installations of the Administration for the performance of research and development contracts, and (2) for grants to nonprofit institutions of higher education, or to nonprofit organizations whose primary purpose is the conduct of scientific research, for purchase or construction of additional research facilities; and title to such facilities shall be vested in the United States unless the Administrator determines that the national program of aeronautical and space activities will best be served by vesting title in any such grantee institution or organization. Each such grant shall be made under such conditions as the Administrator shall determine to be required to insure that the United States will receive therefrom benefit adequate to justify the making of that grant. None of the funds appropriated for "Research and development" pursuant to this Act may be used in accordance with this subsection for the construction of any major facility, the estimated cost of which, including collateral equipment, exceeds $250,000, unless the Administrator or his designee has notified the Speaker of the House of Representatives and the President of the Senate and the Committee on Science and Technology of the House of Representatives and the Committee on Commerce, Science, and Transportation of the Senate of the nature, location, and estimated cost of such facility.

(e) When so specified and to the extent provided in an appropriation Act, (1) any amount appropriated for "Research and development" or for "Construction of facilities" may remain available without fiscal year limitation, and (2) maintenance and operation of facilities, and support services contracts may be entered into under the "Research and program management" appropriation for periods not in excess of twelve months beginning at any time during the fiscal year.

(f) Appropriations made pursuant to subsection 101(c) may be used, but not to exceed $35,000, for scientific consultations or extraordinary expenses upon the approval or authority of the Administrator and his determination shall be final and conclusive upon the accounting officers of the Government.

(g) Of the funds appropriated pursuant to subsections 101(a) and 101(c), not in excess of $75,000 for each project, including collateral equipment, may be used for construction of new facilities and additions to existing facilities, and for repair, rehabilitation, or modification of facilities: *Provided*, That, of the funds appropriated pursuant to subsection 101(a), not in excess of $250,000 for each project, including collateral equipment, may be used for any of the foregoing for unforeseen programmatic needs.

SEC. 102. Authorization is hereby granted whereby any of the amounts prescribed in paragraphs (1) through (14), inclusive, of subsection 101(b)—

(1) in the discretion of the Administrator or his designee, may be varied upward 10 percent, or

(2) following a report by the Administrator or his designee to the Committee on Science and Technology of the House of Representatives and the Committee on Commerce, Science, and Transportation of the Senate on the circumstances of such action, may be varied upward 25 percent,

to meet unusual cost variations, but the total cost of all work authorized under such paragraphs shall not exceed the total of the amounts specified in such paragraphs.

SEC. 103. Not to exceed ½ of 1 percent of the funds appropriated pursuant to subsection 101(a) hereof may be transferred to and merged with the "Construction of facilities" appropriation, and, when so transferred, together with $10,000,000 of the funds appropriated pursuant to subsection 101(b) hereof (other than funds appropriated pursuant to paragraph (15) of such subsection) shall be available for expendi-

ture to construct, expand, or modify laboratories and other installations at any location (including locations specified in subsection 101(b)), if (1) the Administrator determines such action to be necessary because of changes in the national program of aeronautical and space activities or new scientific or engineering developments and (2) he determines that deferral of such action until the enactment of the next authorization Act would be inconsistent with the interest of the Nation in aeronautical and space activities. The funds so made available may be expended to acquire, construct, convert, rehabilitate, or install permanent or temporary public works, including land acquisition, site preparation, appurtenances, utilities, and equipment. No portion of such sums may be obligated for expenditure or expended to construct, expand, or modify laboratories and other installations unless (A) a period of 30 days has passed after the Administrator or his designee has transmitted to the Speaker of the House of Representatives and to the President of the Senate and to the Committee on Science and Technology of the House of Representatives and to the Committee on Commerce, Science, and Transportation of the Senate a written report containing a full and complete statement concerning (i) the nature of such construction, expansion, or modification, (ii) the cost thereof including the cost of any real estate action pertaining thereto, and (iii) the reason why such construction, expansion, or modification is necessary in the national interest, or (B) each such committee before the expiration of such period has transmitted to the Administrator written notice to the effect that such committee has no objection to the proposed action.

SEC. 104. Notwithstanding any other provisions of this Act—

(1) no amount appropriated pursuant to this Act may be used for any program deleted by the Congress from requests as originally made to either the House Committee on Science and Technology or the Senate Committee on Commerce, Science, and Transportation,

(2) no amount appropriated pursuant to this Act may be used for any program in excess of the amount actually authorized for that particular program by subsections 101(a) and 101(c), and

(3) no amount appropriated pursuant to this Act may be used for any program which has not been presented to or requested of either such committee,

unless (A) a period of 30 days has passed after the receipt by the Speaker of the House of Representatives and the President of the Senate and each such committee of notice given by the Administrator or his designee containing a full and complete statement of the action proposed to be taken and the facts and circumstances relied upon in support of such proposed action, or (B) each such committee before the expiration of such period has transmitted to the Administrator written notice to the effect that such committee has no objection to the proposed action.

SEC. 105. It is the sense of the Congress that it is in the national interest that consideration be given to geographical distribution of Federal research funds whenever feasible, and that the National Aeronautics and Space Administration should explore ways and means of distributing its research and development funds whenever feasible.

SEC. 106. The authorization for space transportation capability development includes provision for the production activities necessary to provide for a fleet of Space Shuttle orbiters, including the production of structural and component spares, necessary to ensure confident and cost-effective operation of the orbiter fleet, as well as provisions for maintaining production readiness for a fifth orbiter vehicle.

SEC. 107. Title III of the National Aeronautics and Space Act of 1958, as amended, is amended by adding at the end thereof the following new section:

"MISUSE OF AGENCY NAME AND INITIALS

"SEC. 310. (a) No person (as defined by section 305) may (1) knowingly use the words 'National Aeronautics and Space Administration' or the letters 'NASA', or any combination, variation, or colorable imitation of those words or letters either alone or in combination with other words or letters, as a firm or business name in a manner reasonably calculated to convey the impression that such firm or business has some connection with, endorsement of, or authorization from, the National Aeronautics and Space Administration which does not, in fact, exist; or (2) knowingly use those words or letters or any combination, variation, or colorable imitation thereof either alone or in combination with other words or letters in connection with any product or service being offered or made available to the public in a manner reasonably calculated to convey the impression that such product or service has the authorization, support, sponsorship, or endorsement of, or the development, use, or manufacture by or on behalf of the National Aeronautics and Space Administration which does not, in fact, exist.

"(b) Whenever it appears to the Attorney General that any person is engaged in an act or practice which constitutes or will constitute conduct prohibited by subsection (a), the Attorney General may initiate a civil proceeding in a district court of the United States to enjoin such act or practice."

SEC. 108. Section 103(1) of the National Aeronautics and Space Act of 1958, as amended, is amended, by striking out " and (C)" and inserting in lieu thereof "(C) the operation of a space transportation system including the Space Shuttle, upper stages, space platforms, and related equipment, and (D)".

SEC. 109. Notwithstanding any other provision of law, there shall be transferred to NASA three government-owned tracts of NASA used land and improvements thereon (totalling approximately 33.5 acres) at Ellington Air Force Base, Texas, without any transfer of funds therefor.

SEC. 110. Any decision or proposed policy by the President or the National Aeronautics and Space Administration to commercialize some or all of the existing expendable launch vehicle technologies and associated facilities and equipment shall be presented to the Committee on Commerce, Science, and Transportation of the Senate and the Committee on Science and Technology of the House of Representatives for their review. No such decision or policy shall be implemented unless (A) a period of 30 days has passed after the receipt by each such committee of a full and complete statement of the decision or proposed policy and the facts and circumstances relied upon in support of such decision or proposed policy or (B) each such committee before the expiration of such period has transmitted to the Administrator written notice to the effect that such committee has no objection to the decision or proposed policy.

SEC. 111. This Act may be cited as the "National Aeronautics and Space Administration Authorization Act, 1984".

TITLE II

SEC. 201. There is authorized to be appropriated $29,336,000 for the fiscal year 1984 for the purpose of operating the land remote sensing satellite system, including provision for storage of a backup satellite.

SEC. 202. Notwithstanding title II of the National Aeronautics and Space Administration Authorization Act, 1983, the Secretary of Commerce shall not transfer the ownership or management of any civil land, meteorological, or ocean remote sensing space satellite system and associated ground system equipment unless, in addition to any other requirement of law—

(1) the Secretary of Commerce or his designee has presented, in writing, to the Speaker of the House of Representatives and the President of the Senate, and to the Committee on Science and Technology of the House of Representatives and the Committee on Commerce, Science, and Transportation of the Senate, a comprehensive statement of recommended policies, procedures, conditions, and limitations to which any transfer should be subject; and

(2) the Congress thereafter enacts a law which contains such policies, procedures, conditions, or limitations (or a combination thereof) as it deems appropriate for any such transfer.

Mr. FUQUA (during the reading). Mr. Speaker, I ask unanimous consent that the Senate amendments be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

□ 1230

Mr. WINN. Mr. Speaker, reserving the right to object, I would like to ask the chairman of the Committee on Science and Technology to give a short explanation of what all is involved in this bill and if he would spell out for the Members some of the amounts of money involved.

Mr. FUQUA. Mr. Speaker, will the gentleman yield?

Mr. WINN. I yield to the gentleman from Florida.

Mr. FUQUA. Mr. Speaker, on April 26, 1983, the House passed H.R. 2065 which would authorize a total of $7,268,220,000 for the National Aeronautics and Space Administration. The bill in title II of H.R. 2065 of the House authorized to be appropriated $29,336,000 for the National Oceanic and Atmospheric Administration for fiscal year 1984 for the purpose of operating the land remote sensing satellite system.

On June 15, 1983 the Senate passed S. 1096 which would authorize $7,278,100,000 for NASA activities in fiscal year 1984 as well as $29,336,000 for NOAA Landsat activities in fiscal year 1984.

On Monday, June 27, 1983, the Senate passed H.R. 2065 with an amendment in the nature of a substi-

tute which represents a compromise worked out through informal discussions between members of the House Committee on Science and Technology and the Senate Committee on Commerce, Science, and Transportation. This substitute amendment, which was adopted by the Senate, would authorize a total of $7,267,600,000 for the National Aeronautics and Space Administration in fiscal year 1984.

The total amount authorized in the substitute amendment is $620,000 less than the previous House action and $10,500,000 less than the amount previously authorized by the Senate.

Mr. Seaker, the differences between the action of the House and the Senate were indeed minor and the substitute amendment to H.R. 2065 which has been passed by the House represents a fair and equitable compromise between the previous action of the two Houses.

I am submitting for the RECORD a detailed explanation of the substitute amendment adopted by the Senate to H.R. 2065 on Monday, June 27, 1983:

EXPLANATORY STATEMENT OF THE SUBSTITUTE AMENDMENT

The NASA request for fiscal year 1984 totaled $7,106,500,000. The House authorized $7,268,220,000 and the Senate authorized $7,278,100,000. The substitute amendment provides a total authorization for fiscal year 1984 of $7,267,600,000 as follows:

SUMMARY OF ADJUSTMENTS TO H.R. 2065—NASA FISCAL YEAR 1984 AUTHORIZATION

	Budget request	House action	Senate action	Substitute amendment
Research and development:				
Space transportation capability development	$1,927,400,000	$1,999,400,000	$2,022,400,000	$2,009,400,000
Space transportation operations	1,570,600,000	1,570,600,000	1,535,600,000	1,545,600,000
Physics and astronomy	514,600,000	566,600,000	558,600,000	562,100,000
Planetary exploration	205,400,000	220,400,000	215,400,000	220,400,000
Life sciences	59,000,000	59,000,000	59,000,000	59,000,000
Space applications	289,000,000	306,000,000	321,000,000	313,000,000
Technology utilization	4,000,000	10,000,000	10,000,000	10,000,000
Aeronautical research and technology	300,300,000	311,600,000	328,300,000	320,300,000
Space research and technology	138,000,000	143,000,000	138,000,000	143,000,000
Tracking and data acquisition	700,200,000	700,200,000	700,200,000	700,200,000
Total	5,708,500,000	5,886,800,000	5,889,500,000	5,883,000,000
Construction of facilities	150,500,000	138,920,000	142,100,000	142,100,000
Research and program management	1,247,500,000	1,242,500,000	1,247,500,000	1,242,500,000
Grand total	7,106,500,000	7,268,220,000	7,278,100,000	7,267,600,000

The points in disagreement and the resolution of them are as follows:

1. NASA requested $1,927,400,000 for Space Transportation Capability Development activities.

The House authorized $1,999,400,000, a net increase of $72 million as follows: an increase of $70 million to increase funding for orbiter and engines spares and to maintain production readiness for a fifth orbiter; an increase of $10 million to continue contractor space station studies, to fund alternative concept studies, and to fund studies of a space platform serviced by an extended-duration orbiter; and a decrease of $8 million to reduce level of support for engineering and technical base activities.

The Senate authorized $2,022,400,000, an increase of $95 million as follows: an increase of $85 million for the initiation of procurement of a fifth Space Shuttle orbiter; an increase of $5 million for additional space station studies; and an increase of $5 million for the teleoperator maneuvering system.

The substitute amendment authorizes $2,009,400,000 for Space Transportation Capability Development activities including the following: an increase of $75 million for orbiter and engine spares, an increase of $10 million for space station studies, a decrease of $8 million in Engineering and Technical Base, and an increase of $5 million for the teleoperator maneuvering system.

2. NASA requested $1,570,600,000 for Space Transportation Operations activities.

The House authorized the NASA request.

The Senate authorized $1,535,600,000 a reduction of $35 million in the level of support for operations.

The substitute amendment authorizes $1,545,600,000, a decrease of $25 million, for Space Transportation Operations activities.

3. NASA requested $514,600,000 for Physics and Astronomy activities.

The House authorized $566,600,000 which is $52 million over the request and includes: an increase of $45 million for the Space Telescope program to offset cost overruns; an increase of $6 million in Research and Analysis for experimental and theoretical research ($4M) and for instrumentation ($2M); and an increase of $1 million in Mission Operations and Data Analysis for HEAO data analysis.

The Senate authorized $558,600,000, a net increase of $44 million over the request. This budget includes an increase of $50 million in Space Telescope for cost overruns; an increase of $4 million in Research and Analysis for experimental and theoretical research and mission definition; an increase of $1 million in Mission Operations and Data Analysis for HEAO data analysis; and a decrease of $11 million in Shuttle/Spacelab Payload Development which is a net of a $16 million decrease for Solar Optical Telescope and an increase of $5 million for Space Plasma Lab.

The substitute amendment authorizes $562,100,000 for Physics and Astronomy activities including the following: an increase of $45 million for the Space Telescope program, a decrease of $4.5 million for Shuttle/Spacelab Payload Development and Mission Management (the net result of a decrease of $7 million for the Solar Optical Telescope and an increase of $2.5 million for the Space Plasma Lab), an increase of $1 million in Mission Operations and Data Analysis for HEAO data analysis, and an increase of $6 million in Research and Analysis.

4. NASA requested $205,400,000 for Planetary Exploration activities in fiscal year 1984.

The House authorized $220,400,000, an increase of $15 million over the NASA request. The increase is in Research and Analysis for university research support and instrumentation and to partially restore the activity to fiscal year 1980 purchasing power.

The Senate authorized $215,400,000, an increase of $10 million over the NASA request. The increase is for Research and Analysis for experimental and theoretical research and mission definition.

The substitute amendment authorizes $220,400,000, an increase of $15 million for Research and Analysis activities.

5. NASA requested $289,000,000 for Space Application activities in fiscal year 1984.

The House authorized $306,000,000, an increase of $17 million over the request. This amount includes an increase of $9 million in Solid Earth Observations—for Agristars ($2M) to continue NASA participation; for Research and Analysis ($4M) for Snythetic Aperture Radar and Global Resource Information Systems studies; for Technology Transfer ($3M) for Application System Verification Tests. Also included is an increase of $3 million in Environmental Observations for Research and Analysis to support mission definition studies for Origin of Plasmas in the Earth's Neighborhood ($2M) and a study of Sun-Earth interactions ($1M). The House also authorized an increase of $5 million in Materials Processing for a university center for research on the seperation and purification of organic materials and to augment industrial research aimed at commercial applications.

The Senate authorized $321,000,000, an increase of $32 million over the request. This includes an increase of $12 million in Solid Earth Observations for future sensor development and data utilization activities in Agristars ($3M), Research and Analysis ($5M), and Technology Transfer ($4M). The Senate authorized an increase of $10 million for Environmental Observations in Space Physics/Advanced Technological Development for university research in the Origin of Plasmas in the Earth's Neighborhood program ($2M); for Upper Atmosphere Research Satellite experiments ($4M); for Atmosphere Dynamics and Radiation Research ($2M) for advanced microwave sounder; and for Ocean Processes Research ($2M) for an advanced scatterometer. The Senate also authorized an increase of $5 million in Materials Processing to continue de-

veloping technology including small scale hardware for preliminary flight experiments and validation of concepts and for research in the separation and purification of biomaterials. Finally, the Senate authorized an increase of $5,000,000 for the Communications program for research on advanced communications systems (beyond ACTS).

The substitute amendment authorizes $313,000,000 for Space Applications programs including the following changes: an increase of $9 million for Solid Earth Observation as provided in the House action; an increase of $7 million in Environmental Observations ($2 million to support mission definition studies for Origins of Plasmas in the Earth's Neighborhood and $5 million to be used at the agency's discretion for Upper Atmospheric Research Satellite Experiments, for Atmosphere Dynamics and Radiation Research, and for Ocean Processes Research with the expectation that NASA will be guided by the Committee comments in the Legislative Report accompanying S. 1096); an increase of $5 million for Materials Processing in Space activities for the establishing university centers for research on the separation and purification of organic materials, for small scale hardware for preliminary flight experiments and concept validation, and for industrial research aimed at commercial applications; and an increase of $3 million for advanced satellite communications technology development (beyond ACTS). Within available funds NASA is directed to undertake a study of Sun-Earth interactions as called for in the Legislative Report accompanying H.R. 2065. The Members also adopt the Senate provision calling for a study of the Space Applications program.

6. NASA requested $300,300,000 for Aeronautical Research and Technology activities in fiscal year 1984.

The House authorized $311,600,000 an increase of $11.3 million over the request. This increase is the net of an increase of $20 million for the Advanced Turboprop program, an increase of $14 million for civil systems technology, and a general decrease of $22.7 million in the Research and Technology base.

The Senate authorized $328,300,000, an increase of $28 million over the request. This increase is the net result of a general reduction of $15 million in the Research and Technology Base and an increase of $43 million in Systems Technology Programs. The Systems Technology increase would be applied as follows: Advanced Turboprop ($18M); Laminar flow control ($5M); Advanced Transport Operating System ($2M); Advanced Turbofan ($4M); General Aviation/Commuter Engine Technology ($3M); and $11 million for the following technologies, advanced composites, energy efficient engine, energy efficient transport, and aeronautical systems studies.

The substitute amendment authorizes $320,300,000. Within this amount, $20 million is authorized only for the Advanced Turboprop Program, including activities leading to a flight test by 1987. The total further reflects the net of a $22.7 million reduction in the Research and Technology Base and a $22.7 million increase to be applied at NASA's discretion to civil Systems Technology programs, including Advanced Transport Operating Systems, Laminar Flow Control, Small Engine Component Technology, Advanced Turbofan Research, Advanced Composites, Advanced Metallics, Energy Efficient Engine, Energy Efficient Transport and Aeronautical Systems Studies.

7. NASA requested $138,000,000 for Space Research and Technology activities in fiscal year 1984.

The House authorized $143,000,000, an increase of $5 million over the request. This increase is in the Research and Technology base for university instrumentation ($2.5M) and advanced chemical propulsion ($2.5M).

The Senate authorized $138,000,000 which was the level requested.

The substitute amendment authorizes $143,000,000 as provided by the House with the expectation that NASA will initiate steps, possibly through planning grants, to identify the needs of universities and colleges for modern research laboratories, instrumentation, equipment, student fellowships and faculty development in order to maintain a healthy university base to support our Nation's civil space program.

8. NASA requested $150,500,000 for Construction of Facilities activities in fiscal year 1984.

The House authorized $138,920,000 a decrease of $11,580,000 below the request. This decrease was the net result of a general reduction of $5 million, the deletion of $8.4 million for the Ellington Air Force Base property transfer and an increase of $1.82 million to provide for the disassembly of an Apollo Launch Umbilical Tower in a manner that would allow reassembly for historical preservation.

The Senate authorized $142,100,000 which would delete the $8.4 million in the request for the Ellington Air Force Base property transfer.

The substitute amendment authorizes $142,100,000 for Construction of Facilities activities reflecting the deletion of $8.4 million requested for the transfer to NASA of property at Ellington Air Force Base. The House and Senate authorization Committees agree that the Apollo Launch Umbilical Tower should be disassembled in a manner that would allow the tower to be reassembled for historical preservation. The House and Senate authorizing Committees further agree that the funding required to reassemble the tower should be the responsibility of government agencies or private groups having a direct interest in historical preservation.

9. NASA requested $1,247,500,000 for Research and Program management activities in fiscal year 1984.

The House authorized $1,242,500,000 a general reduction of $5 million below the request.

The Senate authorized $1,247,500,000, the level of the request.

The substitute amendment would authorize $1,242,500,000.

10. The House included a language provision in Sec. 1(a)(8) related to funding amounts for the Advanced Turbo-prop program.

Senate bill had no comparable provision.

The substitute amendment would delete the language added by the House.

11. The House included a language provision in Sec. 1(b)(1)(B) related to preservation of an Apollo Launch Umbilical Tower.

The Senate bill contained no comparable provision.

The substitute amendment would delete the language added by the House since NASA has already exercised the contract option as specified using fiscal year 1983 funding.

12. The House included a new Section 109 authorizing transfer to NASA of property at Ellington Air Force Base without any transfer of funds therefor.

The Senate bill included a similar provision as Sec. 1(h) with some technical changes.

The substitute amendment includes the Senate language as Section 109.

13. The House added language at the end of Section 106 providing for maintaining production readiness for a fifth orbiter vehicle.

The Senate added language at the end of Section 106 authorizing initiation of procurement of a fifth orbiter vehicle.

The substitute amendment adopts the House language but deleted the references to the size of the orbiter fleet as being four orbiter vehicles.

14. In adopting Section 107, a provision related to misuse of the agency name as proposed by the Administration, the House deleted the second sentence in subsection (b).

The Senate adopted as Sec. 108 the Administration provisions related to misuse of the agency name.

The substitute amendment would adopt the House language as Sec. 107.

15. The House included in a new Sec. 108 an amendment to the Space Act to include within the definition of aeronautical and space activities as specified in Sec. 203 of the Space Act the following: "the operation of a space transportation system including the Space Shuttle, upper stages, space platforms, and related equipment."

Senate bill had no comparable language.

The substitute amendment includes the new Sec. 108 amending the Space Act as included in the House bill to clarify the definition of aeronautical and space activities.

16. The Senate included a new Sec. 107 to provide that any decision and proposed policy related to the commercialization of expendable launch vehicles be presented to the Senate Committee on Commerce, Science and Transportation and the House Committee on Science and Technology for review and approval.

The House bill included no comparable language.

The substitute amendment includes a new Sec. 110 to provide that any decision and proposed policy related to the commercialization of expendable launch vehicles be presented to the Senate Committee on Commerce, Science and Transportation and the House Committee on Science and Technology for review thirty days prior to implementation.

Mr. WINN. Mr. Speaker, I thank the gentleman for the explanation. I know that many on our side are going to want to know if this is over the budget, and if so, exactly how much and what agreements were reached with the Senate.

Mr. FUQUA. If the gentleman will yield further, the budget request for this year was $7.106 billion. There was money asked, some $50 million, for spare parts for the space shuttle, and also some $45 million for the significant changes in the space telescope. That corresponds with the amount appropriated earlier today in the appropriation bill that carries this matter, so it is slight above that, but it is my understanding that the administration has no objection to the bill in its current form.

Mr. WINN. I thank the chairman. I wonder if the chairman could tell us

about the cost overruns on the space telescope and what problems might be?

Mr. FUQUA. That is an investigation that is going on at this time by the Space Science and Applications Subcommittee, as well as an internal review that is being conducted by NASA. I think the chairman of that subcommittee could more enlighten the Members as to the specifics of that investigation.

Mr. VOLKMER. Mr. Speaker, will the gentleman yield?

Mr. WINN. I yield to the gentleman from Missouri?

Mr. VOLKMER. I thank the gentleman for yielding.

Mr. Speaker, I am sure that we are now on a good track on the space telescope. There will have to be additional funds, and we did put in additional funds in the 1984 budget, approximately $45 million. They anticipate that even with that NASA probably will have to reprogram some additional funds in 1984 also, and there will be additional amounts for 1985, but hopefully the matter is well being taken care of at the present time and there has been good oversight by NASA, especially on the management end of it, and anticipate that it will be completed now within the schedule presently contemplated.

Mr. WINN. Mr. Speaker, I thank the gentleman from Missouri, and I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida (Mr. FUQUA)?

There was no objection.

The SPEAKER pro tempore. Is there objection to the initial request of the gentleman from Florida?

There was no objection.

A motion to reconsider was laid on the table.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 2769, CARIBBEAN BASIN ECONOMIC RECOVERY ACT

Mr. PEPPER, from the Committee on Rules, submitted a privileged report (Rept. No. 98-273) on the resolution (H. Res. 246) providing for the consideration of the bill (H.R. 2769) to promote economic revitalization and facilitate expansion of economic opportunities in the Caribbean Basin region, which was referred to the House Calendar and ordered to be printed.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 2760, INTELLIGENCE AUTHORIZATION ACT FOR FISCAL YEAR 1983 AMENDMENT

Mr. PEPPER, from the Committee on Rules, submitted a privileged report (Rept. No. 98-274) on the resolution (H. Res. 247) providing for the consideration of the bill (H.R. 2760) to amend the Intelligence Authorization Act for fiscal year 1983 to prohibit U.S. support for military or paramilitary operations in Nicaragua and to authorize assistance, to be openly provided to governments of countries in Central America, to interdict the supply of military equipment from Nicaragua and Cuba to individuals, groups, organizations, or movements seeking to overthrow governments of countries in Central America, which was referred to the House Calendar and ordered to be printed.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 1, HOUSING AND URBAN RURAL RECOVERY ACT OF 1983

Mr. PEPPER, from the Committee on Rules, submitted a privileged report (Rept. No. 98-275) on the resolution (H. Res. 248) providing for the consideration of the bill (H.R. 1) to amend and extend certain Federal laws that establish housing and community and neighborhood development and preservation programs, and for other which was referred to the House Calendar and ordered to be printed.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 2957, INTERNATIONAL RECOVERY AND FINANCIAL STABILITY ACT

Mr. PEPPER, from the Committee on Rules, submitted a privileged report (Rept. No. 98-276) on the resolution (H. Res. 249) providing for the consideration of the bill (H.R. 2957) to extend the authority of the Export-Import Bank of the United States, encourage balanced worldwide economic growth, provide for continued participation in the International Monetary Fund, strengthen the supervision of international lending by U.S. banks, and provide for continued U.S. participation in multilateral development banks, which was referred to the House Calendar and ordered to be printed.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 10, NATIONAL DEVELOPMENT INVESTMENT ACT

Mr. PEPPER, from the Committee on Rules, submitted a privileged report (Rept. No. 98-277) on the resolution (H. Res. 250) providing for the consideration of the bill (H.R. 10) to amend the Public Works and Economic Development Act of 1965 and the Appalachian Regional Development Act of 1965, which was referred to the House Calendar and ordered to be printed.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 2832, MULTILATERAL DEVELOPMENT BANK ACT OF 1983

Mr. PEPPER, from the Committee on Rules, submitted a privileged report (Rept. No. 98-278) on the resolution (H. Res. 251) providing for the consideration of the bill (H.R. 2832) to provide for increased participation by the United States in the Inter-American Development Bank, the Asian Development Bank, and the African Development Fund, which was referred to the House Calendar and ordered to be printed.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 2842, EXPORT-IMPORT BANK AMENDMENTS OF 1983

Mr. PEPPER, from the Committee on Rules, submitted a privileged report (Rept. No. 98-279) on the resolution (H. Res. 252) providing for the consideration of the bill (H.R. 2842) to amend the Export-Import Bank Act of 1945 to establish the Competitive Tied Aid Fund, and for other purposes, which was referred to the House Calendar and ordered to be printed.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 3930, INTERNATIONAL ECONOMIC RECOVERY AND FINANCIAL STABILITY ACT

Mr. PEPPER, from the Committee on Rules, submitted a privileged report (Rept. No. 98-280) on the resolution (H. Res. 253) providing for the consideration of the bill (H.R. 2930) to encourage the coordination of national fiscal and monetary policy in order to achieve sustainable and noninflationary economic growth on a worldwide basis, to amend the Bretton Woods Agreements Act to authorize an increase in the U.S. quota in the International Monetary Fund, to reduce financial pressures on developing nations, and to improve the supervision of international lending by U.S. banks, which was referred to the House Calendar and ordered to be printed.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (Mr. KAZEN). The Chair will at this time take a very limited number of 1-minute speeches from those who are in the well at this time.

PRESIDENT IS READING FROM WRONG BRIEFING BOOK ON EDUCATION

(Mr. BOUCHER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BOUCHER. Mr. Speaker, today the President is going to Kentucky to take part in a carefully orchestrated event to demonstrate his support for vocational education.

Tonight the TV networks will carry President Reagan's statement that he strongly supports vocational education.

But in making that statement, Mr. Speaker, the President will once again be reading from the wrong briefing book. Let us look at what his record actually shows.

Last year he prepared cuts in vocational education funding of 32 percent and this year his prepared cut is 40 percent. The President's answer to our educational problems is less money and more prayer.

But for what should our students pray? For job skills? For a degree? For employment following graduation?

Mr. Speaker, excellence in education can only be achieved through a commitment to the funding necessary to obtain good teachers and state-of-the-art equipment.

That is the commitment which we in this Chamber share and which the President's record clearly shows that he lacks.

□ 1240

GRAIN SALES AGREEMENT AND TRADE DEFICIT

(Mr. SKELTON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SKELTON. Mr. Speaker, today's news contains a story indicating that the U.S. trade deficit for the month of May was a record $6.9 billion. This raises the estimated trade deficit for the year to $70 billion. Last week, it was announced that the first round of negotiations on a new long-term agreement on the sale of American grain to the Soviet Union has ended without producing any apparent results. Indeed, the two sides even failed to set a date for the next round of talks.

Mr. Speaker, these two announcements are cause for grave concern. Because of the importance of agricultural exports to our balance of trade, it was especially disappointing that the vital grain sales meeting adjourned without any progress.

If we are going to have a strong and prosperous economy in our Nation, we must regain and retain our share of international agricultural trade. Increased agricultural exports is the best, and really the only, long-term solution to the present financial problem facing American farmers. In addition, these exports benefit the entire economy through job creation and improved balance of payments.

Mr. Speaker, prior to the ill-advised 1980 grain embargo, American farmers held roughly 75 percent of the Soviet grain market. The value of all U.S. agricultural exports had increased for 13 consecutive years. However, the embargo revived the image of the United States as an unreliable trading partner. For 2 consecutive years, the value and volume of our agricultural exports has dropped. Our share of the Soviet market has fallen to 20 percent. Although the present administration lifted the embargo in 1981, it was slow to enter negotiations for a new long-term grain agreement. In the meantime, the Soviet Union, the world's largest importer of grain, has developed new sources, chiefly Argentina, Canada, and Western Europe. These nations rushed to fill the breech created when we restricted our sales, and now they, not we, supply most of the Soviet Union's grain import needs.

Mr. Speaker, as a result of these new suppliers, and an expected better-than-normal harvest this year, the Soviets today are dealing with us from a position of strength. They will no doubt drive a hard bargain and attempt to use these grain negotiations as means to gain political leverage. Though it will not be easy for us to recapture our previous share of this market, we must nevertheless keep trying. I urge our negotiating team to resume talks with the Soviets at the earliest possible date, and to conclude a meaningful agreement.

COVERUP OF LEGISLATIVE MISCONDUCT ALLEGED

(Mr. WALKER asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. WALKER. Mr. Speaker, by their deeds you shall know them. The same political party that is expressing indignation at revelations that our Nation's political processes may have been compromised in 1980 has just voted almost unanimously to say that a coverup of legislative misconduct is acceptable.

Reading someone else's briefing book is wrong, but doctoring public documents is not nearly so serious? This is arrogance of power at its worst.

Mr. Speaker, this is a sad day for integrity in this House.

GENERAL LEAVE

Mr. FAZIO. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the consideration of the conference report on the bill (H.R. 3135) making appropriations for the legislative branch for the fiscal year ending September 30, 1984, and for other purposes, and that I may include extraneous and tabular material.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

CONFERENCE REPORT ON H.R. 3135, LEGISLATIVE BRANCH APPROPRIATIONS, 1984

Mr. FAZIO. Mr. Speaker, pursuant to the order of the House of Monday last, I call up the conference report on the bill (H.R. 3135) making appropriations for the legislative branch for the fiscal year ending September 30, 1984, and for other purposes, and ask unanimous consent that the statement of the managers be read in lieu of the report.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

The Clerk read the statement.

(For conference report and statement, see proceedings of the House of June 28, 1983.)

Mr. FAZIO (during the reading). Mr. Speaker, I ask unanimous consent that the statement be considered as read.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

Mr. STRATTON. Mr. Speaker, reserving the right to object, I wonder if the gentleman from California (Mr. FAZIO) could advise me whether the amendment offered by the Senator from New York, Mr. D'AMATO, with regard to the restoration of the west front of the Capitol has been included in this conference report?

Senator D'AMATO offered an amendment that would provide for a consulting architect to oversee the restoration project, because the Architect of the Capitol, Mr. White, is to say the least, somewhat less than enthusiastic about restoration. Designating him to be the head of the restoration project would be a little bit like putting the fox in charge of the chicken coop.

Mr. FAZIO. Mr. Speaker, will the gentleman yield?

Mr. STRATTON. I am interested in knowing if the gentleman could respond to that question, and I yield to him for that purpose.

Mr. FAZIO. Mr. Speaker, I would be happy to respond.

As the gentleman knows, the item in question, the restoration of the west front of the Capitol, is part of the supplemental appropriation bill and not part of the 1984 appropriation bill for the legislative branch. It is true that Senator D'AMATO did include language in this bill as well as the supplemental

appropriations, but in conference yesterday he readily agreed to withhold on that language and to have that issue resolved in the supplemental. He did that voluntarily. I think he did it appropriately, given the fact that we actually do make the appropriation for the restoration in that bill, H.R. 3069, the fiscal year 1983 supplemental.

So I would say that it is not included in this bill, and it should not have been. It is not included, with the acquiescence of Senator D'AMATO. I made clear to him in our conference discussion that there will be no attempt to refight the issue of extension versus restoration at any point in the process. We are all dedicated to restoration, and we will consider Senator D'AMATO's suggestion on the merits at the time the conference meets on the supplemental.

Mr. STRATTON. Mr. Speaker, I thank the gentleman for his explanation, and I do hope that when the supplemental conference report comes up, the gentleman from California will accept the wording of the D'Amato amendment, because that would make it perfectly clear that we will have somebody who has not had a long history of opposition to restoration in charge of that process.

Mr. TRAXLER. Mr. Speaker, will the distinguished gentleman yield to me under his reservation of objection?

Mr. STRATTON. I yield to the gentleman from Michigan.

Mr. TRAXLER. Mr. Speaker, as a member of the conference committee on the conference report that is before us, although I will not be a member of the conference committee on the supplemental, I feel constrained to say that the Architect of the Capitol is a very fine gentleman who is technically extremely competent and who is dedicated to fulfilling the desires and the wishes of the Congress. The Congress has spoken on the west front, and as far as the Architect of the Capitol is concerned, the issue is resolved, and I am confident that he will proceed with all haste to accommodate the decisions that were reached by this body and by the Senate.

Mr. STRATTON. Mr. Speaker, I appreciate the gentleman's statement, and I trust that his prediction will be borne out.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California to dispense with further reading of the statement?

Mr. MYERS. Mr. Speaker, reserving the right to object, I had not intended to speak, but for the purposes of the colloquy here, let me ask this: When we look at the number of people the Architect has in his office, do we need one more to honcho this job? I quite agree with the thrust of this, that in the next bill, the supplemental, that a supervisor over the west front construction be considered, but can we not just have the Architect delegate one of his present architects that he has in his office to supervise this? Why do we always have to hire one more person to do these jobs?

Mr. STRATTON. Mr. Speaker, will the gentleman yield?

Mr. MYERS. I yield to the gentleman from New York.

Mr. STRATTON. Mr. Speaker, let me ask, is that one of the 1,200 employees of the Architect who occupy so much of the space in the Capitol, that the gentleman is referring to?

Mr. MYERS. I do not know exactly how many there are, but I am sure, with the number of employees the Architect has—and I respect the Architect and think he does a good job—surely someone can be delegated from the existing staff to supervise this construction. I quite agree that it is probably necessary, but why must we hire one more person and go to that added expense to the taxpayers?

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

The SPEAKER pro tempore. The gentleman from California (Mr. FAZIO) will be recognized for 30 minutes, and the gentleman from California (Mr. LEWIS) will be recognized for 30 minutes.

The Chair recognizes the gentleman from California (Mr. FAZIO).

Mr. FAZIO. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the conferees on H.R. 3135, the Legislative Branch Appropriation Act, 1984, have reached an agreement which provides appropriations totaling $1,473,359,000 for fiscal year 1984. This amount is $137,661,337 above the fiscal year 1983 level enacted to date and $22,119,200 below the budget estimates. The conference agreement is $264,961,250 above the amount in the bill as it passed the House; however, it includes $262,588,000 for Senate items not considered by the House. Traditionally, the Senate housekeeping items are left for decision and insertion by the other body and similarly the Senate does not act on our items.

If the items approved by the House in the fiscal year 1983 supplemental, H.R. 3069, and the supplemental items for the operations of the Senate are included, this conference agreement is only $6,390,737 over the fiscal year 1983 level. That is virtually a zero increase—only four-tenths of 1 percent—for fiscal year 1984 over the 1983 level.

Mr. Speaker, under leave I have already obtained, I will include a comparative tabulation of the conference action at this point in the RECORD.

COMPARATIVE STATEMENT OF NEW BUDGET (OBLIGATIONAL) AUTHORITY—LEGISLATIVE BILL (H.R. 3135)

	Fiscal year 1983 enacted	Fiscal year 1984 estimates	House	Senate	Conference	Conference compared with fiscal year 1984 estimates
TITLE I— CONGRESSIONAL OPERATIONS

I will not attempt to speak to each of the items we considered in conference. There were a total of 22 amendments, 2 of which related solely to Senate housekeeping items. The remainder are explained fully in the statement accompanying the conference report.

I do wish to point out that this is a responsible conference agreement and another example of the willingness on the part of the legislative branch to control its own spending. We are maintaining a level budget compared to last year. We have checked and found that since fiscal year 1979, the legislative branch budget has grown at only 5.85 percent annually, while the entire Federal budget has grown at 10.78 percent annually—almost double the rate of increase of the legislative branch. We can be proud of these efforts, Mr. Speaker, and proud of the example in fiscal responsibility being set by the Congress and its support agencies.

Mr. Speaker, this is a good conference report. I urge its adoption.

□ 1250

Mr. LEWIS of California. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise to share with the Members the difficulty that accompanies the responsibility for carrying this bill, which is the legislative appropriations bill, which includes that funding which allows the House of Representatives and the U.S. Senate to operate.

It is difficult because ofttimes, it is the funding for the legislative branch that people love to criticize. It is great sport to take shots at the way we fund our own efforts here in the House.

Mr. Speaker, having said that, I would like to take just a moment to express my deep appreciation and my respect for the work of my colleague, the gentleman from California (Mr. FAZIO), the chairman of this subcommittee. He has carried the load for the House and on more than one occasion has been willing to take the point, the heat, if you will, that sometimes surrounds this bill.

As the chairman has suggested in his remarks, this bill is a very conservative bill. As the conference report comes forth, the bill is essentially as it left the House, with the exception of two minor adjustments. Within the budget of the Congressional Research Service, there was an increase of approximately a million dollars, which involved in part additional employees for the support of their work. The report also includes an adjustment upward of $720,000 for OTA.

Mr. Speaker, I urge positive consideration of this conference report.

Mr. FAZIO. Mr. Speaker, will the gentleman yield?

Mr. LEWIS of California. I am happy to yield to my chairman.

Mr. FAZIO. Mr. Speaker, first of all, I would like to express my personal appreciation for the gentleman's accolades. I am not sure they are due, but they are certainly appreciated.

I would like for the record to say that I think there are probably few chairmen who have the privilege of working with such a cooperative and effective ranking minority member as I do.

I would like to express my appreciation not only to the gentleman from California, but to the other members of the subcommittee on a bipartisan basis, including the gentleman from Massachusetts (Mr. CONTE), the gentleman from Indiana (Mr. MYERS), the gentleman from Illinois (Mr. PORTER), and others on the other side who have been cooperative and bipartisan in terms of the spirit with which they have addressed the issues that affect this institution. It certainly should not be a partisan measure and it is not a partisan measure in the attitude of the numbers of this subcommittee, and for that I am very grateful.

Mr. LEWIS of California. Mr. Speaker, I appreciate the commendation of the chairman, as well as his remarks.

Mr. Speaker, I yield whatever time he may consume to the gentleman from Massachusetts (Mr. CONTE).

Mr. CONTE. Mr. Speaker, I rise in support of this conference report on the fiscal 1984 legislative branch appropriations bill. I congratulate the chairman of the subcommittee and the ranking minority member and the other members of the subcommittee for the excellent and expeditious handling of this bill.

I had the privilege of placing my good friend, the gentleman from California (Mr. LEWIS) as the ranking member on the legislative appropriations committee this year and I want to publicly state that he has handled this task well. He has done a good job and we are all proud of him. This is no easy task, as is evident in the fact that this is the first legislative branch appropriations bill which will actually be enacted in 5 years. The pitfalls are many, the rewards few, and I believe the subcommittee has done a fine job.

The total amount provided in this conference report is $1,473,359,000, of which $982 million is for the operations of Congress itself and $491 million is for other agencies such as the General Accounting Office and the noncongressional activities of the Library of Congress and the Government Printing Office.

Mr. Speaker, there are probably no expenditures in the Federal budget which receive more attention and more scrutiny in the press and elsewhere than the funding of Congress. That is all right; we can stand the heat, and close scrutiny of any expenditure of Federal funds is advisable and correct.

But let us put this congressional budget in perspective. The fiscal 1984 budget resolution passed by Congress last week predicted Federal spending in the amount of $858 billion. Within that total is less than $1 billion for Congress. In other words, Congress, one of the three equal branches of our Government, accounts for slightly more than one-tenth of 1 percent of the Federal budget.

The Federal judiciary, with a budget of approximately $900 million, accounts for another one-tenth of 1 percent, leaving the executive branch, that sprawling conglomeration downtown and in countless other localities, accounting for 99.99 percent of the Federal budget.

Mr. Speaker, when we get to amendment No. 17 in disagreement, I will raise a point of order against language dealing with the budget of the Congressional Research Service. The language is not germane to the Senate amendment to which it is attached.

The language is clearly subject to the point of order and will be stricken.

I urge your support for the conference report.

Mr. LEWIS of California. Mr. Speaker, I would only like to say that from time to time I have had the occasion to question the privilege that the ranking member has given me. Having done that, on the other hand I appreciate very much the support of the gentleman from Massachusetts (Mr. CONTE).

● Mr. FRENZEL. Mr. Speaker, much has been made of the fact that this appropriation represents a modest increase for the legislature.

Compared to other appropriations, funding for the Congress has had smaller increases. What is wrong with the bill is that it would be too high if it were cut by 10 percent.

The base of legislative spending is too high. Our committee staffs are enormous, idle part of the year, and overactive at other times.

In the House alone, we spend hundreds of thousands of dollars each year just for new carpets. Our franking costs to mail unrequested correspondence to constituents are outrageous.

This bill may look all right compared to last year. Compared to commonsense, it is grossly excessive.

It ought to be defeated.●

Mr. LEWIS of California. Mr. Speaker, I have no additional requests for time, and I yield back the balance of my time.

Mr. FAZIO. Mr. Speaker, I yield back the balance of my time, and I move the previous question on the conference report.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the conference report.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. FRENZEL. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 241, nays 175, not voting 17, as follows:

The Clerk announced the following pairs:

On this vote:

Mr. Ford of Michigan for, with Mr. Robert F. Smith against.

Mr. Heftel of Hawaii for, with Mr. McCandless against.

Messrs. RICHARDSON, GUNDERSON, and MRAZEK, and Ms. KAPTUR changed their votes from "yea" to "nay."

Mr. GORE changed his vote from "nay" to "yea."

So the conference report was agreed to.

The result of the vote was announced as above recorded.

AMENDMENTS IN DISAGREEMENT

The SPEAKER pro tempore. The Clerk will report the first amendment in disagreement.

Mr. FAZIO. Mr. Speaker, I ask unanimous consent that the Clerk designate Senate amendments reported in disagreement in lieu of reporting such amendments.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

The SPEAKER pro tempore. The Clerk will designate the first amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 1: Page 1, after line 7, insert:

SENATE

MILEAGE OF THE VICE PRESIDENT AND SENATORS AND EXPENSE ALLOWANCES OF THE VICE PRESIDENT, THE PRESIDENT PRO TEMPORE, MAJORITY AND MINORITY LEADERS, AND MAJORITY AND MINORITY WHIPS

MILEAGE OF THE VICE PRESIDENT AND SENATORS

For mileage of the Vice President and Senators of the United States, $60,000.

EXPENSE ALLOWANCES OF THE VICE PRESIDENT, THE PRESIDENT PRO TEMPORE, MAJORITY AND MINORITY LEADERS, AND MAJORITY AND MINORITY WHIPS

For expense allowances of the Vice President, $10,000; the President Pro Tempore of the Senate, $10,000; Majority Leader of the Senate, $10,000; Minority Leader of the Senate, $10,000; Majority Whip of the Senate, $5,000; and Minority Whip of the Senate, $5,000; in all, $50,000.

SALARIES, OFFICERS AND EMPLOYEES

For compensation of officers, employees, clerks to Senators, and others as authorized by law, including agency contributions and longevity compensation as authorized, which shall be paid from this appropriation without regard to the below limitations, as follows:

OFFICE OF THE VICE PRESIDENT

For the Office of the Vice President, $1,031,000.

OFFICE OF THE PRESIDENT PRO TEMPORE

For Office of the President Pro Tempore, $139,000.

OFFICES OF THE MAJORITY AND MINORITY LEADERS

For Offices of the Majority and Minority Leaders, $881,000.

OFFICES OF THE MAJORITY AND MINORITY WHIPS

For Offices of the Majority and Minority Whips, $291,000.

CONFERENCE COMMITTEES

For the Conference of the Majority and the Conference of the Minority, at rates of compensation to be fixed by the Chairman of each such committee, $506,000 for each such committee; in all, $1,012,000.

OFFICES OF THE SECRETARIES OF THE CONFERENCE OF THE MAJORITY AND THE CONFERENCE OF THE MINORITY

For Offices of the Secretaries of the Conference of the Majority and the Conference of the Minority, $156,000.

OFFICE OF THE CHAPLAIN

For Office of the Chaplain, $83,000.

OFFICE OF THE SECRETARY

For Office of the Secretary, $6,602,000.

ADMINISTRATIVE, CLERICAL, AND LEGISLATIVE ASSISTANCE TO SENATORS

For administrative, clerical, and legislative assistance to Senators, $94,900,000.

OFFICE OF THE SERGEANT AT ARMS AND DOORKEEPER

For Office of the Sergeant at Arms and Doorkeeper, $32,123,000.

OFFICES OF THE SECRETARIES FOR THE MAJORITY AND MINORITY

For Offices of the Secretary for the Majority and the Secretary for the Minority, $775,000.

AGENCY CONTRIBUTIONS

For agency contributions for employee benefits, as authorized by law, $15,354,000.

OFFICE OF THE LEGISLATIVE COUNSEL OF THE SENATE

For salaries and expenses of the Office of the Legislative Counsel of the Senate, $1,280,000.

OFFICE OF SENATE LEGAL COUNSEL

For salaries and expenses of the Office of Senate Legal Counsel, $545,000.

EXPENSE ALLOWANCES OF THE SECRETARY OF THE SENATE, SERGEANT AT ARMS AND DOORKEEPER OF THE SENATE, AND SECRETARIES FOR THE MAJORITY AND MINORITY OF THE SENATE

For expense allowances of the Secretary of the Senate, $3,000; Sergeant at Arms and Doorkeeper of the Senate, $3,000; Secretary for the Majority of the Senate, $3,000; Secretary for the Minority of the Senate, $3,000; in all, $12,000.

CONTINGENT EXPENSES OF THE SENATE

SENATE POLICY COMMITTEES

For salaries and expenses of the Majority Policy Committee and the Minority Policy Committee, $856,000 for each such committee; in all, $1,712,000.

INQUIRIES AND INVESTIGATIONS

For expenses of inquiries and investigations ordered by the Senate, or conducted pursuant to section 134(a) of Public Law 601, Seventy-ninth Congress, as amended, section 112 of Public Law 96-304 and Senate Resolution 281, agreed to March 11, 1980, $45,698,000.

SECRETARY OF THE SENATE

For expenses of the Office of the Secretary of the Senate, $390,000.

SERGEANT AT ARMS AND DOORKEEPER OF THE SENATE

For expenses of the Office of the Sergeant at Arms and Doorkeeper of the Senate, $32,869,000.

MISCELLANEOUS ITEMS

For miscellaneous items, $9,174,000.

STATIONERY (REVOLVING FUND)

For stationery for the President of the Senate, $4,500, for officers of the Senate and the Conference of the Majority and the Conference of the Minority of the Senate, $34,500; in all, $39,000.

ADMINISTRATIVE PROVISIONS

SEC. 101. (a) Effective October 1, 1983, there is established within the Offices of the Majority and Minority Leaders the positions of Assistant to the Majority Leader for Floor Operations and Assistant to the Minority Leader for Floor Operations, respectively. Individuals appointed to such positions by the Majority Leader and Minority Leader, respectively, shall receive compensa-

tion at a rate fixed by the appropriate Leader not to exceed the maximum annual rate of gross compensation of the Assistant Secretary of the Senate.

(b) Effective October 1, 1983, the positions of Assistant to the Minority Leader for Floor Operations and Assistant to the Minority Leader for Floor Operations established by the Supplemental Appropriations Act, 1977 (2 U.S.C. 61h-5), are abolished.

SEC. 102. (a) Section 506(e) of the Supplemental Appropriations Act, 1973 (2 U.S.C. 58(e)) is amended—

(1) in the first sentence thereof, by inserting ", essential travel-related expenses (as defined hereafter in this subsection)," immediately after "actual transportation expenses"; and

(2) by inserting immediately after the third sentence thereof, the following new sentence: "As used in this subsection, the term 'essential travel-related expenses' means travel expenses (other than transportation expenses) which are essential to the transaction of official business while the Senator or employee is away from his official station or post of duty.".

SEC. 103. (a) Effective October 1, 1983—

(1) there shall be, within the contingent fund of the Senate, a separate account for the "Secretary of the Senate", and a separate account for the "Sergeant at Arms and Doorkeeper of the Senate";

(2) the account for "Automobiles and Maintenance", within the contingent fund of the Senate, is abolished, and funds for the purchase, lease, exchange, maintenance, and operation of vehicles for the Senate shall be included in the separate account, established by paragraph (1), for the "Sergeant at Arms and Doorkeeper of the Senate"; and

(3) the account for "Postage Stamps", within the contingent fund of the Senate, is abolished, and funds for special delivery postage of the Office of the Secretary of the Senate shall be included in the separate account, established by paragraph (1) for the "Secretary of the Senate"; funds for special delivery postage of the Sergeant at Arms and Doorkeeper of the Senate shall be included in the separate account, established by paragraph (1), for the "Sergeant at Arms and Doorkeeper of the Senate"; and postage stamps for the Secretaries for the Majority and the Minority and other offices and officers of the Senate, as authorized by law, shall be included in the account for "Miscellaneous Items", within the contingent fund of the Senate.

(b) Any provision of law which was enacted, or any Senate resolution which was agreed to, prior to October 1, 1983, and which authorizes moneys in the contingent fund of the Senate to be expended by or for the use of the Secretary of the Senate, or his office (whether generally or from a specified account within such fund) may on and after October 1, 1983, be construed to authorize such moneys to be expended from the separate account, within such fund, established by subsection (a)(1) for the "Secretary of the Senate"; and any provision of law which was enacted prior to October 1, 1983, and which authorizes moneys in the contingent fund of the Senate to be expended by or for the use of the Sergeant at Arms and Doorkeeper of the Senate, or his office (whether generally or from a specified account within such fund) may on and after October 1, 1983, be construed to authorize such moneys to be expended from the separate account, within such fund, established by subsection (a)(1) for the "Sergeant at Arms and Doorkeeper of the Senate".

SEC. 104. From funds available for any fiscal year (commencing with the fiscal year ending September 30, 1984), the Secretary of the Senate shall advance to the Sergeant at Arms and Doorkeeper of the Senate for the purpose of defraying office expenses such sums (for which the Sergeant at Arms and Doorkeeper shall be accountable) not in excess of $1,000 at any one time, as such Sergeant at Arms shall from time to time request; except that the aggregate of the sums so advanced during the fiscal year shall not exceed $10,000.

In accordance with the provisions of this section, a detailed voucher shall be submitted to the Secretary of the Senate by such Sergeant at Arms whenever necessary, in order to replenish funds expended.

SEC. 105. With the approval of the President Pro Tempore of the Senate, the Legislative Counsel of the Senate may make such expenditures as may be necessary or appropriate for the functioning of the Office of the Legislative Counsel of the Senate.

SEC. 106. Funds expended by the Legislative Counsel of the Senate or the Senate Legal Counsel for travel and related expenses shall be subject to the same regulations and limitations (insofar as they are applicable) as those which the Senate Committee on Rules and Administration prescribes for application to travel and related expenses for which payment is authorized to be made from the contingent fund of the Senate.

SEC. 107. (a) Section 506(a) of the Supplemental Appropriations Act, 1973 (2 U.S.C. 58(a)) is amended—

(1) in clause (8), by striking out "and" at the end thereof,

(2) in clause (9), (A) by striking out "ten percent" and inserting in lieu thereof "twenty percent", and (B) by striking out the period at the end thereof and inserting in lieu of such period "; and", and

(3) by inserting after and below clause (9) the following new clause:

"(10) reimbursement to each Senator for expenses for the procurement (with the prior consent of the Senate Committee on Rules and Administration) of computer equipment and computer and related servics, under contracts with the providers thereof acting as independent contractors.".

(b) The amendment made by subsection (a)(2)(A) shall be effective in the case of calendar years beginning on or after January 1, 1983, and the provisions of clause (10) of section 506(a) of the Supplemental Appropriations Act, 1973 (as added by subsection (a)(3) of this seciton), shall be effective with respect to expenses incurred after the date of enactment of this Act.

MOTION OFFERED BY MR. FAZIO

Mr. FAZIO. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. FAZIO moves that the House recede from its disagreement to the amendment of the Senate numbered 1 and concur therein with an amendment, as follows: In lieu of the matter inserted by said amendment, insert the following:

SENATE

MILEAGE OF THE VICE PRESIDENT AND SENATORS AND EXPENSE ALLOWANCES OF THE VICE PRESIDENT, THE PRESIDENT PRO TEMPORE, MAJORITY AND MINORITY LEADERS, AND MAJORITY AND MINORITY WHIPS

MILEAGE OF THE VICE PRESIDENT AND SENATORS

For mileage of the Vice President and Senators of the United States, $60,000.

EXPENSE ALLOWANCES OF THE VICE PRESIDENT, THE PRESIDENT PRO TEMPORE, MAJORITY AND MINORITY LEADERS, AND MAJORITY AND MINORITY WHIPS

For expense allowances of the Vice President, $10,000; the President Pro Tempore of the Senate, $10,000; Majority Leader of the Senate, $10,000; Minority Leader of the Senate, $10,000; Majority Whip of the Senate, $5,000; and Minority Whip of the Senate, $5,000; in all, $50,000.

SALARIES, OFFICERS AND EMPLOYEES

For compensation of officers, employees, clerks to Senators, and others as authorized by law, including agency contributions and longevity compensation as authorized, which shall be paid from this appropriation without regard to the below limitations, as follows:

OFFICE OF THE VICE PRESIDENT

For the Office of the Vice President, $1,031,000.

OFFICE OF THE PRESIDENT PRO TEMPORE

For Office of the President Pro Tempore, $139,000.

OFFICES OF THE MAJORITY AND MINORITY LEADERS

For Offices of the Majority and Minority Leaders, $881,000.

OFFICES OF THE MAJORITY AND MINORITY WHIPS

For Offices of the Majority and Minority Whips, $291,000.

CONFERENCE COMMITTEES

For the Conference of the Majority and the Conference of the Minority, at rates of compensation to be fixed by the Chairman of each such committee, $506,000 for each such committee; in all, $1,012,000.

OFFICES OF THE SECRETARIES OF THE CONFERENCE OF THE MAJORITY AND THE CONFERENCE OF THE MINORITY

For Offices of the Secretaries of the Conference of the Majority and the Conference of the Minority, $156,000.

OFFICE OF THE CHAPLAIN

For Office of the Chaplain, $83,000.

OFFICE OF THE SECRETARY

For Office of the Secretary, $6,602,000.

ADMINISTRATIVE, CLERICAL, AND LEGISLATIVE ASSISTANCE TO SENATORS

For administrative, clerical, and legislative assistance to Senators, $94,900,000.

OFFICE OF THE SERGEANT AT ARMS AND DOORKEEPER

For Office of the Sergeant at Arms and Doorkeeper, $32,123,000.

OFFICES OF THE SECRETARIES FOR THE MAJORITY AND MINORITY

For Offices of the Secretary for the Majority and the Secretary for the Minority, $775,000.

AGENCY CONTRIBUTIONS

For agency contributions for employee benefits, as authorized by law, $15,354,000.

OFFICE OF THE LEGISLATIVE COUNSEL OF THE SENATE

For salaries and expenses of the Office of the Legislative Counsel of the Senate, $1,280,000.

OFFICE OF SENATE LEGAL COUNSEL

For salaries and expenses of the Office of Senate Legal Counsel, $545,000.

EXPENSE ALLOWANCES OF THE SECRETARY OF THE SENATE, SERGEANT AT ARMS AND DOORKEEPER OF THE SENATE, AND SECRETARIES FOR THE MAJORITY AND MINORITY OF THE SENATE

For expense allowances of the Secretary of the Senate, $3,000; Sergeant at Arms and Doorkeeper of the Senate, $3,000; Secretary for the Majority of the Senate, $3,000; Secretary for the Minority of the Senate, $3,000; in all $12,000.

CONTINGENT EXPENSES OF THE SENATE

SENATE POLICY COMMITTEES

For salaries and expenses of the Majority Policy Committee and the Minority Policy Committee, $856,000 for each such committee; in all, $1,712,000.

INQUIRIES AND INVESTIGATIONS

For expenses of inquiries and investigations ordered by the Senate, or conducted pursuant to section 134(a) of Public Law 601, Seventy-ninth Congress, as amended, section 112 of Public Law 96-304 and Senate Resolution 281, agreed to March 11, 1980, $45,698,000.

SECRETARY OF THE SENATE

For expenses of the Office of the Secretary of the Senate, $390,000.

SERGEANT AT ARMS AND DOORKEEPER OF THE SENATE

For expenses of the Office of the Sergeant at Arms and Doorkeeper of the Senate, $32,869,000.

MISCELLANEOUS ITEMS

For miscellaneous items, $9,174,000.

STATIONERY (REVOLVING FUND)

For stationery for the President of the Senate, $4,500, for officers of the Senate and the Conference of the Majority and the Conference of the Minority of the Senate, $34,500; in all, $39,000.

ADMINISTRATIVE PROVISIONS

SEC. 101. (a) Effective October 1, 1983, there is established within the Offices of the Majority and Minority Leaders the positions of Assistant to the Majority Leader for Floor Operations and Assistant to the Minority Leader for Floor Operations, respectively. Individuals appointed to such positions by the Majority Leader and Minority Leader, respectively, shall receive compensation at a rate fixed by the appropriate Leader not to exceed the maximum annual rate of gross compensation of the Assistant Secretary of the Senate.

(b) Effective October 1, 1983, the positions of Assistant to the Majority Leader for Floor Operations and Assistant to the Minority Leader for Floor Operations established by the Supplemental Appropriations Act, 1977 (2 U.S.C. 61h-5), are abolished.

SEC. 102. (a) Section 506(e) of the Supplemental Appropriations Act, 1973 (2 U.S.C. 58(e)) is amended—

(1) in the first sentence thereof, by inserting, ", essential travel-related expenses (as defined hereafter in this subsection)," immediately after "actual transportation expenses"; and

(2) by inserting immediately after the third sentence thereof, the following new sentence: "As used in this subsection, the term 'essential travel-related expenses' means travel expenses (other than transportation expenses) which are essential to the transaction of official business while the Senator or employee is away from his official station or post of duty.".

SEC. 103. (a) Effective October 1, 1983—

(1) there shall be, within the contingent fund of the Senate, a separate account for the "Secretary of the Senate", and a separate account for the "Sergeant at Arms and Doorkeeper of the Senate";

(2) the account for "Automobiles and Maintenance", within the contingent fund of the Senate, is abolished, and funds for the purchase, lease, exchange, maintenance, and operation of vehicles for the Senate shall be included in the separate account, established by paragraph (1), for the "Sergeant at Arms and Doorkeeper of the Senate"; and

(3) the account for "Postage Stamps", within the contingent fund of the Senate, is abolished; and funds for special delivery postage of the Office of the Secretary of the Senate shall be included in the separate account, established by paragraph (1), for the "Secretary of the Senate"; funds for special delivery postage of the Sergeant at Arms and Doorkeeper of the Senate shall be included in the separate account, established by paragraph (1), for the "Sergeant at Arms and Doorkeeper of the Senate"; and postage stamps for the Secretaries for the Majority and the Minority and other offices and officers of the Senate, as authorized by law, shall be included in the account for "Miscellaneous Items", within the contingent fund of the Senate.

(b) Any provision of law which was enacted, or any Senate resolution which was agreed to, prior to October 1, 1983, and which authorizes moneys in the contingent fund of the Senate to be expended by or for the use of the Secretary of the Senate, or his office (whether generally or from a specified account within such fund) may on and after October 1, 1983, be construed to authorize such moneys to be expended from the separate account, within such fund, established by subsection (a)(1) for the "Secretary of the Senate"; and any provision of law which was enacted prior to October 1, 1983, and which authorizes moneys in the contingent fund of the Senate to be expended by or for the use of the Sergeant at Arms and Doorkeeper of the Senate, or his office (whether generally or from a specified account within such fund) may on and after October 1, 1983, be construed to authorize such moneys to be expended from the separate account, within such fund, established by subsection (a)(1) for the "Sergeant at Arms and Doorkeeper of the Senate".

SEC. 104. From funds available for any fiscal year (commencing with the fiscal year ending September 30, 1984), the Secretary of the Senate shall advance to the Sergeant at Arms and Doorkeeper of the Senate for the purpose of defraying office expenses such sums (for which the Sergeant at Arms and Doorkeeper shall be accountable) not in excess of $1,000 at any one time, as such Sergeant at Arms shall from time to time request; except that the aggregate of the sums so advanced during the fiscal year shall not exceed $10,000.

In accordance with the provisions of this section, a detailed voucher shall be submitted to the Secretary of the Senate by such Sergeant at Arms whenever necessary, in order to replenish funds expended.

SEC. 105. With the approval of the President Pro Tempore of the Senate, the Legislative Counsel of the Senate may make such expenditures as may be necessary or appropriate for the functioning of the Office of the Legislative Counsel of the Senate.

SEC. 106. Funds expended by the Legislative Counsel of the Senate or the Senate Legal Counsel for travel and related expenses shall be subject to the same regulations and limitations (insofar as they are applicable) as those which the Senate Committee on Rules and Administration prescribes for application to travel and related expenses for which payment is authorized to be made from the contingent fund of the Senate.

Mr. FAZIO (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 2: Page 1, after line 7, insert:

"SEC. 108. Subsections (a) and (b) of section 106 of the Legislative Branch Appropriations Act, 1963 (2 U.S.C. 60j) are repealed, effective October 1, 1983; except that, any individual who on such date is entitled to longevity compensation under such subsections on the basis of service performed prior to such date shall continue to be entitled to such compensation, but no individual shall accrue any longevity compensation on the basis of service after such date.".

MOTION OFFERED BY MR. FAZIO

Mr. FAZIO. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. FAZIO moves that the House recede from its disagreement to the amendment of the Senate numbered 2 and concur therein with an amendment, as follows: In lieu of the matter inserted by said amendment, insert the following:

"SEC. 107. Subsections (a) and (b) of section 106 of the Legislative Branch Appropriation Act, 1963 (2 U.S.C. 60j) on or after October 1, 1983 shall not apply to any individual whose pay is disbursed by the Secretary of the Senate; except that, any individual who prior to such date was entitled to longevity compensation under such subsections on the basis of service performed prior to such date shall continue to be entitled to such compensation, but no individual shall accrue any longevity compensation on the basis of service performed on or after such date.".

Mr. FAZIO (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 11: Page 14, line 19, after "vehicle" insert ", hereafter to be used exclusively for official purposes".

MOTION OFFERED BY MR. FAZIO

Mr. FAZIO. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. FAZIO moves that the House recede from its disagreement to the amendment of the Senate numbered 11, and concur therein.

Mr. FAZIO (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 12: Page 14, line 19, after "vehicle" insert "; security installations authorized by House Concurrent Resolution 550, Ninety-second Congress, agreed to September 19, 1972, the cost limitation of which is hereby further increased by $167,000".

MOTION OFFERED BY MR. FAZIO

Mr. FAZIO. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. FAZIO moves that the House recede from its disagreement to the amendment of the Senate numbered 12, and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 15: Page 15, after line 5, insert:

SENATE OFFICE BUILDINGS

For all necessary expenses for mainteance, care and operation of the Senate Office Buildings; and furniture and furnishings, to be expended under the control and supervision of the Architect of the Capitol, $17,412,000, of which $1,496,000 shall remain available until expended.

MOTION OFFERED BY MR. FAZIO

Mr. FAZIO. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. FAZIO moves that the House recede from its disagreemtnt to the amendment of the Senate numbered 15, and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the last amendment in disagreement.

The amendment reads as follows:

Senate amendment number 17: Page 16, line 15, strike out "$35,543,550" and insert "$37,700,000".

MOTION OFFERED BY MR. FAZIO

Mr. FAZIO. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. FAZIO moves that the House recede from its disagreement to the amendment of the Senate numbered 17 and concur therein with an amendment, as follows: In lieu of the matter stricken and inserted by said amendment, insert the following: "$36,620,000 to carry out the provisions of section 203 of the Legislative Reorganization Act of 1946, as amended (2 U.S.C. 166), and section 203(g) of such act is amended, effective hereafter, to read as follows:

"(g) The Director of the Congressional Research Service will submit to the Librarian of Congress for review, consideration, evaluation, and approval, the budget estimates of the Congressional Research Service for inclusion in the Budget of the United States Government.".

Mr. FAZIO (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. CONTE. Mr. Speaker, I reserve a point of order.

The SPEAKER pro tempore. The gentleman from Massachusetts makes a point of order.

The gentleman from Massachusetts (Mr. CONTE) will state his point of order.

Mr. CONTE. Mr. Speaker, do I have to state it now? May I reserve and just yield to the gentleman from California (Mr. FAZIO) for a few minutes?

The SPEAKER pro tempore. The Chair will permit the gentleman from California (Mr. FAZIO) to debate his motion briefly while the point of order is reserved.

Mr. FAZIO. I thank the Speaker and I appreciate the gentleman yielding to me.

This amendment in disagreement, relates to the Library of Congress and to the Congressional Research Service which is an integral part of the Library but which serves the committees and Members of the House and the Senate.

The conferees have added language which requires the CRS budget to be submitted through the Library for review, consideration, evaluation, and approval.

This language would be added to the Legislative Reorganization Act of 1946.

The situation now is that the CRS budget is submitted to the Congress without review through the Library of Congress.

□ 1320

Every other component of the Library: The Copyright Office, the books for the blind and handicapped program, the Folk Life Center, the Law Library, the basic book collection program, all go through a budget review to screen out duplication of effort and to promote efficiency within the Library.

The CRS escapes that review and this independent budget authority is costing the taxpayers millions of dollars a year.

The CRS has duplicative personnel specialists, they have duplicative travel and training specialists, they have duplicative legal counsel, data processing, public affairs, and so forth. There are at least 60 jobs which CRS and the Library should review for possible duplication.

If the entire Library budget is coordinated as a whole, we believe that annual savings of $2 or $3 million may result and with absolutely no negative effects in the ability of CRS to serve the Members of this body or the Congress in general.

One more important point I would like to make. We have not changed CRS administrative independence with this language, that is guaranteed by the Reorganization Act itself. We have not abridged their organizational or reorganizational independence, that is still guaranteed by the Legislative Reorganization Act. And we have not changed their ability to hire consultants or other experts, that is also guaranteed by the act.

We are simply asking in this amendment to create some fiscal discipline and save some tax dollars.

The SPEAKER pro tempore. The Chair recognizes the gentleman from California (Mr. LEWIS).

Mr. LEWIS of California. Mr. Speaker, I do not intend to take a great deal of time of the House, but I would like to comment on the work of the conference committee and commend the members for the very detailed and careful attention they pay to the work of this committee.

I have been more than impressed with the careful attention the House pays to such detail in the process. It is amazing that one could have communicated to so many Members a detail such as this amendment.

I have worked with the chairman of the subcommittee, not just on this subcommittee but for many years in public affairs. I know of his professional commitment to the kind of support that an adequate legislative body must have. We both have expressed our strong support for the work of the Congressional Research Service.

The interesting point here, Mr. Speaker, is that apparently a few Members actually do believe that this agency should be treated different than others. In this case we have a budget, admittedly a relatively small budget, which some suggest should not be subject to independent review. Indeed, the affiliate relationship of CRS with the Library of Congress makes it obvious that we would want to take every step to make certain that there is not duplication of services on the part of the several services involved here.

I think the House will want to look very carefully at why this agency seeks this kind of extended independence.

The SPEAKER pro tempore. Does the gentleman from Massachusetts (Mr. CONTE) insist on his point of order?

Mr. CONTE. I do, Mr. Speaker.

The SPEAKER pro tempore. The Chair recognizes the gentleman from Massachusetts.

Mr. CONTE. Mr. Speaker, I make the point of order that the amendment embodied in the motion offered by the distinguished gentleman from California is not germane to the Senate amendment presently under consideration, and therefore that the gentleman's motion is in violation of clause 7 of rule XVI.

The gentleman's amendment has the effect of amending the Legislative Reorganization Act of 1970, and, for this reason, goes far beyond the scope of the Senate amendment and introduces a completely new subject. The amendment clearly is not germane.

It is equally clear, Mr. Speaker, that the germaneness test is applicable in the present parliamentary circumstances. In chapter 28, the most recent edition of Procedures in the House, it is stated in section 21 that:

Where a motion is offered to concur in a Senate amendment with an amendment, the proposed amendment must be germane to the Senate amendment. The rule of germaneness also applies to motions to recede and concur in a Senate amendment with an amendment.

Moreover, in the same section:

When considering a Senate amendment reported in disagreement by conferees, a proposal to amend must be germane to the Senate amendment.

Mr. Speaker, the germaneness test clearly applies and the amendment clearly is not germane. I ask that my point of order be sustained.

The SPEAKER pro tempore. The Chair recognizes the gentleman from Tennessee (Mr. GORE).

Mr. GORE. Mr. Speaker, I wish to be recognized on the point of order.

Mr. Speaker, I will speak only very briefly in support of the gentleman's point of order. I believe it is correct without any question. And I would like to express my support for the motivations of the gentleman in raising the point of order; namely, the Congressional Research Service—it is difficult to overstate the contribution that it makes to the deliberations of this body. I simply wanted to speak in favor of the gentleman's point of order.

The SPEAKER pro tempore. The Chair recognizes the gentleman from California (Mr. FAZIO).

Mr. FAZIO. Mr. Speaker, I must say I do not concede the point; I do concede the point of order.

The SPEAKER pro tempore. The point of order is conceded and sustained.

MOTION OFFERED BY MR. FAZIO

Mr. FAZIO. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. FAZIO moves that the House recede from its disagreement to the amendment of the Senate numbered 17 and concur therein with an amendment, as follows: In lieu of the sum stricken and proposed by said amendment, insert "$36,620,000".

The motion was agreed to.

A motion to reconsider the votes by which action was taken on the conference report and the several motions was laid on the table.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 3133) entitled "An act making appropriations for the Department of Housing and Urban Development, and for sundry independent agencies, boards, commissions, corporations, and offices for the fiscal year ending September 30, 1984, and for other purposes."

The message also announced that the Senate agrees to the amendments of the House to the amendments of the Senate numbered 1, 25, 26, 32, 33, 34, 53, and 59 to the above-entitled bill.

The message also announced that the Senate has passed a bill of the following title, in which the concurrence of the House is requested:

S. 32. An act to amend title 17 of the United States Code with respect to rental, lease, or lending of sound recordings.

The message also announced that the bill from the House (H.R. 1183) entitled "An act to amend the Internal Revenue Code of 1954 to limit to $700 the maximum reduction in individual income tax resulting from the third year of the rate cuts enacted by the Economic Recovery Tax Act of 1981," did fail to pass the Senate.

The message also announced that the Vice President, pursuant to the provisions of sections 276(h)-276(k) of title 22, United States Code, as amended, appointed Mr. MATTINGLY, Mr. RANDOLPH, Mr. BINGAMAN, and Mrs. HAWKINS as members of the Senate delegation to the Mexico-United States Interparliamentary Group during the 1st session of the 98th Congress to be held in Puebla, Mexico, on July 7-10, 1983.

GENERAL LEAVE

Mr. BEVILL. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the conference report on the bill, H.R. 3132, energy and water development appropriations, 1984, as well as on the Senate amendments reported in disagreement, and that I may include extraneous material and tables.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Alabama?

There was no objection.

CONFERENCE REPORT ON H.R. 3132, ENERGY AND WATER DEVELOPMENT APPROPRIATIONS, 1984

Mr. BEVILL. Mr. Speaker, pursuant to the order of the House of June 23, 1983, I call up the conference report on the bill (H.R. 3132), making appropriations for energy and water development for the fiscal year ending September 30, 1984, and for other purposes, and I ask unanimous consent that the statement of the managers be read in lieu of the report.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Alabama?

There was no objection.

The Clerk read the statement.

(For conference report and statement, see proceedings of the House of Tuesday, June 28, 1983.)

Mr. BEVILL (during the reading). Mr. Speaker, I ask unanimous consent that the statement be considered as read.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Alabama?

There was no objection.

The SPEAKER pro tempore. The gentleman from Alabama (Mr. BEVILL) will be recognized for 30 minutes, and the gentleman from Indiana (Mr. MYERS) will be recognized for 30 minutes.

The Chair recognizes the gentleman from Alabama (Mr. BEVILL).

Mr. BEVILL. Mr. Speaker, I am pleased to present the conference report on the fiscal year 1984 energy and water development appropriation bill for your favorable consideration. Our colleagues will recall that debate on this bill occurred in the House on June 6 and 7. The bill was passed by substantial margins in both Houses: 379 to 39 in the House on June 7, and 91 to 6 in the other body on June 22.

Mr. Speaker, our conference committee meeting was held on Tuesday of this week. I wish to compliment our friends from the other body, particularly the Senator from Oregon (Mr. HATFIELD) the chairman of the Senate subcommittee, and the Senator from Louisiana, (Mr. JOHNSTON) the ranking minority member, for the fine spirit of compromise displayed in the conference meeting. I also wish to thank my colleagues, the House conferees, for their support and their valuable contributions during the conference deliberations.

Now I would like to comment on various aspects of the conference agreement.

Mr. Speaker, this bill is certainly not a budget buster. It is a bill that can be signed by the President and is a bill that reflects the priorities of the House and Senate as well as the administration.

Mr. Speaker, the bill passed by the House contained $14,180,003,000 in new budget authority. That was $430,668,000 below the budget request. As the bill passed the Senate, it contained $14,170,853,000.

For the various agencies and programs under the jurisdiction of the Energy and Water Development Subcommittee, the committee of conference recommends $14,307,045,000 in new budget authority. This amount is $303,626,000 less than the budget request.

The conference agreement we present to you today is the culmination of 6 months of effort on the part of the House committee and the same review by the Senate committee. During this period we have heard testimony from hundreds of witnesses—contained in eight hearing volumes of thousands of pages.

The House took 2 days to consider the energy and water development bill on the floor. The Senate had a total of 41 numbered amendments to the bill. But, within those 41 amendments, there were nearly 400 individual items in disagreement. The conference agreement represents the best efforts of the House and Senate conferees to achieve consensus on those 400 items. Many items had to be reduced or changed to accomplish agreement with the Senate. In addition, we had to keep in mind the need to have a bill that was acceptable to the administration.

We think we have achieved an agreement that does all of this while maintaining most of the House position.

The Senate made more changes to the House bill than they had in many years. Your House conferees did their best to maintain the House position. However, to bring back a conference report that is within the budget target for the energy and water development programs, a great many items had to be compromised.

We would like more money for energy, for the weapons program, and for the water projects. But, if we have to stay close to the budget level, we could not provide all of the funds for all of the programs and projects to the extent we would have liked.

Mr. Speaker, I am pleased to advise the House that the conference agreement is under the assumed allocation under the budget resolution.

Mr. Speaker, the conference agreement contains $2,641,386,000 in title I for the Army Corps of Engineers. This is $54,038,000 less than the bill as passed by the House and $49,592,000 more than the Senate-passed bill. These funds will finance 214 water resources projects in the planning or construction phase, including 5 new planning starts.

For title II, the Bureau of Reclamation, the conferees recommend a total of $961,690,000, which is $26,290,000 less than the House-passed bill and $16,700,000 more than the Senate-passed bill.

This will fund 97 water resources projects in the planning or construction phase, including 4 new planning starts.

In my view, the conference agreement provides for a financially prudent and environmentally sound water resources development programs.

The conference agreement contains $10,011,291,000 for Department of Energy programs in title III. This includes $1,951,609,000 for "Energy supply, research and development activities"; $638,250,000 for "General science and research activities"; $378,763,000 for "Power marketing administrations," and $89,582,000 for the Federal Energy Regulatory Commission. The energy accounts include $253,059,000 for solar, geothermal and renewable energy development; $636,647,000 for nuclear energy development; $306,675,000 for the nuclear waste disposal fund; and $470,750,000 for fusion energy development. The conference agreement contains no funds for the Clinch River breeder reactor project pending further review of alternative financial possibilities.

ATOMIC ENERGY DEFENSE ACTIVITIES

The conference agreement provides a total of $6,547,875,000 for atomic energy defense activities. This is an increase of $844,175,000 over the fiscal year 1983 level and $277,700,000 below the President's budget request.

The increase over fiscal year 1983 results from the production of new weapons systems, renovation and rehabilitation of existing production facilities, inflation increases and the employment of additional personnel in R&D, testing and production of warheads.

Mr. Speaker, the conference agreement includes $692,678,000 for six independent agencies and commissions in title IV, including $147,700,000 for the Applachian regional development program, $465,800,000 for the Nuclear Regulatory Commission, and $125,500,000 for the Tennessee Valley Authority, of which $47,271,000 shall be derived from funds appropriated in fiscal year 1983.

I will insert a table in the RECORD at this point which summarizes the financial aspects of the conference agreement:

□ 1330

Mr. BEVILL. Mr. Speaker, we urge the Members to approve this conference report. The conferees feel that this agreement is the best that we could possible work out, and we urge the adoption of the report.

Mr. Speaker, I reserve the balance of my time.

Mr. MYERS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, Chairman BEVILL has presented the details of our conference report, and I will say that the conference with the other body was not the easiest that we have had in some years, because there were some items that were in strong disagreement. However, it is a conference report that should be acceptable to all Members. There are some exceptions to the conference report that will be discussed shortly by at least one Member on our side. However, it is a bill that I believe the President will sign. And that is very, very important. We hear a lot about what the President might do with some of our appropriation bills. But all indications are that the President will sign this.

Now, in fairness, the conference report was not completed until late last night, so we do not have an absolute promise from the White House. However, as the chairman has said, we are over $300 million under the President's request this year on this conference report; it is a bill, I feel certain, that will be agreed to.

Several Members this morning on both sides of the aisle have complained to this Member that their project that was very important to them was left out. We recognize that when you are in a conference you cannot do all things for all people. The bottom line is that we wanted a bill that we can send to the White House and which will be signed into law. The session with the other body was one of give and take. So we recognize that some people did not get their projects in. However, when we prioritized the items that were in disagreement, we had to go with those that at least in our judgment we felt were the most important. I think your conferees did a good job in working out our difference with the other body, and, most importantly, it is one that can be signed.

Mr. GEKAS. Mr. Speaker, will the gentleman yield?

Mr. MYERS. I yield to the gentleman from Pennsylvania.

Mr. GEKAS. Mr. Speaker, I noticed that the gentleman from Alabama had mentioned the appropriations for the Appalachian regional development programs as one of the special allocations made.

Can the gentleman tell me how it was that those sums were reduced from the original levels as appeared in the House version?

Mr. MYERS. What sum is the gentleman referring to now?

Mr. GEKAS. On page 30 of the bill, under title IV, Independent Agencies, where it says "Funds appropriated for the President for the Appalachian Regional Development Programs" in large numbers "37" and "38," where it was $150 million and it was reduced to $125 million and from $100 million to $80 million.

Can the gentleman tell me what the rationale was for that, if the gentleman recalls?

Mr. MYERS. Yes. If the gentleman recalls, we had $150 million in when it left the House. The other body, as I recall, put in $125 million. We put it back up to $145 million. That is the compromise. We did not get up to the House figure, but we did not go as low as the Senate figure.

Mr. GEKAS. Is the gentleman saying now that it is $145 million?

Mr. MYERS. Yes.

Mr. GEKAS. That is not clear to me.

Mr. MYERS. Line 17, page 30, $145 million.

Mr. GEKAS. My copy here says $125 million.

Mr. MYERS. It is $145 million. I think that is the Senate figure the gentleman probably has there.

Mr. GEKAS. I thank the gentleman.

The other question that I had posed to the gentleman in private which I wish to put on record but which the gentleman has, in a way, covered, is to the effect that the administration has not interposed any real objection to this bill; is that correct?

Mr. MYERS. Well, yes, the administration has objected, to be quite honest with you, to some sections of this bill. We do not have as much in weapons as the administration would like to see in the bill. We have put a few items in here that the Congress in its judgment felt were more important in priorities than the administration. However, the administration has not objected to this bill, has not registered any indication whatsoever that it might be vetoed.

So I feel very confident that this bill can be signed, because the bottom line that is most important to each of us and, certainly, to the administration, is how much money is going to be spent next year. And, as I indicated, and as the chairman also indicated, we are $228,646,000 under last year's level or the present year 1983 level, and we are $303,626,000 under the President's request. So we are well under, both last year and the President's request. I do not think there is any question but what this bill will be signed.

□ 1340

Mr. GEKAS. Mr. Speaker, if the gentleman will yield further, it is refreshing to be able to go to the final vote knowing that some bill is under the 1983 levels.

Mr. MYERS. Why can we not do this more often?

Mr. Speaker, I yield such time as he may consume to the gentleman from Massachusetts (Mr. CONTE), the ranking member on the Committee on Appropriations.

Mr. CONTE. I thank my good friend, the gentleman from Indiana, JOHN MYERS, for yielding to me.

Mr. Speaker, I rise in opposition to the conference report on the fiscal year 1984 energy and water appropriations bill. I regret having to take this action, because as it left the House this bill was a reasonably balanced, responsible piece of legislation. Unfortunately, changes in the bill made in the conference with the other body have made the bill an irresponsible drain on the Federal taxpayers, and one that I find completely unacceptable.

I am particularly opposed to the action of the conferees in providing funding for two projects that were not funded in the House bill—the Garrison diversion unit in North Dakota, and the Stonewall Jackson project in West Virginia. As the printed conference report will indicate, I excepted to amendments 2, 3, and 12, dealing with the Garrison diversion unit and the Stonewall Jackson Dam.

Despite the 100 vote margin by which the House voted against the Garrison project last December, and the absence of any funding in the House-passed bill for the project this year, the conferees agreed to include the full $22.3 million provided by the Senate bill.

The problems with the Garrison project are not going to go away—they are going to get worse. The economic basis for the project is going to continue to deteriorate. With each passing month additonal evidence of the environmental damage that will be caused by this project comes to light. And the objections of our Canadian neighbors to this project, which will pollute Canadian waters and seriously injure the Canadian fishing industry, will continue to be an obstacle to improving diplomatic relations with Canada.

Mr. Speaker, for the Corps of Engineers' general construction program, the conference report provides $884.1 million, including $26 million for the Stonewall Jackson project in West Virginia. For those of my colleagues who may not recall, this is the same Stonewall Jackson project that was defeated by a vote of 213 to 161 on the floor of this House last June 6. This is the same Stonewall Jackson project that is going to provide only limited flood control benefits, is going to flood some 20,000 acres of farmland and force the relocation of 1,800 people, and is premised upon the use of the pollution dilution method of water quality enhancement, a method disapproved by Congress in 1972.

Mr. Speaker, this morning I received a letter from the National Taxpayers Union, expressing that organization's dismay at the restoration of funds for the Garrison and Stonewall Jackson projects, and pointing out that the "conferees have again buckled to the pressures of parochial interests and partisan politics."

Mr. Speaker, truer and sadder words have never been spoken.

Mr. CONTE. Mr. Speaker, perhaps the most telling illustration is the bottom line of this bill. The conference agreement provides $14.3 billion in new budget authority. This is $127 million above the House-passed bill, and $136.2 million above the Senate-passed bill.

As my colleagues know, the way to bring in a conference report that provides more money than was in either of the two bills going into conference is to fund the pet projects in each bill. So it can fairly be said that this bill has something for everyone—or at least something for everyone who was around when the pig was being butchered.

Mr. Speaker, a letter that I received this morning from the National Wildlife Federation states that in bringing this conference report to the floor, "the House conferees have acted in calculated disregard for the goals of the Nation's environmental movement, as well as the will of the House. Rather than reflecting a merit-oriented water development policy, funding for Garrison and Stonewall Jackson represents a costly political contrivance. Rather than affirming the will of the House, this conference report bows to the dominance of the Senate."

Mr. Speaker, I agree with the sentiments expressed in that letter, and urge the defeat of this conference report.

Letters follow:

NATIONAL TAXPAYERS UNION,
Washington, D.C., June 28, 1983.

Hon. SILVIO CONTE,
Rayburn House Office Building, U.S. House of Representatives, Washington, D.C.

DEAR CONGRESSMAN CONTE: We are dismayed at the restoration of funds for the Garrison Diversion Unit and the Stonewall Jackson Dam Projects in the Conference Report on the fiscal year 1984 Energy and Water Appropriations Bill. Despite decisive votes against both of these projects by the full House, its conferees have again buckled to the pressures of parochial interests and partisan politics.

We believe that spending limited federal funds on these two projects, the costs of which well exceed even speculative benefits, is not in the nation's best interests. To incur larger deficits or require taxpayers to pay for such projects when interest rates for home, auto, and small business loans remain prohibitive is unconscionable. In our judgement, the common citizen across America, whether from North Dakota, West Virginia, or elsewhere, would much prefer to see the congress come to grips with the serious budget deficit that threatens our longterm wellbeing before funding these projects.

We deeply appreciate the leadership role you, Congressman Wise, and others have taken to stop funding for such wasteful projects. We strongly support your continued efforts to persuade the congress to discontinue any further construction on either the Garrison Diversion Unit or the Stonewall Jackson Dam.

Sincerely,

JILL LANCELOT,
Director of Congressional Affairs.

NATIONAL WILDLIFE FEDERATION,
Washington, D.C., June 29, 1983.

Hon. SILVIO CONTE,
House of Representatives,
Washington, D.C.

DEAR MR. CONTE: I am deeply disappointed to learn that the conference report on H.R. 3132, the Energy & Water Development Appropriation Bill for Fiscal 1984, contains full funding for construction of the Garrison Diversion and the Stonewall Jackson Dam. Two better examples of misplaced Federal expenditures on obsolete projects would be hard to find.

In bringing such a conference report to the floor, the House conferees have acted in calculated disregard for the goals of the Nation's environmental movement, as well as the will of the House. Rather than reflecting a merit-oriented water development policy, funding for Garrison and Stonewall Jackson represents a costly political contrivance. Rather than affirming the will of the House, this conference report bows to the dominance of the Senate.

The Appropriations Committee received a vote of confidence from the House when the Conte motion to instruct House conferees to insist on the House position on Garrison was voted down last week. The ensuing action of the House conferees, however, indicates that the confidence of their colleagues was badly misplaced.

Sincerely,

JAY D. HAIR,
Executive Vice President.

FRIENDS OF THE EARTH,
Washington, D.C., June 29, 1983.

Hon. SILVIO O. CONTE,
House Committee on Appropriations, Rayburn House Office Building, House of Representatives, Washington, D.C.

DEAR REPRESENTATIVE CONTE: It should be profoundly disturbing to most members of the House of Representatives that the Conference Report for the FY 1984 Energy and Water Development Appropriations bill contains funding for some of the nation's most controversial water resources projects that were rejected in recent months by overwhelming House majorities. The Senate's funding levels for both the Stonewall Jackson Dam (WV) and the Garrison Diversion (ND) are included despite House rejection by more than 50 votes earlier this month for Stonewall and by 100 votes in December for Garrison.

We are aware that it is sometimes difficult for House members to vote to halt funding for wasteful and environmentally destructive projects, and to, in effect, cull out from such bills those projects which members feel fall far short of the minimum standards necessary to merit their support. However, the token resistance and near total capitulation by most of the House conferees on this bill essentially renders those difficult votes meaningless in any parctical terms.

In addition, we remain seriously troubled by the manner which was used in the bill report to circumvent House review of remaining funding for the Tennessee-Tombigbee Waterway through a huge transfer of 1983 "surplus" funds to be used to complete the project. The attached letter, sent to the House earlier this month, is self explanatory on this point.

We hope the House will continue to oppose funding for these unmeritorious projects. Far less costly alternatives exist to accomplish their purposes.

Finally, we are most grateful for the special efforts you and your colleagues have made regarding these projects and for your vital efforts to improve the overall water resources policies of the nation. From all of us, thank you again,

Most sincerely,

DAVID CONRAD,
Water Resource Specialist.

Mr. CONTE. Mr. Speaker, I have told many in the House that I knew if we did not instruct the conferees that the Garrison project would be back in the bill. At least for this year, I think that the gentleman from Alabama, the chairman of the subcommittee, has won.

I hate to think about the damage that this Garrison diversion project is going to do—damage that will be part of the legacy we leave for future generations. When we debated this issue several weeks ago, the gentleman from North Dakota wondered whether I

had traveled the breadth of North Dakota. In fact, I have traveled through North Dakota. I am familiar with the farmland and the wildlife refuges that will be destroyed by this project. I have also traveled all over Manitoba. In fact, I was in Manitoba only 2 weeks ago, and I can really empathize with the deep feelings of the people in Manitoba Province against this project and what it will do to them. A great part of people's livelihood in Manitoba comes from fishing. If the trash fish are transferred to Manitoba as a result of the building of this water project, it is going to be very, very costly for the people of the Province of Manitoba.

Mr. Speaker, I hope that this will be my last battle on the Garrison project.

I again thank my good friend from Indiana for yielding to me.

Mr. BEVILL. Mr. Speaker, I yield 3 minutes to my good friend and colleague, the gentleman from Pennsylvania (Mr. EDGAR).

Mr. EDGAR. I thank the gentleman for yielding this time to me.

Mr. Speaker, I rise in the well today as an opponent of this particular conference report, but let me just say there are two reasons why I plan to vote "no." Those two reasons were stated, I think very articulately, by the gentleman from Massachusetts (Mr. CONTE). Mr. CONTE has done a good job of trying to teach Members of the House and the Senate the negative aspects of the Garrison diversion project. As he indicated in his closing words, he feels as though he has lost the battle, and I feel as though we have all lost a great deal in that battle.

Over 100 Members last December said that we ought not to commit funding to the Garrison diversion project, and yet, in the conference the Senate putting in language and funding and the conferees on the part of the House simply going along and agreeing to the Senate language. I find that very objectionable.

Second, my colleague from West Virginia did a great job on the House floor in talking about a project in his district that was very troubling and has been troubling to many of us for many years, called the Stonewall Jackson Dam. That project, too, is fully funded in this conference report. I commend the gentleman from West Virginia (Mr. WISE) for his leadership in fighting waste.

Putting those two projects aside for a moment, and commending both Members who fought very valiantly to delete the funds for those projects, I would like to commend the chairman of the subcommittee for clarifying language on the Tennessee Tombigbee Waterway. I, as a person who has opposed that project in the past, finally came to a position of saying let us find out how much the Federal Government will have to pay to finish the project.

Clearly stated in the CONGRESSIONAL RECORD on page H4588, the staff and the members of the conference have placed in this particular language the specific amount of $202 million of Federal commitment, $180 million that will come out of unobligated expenditures that were not expended in last year's funding, and an additional $22 million that will be needed.

While I still oppose this project, and while I hope that many of the communities in the States involved in this project will provide a great deal of additional local share, I think it is helpful to the full House and to the Senate to see clearly the language here as to exactly what the Federal commitment will be. I hope that this will be the final commitment to the Tennessee Tombigbee Waterway. That we will not expend any funds below Demopolis, and that we will get on to a national water policy based on merit and more equitable expenditure of the funds, and to provide cost-sharing on each project throughout the Nation, and to try to move to a national water policy that, in fact, represents the needs of the entire Nation and not simply the needs of a particular part of the country.

I plan to vote "no" on the conference report, but I do commend the chairman of the subcommittee for clarifying the numbers on the Tennessee-Tombigbee Waterway.

□ 1350

Mr. MYERS. Mr. Speaker, I yield 2 minutes to a very valuable member of the subcommittee, the gentleman from Arizona (Mr. RUDD), who understands the water problems of the country better than nearly any other Member here.

Mr. RUDD. Mr. Speaker, I support the conference report on H.R. 3132. The fiscal year 1984 energy and water appropriations bill. As a conferee on this bill, I can testify to the fairness and close scrutiny that was involved in hammering out an agreement with the Senate on funding the vital energy, water development, and national security programs funded under this bill.

On every point of disagreement between the two bodies, the conference committee carefully crafted compromises that recognize the expressed concerns of both Houses.

This conference report funds the crucial water development programs for this country. Under the leadership of both able chairmen, the gentleman from Oregon and the gentleman from Alabama (Mr. BEVILL) my ranking member, the gentleman from Indiana, the House and Senate subcommittee has taken strong, visionary strides toward a water development policy which will help this generation and the next. Water is the most precious resource we have. Its full development is crucial for the development and well-being of this Nation.

Under the programs funded here, we find critical flood protection, potable water development, and development of our waterways to help our commerce complete in the world market. The funds in this conference report for the Department of Energy go toward critical energy development and research as well as crucial national security programs.

I urge my colleagues to support this conference report.

Mr. MYERS. Mr. Speaker, I yield 2 minutes to the gentleman from Wisconsin (Mr. ROTH).

Mr. ROTH. Mr. Speaker, I thank the gentleman for yielding this time to me.

Mr. Speaker, I am deeply disturbed by the failure of the energy and water development appropriations bill conference committee to include funding for the Fox River locks in its bill. Continuation of this funding is vital.

For well over 100 years, the Army Corps of Engineers has been operating the lock and dam system of the lower Fox River, which runs for 39 miles between Lake Winnebago and Green Bay, Wis. This system has been instrumental in allowing for the settlement, transportation, and development of industry in Wisconsin. It represents an important part of our Wisconsin historic heritage.

In recent years, the Army Corps has attempted to request just enough funding to maintain the 19 locks and 13 dams for flood control purposes; however, the corps has not requested funding to provide for operation of the locks.

Last year, I and my colleagues were successful in having funds appropriated for operation of the Fox River lock system. Earlier this year, the House Energy and Water Development Subcommittee included sufficient funding in its bill to allow for operation and maintenance of the locks and dams. The full Appropriations Committee and the full House of Representatives agreed with the subcommittee's action. Unfortunately, the Senate did not go along. In a conference between the House and Senate, only enough funds were included to maintain the system for flood control purposes. This action must be corrected.

The Fox locks are important to my area in Wisconsin. They allow access to and from the Great Lakes for many thousands of small craft which transit the locks each year. In 1982, 27,000 crafts moved though the lock system. If the locks were to be closed, boaters would be denied access to either Lake Winnebago or the Great Lakes, as well as the Fox River itself.

Moreover, the jobs lost would number no fewer than 18 and possibly more. In addition to the jobs lost as a direct result of the lock closings, employees in the nearby travel and tourism-related industries would be affected. In short, a number of people would suffer if the locks are closed.

The people in my district, and particularly those who use the locks, are well aware that there is a problem with continued Federal funding of the Fox River lock and dam system. Therefore, the last Governor of Wisconsin, Lee Dreyfus, set up a task force to look at alternative means of funding the locks. I also established such a task force.

Each task force acknowledged that continued full Federal funding was not the long-term solution to keeping the locks open. In fact, each report examined various alternatives ranging from establishing user fees to turning the river and environs into a national park, such as was done with the Rideau Canal in Canada. However, each report also stated that, until alternatives could be implemented, Federal funding was necessary. Furthermore, each report indicated that some continued Federal assistance was also imperative.

In short, we are faced with a dilemma: On the one hand, the Federal Government wants to pull out as Federal officials seek ways to lessen the deficit; on the other hand, we have State and local governments and private citizens who are not yet in a position to assume responsibility for the lock operation in any substantive way.

It is because of this dilemma that I and other colleagues have worked to obtain Federal funding through fiscal year 1984. We must allow for a smooth transition, and not an abrupt withdrawal of Federal support. For this reason, I urge the Energy and Water Development Appropriations Subcommittee to take another look at this issue and to appropriate funding for the Fox River locks in legislation at the earliest possible time. At the same time, I make a pledge to do my utmost to work for a long-term solution to the operation of the Fox locks, hopefully involving a partnership between the Federal Government and State and local governments and interested citizens. Working together, I am sure we can meet this challenge.

Mr. BEVILL. Mr. Speaker, I yield 3 minutes to my good friend and colleague, the gentleman from California (Mr. ANDERSON).

Mr. ANDERSON. Mr. Speaker, I thank the gentleman for yielding me this time.

Mr. Speaker, I know that in the conference yesterday on the energy and water development appropriations bill for 1984, you fought very hard to convince the Senate to accept the House figures for many projects that we in this body felt were badly needed and fully justified. I was indeed sorry that you were unable to prevail in the case of two projects in which I am interested. These are the Vicksburg, Miss., Corps of Engineers Waterways Experiment Station which has a model of the San Pedro Bay as one of many worthwhile endeavors. And the second one is the dredging necessary to remove silting at the mouth of the Los Angeles River which resulted from the storms we had earlier this year.

While I appreciate the necessity to compromise with the Senate, which funded these projects at zero, splitting the difference with 50-percent funding just does not make good economic sense. In the case of Vicksburg, it will mean a disruption in the planned workload of the facility, and the result downstream will be a stretchout in the development of a plan for the badly needed expansion of both ports of Los Angeles and Long Beach. As you are fully aware, you cannot recruit the highly trained technicians needed to operate wave oscillation and flow circulation experiments as is done in the Vicksburg model overnight. Thus, a delay in funding which must eventually be made to meet the requirements of this project will cause a needless delay.

In the partial funding for the removal of the silt, one of the major costs of any dredging operation is moving and positioning the dredge and related equipment to where the work will be done. And this money will be largely wasted if the dredge is pulled out prior to complete removal of the silt. Sooner or later, this silt must be removed or we will face the possibility of flooding parts of downtown Long Beach, disruption of the vital passenger and freight service from the mainland to Catalina through Long Beach, and nullify the marina development in which large sums of money are currently being spent.

These projects are so vital and so fully justified that it would be my strong hope that after this legislation is signed in the law by the President, the Corps of Engineers, on its own, would immediately propose a reprograming of the needed sums—a relatively small amount considering their overall budget—into these two projects. As they were fully authorized and funded by the House, I would foresee no difficulty in obtaining rapid approval for reprograming. I think this is certainly the preferred route rather than the alternative, that of requesting these funds as a supplemental appropriation.

Mr. BEVILL. Mr. Speaker, I thank the gentleman from California (Mr. ANDERSON) for his explanation of the need for these projects and also the need for full funding, and I certainly agree wholeheartedly with the gentleman.

Mr. ANDERSON. Mr. Speaker, I thank the subcommittee chairman very much, and I sincerely appreciate his understanding and support in this matter.

Mr. BEVILL. Mr. Speaker, I yield 2 minutes to my good friend and colleague, the gentleman from West Virginia (Mr. WISE).

Mr. WISE. Mr. Speaker, I just wanted to rise for a moment and say that reluctantly I will support this conference report.

As the gentleman knows, I came to the floor along with others and battled to have the Stonewall Jackson Dam removed from the funding. The House, by a 40-vote margin, agreed on the merits of the case. The conferees then receded from their position, and the Stonewall Jackson Dam is included in this bill. I feel that is regrettable, but that is the way it goes.

I do want to say that I am supporting the conference report because it contains many other provisions that are vital not only to my State and my district, but to a large part of the country. The Appalachian Regional Commission is included, vital highway programs are included, and vital social programs are included, so I cannot in good conscience vote against the conference report because of my disagreement with one part of it, no matter how important that part is to me.

Mr. Speaker, I also want to thank the chairman of the subcommittee. While we disagreed on this one particular item, he has always been very candid with me and let me know exactly where I stand on it. As I say, I do support the conference report, and I do appreciate the opportunity to explain my feelings on this matter.

Mr. BEVILL. Mr. Speaker, I yield such time as he may consume to the distinguished chairman of the Committee on Appropriations, the gentleman from Mississippi (Mr. WHITTEN).

Mr. WHITTEN. Mr. Speaker, I rise to pay my respects to the members of this subcommittee.

We could leave all the money in the world to our children, but if we leave them a wornout land, then they would have nothing on which to build. Of all the Members of Congress, none put in more tiring hours than the members of this subcommittee, especially the chairman, the gentleman from Alabama (Mr. BEVILL), and the ranking minority member, the gentleman from Indiana (Mr. MYERS). Each member of the subcommittee is to be commended. I am sure that they demonstrate in this bill, as they have for many, many years, that they are committed to look after the whole country.

Mr. Speaker, I commend them on doing their usual good job.

Mr. BEVILL. Mr. Speaker, I yield 2 minutes to my good friend and col-

league, the gentleman from West Virginia (Mr. MOLLOHAN).

□ 1400

Mr. MOLLOHAN. Mr. Speaker, I rise in strong support of the conference report. I know it contains projects which will be very meaningful to citizens across this country as those projects assure flood protection, and guarantee ample water supplies of good quality to needy communities. That is certainly true with regard to the Stonewall Jackson Lake and Dam project which will make these benefits available to almost 50,000 north central West Virginia citizens by controlling the West Fork River as it winds for nearly 100 miles through numerous communities in my congressional district. We will be particularly relieved to be protected from the regular flooding and pleased with the improvement to water quality.

This dam will be of great benefit to my district and is exactly the kind of infrastructure investment we need to make possible economic diversification and growth. I appreciate very much the committee's sensitivity to these needs, and I want to personally express my gratitude to the chairman of the subcommittee, the gentleman from Alabama (Mr. BEVILL), and to the ranking minority member, the gentleman from Indiana (Mr. MYERS) for their assistance and hard work with regard to this bill.

Mr. Speaker, I support the conference report wholeheartedly and appreciate the efforts of the committee and conferees in regard to this most worthwhile project—the Stonewall Jackson Lake and Dam. The people of West Virginia are grateful.

Mr. MYERS. Mr. Speaker, I yield myself such time as I may consume.

Since this discussion started earlier, I had reflected that we had not heard from the administration on this bill. Since we got started on this conference report, we have. A number of people, particularly on this side, have asked the administration's position. For those who are interested, they have no objection to the bill as it is now being presented as a conference report.

● Mr. FRENZEL. Mr. Speaker, it has been said with some accuracy that the conference report on H.R. 3132 is within the budget resolution allocations.

Since the fiscal year 1984 budget resolution is little more than a Christmas wish list, it is not surprising that this conference report is within budget. Almost anything would fit in the excessive budget which Congress recently ratified. It is not a fit measure for fiscal responsibility.

It also appears that the conference report is within the President's budget request. In truth, that is only because funding for Clinch River has been removed. In the House version, the Appropriations Committee took Clinch River out and then spent all the Clinch River savings on its own favorite pork sausages.

I am also afraid that supplemental appropriations for new authorizations lurk, as usual, in the future. Supplementals are intolerable, but they have become a way of life here. Pork barrel projects and inevitable supplementals make this business as usual, spending as usual, irresponsible as usual.

The taxpayers demand something better than spending as usual, therefore I shall vote no.●

● Mr. STARK. Mr. Speaker, today as we consider the conference report on the energy and water appropriations bill, I would ask my colleagues to consider one thing. This conference agreement contains a cut of $29.25 million in the U.S. magnetic fusion energy budget. But, in contrast, it also includes an expenditure of $7 million for the acquisition of a buffer security zone around one of our national laboratories. I believe we have our priorities a little screwed up here.

The $7 million to be used for the buffer land is to ensure the security of one of our national laboratories. I suggest that a better way to insure our national security would be to proceed with the national magnetic fusion program, and worry about land acquisition once we have acquired a sufficient energy source to carry us into the next century. It will not matter how much land surrounds our laboratories if, in the next century, we are spending all our resources on acquiring imported energy, and have no funds left to run our labs.

Although I will vote for this conference report on its other merits, I am severely disappointed in the shortsightedness shown in this report with regard to our future energy needs. I believe we will be sorry.●

Mr. MYERS. Mr. Speaker, I yield back the balance of my time.

Mr. BEVILL. Mr. Speaker, I yield back the balance of my time, and I move the previous question on the conference report.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the conference report.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. EDGAR. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 337, nays 82, not voting 14, as follows:

COLLEGE LOANS AND GRANTS DENIED TO DRAFT VIOLATORS

(Mr. SOLOMON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SOLOMON. Mr. Speaker, I have some good news for America. The Solomon amendment, which denies college loans and grants to young men who are in violation of the Draft Registration Act will go into effect on Friday, July 1.

The U.S. Supreme Court, after a hearing by the full Court body, has, this afternoon, issued a permanent stay knocking out the Minnesota Federal judge's injunction against the law.

This is a major victory for the more than 11 million patriotic young Americans who have lived up to their obligations as U.S. citizens and obeyed the law of the land.

I urge all of you to notify your constituents immediately that this law will take effect on Friday, July 1, for the school year starting this September.

CONFERENCE REPORT ON H.R. 3132, ENERGY AND WATER DEVELOPMENT APPROPRIATIONS, 1984

AMENDMENTS IN DISAGREEMENT

The SPEAKER pro tempore. The Clerk will report the first amendment in disagreement.

Mr. BEVILL. Mr. Speaker, I ask unanimous consent that the Clerk designate each Senate amendment in disagreement by number as they are reached, and that they be considered as read and printed in the RECORD.

The SPEAKER pro tempore (Mr. VENTO). Is there objection to the request of the gentleman from Alabama?

There was no objection.

The SPEAKER pro tempore. The Clerk will designate the first amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 16: Page 10, line 6, after "monument" insert ": *Provided further*, That of the amount herein appropriated not to exceed $20,000 shall be available to initiate a rehabilitation and betterment program with the Twin Falls Canal Company, Twin Falls County, Idaho, to rehabilitate facilities under the Act of October 7, 1919 (63 Stat. 724), as amended, to be repaid in full by the lands served and under conditions satisfactory to the Secretary of the Interior".

MOTION OFFERED BY MR. BEVILL

Mr. BEVILL. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BEVILL moves that the House recede from its disagreement to the amendment of the Senate numbered 16 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 17: Page 10, line 6, after "monument" insert ": *Provided further*, That of the amount herein appropriated $6,000,000 shall be available to enable the Secretary of the Interior to begin work on rehabilitating the Velarde Community Ditch Project, New Mexico, in accordance with the Federal Reclamation Laws (Act of June 17, 1902, 32 Stat. 788, and Acts amendatory thereof or supplementary thereto) for the purposes of diverting and conveying water to irrigated project lands. The principal features of the project shall consist of improvements such as the installation of more permanent diversion dams and headgates, wasteways, arroyo siphons, and concrete lining of ditches in order to improve irrigation efficiency, conserve water, and reduce operation and maintenance costs. The cost of the rehabilitation will be nonreimbursable and constructed features will be turned over to the appropriate entity for operation and maintenance".

MOTION OFFERED BY MR. BEVILL

Mr. BEVILL. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BEVILL moves that the House recede from its disagreement to the amendment of the Senate numbered 17 and concur therein with an amendment, as follows: In lieu of the matter proposed by said amendment, insert the following: ": *Provided further*, That of the amount herein appropriated $3,000,000 shall be available to enable the Secretary of the Interior to begin work on rehabilitating the Velarde community ditch project, New Mexico, in accordance with the Federal Reclamation Laws (Act of June 17, 1902, 32 Stat. 788, and Acts amendatory thereof or supplementary thereto) for the purposes of diverting and conveying water to irrigated project lands. The principal features of the project shall consist of improvements such as the installation of more permanent diversion dams and headgates, wasteways, arroyo siphons, and concrete lining of ditches in order to improve irrigation efficiency, conserve water, and reduce operation and maintenance costs. The cost of the rehabilitation will be nonreimbursable and constructed features will be turned over to the appropriate entity for operation and maintenance".

Mr. BEVILL (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Alabama?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 22: Page 17, line 14, after "expended" insert ": *Provided*, That $3,000,000 of the proposed deferral No. 83-72 shall be made available for the Second Small Community Experiment project and shall remain available until expended".

MOTION OFFERED BY MR. BEVILL

Mr. BEVILL. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BEVILL moves that the House recede from its disagreement to the amendment of the Senate numbered 22 and concur therein.

Mr. BEVILL (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Alabama?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 25: Page 19, line 23, strike out all after "expended" over to and including "missile" in line 2 on page 20.

MOTION OFFERED BY MR. BEVILL

Mr. BEVILL. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BEVILL moves that the House recede from its disagreement to the amendment of the Senate numbered 25 and concur therein with an amendment, as follows: Delete the matter stricken by said amendment and insert the following: ": *Provided*, That notwithstanding any other provision of law, no funds may be obligated or expended after the date of enactment of this Act for Project 82-D-109 unless the President certifies to Congress that—

(1) for each 155mm nuclear weapon produced an existing 155mm nuclear weapon shall be removed from the stockpile and permanently dismantled; and

(2) formal notification has been received from the North Atlantic Treaty Organization nation in which such weapons are sought to be deployed that such nation has approved replacement of existing 155mm nuclear weapons with the new 155mm nuclear weapons.

Mr. BEVILL (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Alabama?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the last amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 26: Page 20, line 2, after "missile" insert ": *Provided*, That none of the funds appropriated by this Act, or by any other Act, or by any other provision of law, shall be available for the purpose of restarting the L-Reactor at the Savannah River Plant, Aiken, South Carolina, until the Department of Energy completes an Environmental Impact Statement pursuant to section 102(2)c of the National Environmental Policy Act of 1969. For purposes of this paragraph the term 'restarting' shall mean any activity related to the operation of the L-Reactor that would load fuel into the reactor core, achieve criticality, generate fission products within the reactor, or discharge cooling water from either testing or operations into Steel Creek."

Consistent with the National Environmental Policy Act of 1969, and in consultation with State officials in South Carolina and Georgia, the preparation and completion of the Environmental Impact Statement called for in this paragraph shall be expedited. The Secretary of Energy may reduce the public comment period, except that the public comment period shall not be reduced to less than forty-five days and the Secretary shall provide his Record of Decision, based upon the completed Environmental Impact Statement, not sooner than December 1, 1983, and not later than January 1, 1984.

MOTION OFFERED BY MR. BEVILL

Mr. BEVILL. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BEVILL moves that the House recede from its disagreement to the amendment of the Senate numbered 26 and concur therein. In lieu of the matter proposed by said amendment, insert the following:

None of the funds appropriated by this Act, or by any other Act, or by any other provision of law shall be available for the purpose of restarting the L-Reactor at the Savannah River Plant, Aiken, South Carolina, until the Department of Energy completes and Environmental Impact Statement pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969 and until issued a discharge permit pursuant to the Federal Water Pollution Control Act (33 U.S.C. 1251, et. seq.) as amended, which permit shall incorporate the terms and conditions provided in the Memorandum of Understanding entered into between the Department of Energy and the State of South Carolina dated April 27, 1983, relating to studies and mitigation programs associated with such restart. For purposes of this paragraph the term "restarting" shall mean any activity related to the operation of the L-Reactor that would achieve criticality, generate fission products within the reactor, discharge cooling water from nuclear operations directly or indirectly into Steel Creek, or result in cooling system testing discharges which exceed the volume, frequency and duration of test discharges conducted prior to June 28, 1983.

Consistent with the National Environmental Policy Act of 1969, and in consultation with State officials of South Carolina and Georgia, the preparation and completion of the Environmental Impact Statement called for in the preceding paragraph shall be expedited. The Secretary of Energy may reduce the public comment period, except that such period shall not be reduced to less than thirty days, and the Secretary shall provide his Record of Decision, based upon the completed Environmental Impact Statement, not sooner than December 1, 1983, and not later than January 1, 1984.

Mr. BEVILL (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Alabama?

There was no objection.

The motion was agreed to.

A motion to reconsider the votes by which action was taken on the conference report and the several motions was laid on the table.

PERSONAL EXPLANATION

Mr. MORRISON of Connecticut. Mr. Speaker, because of longstanding commitments in my congressional district, I was unable to cast several rollcall votes on June 28, 1983. I would like to list those rollcall votes by number and state how I would have voted had I been present:

Rollcall No. 221 "no."
Rollcall No. 222 "no."
Rollcall No. 223 "no."
Rollcall No. 224 "yea."
Rollcall No. 225 "aye."

MESSAGE FROM THE SENATE

The SPEAKER pro tempore. The Chair lays before the House the following message from the Senate.

The Clerk read as follows:

S. CON. RES. 48

Resolved by the Senate (the House of Representatives concurring), That when the Senate adjourns on Wednesday, June 29, 1983, Thursday, June 30, 1983, or Friday, July 1, 1983, pursuant to a motion made by the majority leader in accordance with this resolution, it stand adjourned until 12 noon on Monday, July 11, 1983, and that when the House adjourns on Thursday, June 30, 1983, it stand adjourned until 12 noon on Monday, July 11, 1983.

The SPEAKER pro tempore. The question is on the Senate concurrent resolution.

The Senate concurrent resolution was concurred in.

A motion to reconsider was laid on the table.

DISTRICT OF COLUMBIA APPROPRIATION BILL, 1984

Mr. DIXON, Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 3415), making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of said District for the fiscal year ending September 30, 1984, and for other purposes; and pending that motion, Mr. Speaker, I ask unanimous consent that general debate be limited to not to exceed 1 hour, the time to be equally divided and controlled by the gentleman from Pennsylvania (Mr. COUGHLIN) and myself.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from California (Mr. DIXON).

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill H.R. 3415, with Mr. HERTEL of Michigan in the chair.

The Clerk read the title of the bill.

□ 1430

By unanimous consent, the first reading of the bill was dispensed with.

The CHAIRMAN. Under the unanimous-consent agreement, the gentleman from California (Mr. DIXON) will be recognized for 30 minutes, and the gentleman from Pennsylvania (Mr.

COUGHLIN) will be recognized for 30 minutes.

The Chair recognizes the gentleman from California (Mr. DIXON).

Mr. DIXON. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, it is indeed a privilege for me to once again present to the House the annual District of Columbia appropriation bill.

The budget we present to the House today will finance the District government's operations during fiscal year 1984, and is virtually untouched from the one submitted by District officials on April 12, 1983. The committee shifted only $553,000 between five different programs and agencies, and, in addition, directed that District officials provide adequate funds in two areas—streetlighting and traffic signal costs, and reduction of the accumulated general fund deficit. Sources of funding for these latter two items are left to the discretion of the Mayor and council, who are responsible for adjusting priorities and making sure these obligations are properly funded. So, Mr. Chairman, for all intents and purposes, the budget that we present at this time is the one that was proposed and submitted by District officials back in April of this year.

FEDERAL FUNDS

The committee recommends a total of $544,590,000 in Federal funds for the operation of the District of Columbia government in fiscal year 1984 consisting of:

A Federal payment of $361 million which is the same as the fiscal year 1983 level but $25 million below the request due to lack of authorizing legislation;

A Federal contribution of $52 million to the police, fire, teachers and judges pension fund;

A Federal reimbursement of $16.5 million for water and sewer services furnished to Federal facilities; and

Federal loans of $115 million for the District's construction program.

The bill, as recommended by the committee, is consistent with the budget resolution which was adopted by the House and the Senate last week.

DISTRICT FUNDS

We recommended a total budget of $2,122,013,000 from District revenues. This amount is $123,171,100 above the fiscal year 1983 level and consists of $1,999,205,600 for operating expenses and $122,807,400 for capital improvement projects.

EMPLOYMENT LEVEL

Each year I have tried to keep the members advised on the progress the District government is making in reducing its employment base. In fiscal year 1980, the year before I became chairman, there were 39,105 positions in the District government. In this bill, the committee recommends a total of 31,913 positions which is a reduction of 527 positions below the fiscal year 1983 level and 7,192 or 18.4 percent below the number of positions that were available in fiscal year 1980.

Mr. Chairman, this reduction has come about through various management and administrative improvements initiated by District officials who on the one hand are trying to streamline the bureaucracy while at the same time improve service delivery.

GOVERNMENTAL DIRECTION AND SUPPORT

The bill includes $44,352,400 for the 18 agencies and activities funded under the governmental direction and support appropriation; 10 of the agencies are funded at their fiscal year 1983 level and have no increase whatsoever. The remaining eight have modest increases basically for increased pay costs. The committee recommends a total of $5,408,200 for the Council of the District of Columbia, the city's legislative body. This allowance is $416,900 above the fiscal year 1983 level to cover within grade salary increases, funding for the fiscal year 1984 pay adjustment, and underfunded salary costs. An increase of $20,000 is provided for the D.C. Auditor to annualize three positions initially approved last year. A total of $472,100 will be available for that office in fiscal year 1984.

Mr. Chairman, the committee continues to be concerned with the operation of the D.C. Board of Elections and Ethics. We raised this issue with the Mayor on the very first day of our hearings, and we followed up with the chairman of the elections board who explained that although some permanent corrective action has been initiated by the board, one of the significant problems stems from the transient nature of a large segment of the District's population and the inability to purge the files on the basis of a mail check. These problems are being addresed by the city council. The committee has requested the board to provide the committee with a comprehensive timetable and plan for assuring permanent improvements to the voter registration rolls. The committee recommends $2,468,700 and 41 positions for the operation of the board in fiscal year 1984. The increase of $856,900 will cover the costs associated with two additional elections scheduled to be held during the year.

We recommend $2,403,700 and seven positions for the D.C. Retirement Board which controls and manages the retirement funds for police officers and firefighters, judges, and teachers. The committee recommends continuation of the arrangement whereby 25 percent of the board's costs are financed from general fund revenues and 75 percent from retirement fund earnings. The committee notes the board's diligence in exercising its fiduciary responsibility under Public Law 96-122 which created the board and set forth its responsibilities.

ECONOMIC DEVELOPMENT AND REGULATION

The committee recommends a total of $56,603,000 for the departments and agencies included in this appropriation category. For the Office of Planning and Development, we recommend $2,843,000 for fiscal year 1984, a net decrease of $334,100 below the fiscal year 1983 appropriation level. This office, Mr. Chairman, is the District's central planning office and is responsible for producing, monitoring and updating the District's elements of the comprehensive plan.

For the Department of Housing and Community Development, the bill includes $19,376,500, of which $2,826,600 will be used to provide down payment assistance so that low income District residents will be able to buy homes. In addition, $2.5 million will provide for the rehabilitation of 100 units and $1 million will be used to acquire properties for rehabilitation.

For the Housing Finance Agency, we recommend $1,778,700 as requested. The primary function of this agency is to increase the supply and lower the cost of funds available for residential mortgages and construction loans, and in doing so, help alleviate the shortage of affordable housing for the city's low- and moderate-income residents.

The bill includes $307,100 to fully fund eight positions for the Commission on the Healing Arts Licensure. Mr. Chairman, this is a revenue producing activity responsible for approving or denying the licensure of applicants to practice medicine and other healing arts. Testimony was received by the committee to the effect that there is a backlog in all areas, and with only four of the eight positions filled, the committee has urged the Commission to move ahead in filling the four vacant positions and reducing the backlog of cases.

For the Department of Finance and Revenue, the bill includes the full budget request of $15,976,200 which is $1,136,100 above the fiscal year 1983 level. This Department expects to generate almost $1,3 billion in revenues for the operation of the District government in fiscal year 1984.

PUBLIC SAFETY AND JUSTICE

Under the public safety and justice appropriation, the committee recommends a total of $457,840,300 for fiscal year 1984, an increase of $52,963,500 above the fiscal year 1983 level. The committee recommends $139,820,900 for the Metropolitan Police Department. At our first hearing this year, the Mayor testified that 3,891 officers were on board. As some of you will recall, many Members of Congress were concerned that the city not reduce the level of uniformed officers, and District officials have concurred

in this concern by placing additional officers on the rolls to bring the force up to its full strength of 3,880 uniformed personnel.

There are two areas within the police department's budget that causes us some concern. First is the significant increase of $1,354,200 or 45.6 percent in police overtime costs which will total $4,320,000 in fiscal year 1984. Well over half of these costs are for court appearances by officers. We have discussed this subject with department officials during the past few years, and while there has been some acknowledgment of a program to reduce these costs, there is some concern with the effectiveness of those efforts. As a result, the committee has requested the criminal justice agencies of the District to coordinate their efforts with the objective of reducing overtime costs as well as the level of overtime. We have asked the Chief Judge of the Superior Court to chair this group and to report back to the committee when next year's budget is submitted.

The second area of concern is the police and fire health clinic which the District is not funding in fiscal year 1984. District officials explained that savings would result from closing the clinic—which is used by District and fire employees as well as the Federal Park Police and Secret Service on a reimbursable basis—and providing the same quality and level of service through other medical facilities operated by the District government, including D.C. General Hospital and clinics operated by the Department of Human Services. The committee held a special hearing on the city's proposal, and after receiving testimony from the various District officials involved in the development of the city's plan, it was not clear to the committee whether there would be any savings at all from closing the clinic. And the committee was not convinced that the level and quality of services provided by the clinic would be continued through other District facilities. Since the plan through which the proposal will be implemented was not completed at the time the subcommittee marked up, the committee is requesting quarterly reports on the city's progress in developing and implementing the plan. The reports are to include information on projected and actual savings as well as an objective comparison of the level and quality of service.

For the District's court system, the committee recommends a total of $44,372,200. The District's court system consists of the court of appeals, the superior court, and the court administration. This recommendation is $4,236,700 above the fiscal year 1983 level and includes increases to assist the courts in coping with their continually increasing caseload.

A total of $102,127,200 is included in the bill for the department of corrections and will fund an additional 92 positions above the fiscal year 1983 level enabling the department to respond to the security requirements of an expected increase in inmate population as well as provide court ordered security coverage. An increase of $5,968,000 or a total of $21,296,000 is included to cover the costs of District inmates assigned to facilities of the Federal Bureau of Prisons. A total of $491,900 and 21 positions have been approved for the District's support of the National Guard in fiscal year 1984. This allowance includes $33,200 and one new position requested by the commanding general as the minimum required to maintain the guard's current workload. We recommend the full request of $98.2 million as the District's contribution to the police and fire retirement system. This allowance is $13,233,000 above the fiscal year 1983 level and is determined by the board's actuary in accordance with Public Law 96-122, the D.C. Retirement Reform Act.

Mr. Chairman, we recommend $52,548,200 for the operation of the fire department in fiscal year 1984. This amount is $4,979,200 above the current year level and includes an increase of $312,000 to keep a five-man crew on the department's fire boat. District officials had proposed reducing the crew to two. The increase recommended by the committee also provides funding of $1,043,900 to annualize the costs of the four rescue squads which were partially funded in fiscal year 1983.

PUBLIC EDUCATION SYSTEM

We recommend a total of $473,597,100 for the operation of the public education system during fiscal year 1984. The committee's recommendation reflects an increase of $34,872,900 above the fiscal year 1983 level.

For the public school system, the bill includes $326 million or an increase of $19,482,200 which will allow the system to partially fund the cost of mandatory pay adjustments negotiated through employee contracts. These pay adjustments total $22 million and will require that an additional $2.6 million be redirected from other programs and services throughout the school system.

Mr. Chairman, I believe the school superintendent is doing an outstanding job. She has been particularly successful in involving the private sector with the school system, and I think the board is operating in fine fashion—in a manner that is in the best interest of our young people.

The committee recommends the full request of $68,975,000 for the teachers retirement and annuity fund. This is $13,092,000 more than the fiscal year 1983 appropriation and is based on the actuary's request in accordance with Public Law 96-122. We recommend $60,842,400 for the University of the District of Columbia in fiscal year 1984. The increase of $2.5 million above the fiscal year 1983 level is solely to fund pay adjustment costs. For the public library, we recommend $12,436,100 which is $1,189,800 above the fiscal year 1983 appropriation level. The increase recommended by the committee will fund the fiscal year 1984 pay adjustments as well as the initial costs of the library's video-rental collection.

HUMAN SUPPORT SERVICES

The bill includes a total of $486,778,600 for the departments and activities funded under this appropriation. The largest single budget under this appropriation is for the Department of Human Services and totals $353,891,100 of which almost one-third or $111,636,900 is for the District's medicaid program. Although this budget request contemplates new cost containment measures and continuation of currently successful ones such as the limit on reimbursements for outpatients and emergency room services, the District government and local hospitals are exploring alternative medicaid reimbursement policies for inpatient hospital care that will check the extraordinarily high rate of increase of recent years and replace it with a prospective payment structure to cap spending.

The committee has approved the budget request of $24,748,700 for payments by the District to St. Elizabeths Hospital for mental health care provided to city residents. While this allowance reflects no change from the appropriation for fiscal year 1983, the committee has increased the limitation included in the bill language by $4.7 million. This increase of $4.7 million, which will be provided from the additional Federal payment of $25 million now awaiting authorization action by the Congress, will provide a total payment in fiscal year 1984 of $29,448,700 or 19 percent above the fiscal year 1983 level. The administration requested that the District pay $54.6 million in fiscal year 1984, an increase of $29.9 million or 121 percent above the fiscal year 1983 appropriation. Clearly such an increase is unreasonable and beyond the District's capability. In last year's bill, the committee recommended and the House approved a $3.6 million or 15.7 percent increase in the District's payment to St. Elizabeths Hospital. This increase was deleted completely by the other body, and in conference, the House was successful in restoring only $1.8 million, so the final allowance was only 7.8 percent above the fiscal year 1982 appropriation. The committee is concerned with the level of the District government's payment to St. Eliz-

abeths Hospital and reiterates its support for the concept that the District's share of the operating costs of St. Elizabeths must increase to a level which reflects the heavy use of these services by District residents. The committee believes the increase of 27 percent, which reflects the District's anticipated payment of $4.7 million and the $1.8 million increase provided in fiscal year 1983, is reasonable, and urges the Federal Department of Health and Human Services to work closely with the District government in developing a fiscal year 1985 proposal which will accomplish the goal of increased District funding over a reasonable period of time.

The committee recommends the full budget request of $5,188,600 for the Office on Aging and $3,297,600 for the District of Columbia Energy Office. This latter amount includes $3 million earmarked for the complementary energy assistance program which provides assistance in the form of cash payments directly to 2,200 qualifying low-income recipients with household energy and utility expenses.

PUBLIC WORKS

Mr. Chairman, the committee recommends approval of the consolidation of two appropriation titles—transportation, and environmental services—into a single public works title. We recommend a total of $190,562,100 for the five agencies funded through this appropriation. This allowance includes $98,475,700 or a $6,390,000 increase for the District's share of the operating subsidies for metrorail and metrobus operations in fiscal year 1984. The committee has approved the Department of Transportation's full budget request of $31,190,200 which is $12.3 million below the fiscal year 1983 level. This reduction is due primarily to the District's proposal to shift $12 million in streetlighting and traffic signal costs from the District budget to the rate base for electrical consumers. While the committee has not taken a position on this issue, we are concerned that a budget was submitted by District officials based on a controversial idea which has resulted in the deletion of funds for basic services that are essential to the safety and well-being of residents and visitors. The committee wishes to place District officials on notice that future budgets are to be predicated on proposals that are within the limits of the Mayor and Council for final action.

In order to insure the timely payment of the city's street lighting and traffic signal costs, the committee has included language in the bill under section 130 directing the District government to continue to pay its street lighting and traffic signal costs on a monthly basis until all final administrative and judicial determinations have been made on a program which provides for these costs to be paid by the utility ratepayers. The sources of funds required for these payments are to be determined by the Mayor from funds provided in this bill in accordance with section 130.

A total of $25,601,600 is recommended from the general fund for the Department of Environmental Services. This allowance is $2,691,600 above the fiscal year 1983 level and will cover pay adjustment costs as well as other cost increases for equipment rental and the war on rats program. We recommend the budget request of $158,735,600 to repay the amount due the Federal Treasury on the $1.65 billion in outstanding loans borrowed by the city to finance its construction program.

REPAYMENT OF GENERAL FUND DEFICIT

Mr. Chairman, we recommend that $20 million be applied toward reducing the District's accumulated general fund deficit which is estimated to total $276 million at the end of fiscal year 1983. The committee's recommendation consists of $5 million in the District's budget request plus an additional $15 million which is to be identified by the Mayor and made available through reductions in amounts included in the bill or from additional revenues.

Mr. Chairman, District officials have reduced the deficit from $388 million in 1980 down to an estimated $276 million in fiscal year 1983 and, with the $20 million included in this bill, the deficit will be reduced even further to $256,410,000. In other words, the District will have reduced its deficit by more than one-third in a period 4 years, a feat they can be proud of and one that signals their commitment to sound financial management.

INTEREST ON SHORT-TERM BORROWINGS

The committee recommends $3,197,000 for this new account which will be used to pay interest and other costs associated with issuing short-term revenue anticipation notes. Issuance of these notes will allow the District to meet its seasonal cash flow financing needs which were met through interest-free repayable advances from the Federal Treasury through fiscal year 1983. In fiscal year 1984, the District plans to meet this need by going to the public market.

ADJUSTMENTS

The bill includes language allowing the Mayor to reduce the energy budgets and the additional gross pay budgets within one or several of the appropriation titles by $3,871,300 and $361,800, respectively.

CAPITAL OUTLAY

We recommend a total of $122,807,400 for 67 construction projects in fiscal year 1984. The committee's recommendations consist of $111,587,400 for 59 projects financed from the general fund and $11,220,000 for 8 projects from the water and sewer enterprise fund. These projects, Mr. Chairman, run the gamut from housing and public school facilities to highway and bridge work and the laying of sanitary sewerlines. A total of $78,022,100 is included for "public building construction" which includes the modernization of public housing, the completion of a career center for public schools, and the construction of central laboratories at D.C. General Hospital; $25 million are recommended for various highway and bridge projects and $19,783,300 will finance water and sewer work including almost $7 million as the District's share to complete the wastewater treatment plant at Blue Plains.

WASHINGTON CONVENTION CENTER ENTERPRISE FUND

Mr. Chairman, the bill includes $9,617,000 for the operation and administration of the Washington Convention Center, an 800,000-square-foot versatile facility located in the heart of the District and designed to accommodate large national and international conventions, trade shows, and meetings. The center officially opened on December 10, 1982, with the first show on January 5, 1983. Fiscal year 1984 will be the center's first full year of operation.

LOTTERY AND CHARITABLE GAMES ENTERPRISE FUND

The committee recommends $2,772,500 in non-Federal funds for the lottery and charitable games control board in fiscal year 1984. This board, Mr. Chairman, is responsible for operating and conducting a lottery and daily numbers game in the District and is authorized to issue licenses for the operation of bingo and raffles. The committee's recommendation is $1,588,000 above the fiscal year 1983 allowance and reflects the resources required to operate and conduct the lottery and charitable games activities. The District government anticipates receiving $40 million from the board's activities for deposit into the general fund during fiscal year 1984.

GENERAL PROVISIONS

The committee recommends the continuation of a number of general provisions that have been carried in the past. These general provisions appear on pages 15 through 23 of the bill and I will mention a few of them briefly. Language has been retained under section 119 of the bill prohibiting the use of Federal funds to perform abortions except to save the mother's life or in cases of rape or incest. This language is identical to that carried in the bill since fiscal year 1980. Section 129 removes District employees from the Federal employee pay ceiling and provides that the pay setting authority shall be the District's Merit Personnel Act as authorized by the Home Rule Act, rather than title 5 of the United States Code which was the pay setting

authority prior to home rule. Language has been added to section 124 modifying the District's reprograming policy. This modification requires that changes in the scope of capital outlay projects be subject to the reprograming policy currently in effect. As noted earlier, the committee has added a new general provision which requires the District government to continue making monthly payments for streetlighting and traffic signal costs until those costs are covered by other means through a program for which all final administrative and judicial determinations have been made.

CONCLUSION

Mr. Chairman, I have attempted to cover the highlights of the committee's recommendations. The committee report is available to Members and explains our actions in much more detail.

The committee held several days of hearings and questioned over 200 witnesses at some length, and let me assure the Members that this is a very tight budget.

The net increase in the general fund operating budget is $78 million or 4.3 percent above the fiscal year 1983 level, and almost all of that is for mandatory costs.

For example, of the $78 million increase, $42.1 million, or more than half is to cover pay adjustment costs; $26.6 million is mandated for the retirement funds for police officers, firefighters, judges, and teachers; and $5.9 million is for payment to the Federal Bureau of Prisons for District inmates housed in Federal facilities.

Mr. Chairman, it does not take a very sophisticated computer to come to the realization that very little of the increase was available for discretionary programs.

I want to take this opportunity to express my deep appreciation to the ranking minority member of our subcommittee, Mr. COUGHLIN. I have had the pleasure of working with the gentleman from Pennsylvania (Mr. COUGHLIN) for the past 3 years and there is no question that he makes my job on this subcommittee a lot easier because when we do not agree on an issue, we can at least be agreeable about it.

I would also like to thank Mr. NATCHER whose long experience as a member of this subcommittee and the chairman for a number of years has been very valuable.

Mr. GREEN of New York brings a lot of expertise to the subcommittee, especially in the area of housing, and he has always been supportive of the bill.

I would also like to thank Mr. STOKES of Ohio; Mr. WILSON of Texas; Mr. LEHMAN of Florida; Mr. SABO of Minnesota, one of the two new members on our subcommittee this year, and Mr. ROGERS of Kentucky, who is also a new member of our subcommittee.

Mr. Chairman, this is a good bill and I recommend it to the Members.

Mr. COUGHLIN. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, let me first congratulate the very able and courageous chairman of the subcommittee. He has done on this bill a superb job, as usual, in balancing the competing interests of, first, those who are in this city not as permanent residents, but in it because it is the Nation's Capital; second, the interests of those who are the permanent residents of this city and who desire to rule themselves; and third, the interests of this subcommittee in assuring that the District of Columbia does not run at a deficit and that it pays off its outstanding indebtedness.

The chairman has bent over backward in accommodating Mayor Marion Barry and the D.C. government, while at the same time preventing the subcommittee from becoming a rubberstamp. We are all grateful and owe him a debt of gratitude for his tact and his good judgment in handling this very difficult situation.

Let me also compliment the staff, Americo Miconi, who probably knows more about the District of Columbia than any other person in this country; Kenny Kraft, who loves working on this bill; and Mary Porter and the other members of the staff.

The D.C. appropriations bill does two things: it appropriates the Federal payment and it appropriates the entire D.C. budget.

The Federal payment in this bill is $361 million. That is the same as it was in 1983 and $25 million less than the President's request, which we just authorized on Monday. It is $27 million below the budget resolution.

Other Federal funds, as the chairman pointed out, include $16,520,000 for water and sewer services furnished to Federal facilities; $52 million for Federal contributions to the police, fire and teachers pension system; and $115 million in loans for the city's construction program.

The bill provides—and it is always amazing to hear this kind of figure, I think—a total of $2,122,000,000 for the District for its budget.

When counting Federal and other grants and reimbursements, a total of $2.8 billion is available.

This is a bipartisan bill. The chairman and I agreed upon everything, including some adjustments to the budget which the chairman has mentioned, but which I want to refer to, too.

The District proposed to charge its customers and the consumers of the District of Columbia for the cost of street lighting in this city. I personally happen to think that is a pretty dumb idea, but this subcommittee did not want to interfere with the District's decision. That is a decision of the City Council. And we did not interfere with the City Council's decision.

The chairman was insistent on that, but the procedure and the implementation of that program was nowhere to be seen. So the chairman simply said, "Well, until they implement the program, we certainly should require the city to pay its bills." And I think the chairman was exactly right on that. That was not interference in the District's government, but that was simply making sure that they pay their bills while they are trying to implement a procedure that they have enacted.

We also included more than $5 million the District had budgeted to pay off the cash portion of its long-term debt. That debt was $296 million in 1982, $20 million of it is to be reduced in 1983. The District of Columbia officials have been put on notice that the committee expects the full $20 million to applied and not spent on other things.

And we increased to $15 million the amount to be applied to that debt in 1984.

□ 1440

I believe strongly that it is a function of this subcommittee and a proper function of this subcommittee to insure that the District does operate on a balanced budget and that it pays off its accumulated debt. That is part of the responsibility under the Constitution of the United States of this Appropriations Subcommittee. It is an important thing because in order to have the District's credit to be good, so that it can appeal to the financial markets, it needs to have a regular, orderly procedure for paying off that accumulated operating deficit.

Third, the city's only fireboat is the only fireboat in the District of Columbia area. Just last week the fire at the Anacostia Naval Annex dormitory, which did $101 million worth of damage, would have been much worse if the District's fireboat had not pumped water out of the Anacostia River with which to aid the fire companies responding to fight the blaze.

The District, historically, has had a tendency to underfund and cut back on those very programs that are important to those who are in this city not as permanent residents but as visitors or as officials of government, because this is the Nation's Capital. It seemed to me pretty absurd to take the five-person crew of that fireboat and reduce it to two people, who would have been unable to man the boat in an emergency. It seems like a drop in the bucket, but an important drop in the bucket, because that fireboat was one of the few things that

can fill the bucket when necessary and combat those fires in this area.

Mr. Chairman, I think it is a good bill that we bring before you. Again, I feel the chairman has done a superb job. I take great exception to the recent editorial in the Washington Post indicating that this was interference of some sort, meddling, or colonialism, or something like that. If ever a chairman bent over backward not to meddle in the affairs of government, it was this chairman who brings this bill before the House. There are others, of course, who complain that we have not interfered enough and that we should be doing more in that area. I think this is a balanced approach. We have interfered only in those areas where we have a legitimate concern as a committee.

Mr. McKINNEY. Mr. Chairman, will the gentleman yield?

Mr. COUGHLIN. I yield to the gentleman from Connecticut.

Mr. McKINNEY. Mr. Chairman, I rise in support of the bill (H.R. 3415) which will provide funding for the operation of the District of Columbia government of fiscal year 1984. I am encouraged by the fact that we are considering this measure relatively early in the year, and it may turn out to be the first appropriation bill to work its way through the process without the threat of a Presidential veto.

Mr. Chairman, as ranking member of the authorization committee for the District of Columbia, I really would like to start by congratulating my good friends, the chairman of the Appropriations Subcommittee on the District of Columbia and the ranking member. I think they have done serious and much needed work. They have been eminently fair. They have not interfered in the affairs of the city, but they have recognized the responsibility of the city for the money that it receives from this Federal entity, the Federal Government. I am very proud of associating with my good friends, the chairman and ranking member. We share the same desires and goals for the District, and I am very happy to endorse for the minority side of the authorization committee their entire effort.

Unlike the situation a few years ago, the committee has been able to work its will on the city's $2 billion-plus budget, and at the same time make very few specific changes in the funding levels requested by the locally elected officials. In the instances where assumptions have been questioned, the committee has exhibited great restraint and has provided the city with the greatest flexibility possible in determining how compliance with committee directives will be accomplished. This type of approach clearly shows strong support for the concept of home rule, and continues a trend that was begun several years ago. I trust the future will be characterized by a furthering of this partnership between Congress, the Mayor, and the Council of the District of Columbia.

There are three specific recommendations which I would like to briefly comment upon. Although the first of these does not involve any funding in the bill, it is perhaps one of the most important items mentioned in the committee report. I am referring to the discussion on pages 4 and 5 of the report concerning financial management in the city, and more specifically the automated financial management system which was established jointly by the city and Congress under Public Law 94-399. I will not belabor the specifics of the issue, since the content of the report is complete in that regard. I will simply state that as a member of the Temporary Commission on Financial Oversight of the District of Columbia, I am pleased to see that the General Accounting Office will conduct a review of the elemental components of the Financial Management System and report back to the Appropriations Committee by May 1, 1984. The results of that review will certainly be of great benefit to the city in determining what systems need revision or expansion. I trust that the final result will not be used to assess blame for shortcomings, but rather will be used to chart a course for improvements which will provide the private bond market with assurances that the city is fully capable of adequate financial management and is capable of issuing bonds.

Another recommendation which merits attention is found on page 41 of the report. Under the account titled "Repayment of general fund deficit" the committee recommends that a total of $20 million be applied toward reducing the city's accumulated deficit of $309 million. Although the city requested and budgeted only $5 million for this purpose, the committee has seen fit to raise the ante to $20 million, the same as the amount recommended for the current fiscal year. The $15 million difference is to be made available by the Mayor through spending reductions or increased revenues. I fully support this directive because it provides the Mayor with the flexibility of identifying the source of the extra $15 million, and it maintains the level of $20 million annually, which if continued into the future will eliminate the entire deficit with the least future impact on the citizens of the District of Columbia. The alternative proposals advanced by the city all involve the issuance of deficit bonds, a concept to which this Member is adamantly opposed.

The final recommendation of the committee that I would like to highlight concerns St. Elizabeth's Hospital, and I warmly applaud the report language found on page 38. There is no question that the city must work as quickly as possible to first, assume responsibility for its share of the costs, based on the number of D.C. residents using the facility, and second, work to assume full control of the facility itself from the Federal Government. However, there is much to be done before those initiatives may come to pass.

It is totally irresponsible to demand that the city, given its current delicate financial condition and the demands on its budget, suddenly double its dollar contribution to the operating costs of St. Elizabeths. A more rational approach, and one that I advocate, is to gradually increase the annual contribution of operating costs from the city, and get the Federal Government to gradually upgrade the facility, so that at some point in the future, the city will be ready to assume the financial obligation of a facility they will run. However, the facility itself must be brought up to standards before we dump it on the city government. In too many instances, the Congress and the Federal Government has done exactly that—dumped a serious problem on the city under the guise of increased local autonomy without providing adequate resources for the city to take over the operation. I do not intend to allow this to happen with respect to St. Elizabeths Hospital, and I am prepared to introduce legislation to prevent another fiasco. At this time, the General Accounting Office is studying this problem, and will recommend action to be taken by Congress and the executive branch.

Again, I applaud the committee for recommending in this legislation a rational and sensible course of action with regard to St. Elizabeths Hospital. I hope our colleagues will recall this provision when the appropriation bill providing funds for the Department of Health and Human Services comes to the floor, and if necessary takes the necessary action to put the two bills in harmony.

In conclusion, Mr. Chairman, I urge support of this bill and I wish to congratulate in particular the chairman of the subcommittee, the gentleman from California (Mr. DIXON), and the ranking member, the gentleman from Pennsylvania (Mr. COUGHLIN), for their leadership.

Mr. Chairman, I yield 5 minutes to the Delegate from the District of Columbia (Mr. FAUNTROY).

Mr. FAUNTROY. Mr. Chairman, I rise in support of H.R. 3415, the District of Columbia appropriation bill for fiscal year 1984. Let me, first, commend our colleague, Mr. DIXON, chairman of the Subcommittee on District of Columbia Appropriations, for his unflagging concern to protect the Fed-

eral interest in the governance of our Nation's Capital and his informed and caring support for the citizens of the District of Columbia.

H.R. 3415 contains $2.1 billion for fiscal year 1984 consisting of $1.8 billion in operating expenses from the general fund, $111 million in capital outlay from the general fund, $114 million for operating expenses for the water and sewer enterprise fund, $11 million for capital outlay for the "Water and sewer enterprise fund," $9.6 million for the "Washington Convention Center enterprise fund," and $2.7 million for the "lottery and charitable games enterprise fund."

The bill provides a total of $544,590,000 in Federal funds. This includes a Federal payment of $361 million which is $25 million below the amount requested. The increase in the Federal payment appropriation has been held up because of the need for authorizing legislation.

On June 27, the House approved my bill, H.R. 2637, which increased the Federal payment to the District from $361 million to $386 million for fiscal year 1984 and thereafter. Thus, the additional $25 million will be available to the District.

I do take exception, however, to a provision in the bill which requires that a total of $20 million be applied toward reducing the District's accumulated general fund deficit which totaled $309 million as of September 30, 1981. H.R. 3415 contains the District's $5 million request plus an additional $15 which the Mayor must identify and make available through reductions in amounts in the bill or through additional revenues.

Mr. Chairman, many of my colleagues were not Members of the House when the District of Columbia was granted home rule. The city's accumulated deficit condition occurred through decades of Federal financial management and budgetary decisions. Its impact became apparent only as the District moved toward financial operations as a separate entity, lacking benefits of the Federal power of deficit financing.

The current administration of Mayor Marion Barry identified the problems posed by the accumulated general fund deficit and moved to take appropriate actions to solve it. Since 1980, the District has:

Formulated and executed balanced general fund budgets in fiscal year 1981 and fiscal year 1982.

Reduced the accumulated general fund deficit by $82 million, including more than the amount referenced in Report 97-747 for fiscal year 1982.

Received clean independent audits in fiscal year 1980, fiscal year 1981, and fiscal year 1982.

Received the important MFOA Certificate of Conformance in Financial Reporting.

Formulated and successfully pursued important technical amendments to the Home Rule Charter borrowing authority.

Successfully issued over $100 million of District of Columbia revenue bonds for academic facility construction and low/moderate income multifamily rental housing.

Formulated and proceeded to execute a balanced fiscal year 1983 general fund budget.

Formulated and passed a balanced fiscal year 1984 general fund budget, with an allocation of $5 million to reduce the accumulated deficit.

Proceeded to adopt a 5-year series of water and sanitary sewerage service rate increases, designed to place the water-sewer enterprise on a balanced basis.

Given the limited powers of the District, I submit that this is clear and substantial evidence of the city's continuing commitment in this matter.

Mr. Chairman, the District has sought to halt the growth of the accumulated general fund deficit and eliminate any remaining accumulated deficit as outlined in the Mayor's 1980 Comprehensive Financial Plan. The city has succeeded with the former, as witnessed by planned and executed balanced budgets. With regard to the latter, the District proposed funding the accumulated deficit through the issuance of general obligation bonds, first to the Federal Government, then to the private municipal bond market. However, the requisite authority for the District to proceed was never appropriately enacted by the Congress.

To require the city to reduce items in its budget by $15 million or raise revenues by a like amount is to ask undue hardship on District taxpayers. I would hope, Mr. Chairman, that when this bill goes to conference, that this requirement might be reduced or eliminated.

Mr. COUGHLIN. Mr. Chairman, I yield such time as he may consume to the gentleman from Massachusetts (Mr. CONTE), the distinguished ranking minority member of the committee.

Mr. CONTE. Mr. Chairman, I rise in support of this bill making appropriations to the District of Columbia for fiscal year 1984. Although there is one aspect of the bill which disturbs me, I think that overall, the agreements reached by the majority and minority on this bill, have produced a funding measure which we should support.

Under the Federal funds category, for the Federal payment to the District to help the city offset the cost of the Federal presence, the committee has provided $361 million, a figure $25 million below the amount requested.

This Federal payment in lieu of taxes will help pay District operating expenses for such things as police, fire and rescue services; operation of the public education system; support for human service programs, public transportation services and a broad range of other programs and services provided by the District Government.

In addition to the Federal payment, other areas under the Federal funds category include a $52 million contribution to the police, firefighters', teachers' and judges' retirement funds;

A $16.5 million payment for water and sanitary sewer services furnished to Federal facilities, and $115 million in capital outlay and loans to the District to assist in financing such programs as correctional facility construction, heating system replacement in public schools, hospital modernization, and various other community enhancement initiatives.

The total amount appropriated by the committee in the Federal funds category is $544.6 million, a figure $20.4 million over the fiscal year 1983 level, and $25 million below the request.

The second category of funds in the bill, District of Columbia funds, consists of the D.C. general fund, which is the city's basic operating budget; the water and sewer enterprise fund; the lottery and charitable games enterprise fund; the Washington Convention Center enterprise fund and capital outlay funds for public building improvements and construction, and water and sewer system construction and rehabilitation.

For fiscal year 1984, the committee has approved nearly $1.9 billion for operation of the District Government out of the general fund. The largest portion of this total is dedicated to three areas of funding: Public safety and justice; the public education system and human support services.

In the public safety and justice portion, the Committee has approved $457.8 million, an increase of $48.6 million over fiscal year 1983. This figure includes increases to accommodate police overtime for court appearances, as well as increases in funds for security coverage at local confinement facilities, commensurate with projected increases in prison population levels, and court ordered levels of security coverage at local institutions.

For the public education funding level, the committee approved $473.6 million, a $34.8 million increase over fiscal year 1983. Within this figure are funding increases to accommodate pay adjustments for the Board of Education activities, and increases in the teachers' retirement fund.

For public education, this funding level will allow the Board of Education to maintain current pupil-teacher ratios, and build upon recent gains in areas of academic achievement, dropout prevention and improved school security.

The third major area of funding is human support services. In this area, the committee has provided a total of $486.7 million for fiscal year 1984. This figure is $19.8 million over the fiscal year 1983 level. The principal increase in this figure is associated with rises in the medicaid and medical charities funding levels to allow various health-oriented programs to continue at existing levels.

Earlier in my remarks, I noted that there is one aspect of this bill which disturbs me—that area is the St. Elizabeths Hospital situation.

In preparing its fiscal year 1984 Department of Health and Human Services budget, the administration assumed that the District Government would pick up a total of $54.5 million in reimbursements to St. Elizabeths for patient care of District residents. In the bill we are considering, the committee has approved a $24.7 million payment to St. Elizabeths, plus an addition of $4.7 million in limitation language, making a total of $29.4 million available for reimbursements to St. Elizabeths Hospital.

That leaves a shortfall of $25.2 million—the difference between the cost of providing patient care to District residents, and the actual amount which the District is paying to St. Elizabeths in reimbursements.

It also leaves a situation where 90 percent of the patients are District residents, with the District only paying 25 percent of the cost of caring for them. That means that either the costs must be picked up in Federal appropriations, or the hospital at some point will have to start scaling down operations.

Mr. Chairman, I am convinced that the funding gap between the operational cost of maintaining care for District residents, and the District's reimbursements, continues to rise. I would like to see the District Government accelerate its efforts, pursuant to past understandings, and work with the Department of Health and Human Services in developing a proposal to accommodate the goal of making St. Elizabeths Hospital an integral part of the District Government's community mental health center system.

I might just say here, Mr. Chairman, that I, and I am sure other members of the committee, would look favorably on any management initiatives on the part of the District government to apply excess revenues or program savings to the St. Elizabeths situation.

Beyond the three major areas of funding I mentioned, another area of funding provided for in the general funds category is the $190.5 million level in public works funding to accommodate such services as repair and maintenance of public buildings, streets, and bridges, and the providing of public transportation services.

We have also provided the latitude to allow the Mayor to further reduce the operating fund deficit by granting him the authority to make available for this purpose, funds he identifies through reductions in amounts in the bill, or from additional revenues. I know this is important to the ranking minority member (Mr. COUGHLIN).

In the capital projects fund, Mr. Chairman, the committee has provided $111.6 million for funding for capital projects in connection with the District's multi-year plan for development, modernization, and replacement of public facilities.

Examples of such projects include fire station replacement, building security improvements, and housing development projects.

The committee has also provided for the operational funds through which water and sewer services are provided to the District. Included in this budget are funds for the District's Washington aqueduct plant which produces and distributes potable water, as well as funds for operating the Blue Plains wastewater treatment plant.

Mr. Chairman, this bill covers many other areas which I will not get into at this time. In conclusion, I would like to say to the gentleman from California (Mr. DIXON) and the gentleman from Pennsylvania (Mr. COUGHLIN), as the chairman and ranking minority member of this subcommittee, you have delivered a good product. I do hope that we can in the near future resolve the problem of the District's reimbursement to St. Elizabeths Hospital.

Mr. DIXON. Mr. Chairman, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from California.

Mr. DIXON. Mr. Chairman, I agree with the gentleman completely. I just feel, and I think the gentleman from Pennsylvania (Mr. COUGHLIN) would agree with me, that the District needs some additional time to work out this situation with the Office of Management and Budget. Obviously, we will have to do something about the $25 million shortfall by the time this bill reaches conference, although I am hopeful it will be resolved before that time. But I want to first give the District the opportunity to establish their priorities, and I am hopeful that by the time the bill goes to conference, this issue will have been resolved.

□ 1450

Mr. CONTE. I appreciate that. That is a fine explanation and, therefore, I will not offer an amendment I had considered offering.

Mr. Chairman, I include in the RECORD at this point a letter from David Stockman, Director of OMB, and a statement of administration policy.

The letters follow:

EXECUTIVE OFFICE OF THE PRESIDENT, OFFICE OF MANAGEMENT AND BUDGET,
Washington, D.C., June 23, 1983.

Hon. SILVIO O. CONTE,
U.S. House of Representatives,
Washington, D.C.

DEAR SIL: On Thursday, June 23, the House Appropriations Committee will consider the District of Columbia Appropriation bill. I want to express the Administration's concern over the Subcommittee's treatment of the District payment to Saint Elizabeths Hospital. Specifically, the Subcommittee decision to cap the payment at $29.5 million (54% of total cost) will seriously impair the ability of the District Government to both finance care for its residents at Saint Elizabeths and meet its legal obligations under Federal court order *Dixon* v. *Schweiker*. Given that fiscal year 1984 is the second of a ten-year phasedown of Federal subsidies to the District, the District Government should gradually assume increasing responsiblity for the funding and direction of mental health services in this city. Consequently, the Administration finds the 54% cap objectionable.

When the full Committee marks up the appropriation bill, I hope you will support efforts to amend upward or eliminate the limitation on the District's use of funds. This will not only assure full delivery of services at the health facility, but also underscore both Congressional and executive branch support for home rule.

Sincerely,

DAVID A. STOCKMAN,
Director.

DISTRICT OF COLUMBIA APPROPRIATIONS BILL, 1984 (DIXON (D), CALIFORNIA), JUNE 24, 1983

The Administration is concerned about the treatment in the bill, as reported by the Committee on Appropriations, of the District payment to Saint Elizabeths Hospital. Specifically, the Committee decision to cap the payment at $29.5 million (54% of total cost) will seriously impair the ability of the District Government to both finance care for its residents at Saint Elizabeths and meet its legal obligations under Federal court order *Dixon* v. *Schweiker*. Given that fiscal year 1984 is the second of a ten-year phasedown of Federal subsidies to the District, the District Government should gradually assume increasing responsibility for the funding and direction of mental health services in this city. Consequently, the Administration finds the 54% cap objectionable.

The Administration will support efforts to amend upward or eliminate the limitation on the District's use of funds. This will not only assure full delivery of services to the health facility, but also underscore both Congressional and executive branch support for home rule.

Mr. COUGHLIN. Mr. Chairman, I yield 6 minutes to the gentleman from Arizona (Mr. RUDD).

Mr. RUDD. Mr. Chairman, I recognize that the distinguished chairman of this subcommittee, the ranking member, and members of the committee and members of the staff worked long and hard and diligently to bring this bill to the floor. I had the privilege of serving on this committee for 2 years and I have had some questions about the manner in which the data

that was obtained from the District government is presented and, therefore, I wish to voice some criticism of the way the bill is put together, but not any criticism of the people who put the bill together.

Mr. Chairman, while I recognize the unique relationship that Washington, D.C., has with the Federal Government, I have strong reservations about the level of funding contained in this bill, H.R. 3415, the fiscal year 1984 District of Columbia appropriations bill.

While the supporters of this bill point out that the appropriation line item entitled "the Federal payment" is $361 million in this bill, this does not come close to the total amount of Federal effort for the Federal city. You must add to that, the payment by the Federal Government for water and sewer services of $16.5 million; a Federal contribution to the city pension fund of $52 million; and Federal loans of $115 million, for a grand total of $544.6 million. Add to this Federal contribution not included in this bill and you find a Federal effort totaling almost $1.1 billion.

Aside from the funding level in this bill, which I will discuss later, I find it ironic that we are lending the District of Columbia $115 million at a time when we are going to have to borrow almost $200 billion to keep the Federal Government running in fiscal year 1984. In addition, part of this appropriation includes over $16 million in revenue sharing. I would ask my colleagues: what revenue are we going to share? We are going to be $200 billion short next year and we plan to share $16 million with the District of Columbia. We certainly have plenty of revenue deficit to share if the District of Columbia would like to come forward and share some of that.

The largest component of the direct appropriations contained in this bill is the Federal payment. What is the Federal payment? For starters, it is a payment that has doubled in 10 years. In 1974, the payment was $185 million, now it will be $361 million.

Second, it is a payment made to the District of Columbia to compensate them for not being able to use the tax base represented by all the Federal buildings here in the Nation's Capital, that seems plausible. But I question how much the presence of all these Federal buildings represents a negative revenue impact for the Federal city. First, the city simply would not exist were it not for the Federal Government. Anyone who has tried to breathe the humid, hot air of a midsummer day would know the swamps upon which this city was built were not ideal. Second, this seat of government draws millions of tourists who spend a lot of time and money to see, walk through, and conduct business in the very buildings the District government cannot tax. Rather than a tax burden, these buildings are an attraction that generate millions and millions in revenue. We need to seriously examine whether, in fact, the federal presence constitutes a tax loss or tax gain for the city of the District of Columbia.

Aside from the fact that the Federal effort has more than doubled in the past 10 years, it should be noted that the population of this city has been declining steadily in that time period.

A study by the tax foundation in 1974 showed a comparison of 50 States and the District of Columbia in the amount of Federal revenues collected contrasted with the amount of Federal aid going into that area. The District of Columbia stood at the bottom of the list, with only 23 cents in Federal revenues collected for every dollar of Federal tax money spent within its borders. Strangely enough, while the amount of Federal assistance to the city has more than doubled in the 10 years after that, the latest estimate, done in 1982 by the tax foundation is that the same relationship for tax effort and tax expenditure in the District of Columbia is the same as in 1974. That is, for every dollar of tax money spent there, only 23 cents are taken out.

The District has grown in that period. We now boast a fine, a large convention center, not to mention the very large convention hotels that are almost unrivaled on the east coast. Yet this drain on the Federal Treasury for this city continues to grow.

I think it is time for the city to look to its own resources for the increasing civic needs of its population and this body should start to look for ways to curb the rate of growth of the Federal subsidy for this city, and put some limits on that overall expenditures by the Federal Government in this city.

Mr. COUGHLIN. Mr. Chairman, I yield 3 minutes to the gentlewoman from California (Ms. FIEDLER).

Ms. FIEDLER. I thank the gentleman for yielding this time to me.

Mr. Chairman, I come to the well this afternoon to make some positive comments about the student achievement scores in the District of Columbia. As a former school board member from Los Angeles, I faced some of the same problems that they have in a large urban district like the District of Columbia.

I would like to offer my commendations to the parents, to the teachers, to the administration, and to the students for the outstanding job that they have done to increase students scores in this community. I think that as we debate the issue of education in the months ahead, it is important for us to look at successes across the Nation, and while this community certainly has some of the most serious problems in terms of large numbers of disadvantaged students, it seems as though they have found a formula for success, one that other communities across this Nation could emulate.

I would like to make a couple of points, if I may, regarding the kinds of things that they have done in the District of Columbia to try to improve student scores. Of course they have, in recent articles most of us have had a chance to read, made some real progress for the students of this community through these efforts.

One of the things that they did, and probably the most important, is that they developed a competency-based curriculum, meaning that students were expected to achieve a certain reasonable level each year, before they were promoted. They took promotion tests, tests which their teachers worked very hard to prepare the students for, and they taught them also how to prepare for the taking of tests, and in the process they were able to achieve a good deal in reading, vocabulary, math, and science.

The reduced class sizes also was a tremendous bonus for the students. The classes are going to be kept down to a 25-to-1 ratio. This, as well as the special efforts of the students themselves, their staff and administrators, and the support of the community, which permitted them to make the hard decisions to implement this kind of competency-based program, are substantial reasons why they have seen tremendous improvement in the achievement scores.

Mr. Chairman, I would like to thank the chairman of the committee, offer him my commendations, for making sure that they have an adequate budget, and also to my colleague on the Republican side for the special commitment that he has made. But most importantly, I would like us all to learn from this success and understand it is not just how much we spend, but it is the way in which we spend the money that we have that makes the difference.

Mr. DIXON. Mr. Chairman, I yield myself such time as I may consume.

The gentleman from Arizona (Mr. RUDD) and I have had detailed discussions as it relates to the Federal payment, so I will not go into those discussions today except to say that I do not want anyone to be misled by some of the comments that Mr. RUDD made, although I am sure that was not the intention.

The Federal payment of $361 million that the gentleman refers to is made to the District in lieu of property taxes on Federal buildings and land here in the city.

The Federal contribution of $52 million to the police, fire, judges, and teachers retirement funds was determined by this House and the Congress when they passed Public Law 96-122,

the D.C. Retirement Reform Act. I believe we should all realize that the retirement programs for the police, fire, judges, and teachers were approved by the Congress—not the District government—on a pay-as-you-go basis. These programs were approved prior to home rule, so it seems only fair that the Federal Government contribute toward funding the unfunded costs of those pension programs that were passed by the Congress.

The $16.5 million for water and sewer services provided to Federal facilities is, in my opinion, a bill owed by the Federal Government to the District of Columbia. The Federal Government is consuming the water and using the sewer services so it should pay for what it consumes and uses.

Now it is true that the District government has been able to borrow 30-year funds from the Federal Treasury. That ability will be eliminated completely in fiscal year 1985, and in this year's bill we have authorized the District to borrow from the Federal Treasury $115 million for which the city will pay the prime commercial rate plus an interest fee. So these funds are not free. For example, this year the District borrowed funds from the Federal Treasury and has to pay 14.2 percent interest, which in any calculation is not a gift to the District. In fact, one might say that the Federal Government is realizing a substantial benefit—it is taking no risk and it is earning 14.2 percent interest.

On those terms, Mr. Chairman, I do not think these Federal funds are really considered as gifts to the District of Columbia.

□ 1500

Again, Mr. Chairman, I thank all the members of the committee for their diligence and assistance in bringing this bill to the floor. I want to especially thank the gentleman from Kentucky (Mr. NATCHER), a very senior member of our committee. I also want to thank the ranking minority member, the gentleman from Pennsylvania, (Mr. COUGHLIN).

I would just conclude by saying that I would certainly like to thank the staff who worked very hard and very long hours on this bill in order to have it ready for the floor in a timely fashion. I want to particularly thank Americo Miconi who became sick while working on the weekend to get the bill and report ready, but notwithstanding his illness, he continued working so that we could have the bill on the floor for consideration today.

Mr. COUGHLIN. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, let me congratulate the gentlewoman from California (Ms. FIEDLER) on her statement. It is so often easy to be critical and then not to recognize something that marks real progress that has been done, and I think it was very worthwhile to have the gentlewoman from California remark on that remarkable achievement and point out that progress is being made in that direction.

Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. The Clerk will read.

The Clerk proceeded to read the bill.

Mr. DIXON (during the reading). Mr. Chairman, I ask unanimous consent that the bill be considered as read and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

The CHAIRMAN. Are there any points of order against the bill?

If not, are there any amendments?

Mr. DIXON, Mr. Chairman, I move that the Committee do now rise and report the bill back to the House with the recommendation that the bill do pass.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker pro tempore (Mr. MURTHA) having assumed the chair, Mr. HERTEL of Michigan, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 3415) making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of said District for the fiscal year ending September 30, 1984, and for other purposes, had directed him to report the bill back to the House with the recommendation that the bill do pass.

The SPEAKER pro tempore. Without objection, the previous question is ordered.

There was no objection.

The SPEAKER pro tempore. The question is on the engrossment and the third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER pro tempore. The question is on the passage of the bill.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. FRENZEL. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant-at-Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 296, nays 124, not voting 13, as follows:

□ 1520

Messrs. ALBOSTA, SLATTERY, and HUGHES changed their votes from "yea" to "nay."

Mr. DOWDY of Mississippi and Mr. SILJANDER changed their votes from "nay" to "yea."

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. DIXON. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks, and include extraneous material, on the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

PERSONAL EXPLANATION

Mr. ACKERMAN. Mr. Speaker, due to official business in the District, I was absent from part of yesterday's proceedings during rollcall votes 222, 223, 224, and 225. Had I been present, I would have voted as follows:

Rollcall vote No. 222, "nay."

Rollcall vote No. 223, "nay."

Rollcall vote No. 224, "yea."

Rollcall vote No. 225, "yea."

REPORT ON RESOLUTION PROVIDING FOR APPOINTMENT AND EDUCATION OF HOUSE PAGES

Mr. MINISH, from the Committee on House Administration, submitted a privileged report (Rept. No. 98-282) on the resolution (H. Res. 234) providing for appointment and education of House pages, which was referred to the House Calendar and ordered to be printed.

APPOINTMENT AND EDUCATION OF HOUSE PAGES

Mr. MINISH. Mr. Speaker, by direction of the Committee on House Administration, I call up House Resolution 234 and ask for unanimous consent for its immediate consideration.

The Clerk read the title of the resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

The Clerk read the resolution, as follows:

H. RES. 234

Resolved, That notwithstanding any provision of law, and until otherwise provided by law, the House of Representatives Page Board shall furnish, by contract or otherwise, educational services and related items for pages in accordance with this resolution.

SEC. 2. (a) Except as provided in subsection (b), a page—

(1) shall be in the eleventh grade;

(2) shall serve for a full academic year; and

(3) shall not have served as a summer page.

(b)(1) Notwithstanding subsection (a)(2), an unforeseen vacancy during an academic year may be filled, but no appointment to fill such a vacancy shall be for a period of less than two months.

(2) An individual who has completed the tenth grade and has not begun the twelfth grade may serve as a summer page. An individual who has served as a congressional page at any time during each of any two semesters shall not be eligible to serve as a page.

SEC. 3. As used in the first section and section 2 of this resolution, the term—

(1) "academic year" means a regular school year, consisting of two semesters;

(2) "page" means a page of the House of Representatives, but such term does not include a fulltime, permanent employee of the House of Representatives with supervisory responsibility for pages;

(3) "congressional page" means a page of the House of Representatives or the Senate; and

(4) "summer page" means a page serving other than during an academic year for a period determined by the Doorkeeper of the House of Representatives.

SEC. 4. The proviso in the text under the heading "EDUCATION OF SENATE AND HOUSE PAGES" in title I of the Urgent Deficiency Appropriation Act, 1947 (2 U.S.C. 88b), shall not apply to minors who are employees of the House of Representatives.

SEC. 5. There shall be paid from the contingent fund of the House of Representatives such sums as may be necessary to carry out this resolution.

SEC. 6. (a) This resolution shall take effect on the date on which this resolution is agreed to, except that section 2 shall apply with respect to pages appointed after that date.

(b) Any individual who, on the date on which this resolution is agreed to, is receiving education under the proviso referred to in section 4 shall be entitled to receive such education through the earliest of the following: the last day of that person's employment, the last day of the school year involved, or June 30, 1983.

Mr. MINISH (during the reading). Mr. Speaker, I ask unanimous consent that the resolution be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

Mr. DINGELL. Mr. Speaker, reserving the right to object, I would like to commend the gentleman for his diligent work in improving the education of congressional pages. The resolution now before the House is a good compromise which is a substantial improvement over H.R. 3034 which was adopted by unanimous consent on May 18 or the previous construction of House Resolution 234 which under a unanimous consent request I objected to the consideration thereof on June 16. As I understand the provisions of the resolution, a Member will be able to appoint a congressional page for either one, two, or three terms consisting of two academic terms and a summer term. It is also my understanding that the resolution requires congressional pages to be juniors in high school. While I would have preferred that both juniors and seniors be afforded the opportunity to serve as congressional pages, I do not intend to object to this provision.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

COMMITTEE AMENDMENT IN THE NATURE OF A SUBSTITUTE

The SPEAKER pro tempore. The Clerk will report the committee amendment in the nature of a substitute.

The Clerk read as follows:

Committee amendment in the nature of a substitute: Strike out all after the resolving clause and insert in lieu thereof the following:

That notwithstanding any provision of law, and until otherwise provided by law, there

shall be paid out of the contingent fund of the House of Representatives such amounts as may be necessary to enable the House of Representatives Page Board to furnish, by contract or otherwise, educational services and related items for pages in accordance with this resolution.

SEC. 2. The page program shall consist of the two terms of the academic year plus a summer term.

SEC. 3. (a)(1) Except as provided in subsection (b), a page serving during an academic year—

(A) shall be in the eleventh grade; and

(B) shall serve for one full term or two full terms.

(2) Except as provided in subsection (b), a page serving during the summer term—

(A) shall have completed the tenth grade; and

(B) shall not have begun the twelfth grade.

(b)(1) An unforeseen vacancy occurring in a page position during an academic year may be filled, but no appointment to fill that vacancy shall be for a period of less than two months.

(2) An individual who has served as a congressional page at any time during each of any three terms shall not be eligible to serve as a page.

SEC. 4. As used in this resolution, the term—

(1) "academic year" means a regular school year, consisting of two terms;

(2) "page" means a page of the House of Representatives, but such term does not include a full-time, permanent employee of the House of Representatives with supervisory responsibility for pages; and

(3) "congressional page" means a page of the House of Representatives or the Senate.

SEC. 5. This resolution shall take effect on the date on which this resolution is agreed to, except that section 3(a)(1)(A) and section 3(b)(2) shall apply to terms beginning after November 30, 1983.

Mr. MINISH (during the reading). Mr. Speaker, I ask unanimous consent that the committee amendment in the nature of a substitute be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

The SPEAKER pro tempore. The gentleman from New Jersey (Mr. MINISH) is recognized for 1 hour.

Mr. MINISH. Mr. Speaker, I yield myself such time as I may consume.

Mr. MINISH. Mr. Speaker, the resolution implements the decisions of the House Page Board concerning a new page education program which will provide our pages with the excellent formal education they deserve. It also responds to the concerns raised by the Speaker's Commission on Pages. This new page education program will complement the excellence of the learning experience pages receive in their work for the House of Representatives.

This resolution provides that each calendar year would be divided into three terms, each of approximately 4 months. The resolution allows a page to serve one or two full academic terms, and the page could also be appointed to serve for a summer term, or part of a summer term.

The resolution provides needed continuity in skilled House floor pages, by allowing a page to serve 1, 2, or 3 terms, insuring overlap.

Finally, because some Members may already in good faith have made outstanding commitments to individuals to become academic term pages who will not be juniors this September, the resolution defers the junior requirement until the beginning of the second 1983 academic term.

The House Page Board, on whose behalf I introduce this resolution, is totally committed to the need to provide our pages with a quality formal education. Therefore, quality education for our pages is the central issue. Although there are Members who have had their differences over the resolution's limitation on the length of appointment of a page, in the greater interest of the formal education of our pages, most of them have agreed that a quality education must and will come first.

This resolution concerns whether or not pages, in spite of the unique requirements of their page duties, are entitled to a quality academic education, or should forfeit educational opportunity for the undeniable excellent learning experience of being a page. I am convinced that the two, page experience and page education, need not be mutually exclusive. They can and should coexist and complement each other to provide our pages with a truely beneficial experience while they are here.

I urge your support of this resolution.

Mr. FRENZEL. Mr. Speaker will the gentleman yield?

Mr. MINISH. I yield to the gentleman from Minnesota for purposes of debate only.

Mr. FRENZEL. I thank the distinguished gentleman from New Jersey. I agree with him in the description of the bill.

This really is a bill emanating from the Page Board which was referred to the House Administration Committee only as a matter of jurisdictional convenience. The minority on the committee congratulates the chairman and the other members of the Page Board for splendid work on this bill and urges its immediate acceptance.

Mr. ALEXANDER. Mr. Speaker, will the gentleman yield?

Mr. MINISH. I yield to the gentleman from Arkansas for purposes of debate only.

Mr. ALEXANDER. Mr. Speaker, I rise in support of the resolution. As the chairman of the Speaker's Commission on Pages, I compliment the work of the committee and the work of the chairman. You have done your duty. I applaud you, sir.

Mr. Speaker, the action of the committee is an exception to the long history of neglect by the Congress in its actions on behalf of the pages. It carries out a deliberate plan which was recommended to be in the best interest of pages. A plan that includes their well-being, their conduct, and their education.

Throughout the years of history that have been written about the Congress the pages are an integral part of the democratic process and indispensible to the smooth functioning of this body. The resolution proposes to reward our pages with a good and proper education. I speak for the pages when I thank you for your excellent work. I support the resolution.

□ 1530

Mr. MINISH. I thank the gentleman.

Mr. Speaker, I yield to the gentleman from Indiana for debate purposes only.

Mr. MYERS. Mr. Speaker, I thank my chairman for yielding this time and rise in strong support of the resolution.

As the previous speaker just stated and I also was a member of the Speaker's Page Commission last year which made a rather indepth examination of our page program and found that we had come up short in many instances, particularly in education. Now, as a member of the Page Board and in fact the lone minority member of that Page Board I thank the chairman and the other members who are all the majority for the courtesies they showed this lone minority member here from the Republican side. But the Page Board has been absolutely nonpartisan. We have had one concern, that is the treatment of our pages who perform a very, very necessary function in this House of Representatives. We have been extremely lucky through the years. But the one think that came out glaring both in the Commission report as well as in our Page Board investigation and study, we are not treating our pages properly as far as education is concerned. This is what our Page Board is trying to do now, give quality education, proper treatment and care for these young people who do such a fine job for us.

I strongly support the committee's recommendations on this particular bill and thank the committee for its courtesies.

Mr. MINISH. I thank the gentleman for his contribution.

Mr. Speaker, I yield to the gentleman from California (Mr. FAZIO) for the debate purposes only.

Mr. FAZIO. Mr. Speaker, I congratulate the chairman. There is never a more difficult task than when one is charged with the responsibility of

making changes in a system that has been encrusted through the years with tradition.

No way could have been found to organize and more properly administer the page program that would have avoided conflict with a number of Members and the traditions in which they had engaged in dealing with pages through the years.

The gentleman who has taken the very difficult job of chairman of this Board has fought through these problems. I think the resolution that we have developed is flexibile and yet does provide for the formalities we need to bring to the page program, the improvements to their health, personal care, as well as their education, which too often had taken second place to the needs of this institution.

The gentleman is to be congratulated for his perseverance, forebearance, and patience in proceeding to this point.

It has been a privilege for me to serve with the gentleman and Mr. MYERS as well. I hope the Members will adopt this product of our efforts and I hope we can continue our cooperative effort with the Senate as well.

I believe we can be proud, at the end of this effort, of having reformed the page program, brought it to something that is consistent with current standards and at the same time preserve this unique institution which has served the Congress of the United States and a fine group of young Americans very well through the years.

Mr. MINISH. Mr. Speaker, let me take this opportunity to thank the gentleman for his remarks and to point out that without the help of Congressman FAZIO and Congressman MYERS, this job would have been insurmountable. Congressman WHITEHURST has also provided important help as chairman of the House Page Board's education task force.

Mr. Speaker, I yield for debate purposes only to the gentleman from Oklahoma (Mr. JONES).

Mr. JONES of Oklahoma. I thank the gentleman for yielding.

Mr. Speaker, I too want to join the others in commending the gentleman from New Jersey and the subcommittee for an outstanding job.

I also commend the gentleman for his willingness to look beyond the near future to an even better Capitol Page School with a broader vision. As we had discussed in a previous conversation, Dr. Hardison, Director of the Folger Library here on Capitol Hill, had made some suggestions which would make the Capitol Page School a model school in the United States. It could draw a third of its students from the pages, maybe a third from the diplomatic or international set, and a third from students drawn around the Washington area.

This could become a laboratory, a model school, perhaps under the direction of the Department of Education. It could become a learning laboratory as well as a model school. I appreciate the gentleman's willingness to listen to that suggestion and perhaps in the future after this current plan is implemented, improving it in those respects.

I commend the gentleman from New Jersey.

Mr. MINISH. I thank the gentleman for his comments. As I indicated to the gentleman earlier that is something that has been referred to the task force under the able leadership of Mr. WHITEHURST.

Mr. Speaker, I move the previous question.

The previous question was ordered.

The SPEAKER pro tempore (Mr. ASPIN). The question is on the committee amendment in the nature of a substitute.

The committee amendment in the nature of a substitute was agreed to.

The SPEAKER pro tempore. The question is now on the resolution, as amended.

The resolution, as amended, was agreed to.

A motion to reconsider was laid upon the table.

GENERAL LEAVE

Mr. MINISH. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislation days in which to revise and extend their remarks on the resolution just agreed to.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

CONSUMER PRODUCT SAFETY AMENDMENTS OF 1983

The SPEAKER pro tempore. Pursuant to House Resolution 227 and rule XXIII, the Chair declares the House in the Committee of the Whole House on the State of the Union for the further consideration of the bill, H.R. 2668.

The gentleman from Missouri (Mr. SKELTON) has been designated as Chairman of the Committee of the Whole, and the Chair requests the gentleman from New York (Mr. GARCIA) to assume the chair temporarily.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H.R. 2668), to amend the Consumer Product Safety Act to extend it for 5 fiscal years, and for other purposes, with Mr. GARCIA (Chairman pro tempore) in the chair.

The Clerk read the title of the bill.

The CHAIRMAN pro tempore. When the Committee rose on Monday, June 20 all time for general debate had expired.

The Clerk will read.

The Clerk read as follows:

SHORT TITLE

SECTION 1. (a) This Act may be cited as the "Consumer Product Safety Amendments of 1938".

(b) Except as otherwise expressly provided, whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Consumer Product Safety Act.

AMENDMENT IN THE NATURE OF A SUBSTITUTE OFFERED BY MR. SHELBY

Mr. SHELBY. Mr. Chairman, I offer an amendment in the nature of a substitute.

The Clerk read as follows:

Amendment in the nature of a substitute offered by Mr. SHELBY: Strike out all after the enacting clause and insert in lieu thereof the following:

That this Act may be cited as the "Consumer Product Safety Amendments of 1983".

SEC. 2. Section 32(a) of the Consumer Product Safety Act (15 U.S.C. 2081(a)) is amended by striking out "and" at the end of paragraph (8), by striking out the period at the end of paragraph (9) and inserting in lieu thereof a semicolon, and by adding after paragraph (9) the following:

"(10) $35,700,000 for the fiscal year ending September 30, 1984;

"(11) $37,485,000 for the fiscal year ending September 30, 1985; and

"(12) $39,360,000 for the fiscal year ending September 30, 1986.".

Mr. SHELBY (during the reading). Mr. Chairman, I ask unanimous consent that the amendment in the nature of a substitute be considered as read and printed in the RECORD.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Alabama?

Mr. DINGELL. Mr. Chairman, reserving the right to object, and I do not think I will object, I would like to inquire of the gentleman from Alabama, is this the same amendment that the gentleman offered in committee?

□ 1540

Mr. SHELBY. Mr. Chairman, if the gentleman will yield, it is exactly the same.

Mr. DINGELL. Exactly the same. No changes whatsoever?

Mr. SHELBY. None, not that I know of.

Mr. DINGELL. Very well.

Mr. Speaker, I withdraw my reservation of objection.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Alabama?

There was no objection.

Mr. SHELBY. Mr. Chairman, we have heard a lot of rhetoric in the last several weeks about the issue before

us today, the reauthorization of the CPSC. Rhetoric about how this is the biggest consumer vote facing Members this session, how a vote against H.R. 2668 would be tantamount to voting against safe toys for children—rhetoric about how severely the agency has suffered under the budget knife of the past two Congresses—rhetoric about how the CPSC is unfairly subject to more restrictions on the public disclosure of information than any other health and safety agency—rhetoric about how the agency will be slowly phased out unless highly unusual minimum personnel ceilings are implemented to resist future possible attacks by the executive branch.

Mr. Chairman, we are still waiting for convincing arguments supporting this ill-conceived measure to surface—the truth is there is no rational argument which can surface to give credence to the Waxman bill. The rhetoric is drowned by the facts.

The Shelby substitute came within three votes of passing in the Committee on Energy and Commerce. The funding levels of $35.7, $37.5, and $39.4 million for fiscal years 1984-86 provide for a fiscally responsible 15 percent aggregate increase in funding over the 3 years. Mr. Chairman, these figures are not only responsible, they are generous, for the Consumer Product Safety Commission itself, in its own fiscal year 1984 budget request, only requested $34.9 million—$34.9 million, Mr. Chairman, an even lower fiscal year 1984 than my amendment provides.

Not only does the Waxman bill, H.R. 2668, exceed the fiscal year 1983 baseline figure of $34 million by a hefty 38 percent, but it exceeds the CPSC's own budget request for $34.9 million by 38 percent.

Mr. Chairman, I think it incredible and absurd that the opponents of my substitute criticize its funding levels as not fully and adequately providing the needed resources for the CPSC, when the CPSC itself has requested no where near the excessive funding level for fiscal year 1984 of $47 million that the Waxman bill calls for. The CPSC says it can carry out its mandate adequately with $34.9 million and a full-time staff of 624. Yet, proponents of H.R. 2668 assert that reductions in personnel over the last 3 years or so have resulted in parallel reductions in vital agency functions. They find especially worrisome the impact of staff reductions on the agency's scientific and technical capability. Mr. Chairman, the Commission itself, refutes the litany of statistics and rationale given to support the argument that more than 624 full-time employees are needed by the CPSC. Mr. Chairman, it is intrusive and presumptuous on the part of Congress to interject itself into this entirely management function. It is congressional arrogance to obstruct executive agency personnel levels decisionmaking. Who are we to set minimum ceilings when the Commission itself affirms its ability to operate sufficiently, protecting the public from dangerous products, at lower levels?

The Shelby substitute is pro-CPSC and proconsumer. The chairman has conveniently forgotten that just 2 short years ago, the committee upon which he served, and the Congress of which he was a Member, implemented several significant changes to the statutes within CPSC jurisdiction, all of which were intended to deal with perceived regulatory abuses of the Commission since its establishment. The criticism of the CPSC, which brought on these changes in 1981, arose not only from industry, as the chairman might want us to believe, but from nearly everyone, including other Government agencies, consumer groups, and Congress itself. These changes were well founded; they were agreed upon by a bipartisan consensus of Members, including the gentleman from California who now offest this wide-ranging bill. Any attempt to portray the changes implemented in 1981 as somehow unfair to the CPSC, anticonsumer or unnecessary is entirely inaccurate. My substitute would preserve intact these important 1981 reforms.

One important 1981 change placed requirements on the agency that prior to the release of non-Commission initiated information pursuant to a FOIA request, the Commission shall take reasonable steps to assure that the information is accurate, and that industry has an opportunity to submit comments in regard to the information to be disclosed.

What can possibly be proconsumer about repealing this requirement to permit the CPSC to release possibly false, misleading, and wholly inaccurate information about a particular product to the general public. Should that information concern a widely used, expensive substance or product, information which reflects negatively upon such a substance or product, released on CPSC letterhead, has the potential to create havoc in the marketplace, costly litigation and no end to consumer distress.

Is it so much to ask of a health and service agency with the vast jurisdictional mandate of the CPSC and the proven ability to do immediate harm to a thriving business, that they meet modest disclosure requirements which lend a higher degree of credibility to the agency itself and the work it undertakes? I certainly do not think so.

Mr. Chairman, I support the preservation of the CPSC, I support the laudable goals of the CPSC and its congressional mandate to protect public safety, acting as a means of preventive medicine for the public and industry, but I adamantly do not support the methods by which H.R. 2668 claims to accomplish these goals. The ill-conceived repeal of current protections and safeguards in place barely 2 years, and the exorbitant increase in funding levels is not sound fiscal policy and does not serve the consumers' best interests. My substitute is fiscally responsible, pro-CPSC, proconsumer, and deserves my colleagues consideration and support. I urge its adoption.

Mr. LUKEN. Mr. Chairman, will the gentleman yield?

Mr. SHELBY. I yield to the gentleman from Ohio.

Mr. LUKEN. I thank the gentleman for yielding.

I would like to ask the gentleman if the language to which he has referred to, which is in the legislation, which says as follows: "The Commission shall employ on a permanent basis not fewer than the full-time equivalent of 650 officers and employees." Whether that language is not unprecedented, to say the least, "not fewer than."

Mr. SHELBY. It is unprecedented as far as I know. I have not researched everything, but I have not seen that in any legislation that we have dealt with on the committee. I know some of the Members have been there longer than I have.

Mr. LUKEN. If the gentleman will yield further, I have seen some research that has been made as to a partial list of statutes setting personnel levels. My observation is that for the most part they refer to military statutes establishing a certain personnel level, authorized level of personnel, and that this is just about the only one which is so blatant as to say that the "Commission shall employ not fewer than."

The CHAIRMAN pro tempore. The time of the gentleman from Alabama (Mr. SHELBY) has expired.

(At the request of Mr. LUKEN and by unanimous consent, Mr. SHELBY was allowed to proceed for 3 additional minutes.)

Mr. LUKEN. If the gentleman will continue to yield, it seems clear that if under this legislation, if the Commission were able, because of a slow year or because of a slow period for many reasons, not enough accidents reported, for any reason, that it did not really need the level, the authorized strength which is not fewer than 650, that the Commission would be obliged by this legislation to waste the taxpayers' money.

Mr. SHELBY. That would be my understanding of it. I do not see how we as Members of Congress can mandate functions for management personnel around the country in a situation like this. I believe this is clearly a job for the executive branch of Government.

Mr. LUKEN. If the gentleman will yield further, it occurs to me that

there has been a great deal of conversation because of the Supreme Court decision about a week ago about separation of powers, the legislative veto.

□ 1550

I would want to emphasize that I, for one, am not just talking about the sometimes technical aspects of separation of power. But what we have here is a precedent-setting move by the Congress to say that a commission must employ "not fewer than" a certain number. I think it is a dangerous precedent. I think, despite anything else that might be in the legislation—and I associate myself with much of what the gentleman has said—that is an indication of the tenor, the thrust of this legislation, and I would support the gentleman's alternate suggestion.

Mr. SHELBY. I would like to point out one other thing. The Commission itself did not ask for these personnel management mandates. They did not do it, and I do not think that we should do that.

Mr. WAXMAN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in opposition to the Shelby substitute. This is perhaps the most important consumer vote facing the Members in this session. According to the recent Lou Harris poll, the American public strongly supports the Consumer Product Safety Commission. In fact, almost half of those surveyed wanted to strengthen CPSC, and an overwhelming 88 percent wanted the agency to provide greater safety for children's toys.

The committee bill, H.R. 2668, responds to this public demand for greater product safety by giving CPSC adequate funding, staff and authority to protect the public. The Shelby substitute cuts the funding in the committee bill by over $60 million. It offers no protection against further staff cuts, makes no regulatory reforms, does not provide greater toy safety and continues the gag on the agency when information is requested under the Freedom of Information Act.

The Shelby substitute should be rejected because it is anticonsumer, anti-CPSC, and anti-industry.

Let me explain why I make this charge. First, the Shelby substitute cuts the funding levels in the committee bill by over $60 million. H.R. 2668 adopted a level of funding equivalent to what the agency had in fiscal year 1981, because that is the amount of money the agency needs to protect the public against dangerous products. The budget cuts imposed upon CPSC since fiscal year 1981 have drastically reduced product safety in the marketplace. Agency inspections have decreased by 44 percent; recall checks are down 64 percent; investigations have dropped by 14 percent. The cuts have also forced the agency to delay many important safety activities.

For example, CPSC was forced to postpone research needed to upgrade a 30-year-old flammability standard for wearing apparel because they did not have the funds to do it. Even public education and information activities have been severely curtailed. The agency had to decline invitations to make information available about hazardous products because they did not have enough funds. They had to shift their funding back and forth simply to stay alive.

The Shelby substitute does nothing to redress this lack of safety in the marketplace. It merely perpetuates an already bad situation.

The Shelby substitute extends the agency for 3 years. We have tried to give it a longer period of time so that they could make important management decisions.

The Shelby substitute does not protect CPSC from further crippling staff cuts.

The General Accounting Office reports that the agency has lost 32 percent of its technical and scientific staff. How can this agency protect the public if it has lost 32 percent of the scientific staff to advise them about hazards in consumer products? Rather than replace this lost technical talent, OMB has proposed even deeper staff cuts.

Industry recognizes that these staff cuts mean that CPSC cannot protect the public from dangerous products. For example, under the current law, companies are required to tell CPSC when one of their products has a defect which poses a substantial hazard to the public. This is so CPSC can work with the industry to develop a voluntary standard to correct the problem. But the reports to the agency have dropped by 52 percent. Companies apparently realize that cuts in the agency's field staff make it unlikely that they will ever find out about these dangerous products.

The cuts in staff also hurt the industry. When the good name of a product is called into question, we ought to have a CPSC that can investigate the allegations and resolve the issue quickly and correctly. Denying the agency adequate technical staff prevents it from making these fast determinations. It also increases the possibility of error, and this ill serves the business community, as well as the consumer.

Fourth, the Shelby substitute simply eliminates many of the rulemaking reforms in H.R. 2668. It strikes the provision in H.R. 2668 which allows the agency to recall dangerously defective toys.

Under current law, some manufacturers must advise the agency when one of their products is dangerously defective. But this provision does not apply to most toymakers. While greater toy safety is supported by 88 percent of the American people, in a recent Lou Harris survey, the Shelby substitute drops this provision that would lead to greater toy safety.

The CHAIRMAN. The time of the gentleman from California (Mr. WAXMAN) has expired.

(By unanimous consent, Mr. WAXMAN was allowed to proceed for 5 additional minutes.)

Mr. WAXMAN. The Shelby substitute further strikes the provision in H.R. 2668 that permits the Commissioners of the agency to write opinions of agency's actions without getting clearance from industry. Can you imagine that? The Consumer Product Safety Commission, if it wants to give out information in its files, it has to go to industry and ask them if it is OK. Industry quite often, as you might expect, will say, "No, I do not want the public to know about these complaints about dangerous products until you have gone through a very exhaustive procedure." After that period of time, which could involve months, if not years, I do not know how many additional consumers may be injured because the public is not even informed that there is product that is causing injuries or at least from which many people have been injured.

The Shelby substitute strikes the provision in H.R. 2668 that permits the Commissioners to write their opinions. It strikes the provisions which permit the agency to respond to requests for information under the Freedom of Information Act in the same manner as every other health and safety agency. We are not changing the law to give the CPSC any different standing but to bring it in par with every other health and safety agency in the Federal Government under the Freedom of Information Act.

H.R. 2668 makes a modest change to permit the agency to release information other than confidential or trade secret information. That is still being protected.

Mr. Chairman, the American public expects greater product safety. H.R. 2668 responds to that demand by giving the agency adequate funding and staffing and authority.

The Shelby substitute does not. It maintains the budget and staff cuts that have caused a decline in product safety. It does not ease the regulatory burdens on industry, it does not provide greater safety regarding toys, as demanded by an overwhelming majority of the public.

I urge all of my colleagues to support the bill and to reject the Shelby substitute for the sake of consumers and of industry.

Mr. BROYHILL. Mr. Chairman, will the gentleman yield?

Mr. WAXMAN. I yield to the gentleman from North Carolina.

Mr. BROYHILL. The gentleman has made a statement that I think perhaps he would like to correct, because he was implying that manufacturers could somehow legally hold up information which would reasonably support a conclusion that there is a defect in their product.

Now, the gentleman knows that under section 15(b) of the law every manufacturer that receives information that there is a defect in his product must immediately inform the Commission.

Mr. WAXMAN. If I might reclaim my time, the gentleman is abosolutely correct in his statement of the law. But if we do not have people out in the field to go out and check on what is going on, I think the gentleman understands that, despite all of the laws that we have on the books dealing with a lot of restraints on behavior, there are people who are going to be more likely to break the law and ignore their mandate under the law because they do not expect they will ever be caught.

□ 1600

We want the CPSC to have enough funding to hire staff to go out and do the investigations and make sure that the business community is responding.

Mr. BROYHILL. Mr. Chairman, will the gentleman yield for a comment?

Mr. WAXMAN. I yield to the gentleman from North Carolina.

Mr. BROYHILL. I thank the gentleman for yielding.

Mr. Chairman, as the gentleman well knows, most of the products that have been taken off the market, the vast majority of them unsafe products, have been as a result of the reporting of the manufacturers and not because of staff of the CPSC.

Mr. WAXMAN. The gentleman is absolutely correct in that statement. The way the CPSC has worked is in cooperation with industry. They have responded well to that statutory framework in the law because they know the CPSC has authority to go ahead with rulemaking and they have urged them to go along further with the requirements that the public expects.

But unless the agency has enough staff, scientifically, to determine what is going on, whether the agency has enough enforcement officials, I think we are going to find a breakdown in the fabric of this legislation. In fact, we have already seen it since we have the dramatic cuts in 1981 and 1982.

Mr. LUKEN. Mr. Chairman, will the gentleman yield?

Mr. WAXMAN. I yield to the gentleman from Ohio.

Mr. LUKEN. I thank the gentleman for yielding.

Mr. Chairman, I point to the gentleman and Members of the House that, as the gentleman from Alabama (Mr. SHELBY), indicated, this amendment came within three votes of passage in the full committee. So it is not a far-out proposal. It was very well debated in the committee.

But one item I do not recall was debated in the committee is the one that was just brought up before and I would like the gentleman to address it, because I do not recall, and I have not been able to find, anything that goes this far in restricting an agency in saving the taxpayers' money, inefficiency, that the language says, and I am wondering if the gentleman really supports this.

The CHAIRMAN. The time of the gentleman from California (Mr. WAXMAN) has expired.

(On request of Mr. LUKEN and by unanimous consent, Mr. WAXMAN was allowed to proceed for 3 additional minutes.)

Mr. LUKEN. I have not been able to find anything that says that the Commission must employ not fewer than the full-time equivalent of 650 officers. In addressing that question, it just does not set an authorized strength; it says "not fewer than." So if they do not have the work at any given time, they are going to have to keep up the payroll and pay people to loaf, or shuffle papers, or do whatever.

Mr. WAXMAN. Mr. Chairman, if I may reclaim my time, I certainly would not want them to have people on the payroll who were not working, and we are not trying to require that of them. No one here would want that.

But as we had pointed out to us in the hearings in the subcommittee, and as we had pointed out in the markup in the subcommittee, because this issue was definitely discussed in subcommittee, we have seen the Office of Management and Budget try to squeeze down on the staff of the Consumer Product Safety Commission to the point where I believe they are trying to jeopardize the ability of that agency to respond to its mandate.

We put in a provision saying that if the money is available and the CPSC can use that money for staffing, as they have claimed they well can, we do not want the Office of Management and Budget coming in and saying, "Even though the Congress has approved this, we are not going to let them hire this additional staff."

Mr. Chairman, I would like to point out for my colleague's benefit that we have had a history with this agency. In 1981 this was the first regulatory agency up for reauthorization and the Reagan administration said, "Let us kill it. Let us abolish it." And then they saw they could not accomplish that result and they said, "Let us remove it as an independent agency. Let us put it within the Department of Commerce," and, of course, that would have just been a way to bury that agency so they could not function. We were able to oppose that successfully, but we still have, and I believe this is a fair statement to make, an Office of Management and Budget that has declared war against the Consumer Product Safety Commission and has done everything it could possibly do to hamper it. That is why we have that provision in there.

Mr. LUKEN. Mr. Chairman, if the gentleman would yield further, I believe the court said something, or one of the Justices said something about the Founding Fathers have decided that there are more important values than efficiency sometimes, in the legislative veto case.

I appreciate what the gentleman is saying and what his point of view is, and he may well be right in that respect with regard to his position vis-a-vis the OMB and their actions here, but do we really want to go far enough, this Congress, to set a precedent, and I am asking the gentleman how far he wants to go in other statutes, in setting a floor on personnel that an agency will handle? Is this going to be a precedent? Are we going to be doing this every time we have a conflict with Dave Stockman?

Mr. WAXMAN. Mr. Chairman, if I may reclaim my time, I think the Consumer Product Safety Commission has been an unprecedented case. The administration has gone out of its way to try to hurt this agency. They tried to abolish; they could not. Now they are trying to set barriers upon it. And I believe that we need to, and Congress make clear, that we are supporting the overwhelming public opinion that says they want an independent Consumer Product Safety Commission to look at safety, and we ought to protect it.

The CHAIRMAN. The time of the gentleman from California (Mr. WAXMAN) has again expired.

(On request of Mr. LUKEN and by unanimous consent, Mr. WAXMAN was allowed to proceed for 2 additional minutes.)

Mr. LUKEN. Mr. Chairman, if the gentleman would yield further, I would finish on that point very quickly.

I made the points. I think it is obvious, and rhetoric is not necessary. We do have a division of powers and we do not have complete efficiency, and I understand what the gentleman is trying to get at, but I do not think we want to set a precedent for the FTC, for the EPA, and for all of these other agencies that the administration does not seem to like and they want to crack down on, just because we have that particular problem.

I think we should look further down the road rather than to set a precedent and say we are going to employ

fewer than. I wish the gentlemen would agree to some kind of an amendment.

Mr. WAXMAN. Mr. Chairman, if I may reclaim my time, I would refer the gentleman to the charts that we have here. They show a drastic reduction in the technical staff and in the ability of the Consumer Product Safety Commission to carry out its job. We have heard this from the members of the Commission, some of whom were appointed by the President. This is an independent regulatory agency. It is not part of the administration itself, and one way for an independent agency to be made less independent is for an administration, working through the Office of Management and Budget, to try to reduce its personnel levels, even if the Congress authorizes and appropriates sufficient funds to employ those people, because they do not want them to go out and enforce that law as successfully as we want them to when Congress passed this legislation.

Mr. DANNEMEYER. Mr. Chairman, will the gentleman yield?

Mr. WAXMAN. I would be pleased to yield to my colleague, the gentleman from California.

Mr. DANNEMEYER. I thank the gentleman for yielding.

Can the gentleman point out to the Members of this body who are here any other agency of the executive branch of Government where the Congress has precised and stipulated that there be a certain minimum of employees in that particular agency for the performance of its mission?

Mr. WAXMAN. I have before me a partial list of statutes setting personnel levels.

The CHAIRMAN. The time of the gentleman from California (Mr. WAXMAN) has again expired.

(On request of Mr. DANNEMEYER and by unanimous consent, Mr. WAXMAN was allowed to proceed for 2 additional minutes.)

Mr. WAXMAN. Mr. Chairman, I have before me the authorization and appropriations for the Nuclear Regulatory Commission, which was Public Law 96-295; the Coast Guard Authorization Act of 1982; the Council on Wage and Price Stability; the Department of Defense Authorization Act; Intelligence Authorization Act; Small Business Administration; Supplemental Appropriations Rescission Act of 1981; Veterans' Health Program Extension Improvement Act; Veterans' Disability Compensation, Housing and Memorial Benefits Amendments of 1981.

These are statutes that have some kind of personnel levels set in them.

Mr. DANNEMEYER. If the gentleman will yield further, do the agencies or offices the gentleman has just read each provide by an act of Congress what the level of staffing shall be? Is that what the gentleman is saying?

Mr. WAXMAN. In many cases we do spell that out; in other cases, we try to express the congressional will on what we expect those agencies to do and the staffing levels we expect them to have.

Mr. DANNEMEYER. Is the gentleman representing that in each of the agencies he has just related, that Congress has stipulated the precise minimum of employees which shall be employed in those agencies?

Mr. WAXMAN. No, I am not, and, of course, as I pointed out to our colleague from Ohio (Mr. LUKEN) the CPSC is an exceptional case.

Mr. DANNEMEYER. It is unique.

Mr. WAXMAN. And that is why I believe we ought to take this exceptional measure of providing a guarantee of staffing that the Consumer Product Safety Commission I think needs in order to do its job. If you look at the chart that we have here, it shows that tremendous reduction in personnel, scientific, and technical staff. I cannot see how anybody can argue that they are able to do their job. I know industry comes in and complains all the time. They want a fast decision. They do not want to wait around because CPSC cannot get to their case because they do not have enough personnel to deal with it.

Mr. DANNEMEYER. Mr. Chairman, if the gentleman will yield further, the gentleman did not come right out and say that the Reagan administration is opposed to the CPSC, but one could possibly get the impression from what words the gentleman did use that perhaps the gentleman is making that statement with respect to the Reagan position.

The CHAIRMAN. The time of the gentleman from California (Mr. WAXMAN) has again expired.

(On request of Mr. DANNEMEYER and by unanimous consent, Mr. WAXMAN was allowed to proceed for 2 additional minutes.)

Mr. DANNEMEYER: Just let me state my question.

Is the gentleman aware that a letter dated June 22, 1983, signed by David Stockman, is supportive of the continued existence of the CPSC and in support of the Shelby amendment in the nature of a substitute? Is the gentleman aware of that?

Mr. WAXMAN. Mr. Chairman, if I may reclaim my time, of course they are in favor of the Shelby substitute because it further cuts the Agency's funding.

□ 1610

I must admit to the gentleman that when I made the charge that the Reagan administration is unfriendly and has been actively hostile to the CPSC, I stand by that position, because they absolutely wanted to abolish it in 1981. When they could not do that, they wanted to put it in the Department of Commerce. They did not want it to be independent and the way they want to destroy its ability now is to be able to cut back on its funding and its personnel levels so that they cannot deal with their job.

Mr. DANNEMEYER. Mr. Speaker, will the gentleman yield further?

Mr. WAXMAN. Yes.

Mr. DANNEMEYER. Is the gentleman aware of a letter from Vice President BUSH, dated June 22, 1983, in which he speaks on behalf of the Presidential Task Force on Regulatory Relief, that he is supporting the Shelby substitute for the continued existence of the CPSC? Is the gentleman aware of that?

Mr. WAXMAN. I do not deny the fact that the Reagan administration is supporting the Shelby substitute, that he is in effect offering the Republican administration's position.

I say to those who care about the CPSC, as Members of Congress, if we want to support a Consumer Product Safety Commission in a nonpartisan way, we ought to back this agency up. We did that in 1981 when it was the Reagan administration recommendation to abolish the agency and Democrats and Republicans joined together to say, "We want to have that agency, because we know our constituents support this function of government." That is to look at products and find out if they are going to harm people, to look at toys and see if babies are going to be injured by a trunk that will fall down and bang them on the head or other toys that may explode, other hazards that we can sue after the fact, in some cases to recover under the liability; but we certainly would like to prevent those injuries.

Mr. DANNEMEYER. Mr. Speaker, I thank the gentleman.

Mr. BLILEY. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of the Shelby substitute.

As a member of the Committee on Energy and Commerce and of its Subcommittee on Health I was active in every stage of the consideration of this legislation. Some of my colleagues have ably pointed out the faults of the bill as reported: funding levels millions of dollars above the administration request; requiring employment levels that tie the hands of the Commission and the entire executive branch; relaxation of information disclosure restrictions that could result in the release of inaccurate information; allowing amendments to existing rules to circumvent the normal regulatory process; and, allowing CPSC to assess civil penalties in defiance of a court order.

I would like to relate to my colleagues two reasons why I believe the Commission is simply not equipped to

handle such a broad expansion of its regulatory powers and discretion. In the handling of at least two cases, the Commission has demonstrated itself virtually incompetent to handle its current regulatory authority, much less these new powers.

First, let me bring to my colleagues' attention the ureaformaldehyde foam insulation case. It has been alleged that ureaformaldehyde foam can cause cancer. Yet formaldehyde is among the most ubiquitous substances in our society. My own family has used it in their business for a hundred years without a single case of cancer. The British medical community, among others, found the CPSC's eagerness to regulate this substance to be incredible. The CPSC regulated not based on scientific evidence, but on a few hearsay incidents. At the beginning of this proceeding, ureaformaldehyde foam insulation represented a $189 million per year growing business, mostly composed of small businessmen and women. For consumers the product offered an inexpensive, and often for older homes the only practical, means to save energy.

The Commission's sloppy behavior in this case was recognized in a unanimous decision by a three-judge panel in the fifth circuit which totally overturned the CPSC's ban on urea-formaldehyde foam. Of course, it's too late for the thousands of small businesses that are now bankrupt. Still, the CPSC refuses to yield. Last week they turned down a request to rehear the formaldehyde case, even though they have yet to decide, after several extensions, whether to appeal the fifth circuit ruling.

The fifth circuit found that the Commission erred in so many ways it is difficult to count: They failed to establish a record of sufficient scientific evidence; they failed to allow opponents of the rule the hearing they are by law entitled to; they acted under the wrong statute.

This type of ban, affecting thousands of small businesses and millions of homeowners should not be undertaken lightly. Only 19 such bans have been approved in the 10-year history of the Commission: that's only two a year, and I hardly think it unreasonable to expect the Commission to comply with its governing statute that often.

The bill before us addresses this problem not by telling the Commission to shape up, but by specifically providing that in the future, such sloppy regulatory efforts as the formaldehyde case will be OK as far as Congress is concerned.

In light of the Supreme Court's recent ruling on the legislative veto, it is even more important to preserve the type of procedural safeguards as the substitute would do rather than erode them as the committee's bill intends.

In the second case, I would like to point out to my colleagues the Commission's sorry record in complying with previous mandates of Congress. Two years ago we told the CPSC to revise their rulemaking process with a number of specific steps. It was only on the 17th of this month, 2 years later, that the Commission even proposed regulations to implement our last reauthorization. The committee's bill proposes to overturn many of those changes ordered by Congress 2 years ago before they even go into effect, much less before they are given a proper amount of time to be tried and tested.

The Commission's demonstrated and repeated contempt for Congress, science, businesses and even the public has been well-demonstrated. Procedural safeguards against rabid regulation by rumor are necessary. Those safeguards would be merely preserved by the Shelby substitute, they would be gutted by the committee's bill, I urge my colleagues to support the substitute.

The CHAIRMAN. The time of the gentleman from Virginia (Mr. BLILEY) has expired.

(On request of Mr. LUKEN, and by unanimous consent, Mr. BLILEY was allowed to proceed for 2 additional minutes.)

Mr. LUKEN. Mr. Chairman, will the gentleman yield?

Mr. BLILEY. I yield to the gentleman from Ohio.

Mr. LUKEN. Mr. Chairman, I think something more might be said in view of the discussion by the gentleman from California about the level of authorization here. As a practical matter, is it not true that the administration requested $34 million for the ensuing year, that the level under the Shelby substitute is $35 million, a slight increase, and that the bill which we have would be a significant increase to, I believe, something like $47 million.

Mr. BLILEY. That is correct.

Mr. LUKEN. So that what we are talking about, therefore, is not a decimation of the Consumer Product Safety Commission as it now exists or as it has existed or as it was authorized by this Congress a couple years ago, but we are talking about basically a continuation of the levels of authorization which were envisioned at that time.

Mr. BLILEY. That is correct.

Mr. SHELBY. Mr. Chairman, will the gentleman yield?

Mr. BLILEY. I am happy to yield to the gentleman from Alabama.

Mr. SHELBY. Mr. Chairman, I thank the gentleman for yielding.

The gentleman mentioned a few minutes ago about the repeal of the procedural safeguards. I think we are dealing with basic substantive law here.

Does the gentleman realize that the procedural safeguards that would be repealed by the Waxman bill would be the right to cross examine witnesses, which is basic to this country; the application of formal rules of evidence, that would be abolished; the right to an automatic stay of regulations pending judicial review. Those kinds of things bother me and I know they bother the gentleman from Virginia.

Mr. BLILEY. Mr. Chairman, if I may reclaim my time, that is exactly what the Fifth Circuit Court said in its three-judge panel. I do not think we should take any man's livelihood away without him having the right to question and examine witnesses.

Mr. WAXMAN. Mr. Chairman, will the gentleman yield?

Mr. BLILEY. I am happy to yield to the chairman.

Mr. WAXMAN. Mr. Chairman, I do not know if the gentleman is aware of the fact that the Reagan administration has said that section 701(e) rulemaking provisions are so cumbersome that they propose limiting their use and following instead the procedures that have been set out in this bill for banning poisonous ingredients in foods.

I think the gentleman is defending a procedure that has been unworkable. I think all those safeguards are in the law now in the way that the administration thought was appropriate for the Food and Drug Administration.

Mr. BLILEY. I am not aware of it.

The CHAIRMAN. The time of the gentleman from Virginia has again expired.

(At the request of Mr. SHELBY, and by unanimous consent, Mr. BLILEY was allowed to proceed for 5 additional minutes.)

Mr. BLILEY. I am not aware of that; but however, I think the statement of the court in the UF case is far more compelling in this instance. Poisonous food is one thing, but we are talking about a rule that was put in where clear evidence has not been shown that it would have the effects that the CPSC alleges.

Mr. BROYHILL. Mr. Chairman, will the gentleman yield?

Mr. BLILEY. I am happy to yield to the gentleman from North Carolina.

Mr. BROYHILL. Will the gentleman from Virginia ask the gentleman from California if he proposes that for the FDA, why he has not introduced that legislation and called for hearings and markup with respect to the Food and Drug Administration?

Mr. WAXMAN. Mr. Chairman, will the gentleman from Virginia yield?

Mr. BLILEY. I am happy to yield.

Mr. WAXMAN. Mr. Chairman, let me just respond to the gentleman from North Carolina.

I think the administration has a good point when they talk about the

cumbersome proceedings. At the FDA there are two major 701(e) proceedings dealing with peanut butter and labeling requirements for foods for special dietary uses that took over 10 years.

□ 1620

That is why the Reagan Administration says the 701(e) procedures are too cumbersome. I agree with them, and let us not burden the CPSC with a procedure that may take 10 years before it can protect the public from a dangerous product.

Mr. BROYHILL. If the gentleman would yield, would that mean that the gentleman from California is ready with some needed reforms in the regulatory process of the Food and Drug Administration?

Mr. WAXMAN. If the gentleman will yield, I am always prepared to discuss reforms in the food and drug area and other areas within our jurisdiction.

Mr. BROYHILL. I will wait and see as to whether or not the gentleman will be consistent in his views as they apply to the Food and Drug Administration and his colloquy here, and also as it applies to the Consumer Product Safety Commission.

Mr. WAXMAN. If the gentleman will yield, I would point out to the gentleman from Virginia that when you talk about the funding levels, you are talking about an agency that was cut about 25 percent in 1981. If you use that cut, which crippled them so badly, as the base for the wholesale cut in funding, then I think——

Mr. BLILEY. If I may reclaim my time, I think a 38-percent increase as proposed in the chairman's bill is excessive.

Mr. SHELBY. Mr. Chairman, will the gentleman yield?

Mr. BLILEY. I will be happy to yield to the gentleman from Alabama.

Mr. SHELBY. I appreciate the gentleman yielding.

I wanted to make a further comment on what we were talking about a moment ago, and that is the regulatory procedure changes in the Waxman bill. I know the gentleman from Virginia has read and I know he is familiar with this because we were in the committee, but it is my understanding now under the Waxman bill, if it became law, that when CPSC takes regulatory action, that is banning of a product on the market under the FHSA, they will now be permitted under the Waxman bill, if it becomes law, to use informal notice and comment with opportunity for oral presentations and rulemaking rather than the presently required more formal adjudicatory type proceedings that the gentleman and I are talking about. In other words, it would make it easy to ban products, ruin businesses, put people out of work, and I am not sure that it is going to help the American consumer any more.

Mr. BLILEY. I agree with the gentleman and thank the gentleman and yield back the balance of my time.

Mr. BROYHILL. Mr. Chairman, I move to strike the requisite number of words and rise in support of the substitute offered by the gentleman from Alabama.

Mr. Chairman, I am in favor of the amendment that has been offered by the gentleman from Alabama (Mr. SHELBY). I support it for two reasons, one of which is, of course, that I do believe that the Consumer Product Safety Commission should be reauthorized and I support the years in the Shelby amendment, and I support the dollar levels that are specified in that amendment.

But the second reason I support the gentleman's amendment is that I am concerned about the numerous amendments that are contained in the gentleman from California's bill. I think that those provisions are so bad that they fall under their own weight and they deserve to be defeated.

I would point out to the Members that this Commission does have very broad jurisdiction. They have jurisdiction over thousands and thousands of consumer products and some 2½ million manufacturers of consumer products for the marketplace who are under the jurisdiction of this Commission.

So I mention that just to underscore the importance of making sure that we as legislators are making those decisions today to make sure that this commission is making then, later on, decisions in our name. In other words, we have given them lawmaking powers, and it seems to me that we should be very careful as we delegate those lawmaking powers to these independent commissions, especially because now the legislative veto which is contained in the basic law has been repealed and has been overturned by the Court last week.

So there again we should be far more careful as we delegate the lawmaking powers to these independent agencies.

I would point out two or three concerns very briefly that I have about the bill that is before us and why I support the amendment offered by the gentleman from Alabama.

First, the Waxman bill increases the authorized funding by a fiscally irresponsible 58 percent. Also, in addition, it unwisely interjects the Congress into management functions by establishing minimum employment levels.

That is the first time in my experience that I have seen that. It may be that there are one or two programs around here where we have done that, but this is the first time I have seen it.

It also statutorily doubles the number of field offices. As a member of the committee I have no idea as to the need for increased field offices. There are no other health and safety agencies that I am familiar with that have been accorded this kind of treatment; that is, minimum employment levels and statutorily writing into the law the number of field offices that would be required for that particular agency.

I think just that one area alone would invite a veto. It would seem strange to me if the gentleman is serious about getting reauthorization of this commission that he would want to invite a veto.

It would seem to me that he would want to work in a bipartisan way to get this commission reauthorized so that it could continue doing the job it is mandated to do and that is to protect consumers from unsafe products that are out there in the marketplace.

I would point out to the Members that the part of the law that has resulted in the recall of more products than any other part of the law is section 15(b) which is the self-reporting requirement. It requires the manufacturers to report on themselves if they determine and find that there is an unsafe product, there is a defect in the product that they manufacture out there in the marketplace. It is this self-reporting that has resulted in the recall of some hundreds of millions of products from the marketplace, and not the agency employees who are out there inspecting or working to make inspections out in the marketplace.

Mr. Chairman, I could go on and on, but in the interest of time I will stop here and hope that the Members will vote for the Shelby substitute which is a reaffirmation of the support for the commission, but at the same time would amend out these troublesome amendments that have been put in by the gentleman from California.

● Mr. FRENZEL. Mr. Chairman, I rise in opposition to H.R. 2668, and in strong support of the Shelby-Broyhill substitute Consumer Product Safety Commission reauthorization bill.

The committee bill calls for a 50-percent increase in funding, a spending binge unacceptable in the face of potential $200 billion deficits.

Moreover, the bill preserves this egregious overspending by extending the authorization of the Commission for 5 years. In my view, a 5-year authorization is excessive, even if one were to embrace the more intrusive role for the CPSC envisaged in the committee bill. A new long life and the bulging wallet provided in this bill is a license to make mischief.

Mr. Chairman, I believe that the CPSC should be reauthorized. There are dangerous products, and their use should be conditioned, or they should be removed from the marketplace. In Federal agencies however, more is

almost never better. A large increase in staff, and a doubling in the number of regional offices, do not necessarily mean that fewer hazardous products will be produced. But it certainly means a huge increase in regulation, and corresponding increases in consumer costs.

Proponents indicate that the number of recalls has decreased since 1981, along with inspections and investigations. There are no comparable figures, however, that the public's safety is at greater risk, or that injuries have increased.

Polls have also been cited indicating support of the CPSC. It would be difficult, indeed, to oppose an organization charged with protecting consumer safety, unless one knew the means by which their safety was being guarded. I think most people prefer better regulation, Mr. Chairman, not more regulation. I urge support of the Shelby-Broyhill substitute.●

Mr. WAXMAN. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly the House rose; and the Speaker, having resumed the chair, Mr. SKELTON, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 2668), to amend the Consumer Product Safety Act to extend it for 5 fiscal years, and for other purposes, had come to no resolution thereon.

REQUEST FOR CONSIDERATION OF HOUSE RESOLUTION 254, AUTHORIZING INVESTIGATION BY COMMITTEE ON STANDARDS OF OFFICIAL CONDUCT

Mr. STOKES. Mr. Speaker, I ask unanimous consent that the Committee on Rules be discharged from further consideration of the resolution (H. Res. 254) to authorize an investigation by the Committee on Standards of Official Conduct, and ask for its immediate consideration in the House.

The Clerk read the title of the resolution.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

Mr. GREGG. Mr. Speaker, I object.

The SPEAKER. Objection is heard.

CONSUMER PRODUCTS SAFETY AMENDMENTS OF 1983

The SPEAKER. Pursuant to House Resolution 227 and rule XXIII, the Chair declares the House in the Committee of the Whole House on the State of the Union for the further consideration of the bill, H.R. 2668.

□ 1630

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H.R. 2668) to amend the Consumer Product Safety Act to extend it for 5 fiscal years, and for other purposes, with Mr. SKELTON in the chair.

The CHAIRMAN. When the Committee rose earlier today, there was pending an amendment in the nature of a substitute offered by the gentleman from Alabama (Mr. SHELBY).

Mr. DANNEMEYER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, this legislation will be a fruitful searching ground for future editors and publishers of movements in politics in America because it is illustrative of one of the three major premises of the pursuit of the liberal political ethic in America today.

And those three premises are, if it moves, regulate it. That is the first principle.

The second principle is: If it grows, tax it.

The third principle is: If it makes a profit, investigate it, it must be doing something illegal.

Now, these three principles are of equal importance.

This magnificent piece of legislation talks about achieving a small step toward the first principle, if it moves regulate it.

If we have toys played with by children in America, for the sake of the good of the order, let us have a Federal agency investigate them and if those toys move, regulate them. Why? Because we are pursuing the principle that is the No. 1 objective of the liberal ethic in America.

This legislation does that, and in spades. And I rise in support of the Shelby alternative because in my humble opinion it is the lesser of the two evils that we have before us.

One of the features that has not yet been talked about that is contained in the basic legislation, not in the Shelby substitute but in the basic legislation, is the expansion of the jurisdiction of the CPSC to cover fixed-site amusement parks.

Now, it is puzzling to me, when I hear my distinguished colleague from California (Mr. WAXMAN) talk about the overburdened investigators of the staff of the CPSC, and he bemoans the fact that there has been a reduction of that staff and yet, at the same time, he seeks by the legislation to expand the jurisdiction to an activity that is not currently covered under the jurisdiction of the CPSC, fixed-site amusement parks.

Now, there is something inconsistent there.

If the staff is overworked in regulating what moves in America, why do they want to expand their jurisdiction to fixed-site amusement parks?

And bear in mind, colleagues, that 21 States in the Union now have laws on the books that regulate and police fixed-site amusement parks for protecting the interest of the public.

Eight other States, besides the 21, are in the process, at some stage in their legislatures, of enacting laws to regulate fixed-site amusement parks.

If those eight would proceed to a conclusion successfully, that would make a total of 29.

One has to wonder, do we need two regulatory agencies in this country to send representatives to check on fixed-sites amusement parks? Think of the dream to the Federal bureaucrat, working in Washington, D.C., his mouth must lather with joyous anticipation, when he would get an order from a superior, "friend, I have news for you, for your faithful work and performance we are going to send you to Disneyland, California, for the sake of conducting an investigation on that fixed-site amusement park to see if it complies with Federal standards that we have not yet developed, but we want you to go out there, ride around, look around and see what you can regulate because we must protect the public safety and interest. And of course, after you go to Disneyland, U.S.A., in California, you can go to Orlando, Fla., and inspect Disney World."

Think of the horizons that this legislation will open up for the overburdened bureaucrats that labor in anonymity in the halls of Washington, D.C.

Travel requests, whether to travel first class or coach, meals, per diem when they are inspecting these sites.

(By unanimous consent, Mr. DANNEMEYER was allowed to proceed for 2 additional minutes.)

Mr. DANNEMEYER. All these fine things happen for the bureaucrats of our Nation's Capital if we adopt the basic legislation sponsored by my colleague, Mr. WAXMAN and fail or reject the amendment offered by the gentleman from Alabama (Mr. SHELBY).

I suggest we do not need to expand the jurisdiction of the CPSC by making it applicable to fixed-site amusement parks. Mr. SHELBY's alternative is a much more credible one, 3 years authorization instead of 5.

Bear in mind the Supreme Court has taken away our legislative override.

So, if we give this 5 years of untended life, we may be compounding our ability to supervise what they are doing.

Mr. SHELBY. Mr. Chairman, will the gentleman yield?

Mr. DANNEMEYER. I yield to the gentleman.

Mr. SHELBY. I thank the gentleman.

Mr. Chairman, I wanted to point out to the gentleman from California and I know he knows this, he has worked on it in the committee before and we have served on that committee for 5 years together, we came up together, but does he realize that among other things, that the Waxman bill would do, it would repeal some of the procedural safeguards that are applicable to the release of inaccurate or misleading information that we have some balance of now? In other words, the safeguards that we have for the Consumer Products Safety Commission, if the Waxman bill was passed, they could just really disrupt and probably destroy some good businesses without any real hearings?

Mr. DANNEMEYER. I am glad my colleague pointed it out.

Mr. GEKAS. Mr. Chairman, will the gentleman yield?

Mr. DANNEMEYER. I yield to the gentleman.

Mr. GEKAS. I simply want to state that if this bill goes through unamended I would like those investigators to come to the Hershey Park amusement area in my district, so they could see a safe enterprise. I would not restrict them to Disneyland.

Mr. DANNEMEYER. I think that will be high on the list.

The Shelby substitute offers 5 percent growth for authorization in each of the next 3 years, it is responsible growth, and I think we should adopt it.

Mr. GRAMM. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of the amendment.

Mr. Chairman, let me begin by trying to go back and straighten out some of these budget numbers. As I listened to our distinguished chairman from California, I got the idea that the Shelby amendment was cutting the budget of the CPSC. And that kinds of shocks me because I have been concerned about SHELBY'S amendment, because it raises the budget of the CPSC by $700,000 more than they asked for.

In fact, the Shelby amendment provides a 5-percent growth in authority beyond the inflation rate, providing real growth in a regulatory agency. So, the first point I would like to be sure no one is confused about is this assertion that the Shelby amendment is cutting the budget of the CPSC. The Shelby amendment is raising the budget of the CPSC in authorization and it is raising it in nominal and in real terms by increasing that budget above the inflation rate, but it is not increasing that authorization by 38 percent next year as is proposed by the gentleman from California.

Now, I do not know how many people have been following the equities market and the bond market in the last 2 days, but we are seeing a lot of jittery nerves in the economy about this deficit and about this big budget we have adopted in terms of its deficits and its level of expenditures.

□ 1640

Mr. BROYHILL. Mr. Chairman, will the gentleman yield?

Mr. GRAMM. I yield to the gentleman from North Carolina.

Mr. BROYHILL. I thank the gentleman for yielding.

I fully appreciate and applaud the gentleman's long hard work on the budget and to keep down spending I can understand his concern about the levels of authorization that are in the Shelby substitute, but I would urge him to vote with us on this so as to not have the more excessive authorizations that we find in the Waxman substitute.

Mr. GRAMM. Let me say to my colleague I intend to overcome my reservations and support the Shelby amendment because even in Texas mathematics, 5 percent is less than 38 percent.

Mr. BROYHILL. I appreciate that.

Mr. GRAMM. So the first point to clarify once again, the Shelby amendment increases authorization, it does not decrease it, but it does not increase authorization by a totally unjustified 38 percent.

Second, the gentleman from California had a big chart and I could not see it from where I was sitting, but I have here a letter from the Consumer Products Safety Commission to Mr. WAXMAN, which outlines scientific personnel levels at three different benchmarks, 1979, 1981 and 1982, beginning and end of the year.

I would like to run down those, because as I look at these benchmarks, I do not see the kind of personnel layoffs and agency destruction that I heard the gentleman describing.

In terms of scientific personnel in 1979, they had 22. In 1981, they had 10 and they have got 10 at the end of 1982. In engineers, they had 13 in 1979, in 1981 they had 10, now they have 15. In terms of economists, they had 16 in 1979, they had 11 in 1981, and I guess they could not live without the 16, because they are back up to it now. In terms of mechanical engineers, they had 15 in 1979, they had 12 in 1981 and they have 10 now. In terms of other scientific personnel, they had 47 in 1979, 48 in 1981 and 53 now.

So in terms of scientific personnel, from the middle of the Carter administration to the end, it dropped from 124 to 101 and it is back up to 112.

I do not see this agency being gutted.

Mr. WAXMAN. Mr. Chairman, will the gentleman yield?

Mr. GRAMM. I yield to the gentleman from California.

Mr. WAXMAN. I thank the gentleman for yielding.

I have in my hand a report by the U.S. General Accounting Office. It is called the attrition of scientists in three regulatory agencies. On page 2, where they are talking about the Consumer Product Safety Commission, they said:

> This agency which is much smaller than FDA and EPA has a smaller proportion of scientific and technical personnel and lost about 32 percent of both its scientific and technical personnel and its total work force during the period under consideration. Staffing levels in this agency were already declining in period one and the rate of decline significantly accelerated in period 2, especially among non-scientific personnel.

Mr. GRAMM. If I may reclaim my time to answer, I have here a letter that was sent to our colleague from California—it looks to me to be about a 75-page letter—which explains why that the GAO study was incorrect in the opinion of CPSC and outlines the differential.

The point I am trying to make here is that looking at scientific personnel, not at——

The CHAIRMAN. The time of the gentleman from Texas (Mr. GRAMM) has expired.

(By unanimous consent, Mr. GRAMM was allowed to proceed for 4 additional minutes.)

Mr. GRAMM. Simply making the point so that I might continue, as I look at CPSC's response to the GAO, and as they outline their technical personnel, chemists, general engineers, economists, mechanical engineers, electrical engineers, and others, we do not see the precipitous decline in personnel, in fact, we see personnel at a peak in 1979, declining in 1981, and rising from 1981 to 1982.

Mr. WAXMAN. If the gentleman will yield further, I have some estimates here, the same letter that the gentleman referred to, where the percent change from October 1979 to December 1982, the chemists were down 54.5; for mechanical engineers, down 33.3; electrical engineers, 27.3. We have reductions in personnel and I think the only difference between what CPSC was saying and GAO is whether they are going to categorize somebody as scientific in the same way. But what we have had is a reduction in personnel and a reduction in the ability of CPSC to do its job.

Mr. GRAMM. Reclaiming my time, the gentleman chooses 1979, October 1, 1979, as a base mark. That is in the midst of the Carter administration.

So many of these reductions that the gentleman claims to be grievous attempts by the Reagan administration to gut this poor innocent agency,

in fact, we had a peak personnel level in 1979.

Mr. WAXMAN. If the gentleman will yield, he is misrepresenting my position. My comparison was from 1979 to 1982. And we showed the reduction in that time period and that is when the Reagan administration came in.

Mr. GRAMM. We can play all day with numbers, but I can take 1981 as a benchmark and show an increase of 10.9 percent from 1981 to 1982.

So the point I would like to make, rather than get into a long argument about numbers, No. 1, the Shelby amendment increases the budget; it does not cut it.

No. 2, the effort to rein in this runaway agency is not just a Reagan effort. It was a Carter effort. We adopted in this body, in the 97th Congress, a reform of the CPSC to try to give some guidelines to the functioning of this agency. Perhaps one of the most important and most needed was simply a requirement that when this agency was going to release information to the press, that before that information could be released, unless there was an imminent hazard, that they notify the company that was involved and give them an opportunity to respond.

Now, what we would have here is a repeal of that provision.

As the gentleman knows in hearings that were held during the 97th Congress, we found businesses that because of leaked information, that had never been approved by the Commission, that companies had been driven out of business.

Now I can find no reason that we ought not to give a business, that has invested in its good name, an opportunity to respond to CPSC before CPSC, through information that may not have been sanctioned by the Commission, goes out and destroys their good name.

Mr. WAXMAN. If the gentleman will yield, what we have provided is that this is an accusation by the CPSC; they must consult with business, they must establish the veracity of any charge they make. But what we also provided is that they have newspaper clippings in their files. And as a Freedom of Information Act request, to get that information about claims that have been made, they can release it the same as any other agency under the Freedom of Information Act, but they also had to put a disclaimer that it was not information they were claiming to be accurate. I think that is reasonable.

The CHAIRMAN. The time of the gentleman from Texas (Mr. GRAMM) has expired.

(By unanimous consent, Mr. GRAMM was allowed to proceed for 3 additional minutes.)

Mr. GRAMM. Having a disclaimer in information that is given out from the CPSC does not protect the good name of a company. All a company has is its good name. People do not make toys to hurt children. They make toys to make money and to give children pleasure. The companies that are irresponsible go broke. We are not saying do not regulate them. All we said in a bipartisan act of this Congress was, if you are going to say that there is a problem, give the company an opportunity to have its day in court, so to speak. To me that seems the most reasonable of all possible requests that we could have.

So I think it is imperative that we adopt the Shelby amendment, that we raise the budget of this agency by 5 percent, but not by 38 percent, and that we preserve the safeguards that it is our job to provide as Congress.

Mr. SHELBY. Mr. Chairman, will the gentleman yield?

Mr. GRAMM. I yield to the gentleman from Alabama.

Mr. SHELBY. I thank the gentleman for yielding.

The gentleman is talking about figures and I know the gentleman knows a lot about it, but it is my understanding that the administration recommended to this agency $32 million, that the Senate authorized $35 million, that our own Appropriations Committee is talking about $34.5 million, that CPSC itself requested $34.9 million, and the gentleman from California is asking the Congress for $47 million. Something is wrong.

Mr. GRAMM. If the gentleman would let me reclaim my time, it is obvious that the gentleman from California is not trying to authorize. The gentleman from California is trying to dictate to an agency. He is trying to override the 1980 elections by forcing us to hire and pay people to do things that the Congress has said last term they did not want done, and that the Commissioners of the agency do not want to undertake.

□ 1650

This is an effort to mandate administration through the legislative process, and for that reason, if for no other, it ought to be defeated.

Mr. WAXMAN. Mr. Chairman, will the gentleman yield?

Mr. GRAMM. I yield to the gentleman from California.

Mr. WAXMAN. I thank the gentleman for yielding.

Mr. Chairman, I do not know that the 1980 election said that we want to protect the good name of a business that may be manufacturing a product that is hurting people, injuring them, causing them to have to go through the tremendous pain and suffering that could be prevented. This Consumer Product Safety Commission was approved in 1981, notwithstanding the 1980 election, and it was approved by the Congress, with a wide bipartisan margin, and it is supported by the American people because we care about the good names of the businesses, and we want to protect them, but we also care about children who end up being squeezed and killed in cribs, and we want a crib standard to protect them.

The CHAIRMAN. The time of the gentleman from Texas (Mr. GRAMM) has expired.

(By unanimous consent, Mr. GRAMM was allowed to proceed for 1 additional minute.)

Mr. GRAMM. Mr. Chairman, we in fact did reauthorize CPSC in 1981 with guidelines from this Congress to require that CPSC exercise prudence. We simply required in an item referred to by the gentleman from California that in the cases where there had not been official action by the Commission, that before information was leaked that was harmful to a business, the business be called in and given an opportunity to respond to those charges. That does not delay the process. But what it does do is to give the business in question, the people who have spent their lives building the good name of their product, an opportunity to consult with CPSC before their product and its market and their good name are destroyed.

Now, I cannot see how anyone can say that is unreasonable, unless one believes that every businessman was a sinister person.

Mr. LUKEN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of the amendment offered by the gentleman from Alabama, and I would like to concentrate on two principal reasons for this.

One is the injection into the Waxman bill this year of coverage of fixed-site—that means theme parks, the big parks—amusement parks which this Congress took out of the bill 2 years ago after complete hearings and deliberation, and we decided that this Consumer Product Safety Commission did not have jurisdiction over fixed-site amusement parks because they did not have the expertise and because fixed-site amusement parks were not products in the sense of the products which they are used to inspecting and regulating. We came to that conclusion. And before the ink was dry on that law, before this industry which has a good record, has had a chance to establish self-regulation, we are back here amending it and saying now we want to cover the fixed-site amusement parks.

Second, I am for it principally because of the very unwise language in this amendment, which has already been mentioned, which does not set an authorized level, as most of the precedents cited by the gentleman from

California do. This is not a question of authorizing so many people for the Coast Guard or authorizing so many people for the FTC. This says there shall be a minimum of employees whether they need them or not. That is bad law and we should not pass it under any circumstances.

The only one that I can find, of all of the precedents that have been offered which did establish a floor, a minimum, was one for the National Oceanic and Atmospheric Administration, and it followed with the language saying that the Secretary could disregard that language if he so chose.

So there is not any precedent for it, and we should not get into it.

But I am concerned because the amusement park amendment in the Waxman bill will be counterproductive. I am afraid it will in fact be an unsafe amendment.

Two years ago we decided amusement parks could regulate themselves—they had a pretty good record—and that it would be better than turning it over to the CPSC which did not have qualified people.

There is a basic question to answer: Is there any record to indicate that fixed-site parks deserve regulation? There are over 500 parks that would be affected by this amendment, over 175 million visitors and 1 billion rides.

Now, those are a lot of numbers. Keep in mind 1 billion rides per year. Yet according to CPSC's own estimates, there were 11,000-and-some-odd injuries on all carnival rides, fixed site and carnivals. Of those, there were only 438 estimated serious enough to require hospitalization.

In subcommittee we found out some amazing things about CPSC's estimate. The gentleman from Oregon, who is rising now, offered that amendment, and the people from CPSC came in and told us about it and we talked to them about it. They take the number of actual injuries reported of 71 emergency rooms, and then they multiply it by the 5,000 to 6,000 hospitals there are in the country. That has no regard to where these theme parks are located. So the statistics are bogus, to say the least.

But even if you take the estimates of CPSC to be true and accurate, that is, 438 hospitalized injuries from 1 billion rides, there is absolutely no way of determining, by CPSC's own admission, how many are due to mechanical failure, preventable, or carelessness by the passengers, nonpreventable. If CPSC had jurisdication, by their own admission, they cannot tell the Congress that they could have prevented a single death or injury. They cannot tell us that.

Therefore, let us look at the work of CPSC with regard to carnival rides. CPSC has had throughout this period of time jurisdiction over carnival parks. Under questioning, Commissioner Zagoria, who has been pushing coverage for fixed-site amusement parks, could not tell us now many injuries were due to carnival rides, which they have jurisdiction of now, or how many were due to fixed-site amusement parks.

The CHAIRMAN. The time of the gentleman from Ohio (Mr. LUKEN) has expired.

(By unanimous consent, Mr. LUKEN was allowed to proceed for 3 additional minutes.)

Mr. LUKEN. Mr. Chairman, let us take the words of Mr. Zagoria himself. He could not tell us anything when he appeared at our markup. He could not give us the answers to any of these questions. But he did appear before a group back in 1979, and here is what he said. This is the Commissioner of the CPSC. He said:

So you can readily understand we feel we are spread very thin. I should also add in talking about the 140 investigators * * * that all of these are generalists. None of them, to my knowledge, has been trained or is experienced in inspecting such equipment as amusement parks.

None of them are trained in inspecting amusement parks.

He went on to say:

Our best role at the Federal level might be one of acting as a coordinator and resource for State agencies.

I will go along with that.

For the reasons I have outlined, we are probably well advised to refer to the individual States in the direct regulation of amusement rides.

I think, in the interest of the riders, that is what the CPSC should do. They do not have any expertise.

The first suggestion, he said, is "to provide States with opportunities for exchanging information and establishing of communications."

Here is what Commissioner Zagoria of the CPSC said:

The Commission might help organize and sponsor training of State inspectors.

They might.

A third is that the Commission could serve as a clearinghouse for information on unsafe rides.

They could not do any harm doing that.

And, finally—

The Commission could provide help by way of engineering testing or similar technical assistance.

□ 1700

They might. They admit they do not have any expertise, but they might do that.

So finally, my colleagues, I would say that the CPSC has had experience with carnivals. It has not been able to tell us anything about it. We are confronted with an interesting issue here. The assumption is that if there is a problem, we need Federal regulation to solve it. I do not think that the record, and I just talked about the record, supports the fact that we need Federal regulation in this area.

The burden of proof should fall to the agency. It has not sustained that burden of proof. This industry, the amusement park industry, is a very safe one, with a good record compiled of self-regulation, and for this reason, and because of the very unfortunate language on putting a floor underneath the personnel, I would support the Shelby amendment.

Mr. WYDEN. Mr. Chairman, I rise in opposition to the Shelby substitute.

Mr. Chairman, I would like to use my time to focus in particular on the question of fixed-site amusement parks and to try to set the record straight about some misconceptions that I think our colleagues may have on this subject.

I happen to think that families in this country have a right to expect that when they put their youngsters on a ride that that ride is going to be a safe one and not one that could end in a tragedy. I think the U.S. News & World Report in their June 27, 1983, issue showed clearly why this body should be concerned about safety at fixed-site amusement parks. That publication reports that more than 25,000 people have been injured in the past 2 years at permanent amusement parks and theme parks.

Because of this evidence, I offered in the subcommittee and my colleagues in the full committee accepted it as well, a grant of jurisdiction to the Consumer Product Safety Commission over amusement park rides at fixed sites that is extremely limited in nature. The Commission may not issue rules, for example. They cannot go to court to have such rides declared an imminent hazard. Under my amendment, however, the Commission can collect information on such fixed-site rides and investigate accidents involving those rides, and then after a hearing order corrective action for rides that present a substantial hazard. Further, under my amendment the Commission has not been given any authority whatsoever to write standards, as it can for other products within its jurisdiction.

My amendment means that while we protect American families, there will be absolutely no paperwork, and no red tape or bureaucracy for amusement parks, the vast majority of which, I would like to emphasize, as I did in the committee, are good, decent business persons who provide a safe product. Under my amendment the Commission would only be given authority to investigate incidents to determine if a product is defective. That is the very same jurisdiction it has under section 15 for all other products such as thermostat control valves, ovens, toasters, and the like.

Finally, I would like to touch on one other point that our colleague from Ohio mentioned: That the States ought to be focusing on this area of amusement park regulation.

Less than half the States, 21 to be exact, have done anything to protect the safety of our families in this area. Of those 21 States, not all cover fixed-site rides. Few of the States have the enforcement powers, the personnel, the financing, and the expertise to pursue amusement ride hazards as they ought to. My own State of Oregon is one example, and they are supporters of the fixed-site amusement park amendment that is in the bill.

Finally, the Commission employs competent mechanical, electrical, and structural engineers who have the requisite expertise to handle amusement park hazards.

For all these reasons, I would urge my colleagues to stand up for the families of this country, who have a right to expect that when their youngsters go on a ride that the ride is going to be a safe one. Let us reject the Shelby amendment.

Mr. OXLEY. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. COUGHLIN. Mr. Chairman, will the gentleman yield?

Mr. OXLEY. I yield to the gentleman from Pennsylvania.

Mr. COUGHLIN. I thank the gentleman for yielding.

Mr. Chairman, I want to associate myself with the gentleman's remarks in support of the amendment. Having served on the Subcommittee on Appropriations for the Consumer Product Safety Commission, I have observed over the years that they do intend to have flights of fancy sometimes, although they do some commendable work, such as the asbestos and hair dryers.

I noticed one time they came before us when they were going to regulate CB radio antennas. I asked how many people died as a result of CB radio antennas, and indeed, they produced some figures about how people died on CB radio antennas. But the fact was that it was not from any electrical shock or anything like that from the antennas; it was because people went up on the roof of their house to put the home station on and fell off the roof. They do have that kind of flights of fancy.

Mr. Chairman, I certainly associate myself with the gentleman's remarks.

Mr. OXLEY. I thank the gentleman for his comments.

Mr. Chairman, I rise in support of the amendment because of my reservations with the bill before us. My concerns cover virtually the entire bill but are especially strong with respect to the proposed changes to section 6(b) of the Consumer Product Safety Act. The bill would completely reverse the long-held congressional view—stated when the Congress first passed the act in 1972, recognized by the U.S. Supreme Court in the GTE Sylvania case, and then restated by Congress just 2 years ago in the 1982 amendments—that good public policy requires a careful balancing of interests between access to product information within the files of the CPSC and the need to protect business and consumers from the release of false and misleading information.

The need for the present law requirements now applicable to Commission disclosures in response to FOIA requests is made necessary because of the vast jurisdiction of the CPSC and its attendant ability to do immediate and irreparable harm to a business and cause unwarranted consumer confusion through the release of inaccurate product specific information.

Now, I am familiar with the argument that the current law requirements are too burdensome, but I do not think they are valid. I ask my colleagues to examine what the law now says the CPSC must do prior to disclosing information pursuant to an FOIA request. If this is done, it will be found that the Commission, before disclosing 6(b) information, must first, allow the business in question a reasonable opportunity to submit comments in regard to such information, must second, take reasonable steps to assure that the information to be disclosed is accurate, and must third, take reasonable steps to assure that disclosure is fair in the circumstances and reasonably related to effectuating the purposes of the act.

It seems to me that these requirements, on their face, are reasonable, fair, and most capable of being implemented by the agency in a timely fashion. I implore my colleagues not to retreat from the present law requirements which would occur if H.R. 2668 were to pass without the Shelby substitute.

So, I strongly support the Shelby substitute, which would maintain the current language under 6(b) that has a long congressional and judicial history of protecting not only small business but also the consumer as well. I ask for support of the Shelby amendment.

Mr. TAUKE. Mr. Chairman, will the gentleman yield?

Mr. OXLEY. I yield to the gentleman from Iowa.

Mr. TAUKE. I thank the gentleman from Ohio for yielding and commend him on his statement.

Mr. Chairman, as I have reviewed this legislation in committee and again here on the floor, it has occurred to me that the authors of this bill seem to think that if a little consumer safety is good, then a lot of consumer safety must be even better.

As the gentleman from Alabama and the gentleman from North Carolina have pointed out in their substitute, that is not necessarily so. I think that when we look at this measure as proposed by the committee and the gentleman from California and see a 5-year reauthorization with a 58-percent aggregate increase in funding, we all have to sit back, pause, and figure out what is wrong; it is too long an authorization and the funding increases just are too great; they are not justified.

But when we really know something is wrong with this legislation is when we observe that this is a case where Congress tries to interject itself into the management process by saying that we are going to set mimimum employment levels in the agency and that we are going to double the number of regional field offices.

It seems to me that when Congress is at a time of fiscal austerity in Government and high deficits, mandating that agencies not only double the number of employees but then not have to justify increases above that, that we have somehow taken leave of the commonsense that I think most of our constituents hope we will use when we make decisions. I cannot believe that Members of Congress really want to take that kind of action, and I think that if they are reviewing carefully what is happening here, that whether they are liberal or conservative or moderate, commonsense is going to tell them that the action being taken is, above all, unreasonable.

The CHAIRMAN. The time of the gentleman from Ohio (Mr. OXLEY) has expired.

(On request of Mr. TAUKE and by unanimous consent, Mr. OXLEY was allowed to proceed for 3 additional minutes.)

Mr. TAUKE. And beyond that, Mr. Chairman, it is a rather blatant attempt by Congress to interject itself into what should be administrative functions and decisions.

□ 1710

In addition to these reasons, it seems to me that the Shelby substitute ought to be adopted primarily because of the procedural safeguards that it maintains that are now in the law. We had huge problems just a couple years ago with this agency because the agency would often put out information concerning product safety that was inaccurate and unfair. That was not a service to consumers; it scared consumers. It was not a service to industry, because it would cause a business that may not even have a legitimate problem to lose customers.

Because of that kind of problem, Congress said that it just made sense to give businesses and industries an opportunity to respond to allegations before they were made public.

Now the gentleman from California and those who support this legislation want to repeal that and put us back to where we were before. How short our memories must be.

In 1981, we really did take some positive steps to strike a proper balance between consumer interests and business interests. We struck a proper balance between the roles of Congress and the executive branch. We adopted legislation that was fair and balanced. It seems to me that this year we need not go back and try to rewrite the statute all over again. What we should do is allow what is working well to continue to work to protect the consumers and to insure that business operates within the guidelines of decency.

It seems to me also that we want to insure that Congress operates within the scope of its proper role and that is as policymaker, not as administrator.

Mr. Chairman, I commend the gentleman from Alabama and the gentleman from North Carolina for offering a substitute which makes a great deal of sense. I hope all Members of Congress, regardless of affiliation or philosophy, will see that this is not a question of affiliation or philosophy, but a question of commonsense, and vote for the Shelby-Broyhill substitute.

AMENDMENT OFFERED BY MR. ROWLAND TO THE AMENDMENT IN THE NATURE OF A SUBSTITUTE OFFERED BY MR. SHELBY

Mr. ROWLAND. Mr. Chairman, I offer an amendment to the amendment in the nature of a substitute.

The Clerk read as follows:

Amendment offered by Mr. ROWLAND to the amendment in the nature of a substitute offered by Mr. SHELBY: At the end of the matter proposed to be inserted by the amendment insert the following:

"SEC. 3. In fiscal years 1985 and 1986 the Consumer Product Safety Commission shall use funds appropriated under the amendment made by section 2 for the Flammable Fabrics Act to include within the definition of articles of wearing apparel surgical drapes which are used to completely or partially cover patients undergoing surgery."

Mr. ROWLAND. Mr. Chairman, the amendment merely states that surgical drapes will be considered as wearing apparel, rather than interior furnishings, with reference to flammability.

Mr. Chairman, there are instances in operating rooms where oxygen may possibly escape and lower the kindling point of surgical drapes and cause a severe fire. So for this reason I think it is appropriate to offer this.

Mr. SHELBY. Mr. Chairman, will the gentleman yield?

Mr. ROWLAND. I would yield.

Mr. SHELBY. Is this the amendment the gentleman was talking to me about; is this similar to what the gentleman from Illinois (Mr. MADIGAN) has been pushing?

Mr. ROWLAND. That is correct.

Mr. WAXMAN. Mr. Chairman, will the gentleman yield?

Mr. ROWLAND. I yield.

Mr. WAXMAN. Mr. Chairman, I want to commend the gentleman on this amendment. This issue was raised by the gentleman from New York (Mr. GILMAN) before our hearings with some people who came in to complain about the gap in the coverage by the Consumer Product Safety Commission.

We adopted that recommendation and it is part of our bill. I was surprised that the people who put together the substitute did not have this provision in there. I am pleased to see that they are willing to accept it for the substitute.

I would join with the gentleman and the gentleman from Alabama (Mr. SHELBY) in urging adoption of this amendment.

Mr. BIAGGI. Mr. Chairman, will the gentleman yield?

Mr. ROWLAND. Yes; I yield.

Mr. BIAGGI. Mr. Chairman, I thank the gentleman for yielding and I commend him for his amendment to the Shelby amendment.

This provision that was in the original Waxman bill was also in legislation that was introduced by myself and the gentleman from New York (Mr. GILMAN). We are delighted that it was incorporated in the original bill. I am disappointed that it was not in the Shelby substitute and I commend the gentleman for taking care of this very, very important area, that exposes people in the operating rooms of our country to unnecessary peril.

Mr. Chairman, I rise in strong support of the pending legislation to reauthorize for the next 5 fiscal years the important programs and work performed by the Consumer Product Safety Commission.

When one considers the fact that everyone in this Nation to one degree or another is a consumer—one begins to realize and appreciate the importance of an agency such as the Consumer Product Safety Commission. It is therefore appropriate that on this 10th anniversary of the establishment of the CPSC that we adopt a bill that gives far more than just an extension of authorizations—but a 5-year mandate to continue and expand their important work. We compliment the length of the reauthorization by providing adequate funding levels to insure the resources are there to do the job.

I am especially pleased that section 11, subsection (c) of this bill addresses a very important issue which was the subject of a bill I introduced earlier this year, H.R. 2423. The issue has to do with safety in the operating rooms of our Nation. The specific issue has to do with an urgent need to reclassify surgical drapes which are worn by some 20 million Americans each year in medical procedures.

At the present time, surgical drapes are designated as "interior furnishings" by the CPSC. This in many respects removes them from a number of regulations including those dealing with flammability. Last year two dedicated doctors from my home State of New York representing the New York State Society of Anesthesiologists provided me with some information that linked surgical drapes to fires which occurred in operating rooms. According to Drs. Ralph Milliken, chairman of the operating room safety committee of the society, and Dante V. Bizzarri surgical drapes when used in combination with high energy devices common to operating rooms have a high flammability potential. Specifically when used in conjunction with fiber optics, lasers, and cautery present surgical drapes a direct fire hazard in the operating room to both patients and medical personnel.

Following this information and in conjunction with the CPSC I introduced H.R. 2423 together with my distinguished colleague from New York (Mr. GILMAN) who was also deeply concerned. The bill called for a redesignation of surgical drapes from "interior furnishings" to "wearing apparel" thus making it specifically under the purview of the Flammable Fabrics Act. The committee report addresses the issue:

Testimony was presented to the subcommittee from the New York State Society of Anesthesiologists asserting that surgical drapes were highly flammable and that the lack of an effective flammability standard covering drape manufacture increased the risk of burn injuries to patients undergoing surgery.

The Committee proposal is necessary due to an interpretation by the CPSC that surgical drapes are "interior furnishings" rather than "wearing apparel" within the meaning of the FFA. By clarifying that surgical drapes should be classified as articles of wearing apparel, the committee intends that 360 days following enactment of this act that surgical drapes will be manufactured to comply with the CPSC's standard for the flammability of clothing textiles (16 CFR 1610).

While the number of incidents of fires in operating rooms caused by surgical drapes is not extensive—it is no excuse for us not to act. First, there is not much of a procedure in effect today for the reporting of operating room fires suggesting that this may be a bigger problem than we presently know. What we are doing in a sense is applying a dosage of preventive medicine. We know that the modern equipment used in operating rooms provide ignition sources and the surgical drapes become the fuel of the fire. It would seem that the potential does exist for fires unless more stringent

standards can be imposed on the drapes.

The issue here is fundamental. We seek to make nothing more than a simple change in designation for surgical drapes. If we succeed we will be taking a profoundly important step in improving safety in our Nation's operating rooms. There is apprehension enough among people when facing surgery, there is no reason to promote further anxiety due to fear of fire. I urge support of the committee reported bill.

Mr. SHELBY. Mr. Chairman, will the gentleman yield?

Mr. ROWLAND. Yes; I yield to the gentleman.

Mr. SHELBY. Mr. Chairman, I just want to restate that I join with the gentleman at the proper time and urge adoption of the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Georgia (Mr. ROWLAND) to the amendment in the nature of a substitute offered by the gentleman from Alabama (Mr. SHELBY).

The amendment to the amendment in the nature of a substitute was agreed to.

Mr. SIKORSKI. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I rise in opposition to the Shelby-Broyhill substitute.

Since 1966, the Freedom of Information Act has embodied a principle basic to democracy and essential to the operation of government—the public's right to know. The proposed substitute would do serious harm to the spirit if not the letter of the Freedom of Information Act.

The CPSC treats requests under the FOIA in a manner different from any other Federal agency. The process greatly hinders the agency's ability to respond promptly to FOIA requests from the public and provides manufacturers unprecedented discretion to influence, if not control, the exchange of public information.

The Shelby substitute would leave in place a process which has brought agency implementation of FOIA to a virtual standstill.

In the past, 85 percent of FOIA requests to CPSC were responded to in 10 days or less. Now 75 percent of the requests require from 1 to 6 months before document collection even begins; 450 FOIA requests are pending right now at the agency with some dating back to 1981.

Under the Shelby substitute, even the written opinions of Commissioners regarding agency actions would have to be sent to manufacturers for review 30 days prior to release. If a company did not like what a Commissioner wrote, they could go to court to enjoin publication.

I am sure Members would find such provisions intolerable if applied to minority views on committee actions. They are no less objectionable when applied to the views of Commissioners at a Federal regulatory commission.

Mr. Chairman, what the business community is legitimately actually concerned about is the release of inaccurate information by an agency which bears the imprimatur of the agency. They want to be assured that when information is released under the agency's imprimatur it is accurate. I cannot blame them.

This is a concern which the committee addressed. H.R. 2668 specifically provides that all agency generated press releases, reports and studies require verification for accuracy before public release. Verification would include sending the documents to industry for review and comment in advance of public disclosure. Even with these protections—protections I might add that are not provided by any other health or safety agency—not EPA, FTC, FDA, OSHA, FAA, NRC, USDA, NSHA, or NHTSA—the committee went even further. It required that the agency stamp every document released under FOIA with a disclaimer. The disclaimer clearly states that the document has not been reviewed for accuracy and therefore cannot be construed to represent an agency endorsed document.

In short, the proposals in section 4 of the committee bill are modest reforms. They carefully balance the legitimate concerns of industry with the rights of the citizens of the United States under FOIA.

Mr. Chairman, business has a right to be protected from damaging disclosures by Federal agencies of inaccurate information. The committee bill provides this protection in a thoughtful and reasoned manner.

I urge defeat of the amendment.

Mr. WAXMAN. Mr. Chairman, will the gentleman yield?

Mr. SIKORSKI. Yes, I yield.

Mr. WAXMAN. Mr. Chairman, I thank the gentleman for yielding.

I hope our colleagues listened carefully to the gentleman's description of how we have changed the Freedom of Information Act standards, because it was represented earlier today that we are allowing also irresponsible statements to be made without the agency checking these things out.

In fact, however, we keep that requirement that the Consumer Product Safety Commission must go through a procedure to talk to industry, to get their reactions, to make sure, including that the veracity of the statements they make are accurate.

As far as Freedom of Information Act requests for simple information, they are not going to be any different than the Environmental Protection Agency, the National Highway Traffic Safety Administration, the Food and Drug Administration, or the U.S. Department of Agriculture. They are going to be handling Freedom of Information issues exactly the same way as every other Federal agency.

□ 1720

We are not changing anything other than to say they should be treated the same as other agencies.

Mr. NIELSON of Utah. Mr. Chairman, I move to strike the requisite number of words and rise in support of the amendment.

I support the Shelby substitute for several reasons. Among them are these:

It is a 3-year reauthorization instead of 5. I think 5 years is too long, as the gentleman from Iowa (Mr. TAUKE) indicated.

The funding is increased by approximately 5 percent per year as compared with nearly a 40-percent increase the first year in the Waxman bill.

It requires a minimum number of employees, at least 650 employees, and requires the number of field offices to be doubled to 10 and indicates that the number shall not be subject to review or approval by any persons in the executive branch of Government. I think this is an intrusion on the management function of the executive branch.

It goes the wrong direction as far as procedural policies are concerned.

Public disclosure is no longer required. Companies can be accused and convicted without time for investigation.

It goes the wrong direction in the Flammable Fabrics Act. It eliminates the cellulose standard. It adds an unnecessary toxicology advisory board, and it adds controls over the fixed amusement parks, as the gentleman from California (Mr. DANNEMEYER) indicated.

For all of these reasons I support the Shelby amendment and hope it will be passed.

Mr. GRAMM. Mr. Chairman, will the gentleman yield?

Mr. NIELSON of Utah. I yield to the gentleman from Texas.

Mr. GRAMM. Mr. Chairman, the gentleman from Minnesota who spoke prior to the last speaker talked about protection for the manufacturer. I would like to read very briefly current law which the Waxman amendment would change, and then talk about the Waxman language.

Current law adopted by the 97th Congress says with respect to product specific information, the CPSC prior to the release of such information shall provide the manufacturer or private labeler of such product with a reasonable opportunity to submit comments to the commission in regard to such information. That is current law. And, of course, the Shelby amendment, would just simply preserve current law.

As a substitute the Waxman amendment would substitute the following language which the gentleman from Minnesota claims protects the manufacturer:

In responding to requests for information which were made under section 552 of title 5, United States Code, the Commission shall mark, in a prominent place, each document to be released pursuant to such a request with the following statement: "This document has been released by the Consumer Products Safety Commission pursuant to the Freedom of Information requirements of title 5 and it has not been reviewed for accuracy for the purpose of your request."

I submit, Mr. Chairman, that in no way does this provision substitute for an opportunity to comment and in no way can this disclaimer prevent sensational information from destroying the good name of a manufacturer, destroying that manufacturer's business.

That is why the Shelby substitute should be adopted.

Mr. NIELSON of Utah. Reclaiming my time, I would like to commend the gentleman from Texas for his statement.

I yield back the balance of my time.

AMENDMENT OFFERED BY MR. WAXMAN TO THE AMENDMENT IN THE NATURE OF A SUBSTITUTE OFFERED BY MR. SHELBY, AS AMENDED

Mr. WAXMAN. Mr. Chairman, I offer an amendment to the amendment in the nature of a substitute, as amended.

The Clerk read as follows:

Amendment offered by Mr. WAXMAN to the amendment in the nature of a substitute offered by Mr. SHELBY, as amended:

At the end of the matter proposed to be inserted by the amendment insert the following:

DISAPPROVAL OF RULES

SEC. 3. (a) During the period for which funds are authorized to be appropriated under the amendment made by section 2, no consumer product safety rule promulgated under section 9, no regulation promulgated under section 2(q)(1) or 3(e) of the Federal Hazardous Substances Act, or regulation promulgated under section 4 of the Flammable Fabrics Act may take effect if, within 90 days of continuous session of the Congress which occur after the date of the promulgation of the rule or regulation, a joint resolution disapproving such rule is enacted.

(b) To carry out subsection (a) the Consumer Product Safety Commission shall transmit to the Secretary of the Senate and the Clerk of the House of Representatives a copy of each consumer product safety rule promulgated by the Commission under section 9 of the Consumer Product Safety Act, each regulation promulgated by the Commission under section 2(q)(1) or 3(e) of the Federal Hazardous Substances Act, and each regulation promulgated by the Commission under section 4 of the Flammable Fabrics Act, which rule or regulation is published in final form by the Commission after the date of the enactment of this subsection but before October 1, 1988.

(c) For purposes of subsection (a), the term "joint resolution" means—

(1) in the case of a consumer product safety rule, a joint resolution of the Congress which states the following after the resolving clause: "That the Congress disapproves the consumer product safety rule which was promulgated by the Consumer Product Safety Commission with respect to and which was transmitted to the Congress on ", with the blank spaces being filled in appropriately;

(2) in the case of a regulation promulgated under section 2(q)(1) or 3(e) of the Federal Hazardous Substances Act, means a joint resolution of the Congress which states the following after the resolving clause: "That the Congress disapproves the regulation which was promulgated by the Consumer Product Safety Commission under section of the Federal Hazardous Substances Act with respect to and which was transmitted to the Congress on ", with the blank spaces being filled in appropriately; and

(3) in the case of a regulation promulgated under section 4 of the Flammable Fabrics Act, means a joint resolution of the Congress which states the following after the resolving clause: "That the Congress disapproves the regulation which was promulgated by the Consumer Product Safety Commission under section 4 of the Flammable Fabrics Act with respect to and which was transmitted to the Congress on ", with the blank spaces being filled in appropriately.

Mr. BROYHILL (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

Mr. WAXMAN. I thank the gentleman.

Mr. BROYHILL. Will the gentleman yield?

Mr. WAXMAN. I will be pleased to yield.

Mr. BROYHILL. Mr. Chairman, this is a version of the legislative veto. As I understand what it requires is that no rule would go into effect unless a joint resolution is passed; is that correct?

Mr. WAXMAN. The gentleman is partially correct. It provides that no regulation or rule would go into effect for 90 days, and then Congress would have an opportunity to pass a resolution.

Mr. BROYHILL. A resolution of disapproval?

Mr. WAXMAN. The gentleman is correct, a joint resolution of disapproval.

Mr. BROYHILL. This is an amendment to the Shelby substitute?

Mr. WAXMAN. The gentleman is correct.

Mr. BROYHILL. Is that what the Clerk read? Is that what it was, an amendment in the nature of a substitute?

Mr. WAXMAN. If I might try to point out to the gentleman, I have been advised by those who know parliamentary procedure that the practical effect of this would be to amend the Shelby substitute so that if this were adopted the Shelby substitute would have this language added to it. That is the practical effect we are trying to accomplish.

PARLIAMENTARY INQUIRY

Mr. BROYHILL. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN. The gentleman will state his parliamentary inquiry.

Mr. BROYHILL. Is that the way the amendment is drawn?

The CHAIRMAN. The Chair would state this is a perfecting amendment to the Shelby amendment.

Mr. BROYHILL. It is an amendment to the amendment in the nature of a substitute?

The CHAIRMAN. The gentleman is correct.

Mr. BROYHILL. Mr. Chairman, I have no objection to the amendment.

Mr. WAXMAN. I appreciate the gentleman's support for the amendment. I would like to outline what the amendment does.

Mr. SHELBY. Mr. Chairman, will the gentleman yield?

Mr. WAXMAN. I yield to the gentleman from Alabama.

Mr. SHELBY. I have no objection to the amendment.

Mr. WAXMAN. I thank the gentleman.

But if I might point out to the Members, I do want to explain this amendment because I think it is an important decision we are making with regard to a Supreme Court ruling that surprised many of us last week.

The Consumer Product Safety Commission has been one of those agencies which had a provision for legislative veto. Since the Supreme Court has ruled unconstitutional the legislative veto, the question now thrust upon us is how does Congress protect their prerogatives if we want some way to protect excesses by regulatory agencies.

Soon we will have a proposal by our colleague from Georgia (Mr. LEVITAS), and that proposal seeks to address the issue by requiring that every time there is a proposed regulation Congress would have to adopt that regulation and the President would have to sign it. I believe that kind of a proposal would relegate a regulatory agency into a body that will simply make recommendations to us for additional laws. That could mean interminable delays, if not permanent stopping of regulations that a regulatory agency thinks appropriate.

What we are proposing as an alternative is an amendment that provides that no Consumer Product Safety Commission rule will take effect for 90 days, during which time Congress may reject it by passage and enactment of a joint resolution.

Unlike the Levitas amendment, I think this is clearly constitutional. I think there are some constitutional questions that would still remain for the Levitas proposal.

But I think there are very practical advantages to this type of approach. It does not call upon Congress to affirm every agency rule, amendment, or revocation of a rule. It permits Congress to focus our attention on those matters that are truly controversial or constitute an abuse of authority.

Further, the substitute amendment does not indefinitely delay CPSC regulations which may prevent deaths and serious injuries.

If Congress had to go ahead and pass a new law to adopt every suggested regulation we could have a very long period of time, many years, before some of these regulations would take effect, and the public would be vulnerable to all of the hazards that would be there in the meantime.

Let me give you an example involving the Food and Drug Administration. In the recent case of the Tylenol poisonings, both the industry and the FDA wanted regulations regarding tamper resistent packaging. Moving as quickly as possible, it took the agency several months to promulgate the regulations.

The Levitas proposal would delay indefinitely those regulations, which by the way, in that particular case industry, the Food and Drug Administration and the public all desperately wanted.

□ 1730

At least under the substitute amendment those regulations would have taken effect in 90 days if for some reason Congress did not act. CPSC does not promulgate many regulations but it is hard to imagine any justification for delaying indefinitely a standard which prevents infants from strangling in their cribs——

(By unanimous consent, Mr. WAXMAN was allowed to proceed for 2 additional minutes.)

Mr. WAXMAN. Or a standard which prevents hundreds of child deaths and thousands of poisonings each year; while consumers are put at risk under this Levitas proposal, so is industry. The probable effect of that effect upon judicial review is most troubling.

Under current law agency rules must be promulgated in accordance with detailed procedures and supported by substantial evidence. However, under the Levitas proposal any defect in agency procedures or lack of evidence to support the rule may be cured by congressional affirmation of the rule. Thus, the Levitas amendment may deny an industry a meaningful judicial review of that rule. Finally, the amendment to the amendment in the nature of a substitute permits Congress to control the administrative process without stripping CPSC of its rule-making authority. The Levitas amendment, however, turns CPSC into little more than a study commission. They could study all these problems, they could come up with regulations and then Congress could act the same as we could now without this proposal before us. I know we are hard-pressed to think of an alternative to the legislative veto. I think this is a reasonable alternative. I think it allows us to exercise our oversight jurisdiction in a way that would prevent the excesses that we saw which led to the adoption of the legislative veto. I would urge my colleagues to support the amendment to the amendment in the nature of a substitute as a valid means of controlling the legislative process and urge them to reject the Levitas amendment if offered.

Mr. LEVITAS. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I personally have no objection to this committee adopting the Waxman amendment. I think the substitute, and the bill, are improved with this amendment.

However, this amendment is simply a good first step; but for reasons that I will point out in a moment, it does not go far enough.

It is certainly better than a poke in the eye with a sharp stick, but it still is not really the best solution to dealing with this problem.

Let me expain why it is not: The Waxman amendment provides that CPSC rules could be disapproved by the enactment of a joint resolution—a resolution of disapproval passed by both Houses of Congress and signed by the President—within 90 days after referral of the rule to the Congress. This is a step in the right direction. It is a so-called form of legislative veto. But there is a problem with the approach.

The problem is that the resolution of disapproval which a Member of this body might introduce would be referred to the subcommittee chaired by the gentleman from California, and there is a strong likelihood that if the gentleman from California liked the rule, and did not like the resolution of disapproval, this House would never even have the opportunity of expressing itself on the matter.

That is the inherent weakness. As I say, it is better than nothing. But it would in fact leave to the distinguished gentleman from California, whom I respect and whom I admire greatly, the decision as to whether or not the rule should go forward or not go forward. And it seems to me that what we are looking for in trying to reestablish this balance is a mechanism that would do what the Supreme Court, in effect, said, and that is provide that Congress should act through legislation.

The amendment which I will be offering takes the first cut that the gentleman from California has made with his amendment, but my amendment carries it a step further. My amendment offers a better procedure by assuming that the Members of this House have an opportunity to express themselves on whether or not the rule should go forward.

Let me deal with two specific points that the gentleman from California has alluded to as problems with my amendment.

The first is he said there would be delay in seeing some of the good rules come forward. Now, I have been in this House long enough to know that when this House wants to move expeditiously on important matters, bills can be introduced in the morning and be passed by sundown.

In this instance the resolution of approval of a regulation from the CPSC would be assigned to the Committee on Energy and Commerce, turned over to Mr. WAXMAN's subcommittee and if he thought it was a good rule, I have no doubt that we would see it come flying out of that committee in very short order and the House would be able to work its will, again in very short order, as was done, for example, in the saccharin situation several years ago.

So, the fear that there would be delays, I think, is really a false fear, because it would not happen. The gentleman from California would call the shots about timing and we would have plenty of opportunity to act expeditiously on it.

The gentleman from California also expressed concern about Congress having to approve masses of rules. But that fear is also unfounded in the case of the CPSC which we are considering today.

I am not suggesting that the procedure I am proposing today should apply in all cases of rulemaking by all agencies; indeed, there are many reasons why it should not apply in all cases. But in the instance of the Consumer Product Safety Commission this procedure would work. I think it is very important to realize that the CPSC which is to be authorized for 5 years under the bill we are considering, and for 3 years under the substitute, has been given very broad authority.

And this authority was delegated with a legislative veto in place.

If now the legislative veto does not exist and the broad delegation does, we have then the worst of both possible worlds. In the 10 years of the existence of the Consumer Product Safety Commission, they have only issued 35 mandatory rules. So, we are not talking about a mass of rules to be considered. Three a year is what you are looking at on the average if they continue at the same pace.

The Waxman amendment is a step forward and for that reason I urge its adoption, but when action on it is com-

pleted I will offer an amendment which I think will go a step further and put us in a better position.

I yield back the balance of my time.

Mr. NIELSON of Utah. Mr. Chairman, I move to strike the requisite number of words. I will not take the full time. I commend the chairman from California (Mr. WAXMAN) for this amendment.

While it is true the chairman of the subcommittee is a very impressive individual and he does wield a good deal of influence on the Health and Environment Subcommittee, the committee is very independent and we do have very close votes occasionally. I think if a rule came through which was abhorrent to the House, I am sure at least 1 of those 19 members would bring it to our attention. So, I think the Levitas concern is ill founded, and I support the Waxman amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California (Mr. WAXMAN) to the amendment in the nature of a substitute offered by the gentleman from Alabama (Mr. SHELBY), as amended.

The amendment to the amendment in the nature of a substitute, as amended, was agreed to.

AMENDMENT OFFERED BY MR. LEVITAS TO THE AMENDMENT IN THE NATURE OF A SUBSTITUTE OFFERED BY MR. SHELBY, AS AMENDED

Mr. LEVITAS. Mr. Chairman, I offer an amendment to the amendment in the nature of a substitute, as amended.

The Clerk read as follows:

Amendment offered by Mr. LEVITAS to the amendment in the nature of a substitute offered by Mr. SHELBY, as amended: At the end of the matter proposed to be inserted by the amendment insert the following:

APPROVAL OF RULES

SEC. 3. (a) No funds appropriated to the Consumer Product Safety Commission for fiscal year 1984, 1985, or 1986 under the amendment made by section 2 of this Act may be used to place in effect a consumer product safety rule under the Consumer Product Safety Act, a regulation under section 2(q)(1) or 3(e) of the Federal Hazardous Substances Act, or a regulation under section 4 of the Flammable Fabrics Act which rule or regulation is published in final form by the Commission after the date of the enactment of this subsection but before October 1, 1986, unless a joint resolution approving such rule or regulation has been enacted.

(b) To carry out subsection (a) the Consumer Product Safety Commission shall transmit to the Secretary of the Senate and the Clerk of the House of Representatives a copy of each consumer product safety rule promulgated by the Commission under section 9 of the Consumer Product Safety Act, each regulation promulgated by the Commission under section 2(q)(1) or 3(e) of the Federal Hazardous Substances Act, and each regulation promulgated by the Commission under section 4 of the Flammable Fabrics Act, which rule or regulation is published in final form by the Commission after the date of the enactment of this subsection but before October 1, 1986.

(c) For purposes of subsection (a), the term "joint resolution" means—

(1) in the case of a consumer product safety rule, a joint resolution of the Congress which states the following after the resolving clause: "That the Congress approves the consumer product safety rule which was promulgated by the Consumer Product Safety Commission with respect to and which was transmitted to the Congress on ", with the blank spaces being filled in appropriately;

(2) in the case of a regulation promulgated under section 2(q)(1) or 3(e) of the Federal Hazardous Substances Act, means a joint resolution of the Congress which states the following after the resolving clause: "That the Congress approves the regulation which was promulgated by the Consumer Product Safety Commission under section of the Federal Hazardous Substances Act with respect to and which was transmitted to the Congress on ", with the blank spaces being filled in appropriately; and

(3) in the case of a regulation promulgated under section 4 of the Flammable Fabrics Act, means a joint resolution of the Congress which states the following after the resolving clause: "That the Congress approves the regulation which was promulgated by the Consumer Product Safety Commission under section 4 of the Flammable Fabrics Act with respect to and which was transmitted to the Congress on ", with the blank spaces being filled in appropriately.

Mr. LEVITAS (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Georgia?

There was no objection.

(By unanimous consent, Mr. LEVITAS was allowed to proceed for 5 additional minutes.)

The CHAIRMAN. The gentleman from Georgia (Mr. LEVITAS) is recognized for 10 minutes.

Mr. LEVITAS. I thank the Chairman.

I offer this amendment, Mr. Chairman, to respond to the problem that has been created for us by the Supreme Court decision of last week dealing with the question of legislative veto.

□ 1740

And while it is still unclear how broad that decision is and just precisely what it applies to, a fair reading of that opinion would indicate that all legislative or congressional actions to reject rules or regulations which have already been provided for in the law, are no longer possible.

This, of course, creates a number of problems, since many of the delegations of authority that have heretofor been granted were granted in conjunction with a legislative veto. And where there was a broad delegation of authority to an agency to issue a rule or regulation, it was done with the understanding that the legislative veto was in place to curb the excesses of overzealousness on the part of the agencies, or to deal with the situation of where an agency goes beyond the intent of Congress in issuing regulations.

Without an effective mechanism to put the delegation of authority and the control of the Congress back together, we will end up with the worst of both possible worlds. We will end up with a broad delegation of authority, with no legislative veto to act as a curb on that authority. So, if that is where we are after the Court decision, we have now turned over the entire ball game, the entire decisionmaking process, to the unelected officials who are issuing these regulations and who have never—as the distinguished majority leader of this House once observed—have never suffered the inconvenience of running for public office.

Without the legislative veto, we are committing to the agencies the same broad power of legislation that the Congress itself has, but the agencies will have this power without any check by the elected representatives of the people.

Now in the situation of the Consumer Product Safety Commission, for example, you have a group of commissioners who have never been elected by anybody. They are not even in the executive branch of Government to be controlled by the elected President. They are off in an independent agency. And I suggest that with the exception of one or two of my more scholarly colleagues in this House, I daresay that very few Members of this body could name the commissioners on the Consumer Product Safety Commission. Most could not even name a majority of the commissioners. And in some instances, not even one could be named.

And yet, these commissioners are the people who will have the authority to write regulations under a broad delegation of power while we sit helplessly by incapable of doing anything. It seems to me that the American people would demand that we, their elected officials, have some say so in that process before the regulations go into effect.

Not everybody in this country, not every business in this country can afford to spend a couple of hundred thousand dollars in hiring a lawyer to go to court and see if they can overturn a regulation. Instead they look to their elected officials, who are chosen to make the laws that govern their lives, when they have problems with a regulation.

Now let me turn for a moment to the Supreme Court decision. I am not going to quarrel with whether the Supreme Court decision was correct or incorrect. I will leave that to the law review writers over the years. Because

what we are doing today is trying to correct the impact of that decision and I predict this will be the first of many, perhaps even hundreds, of occasions where we are going to have to restructure this delicate balance between the executive and the legislative branches of Government.

The one thing, however, that did come through in that Supreme Court decision was that Congress must act, if it acts at all, by legislation.

My amendment provides that legislation. A joint resolution, passed by both Houses of Congress, and signed by the President, would put into effect a regulation, a rule, that has the broad scope, and the force and effect, of a law passed by the Congress. With the adoption of my amendment, the regulation would indeed be a law passed by the Congress.

I am not looking back at the Supreme Court decision. I feel like a person on a baseball team, who has seen an umpire call a player out, who was obviously safe. And everybody in the stadium knew that this person was safe. But the people on that ball team better not complain about the call of the umpire. They ought to get on with doing something about winning the game and put that behind them. That is what we are doing today.

The amendment that I have offered is one that has already been looked at by the Justice Department. The Justice Department having prevailed in the Supreme Court decision, has advised us that this amendment, which I am offering, is constitutionally consistent with the opinion of the Supreme Court in the case decided last week.

Mr. WRIGHT. Mr. Chairman, will the gentleman yield?

Mr. LEVITAS. I am happy to yield to the distinguished majority leader, the gentleman from Texas (Mr. WRIGHT).

Mr. WRIGHT. I thank the gentleman for yielding.

I just want to be very clear that we understand exactly what the gentleman's amendment would provide.

Is it accurate that the gentleman's amendment provides that there shall be no rulemaking or additional regulations propounded by the agency under this act that will take effect until first new rules or new regulations shall have been affirmatively approved by the Congress?

Mr. LEVITAS. That is the effect of the amendment. It actually works in a different way. It does not affect the validity of the regulation that is issued by the agency. It simply says that no funds for its implementation can be appropriated without the enactment of a joint resolution approving the legislation.

And I should point out that in the 10-year history of the Consumer Product Safety Commission they have issued a total of 35 of these regulations.

Mr. WRIGHT. Thirty-five regulations?

Mr. LEVITAS. Over a 10-year period, which means about three a year on the average. And I would imagine most of them being noncontroversial would have had no problem in securing approval by Congress.

Mr. WRIGHT. I thank the gentleman.

Mr. BROYHILL. Mr. Chairman, will the gentleman yield?

Mr. LEVITAS. I yield to the gentleman from North Carolina.

Mr. BROYHILL. I thank the gentleman for yielding.

Mr. Chairman, I would remind the gentleman again that the vast majority of unsafe products that have been taken off the market, have been taken off as a result of the language in section 15(b) of the act, which has been there since the implementation of this program, which requires the manufacturers, who have knowledge of a defect in a product that is out in the marketplace, that they must report on themselves.

So that self-reporting has resulted in the taking off of the marketplace unsafe products far more than through rulemaking.

Mr. LEVITAS. I thank the gentleman.

Mr. WAXMAN. Mr. Chairman, will the gentleman yield?

Mr. LEVITAS. I yield to the gentleman from California.

Mr. WAXMAN. I thank the gentleman for yielding.

The gentleman's proposal, which the gentleman is offering in addition to the legislative veto which we have just adopted, would say that we are not vetoing a rule, we have got to affirmatively adopt the rule; is that correct?

Mr. LEVITAS. The gentleman is correct. In fairness let me say this: That that would in effect give to either House of the Congress, or to the President, the right to effectively veto a rule, because, as the gentleman knows, in order for a joint resolution to pass, it must pass both Houses and be signed by the President. So obviously, if one House defeats the joint resolution, it would in effect veto the regulations.

Mr. WAXMAN. I do not see the two as being consistent. Under the provision we just adopted, we said that if a regulation may be vetoed by the Congress, it would not take effect for 90 days, and that could be vetoed by a joint resolution; the gentleman is saying that while we can veto it, it would not take effect unless we adopted it as we would any other piece of legislation. How does the gentleman reconcile the two?

Mr. LEVITAS. Well, it is my view, and I say this to the gentleman from California, that the approach that I have offered is an improvement over the approach that the gentleman from California has offered. And that this bill, assuming it passes the House and is then in conference with the other body, would afford to the conferees an opportunity in a more deliberate context to decide which of these two mechanisms is preferable and thereby give us the opportunity to have the one which is the most effective in accomplishing our purposes.

□ 1750

The CHAIRMAN. The time of the gentleman from Georgia (Mr. LEVITAS) has expired.

(On request of Mr. WAXMAN, and by unanimous consent, Mr. LEVITAS was allowed to proceed for 4 additional minutes.)

Mr. LEVITAS. I want to put this into context. This is not a hypothetical or an ideological argument. When the gentleman's committee reported out this legislation for a 5-year extension of the Consumer Product Safety Commission and made some other changes in that law, the Supreme Court decision had not yet been rendered. I suggest to the gentleman that if that decision had come prior to the gentleman's marking up this bill, the members of his committee would have looked very closely at the delegations of authority given to the Consumer Product Safety Commission to make a determination as to whether or not you wanted that broad delegation to continue without the legislative veto. That not being the case, all I am trying to do is maintain the status quo in the relationship between the CPSC and the Congress as it existed prior to the Supreme Court decision. I am not suggesting we go any further. I am simply suggesting that we maintain the right of the Congress to do what we thought we had the right to do before last week.

Mr. WAXMAN. If the gentleman will yield to me further, before last week's decision we thought the Congress could come in and veto a regulation that we thought was inappropriate and excessive by the regulatory agency involved. What we have just adopted was the ability of Congress to go ahead and veto again a regulation. The gentleman is not maintaining the status quo prior to the Court decision; he is saying that these regulatory agencies will do nothing but make recommendations to us for laws and nothing will go into effect until we act.

Mr. LEVITAS. Let me correct the gentleman. I tried to do that earlier. I am not talking about these regulatory agencies; I am talking about the Consumer Product Safety Commission.

I have no doubt that in the next year or two we are going to have to address a number of these statutes and come up with procedures for a number

of agencies that will redress this newfound imbalance between the agencies and the elected Congress. I am simply suggesting that, for the time being, this procedure preserves that status quo with regard to the CPSC. It is an attempt to deal with this problem now rather than let the genie out of the bottle, and risk not getting it back in for 3 or 5 years.

Mr. WAXMAN. If the gentleman will yield to me further on that point, the gentleman has made as an argument why he thought we ought to have this provision that is now before us that if a committee chairman or subcommittee chairman in either this body or the other body did not like a rule, then that individual could refuse to bring up a veto resolution.

Now, of course, if a committee chairman or a subcommittee chairman did not like the rule, he could refuse to bring up legislation to put into effect that regulation.

So we have the opportunity after the regulatory authority and the Consumer Product Safety Commission has made a decision that they ought to do a certain thing with a product that may be hazardous or have a certain standard, that everybody have an opportunity, if some interest group is powerful enough, to veto that regulation from going into effect, either at the committee level, subcommittee level, House or Senate level, Presidential level, and everything is geared and tilted to rejecting a proposal rather than enacting it.

Mr. LEVITAS. Let me say this: As I read the Supreme Court decision, the Supreme Court admonished the Congress to utilize its legislative powers in dealing with the control and accountability of the regulatory agencies.

What I have proposed, as the Justice Department has already suggested, is perfectly consistent with that and carries out that purpose. A joint resolution is a legislative act and would follow the regular procedure.

Now, in terms of the power of the subcommittee chairman or the committee chairman, the question is: Is the subcommittee chairman or the committee chairman more likely to favor or oppose the rules and regulations coming out of the Consumer Product Safety Commission?

I would suggest again, living in the world of reality, that it is a fact he would be more likely to favor those rules.

The CHAIRMAN. The time of the gentleman from Georgia (Mr. LEVITAS) has again expired.

(On request of Mr. KINDNESS and by unanimous consent, Mr. LEVITAS was allowed to proceed for 4 additional minutes.)

Mr. KINDNESS. Mr. Chairman, will the gentleman yield?

Mr. LEVITAS. I yield to the gentleman from Ohio.

Mr. KINDNESS. I thank the gentleman for yielding, and I take this time only to congratulate the gentleman for the thoroughness with which he has approached this problem that is presented now in the light of the Supreme Court decision in the Chada case.

As pointed out a little while ago in the colloquy with the gentleman from California, I think quite correctly, the approach to dealing with this matter does have to be a tailored approach. It seems to me quite appropriate that, in the case of the Consumer Product Safety Commission, the amendment offered by the gentleman from Georgia is very appropriate and does not present a harmful or hurtful situation at all.

Some might say, though, that if this approach were taken with the Internal Revenue Service, with the multiplicity of regulations and interpretations that are involved in their functioning, this would be unworkable.

There are at least four categories of actions subject to legislative veto that have developed over the last 50 years that require different and separate treatments. This is one in the rulemaking area which I think can be served quite appropriately by the approach offered in the gentleman's amendment, which I thoroughly support, and it may be applicable in more places. But I do not think that we should jump to the conclusion that it could be universally applicable, certainly not in the case of formal rulemaking, where there is rulemaking on the record, with hearing and certain formalities in due process.

Very likely this could not apply to article II duties of the President, as presently affected by the War Powers Act. And probably in the budgetary area and appropriations and impoundments and rescissions, and so on, different mechanisms will have to be developed.

We are in a state of change—one might say revolution—in the development of our governmental process. It began some time ago, perhaps, but it was highlighted by the Supreme Court's decision in the Chada case. We are at a breakwater point, a time when we have to look for new ways to deal intelligently with the operations of our governmental processes, and I congratulate the gentleman for his approach in this case which seems to me to make eminent sense. It may, on the other hand, give us the experience to indicate refinements that ought to be developed.

I would have to say that the developments that may occur as a result of the gentleman's amendment here and going foward in point of time may very well teach us that the legislative veto was a really good mechanism as exercised over recent years. But still, we must find within the bounds of the Constitution and the Supreme Court decision a way to operate now, and this I believe is tailor-made and appropriate. I congratulate the gentleman and I support his amendment.

Mr. LEVITAS. I thank the gentleman for doing so.

There are some people who believe that Congress probably should never have delegated rulemaking authority, to being with, certainly not as broadly as we have. They hold that the Congress has the responsibility to legislate under the Constitution and we have really abandoned that responsibility and abrogated that function to the agencies through the broad delegation of rulemaking authority. And with the delegations as broad as we see in the case of the Consumer Product Safety Commission, and with the fact that we are not talking about a large number of regulations, albeit very important ones, there is neither a burden nor an inconsistency with the constitutional framework to say to the Congress: If it is as important a rule as you say it is, why should we not have the buck stop with us?

Mr. GLICKMAN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, perhaps the gentleman from Georgia (Mr. LEVITAS) might want to give me a little attention in a minute, because he and I have discussed this matter several times before.

I have very mixed feelings about the legislative veto. The Supreme Court has ruled on the subject. But I do not want to see a situation develop where executive branch agencies become nothing more than advisory committees to the U.S. Congress. And that conceivably could happen if the proposal of the gentleman from Georgia were applied to every single rule and every single agency, that no rules would take effect without Congress acting affirmatively. I think that is probably an unrealistic view of how the process should operate. At the same time, I recognize that the gentleman is applying it only to this agency. And with the Waxman amendment on there, it does indicate that rules could go into effect if Congress does nothing during that wait-and-see time period.

But I again want to bring to the attention of my colleagues that the best oversight that we can have is through the appropriations process, because the power of the purse is our major power, our congressional power in this country. By House rules and rules of the Democratic Caucus we have limited that oversight process, because what we have said is that we will not permit any riders on appropriation bills except within the province of the Appropriations Committee and on those rare occasions—the gentleman from California (Mr. WAXMAN) has

used it on one occasion—if you can come to the House and you can do it on the full floor, if you can go through a torturous process by which you got to get the committee to rise and defeat that motion to rise and offer the proposition.

Now, when we dealt with that in the full House and in the Democratic Caucus, we were dealing with that rule in the context of a legislative veto. We have no more legislative veto. And, therefore, I would urge my colleagues to talk to the leadership of both parties and maybe try to get the Rules Committee to approach this subject once again, now that the Supreme Court has spoken, because it is time, I believe, to revise that rule and come back so that any Member of this body, just not on the Appropriations Committee, can come to this floor and put a rider on an appropriations bill at least with respect to pending rules and regulations.

□ 1800

Mr. LEVITAS. If the gentleman will yield, while I am not sure I agree with him that the appropriations process is the best way to deal with this type of matter, it certainly is a very effective way.

Mr. Chairman, the way my amendment is structured, I suggest, is designed to do exactly what the gentleman has said. My amendment does not deal with the validity of the regulation. It gets at the appropriations process, providing that no funds authorized can be appropriated for the rule, in order to get around the rule that was adopted by the House at the beginning of this session of Congress, because what it in effect gives us the opportunity to do is bypass the cutoff rule on the appropriations bill, and where we have said through the adoption of this procedure that I have proposed there shall be no funds authorized to be appropriated for this purpose, we have done precisely what the gentleman from Kansas has suggested.

But what I am saying to my colleagues today is something very important. If we do not do this, we have left the entire delegative authority at this agency with no effective control because the proposal of the gentleman from California, while it is better than nothing—as I said, it is better than a sharp stick being poked in your eye—it still does not really get at the type of responsibility that we should have, and the people today are going to have a chance to vote whether they want to turn this power over to the unelected bureaucracy in this case, I am not talking about all agencies or all rules, or whether they want to say, "Look, I got elected to Congress. I am responsible to my people and I am prepared to stand up and pass a bill, a joint resolution, when it is appropriated."

Mr. GLICKMAN. I think the gentleman is probably trying to do in a similar way what I am talking about here. I just like the routine process of appropriations bills because they provide a regularity through the oversight process where this can come up on an annualized basis and it will not require specialized action.

I just fear that without this kind of rider revision that Members will feel reticent about raising the issue or else do the opposite and raise the issue every single time when somebody comes down here and knocks on our door and says, "We do not like this particular rule."

Mr. BROYHILL. Mr. Chairman, will the gentleman yield for a comment?

Mr. GLICKMAN. I yield to the gentleman from North Carolina.

Mr. BROYHILL. I thank the gentleman for yielding.

Mr. Chairman, I appreciate the gentleman's comment on this issue. I certainly agree with him. I was not for the rules change that was made with respect to amendments on appropriations bills, but having said that, I do not like to see appropriations bills cluttered up with these kinds of amendments.

The CHAIRMAN. The time of the gentleman from Kansas (Mr. GLICKMAN) has again expired.

(By unanimous consent, Mr. GLICKMAN was allowed to proceed for 2 additional minutes.)

Mr. BROYHILL. Mr. Chairman, if the gentleman will continue to yield, I really think this is a better way to deal with those regulations that are passed under authority, by the way, that have been granted generally by the authorizing committee and not the Committee on Appropriations.

So it seems to me it is a responsibility of the authorizing committee to be the committee that has the main responsibility of looking over the shoulder at the work product of these agencies.

Mr. GLICKMAN. Well, there are many ways to skin a cat. I guess the proposal that I am talking about is the most democratic-type proposal because in many cases you cannot get these proposals through an authorizing committee, even under the Levitas approach and permitting any Member of Congress to offer an amendment to an appropriations bill clearly democratizes the process. Yet, it also confuses and in some sense bogs down the process, as we have seen during the last few years.

But I just thought this point needed to be raised on the House floor as we are talking about legislative veto.

Mr. KINDNESS. Mr. Chairman, will the gentleman yield?

Mr. GLICKMAN. I yield to the gentleman from Ohio.

Mr. KINDNESS. I thank the gentleman for yielding.

Mr. Chairman, I just wanted to reinforce a point the gentleman from Kansas is making with respect not to rulemaking as much as an area of great concern to many of us, and that is the article II powers of the Presidency. Right now I am not sure we have a mechanism other than the mechanism suggested by the gentleman from Kansas to exercise some degree of interaction and control over actions, for example, now controlled under the War Powers Act.

I would thoroughly agree with the gentleman that the Members of this House ought to be able to raise the questions that sometimes involve very important policy considerations. During the appropriations process, those purse strings are the most important element of the functioning of this House.

Mr. DINGELL. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, I am well aware of the fact that the distinguished gentleman from Georgia has for a long time had an active interest in the matter of legislative veto and the fashion in which these matters should be reviewed by the Congress. I am, of course, sympathetic with his concerns and with the scholarship and effort that has gone into the handling of that matter by the gentleman from Georgia.

The harsh fact of the matter is that the amendment now offered carries with it an enormous number of problems. Let me try and outline some of the questions that I think the House and this committee should answer before it adopts a proposal of this kind.

First of all, have there been any proper hearings or consideration of the matter to ascertain the full meaning both of INS against Chada, and also to ascertain how this amendment would work. The answer is, there have been none, and no one can make a definitive statement at this time as to whether this proposal is constitutional or not constitutional. No one can make a definitive statement as to what would be the rights or the duties of any person under this particular matter.

One of the most interesting consequences that has to be explored, I believe, is what is the impact of this proposal on the regulatory process. The question has to be asked: What must be done with regard to judicial review by a person who is affected by the amendment that is offered by the gentleman from Georgia?

No one can tell. When must a person who feels himself injured or adversely affected by a regulatory action commence his appeal? Must he commence his appeal prior to the time that the

Congress adopts it and enacts it into law, as it must affirmatively, by saying that the action of the agency was defective by failing to comply with the Administrative Procedures Act, by failing to afford adequate notice to some person who has been affected by this action which is taken, and to complain that lack of notice was there, or that he had not been afforded opportunity to be heard or that the record was not adequate or that some other defect had occurred in the administrative process?

Then if the Congress moves forward and affirmatively enacts that which would have been found under current law to be a defective action, what then must the individual do? Can he then go to court to appeal? That is highly doubtful, and let me explain why.

A similar situation obtains in connection with the granting of transatlantic airline routes. If a person finds himself adversely affected and badly impacted by an action that is taken by the CAB in awarding a transatlantic airline route, the courts will say, "You are too early. You cannot come here before this court because the President has to act."

So the individual says, "Very well, I will wait." And he waits until the President has acted, and then when he goes into the court, the court says, "Dear friend, you are too late. The President has acted, and that is a foreign policy question."

Now, under the amendment offered by my good friend from Georgia, it may be too early to appeal because the Congress has not acted and it is not a final action under the Federal Rules of Civil Procedure and under the court cases. But then when he goes into the Congress and the Congress acts, it becomes plain that his action is then too late to complain about procedural defects in the adoption of the rule.

□ 1810

There is no way of knowing what are the consequences of this particular matter.

Mr. LEVITAS. Mr. Chairman, will the gentleman yield at that point?

Mr. DINGELL. I will be glad to yield to the gentleman.

Mr. LEVITAS. I would like to address that particular point before the gentleman goes into his argument.

Mr. DINGELL. I know what the gentleman's intentions are, but the language of the amendment is very silent.

Mr. LEVITAS. Let me address the question of the due process matter. Before the regulation can be proposed by the Consumer Products Safety Commission, there is a procedure by which comments can be received and heard and taken into account. That record will be very much before the gentleman's committee when it decides whether to report favorably or unfavorably.

Mr. DINGELL. Well, supposing then my committee chooses to disregard that question and we simply say that we are not going to be moved by this complaint. We are just going to hammer this thing through. Then what complaint is that fellow going to have about the failure of due process once the Congress has ratified that thing?

Mr. LEVITAS. That is the most important redress.

The CHAIRMAN. The time of the gentleman from Michigan has expired.

(At the request of Mr. LEVITAS, and by unanimous consent, Mr. DINGELL was allowed to proceed for 2 additional minutes.)

Mr. LEVITAS. Mr. Chairman, will the gentleman yield further?

Mr. DINGELL. Of course.

Mr. LEVITAS. It has the most significant redress that is afforded to anybody and certainly is more redress than he has under the rulemaking authority of this Consumer Products Safety Commission. He goes to his elected official and says to his elected official, "I have been done wrong. I want redress," and this procedure is spelled out very clearly. There were hearings on this and discussion on this in the Constitutional Convention in 1789 in Philadelphia where it said that the Congress, acting through both Houses, has the right to pass legislation and it is the people who hold them accountable.

Mr. DINGELL. Mr. Chairman, I thank the gentleman, but the gentleman totally disregards the fact that if the Congress then chooses to disregard the procedural defect which the individual has very wisely and properly pointed out, deny him due process, deny him adequate notice, that the gentleman who wishes to complain about the situation and the unfair treatment before the regulatory agency may be stripped of his rights to really appeal and to deal with that question.

Mr. BETHUNE. Mr. Chairman, will the gentleman yield?

Mr. DINGELL. I yield to the gentleman from Arkansas.

Mr. BETHUNE. Mr. Chairman, I thank the gentleman for yielding.

I wanted to say that I think the gentleman is raising some very good questions. I wanted to make a larger point and I was going to get my own time, and will, but I do not think there will be any objection if we go ahead and continue in this manner.

I think so far as the discussion that I have heard, and I came over because I heard the discussion taking place, is a discussion about how are we going to deal with the questions raised by the INS against Chada decision.

I think certainly it is a complex matter. We are not going to resolve these many questions here today, it is quite obvious.

I have always been a supporter of the legislative veto concept of the gentleman from Georgia because we have found ourselves in this very situation so often.

The CHAIRMAN. The time of the gentleman from Michigan has again expired.

(By unanimous consent, Mr. DINGELL was allowed to proceed for 5 additional minutes.)

Mr. DINGELL. Mr. Chairman, I yield to the gentleman.

Mr. BETHUNE. I have always supported the gentleman from Georgia, because we find ourselves in the situation where the fourth branch of Government is unruly and out of hand and so we out of political expediency, as the court noted, have fashioned this particular tool as a way to try to oversee them. That is all well and good.

What concerns me is that we might get started with the effort to resolve the situation here today before we get down to asking ourselves some questions that are even more fundamental and basic than the questions raised by the gentleman from Michigan.

I make this point. Let us back up and discover why was it that we ever got into the business of legislative veto in the first place. It seems to me the court hit the nail on the head by noticing that we had assumed for ourselves more responsibilities here in Washington than we could discharge; so consequently, we had to figure out ways to overcome the strictures of the Constitution. We devised this hybrid measure.

The point I am trying to make is this. There is no way that we can resolve this question, given the time we have before us today. I do not mind supporting one or the other of the proposals here today to keep the matter under tow for the time being, but I think we have got to start asking ourselves whether or not we made a mistake 50 years ago when we assumed for ourselves all the responsibilities that we now hold as a Central Government.

Maybe we ought to ask ourselves, is the Supreme Court wisely pointing out to us the same lesson the forefathers might have pointed out if they were here, that we ought to delegate out to the States and localities as much as we can and let them do some of the regulatory burden and some of the oversight responsibilities, so that we can focus on larger issues.

The point I am making is that I am willing to go along here today with the full understanding that this is a first step and we are not only going to talk about ways to deal with Chada in the context in which we find ourselves today, but we are going to back up and ask ourselves about these fundamental questions also and the genesis of the legislative veto. That is the extent of

the contribution I would like to make today.

I would hope to participate in the debate as it unfolds over the years to come.

Mr. DINGELL. Mr. Chairman, I thank the gentleman.

There are some other questions that need to be asked. What happens to an industry which is adversely affected by the amendment offered by the gentleman from Georgia?

Does the industry have to prepare to comply and to speculate as to whether or not that matter and that order is final?

Does the industry have to commence to spend money to comply even before the Congress has acted, not knowing what the rights of that agency are before the Congress and not having the clearly defined practices of the courts wherein the courts fix not only the rights of the individual, but the time at which the rules and the regulations which are subject to appeal would go into place?

The answer is that there is no appreciation of what would happen with regard to that.

Now, let us look a little further. Let us ask about relatively minor or trivial actions. Are they going to demand the affirmative action of the Congress to be enacted into law under the amendment offered by the gentleman from Georgia? The answer is that no matter how trivial the action of the regulatory agency might happen to be, including changing one line or one word or one comma, the Congress must reenact that proposal.

Now, of course, this is going to increase the cost to the taxpayers and it is going to increase the delay and the uncertainty that afflicts the citizen who is concerned with the regulatory process.

Beyond this, there are some other questions. How will it impact upon the individual citizen? Will this confer a benefit on those who could go to the Congress, as opposed to the folks who can go to the local courthouse?

The big corporation that has a Washington office will achieve an advantage by this.

Will the ordinary citizen who lives in Sheboygan or someplace like that have the same right? The answer to that question is no, he will not.

The harsh fact of the matter is that I am sure the gentleman from Georgia has the best of intentions, but this is a piecemeal approach to a very major problem. The Congress should defer consideration of this kind of amendment until such time as we have a clear appreciation of what it is that the amendment does.

There have been no opportunities for hearings. There has been no opportunity to hear from constitutional experts, from scholars of the law, to ascertain whether businessmen or consumers who might be affected by this matter in fact want the adoption of this amendment.

The amendment should be rejected. It is bad, it is ill-timed and it should be held off until proper consideration can be afforded before the proper committee.

Mr. WAXMAN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, if I might point out the very peculiar parliamentary procedure status that we are in, we have before us the Shelby substitute, which is a substitute for the committee's recommendation. As I pointed out in the debate earlier, I oppose the Shelby substitute for a number of reasons, because I think the Shelby substitute will do harm to the Consumer Product Safety Commission as a regulatory agency.

We have now an amendment by the gentleman from Georgia (Mr. LEVITAS) to the Shelby substitute, which adds on to the Shelby substitute, even though we have a legislative veto amendment, an additional legislative veto amendment, I think somewhat contradictory, but the gentleman claims that he thinks they are consistent.

I have talked to the gentleman from Alabama (Mr. SHELBY) and if I might engage him in a dialog, I understand the gentleman from Alabama supports the Levitas amendment and will vote for it. Is that a correct statement? I yield to the gentleman.

Mr. SHELBY. Mr. Chairman, I appreciate the gentleman yielding.

I do. I have no disagreement with the gentleman from Georgia's amendment and I have not spoken for it, but I told him that I would not oppose it. That is where I am now.

Mr. WAXMAN. I appreciate the gentleman's comments.

Since the gentleman from Alabama has a substitute pending and he is willing to have his substitute amended by adding the legislative veto provision that we offered and was adopted, as well as the Levitas legislative-type veto proposal, then I would support it as an amendment to Shelby; however, should the Shelby substitute be defeated, and I would urge my colleagues sincerely to defeat the Shelby substitute, then we will have the opportunity to vote on the Levitas amendment again, because I am sure the gentleman from Georgia (Mr. LEVITAS) will offer his amendment at that time.

□ 1820

Mr. DINGELL. Will the gentleman from California yield?

Mr. WAXMAN. I will be pleased to yield.

Mr. DINGELL. I just want my colleagues in the House to appreciate one thing. This body is badly overloaded right now and we do not have the time to properly consider matters that are of great constitutional and great legislative and great financial importance.

If this kind of an amendment is adopted, the Congress will be so overloaded with trivia and piddling matters that we will be incapable of carrying out our essential functions, and we will have, in effect, become a court of review, and we will spend all of our time engaging in piddling undertakings and our attention to great matters will simply no longer be available.

I urge this matter to be rejected.

Mr. KINDNESS. Mr. Chairman, will the gentleman yield?

Mr. WAXMAN. I yield to the gentleman from Ohio.

Mr. KINDNESS. I thank the gentleman for yielding.

I think the gentleman from Michigan has made an interesting point that would be applicable to other agencies and other bills, but my understanding is that the Consumer Product Safety Commission has had an average of about three rules per year. Really most of their activities were about 5 years past. They have not been that active in producing rules in recent years.

This would certainly not be the right answer, as was pointed out earlier, in dealing with the Internal Revenue Service or any other number of agencies. But in this case I think it is a carefully applied approach that makes some sense.

Mr. WAXMAN. If I might reclaim my time, it is my purpose that should the Shelby substitute be defeated, and I hope it will be, that we will have a head-to-head vote on two proposals, on the legislative veto, and I would join my chairman of the full committee, the gentleman from Michigan (Mr. DINGELL), in opposing the Levitas proposal.

I think what that Levitas proposal will do as policy is relegate an agency like the Consumer Product Safety Commission, and I suppose other regulatory agencies when they come up for renewal, to merely study commissions.

If we want to fund study commissions I think we are wasting the taxpayers' money, because these commissions do nothing but study these problems and come up with recommendations, the same as any other commission, and we can maybe adopt them and maybe not.

Mr. DINGELL. Will the gentleman from California yield?

Mr. WAXMAN. I yield to the gentleman from Michigan.

Mr. DINGELL. I would just like my colleagues to know what they are doing in this body, because the gentleman from Georgia (Mr. LEVITAS) you may be assured, will be back with this amendment pointing to the precedent of having had this matter adopted

with regard to the Consumer Product Safety Commission.

What does this mean in terms of changes, in terms of the way the regulatory bodies function?

First of all, there were 15,222 pages of final rules adopted by regulatory agencies; 6,288 were the number of final rules. That is the IRS, Consumer Product Safety Commission, the FTC, the Food and Drug Administration, and everybody else down there who are writing these things.

Proposed rules cover 12,130 pages on a 3,729 total proposed rules.

The CHAIRMAN. The time of the gentleman from California (Mr. WAXMAN) has expired.

(On request of Mr. DINGELL and by unanimous consent, Mr. WAXMAN was allowed to proceed for 3 additional minutes.)

Mr. DINGELL. In addition to this, there are 320 pages of Executive orders which for all intents and purposes fall into the same fashion. They are notices of rulemaking that involved 25,432 pages. This is a total of 58,494 pages of rules issued in 1982.

What the gentleman from Georgia is going to have the body do is to review every single one of those or they simply will not be adopted. If an industry has a complaint, a very legitimate one, as did the auto industry about the airbag situation, we can be absolutely assured that that action will be bogged down in the same kind of mess that some obnoxious and undesirable rule will be. The courts will be absolved of a massive workload which will be transferred to the House of Representatives and to the Senate, and we will be in an unholy mess here.

Mr. LEVITAS. Mr. Chairman, will the gentleman yield?

Mr. WAXMAN. I will be pleased to yield.

Mr. LEVITAS. I thank the gentleman.

First of all, after listening to all those facts recited by the distinguished gentleman from Michigan I wish I had said that. I think it makes a real case for why we need to have some control over the agencies.

But let me give the gentleman from Michigan my assurance that I would not ever think of applying this mechanism to all of the rules and regulations that are issued. There are going to have to be other mechanisms designed for that. But in this instance, and you are talking about reauthorization without an opportunity to do anything except deal with it in the manner I have suggested, which is perfectly constitutional and consistent with the Supreme Court decision.

Mr. DINGELL. Will the gentleman yield?

Mr. WAXMAN. I yield to the gentleman from Michigan.

Mr. DINGELL. There is no assurance that this is constitutional. What the gentleman is telling us is that he views this as some kind of curious smorgasborg where he will offer this particular set of rules in terms of why the Congress is going to review it in this particular agency, and then he will offer another one or offer none to quite a different one. The consequences of what the gentleman seeks to do are going to be a most curious impact on the citizenry who will never be quite sure which set of rules or congressional review will afflict them and what their rights might be under the Administrative Procedures Act or under the rules of the courts.

In consequence, we will have the most uneven and unfair application of law, and we will be functioning under totally untried and curious procedures which will cost enormous amounts of money and sow vast confusion throughout the land, and leave us in an unholy mess.

Mr. KINDNESS. Will the gentleman yield?

Mr. WAXMAN. I will yield to my colleague from Ohio.

Mr. KINDNESS. I thank the gentleman for yielding.

I would just like to point out that this debate on this point and some of the recitations of facts and figures that have been made here all point to how important it is that this body address the problem of regulatory reform. As the gentleman from Michigan and I have discussed privately as well as in a hearing recently, we have to find some better answers.

The CHAIRMAN. The time of the gentleman from California (Mr. WAXMAN) has again expired.

(By unanimous consent, Mr. WAXMAN was allowed to proceed for 2 additional minutes.)

Mr. WAXMAN. I yield to the gentleman from Ohio.

Mr. KINDNESS. I thank the gentleman.

We cannot say this will not work and that will not work, so let us sit here and sink in the quicksand. We must find answers.

I look forward to working with the gentleman from Michigan and others in finding better answers. But let us try to approach it through regulatory reform and not using that word, but perhaps somethng else that provides the answers to governing in a reasonable, rational way with the separation of powers.

I thank the gentleman for yielding.

Mr. WAXMAN. I thank the gentleman for his comments.

Mr. DINGELL. Will the gentleman yield?

Mr. WAXMAN. I yield to the gentleman from Michigan.

Mr. DINGELL. I thank the gentleman from California.

I commend my good friend from Ohio (Mr. KINDNESS). I would observe to the House that drafting this kind of broad, sweeping legislative package dealing with all manner of procedural change at 6:30 by the clock, on an evening when the House has had no opportunity to consider this is perhaps the worst way in the world that we can legislate.

The matter should be dealt with by a committee properly constituted to study the matter, to receive the testimony that is necessary so that we can know the consequences of what we do rather than having to engage in the sheerest kind of speculation.

Mr. WAXMAN. Mr. Chairman, just reclaiming my time, while I do not like the Levitas proposal, if the gentleman from Alabama (Mr. SHELBY) is willing to accept it as a part of his substitute, which I oppose, I think he should have the right to include this provision in his substitute. So I will, under these circumstances right now, vote for the Levitas proposal, and then after that urge that we defeat the Shelby substitute.

Mr. SHELBY. Mr. Chairman, will the gentleman yield?

Mr. WAXMAN. I will be pleased to yield to the gentleman from Alabama.

Mr. SHELBY. I appreciate the gentleman yielding.

As I said earlier, I do support the Levitas amendment and I will be glad to accept it as a part of my substitute.

Mr. WAXMAN. I thank the gentleman.

Mr. BROYHILL. Will the gentleman yield?

Mr. WAXMAN. I yield to the gentleman from North Carolina.

Mr. BROYHILL. I would urge that we accept the Levitas amendment and then accept the Shelby amendment with the legislative veto approval amendments contained therein.

The CHAIRMAN. The time of the gentleman from California (Mr. WAXMAN) has again expired.

(By unanimous consent, Mr. WAXMAN was allowed to proceed for 30 additional seconds.)

Mr. WAXMAN. I just wanted to point out since we may be going into two votes that the Shelby substitute has been opposed by and is opposed by the Consumer Federation of America, the AFL-CIO, the National Council of Consumer Citizens, the Consumers Union, the American Academy of Pediatrics, the International Association of Machinists, and the International Ladies Garment Workers Union.

So I would urge a "No" vote on the Shelby substitute when we get to that point.

● Mr. FAUNTROY. Mr. Chairman, I rise in support of H.R. 2668, the Consumer Product Safety Act amendments which would authorize appropriations for fiscal years 1984-88 for the Consumer Product Safety Commission. This bill would insure that the Consumer Product Safety Com-

mission would be able to operate in an effective way and would offset the effect of the crippling budget cuts that this agency has suffered in the past 2 years and which have impacted negatively on the Commission's ability to protect the public health and safety.

This multiple-year authorization is necessary because the cuts made in fiscal year 1982 have resulted in substantial reductions in consumer safety, with agency inspections reduced by 44 percent, recall checks reduced by 64 percent, and investigations cut back by 14 percent. This much needed bill would authorize $47 million in fiscal year 1984, $49 million in fiscal year 1985, $52 million in fiscal year 1986, $54 million in fiscal year 1987, $57 million in fiscal year 1988. Additionally, this measure would set a minimum personnel level for the Commission at 650 full-time employees as compared with 889 in fiscal year 1981 and 636 in fiscal year 1983.

It is a commentary on the policies of this administration that it is necessary to require by statute that the Commission maintain a minimum personnel level in order that the agency be capable of enforcing the law. The General Accounting Office has reported that the Consumer Product Safety Commission has lost 32 percent of its scientific and technical staff in the preceding 2 years. It is also known, that the Office of Management and Budget would impose further cuts by 1985 that would have the effect of reducing agency staff by a total of 36 percent below the fiscal year 1981 numbers. Such reductions would cripple the agency's ability to protect our constituents against dangerous products.

Mr. Chairman, this 5-year reauthorization is very much needed and is not at all unusual. It will enable the Consumer Product Safety Commission to conduct the effective long range planning essential to its mandate to protect the public health and safety. This 5-year authorization will not prevent effective public policy oversight by the Congress, and it is my understanding that the Committee on Energy and Commerce will be conducting periodic and complete reviews of the Consumer Product Safety Commission's programs.

I urge support of H.R. 2668, the Consumer Product Safety Act amendments as it is in the public interest.●

● Mr. WALGREN. Mr. Chairman, I support H.R. 2668 which will continue the Consumer Product Safety Commission as an independent agency for 5 years. This bill will reaffirm the intent of Congress to act effectively to reduce unreasonable risks of injury caused by consumer products. As a member of the Subcommittee on Health and the Environment, which drafted this bill, I heard testimony that during the Commission's 10-year history there has been a decrease in injuries related to consumer goods and an improvement of production standards.

In 1973, Congress established the Consumer Product Safety Commission to protect the public from unreasonable risks of injury associated with consumer products. Since its creation, the Commission has encouraged and assisted in the development of voluntary standards by private groups, developed mandatory standards, banned products when necessary, and organized recalls and corrective activities with manufacturers to remove hazardous products from the market. By the late 1970's, an estimated 100,000 injuries and over 1 million potential injuries were averted by product recall alone. By increasing consumer and manufacturer awareness of product safety, the Commission has served the public well.

Much of the Commission's work has been for the safety of our children. One example is enforcing the Poison Prevention Packaging Act which requires child-resistant packaging for aspirin, prescription drugs, household cleaners and poisonous substances. Because of child-resistant packaging, over 10,000 injuries which would require emergency room treatment and approximately 50 deaths are prevented each year.

In the area of education, the Commission, with the help of State and local consumer affairs groups, has developed the expectant parent program to inform expectant parents about nursery furniture and equipment, sleepwear, toy safety, and poison prevention.

I am pleased the Energy and Commerce Committee, on which I serve, agreed to my amendment to H.R. 2668 requiring the Commission to hold a public hearing when deciding its annual agenda and priorities. Until recently, there was no real opportunity for public input in the priority-setting process. The staff received information from coroners, medical examiners, consumers, and newspaper articles. The staff then made recommendations to the commissioners based on the budget and various considerations such as the severity of the injury—and perhaps personal preferences. While votes were cast in a public session, there was no real opportunity for public input. As suggested by the American Academy of Pediatrics, my amendment requires the Commission to hold a public hearing on its annual agenda and priorities. This amendment will encourage input from people with experience with actual product problems. Doctors, for example, who have treated patients injured by a product will be able to share their concern about the product with the Commission. Also, it would work against possible staff biases with respect to the Commission's agenda.

Besides developing its own standards, in some cases, the Commission also relies on voluntary standards from industry. In fact, voluntary industry efforts to improve the safety of consumer products have proven to be one of the most cost-effective tools for reducing unreasonable risks of injuries from consumer goods. Over 102 voluntary standards are presently enforced. For example, the Commission works with the American Society for Testing and Materials to increase slip-resistance of bathtub and shower surfaces. This voluntary measure prevents over 100 deaths per year in bathtub slipping accidents. When voluntary standards cannot be developed, the Commission must develop mandatory standards, as they did for rotary power mowers.

In consideration of this bill, some controversy developed over agency disclosure of information that came to its attention. When the Commission informs the public about the safety of a consumer product, it must take reasonable steps to assure the accuracy and fairness of the information. However, under current law, if someone asks the Commission if they have received any information or evidence of hazard, before responding the agency must first give all such information to the manufacturer for review and comment. This requirement, while well intended, has resulted in much delay and inaction. Under the bill, the Commission would respond to the requester, but stamp each page with a disclaimer indicating that the agency has not yet determined the accuracy of the information or the hazard of a product. Thus, the Commission would not release the material with its imprimatur or make any suggestion that they have in fact determined that a product is unsafe; rather, the Commission would make the material available while determining its safety. This seems to be a reasonable approach that will inform the public of possible hazards, yet protect the integrity of a product and company if the information is adverse. This is in fact the way requests like this are handled under the Freedom-of-Information Act by all other Federal agencies.

In my view, H.R. 2668 is a reasonable, necessary bill. It strikes a good balance between the needs of industry and the needs of the consumer. In one public opinion poll, the Consumer Product Safety Commission was the only Government agency to receive a positive public rating. I would like to commend Congressman WAXMAN for his diligent efforts in leading us in the House in developing a sound bill that properly balances the interest of manufacturers against the need to safeguard the public from unnecessary

risk and harm. I urge my colleagues to support this legislation.●

● Mr. RICHARDSON. Mr. Chairman, I rise in strong support of H.R. 2668, the Consumer Product Safety Amendments of 1983. This bill will reauthorize the Consumer Product Safety Commission (CPSC) over the next 5 years at a responsible level and it will restore the Commission's ability to rid the marketplace of dangerous products.

The Commission has the enormous responsibility of protecting the health and safety of the American consumer. Its jurisdiction extends over 15,000 consumer products and over 1 million manufacturers and retailers. Although the CPSC is the smallest health and safety agency in the Federal Government, it is one of the most effective. In its 10-year history, the Commission has recalled over 300 million dangerously defective products averting millions of serious injuries to consumers and countless expensive lawsuits against industry.

Regrettably, the Commission suffered a severe funding reduction in 1981. That shortsighted cut greatly reduced the effectiveness of the CPSC. Thirty-two percent of the Commission's scientific and technical personnel left the agency. Field inspections, recall checks, product investigations have all been curtailed dramatically. Eight CPSC field offices have been closed since 1981.

H.R. 2668 will remedy these problems by restoring the CPSC budget to realistic levels and by giving the Commission the same power to administer the law as other health and safety agencies enjoy. The 5-year authorization is reasonable and will allow necessary long-term planning. The bill also sets a minimum personnel level for the Commission at 650 full-time employees. This will prevent the administration from crippling the agency by reducing its staff as the Office of Management and Budget (OMB) has done in the past. OMB plans further cuts in 1985 that would reduce agency personnel by a total of 36 percent below 1981 level. We must not allow that to happen.

Mr. Chairman, numerous public opinion polls have clearly shown the American people want adequate protection in the marketplace. I urge my colleagues to vote for H.R. 2668 as reported by the Energy and Commerce Committee to provide the CPSC with the funds necessary to carry out its mandate to protect the public from unsafe products.●

● Mr. GILMAN. Mr. Chairman, I wish to express strong support of H.R. 2668, the Consumer Product Safety Commission amendments. There is no more deserving agency in the Federal Government than one which simply seeks to investigate and inform the public about products which are unsafe to handle or purchase.

In the first 10 years of its existence, the CPSC has demonstrated its dedication to the public welfare, having taken 3,174 actions against regulated products posing substantial hazards, resulting in the removal of nearly 300 million potentially hazardous product units from the marketplace. The Consumer Product Safety Commission has jurisdiction over the products manufactured or distributed by more than 2.5 million businesses—about one-half of all businesses in the United States, which produce an estimated 15,000 consumer products.

Among the statutes under the authority of the Consumer Product Safety Commission is the Flammable Fabrics Act, provisions of which I have been concerned about for several years. Inadequacies in this act were brought to my attention by Dr. Ralph Milliken, an anesthesiologist from my congressional district. In the last few years, operating room fires have become more and more prevalent due to the increased use of high technology instruments, including electrocauteries and lasers. These tools are used in surgery and come in contact with the surgical gowns and drapes used to cover the patient; consequently, the drapes are ignited and burns suffered by the patient as well as medical personnel present in the operating room. This serious problem is not known to the public generally, as most cases arising out of these incidents are settled out of court.

Because the surgical gowns and drapes used in hospitals are essentially paper, they ignite rapidly, and in an already tense situation, seriously disrupt the surgical process. Dr. Milliken testifed before the Health Subcommittee when hearings were held on amending the Consumer Product Safety Commission authorization, and provided the subcommittee with the results of his years-long investigation. Working with Dr. Milliken and the subcommittee, I was then able to have included in the bill a provision which would change the designation of surgical drapes, from one of "interior furnishings" to that of "wearing apparel." Because of this, surgical drapes will not be required to be more flame-resistant, and I urge the Consumer Product Safety Commission to adopt its most stringent standard in this matter, that of designating all surgical drapes and gowns as "children's apparel." A patient under anesthesia has no cognizance of what is going on around him, and he is totally helpless within the confines of the operating room under those cirsumstances. The patient is as helpless as an infant, and it is our responsibility, and that of the manufacturers of these gowns, to ensure the safety of both the patient as well as all medical personnel working in the operating room.

Mr. Chairman, I thank the subcommittee chairman, the gentleman from California (Mr. WAXMAN) for his assistance in including this provision as part of the bill, mindful of the fact that this portion of the bill can only be to the benefit of everyone. I was pleased that this section was adopted by the full Committee on Energy and Commerce.●

The CHAIRMAN. The question is on the amendment offered by the gentleman from Georgia (Mr. LEVITAS) to the amendment in the nature of a substitute offered by the gentleman from Alabama (Mr. SHELBY), as amended.

The amendment to the amendment in the nature of a substitute, as amended was agreed to.

The CHAIRMAN. The question is on the amendment in the nature of a substitute offered by the gentleman from Alabama (Mr. SHELBY), as amended.

The question was taken; and the Chairman announced that the ayes appeared to have it.

RECORDED VOTE

Mr. WAXMAN. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 238, noes 177, not voting 18 as follows:

[Roll No. 231]

□ 1840

The Clerk announced the following pairs:

On this vote:

Mr. McCandless for, with Mr. Florio against.

Mr. Dreier of California for, with Mr. Ford of Michigan against.

Mr. YOUNG of Alaska and Mr. NELSON of Florida changed their votes from "no" to "aye."

Mr. GONZALEZ changed his vote from "aye" to "no."

So the amendment in the nature of a substitute, as amended, was agreed to.

The result of the vote was announced as above recorded.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly, the Committee rose; and the Speaker having resumed the chair, Mr. SKELTON, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 2668), to amend the Consumer Product Safety Act to extend if for 5 fiscal years, and for other purposes, pursuant to House Resolution 227, he reported the bill back to the House with an amendment adopted by the Committee of the Whole.

The SPEAKER. Under the rule, the previous question is ordered.

The question is on the amendment.

The amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

The title of the bill was amended so as to read: "A bill to amend the Consumer Product Safety Act to extend it for three fiscal years, and for other purposes."

A motion to reconsider was laid on the table.

□ 1850

Mr. WAXMAN. Mr. Speaker, I ask unanimous consent for the immediate consideration in the House of the Senate bill (S. 861) to amend the Consumer Product Safety Act (15 U.S.C. 2051 et seq.) to provide authorization of appropriations, and for other purposes.

The Clerk read the title of the Senate bill.

The SPEAKER. Is there objection to the request of the gentleman from California?

Mr. BROYHILL. Mr. Speaker, reserving the right to object, I am not sure what the gentleman is requesting. I wish the gentleman would state again, under my reservation, what he is requesting.

Mr. WAXMAN. If the gentleman will yield, the House has adopted the bill as proposed to it by the Committee. I am now following that action and asking for the House to take up the Senate bill and amend that bill, under the terms of the House bill, which is the usual procedure.

The SPEAKER. The request of the gentleman from California follows the customary procedure. The procedure would be that the Clerk would next report the title of the Senate bill. If the Chair hears no objection to the unanimous-consent request to consider the Senate bill, the House will consider the Senate bill.

Mr. BROYHILL. So all we are doing then is adopting in the Senate bill what we just did?

Mr. WAXMAN. The gentleman is correct.

Mr. MADIGAN. Mr. Speaker, reserving the right to object, I would ask the gentleman from California (Mr. WAXMAN) if it is his intention to insert in the Senate bill the House bill just adopted for the purpose of returning the Senate bill to the Senate for concurrence with the House amendment?

Mr. WAXMAN. If the gentleman will yield, what I propose to do is to insert in the Senate bill the text of the bill just adopted by the House of Representatives, and then I have no way to know what will happen thereafter, but this is the usual procedural motion after the House has acted on a House bill.

Mr. BROYHILL. Mr. Speaker, I have no objection if that is the request, and I withdraw my reservation of objection.

Mr. MADIGAN. Mr. Speaker, I withdraw my reservation of objection.

Mr. LEVITAS. Mr. Speaker, reserving the right to object, I do so to inquire: Is it correct that the House has adopted the action of the Committee of the Whole, and did so by a voice vote?

The SPEAKER. The House has passed the House bill, as amended.

Mr. LEVITAS. I thank the Chair, and I withdraw my reservation of objection.

Mr. SHELBY. Mr. Speaker, reserving the right to object, the procedure with the Senate bill would be for the House to adopt the same language that the House just passed, the Shelby substitute?

Mr. WAXMAN. That is correct.

Mr. SHELBY. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 861

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Consumer Product Safety Commission Authorization Act of 1983".

DISCLOSURE TO CONTRACTORS

SEC. 2. Section 6(a)(8) of the Consumer Product Safety Act (15 U.S.C. 2055(a)(8)) is amended by striking "or employees" and inserting in lieu thereof ", employees or representatives of the Commission (including contractors)".

CHRONIC HAZARD ADVISORY PANEL

SEC. 3. Section 28(b)(1) of the Consumer Product Safety Act (15 U.S.C. 2077(b)(1)) is amended by inserting "that may be the subject of the Panel's investigation" immediately after "product".

AUTHORIZATION OF APPROPRIATIONS

SEC. 4. Section 32(a) of the Consumer Product Safety Act (15 U.S.C. 2081(a)) is amended—

(1) by striking "and" at the end of paragraph (8);

(2) by striking the period at the end of paragraph (9) and inserting in lieu thereof a semicolon; and

(3) by adding at the end thereof the following:

"(10) $35,000,000 for the fiscal year ending September 30, 1984; and

"(11) $35,000,000 for the fiscal year ending September 30, 1985.".

CONGRESSIONAL VETO

SEC. 5. (a) Section 36 of the Consumer Product Safety Act (15 U.S.C. 2083) is amended by adding at the end thereof the following:

"(e) The provisions of this section are enacted by Congress—

"(1) as an exercise of the rulemaking power of the Senate and the House of Representatives, respectively, and as such they are deemed a part of the rules of each House, respectively, but applicable only with respect to the procedure to be followed in that House in the case of resolutions under this section; and they supersede other rules only to the extent that they are inconsistent therewith; and

"(2) with full recognition of the constitutional right of either House to change the rules (so far as relating to the procedure of that House) at any time, in the same manner and to the same extent as in the case of any other rule of that House.

"(f) Except as provided in subsection (i) of this section, resolutions regarding any rule transmitted under subsection (a) of this section shall, upon introduction or receipt from the other House of Congress, be immediately referred by the presiding officer of the Senate or the House of Representatives to the appropriate committee of the Senate or the House of Representatives, as the case may be.

"(g)(1)(A) Except as provided in subparagraph (B) of this paragraph, if the committee to which such a resolution has been referred does not report such resolution within thirty days of continuous session of Congress after the date of transmittal to the Congress of the recommended final rule to which such resolution relates, it shall be in order to move to discharge the committee from further consideration of such resolution.

"(B) If the committee to which such a resolution transmitted from the other House has been referred does not report such resolution within twenty days after the date of transmittal of such resolution from the other House, it shall be in order to move to discharge such committee from further consideration of such resolution.

"(2) Any motion to discharge under paragraph (1) of this subsection must be supported in writing by one-fifth of the Members, duly chosen and sworn, of the House of Congress involved, and is highly privileged in the House and privileged in the Senate (except that it may not be made after such a resolution has been reported with respect to the same rule); and debate thereon shall be limited to not more than one hour, the time to be divided in the House of Representatives equally between those favoring and those opposing the motion to discharge and to be divided in the Senate equally between, and controlled by, the majority leader and the minority leader or their designees. An amendment to the motion is not in order.

"(h)(1) Except as provided in paragraphs (2) and (3) of this subsection, consideration of such a resolution shall be in accord with the rules of the Senate and of the House of Representatives, respectively.

"(2) When a committee has reported or has been discharged from further consideration of such a resolution, or when the companion resolution from the other House has been placed on the calendar of the first House, it shall be in order, notwithstanding the provisions of rule XXII of the Standing Rules of the Senate or any other rule of the Senate or the House of Representatives, at any time thereafter (even though a previous motion to the same effect has been disagreed to) to move to proceed to the immediate consideration of either such resolution. The motion is highly privileged in the House and privileged in the Senate and is not debatable. An amendment to the motion is not in order.

"(3) Debate on such a resolution shall be limited to not more than two hours (except that when one House has debated its resolution, the companion resolution shall not be debatable), which shall be divided in the House of Representatives equally between those favoring and those opposing the resolution and which shall be divided in the Senate equally between, and controlled by, the majority leader and the minority leader or their designees. A motion further to limit debate is not in order. An amendment to, or motion to recommit, the resolution is not in order. A motion to reconsider shall be in order only on the day on which occurs the vote on adoption of the resolution, and shall not be debatable. Any other motions shall be decided without debate.

"(i) If such a resolution has been ordered reported or discharged from the committee of the House to which it was referred, and that House receives a resolution with respect to the same rule from the other House, the resolution of the other House shall be placed on the appropriate calendar of the first House. If prior to the disposition of a resolution of one House, that House receives the companion resolution from the other House, the vote in the first House shall occur on the resolution of the other House.".

(b) Section 17 of the Flammable Fabrics Act (15 U.S.C. 1204) is amended by adding at the end thereof the following:

"(e) The provisions of this section are enacted by Congress—

"(1) as an exercise of the rulemaking power of the Senate and the House of Representatives, respectively, and as such they are deemed a part of the rules of each House, respectively, but applicable only with respect to the procedure to be followed in that House in the case of resolutions under this section; and they supersede other rules only to the extent that they are inconsistent therewith; and

"(2) with full recognition of the constitutional right of either House to change the rules (so far as relating to the procedure of that House) at any time, in the same manner and to the same extent as in the case of any other rule of that House.

"(f) Except as provided in subsection (i) of this section, resolutions regarding any regulation transmitted under subsection (a) of this section shall, upon introduction or receipt from the other House of Congress, be immediately referred by the presiding officer of the Senate or the House of Representatives to the appropriate committee of the Senate or the House of Representatives, as the case may be.

"(g)(1)(A) Except as provided in subparagraph (B) of this paragraph, if the committee to which such a resolution has been referred does not report such resolution within thirty days of continuous session of Congress after the date of transmittal to the Congress of the recommended regulation to which such resolution relates, it shall be in order to move to discharge the committee from further consideration of such resolution.

"(B) If the committee to which such a resolution transmitted from the other House has been referred does not report such resolution within twenty days after the date of transmittal of such resolution from the other House, it shall be in order to move to discharge such committee from further consideration of such resolution.

"(2) Any motion to discharge under paragraph (1) of this subsection must be supported in writing by one-fifth of the Members, duly chosen and sworn, of the House of Congress involved, and is highly privileged in the House and privileged in the Senate (except that it may not be made after such a resolution has been reported with respect to the same rule); and debate thereon shall be limited to not more than one hour, the time to be divided in the House of Representatives equally between those favoring and those opposing the motion to discharge and to be divided in the Senate equally between, and controlled by, the majority leader and the minority leader or their designees. An amendment to the motion is not in order.

"(h)(1) Except as provided in paragraphs (2) and (3) of this subsection, consideration of such a resolution shall be in accord with the rules of the Senate and of the House of Representatives, respectively.

"(2) When a committee has reported or has been discharged from further consideration of such a resolution, or when the companion resolution from the other House has been placed on the calendar of the first House, it shall be in order, notwithstanding the provisions of rule XXII of the Standing Rules of the Senate or any other rule of the Senate or the House of Representatives, at any time thereafter (even though a previous motion to the same effect has been disagreed to) to move to proceed to the immediate consideration of either such resolution. The motion is highly privileged in the House and privileged in the Senate and is not debatable. An amendment to the motion is not in order.

"(3) Debate on such a resolution shall be limited to not more than two hours (except

that when one House has debated its resolution, the companion resolution shall not be debatable), which shall be divided in the House of Representatives equally between those favoring and those opposing the resolution and which shall be divided in the Senate equally between, and controlled by, the majority leader and the minority leader or their designees. A motion further to limit debate is not in order. An amendment to, or motion to recommit, the resolution is not in order. A motion to reconsider shall be in order only on the day on which occurs the vote on adoption of the resolution, and shall not be debatable. Any other motions shall be decided without debate.

"(i) If such a resolution has been ordered reported or discharged from the committee of the House to which it was referred, and that House receives a resolution with respect to the same regulation from the other House, the resolution of the other House shall be placed on the appropriate calendar of the first House. If prior to the disposition of a resolution of one House, that House receives the companion resolution from the other House, the vote in the first House shall occur on the resolution of their other House.".

(c) Section 21 of the Federal Hazardous Substances Act (15 U.S.C. 1276) is amended by adding at the end thereof the following:

"(e) The provisions of this section are enacted by Congress—

"(1) as an exercise of the rulemaking power of the Senate and the House of Representatives, respectively, and as such they are deemed a part of the rules of each House, respectively, but applicable only with respect to the procedure to be followed in that House in the case of resolutions under this section; and they supersede other rules only to the extent that they are inconsistent therewith; and

"(2) with full recognition of the constitutional right of either House to change the rules (so far as relating to the procedure of that House) at any time, in the same manner and to the same extent as in the case of any other rule of that House.

"(f) Except as provided in subsection (i) of this section, resolutions regarding any regulation transmitted under subsection (a) of this section shall, upon introduction or receipt from the other House of Congress, be immediately referred by the presiding officer of the Senate or the House of Representatives to the appropriate committee of the Senate or the House of Representatives, as the case may be.

"(g)(1)(A) Except as provided in subparagraph (B) of this paragraph, if the committee to which such a resolution has been referred does not report such resolution within thirty days of continuous session of Congress after the date of transmittal to the Congress of the recommended regulation to which such resolution relates, it shall be in order to move to discharge the committee from further consideration of such resolution.

"(B) If the committee to which such a resolution transmitted from the other House has been referred does not report such resolution within twenty days after the date of transmittal of such resolution from the other House, it shall be in order to move to discharge such committee from further consideration of such resolution.

"(2) Any motion to discharge under paragraph (1) of this subsection must be supported in writing by one-fifth of the Members, duly chosen and sworn, of the House of Congress involved, and is highly privileged in the House and privileged in the Senate (except that it may not be made after such a resolution has been reported with respect to the same rule); and debate thereon shall be limited to not more than one hour, the time to be divided in the House of Representatives equally between those favoring and those opposing the motion to discharge and to be divided in the Senate equally between, and controlled by, the majority leader and the minority leader of their designees. An amendment to the motion is not in order.

"(h)(1) Except as provided in paragraphs (2) and (3) of this subsection, consideration of such a resolution shall be in accord with the rules of the Senate and of the House of Representatives, respectively.

"(2) When a committee has reported or has been discharged from further consideration of such a resolution, or when the companion resolution from the other House has been placed on the calendar of the first House, it shall be in order, notwithstanding the provisions of rule XXII of the Standing Rules of the Senate or any other rule of the Senate or the House of Representatives, at any time thereafter (even though a previous motion to the same effect has been disagreed to) to move to proceed to the immediate consideration of either such resolution. The motion is highly privileged in the House and privileged in the Senate and is not debatable. An amendment to the motion is not in order.

"(3) Debate on such a resolution shall be limited to not more than two hours (except that when one House has debated its resolution, the companion resolution shall not be debatable), which shall be divided in the House of Representatives equally between those favoring and those opposing the resolution and which shall be divided in the Senate equally between, and controlled by, the majority leader and the minority leader or their designees. A motion further to limit debate is not in order. An amendment to, or motion to recommit, the resolution is not in order. A motion to reconsider shall be in order only on the day on which occurs the vote on adoption of the resolution, and shall not be debatable. Any other motions shall be decided without debate.

"(i) If such a resolution has been ordered reported or discharged from the committee of the House to which it was referred, and that House receives a resolution with respect to the same regulation from the other House, the resolution of the other House shall be placed on the appropriate calendar of the first House. If prior to the disposition of a resolution of one House, that House receives the companion resolution from the other House, the vote in the first House shall occur on the resolution of the other House.".

MOTION OFFERED BY MR. WAXMAN

Mr. WAXMAN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WAXMAN moves to strike out all after the enacting clause of the Senate bill, S. 861, and to insert in lieu thereof the provisions contained in the bill, H.R. 2668, as passed, as follows:

That this Act may be cited as the "Consumer Product Safety Amendments of 1983".

SEC. 2. Section 32(a) of the Consumer Product Safety Act (15 U.S.C. 2081(a)) is amended by striking out "and" at the end of paragraph (8), by striking out the period at the end of paragraph (9) and inserting in lieu thereof a semicolon, and by adding after paragraph (9) the following:

"(10) $35,700,000 for the fiscal year ending September 30, 1984;

"(11) $37,485,000 for the fiscal year ending September 30, 1985; and

"(12) $39,360,000 for the fiscal year ending September 30, 1986.".

SEC. 3. In fiscal years 1985 and 1986 the Consumer Product Safety Commission shall use funds appropriated under the amendment made by section 2 for the Flammable Fabrics Act to include within the definition of articles of wearing apparel surgical drapes which are used to completely or partially cover patients undergoing surgery.

DISAPPROVAL OF RULES

SEC. 4. (a) During the period for which funds are authorized to be appropriated under the amendment made by section 2, no consumer product safety rule promulgated under section 9, no regulation promulgated under section 2(q)(1) or 3(e) of the Federal Hazardous Substances Act, or regulation promulgated under section 4 of the Flammable Fabrics Act may take effect if, within 90 days of continuous session of the Congress which occur after the date of the promulgation of the rule of regulation, a joint resolution disapproving such rule is enacted.

(b) To carry out subsection (a) the Consumer Product Safety Commission shall transmit to the Secretary of the Senate and the Clerk of the House of Representatives a copy of each consumer product safety rule promulgated by the Commission under section 9 of the Consumer Product Safety Act, each regulation promulgated by the Commission under section 2(q)(1) or 3(e) of the Federal Hazardous Substances Act, and each regulation promulgated by the Commission under section 4 of the Flammable Fabrics Act, which rule or regulation is published in final form by the Commission after the date of the enactment of this subsection but before October 1, 1988.

(c) For purposes of subsection (a), the term "joint resolution" means—

(1) in the case of a consumer product safety rule, a joint resolution of the Congress which states the following after the resolving clause: "That the Congress disapproves the consumer product safety rule which was promulgated by the Consumer Product Safety Commission with respect to and which was transmitted to the Congress on ", with the blank spaces being filled in appropriately;

(2) in the case of a regulation promulgated under section 2(q)(1) or 3(e) of the Federal Hazardous Substances Act, means a joint resolution of the Congress which states the following after the resolving clause: "That the Congress disapproves the regulation which was promulgated by the Consumer Product Safety Commission under section of the Federal Hazardous Substances Act with respect to and which was transmitted to the Congress on ", with the blank spaces being filled in appropriately; and

(3) in the case of a regulation promulgated under section 4 of the Flammable Fabrics Act, means a joint resolution of the Congress which states the following after the resolving clause: "That the Congress disapproves the regulation which was promulgated by the Consumer Product Safety Commission under section 4 of the Flammable Fabrics Act with respect to and which was transmitted to the Congress on ", with the blank spaces being filled in appropriately.

APPROVAL OF RULES

SEC. 5. (a) No funds appropriated to the Consumer Product Safety Commission for fiscal year 1984, 1985, or 1986 under the amendment made by section 2 of this Act may be used to place in effect a consumer product safety rule under the Consumer Product Safety Act, a regulation under section 2(q)(1) or 3(e) of the Federal Hazardous Substances Act, or a regulation under section 4 of the Flammable Fabrics Act which rule or regulation is published in final form by the Commission after the date of the enactment of this subsection but before October 1, 1986, unless a joint resolution approving such rule or regulation has been enacted.

(b) To carry out subsection (a) the Consumer Product Safety Commission shall transmit to the Secretary of the Senate and the Clerk of the House of Representatives a copy of each consumer product safety rule promulgated by the Commission under section 9 of the Consumer Product Safety Act, each regulation promulgated by the Commission under section 2(q)(1) or 3(e) of the Federal Hazardous Substances Act, and each regulation promulgated by the Commission under section 4 of the Flammable Fabrics Act, which rule or regulation is published in final form by the Commission after the date of the enactment of this subsection but before October 1, 1986.

(c) For purposes of subsection (a), the term "joint resolution" means—

(1) in the case of a consumer product safety rule, a joint resolution of the Congress which states the following after the resolving clause: "That the Congress approves the consumer product safety rule which was promulgated by the Consumer Product Safety Commission with respect to and which was transmitted to the Congress on ", with the blank spaces being filled in appropriately;

(2) in the case of a regulation promulgated under section 2(q)(1) or 3(e) of the Federal Hazardous Substances Act, means a joint resolution of the Congress which states the following after the resolving clause: "That the Congress approves the regulation which was promulgated by the Consumer Product Safety Commission under section of the Federal Hazardous Substances Act with respect to and which was transmitted to the Congress on ", with the blank spaces being filled in appropriately; and

(3) in the case of a regulation promulgated under section 4 of the Flammable Fabrics Act, means a joint resolution of the Congress which states the following after the resolving clause: "That the Congress approves the regulation which was promulgated by the Consumer Product Safety Commission under section 4 of the Flammable Fabrics Act with respect to and which was transmitted to the Congress on ", with the blank spaces being filled in appropriately.

The motion was agreed to.

The Senate bill was ordered to be read a third time, was read the third time, and passed.

The title of the Senate bill was amended so as to read: "An Act to amend the Consumer Product Safety Act to extend it for three fiscal years, and for other purposes."

A motion to reconsider was laid on the table.

A similar House bill (H.R. 2668) was laid on the table.

GENERAL LEAVE

Mr. WAXMAN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill just passed.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

AUTHORIZING CLERK TO MAKE CORRECTIONS IN ENGROSSMENT OF HOUSE AMENDMENT TO S. 861

Mr. WAXMAN. Mr. Speaker, I ask unanimous consent that the Clerk be authorized to correct section numbers, cross references, and typographical errors, and correct the title in the engrossment of the amendment of the House to the Senate bill, S. 861.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate, by Mr. Sparrow, one of its clerks, announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 3132) entitled "An act making appropriations for energy and water development for the fiscal year ending September 30, 1984, and for other purposes."

The message also announced that the Senate agrees to the amendments of the House to the amendments of the Senate numbered 17, 25, and 26 to the above-entitled bill.

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 3135) entitled "An act making appropriations for the legislative branch for the fiscal year ending September 30, 1984, and for other purposes."

The message also announced that the Senate agrees to the amendments of the House to the amendments of the Senate numbered 1, 2, and 17 to the above-entitled bill.

The message also announced that the Senate had passed with amendments in which the concurrence of the House is requested, a bill of the House of the following title:

H.R. 3069. An act making supplemental appropriations for the fiscal year ending September 30, 1983, and for other purposes.

The message also announced that the Senate insists upon its amendments to the bill (H.R. 3069) entitled "An act making supplemental appropriations for the fiscal year ending September 30, 1983, and for other purposes", requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. HATFIELD, Mr. STEVENS, Mr. WEICKER, Mr. MCCLURE, Mr. LAXALT, Mr. COCHRAN, Mr. ANDREWS, Mr. ABDNOR, Mr. KASTEN, Mr. D'AMATO, Mr. MATTINGLY, Mr. RUDMAN, Mr. STENNIS, Mr. INOUYE, Mr. EAGLETON, Mr. CHILES, Mr. JOHNSTON, Mr. HUDDLESTON, Mr. BURDICK, Mr. DECONCINI, and Mr. BUMPERS to be the conferees on the part of the Senate.

The message also announced that the Senate had passed a bill of the following title, in which the concurrence of the House is requested:

S. 925. An act to make certain technical corrections in the Atlantic Salmon Convention Act of 1982.

LEGISLATIVE PROGRAM

(Mr. MICHEL asked and was given permission to address the House for 1 minute.)

Mr. MICHEL. Mr. Speaker, I have asked for this time for the purpose of inquiring of the distinguished majority leader the program for the balance of the day and, since tomorrow is our getaway day for the July Fourth, recess, I think the Members would like to be brought up to date.

I yield to the majority leader for that purpose.

Mr. WRIGHT. I am delighted to respond to the distinguished minority leader.

This concludes the legislative business for today.

Upon our adjournment today, we will adjourn to convene at 10 o'clock tomorrow morning.

Tomorrow the House will take up, first of all, a resolution relating to an investigation by the Committee on Standards of Official Conduct.

Following that, the House will adopt rules only on the following three bills:

H.R. 2760, amendment to the Intelligence Authorization Act for fiscal year 1983; H.R. 10, National Development Investment Act; and H.R. 1, Housing Recovery Act of 1983.

We will do this in order so that on our get-back week from the Fourth of July home district work period, those bills might be available for our consideration in the House.

Having adopted those rules and that resolution, we would then proceed to the consideration of two measures tomorrow. One is House Concurrent Resolution 126, to commemorate the 100th birthday of Harry S Truman; and the other is H.R. 1398, providing

daylight saving time. We would complete consideration of that bill.

We would hope to be able to conclude all of that and to adjourn by a reasonable hour tomorrow, perhaps midafternoon, or even earlier, if everyone cooperates.

When we adjourn tomorrow we would adjourn to meet on Monday, July 11.

Mr. MICHEL. Might I interrupt the majority leader to ask, do we need a rule on the Harry S. Truman legislation, or did the House already adopt that?

Mr. WRIGHT. It is a resolution from the Rules Committee, I would respond, and, therefore, it does not need a rule. We would simply take it up. It has 1 hour of general debate.

Then on Monday, July 11, when we return, we hope not to have any votes of a substantive nature on that Monday.

There are three suspension bills scheduled, but we would postpone votes on the bills on the Suspension Calendar until Tuesday, July 12, if any recorded votes are demanded.

The suspension bills are:

H.R. 2163, to amend the Federal Boat Safety Act of 1971; H.R. 2809, to establish a U.S. Fish and Wildlife Foundation; and H.R. 3392, to freeze all tobacco price supports at fiscal year 1983 levels.

Having debated those bills, we would proceed to general debate only on two bills, H.R. 10, the National Development Investment Act, an open rule, with 1 hour only of general debate, the rule having been adopted; and H.R. 1, the Housing Recovery Act of 1983, which is a 2-hour open rule, and general debate only.

□ 1900

On Tuesday we meet at noon. We would have recorded votes on the suspensions debated Monday, if any have been demanded. We would proceed to complete consideration on H.R. 10, the National Development Investment Act.

Then on Wednesday we meet at noon. We take up:

H.R. 3021. Health insurance for the unemployed, subject to the granting of a rule; and

H.R. 2769. Caribbean Basin Economic Recovery Act under a modified 2-hour rule.

On Thursday and Friday we would meet at 10 a.m. We would hope to complete consideration of H.R. 1, the Housing Recovery Act of 1983, and take up H.R. 2957, the International Recovery and Financial Stability Act; that is, the International Monetary Fund, under an open 2-hour rule.

The House would adjourn by 3 p.m. on Friday of that week. Adjournment times on other days will be announced, and any additional program would be announced later.

Mr. MICHEL. Mr. Speaker, I notice the gentleman did not mention the intelligence matter on which we will consider the rule tomorrow. Is that left in limbo, as to whether or not we would or would not be considering that measure during that week of July 11?

Mr. WRIGHT. It has been requested by the chairman of the Committee on Intelligence, the manager of that bill, that we postpone until the following week, which probably would be on the 19th of July, the session which would be held in private, the executive session of the House, for the purpose of considering a matter relating to that intelligence legislation.

Mr. MICHEL. And furthermore, the way that rule was originally to be proposed or constructed was to have in that legislation all amendments be printed in the RECORD, I think, by July 11. In view of the slippage on consideration, would that date still hold, or would there be an adjustment for that?

Mr. WRIGHT. I think we would adopt the rule. The rule provides for printing of amendments by the 11th. If that rule is adopted tomorrow, then that would apply.

Mr. MICHEL. And would that date of July 11 also hold true for amendments printed in the RECORD for the housing bill, H.R. 1, by July 11?

Mr. WRIGHT. I am sorry to say I am not familiar with the provisions of that rule, but whatever the rule provides, assuming it is adopted tomorrow, would be governing.

Mr. MICHEL. Then in checking back, I see that we do have to have a rule for the 100th anniversary of the birth of Harry Truman, House Resolution 226, as reported by the Committee on Rules, so will we not have to take that up tomorrow also?

Mr. WRIGHT. The minority leader is correct. I was in error when earlier I stated that a rule was not required. The gentleman from Illinois is eminently correct. We will have to adopt a rule and then go to the consideration of the resolution itself.

Mr. MICHEL. So than we will have four rules to consider tomorrow morning.

Mr. WRIGHT. That is correct.

Mr. DANIEL. Mr. Speaker, will the gentleman yield?

Mr. MICHEL. I am happy to yield to my friend, the gentleman from Virginia.

Mr. DANIEL. Mr. Speaker, could the distinguished majority leader give us any indication of when we will finish the consideration of the defense authorization bill at this time?

Mr. WRIGHT. It is presently planned that we would take up that bill on the week of the 18th of July and would conclude it during the week. We have, as the gentleman is well aware, concluded most of the bill. Some small parts of it remain. We hope to be able to bring that bill back to the floor on the week of July 18, the second week after our return, and conclude it that week.

Mr. DANIEL. I thank the gentleman.

Mr. MICHEL. I wonder if I might ask the distinguished majority leader one further question, that being: Members have asked what the getaway time might be tomorrow. I know that is rather unpredictable at times, but with four rules to be considered, would the majority side consider clustered votes for four rules if we take them up one right after the other? Is that too much to ask?

Mr. WRIGHT. I know of no reason why that could not be accommodated, if it would facilitate voting. We might reasonably expect to handle it that way. Beyond that, I should hope that Members on both sides might be cooperative in limiting their verbosity and the description of the rules and on these two matters that we later will debate. If there is general cooperation on all sides, I think it reasonable to assume that we might get away by early afternoon. Absent that, of course, we could go later.

Mr. MICHEL. I thank the gentleman, and we will certainly do our best to cooperate on this side.

DISPENSING WITH CALENDAR WEDNESDAY BUSINESS ON WEDNESDAY, JULY 13, 1983

Mr. WRIGHT. Madam Speaker, I ask unanimous consent that the business in order under the Calendar Wednesday rule be dispensed with on Wednesday, July 13, 1983.

The SPEAKER pro tempore (Ms. KAPTUR). Is there objection to the request of the gentleman from Texas?

There was no objection.

HOUR OF MEETING ON WEDNESDAY, JULY 13, 1983

Mr. WRIGHT. Madam Speaker, I ask unanimous consent that when the House adjourns on Tuesday, July 12, 1983, it stand adjourned until noon on Wednesday, July 13, 1983.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

PERMISSION FOR COMMITTEE ON RULES TO FILE PRIVILEGED REPORT ON RESOLUTION AUTHORIZING INVESTIGATION BY COMMITTEE ON STANDARDS OF OFFICIAL CONDUCT

Mr. LONG of Louisiana. Madam Speaker, I ask unanimous consent that the Committee on Rules may have until midnight tonight to file one priv-

ileged report. The report is on a resolution to authorize an investigation by the Committee on Standards of Official Conduct.

The SPEAKER pro tempore. Is the objection to the request of the gentleman from Louisiana?

There was no objection.

AUTHORIZING THE SPEAKER TO ACCEPT RESIGNATIONS, AND TO APPOINT COMMISSIONS, BOARDS, AND COMMITTEES, NOTWITHSTANDING ADJOURNMENT

Mr. WRIGHT. Madam Speaker, I ask unanimous consent that, notwithstanding any adjournment of the House until Monday July 11, 1983, the Speaker be authorized to accept resignations, and to appoint commissions, boards, and committees authorized by law or by the House.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

PERMISSION FOR COMMITTEE ON WAYS AND MEANS TO HAVE UNTIL MIDNIGHT THURSDAY, JUNE 30, TO FILE REPORT ON H.R. 3021, HEALTH CARE FOR THE UNEMPLOYED ACT

Mr. ROSTENKOWSKI. Madam Speaker, I ask unanimous consent that the Committee on Ways and Means may have until midnight tomorrow, Thursday, June 30, to file its report to accompany the bill, H.R. 3021, the Health Care for the Unemployed Act.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

Mr. CONABLE. Madam Speaker, reserving the right to object, it is my understanding, and I would ask the gentleman to confirm this, that if we do not do this, of course, the committee is discharged of the bill, and it has been reported out, even though it has not been fully drafted.

Mr. ROSTENKOWSKI. Madam Speaker, if the gentleman will yield, the gentleman from New York is correct.

Mr. CONABLE. And the effect will be simply, then, to leave the report of the Waxman subcommittee of the Committee on Energy and Commerce as the sole report on that bill, even though the Committee on Ways and Means has taken its step.

Mr. ROSTENKOWSKI. That is my understanding of the rules.

Mr. CONABLE. Therefore, if we are to have a report that includes the Committee on Ways and Means input, I have very little choice but to go along with the suggestion of the chairman.

Mr. ROSTENKOWSKI. The gentleman is correct.

Mr. CONABLE. And the gentleman is trying to preserve some Committee on Ways and Means input into this sequentially referred bill; is that correct?

Mr. ROSTENKOWSKI. The gentleman is correct.

Mr. CONABLE. Madam Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

PERMISSION FOR COMMITTEE ON WAYS AND MEANS TO HAVE UNTIL 4 P.M., FRIDAY, JULY 1, 1983, TO FILE CERTAIN REPORTS

Mr. ROSTENKOWSKI. Madam Speaker, I ask unanimous consent that the Committee on Ways and Means have until 4 p.m. on Friday, July 1, to file its reports to accompany the following three bills:

H.R. 2163—To amend the Federal Boat Safety Act of 1971 and for other purposes;

H.R. 2809—To establish a U.S. Fish and Wildlife Foundation; and

H.R. 1646—To amend the Railroad Retirement Act of 1974 and the Railroad Retirement Tax Act to assure sufficient resources to pay current and future benefits under the Railroad Retirement Act of 1974, to make technical changes, and for other purposes.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

Mr. CONABLE. Madam Speaker, reserving the right to object, these bills have all been sequentially referred also; they come from other committees, have had their primary jurisdiction in other committees, and are being considered by the Committee on Ways and Means subject to a time limitation.

So the same comments made about the earlier bill refers to these as well; is that correct?

Mr. ROSTENKOWSKI. The gentleman from New York is correct.

Mr. CONABLE. Madam Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

MAKING CERTAIN TECHNICAL CORRECTIONS IN ATLANTIC SALMON CONVENTION ACT OF 1982

Mr. JONES of North Carolina. Madam Speaker, I ask unanimous consent to take from the Speaker's table the Senate bill (S. 925) to make certain technical corrections in the Atlantic Salmon Convention Act of 1982, and ask for its immediate consideration in the House.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Carolina?

Mr. FORSYTHE. Madam Speaker, reserving the right to object, I do so solely in order that we may tell the House really what we are doing.

These are a collection, really, of bills that have passed this body without even calling for a record vote. In addition to that, there are three GIFA's that are necessary to be passed before July 1. There are the Government International Fishery Agreements with the Soviet Union, Poland, and East Germany that are very necessary because there are American fishermen in joint ventures with these nations so I really do not believe that we have matters that are of great substance so far as the House is concerned.

□ 1910

There are two minor items that are involved here. Those deal with actions by the Senate in adding the U.S. Jones exemption on one private sailing vessel, and there is another small matter dealing with an officer required under the Jones Act.

Mr. Speaker, I yield to my chairman of the committee for any comments the gentleman would like to make under my reservation.

Mr. JONES of North Carolina. Madam Speaker, I thank the gentleman.

I would like to point out that the treaties we are referring to tonight, three of them with foreign nations, will expire tomorrow night at 12 midnight unless we enact this legislation. It is noncontroversial. It passed the House on suspension by a voice vote and it sailed through the Senate without much trouble. It is necessary legislation. Therefore, I ask that the request be considered.

Madam Speaker, the measure before us is very similar to H.R. 2784, which passed the House under suspension of the rules on June 13, 1983.

As passed by the House, this legislation dealt with a variety of fishery related matters, including reauthorization of the Atlantic Tunas Convention Act through 1986—a matter of about $100,000 per year. This act implements the International Commission for the Conservation of Atlantic Tunas, an agreement under which management and harvest of this species is carried out and related research is conducted. The language of S. 925 is indentical with respect to Atlantic tunas.

Both bills would amend the Atlantic Salmon Convention Act to clarify that our representatives on the Atlantic Salmon Commission are not Federal employees except for limited purposes and to conform that act's enforcement provisions with the Fishery Conservation and Management Act.

The fisheries loan fund and related provisions of the American Fisheries Promotion Act would be similarly extended for a 1-year period under both the House- and Senate-passed bills. This program uses fees collected from foreign fishermen to assist U.S. fishermen who are in danger of default on vessel loans. A provision of the Fish and Wildlife Act would also be extended for 1 year to authorize $150,000 to permit the U.S. Fish and Wildlife Service and the National Marine Fisheries Service to utilize volunteers.

The House and Senate passed indentical provisions clarifying language in the Anadromous Fish Conservation Act regarding funding for interstate fishery plans.

Both bills give congressional approval for 1-year extensions of three governing international fishery agreements between the United States and the Governments of the Soviet Union, Poland, and East Germany, which would otherwise expire as of June 30, 1983. It is important that these agreements not be permitted to lapse because of the joint ventures which are carried out under them and which are highly profitable for U.S. fishermen.

Title II of the House-passed version of this legislation would have extended the provisions of the National Aquaculture Act; however, in view of committee jurisdictional problems in the Senate, this language has been deleted from the measure before us.

There are two amendments added by the other body which have not been considered by the House. They are the amendment granting domestic commerce privileges for the vessel *Norden* and the section—allowing a corporation operating with a resident alien president to continue to be considered a citizen of the United States for U.S.-flag vessel ownership purposes.

The vessel *Norden* is an 85-foot topsail schooner—sailing vessel—built in Denmark in 1919 and owned by a U.S. citizen. The *Norden* is a rare and historical vessel, the only commercial use for which is as a charter cruise ship capable of operating with five passengers. Since she was built outside the United States, she would be unable to lawfully operate between points in the United States, specifically in Puget Sound, unless this legislation specifically exempts the *Norden* from the prohibitions of standing law. We know of no vessel operating under the protection of U.S. cabotage laws that would be adversely affected by the grant of this waiver, nor do we believe anyone is likely to want to build a comparable sailing vessel in a U.S. shipyard or any shipyard for that matter. Consequently, the entry of the *Norden* into the domestic cruise trade can result only in a positive effect on employment and other benefits accruing from the profitable utilization of a maritime resource.

The amendment to this bill, which permits a corporation to continue to validly operate vessels under the U.S. flag even though its president is at this time a noncitizen, is carefully crafted to limit its application to a specific case. The vessel documentation laws require that, among other things, where a corporation is the citizen owning U.S.-flag vessels, the corporation's president or chief executive officer and the chairman of its board must be citizens of the United States. We have become aware of an inadvertence by one such corporation. The corporation in question—Castle & Cooke of Hawaii—is a well established business organization that only incidentally is an owner/operator of U.S.-flag vessels. Recently, as part of its reorganization, the corporation actively recruited a new president and engaged a candidate who had been resident of the United States for several years. Only after the president was engaged did it become apparent that the corporation had special and unique citizenship requirements imposed upon it as a result of its role as a vessel owner/operator. The amendment is limited both in time and scope to a president who has filed an application to file a declaration of intent to become a U.S. citizen. No other corporation can take advantage of the exception, and no loophole is created. The amendment would allow the corporation to be in compliance with the law (section 2 of the Shipping Act, 1916 (46 U.S.C. 802)) from the time the subject president assumed office until the president is granted the citizenship for which he has filed his declared intention, but in no event will the exceptional rights granted this corporation extend beyond March 1, 1987. The 1987 date was selected based upon our understanding of the time being consumed by the Immigration and Naturalization Service to process applications.

Madam Speaker, all of the provisions of this bill are worthy of favorable consideration by the Members of this House but I am especially concerned that this legislation receive immediate approval because of the detrimental impact on American fishermen that would result if the fishery agreements with foreign governments were permitted to expire—as they will do tomorrow without our favorable action. Joint ventures carried out under these agreements permit our fishermen to sell their catches directly to foreign processing vessels and to reap a good profit. These fishermen deserve our support for their efforts to keep the profits from American fishery resources here at home and I hope, particularly for their sake, that we can approve this legislation without further delay and send it on its way to the President.

Mr. FORSYTHE. Madam Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Carolina?

There is no objection.

The Clerk read the Senate bill, as follows:

S. 925

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

TITLE I—MARINE FISHERIES PROGRAMS

SEC. 101. That section 10 of the Atlantic Tunas Convention Act of 1975 (16 U.S.C. 971h) is amended by striking out "and 1983" and inserting in lieu thereof "1983, 1984, 1985, and 1986".

SEC. 102. The Atlantic Salmon Convention Act of 1982 (16 U.S.C. 3601 et seq.) is amended—

(1) by inserting "not" immediately after "shall" in the second sentence of section 303(c); and

(2) by amending subsection (c) of section 307 to read as follows:

"(c) Any vessel used, and any fish (or the fair market value thereof) taken or retained in any manner, in connection with or as the result of the commission of an act which is unlawful under subsection (a) of this section shall be subject to civil forfeiture under section 310 of the Act of 1976 (16 U.S.C. 1860) to the same extent as if such vessel was used in, or such fish was taken or retained in connection with or as the result of, the commission of an act prohibited by section 307 of the Act of 1976 (16 U.S.C. 1857).".

SEC. 103. (a) The Fish and Wildlife Act of 1956 (16 U.S.C. 742a et seq.) is amended—

(1) by striking out "September 30, 1983" each place it appears in section 4(c) and inserting in lieu thereof "September 30, 1984"; and

(2) by striking out "1982 and 1983." in section 7(c)(6) and inserting in lieu thereof "1982, 1983, and 1984.".

(b) Section 221 of the American Fisheries Promotion Act (16 U.S.C. 742c note) is amended—

(1) by striking out "September 30, 1982" in subsection (a) and inserting in lieu thereof "September 30, 1984";

(2) by amending subsection (b)—

(A) by striking out "fiscal year 1982," in subparagraph (2)(A) and inserting in lieu thereof "each of fiscal years 1982, 1983, and 1984,", and

(B) by striking out "1981 and 1982" in subparagraph (2)(C) and inserting in lieu thereof "1981, 1982, 1983, and 1984"; and

(3) by striking out "fiscal year 1981 or 1982, or both," in subsection (c)(1) and inserting in lieu thereof "any of fiscal years 1981, 1982, 1983, and 1984,".

SEC. 104. Section 1(c)(2) of the Anadromous Fish Conservation Act (16 U.S.C. 757a(c)(2)) is amended: (1) by striking out "shall be 90 percent"; and inserting in lieu thereof "shall be up to 90 percent"; and (2) by striking out "resources," and inserting in lieu thereof "resources, prepared by an interstate commission,"; and by adding at the end thereof the following new sentence: "For purposes of this paragraph, the term 'interstate commission' means—

"(A) the commission established by the Atlantic States Marine Fisheries Compact (as consented to and approved by Public Law 80-77), approved May 4, 1942 (56 Stat. 267);

(B) the commission established by the Pacific Marine Fisheries Compact (as consent-

ed to and approved by Public Law 80-232), approved July 24, 1947 (16 Stat. 419); and

"(C) the commission established by the Gulf States Marine Fisheries Compact (as consented to and approved by Public Law 81-66), approved May 19, 1949 (63 Stat. 70).".

SEC. 105. Section 2 of the Fishery Conservation Zone Transition Act (16 U.S.C. 1823 note) is amended by adding at the end thereof the following new subsection:

"(c) Notwithstanding such section 203—

"(1) the governing international fishery agreement referred to in subsection (a)(5), as extended until July 1, 1984, pursuant to the Diplomatic Notes referred to in the message to the Congress from the President of the United States dated May 3, 1983, is hereby approved by the Congress as a governing international fishery agreement for the purposes of such Act of 1976;

"(2) the governing international fishery agreement referred to in subsection (a)(6), as extended until July 1, 1984, pursuant to the Diplomatic Notes referred to in the message to the Congress from the President of the United States dated May 3, 1983, is hereby approved by the Congress as a governing international fishery agreement for the purposes of such Act of 1976; and

"(3) the governing international fishery agreement referred to in subsection (a)(4), as contained in the message to the House of Representatives and the Senate from the President of the United States dated May 3, 1983, is hereby approved by the Congress as a governing international fishery agreement for the purposes of such Act of 1976.

Each such governing international fishery agreement shall enter into force and effect with respect to the United States on July 1, 1983.".

TITLE II—MISCELLANEOUS PROVISIONS

SEC. 201. Notwithstanding the provisions of section 27 of the Merchant Marine Act of 1920 (46 U.S.C. 883), or any other provision of law to the contrary, the Secretary of the department in which the United States Coast Guard is operating shall cause the vessel Norden (official number 584767) to be documented as a vessel of the United States, upon compliance with the usual requirements, with the privilege of engaging in the coastwise trade so long as such vessel is owned by a citizen of the United States.

SEC. 202. Notwithstanding any other provision of law, a corporation which, as of March 1, 1983, is a citizen of the United States within the meaning of section 2 of the Shipping Act of 1916, as amended (46 U.S.C. 802) shall continue to be deemed a citizen of the United States within the meaning of said section and shall continue to be deemed an owner whose vessels are eligible for documentation under section 104 of the Vessel Documentation Act (46 U.S.C. 65b) notwithstanding the election and service of a resident alien as its president or chief executive officer; provided, such resident alien has, pursuant to the provisions of section 334(f) of the Immigration and Nationality Act (8 U.S.C. 1445(f)) filed with the Immigration and Naturalization Service of the United States Department of Justice, prior to July 1, 1983, an application to file declaration of intention to become a citizen of the United States.

(b) Any rights conferred by subsection (a) shall expire unless such resident alien has become a naturalized citizen by March 1, 1987.

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GLADYS NOON SPELLMAN DEDICATION

Mr. SEIBERLING. Madam Speaker, I ask unanimous consent to take from the Speaker's table the Senate bill (S. 680) entitled the "Gladys Noon Spellman Dedication," and ask for its immediate consideration.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

Mr. HOYER. Madam Speaker, reserving the right to object, and obviously I will not object, I want to rise in strong support, obviously, of the immediate adoption of the Senate bill. I would prefer the House bill to be passed, but the Senate bill is a compromise and will, as the chairman knows, dedicate the Baltimore-Washington Parkway to the remembrance of the efforts that Gladys Noon Spellman, our former colleague, made not only on behalf of Prince Georges County, but on behalf of the Nation.

I want to rise to thank the chairman and the staff of the subcommittee specifically for the efforts that they have made in insuring the passage of this legislation.

We in the Fifth Congressional District who revered and loved Gladys Spellman appreciate very much his efforts and the efforts of the committee.

Mr. SEIBERLING. Madam Speaker, will the gentleman yield?

Mr. HOYER. I am glad to yield to the chairman.

Mr. SEIBERLING. Madam Speaker, first of all, I want to thank and commend our colleague, the gentleman from Maryland, STENY HOYER, for his patience, perseverence, and dedication in the long process of achieving passage of this tribute to our former colleague, Gladys Noon Spellman. He is a worthy successor to her in the district which she represented before he took that office.

I just would like to say that this bill, while somewhat different from the House bill in that it dedicates the Baltimore-Washington Parkway to Gladys Spellman and provides for suitable signs to be erected recording that fact, does not go as far as the House did, which would have named the parkway the Gladys Noon Spellman Parkway; however, the Maryland-maintained portion of the parkway is already named the Gladys Noon Spellman Parkway.

It does seem to me that this is a suitable tribute to our beloved former colleague and, therefore, in the interest of finally reaching the enactment of legislation on this, I think that the gentleman has made a wise decision.

I strongly support his action in supporting this legislation.

Mr. HOYER. Madam Speaker, I thank the gentleman, and I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

The Clerk read the Senate bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Congress finds that Gladys Noon Spellman, elected to four terms in the House of Representatives from the State of Maryland, should be afforded recognition not only for her personal efforts in upgrading one of the Capital region's most important transportation corridors, but more broadly for the dedication, commitment, and concern she expended on behalf of the people of Maryland. The quality of her service to the public exemplifies the high ideals and principles she held paramount.

SEC. 2. The parkway, under the jurisidiction of the Secretary of the Interior, in the State of Maryland known as the Baltimore-Washington Parkway, is hereby dedicated to Gladys Noon Spellman in recognition of her efforts to upgrade a most important transportation corridor in the Capital region and more broadly, to recognize her service to people of Maryland and the Nation as a Member of the House of Representatives of the Congress of the United States.

SEC. 3. In order to carry out the provisions of this Act, the Secretary of the Interior is authorized and directed to provide such identification by signs, including, but not limited to existing signs, materials, maps, markers, interpretive programs, or other means as will appropriately inform the public of the contributions of Gladys Noon Spellman.

SEC. 4. The Secretary of the Interior is further authorized and directed to cause to be erected and maintained, at a suitable location adjacent to the Baltimore-Washington Parkway, an appropriate marker commemorating the contributions of Gladys Noon Spellman.

SEC. 5. Effective October 1, 1983, there are hereby authorized to be appropriated such sums as are necessary to carry out the provisions of this Act.

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

REMOVAL OF NAMES OF MEMBERS AS COSPONSORS OF H.R. 283

Mr. RANGEL. Madam Speaker, I ask unanimous consent that the following Members' names be removed from the list of cosponsors of H.R. 283:

Messrs. MITCHELL, SCHEUER, and MINISH, Ms. OAKAR, and Messrs. SMITH of Florida, BARNES, and MCHUGH.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

GENERAL LEAVE

Mr. BRYANT. Madam Speaker, I ask unanimous consent that all Members be permitted to extend their remarks, and to include therein extraneous material, on the subject of the special order speech today by the gentleman from Colorado (Mr. WIRTH).

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

SUPPORTING ROLES FOR 225 MILLION AMERICANS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Arkansas (Mr. ALEXANDER) is recognized for 60 minutes.

● Mr. ALEXANDER. Madam Speaker, in the national drama now unfolding which features Ronald Reagan as President, there are some 225 million men, women, and children in supporting roles. I mean supporting quite literally, for I am sure that they wish the featured player well. But they must occasionally wonder, as I do, what script he is reading from.

For most Americans, life right now is a realistic drama of survival, but, when they listen to the President speak, he sounds as though he is in a different movie—a romantic fantasy in which facts are beside the point and reality is trivialized. Last week, defending his tax cut before a wealthy audience in Mississippi, he said that $50,000 was a pitifully low annual salary—hardly even middle class. Maybe this is so for Mr. Reagan and his well-heeled listeners. But not for most of the people of Mississippi, where the per capita income in 1980 was $6,508. Nor for my own State of Arkansas, with a 1980 per capita income of $7,180.

Mr. Reagan is charming and personable and no doubt well intentioned. But when he speaks about economics or when he addresses the financial plight of most Americans, he reminds me of the title character in "The Wizard of Oz"—he may be a very good man, but he is a very bad wizard.

The President and his assistant wizards have been trying to tell Americans for several months now that the recession is over, that a full recovery is underway, and so forth. Once again, Mr. Reagan is reading from a different script than the one which most Americans see. For the Nation as a whole, the unemployment rate is still in double digits, and even the administration does not pretend that the rate will be coming down appreciably any time soon.

Let me tell you what the facts are in my State of Arkansas and in the hard-pressed First Congressional District, which I have the honor to represent: in 1982 there were 99,000 Arkansans out of work, compared to 34,900 in 1972. These figures—from the first full year of the Reagan economic policy—are three times as high as those from a decade before, and the highest, in fact, since recordkeeping began.

In the 24 counties of the First Congressional District in 1982, there were 28,200 persons unemployed—compared to about 10,000 in 1972. Again, it's three times as many. The unemployment rate in the first district in 1982 was 13 percent, compared to 5.5 percent a decade before. In 1972, only 1 of my 24 counties had double-digit unemployment, but last year 16 of them were in that category. In two counties the rate of unemployment had tripled and in two others it had quadrupled.

As of April of this year, 15 of my 24 counties still had unemployment rates in the double-digit range. But let me bring the statistics home to you in the form of some case histories.

Let us take the case of Louis and Nancy Crook, who own Crook's Town & Country Hardware Store in McCrory, Ark. McCrory is in Woodruff County, which made national headlines last summer when the unemployment rate there reached 35 percent. Now it is leveled off a little; unemployment in the county was only 22.4 percent in April. "There are five stores in town that you can buy right now," Mr. Crook told a member of my staff today, "and I'll sell you mine," he said, "at 40 to 45 cents on the retail dollar."

Mr. Crook told a story of plummeting from a high of $100,000 in retail volume in 1978 to what he estimates might be $40,000 retail volume in 1983. Mr. Crook went on: "That's if we're lucky. What I'm going to do is try to ride out this year, but I'm trying hard to sell. There's no point in buying new stock when I can't even liquidate what I've got on hand. There's nobody that can buy anything. There's no recovery going on in Woodruff County."

Madam Speaker, the experience of the Crooks can be multipled several thousandfold across the State of Arkansas, where small businesses—starved too long by the recession which began in June 1981—are barely holding on to a precarious existence. Mr. Reagan talks of recovery, but he must be talking about Wall Street. Things are not so good on Main Street. Mr. Reagan, when he speaks of foreign policy, talks about falling dominoes; what I worry about is the falling dominoes in the towns and cities of my district, where unemployment and small business failure reinforce a catastrophe in progress.

Mine is largely an agricultural district, and surely no one needs to be reminded of the drastic decline in farm income, which has seen a national farm debt in excess of $200 billion and which undermines not only the farm family—which has been suffering not just recession but outright depression these last 2 years—but the small businesses, like the Crooks', which depend so heavily on farm purchasers.

But the first district had also begun to industrialize—and 20 years of progress in industrialization, along with the dreams of thousands of first district families—for college for their children or for meaningful vo-tech education—threaten to be wiped out overnight. Once again, I'll give you a case history.

For 20 years the Van Heusen Co. operated a shirt-manufacturing plant in Brinkley, Ark., in my district. The recession caused the company to close down its operations in Brinkley last year. With the loss of this factory went 400 jobs in Brinkley and Monroe County, and with those jobs went an annual payroll of almost three-quarters of a million dollars. Monroe County promptly became 1 of the 10 counties in Arkansas with the highest rate of unemployment.

Madam Speaker, the people of Woodruff and Monroe Counties, like the people of the entire First Congressional District, and of Arkansas, and of the Nation will survive this recession. They are Americans, and their American ingenuity will ultimately overcome the effects of misguided economic policies—particularly when these policies are subject to change next year by exercise of the ballot.

But the struggle to survive will involve enormous suffering and the sacrifice of many goals by our people. Mr. Reagan is now immersed in what appears to be a strategy for reelection in 1984, and he is trying to sell a fantastic vision of success for his economic policies, when the reality has been one of failure. In my district, people do not follow Mr. Reagan's script; what they read is a hard, ever-present reality.●

THE ALTERNATIVE BUDGET

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. DANNEMEYER) is recognized for 30 minutes.

Mr. DANNEMEYER. Madam Speaker, it is interesting to note how the American people react to the option of returning to the old and discredited tax and spend policies so dear to the heart of the congressional leadership. In May, according to an ABC/Washington Post poll, the public believed that the recession was not over by a 67- to 18-percent margin. Also during May, the Los Angeles Times found that only 11 percent thought the economy was tilted toward prosperity as opposed to 38 percent who placed it in the negative category. Although there

are recent signs of improvement, there remains a generally cautious public attitude on the state of the economy.

How bizarre then, that these same folks do not share the views of the House leadership as to how to deal with the Federal budget deficit. An April Gallup poll revealed that 55 percent of Americans want the scheduled July 1 tax cut to take effect without change; 28 percent would not mind seeing it postponed; only 5 percent favor elimination. And this margin held across all income groups.

Similarly, only 3 percent favor raising taxes to reduce the deficit as opposed to 50 percent who want further budget cuts; 18 percent would opt for a combination thereof. Beyond a doubt, the ill-conceived attempt to return to the high-taxing, high-spending ways of old is not what the American people have in mind when they urge us to do something about the budget mess we cannot seem to extricate ourselves from.

□ 1920

Lest any of us forget yesterday on the floor of the House, we had a modest effort just to freeze spending for cultural activities in one bill at the level that they incurred in 1983, and the proposal to freeze it, not cut it, but just freeze, failed in that it only received 150 affirmative votes.

It is a sad day for all of us when that is the best this House can do with respect to a modest proposal of that magnitude.

Over the course of the last several weeks this Member from California has taken the well of the House to talk about one of the most difficult things in Washington, D.C., to do; namely, to cut the Federal budget. Time and again we hear comments "Well, you cannot cut the budget, it is all full of entitlement programs, obligatory spending, that Members have difficulty if not a practical political impossibility of cutting."

I take this time today, and I will in the future, in order to explain how it can be done: Namely, an alternative budget that this Member presented to the House for its consideration or tried to in March of this year. When I went to the Rules Committee, controlled by the Democrats 2 to 1, and asked the Democratic leadership to make in order this alternative budget which would have given the Members of the House a chance to vote on a proposed budget for 1984, which had a deficit in it of $69 billion as opposed to the one that was passed by the House of some $202 billion in deficits, $69 billion as opposed to $202 billion. You would think why would not the Democratic leadership want the Members to have the record vote on how they voted on that proposal.

The answer is very simple. The leadership of the Democratic Party in this House does not want its Members to have to go to their constituencies in November 1984 and explain why they voted against cutting spending by this magnitude. If you do not have a rollcall vote you will not know how Members voted, and so they refused to make this alternative budget in order so that a rollcall vote would take place here on the floor of the House.

Spending categories of the Federal Government are divided into about 20 different areas. Over the course of the past week or so this Member from California has enumerated how we could cut spending in national defense, international affairs.

This evening I intend to briefly enumerate how we can cut spending in category 250 called general science, space, and technology, $600 million from the budget as a proposed savings; and in category 270 of energy, a savings of $1.6 billion.

I would like at this time just to read briefly through these categories or cuts of how we could achieve spending reductions of that magnitude.

Category 250, general science, space and technology. General science and basic resarch, Department of Energy, energy activities, energy programs: General science and research activities. In conjunction with decontrol and deregulation of energy development and production, energy companies should assume greater share of funding research; emphasize high priority programs only. Delete funding for nonenergy related physical sciences, cap at $400 million.

Other independent agencies, National Science Foundation: Restrict funding of low priority and nonessential programs, emphasize high priority and justifiable items only.

Fund 1984 obligations, cap research and related activities at $600 million.

Capping those two categories in the manner I have just described in 1984 would save in the budget process for this category $600 million.

In category 270, energy, energy supply, Department of Energy, energy activities, energy programs: Fossil energy research and development, fund 1984 obligations: Delete outyear funding.

Energy supply, research and development activities, terminate all except fission and fusion activities: Cap at $1.3 billion.

Department of the Treasury, the Bureau of Government Financial Operations, Energy Security Reserve, terminate synfuels subsidies. Fund 1984 obligations and delete outyear funding.

Category 272, energy conservation, Department of Energy, energy activities, energy programs: Energy conservation, area and regional development, adopt the President's proposals to phase out State and local assistance programs. Fund 1984 obligations. Cap outyear at $300 million.

Category 274, emergency energy preparedness, Department of Energy, energy activities, energy programs, strategic petroleum reserve. Existing stocks should be sold and replenished using sales receipts. High risk is involved by continuing to add to present stock—leakage, contamination. Fund 1984 obligations. Delete outyear funding.

Category 276, energy information, policy and regulation, Department of Energy, energy activities, energy programs, Federal Energy Regulatory Commission, retain regulatory activities only where monopoly services exist. Reduce 1984 funding to levels proposed by the President. Cap outyear funding at $30 million.

Energy Information Administration, terminate activities except for statistical analyses which can be transferred to the Department of Commerce. Fund 1984 obligations. Delete outyear funding.

Departmental administration, implement the President's proposal to dismantle the Department of Energy. Transfer necessary activities to other agencies. Fund 1984 obligations. Cap outyear funding at $100 million.

Adoption of these alternatives for 1984 in this category of 270, energy, would save for the budget resolution for 1984 $1.6 billion.

I would submit to my colleagues that we can rectify the error that we made in March by refusing to make this alternative or some other alternative of similar magnitude in order by proceeding to do so in September when the law requires that we have the second alternative budget resolution adopted. I cannot think of a better way in terms of accountability for each of the Members of the House to have an opportunity to have a voting record, because that is what this place is all about in terms of what we do around here, not what we say. How we vote is what is important, because our constituents will have an opportunity to determine if we truly mean it when we say we want to cut Federal spending and bring existing runaway Federal spending under control.

I yield back the balance of time.

LEGISLATIVE VETO

The SPEAKER pro tempore. Under previous order of the House, the gentleman from Georgia (Mr. LEVITAS) is recognized for 60 minutes.

GENERAL LEAVE

Mr. LEVITAS. Madam Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the subject of my special order.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Georgia?

There was no objection.

Mr. LEVITAS. Madam Speaker, I take this time as the first opportunity since the Supreme Court decision in the case of Immigration and Naturalization versus Chada dealing with the legislative veto to address some very important matters that have been thrust upon us as a result of that decision. I am sorely tempted to describe and discuss and comment on the merits or demerits of the decision itself. I will simply say that I commend to my colleague a careful reading of the dissenting opinion of Justice White, whose opinion I believe, like many of the great dissents of Justice Holmes and Brandeis, will one day become the law.

I will not comment on the merits of the majority opinion. That is, for the time being, the position of this Court, and I view this rather as a player in a baseball game who has seen the umpire call out one of his teammates on a bad call, and everybody in the stands saw that it was a bad call, but nevertheless the call was out and it stands. That player cannot stand around for the rest of the game complaining about the bad call.

□ 1930

What he does do is go forward and do his best and find other ways to win the ball game.

And that is what I think we must do and I think that is the juncture that we are presently at.

The legislative veto system evolved over a number of years and as my colleague, the gentleman from California (Mr. PASHAYAN) pointed out, it even predated the Constitution of the United States in the English parliamentary system.

But the system was simply a mechanism by which the Congress was enabled to delegate to the President or to the executive branch of Government or to independent agencies, discretion to take certain actions, do certain things, with the understanding that Congress, in the exercise of its plenary legislative power under Article I of the Constitution, would be able to look at that action, made pursuant to the delegation of authority, and if the Congress decided that that action was excessive or contrary to the intent of Congress or arbitrary or oppressive or, if you will, just plain stupid, it was within the province of the elected branch of Government, Congress, to reject that action.

Beginning with the latter days of the Hoover administration when President Hoover wanted to reorganize the Government, and proposed reorganization plans to the Congress to change the structure of Government, it was agreed to, provided there was a legislative veto.

And over the course of the last 50 years this mechanism has increased.

Let me say that I am not at all sure that this has necessarily resulted in better government.

It has, in some instances, resulted in Congress delegating powers which perhaps it should not have delegated as broadly as it did, or even at all. But at least the system was working in the sense that there was a balance between the powers that were delegated on the one hand and those that were retained to the Congress on the other hand.

The American people look to its elected representatives and holds them accountable for their government. The bureaucrats, the unelected officials in Washington are not accountable to the people. They are in most instances not even known by the people and have never suffered the inconvenience of running for public office and do not have to stand for election every 2 or 6 years in order to be evaluated on their performance.

So, it was with the Congress that this power lay. And in one fell swoop this Supreme Court decision has abolished this mechanism which, indeed, was working, and was retaining power for the people and in one fell swoop, eliminated almost 200 laws that had been put on the books in the last 50 years.

Now, we find ourselves in a position where our system of government as it evolved is involved in a train wreck of government. And we now have the responsibility to pick up the pieces and structure some new way of going forward in order to balance off the powers of the respective branches of government and to preserve for the American people their rights in elected government.

Now, what can be done? And what must we do?

Well, I think in the short term we are going to have to look at some very new approaches to dealing with this problem. We are going to have to be innovative and imaginative because in the last analysis Congress cannot lose in this struggle because we are the legislative branch of government.

So, some of the things we are going to have to do are, henceforth, be much more circumspect and specific and restrained in delegating any authority, and we must be very careful that we keep the agencies and the executive branch on a short leash.

The end result of this whole matter could very well be, that the Presidency, not this President, but the Presidency itself and the agencies of government, will end up with much more limited power and much more limited discretion because Congress simply cannot afford to make broad delegations of authority without some check upon it.

So, in the short term we are going to have to be very careful at looking at certain specific pieces of legislation cutting back delegations already made and being careful about some of those in the future and in some instances forgo it altogether.

We are going to have to keep these agencies on short leash and under short rations as far as appropriations are concerned so if they get out of hand they cannot be out of hand for too long before they have to come back to Congress for their budgets.

There are mechanisms available, one of which was demonstrated today, where in some instances and obviously it would not apply in all instances, there could be a requirement that in order for a regulation or a rule to take effect it must be adopted as legislation, itself, by the Congress.

And obviously if that is done and one House of Congress fails to pass the joint resolution, we have in effect exercised a legislative veto. There are problems with that which we may have to address. And there are circumstances when it could work, particularly in the case of major rules. It might be a feasible way.

Another system would be to utilize the Rules of the House of Representatives and to change the Rules of the House of Representatives in conjunction with legislation, legislation which would provide for a report-and-wait period, where an agency action is taken by the executive branch or one of the agencies and a rule or regulation is issued and they report to the Congress and wait some period of time before it goes into effect. Then under changed rules of the House we would provide that any committee that has jurisdiction over the agency issuing that rule or over the legislation creating that authority, would have the right to consider, and, if they so desire, report a resolution of disapproval to the House of Representatives.

And the House of Representatives, if it adopted that rule, would provide, again, by the rules of the House, that no appropriation could be made or would be in order that would fund a regulation disapproved or action disapproved under this procedure.

That does not affect the validity of the rule; it is not legislation; but it goes to the purse strings which the Supreme Court, the same Supreme Court in decisions has said are exclusively the province of the Congress to decide and we will have made the decision not to fund the regulation or the action in question.

There are many ways to skin this cat. There are other procedures that we can look at and other avenues we can follow. The report-and-wait mech-

anism itself can be expanded into broader usage.

But, in the last analysis, someone will propose, and I think perhaps correctly, that we must consider even a constitutional amendment to provide the Congress with the authority to exercise its legislative control over the agency in a manner that preserves for the American people their rights and privileges through their elected representatives.

And one last observation I would make at this point, Madam Speaker is this: I really believe we are at a crossroads, a critical crossroads in the evolution of our governmental system as a result of this Supreme Court decision which has brought about this train wreck of government. We are not going to solve this problem or sort out or restructure our system in the next 3 or 4 weeks or 3 or 4 months and I am afraid perhaps not even in the next 3 or 4 years. It is going to take a long time to sort this out and get the Government back on the right track.

I therefore would propose, Madam Speaker, that in cooperation with the President that we convene a conference on sharing of powers, or separation of powers, but a conference that would bring together leaders from the administration, leaders in the Congress, some of the great academic minds in the universities around this Nation; people at the think tanks in this Nation such as the American Enterprise Institute or the Brookings Institution; representatives from labor, business, and public interest groups, all of whom have an interest and a stake in this.

□ 1940

And bring the best thinking together and to bear on how we sort out a system which will retain control to the people through their elected representatives without the intrusion, inappropriately, into the discretions that are necessary in the Presidency and the agencies of government.

But this we must do. The Supreme Court's decision, however destructive it may have been, is not the last word on this subject. And it now befalls us, as a Congress, and it befalls the administration, representing the Presidency, and it befalls to the people of this country a means of coming back and sorting it out, because if we do not, we will simply see chaos and confrontation and government that is not only bad, but simply does not work.

The legislative veto is no longer available to the Congress as it had been previously. It is now our responsibility, on behalf of the American people, to see that we put in place mechanisms which will achieve the purposes that were sought to be achieved by the legislative veto before the Supreme Court's decision of last week.

Mr. BROYHILL. Mr. Speaker, will the gentleman yield?

Mr. LEVITAS. I yield to my good friend, the gentleman from North Carolina.

Mr. BROYHILL. I thank the gentleman for yielding.

Mr. Speaker, I want to commend the gentleman from Georgia for scheduling this special order on the Supreme Court's recent decision on legislative veto.

As my colleagues are well-aware from numerous news accounts, last Thursday, June 23, 1983, the Court, in Immigration and Naturalization Service against Chadha, held the one-House veto unconstitutional on the theory that the Congress legislated a result at variance with the decision by the Attorney General on a deportation case in violation of the bicameralism and presentment clauses of article I of the Constitution.

Because of the Court's broadly written opinion, it is generally believed that all legislative veto mechanisms, which are estimated to appear in approximately 200 Federal laws, are in jeopardy and will, in short order, be found to be unconstitutional.

Indeed, a preliminary analysis of the statutes which fall under the jurisdiction of the Committee on Energy and Commerce indicates that there are at least 24 statutes which contain some form of legislative veto. I am inserting a copy of this preliminary list in the RECORD for my colleagues' information.

As a strong proponent of the use of legislative veto as a means of curbing the excesses of overzealous bureaucrats, I feel that the legislative veto served as an important device for Members of Congress to assure themselves and their constituents that the laws enacted by the Congress were being carried out in a manner consistent with congressional intent.

Many important issues remain up in the air as a result of the Supreme Court's decision. For example, what is the status of the congressional veto of the Federal Energy Regulatory Commission's incremental pricing rule on natural gas? On May 20, 1980, Congress disapproved by a vote of 369 to 34 a rule promulgated by the Federal Energy Regulatory Commission which expanded the application of incremental natural gas pricing from industrial boiler fuel users, the only industrial users of natural gas now covered by incremental pricing, to all industrial facilities which use natural gas.

If incremental pricing is expanded to all industrial users of natural gas, this could cost industries millions of dollars in increased energy costs. Those industries that can, may well switch to other fuels. If they do, this will increase the fixed costs that residential natural gas consumers must bear, and increase oil imports. The uncertainty facing industrial natural gas users is, itself, disrupting their ability to plan.

To cite another example, the question arises as to the status of the Federal Trade Commission's used-car rule which both Houses of Congress overwhelmingly disapproved last Congress. Will the Federal Trade Commission simply implement the rule despite the clear and unequivocable knowledge of congressional intent on this particular issue? I hope not, but if the Federal Trade Commission decides to act in this manner, legislative veto, as we know it, will not be available to resolve the matter.

The Commission's used-car rule was disapproved by the Congress on the basis that it did not comport with congressional intent in the Magnuson-Moss Act. It is this very problem that the legislative veto was designed to deal with.

Indeed, an interesting theoretical question to ponder is whether the Federal Trade Commission—or any other regulatory agency—will in the future be more severely restricted in its mandate in the aftermath of the Supreme Court's decision in Chadha than it was before?

Some are interpreting the decision as significantly diminishing the power of the Congress. I do not dispute this analysis. However, I doubt the effect of this opinion will go unanswered by the Congress.

As those of us in the Congress continue to analyze this Court opinion, we must search, in the interim, for an appropriate response to assure that authority delegated by the Congress is exercised in a manner consistent with the will of this representative body.

Should we pull back on the amount of authority that has previously been delegated to the independent regulatory agencies and the executive branch? Or should we try to limit our response to making the legislative veto pass constitutional muster?

Another question comes to mind. Will the Democratic leadership inevitably regret the new House rule respecting riders on appropriations bills that was instituted at the beginning of this Congress? Without the authority to reverse executive decisions or agency rulemakings, Congress could well become increasingly frustrated with their lack of ability to insure that congressional intent is followed through the use of limiting language on appropriations measures. The House rule which makes this avenue of approach practically impossible may well become a deeply regretted one by its proponents.

It appears to me that the key question is, how should we, as elected officials, respond to the elimination of this review. Whatever course we take, I believe a legislative response is necessary and proper.

The ramifications of this decision are enormous. Congress must fully explore alternative mechanisms to check the exercise of unbridled regulatory authority. In the weeks and months ahead, I intend to fully participate in the debate as these questions are explored and an appropriate answer is formulated.

I thank the gentleman from Georgia for arranging for this special order on legislative veto this evening, and for giving us an opportunity to discuss it. I look forward to working with him in the future on this extremely important issue. Thank you.

Mr. Speaker, I would like to take advantage of the time that he has taken tonight for a few observations and a few remarks.

I want to commend the gentleman from Georgia for scheduling this special order for the purpose of discussing the Court's recent decision with respect to the legislative veto. All of our colleagues, of course, are aware of what has happened and there has been general discussion of this for the last several days. And because of this decision, it means, as the gentleman has so well stated, that some 200 Federal laws, where we have inserted the legislative response to agency actions are in jeopardy and apparently have been ruled as unconstitutional.

I might add as a preliminary analysis of the statutes that fall under the jurisdiction of the committee of which I have the honor of serving, the Committee on Energy and Commerce, it would indicate that there are at least 24 statutes that contain some type of legislative veto. And I am inserting a copy of this preliminary list that I have researched and it will be in the RECORD on behalf of my colleagues and for their information.

The list follows:

PRELIMINARY ANALYSIS OF STATUTES WITHIN THE JURISDICTION OF THE COMMITTEE ON ENERGY AND COMMERCE WHICH CONTAIN A LEGISLATIVE VETO PROVISION

1936—DECEMBER 31, 1975

Atomic Energy Act of 1954 (Public Law 83-703).

Atomic Energy Act Amendment, 1957 (Public Law 85-97).

Atomic Energy Act Amendment, 1958 (Public Law 85-568).

Trade Expansion Act of 1962 (Public Law 87-794).

Naval Petroleum and Oil Shale Reserves, 1962 (Public Law 87-796).

National Traffic and Motor Vehicle Safety Act Amendments 1970 (Public Law 91-265).

Atomic Energy Act Amendments, 1974 (Public Law 93-377).

Atomic Energy Act Amendments, 1974 (Public Law 93-485).

Trade Act of 1974 (Public Law 93-618).

Energy Policy and Conservation Act (Public Law 94-163).

1976-77

Naval Petroleum Reserves Production Act, 1976 (Public Law 94-258).

Energy Conservation and Production Act, 1976 (Public Law 94-385).

Alaska Natural Gas Transportation Act of 1976 (Public Law 94-586).

1978

Department of Energy Act of 1978—Civilian Application (Public Law 95-238).

Public Utility Regulatory Policies Act of 1978 (Public Law 95-617).

Natural Gas Policy Act of 1978 (Public Law 95-621).

Emergency Interim Consumer Product Safety Standard Act of 1978 (Public Law 95-319).

1979, 1980

Federal Trade Commission Improvements Act of 1980 (Public Law 96-252).

Energy Security Act (Public Law 96-294).

Solid Waste Disposal Act Amendments of 1979 (Public Law 96-482).

Comprehensive Environmental Emergency Response, Compensation, and Liability Act, 1980 (Pub. Law 96-510).

1981

Omnibus Budget Reconciliation Act of 1981 (Public Law 97-35) (Relating to regulations promulgated by the Consumer Product Safety Commission, approval of Secretary of Transportation's sale of Conrail, disapproval of amendments to the Amtrak's Route and Service Criteria, and disapproval of the Secretary of transportation's rules to reduce accidents, injuries, and deaths).

Union Station Redevelopment Act of 1981 (Public Law 97-125).

Nuclear Waste Policy Act of 1982 (Public Law 97-425).

I have been a strong proponent of the legislative vetos, as the gentleman from Georgia well knows. I have been a strong supporter of this as a means of curbing the excesses of overzealous bureaucrats. I do feel that the legislative veto has served as a most important device for Members of Congress to respond to those agency and departmental decisions that are made that affect our constituents to assure ourselves and our constituents that the laws that we have enacted are being carried out in a manner that is consistent with congressional intent.

I could go on here today, Mr. Speaker, with respect to a number of issues that do remain up in the air as a result of the Supreme Court decision. One of them pertains to an issue that we are debating all over the House, but in particular in a subcommittee of the Committee on Energy and Commerce, and that is in natural gas.

What is the status, for example, of the congressional veto of the Federal Energy Regulatory Commission's incremental pricing rule on natural gas? I am very concerned that if we let that rule stand, as you recall, the Congress disapproved by a vote of 369 to 34 a rule that had been promulgated by FERC. My concern about this is if incremental pricing is expanded to all industrial users of natural gas, it is going to cost industries millions of dollars in increased energy cost.

What is their response going to be? Their response is to switch to other fuels. If they do this, this will then increase the fixed cost that residential users of natural gas must bear and that could then again have an impact on increasing oil imports.

Just this one area where the Congress has already responded as to what could happen could have a disrupting effect in the marketplace, a disrupting effect on consumers.

And there are other examples that I can talk about in which the Congress has in the past responded with legislative veto.

One is the FTC's used-car rule. That was disapproved by the Congress, on both sides, on the basis that it did not comport with congressional intent and it is this kind of thing, this kind of problem that we need to respond to.

Mr. PASHAYAN. Mr. Speaker, will the gentleman yield?

Mr. LEVITAS. I yield to the gentleman from California.

Mr. PASHAYAN. I thank the gentleman for yielding.

I think it is a convenient point to mention on the so-called used-car case that myself and eight of our colleagues came together yesterday and have submitted a brief of the Supreme Court, an amici curiae brief, requesting that the court hold a hearing on the used-car case and to consider the legislative veto issued in that particular case, because it differs principally from the legislative veto situation in Chadha.

In the Chadha case, and that is the case we are here to talk about today, the court technically held unconstitutional a one-House legislative veto as it applies to a particular agency decision in respect to a particular individual, even a proceeding in the nature of an adjudicatory proceeding.

But as the gentleman from North Carolina has pointed out, in the so-called used-car case, we are talking about a two-House legislative veto as it applies to the authority to issue broad rules and regulations. And the brief that myself and others entered yesterday, which I should like to put in the RECORD, makes that distinction to the Supreme Court and asks the Supreme Court to reconsider the legislative veto argument in light of the difference in the used-car case and the FTC rules there.

The brief follows:

(No. 82-1044)

IN THE SUPREME COURT OF THE UNITED STATES, OCTOBER TERM, 1982

United States House of Representatives, Appellant v. *Federal Trade Commission, et al.*

ON APPEAL FROM THE UNITED STATES COURT OF APPEALS FOR THE DISTRICT OF COLUMBIA CIRCUIT

A Motion for Leave to file Amici Curiae Brief, and the brief Amici Curiae of the Honorable Charles Pashayan, Jr., the Honorable Trent Lott, the Honorable Charles Elson Roemer III, the Honorable Eugene A. Chappie, the Honorable Vic Fazio, the Honorable Thomas N. Kindness, the Honorable Norman Yoshio Mineta, the Honorable

Marvin H. Mickey Edwards, and the Honorable Gerald B. Solomon—Members of the United States House of Representatives, in support of appellant.

MOTION

This Motion to file the annexed *amici curiae* brief, in support of Appellant in *United States House of Representatives* v. *FTC*, S. Ct. No. 82-1044 ("*Used Car Case*"), out of time, is submitted for the reason that the Court's recent decision in *Chadha* v. *INS* has prompted *amici* to submit the annexed brief in the nature of intervening matter under Rule 22.6, for the Court's consideration. The interest of *amici*, The Honorable Charles Pashayan, Jr., The Honorable Trent Lott, The Honorable Charles Elson Roemer III, The Honorable Eugene A. Chappie, The Honorable Vic Fazio, The Honorable Thomas N. Kindness, The Honorable Norman Yoshio Mineta, The Honorable Marvin H. Mickey Edwards, and The Honorable Gerald B. Solomon, derives from their individual membership in the United States House of Representatives. The brevity of time makes it unlikely that Counsel of the House shall be able to file any further supplemental briefs under Rule 22.6.

Amici curiae believe that the Court should grant plenary consideration in the *Used Car Case* for the following reasons:

1. The statutory authority to issue broad rules and regulations in the *Used Car Case* is fundamentally different from the adjudicatory nature of the proceeding in *Chadha; see* Separate Concurring Opinion of Justice Powell in *Chadha* v. INS.

2. Historical materials, believed not to be before the Court in *Chadha*, exist that indicate that intrinsic in the legislative power vested in Congress by Article I is Congress's Constitutional right to reserve by statute the option to nullify agency or departmental rules and regulations by the legislative veto, all of which are non-textual to the Constitution.

As the dissenting justice opined, the decision may broadly affect the provisions in a wide range of statutes. The Court is well aware that statutes are to be saved from unconstitutionality if possible. The *Chadha* decision is too blunt an instrument to adjudicate the rule-making legislative vetoes at issue in the *FTC* case. Full argument and briefing will enable the Court to determine whether these devices, applied in a wholly different context from *Chadha*, are also unconstitutional.

The importance of the questions presented in this case can hardly be disputed, affecting as it does virtually hundreds of agency rules and regulations. Indeed, speculation has already arisen concerning the reach of *Chadha* to other legislative review devices, and to clarify the applicability of its ruling the Court should order full briefing and argument to make it clear whether the *Chadha* ruling is dispositive.

AMICI CURIAE BRIEF

Argument

The historical material submitted herewith fully indicates that legislative review and management of delegated legislation were used by both Parliament and the early American Congresses. This material alone provides support for granting plenary consideration in the *Used Car Case* to assess the different situation presented by rule-making review mechanisms.

I. The Historical Development of Delegated Authority and Its Management

Contrary to many statements made by counsel and in briefs in both the *Chadha* and the present case, neither delegated legislation nor the legislative veto find their origins in the 20th Century. Rather, the origins can be traced deep into British history, into the history of the American colonies, and into the history of the first American Congresses.

A. Delegated Authority

1. British: Apart from at least two early statutes, one passed by Parliament in 1337 (10 Edward III, c. 1), and the other in 1385 (III Rolls of Parliament 204), most scholars fix the reign of Henry VIII as the beginning of delegated authority in the modern sense. The Statute of Wales (34 and 35 Henry VIII, c. 26), enacted in 1542-43, authorized Henry VIII to issue rules for governing Wales, including the power to levy taxes (see also 28 Henry VIII, c. 17; and 1 Edward VI, c. 11; and 31 Henry VIII, c. 5). The Statute of Sewers, enacted in 1531, remarkedly modern, granted Commissions "full Power and Authority to make, constitute, and ordain Laws, Ordinances, and Decrees . . ." (23 Henry VIII, c. 5, s. 1). (For examples in the Seventeenth Century, see 12 Charles II, c. 22; 13 and 14 Charles II, c. 5; and 22 and 23 Charles II, c. 8.) Despite the fact the Eighteenth Century statutes were passed in great detail, Parliament continued delegating legislative authority. In 1769, for example, Parliament passed an act empowering certain harbor commissioners "to make such By-Laws, Rules, Orders, and Regulations, as shall be found necessary for the Purposes in this Act . . ." (9 George III, c. 8, s. 10). Some were couched in broad statutory terms (see, e.g., 2 George III, c. 32; 10 George III, c. 27; 15 George III, c. 65; 16 George III, c. 62; 31 George II, c. 25; 15 George III, c. 21; 6 George I, c. 18; 30 George II, c. 20; 19 George II, c. 5; 14 George III, c 19; 13 George II, c 3; and 30 George II, c. 1).

Others were passed to regulate the delegatee's affairs (see, e.g., 16 George III, c. 13; 31 George II, c. 18; 15 George III, c. 24; 15 George III, c. 21, 16 George III, c. 61; 6 George III, c. 24). Yet others combined these (see, e.g., 10 George III, c. 25; 9 George III, c. 13; 9 George III, c. 21; 15 George III, c. 60; 15 George III, c. 66; 9 George III, c. 22; 7 George III, c. 85; 9 George III, c. 22; 9 George III, c. 21; 14 George III, c. 56, and 9 George III, c. 31).

Particularly notable is Eighteenth Century British delegated legislation regarding the American colonies. Four are especially notable. In 1774, Parliament passed an act to discontinue shipping activities in Boston, and conferred on the King, by Order in Council, the power to make important legal definitions (14 George III, c. 19). Later that year, Parliament gave the Council for the Affairs of the Providence of Quebec the power to make ordinances (14 George III, c. 83). In 1765, Commissioners for Managing the Stamp Duties were granted the authority to make "Rules and Orders . . ." (George III, c. 13).

Most noteworthy is an act passed in 1778, granting Commissioners the power to make "Regulation, Provision, Matters . . ." to quiet disorder (18 George III, c. 13) *but they should not become effective until confirmed by Parliament.*

2. Early Congressional Delegated Authority: That the idea of delegated legislation was, along with other principles of English government, a part of the British inheritence which not only formed the background for the writing of the Constitution but also the guidance for Congressional practice, is evident from the early Acts containing provisions for delegated legislation. For example, in 1791, the Congress passed "An Act to incorporate the subscribers to the Bank of the United States," which provided, *"The President, Directors and Company, of the Bank of the United States* . . . [shall] . . . ordain, establish, regulations, as shall seem necessary and convenient for the government of said corporation" (1st Cong., Sess. III, Ch. 10). This Act is not dissimilar in form to the British Acts of the Eighteenth Century, containing provisions for delegated legislation. Thus, the early American Congresses took up the centuries-old Parliamentary practice of delegated legislation. It is clear that they regarded it as inherent in Article I legislative power.

B. The Legislative Management of Delegated Legislation

Like the subject it is meant to manage, the legislative veto evolved from its British antecedents, called the "laying system." While massive use of both delegated legislative authority and the laying system and legislative veto is a relatively modern phenomenon, its origins are traceable into British Parliamentary and American Congressional history. In each, again, it is clear that the early Congresses regarded procedural management of delegated legislation as intrinsic to its Constitutional legislative power.

1. British Antecedents: British statutes, many passed in the Eighteenth Century, required the delegates to lay before Parliament matters relating to finances or monies (see, e.g., 1 George I, c. 21; 23 George II, c. 24; 9 Anne, c. 21; 27 George III, c. 13; 33 George III, c. 29; 13 George III, c. 83; 33 George II, c. 11; and 31 George II, c. 38).

The laying procedure was also applied to account for government activities in general (see, e.g., 28 George III, c. 54; 29 George III, c. 66; 30 George III, c. 33; 23 George II, c. 31; 25 George II, c. 40; 24 George III (Session 2), c. 25; 33 George III, c. 52; 23 George II, c. 24; 30 George II, c. 1; 31 George II, c. 37; 12 George III, c. 37; 15 George III, c. 31; 15 George II, c. 29; 16 George II, c. 26; 18 George II, c. 25; 17 George II, c. 30; 22 George II, c. 42; 7 George III, c. 58; 10 George III, c. 40; 21 George III, c. 58; 26 George III, c. 43; 8 George II, c. 29; 9 George II, c. 42; and 26 George III, c. 107). Likewise, Parliament passed a few acts requiring the laying of judgments and decrees (see, e.g. 31 George II, c. 39, 2 George III, c. 37; 20 George III, c. 38; 22 George III, c. 80; 31 George c. 39; 2 George III, c. 37; 20 George III, c. 38; 22 George III, c. 80; 5 George III, c. 8; and 31 George II, c. 24).

Parliament passed statutes requiring that delegated legislation be laid. In 1791, the King himself was required to lay before Parliament orders he was authorized to make in respect the prices of corn (31 George III, c. 30; see also 33 George III, c. 65; 39 and 40 George III, c. 87; and 23 George II, c. 31)

Most importantly, in the 1778 Act cited *supra* (18 George III, c. 13), Parliament empowered certain colonial officials to issue regulations, *which could not take effect without Parliament's approval.* While this statute did not have an explicit laying provision, it is to be substantively inferred from the requirement for approval.

These measures taken by Parliament at oversight and management bear significant precedence for their development in the United States, and establish that the whole body of informal law and management developed along with formally enacted statutes.

2. American Control: It was indeed no more an accident that the early Congress adopted the laying procedure than the other British procedures (see, e.g., Burleigh Cushing Rodick, *American Constitutional Custom: A forgotten Factor In The Founding* (New York, 1953)). "The early House of Representatives also resembled the Commons in its system of standing committees, its committees of the whole, its rules for debate and the conduct of its members" (at 117).

Thus, in emulation of the British statutory language, several Congressional statutes required that the various delegatees "lay before" Congress various matters (see, e.g., 1st Cong., Sess. II, Ch. 22; 5th Cong., Sess. II, Ch. 38; 8th Cong., Sess. I, Ch. 46; 3rd Cong., Sess. II, Ch. 43; 4th Cong., Sess. I, Ch. 21; 10th Cong., Sess. II, Ch. 17; 3rd Cong., Sess. II, Ch. 45; 7th Cong., Sess. I, Ch. 32; 10th Cong., Sess. II, Ch. 28; 11th Cong., Sess. II, Ch. 37; 7th Cong., Sess. II, Ch. 27; 3rd Cong., Sess. I, Ch. 14; and 8th Cong., Sess. II, Ch. 26).

Most important, there are two notable examples of the laying of delegated legislation. After the Louisiana Purchase, the Congress in 1804 passed an act dividing Louisiana into two territories. In establishing the government for the territories, Congress granted rule-making authority to the governors, but made the rules subject to the legislative veto: "The legislative power shall be vested in the governor, and in thirteen of the most fit and discreet persons of the territory. . . . The governor shall publish throughout the said territory, all the laws which shall be made, and shall from time to time report the same to the President . . . *to be laid before Congress; which, if disapproved of by Congress, shall thenceforth be of no force* (8th Cong., Sess. I, Ch. 38, s. 4) (emphasis added)."

In 1805, the Congress passed an Act containing an almost identical provision (8th Cong., Sess. II, Ch. 31). These are among the clearest examples of the development of the legislative veto as an inherent aspect of Article I legislative power. The Congress clearly followed in the footsteps of Parliament in employing the laying procedure to control the delegate's exercise of delegated legislation. These Congressional statutes are indeed in the nature of the 1778 Act, cited *supra*, in which the delegated legislation should not become effective without Parliament's approval.

C. Conclusion

By vesting all the Legislative power in the Congress, the Framers had in mind more than the procedural sequence prescribed in Article I, Section 7, as circumscribed by Section 8 and the other limitations. The early Congress's adoption of Parliamentary rules, procedures, and the laying system, is evidence that the legislative power was meant to include both delegated legislation and its management by procedural device.

II. A Comparison of the British and American Doctrines of Separation of Powers

It is a mistaken notion in the United States that there is "no Constitution" in Britain and therefore no separation of powers. Certainly neither should be invoked to invalidate the historical development and precedent of delegated legislation and the laying system and legislative veto.

The orthodox view in British legal theory is that there is a British Constitution, much of it written (see, e.g., D.C. M. Yardley, *Introducton to British Constitutional Law* (London, Fourth Edition, 1974). It embodies a doctrine of separation of powers that separates the Crown as the executive from Parliament as the legislative (see, e.g., John Locke, *Second Treatise*, Chapter XII, Sec. 147, as supported by M. J. C. Vile, *Constitutionalism and the Separation of Powers* (Oxford, 1976); Sir William Blackstone, *Commentaries on the Laws of England;* and Montesquieu, *The Spirit of the Laws;* see also various Eighteenth century British statutes, e.g. 12 and 13 William III, c. 2., prohibiting Crown officials from being members of Parliament; see also 6 Anne, c. 7; 15 George III, c. 22; 25 George III, c. 52; 22 George III, c. 80; 23 George III, c 87; 20 George III, c. 38; 20 George III, c. 49 and 20 George III, c. 54. See also various regency acts, 1 William and Mary, Second Session, c. 2; 12 and 13 William III, c. 2, and 5 George III, c. 27. see also, e.g., 16 George III, c. 34, and 5 George III, c. 8, for descriptions of the power to execute laws as vested in agents of the Crown.)

Members of the British Cabinet wear two hats: legislative, as ordinary members of Parliament; and executive, as agents of the Crown. While this arrangement would now violate the Ineligibility and Incompatibility Clauses, the division of these powers remains intact in British theory.

The methods of amending the two constitutions differ: in Britain, the *process* is the same for changing the constitution as for passing an ordinary statute. But the constraints of custom and convention play a prominent role in British Constitutional law, making changes in the British Constitution markedly more difficult, as it is more difficult to amend the American Constitution than to pass statutes.

In respect to the legislature's right to manage delegated legislation, the relationship between Congress and parliament is analogous and should offer support to the validity of the legislative veto.

III. Conclusion

The Court in *Chadha* implies that the Framers envisioned only a textual method of legislating. But British practice, well-known to the Framers and in many instances explicitly or implicitly incorporated in early Congressional practice, strongly indicates that the Constitution's Article I legislative power was intended to comprehend both delegated legislation and the legislature's right to review and manage it by parliamentary procedure.

Chadha concerned a particular agency action concerning a particular individual. In the *Used Car Case*, something quite different is at stake: broad rules and regulations affecting a class, which itself in the future will require individual application by the issuing agency.

Secondly, *Chadha* decided against a one-house legislative veto, whereas the *Used Car Case* involves a two-house legislative veto. The historical evidence is ample that both in Parliamentary and early Congressional practice, the historical right to manage delegated legislation was exercised by the *whole* legislature, Parliament or Congress.

On these two main distinctions, *amici curiae* submits that the Court should grant plenary consideration in the *Used Car Case*.

Mr. BROYHILL. If the gentleman will continue to yield, I appreciate the gentleman's contribution. The gentleman from California has been a student of the legislative veto process for many, many years, going back, I think, to this student days.

Mr. PASHAYAN. The gentleman is correct.

Mr. BROYHILL. And he is knowledgeable and well informed about this.

I would just like to conclude with a thought or two, if I could. I appreciate the indulgence of the gentleman from Georgia in lending me some of his time today, but as the gentleman knows, there has been a great deal of discussion, particularly those of us in committees that have utilized this device of legislative veto in the past. It raises a number of questions as to what will be the congressional response.

The gentleman from Georgia just a few moments ago said there will be a response. And of course what will that response be? Will it be that it will significantly diminish the power of the Congress? I do not think that it will, it may for a while, but I do not think it will do that for long. I doubt that the effect of the opinion will go unanswered by the Congress. I know that we are going to come up with response. Will it be that we will tend to start drawing back powers that we have written into these laws to give agencies broad rulemaking power, such as the Federal Trade Commission, which has broad powers to write trade laws that affect entire industries, not affecting one business, or individual businesses, but affecting total industries? Will we go back and take that law and reexamine it? Or will we come up with some other device that would give a congressional response to agency rulemaking?

We should, in my judgment, do this. We had a discussion earlier today in a colloquy with respect to the new House rule respecting riders on appropriations bills. The gentleman from Georgia was present at that time. Should we utilize riders on appropriations bills as the way of amending laws or a way of restricting authority of these agencies, reversing executive decisions?

□ 1950

I do not know that we should do this. I was not a proponent of that rule. But, on the other hand, I do not like to see appropriation bills coming cluttered up with these types of reponses. It does appear to me that one of the key questions, of course, is: What kind of legislative response is necessary and proper?

I like the idea that the gentleman has proposed, and that is to get some amendments to the rules of the House that do permit a response.

One of our problems has been when an agency makes a particular decision and then the committee that has jurisdiction over that decision, for whatever reason, will not consider your proposals, whereas we are convinced, at least in our conversations with Mem-

bers generally are convinced, that our ideas will be adopted by a majority in the House.

But Congress must fully explore all of the alternatives. We must act in order to check the unbridled regulatory authority that has been granted as a result of this Court decision.

I intend to work with the gentleman and to fully participate in the debate in these questions as we explore them in the next few weeks and in the months ahead. I do thank the gentleman for arranging this time this evening to give us an opportunity in a very short time to discuss this. I look forward to working with him and other interested Members, Members who are interested in this issue, on this extremely important issue in the weeks and months ahead.

Mr. LEVITAS. I thank my good friend from North Carolina for his very significant contribution to this discussion. The gentleman from North Carolina has truly been one of the leaders in not only the legislative veto fights that we have had over the years, but in an effort to make our Government more accountable and make certain that the rules and regulations that are issued are carrying out the intention of Congress and not the reverse, are within reason and are not unreasonable. I look forward to working with him in the days ahead as we attempt to fashion an appropriate response to work our way out of the mess that we now find ourselves in as a result of the Supreme Court decision.

Mr. BROYHILL. If the gentleman will yield, I want to thank the gentleman very much for those very complimentary remarks.

I would add one other area which is not legislative veto but at least it would provide some burden on the agencies to run these rules and regulations through what we call a regulatory analysis. The gentleman will recall that I originated some of the original words or legislative language around here as we attempted to add that to some of the bills. It is now in the Federal Trade Act. It is the requirement that rules be fed through some type of regulatory analysis. It is in the Consumer Product Safety Act, and we also have that in the pending so-called regulatory reform bill.

It would seem to me that that, too, should be made a part of this as we go forward in any proposals that we put forward, not only legislative veto, but also the requirement that the agencies put these proposed rules through some regulatory analysis, put them through the prism to see what colors come out.

Mr. LEVITAS. I thank the gentleman for his contribution.

Mr. PASHAYAN. Mr. Speaker, will the gentleman yield?

Mr. LEVITAS. I yield to the gentleman from California.

Mr. PASHAYAN. I thank the gentleman for yielding, and I, too, would like to compliment the gentleman from North Carolina (Mr. BROYHILL). He is one of the leaders of the House and a man who brings a broad and deep experience to this issue. I find it gratifying that a man of his long and eminent standing here in Washington regards it important that the Congress somehow try to grapple with the enormous amount of rules and regulations, especially issued by the agencies which are at least five or eight times as many each year as the Congress passes laws.

A real question of the age, one of the serious questions of the age, is: Can Congress seriously grapple with the enormous issuance of rules and regulations produced by the Federal bureaucracy every year?

I have an idea that I should like to share with the gentleman who, of course, is well known for taking leadership in regulatory reform and legislative reform, and I am happy to be a cosponsor of his H.R. 1776 which, of course, will go a long way in addressing these problems that we have been talking about if, of course, the Supreme Court should only allow us to do so. But I have an idea for a statute that I should like to get the opinion of from the gentleman in the well.

Perhaps we could pass a statute that has these four features in it: A generic requirement, with the exception of emergency rules and regulations, that all rules and regulations not take effect for 60 days after they have been proposed in the Federal Register and that they be laid before the Congress; that the Congress have an opportunity—and I mean by "the Congress" both Houses—to pass a resolution disapproving the proposed regulations.

Now, under the Chadha decision, if the Chadha decision is as expansive as some of us think it might be, that the concurrent resolution disapproving these proposed regulations would not have legal effect. So the agencies could go ahead and issue the regulations and make them become effective.

But under the statute I am thinking about proposing, the third part of the statute would say that if the Congress, within the 60 days, should pass a concurrent resolution disapproving the regulations, which still can take effect, that that creates a legal rebuttable presumption that the regulations are ultra vires of the statute, that is to say, it creates a legal rebuttable presumption that the regulations are beyond the congressional intent of the statute which the regulations are supposed to conform to.

The fourth part of this statute that I am thinking about developing and introducing would give the House of Representatives and the U.S. Senate, or Members individually of both of those bodies, standing in Federal appellate courts to challenge the regulations, having on their side, of course, the rebuttable presumptions that the regulations are in fact beyond the initial intent of Congress in passing the statute, which should be superior to the regulations.

I was wondering whether the gentleman thinks that is an idea worth consideration?

Mr. LEVITAS. Well, first of all, let me thank the gentleman from California for his contribution and also for the diligent effort he has made in the last number of years to work on this important issue of legislative veto. I certainly wish the gentleman all the luck in the world in the amicus brief that he has submitted to the Court.

I hope that the Court—although I have little expectation—will give it consideration and provide a further opportunity to review this matter.

With respect to the specific outline of proposal that the gentleman has made, even before the Chadha decision, which simply reinforced my feelings, I have for years declined to predict what the U.S. Supreme Court will do. That is like trying to find a black cat in a dark room at midnight. You just do not know where it is going to show up. So I would hesitate to presume what the Court would do either as to the question of how they would treat a rebuttable presumption, whether they would argue that Congress does not have the right to interpret the intent of laws, that is the role of the courts, or as to whether they would acknowledge the standing of a Member of Congress who was not specifically aggrieved as an aggrieved party in a case or controversy.

So leaving aside the constitutional or legal issues that might be involved, I would think that any mechanism of the sort, including the sort that the gentleman has proposed, is something that we really very seriously ought to consider, and this proposal, if the Court would let it stand, would be one of the arrows in our quiver of how you could get at these regulations which go beyond the intent of Congress, and it is just that type of innovative thinking and other innovative ideas that I hope this conference on sharing of power will focus on.

It is very likely that Congress has delegated too much power to the executive branch and to the agencies, and we have probably done it very sloppily and poorly when we have done it on many occasions.

□ 2000

If nothing else, the Supreme Court decision may force us to do a better job of legislating, and for that, regardless of what else, we may give them thanks.

One of the things that some of the Members of this House have found out in the last few days is that we are not just talking about vetoing rules and regulations issued by the unelected bureaucracy. Some of the people in this House who were opposing our efforts to get control over the bureaucracy have all of a sudden waked up to find that it applies to the War Powers Act, it applies to the Budget Control and Impoundment Act on rescissions and deferrals, it applies to the foreign military arms sales, it applies to the nuclear nonproliferation, and I could go on and on. Those are sort of pets of certain elements within our body who thought that they would be somehow immune when the Supreme Court struck down the legislative veto.

But the fact of the matter is, and I look forward to seeing the list that the gentleman from North Carolina will be putting in the RECORD, but if you look at Justice White's opinion and see how this spreads out over the entire area of government, powers that this Congress would have never, never delegated to a President or to an agency without some callback, I think demonstrates to me—I said I was not going to comment on the opinion of the majority, even though I am sorely tempted to, but I am about to weaken to that temptation, because what has happened, regardless of the legal merit of that opinion, or lack of merit, the majority's opinion displays an abysmal ignorance of the way in which our Government works.

What they have done with this opinion, not understanding the trade-offs, the lack of hermetically sealed compartments in government, but a workable system with checks and balances, what they have done is caused this train wreck of government.

Mr. BROYHILL. Mr. Speaker, will the gentleman yield?

Mr. LEVITAS. I am happy to yield to the gentleman from North Carolina.

Mr. BROYHILL. I thank the gentleman for yielding again.

Mr. Speaker, the gentleman commented, of course, on the fact that when the Court made its decision, it also had the effect probably of repealing the Budget and Impoundment Act, which means that the President may be able to impound funds.

That does raise an interesting question. There may be some of us, the budget cutters and others, who are for that, but on the other hand, it cuts both ways. Congress has passed these programs, they have appropriated funds to fund the various programs, and it may not be the intent of Congress to cut moneys in that area.

We do know, of course, that in some State legislatures the Governors are given item vetoes; however, in those cases there is at least a response by the legislative branch to that item veto which is not available in the case of impoundment.

So it may be that we need to take a look at this whole area of the powers of the President to impound funds.

Mr. LEVITAS. The gentleman is absolutely correct, and perhaps as we have this conference on the sharing of power and take a look at a possible constitutional amendment, there may be some tradeoff between a line-item veto on the one hand and a legislative veto on the other hand.

We get back to the fundamental question about this whole question, and that is a question that we ought to ask ourselves and our constituents ought to ask us: Who makes the laws in this country? Is it the elected Members of Congress who are accountable to the American people, or is it the unelected bureaucracy? I think that the Supreme Court at this point has said it is mostly the unelected bureaucracy and our responsibility is to get back to the Constitution and make sure it is the people who elect the representatives in this Republic.

Mr. PASHAYAN. Mr. Speaker, will the gentleman yield?

Mr. LEVITAS. I yield to the gentleman from California.

Mr. PASHAYAN. I thank the gentleman for yielding.

Mr. Speaker, as the gentleman knows, I love rules and procedure and I spent some considerable time studying this version of rules and procedure, the legislative veto, but from the historical point of view and this device, the legislative veto, can be traced to our early Congresses.

In discussions between the gentleman and I, I think I pointed out to the gentleman, and I appreciate his recalling it earlier in his remarks, that in 1804, for example, the Congress passed a legislative veto provision, and that was in emulation of British statutes the Parliament had been using throughout the 18th century, the century in which our Constitution was written.

Surely the framers of our Constitution and our Founding Fathers in the early Congresses were aware that Parliament for centuries had been delegating the authority to various executive agencies or officials to issue rules and regulations, and Parliament had developed a scheme by which procedurally they could manage the production of these rules and regulations by a parliamentary device. In England it is called the Lane procedure, and here we call it the legislative veto. Our early Congresses did it. It was part of what the Congress and the framers assumed that legislative power meant when they vested, in writing the Constitution, all the legislative power in the Congress of the United States. It is one of the things the Legislature did, the Legislature being modeled principally after Parliament. That had been done for centuries. It was not that big a thing, really.

But historically, it has been the entire Legislature that has enjoyed the right, and not one of the Houses independently. Of course, in submitting the amicae brief, one of the points we hope the Court will decide on in the Chadha case is that it was a one-House veto. That one-House veto might well not be constitutional because there is no historical precedent for it. There is ample historical precedent for the entire Legislature, whether Parliament or Congress, exercising the right to manage these informal kinds of laws which, of course, rules and regulations are because they are not described in the Constitution at all.

In that sense, in this country, Congress is really acting not in a constitutional capacity, which it acts in when we pass statutes here. That is a constitutional capacity. Really, the legislative veto permits Congress to act in a statutory capacity, just as the issuing of rules and regulations is a statutory and not a constitutional law.

Mr. LEVITAS. I thank the gentleman for his historical perspective, which I hope will be persuasive to the Court.

In conclusion, let me say this, Mr. Speaker: Several days ago, after the Court's decision, and we began to relalize the impact of this upon the Congress, I remember having a conversation with a colleague of ours who has generally opposed our efforts at legislative veto over rules and regulations. He at first blush was rather pleased with the Court's decision; if not with the logic, at least with the result.

I said to him in the course of our conversation, "I know how you feel about rules and regulations. You like them. Therefore, you do not like to see them vetoed. But by the time you come back from the Fourth of July district work period, under this Court's decision, the President of the United States could have taken the following action without any legislative rejection procedure which now exists, or used to exist."

I said, "By the time you come back to Washington, the President of the United States could have deployed troops in El Salvador, he could have sold F-16's to Jordan, and he could have impounded all the money in the jobs bill," all three of which would have caused some discomfort to our colleague and his constituency.

Whereupon, he suggested, after reflection, that perhaps we needed to pass a 6-month moratorium on the exercise by the executive agencies and the President and the other agencies of any of the delegated powers until we have decided which ones we want to take away and which ones we want to restructure, which sort of brings it

home when it sort of begins to get your ox in the ditch.

The fact of the matter is, this is a broad, far-reaching constitutional matter affecting the course of Government. We will develop the mechanisms to redress this imbalance. It may not be as surgical or as neat as the legislative veto. They may not be as tidy. They may work with a great deal of meat ax effect.

□ 2010

It may tie the hands of the Presidency and agencies of Government, which really could use more discretion in some areas; but we will not permit a tyranny of the unelected and we will not permit a tyranny of the bureaucracy and we will maintain the power of the people through their elected representatives in this Republic.

● Mr. ALEXANDER. Mr. Speaker, I rise to commend my friend and colleague from Georgia (Mr. LEVITAS) for the superb work he has been doing on the legislative veto.

I believe the recent Supreme Court decision was a serious mistake.

I believe it demonstrated an unfortunate lack of understanding of the legislative process and the process of government.

I believe it will take months, perhaps years, to fully undo the damage of the Court's decision.

Mr. Speaker, the legislative veto has been a constructive bridge between the executive and legislative branches of government.

We live in a complex world, where government must make important decisions involving a multitude of controversial and technical questions.

This complexity has led Congress to delegate certain of its powers to regulatory agencies.

These regulatory agencies have on numerous occasions acted beyond the scope of commonsense and reason. At times they have acted beyond their legal mandate.

The result of their mistakes has been a frustration among the American people. They favor regulation that is cost effective and sensible. They are urgently concerned about environmental protection, regulation to protect safety and health and fair and free competition. They support these efforts and they support them strongly.

They do not support inefficient or unfair regulation.

They do not support regulation that reduces employment and raises the cost of doing business without a significant public benefit.

Congress—instead of abandoning Government regulation—sought to make it more fair and careful through the vehicle of the legislative veto. It is not the perfect vehicle but it has been the best one around.

For these reasons I am disturbed by the recent Supreme Court decision. It creates the danger of a tyranny by bureaucracy. It creates the opposite danger the Congress could overreact and strip regulatory agencies of powers they legitimately exercise in the public interest.

I hope cool heads will prevail.

Congress should carefully analyze the implications of the Supreme Court decision and devise a method of restoring the powers that the Supreme Court has just restricted.

I will be working closely with Mr. LEVITAS and others to consider different ways of accomplishing these objectives.

I particularly commend Mr. LEVITAS, who throughout this debate has conducted himself with vision, scholarship, and political acumen.●

EL SALVADOR

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from South Carolina (Mr. HARTNETT) is recognized for 60 minutes.

GENERAL LEAVE

Mr. HARTNETT. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks in regard to my special order here this evening.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from South Carolina?

There was no objection.

Mr. HARTNETT. Mr. Speaker, I yield to the distinguished gentleman from Virginia (Mr. WOLF).

Mr. WOLF. Mr. Speaker, I appreciate this opportunity to address the House to share with my colleagues some observations on a trip I made from June 16-20 to El Salvador with 10 other Members.

The situation in El Salvador is very complex and I visited El Salvador to try to develop a better understanding of the problems faced by the people of that war torn and economically devastated country. The 3 days I spent in El Salvador do not qualify me as an expert on this issue. I will say, however, that those 3 days were very intense. While I did attend numerous official briefings, I also spent considerable time in the countryside, talking with people and listening to their views on the war, their government, their future, U.S. involvement, and what they felt the answers were to build a better future for their families and their country.

I had an opportunity to travel throughout the country, talking with everyone from the Human Rights Commission and leaders of the Catholic Church to military prisoners, shopkeepers, and 5-year-old kids living in squalid conditions that defy description. In those travels, I was very moved by the eloquence of the people of El Salvador that I met. I talked with a 16-year-old soldier who told me he joined the army "to protect my country and my family because I love my country," and others who just want to be left alone to work and live in peace.

From those conversations I realized that one of the most pressing needs in El Salvador is an improved ability of the people of El Salvador and their government to tell their story so that the people of this country and the world can understand that this is a war that touches the lives of El Salvadorans in a tragic and true sense.

Virtually no one I spoke with, from government officials to private citizens, said they wanted or needed American troops in El Salvador. They feel this is an El Salvadoran matter and should be handled by the people of that country. At the same time, virtually everyone I spoke with said the U.S. economic aid and military technical assistance were essential to the survival of any hope that one day El Salvador would become an economically viable nation in which basic freedoms are allowed. Few persons I spoke with doubted for a moment that the current government and progress that has been made there would collapse within months if U.S. assistance were terminated or substantially reduced.

In evaluating my trip, I have concluded that the future of the people of El Salvador will depend on continued economic and political reforms as well as continued military assistance.

Elections are scheduled this fall. The fact that 82 percent of the electorate voted in the last election is an encouraging sign and hope for the future.

The economy is currently in a shambles. Historically, El Salvador has had one of the highest poverty rates in the world. In recent years, the Government has broken up many of the large estates and distributed land to the peasants. These and other reforms have been helpful. However, the Communist-backed guerrillas have been methodically destroying bridges, power lines, and other public works and have prevented the harvesting of crops. The result is that in the last few years, the El Salvadoran economy has experienced a negative growth rate.

While a military victory may not be possible in the foreseeable future, a strong, well-trained military is essential to provide a relatively safe environment in which political and economic reform can continue.

Without the ability to provide security, political and economic reforms are doomed, a Communist-backed guerrilla victory is inevitable and the loss of any hope of assuring basic freedoms to the people of El Salvador is a virtual certainty.

Thus, I believe continued and even expanded economic assistance and military assistance, in the form of training and supplies are essential to give hope for a better future. There is no need or demand for U.S. troops in El Salvador, but continued assistance can give the people of El Salvador the time and ability to solve their own problems. I also believe the private sector and church groups in the United States should be encouraged to increase their involvement by providing technological expertise to improve agriculture, health care, industry, transportation, and housing in El Salvador.

Finally, I believe that more American elected officials and opinion leaders should be encouraged to visit El Salvador, to talk directly with and listen to the people. Such visits, I believe, would be valuable to improve understanding of the situation in that country among the American people.

Mr. Speaker, I had the good fortune to take a trip with the gentleman from South Carolina and other Members a weekend ago to El Salvador. I will briefly sum up some of my observations.

I might say at the beginning, visiting El Salvador for 3 days does not make me an expert and I am the first one to acknowledge that; but when we were there, we had the opportunity to have the traditional briefings from the government and from the military and different groups; but we also spent quite a bit of time going out into the field and talking with the peasants, the soldiers, and other people in that country.

I think it would be important for the American people if they could hear about El Salvador and what is going on in El Salvador through the lips and the individual faces of the different people in El Salvador and not always hearing it from the elected leaders in that country and in this country.

Virtually no one—no one that we spoke to in El Salvador thought that it would be necessary to have American troops in El Salvador. No one, absolutely no one from the government to the private citizens felt that that would be the case.

In evaluating my trip, I think that it is important that we continue the military aid that President Reagan is asking for. I think that is important, not because that will bring about an ultimate complete and total military victory. No one seems to be looking for and seeking a total military victory; but why the military is important and why the military assistance program and assistance and supplies are important is because the Communist backed guerrillas, and it is important to know they are backed by the Communists in Cuba and Nicaragua and ultimately from the Soviet Union, but the Communist backed guerrillas are destroying the infrastructure, the economic infrastructure of El Salvador. I have pictures here of bridges that have been blown up. They call it the Golden Bridge, which was destroyed; buses destroyed, powerlines destroyed, and eveywhere you go the guerrillas have done this.

What they have really done and the reason they have done this is to try to bring the government down by destroying its economic base.

What I cannot understand is how people from El Salvador, whether they be guerrillas or not, could destroy that economic base, which means that young children, 2 and 3 and 4 and 5 years old, starve because of that or do not have electricity or do not have power or do not have health care or do not have training or education.

In one province that we went in, San Vicente Province, a hundred and some schools had been shut down because of the Communist guerrillas that had come in and the government forces went back in to take over the province to open up the schools.

Who can want to shut down schools when young people are getting an education?

El Salvador is a very poor country. That is why the military is important, to allow economic growth to take effect so that they can house the people, train the people, educate the people and have health care.

Second, the military support is necessary so that they can continue to make the political reforms and gains that they are now making. No one will deny that there have been human rights violations in El Salvador still going on, but fewer today than ever before.

I would like to call publicly on the churches in this country, the corporations in this country, the civic groups in this country, to go down and bring additional economic aid to the refugees. We had an opportunity to go into a refugee camp and see the displaced poor people. The only group that was feeding those poor people was World Vision from this country, nobody else, not even their own government, nobody else.

I would like to see the churches, and I am a member of the Presbyterian Church and I hear the Presbyterian Church speaking out on so many issues that quite frankly they ought not to be speaking out on; this would be a great opportunity for my church, the Presbyterian Church, to go down there and give aid and feed these young kids in these refugees camps, inoculate them, give them shots for TB, have doctors go down there and help these people.

I would like to see universities, church groups, civic associations, corporations, and the medical profession go down there. Do not get involved in the war and the military aid, but go down there and help these impoverished young people.

There are two other points that I think would be helpful, if a lot more of our leaders in this country, both from Government, State, and local governments, mayors and State educators and all types would go down there and visit the people of El Salvador and talk to the 16- and 17-year-old soldiers out in the field, talk to the peasants that just want to be left alone to grow their cotton or grow their coffee, talk to the businessmen that are so tired of the Communist guerrilla violence and talk to them and see what they are actually saying.

In closing, Mr. Speaker, I want to thank the gentleman from South Carolina for giving us this opportunity. I want to thank the Members for allowing me to go on that trip and again urge that what the President is doing in El Salvador is correct. Let us continue that military aid, not to get that total military victory, but to bring about that economic growth so they can feed themselves, educate those children, and have a house and a home, as we like to have in America, and lastly, to continue to make the political reforms that they are making.

Mr. HARTNETT. Mr. Speaker, will the gentleman yield?

Mr. WOLF. Yes, I yield.

Mr. HARTNETT. I had the pleasure of accompanying the gentleman from Virginia on this trip. I only want to observe what an astute observer the gentleman must be to have made the observations about the poor people of that country.

I think one of the finest things the gentleman said in his outstanding remarks tonight was the fact that our churches, and the gentleman mentioned the fact that he is a Presbyterian, I am a Catholic, and my own bishops have so concerned themselves with the many people who might die, who might die in a political holocaust, that they have spent countless hundreds of thousands of dollars having conferences and meetings, worrying about people who might die in a nuclear holocaust, when we have innocent children and poor people starving to death right now in El Salvador because of that internal strife.

I think the fact that the gentleman has called upon the American people through their churches and their charitable organizations to help those people is the solution and I commend the gentleman for his remarks and his contribution to this special order.

Mr. HUNTER. Mr. Speaker, will the gentleman yield?

Mr. WOLF. Yes, I yield.

Mr. HUNTER. Mr. Speaker, I thank the gentleman for yielding.

I want to commend the gentleman from Virginia for being an eloquent spokesman for this Congress. I like to

think perhaps my church, the Midway Baptist Church in San Diego, can become involved in sending some economic aid, some social aid down to those folks.

In listening to the gentleman's comments, I look at the statistics and I am reminded in fact of the $231.2 million that we are spending in fiscal year 1983. Of that, $204.9 million is economic aid to try to feed those children and clothe them and give them some of the things that they need to survive and only $26.3 million is military aid.

I thank the gentleman for his camaraderie and for his contribution to this trip. I think if our aid to Central America and our policy is shaped by the gentleman from Virginia, we are going to prevail.

I thank the gentleman for yielding.

□ 2020

Mr. ROEMER. Mr. Speaker, will the gentleman yield?

Mr. HARTNETT. I now will yield to the gentleman from Louisiana (Mr. ROEMER).

Mr. ROEMER. Mr. Speaker, I thank my colleague from South Carolina for yielding.

I also want to thank my colleagues, 11 plus myself, who accompanied me and allowed me to accompany them on the trip to El Salvador. I was the token Democrat in the crowd and I appreciate the courtesy and the opportunity of going.

I also want, as a matter of record, Mr. Speaker, to thank the American officials and the officials of the El Salvadoran Government in that country. They treated us well. We had almost 4 full days of briefings in the countryside and in the city, and I found it very beneficial.

A couple of quick points, if the gentleman will allow me to continue.

First of all, I went because I read an article in a national publication that said that Members of Congress in this decade would be dealing with money issues and perhaps military issues, foreign policy issues, in Central and South America, and the article went on to point out that most Members of Congress had never been to the area. That article struck me a couple of months ago as being true, and so when this opportunity arose I quickly took it, and I thank you for allowing me to go.

I went asking myself four questions and I would like to try to answer briefly those four tonight. First of all, do the people of El Salvador need our help? Second of all, do the people of El Salvador deserve our help? Third of all, if we answer those first two questions in the positive, what kinds of help should we yield? Finally, what lessons from Vietnam, through Korea and back up to today should we learn in the kinds of assistance we give?

Do they need our help? It did not take us many hours in that country to answer that question yes.

The economy in El Salvador, unlike America, or Japan, or West Germany, or most other countries in the world is shrinking in size. We were told in El Salvador that over the last 2 years their gross national product was down an aggregate of 10 percent. The economy is based on commodities such as coffee, cotton, sugarcane, the price of which commodities is all down. And the economic infrastructure being destroyed has, as the gentleman from Virginia already stated, hurt the El Salvadoran economy.

El Salvador needs our help because as a nation it is not stagnant but, in fact, economically is shrinking.

Second of all, they need our help because they are in a desperate military situation. There are 6,000 to 8,000 rebels loose in the countryside who are in effect fighting the Government of El Salvador and bringing its military to a standstill. It is my belief after talking to the U.S. adviser in El Salvador that one-half of the countryside is controlled today, day in and day out, by the rebels, well armed, well trained, dedicated fighters, and they are giving the Government of El Salvador fits.

The answer to the question: Do they need our help, is a definite yes.

A tougher question is do they deserve, at a time of fiscal difficulty in this country, a third of a billion dollars in assistance outside of our borders to the south? I think the answer to that question is yes, too.

First of all, because of the proximity of El Salvador to the United States. We left Washington, D.C., and 4 hours later by jet we landed in El Salvador. That is a shorter period of time than it takes to fly from Washington to Los Angeles. It is that close to this country.

That is a selfish reason, but it is something that we have to consider.

We were told that there are 300,000 to 500,000 El Salvadoran former citizens now living in the United States, and that is a country still trying to maintain its freedom. If that freedom were to collapse, if the Communist rebels were to take over, as happened in Southeast Asia, for example, and the wholesale slaughter of human beings, the rigid imposition of a dictatorship, the foot soldiers, the foot people, the closeness of El Salvador to the United States would mean many more hundreds of thousands of immigrants.

Now that is a selfish reason. But let me give you more positively reason why I think the country of El Salvador deserves our assistance.

El Salvador is not a dictatorship. It is not a government that was imposed by someone else. A year ago they had free elections in El Salvador. Over 80 percent of the eligible voters risked literally their lives and their property to go vote in almost warlike conditions and 84 percent of the people for whom they voted now serve in the Government. The Government of El Salvador is a people's government and they are serving in that country today.

In addition, human rights has been brought up. It has been a disaster in many countries on this Earth and El Salvador is no exception. But the truth is in our meeting with the Human Rights Commission we found that the incidence of human rights violations is down by more than a half in a little over a year, not perfect, but progress.

Finally, there has been talk of land reform in El Salvador. They had a three phase program. Mr. Speaker, phase 1 has been implemented and carried out. Phase 3 is in the process now.

There is some discussion over phase 2. Phase 2 would take farms as small as 10 and 20 acres and divide. But we met on our trip with the Secretary of Agriculture in El Salvador, who is a graduate of a college in the United States, and he is talking of a way to keep the farms productive and allow the campesinos victory gardens, as a place to put their home and a place to call their own. Land reform is continuing in El Salvador.

To sum up all of those things, El Salvador is in close proximity to our country, the fact that they have had free elections and it is not a dictatorship; the fact that they are healthy politically; the fact that human rights conditions are improving; the fact that land reform is ongoing; I say the country and the Government of El Salvador deserve our assistance.

The final two questions: What kinds of help shall we give if we are going to give anything? Some would say that the problem is a military one and what we need to do is impose kind of our military view of the world in El Salvador.

That is not what they want. That is not what they are asking for.

All they are asking for in terms of military aid is the weapons with which to fight and the training by which they can win. They are not asking for American troops. They are not asking that our boys and our commanders go down.

They are asking that we give them some military help of a certain quantity on time so that they can fight their war to keep their country free.

In addition to the military help they are asking for economic aid, and because of all of the reasons I have listed here tonight, the economic aid is a necessary ingredient and part of the package.

For those people who sit in our country and think of Vietnam and look to El Salvador and say that a

military victory alone is possible are wrong. And those who sit here and say we can do nothing are wrong.

The clear evidence that we accumulated in our short visit was that the army units trained by the U.S. military establishment and trained in the United States are very capable of fighting in El Salvador. In fact some of the rebels avoid at almost any cost conflicts with our trained troops.

The form of help is economic and military; neither alone, but those together.

Finally, if my colleague from South Carolina will yield for a minute more, finally we were all bothered, I know I was in El Salvador with the kind of lessons we might have learned in the last 10 years in Vietnam and other places. What kinds of mistakes should our President and this Congress avoid when we view El Salvador?

Three come to mind. First, we should avoid the feeling that a military victory is the goal. The military are just a shield to allow our economic roots, to allow the political changes, to allow the democratic process to take hold and grow in El Salvador. Do not let anyone misunderstand me tonight. I am not asking that we can simply or easily win a war in El Salvador. We cannot win anything in El Salvador. Only the Salvadorans can win and they are not asking us to fight a war for them. They are asking them to help them fight that war.

The first mistake that we must avoid from the President of the United States down is to look at El Salvador and think only of the military.

The second thing that I think we ought to avoid is to feel that we can impose either our way of life or our rule in El Salvador. That should neither by our goal nor should be the process by which we try to assist that country.

We need to seek regional assistance in the area. From the Caribbean Basin Initiative of our President on up and down, we ought to encourage and promote regional solutions to the problems in Central and Latin America, because you see, it is not El Salvador alone. We know from our trip that the rebels are talking not just about El Salvador. They are talking from Nicaragua to El Salvador, to Guatemala, to Mexico, to all over the region. So we must turn to the region, the Contadora effort and all of the rest of it. The President must begin to emphasize the regional nature of the conflicts and encourage regional cooperation.

□ 2030

And finally, the big mistake that we must avoid is the direction by which we look south; we must never look down.

I was impressed in El Salvador, yes, with the military, yes, with the Government, but most of all, the people. They deserve our help and our respect and we ought to look at them as true compatriots trying to defend their freedom and not look down, look straight ahead with them to promote freedom and democracy in Central America.

I thank the gentleman from South Carolina for allowing me to go on the trip. That is my biggest thing and thank him for allowing me to speak tonight.

Mr. HARTNETT. I thank the very able gentleman from Louisiana.

He may have been the lone Democrat but I will tell you this, he is a very eloquent spokesman for what unfortunately is a dying philosophy in the great Democratic Party.

I commend the gentleman for his dedication to human rights, decency and democracy in that brave and strugling little country of El Salvador.

Mr. ROEMER. If the gentleman will yield, I thank him, he said that just like I wrote it. I appreciate it.

I am reminded in my Louisiana homespun way that if you and I had a friend in trouble, we provide that friend some help. That is the kind of folks we are from Congress. We have a friend in Central America in trouble, and we ought to help him.

Mr. HARTNETT. The gentleman's remarks are very well taken. I hope your political future is as long as your heritage has been brave.

Mr. ROEMER. No comment, Mr. Speaker.

Mr. HARTNETT. I would like to yield such time as he may consume to the gentleman from Ohio, the very capable Representative (Mr. McEWEN).

Mr. McEWEN. Thank you, Mr. Speaker. I, too, wish to join my colleagues in commending the gentleman from South Carolina for taking this special order and allowing us this opportunity to convey to our friends throughout this country our impressions and insights upon our visit to our friend, El Salvador.

El Salvador's Government is now under duress and I think that one of the points that we need to convey to the American people presently is what was emphasized by the gentleman from Louisiana moments ago, that we are dealing with a representative government, elected by the people, in which 85 percent of the electorate went to the polls under extreme duress and chose their constituent assembly.

They were threatened by the rebel guerillas, the Communist-backed guerrillas, with death, with destruction on the way to and from the polling booths, with being sought out after the election and yet overwhelmingly the people of El Salvador chose democracy and freedom.

When we ask to support our friend with either economic aid or with military aid, we do so because we support the principles of democracy. We support the principles of representative government. And those of us who live in the central United States are sometimes not drawn into the geographic, geopolitical impact of where Central America is, vis-a-vis our homes in southern Ohio.

But as was pointed out by our previous speakers, Central America is only, in El Salvador's instance in particular, a 900-mile automobile trip to the border of the United States. It is a 2-day drive. And these people have called for our aid; they have called for our help and while we may have turned our back in some areas around the globe in the past, if we ignore these cries for assistance in democracy in Central America, I submit America will have to hold its ears because of the close proximity of these, our friends, in Central America.

My addition at that point would be also to emphasize what was shared with us not only by the economists, economic and political leaders, the Government leaders and military leaders, that the goal of the Communist-backed guerrilla effort which totals in the neighborhood of 1 to 1½ percent of the electorate, 1 to 1½ percent of the population of El Salvador, their dedicated mission is complete totalitarian control of all of Central America. And the insights shared with us from both, as I say, the Government leaders as well as the military leaders is that 7 to 10 million refugees will seek their protection, will seek their security in the United States of America.

And the purpose of our taking this special order tonight, and the purpose of our raising this issue in consciousness, to the important forefront of the American people is for them to understand precisely what is at stake in the years ahead, should we turn our back or ignore what is happening in Central America.

If those 7 to 10 million refugees from throughout Central America are forced to seek survival in the United States, this impact of 20,000 to 50,000 Central Americans in each congressional district across this country will make such a tremendous overload on our schools, on our hospitals, on our social welfare services, on our housing assistance efforts, that every Member of this Congress will have great amounts of effort and time and consideration being given to how to cope with that problem in the years ahead.

So, I say, as I may borrow from the gentleman from South Carolina, who so ably led our delegation, that America will have to face this issue now or face it later and I believe it is in the best interests of freedom that those who understand what is underway there, to begin to focus on this issue,

to do what they know to be correct and know to be right and that is to face this issue now in the best interests of freedom, in the best interests of democracy and as well in the best interests of the Government of the United States.

Mr. HUNTER. Will the gentleman yield?

Mr. McEWEN. I yield to the gentleman.

Mr. HUNTER. I thank the gentleman for yielding.

I appreciate the statements that he has made and the study that he has invested in this part of the world. I would ask the gentleman: It is my understanding that there are presently some 500,000 Salvadorans who can be classified as refugees from the struggle which is now taking place in El Salvador. I understand that about 200,000 of those people are now residing in Los Angeles.

I can recall reading an article the other day in one of the local newspapers which was entitled, "The President Invokes the Old Immigration Argument."

It appears to me that in fact this Nation has become a refuge, not only for Salvadorans, but for families, for Afghans and for a number of people across this world who have been forced, perhaps because the United States did not take the right steps when they could have taken them, did not make the investments that they should have made at an earlier time in the game. These refugees have openly sought refuge in the last great haven of democracy, and that is the United States. So, I think that the point that the gentleman from Ohio is making is a well-documented point. I think we are now the host to about 10 percent of Cuba's original population and I am sure that a great many of those fine people would have rather stayed in Cuba had they had the opportunity to live there under a democracy.

Unfortunately, the United States, as they have done historically, underestimated the importance of that sector of the world and the importance of being good neighbors to those people and the situation has arisen in which we have a great many people now fleeing from the crises in Central America today.

So, I appreciate the gentleman's statement. I can remember a statement that the gentleman made to me one time in describing the situation when we were down here, I think after listening to some of the leaders and listening to some of the problems that they had with their struggling democracy, because we talked to a number of leaders of opposing parties. Some of them as in the United States did not have complimentary things to say about the leaders of the other parties. I remember the gentleman from Ohio walking out of one of those meetings and saying that Benjamin Franklin left the Constitutional Convention and was asked by a lady what form of government, Mr. Franklin, do we have? He said, "You have a democracy ma'am, if you can keep it." At least that was the quote that the gentleman from Ohio gave me.

□ 2040

And I think that these folks have a democracy, if they can keep it, and if they can make it grow.

I appreciate the eloquence of the gentleman from Ohio and his appreciation of the situation and the investment in time and effort that he has given to this trip.

Mr. McEWEN. I thank the gentleman. And I would just also elaborate upon his observations concerning the situation of the refugees. And this is not speculation on our part, as the gentleman has mentioned. Ten percent of the population of El Salvador is presently within the borders of the United States. We have seen what a policy in Nicaragua has done to those people and the conditions in their country presently under a totalitarian Communist regime of Sandinista government.

And yet even more so, as the gentleman from Louisiana was pointing out, and as the gentleman from Virginia stated so eloquently, is the place where those 1 to 1½ percent guerrillas have entered the area, where they have destroyed the powerlines that provide the water purification system which forced the young children to drink polluted water and to cook polluted food and thereby increase disease and death and starvation. Where the guerrillas have done this throughout El Salvador, they have created refugee camps in their own country. And the gentleman from Virginia and I were able to tour some of those refugee areas and there is just simply no way that anyone can see the poverty and the contempt that obviously those Communist guerrillas have for the young people and society that they wreak this havoc on.

Mr. HUNTER. If the gentleman will yield further, do I understand the gentleman to be explaining the situation in that they have got to take a crop off of their fields this season. They have a short food supply. In fact, it is the guerrillas' plan and they are executing that plan presently to prohibit that harvest.

Mr. McEWEN. Absolutely; their goals are to bring the economy to a halt and they are afraid to death. They are scared to death of being placed in a democratic situation of where the Communist representatives have to get the support of the people through the ballot box. They understand that they do not have any chance in the world to be successful in that arena.

Therefore, they go through the countryside shooting the farmers, scaring them off of their land, destroying the infrastructure, as the gentleman knows, just a handful of rebels destroying one bridge on a railroad track can destroy the railroad track. Or one bridge across a river can destroy a highway. Knocking down one powerplant can destroy electricity services to many communities and thereby, as I mentioned, create health hazards in hospitals and water purification centers and all the rest. That is their goal. The Human Services and the Human Rights Commission, as well as the Peace Commission, on a regular weekly basis approach the guerrilla units petitioning them to come in and participate in the democratic process, to place their candidates on the ballot and to run for election and to seek the support of the people. And in every instance they decline to do so because they know they are not representing the people of El Salvador. They are not interested in their welfare, their actions prove that. They are interested in totalitarian overthrow of the Central American governments and that has been their design, not only in Cuba and not only in Grenada and not only in Nicaragua, but now as they are exporting it into Honduras and El Salvador.

Mr. HARTNETT. Mr. Speaker, I have had the privilege of traveling now with 11 truly dedicated Americans, who happen to be fine representatives of the congressional districts which they represent. I had the privilege of going to a troubled area of this world. Sometimes the unforeseen forces of circumstance often move in strange and awesome ways.

At this period in time, in this the last fifth of this 20th century, the unforeseen forces of circumstance has dealt 5 million people in an already overtroubled little nation a very cruel blow. The people of El Salvador are already troubled with poverty, with sickness, with hunger, with social problems, military problems. They do not need to be the focal point in the Western Hemisphere of whether or not democracy, as we know it and have known it for 207 years, is going to survive.

Those brave little people in that struggling minuscule nation have been asked to fight for 225 million Americans our battle for freedom and democracy. And surely as Travis at the Alamo years ago drew a line in the ground with his sword and said, "Let him who would fight cross over, but him who would live better fly."

The line is being drawn for all of America, be it Central, North or South, in El Salvador. You have heard described to you in far more eloquent terms than I could ever here tonight, tell you of the troubles that beseige

these brave people in El Salvador. What we are trying to do is call to the attention of the American people the problems that we as Americans are going to face if we let our neighbors in Central America down.

I could not better explain to you the refugee problem we are going to have, the disease, sickness, health, educational problems we are going to have, employment problems we are going to have.

I cannot better describe that to you than has been described by those who preceded me to this podium here tonight.

I find it strange that my colleagues over on this side of the aisle impose upon the Government of El Salvador restriction after restriction to receive a few paltry hundred million dollars. In 1961, a Democrat President stood on those steps outside. You remember his inaugural address because you remember the part that said, "Ask not what your country can do for you, but what you can do for your country."

You know what was said also by that President in that address on that very cold and bleak January morning, he said to the American people and to the world:

> Let every nation know, every nation, whether it wishes us ill or whether it wishes well that we, the American people, will pay any price. We will bear any burden, we will endure any hardship, we will oppose any foe and we will aid any friend in the defense of liberty and democracy at home and around this world.

Has that price now become too expensive when it may be $2 or $300 million? Has it become too expensive when it includes 55 military advisers in our neighboring country of El Salvador? Have we the American people forgotten our heritage, our Continental Congress? Have we forgotten our struggle for democracy?

Well, I can only tell you this, that our way of life as we know it, the love of all the great things of America that we hold so dear is now focused in Central America. And as was said by our colleague, it is a you-can-pay-me-now or pay-me-later situation. We, your Congress, can decide to aid El Salvador with a few hundred million dollars now in her struggle or we can pay later with hundreds of thousands of American lives when it becomes our struggle.

I cannot emphasize enough to my colleagues here in this Congress and to any Americans who might be listening the need for this great Nation of ours, the greatest nation in the world, to help a struggling neighbor and an endeared friend, do what we can to see that democracy in Central America, and particulary in El Salvador lives on for generations to come.

□ 2050

And as has been said by my colleague, the gentleman from Virginia, it is time the American people had the will and had the resolve not only to aid them through our churches but through our great government, and to say that we are drawing that line, that proverbial line, with our sword in the sand, and saying to Marxists and Communists around this world, "Communism stops here; we the American people are going to see to it that communism stops here in El Salvador."

Mr. Speaker, I urge my colleagues who have not been there to visit that troubled nation, and then you come back and see whether those brave people are not deserving of our help.

Mr. HUNTER. Mr. Speaker, will the gentleman yield?

Mr. HARTNETT. I yield to my colleague, the gentleman from California.

Mr. HUNTER. Mr. Speaker, I want to thank the gentleman for his leadership. He took this large delegation down to El Salvador and managed to keep everything running, managed to get us a well-loaded schedule. We got in, and we saw more commissions and more people and made more tours than we possibly thought we could make, and we want to express our gratitude to the gentleman from South Carolina, not only for his eloquence, but for his leadership on this trip.

Mr. HARTNETT. I thank the gentleman for his very kind words. I just hope that all of our colleagues will take it upon themselves to visit El Salvador.

Mr. HUNTER. Mr. Speaker, I think the situation has been well described by my colleagues who have preceded me. I would like to touch on just a couple of points.

We had a chance to talk with a number of politicians while we were in El Salvador, and we talked to politicians from most of the parties, the major parties. As I understand, there are six parties that are fairly substantial parties—there are a number of other smaller ones—and we talked mainly with the leaders of the Christian Democrats who took, I believe, 42 percent in the last election, and the members of the Arena Party, who took a much smaller percentage of the vote but who managed to hustle around and build enough coalitions with the other small parties that they captured a majority of the constituent assembly.
